

# CONGRATULATIONS!

Your region has been selected as a target for a humanitarian food drop. Please alert everyone in your area to the impending arrival of a Food Delivery System (FDS) device.

1 The following instructions will guide you through the identification, recovery, and operation of the Food Delivery System. Careful attention to these instructions will ensure countless hours of enjoyable food preparation and consumption.

First, locate and identify the FDS as it falls.

2 Upon recovering the FDS, remove the parachute first. To do this, locate the retaining clip at the base of the device.

3 Detach the clip. Gather the parachute and remove it from the cooking area. (Warning: parachute may be flammable.)

4 Grab the FDS and carefully lift it to an upright position. Although the tripod structure of the tail fins makes it stable virtually anywhere, we recommend a flat surface for maximum cooking enjoyment.

5 Remove the restraining pin from each of the three clips surrounding the nose cone.

6 Remove the nose cone and set it aside.

7 Locate and remove the bay door. Remove all contents and check them carefully against the inventory below.

8 Remove the upper grill and pan from the top of the FDS.

9 Spread the charcoal along the lower grill. Light the coals, then replace the upper grill. Add meat and corn.

Before operating the FDS, please remove and check the inventory. If any of the following items are missing or damaged, please contact \*\*\* immediately for replacement.

-  Charcoal (1 bag)
-  Ground beef
-  Hamburger buns (10)
-  Matches
-  Cigarettes
-  Corn (8 pieces)
-  Potato chips
-  Coleslaw
-  Dill pickles
-  Barbecue tongs
-  Marshmallows
