DESDE EL PACÍFICO

Francis Pisani

Internet y política: sentirán el impacto

En términos tradicionales, Internet no rivaliza con la televisión. El número de estadounidenses que vieron el primer debate entre Al Gore y George Bush se contaba en decenas de millones, frente a los cientos de miles que visitaban sus sitios. El impacto de Internet existe, sin embargo, y se aprecia de manera cualitativa. Ya no se utiliza para dar a conocer las posiciones de los partidos. Los candidatos tienen una "verdadera estrategia Internet". Es un instrumento fundamental para la organización de los activistas y para la recaudación de fondos.

Los ciudadanos se organizan y quienes quieren información sobre candidatos, partidos y temas importantes los encuentran en sitios independientes, páginas fundamentales para saber de donde vienen los fondos recaudados.

Coherentes con sus posiciones a favor del neoliberalismo, la gente de las *puntocoms* está a favor del republicano George Bush (57%, contra el 38% de Al Gore). El *lobby* informático toma fuerza. Su participación en la financiación de las campañas de los dos principales partidos se ha triplicado desde la última elección presidencial.

Este año, los demócratas de Arizona han participado en las primarias desde su PC. El fenómeno será mayor dentro de cuatro años. Pero nadie ignora los problemas que la práctica implica: la seguridad y confidencialidad del voto, y el hecho de que favorece

a los más ricos porque tienen más probabilidad de acceder a un ordenador. Lo que significa que podrían aumentar su participación en el escrutinio.

Dos experimentos han llamado la atención por las consecuencias inesperadas que pueden traer. Uno es la compra de votos en el sitio VoteAuction.com. Las autoridades lo cerraron y el creador dice ahora que fue una broma para mostrar los excesos de la "industria electoral". No descartemos que en ciertas circunstancias otros intenten copiar el mecanismo con otros fines. El otro es la tentativa de NaderTrader.org de montar un intercambio de votos. Los votantes de Nader votarían a favor de Gore en los estados donde el demócrata necesita todos los votos para imponerse. Por contra, los partidarios de Gore votarían a favor de Nader en los estados donde Bush gane. El objetivo es lograr una victoria de Gore y un 5% de votos a favor de los ecologistas para que sean reconocidos y reciban fondos federales.

Internet modificará las prácticas políticas en todo el mundo. Lo empieza a hacer en EE UU. Pero no se puede preveer cuando se hará sentir en la política de otros países.

FROM THE PACIFIC

Francis Pisani

Internet and policy: they will feel the impact

In traditional terms, Internet does not compete with the television. The number of Americans who saw the first debate between A Gore and George Bush counted in tens of millions, as opposed to the hundreds of thousands that visited their sites. The impact of Internet exists, nevertheless, and it is appraised of qualitative way. No longer it is used to present the positions the parties. The candidates have a "true strategy Internet". It is a fundamental instrument for the organization of the activists and the collection of bottoms.

The citizens organize themselves and who want information on candidates, parties and important subjects find them in independent sites, pages fundamental to know from where the collected bottoms come.

Coherent with her positions in favor of the neoliberalism, the people of *puntocom*s are in favor of the republican George Bush (57%, against 38% of A Gore). *The computer science* lobby taking forces. Its participation in the financing of the campaigns of both main parties has been tripled from the last presidential election.

imagen.jpg

This year, the democrats of Arizona have participated in the primary ones from their PC. The phenomenon will be greater within four years. But nobody ignores the problems that the practice implies: the security and confidentiality of the vote, and the fact that it favors to richest because they have more probability of acceding to a computer. What means that they could increase his participation in the scrutiny.

Two experiments have called the attention by the unexpected consequences that can bring. One is the purchase of votes in the VoteAuction.com site. The authorities closed it and the creator says now that it was a joke to show the excesses of the "electoral industry". We do not discard that in certain circumstances others try to copy the mechanism with other aims. The other is the attempt of NaderTrader.org to mount an interchange of votes. The voters of Nader would vote in favor of Gore in the states where the democrat needs all the votes to prevail. On the other hand, those in favor of Gore would vote in favor of Nader in the states where Bush wins. The objective is to gain a victory of Gore and a 5% of votes in favor of the ecologists so that they are recognized and they receive federal bottoms.

Internet will modify the political practices anywhere in the world. It begins it to do in EE UU. But it is not possible to be preveer when it is made feel in the policy of other countries.

LA NOTICIA EN LA RED

Ana Pantaleoni

La subasta de votos por Internet enturbia el proceso electoral norteamericano

Las 'webs' que parodian a los candidatos crecen a medida que se acerca el 7 de noviembre

Por si fuera pequeño el protagonismo de la red en estas elecciones estadounidenses, las subastas electrónicas de votos han puesto la guinda. La página web Voteauction.com permitía hasta la semana pasada a los electores vender su voto al mejor postor. Se registraron hasta 15.000 personas, a unos 10 dólares por voto. Las autoridades de Chicago obligaron a cerrar el sitio que ha tardado horas en disponer de nuevo dominio: vote-auction.com. Con todo, esta e-campaña pionera continúa. Las páginas oficiales se enfrentan a arduos rivales, las que parodian a los candidatos. Con imágenes de Bush, botella en mano, o documentos sobre Gore y su supuesto consumo de marihuana.

El 50% de la población norteamericana con derecho a voto se queda en casa el día de las elecciones, según explica la página Vote-auction.com. Si hay que elegir entre Al Gore y George Bush, ¿por qué no hacerse de paso con unas pesetillas, cuando Internet lo facilita? El sitio, que se ha visto obligado a cerrar y cambiar el nombre dominio, recuerda la tradición que existe en Estados Unidos de compra de votos desde los tiempos de George Washington.

Pese a todo, comerciar con los votos en Estados Unidos es ilegal. El creador de Voteaction.com es un joven recién licenciado en

imagen.jpg

George Bush y Al Gore en el baile de los candidatos de Olsommer.com.

Ciencias Políticas de Nueva York llamado James Baumgartner. Su objetivo era criticar el sistema electoral estadounidense, en el que las empresas donan dinero a los candidatos.

Baumgartner, por consejo de las autoridades de Nueva York, cerró la *web* y vendió el dominio, a finales de agosto, a una empresa de comercio electrónico en Austria. La empresa, por orden de las autoridades de Chicago, ha tenido que cambiar el dominio (*vote-auction.com*). El nuevo dueño afirma que está evaluando el impacto del sitio y, en caso de éxito, igual lo aplica en otras elecciones en el mundo. Ha instalado el servidor en Bulgaria, lejos de la justicia de EE UU. A la polémica se sumó el hecho de que siete personas colgaron su voto en el sitio de subastas eBay. La puja fue retirada de inmediato.

Votos aparte, la red y los dos candidatos a las presidenciales de Estados Unidos de 2000, el republicano George Bush y el demócrata Al Gore, se han convertido en compañeros inseparables. Para lo bueno y lo malo. Primero fue montarse la página. Después incorporar entradas en español a los sitios para ganarse a los 25 millones de votantes hispanohablantes que viven en EE UU. Ahora todos los candidatos ya pueden encontrarse en una nueva arena política, la del ciberespacio, y participar en un foro electoral virtual. Una iniciativa sin precedentes. Una colaboración entre los 17 sitios con mayor tráfico, como CNN o Yahoo, siguen la actividad cotidiana de la campaña electoral. Se trata de *Web White and Blue 2000 Cyber Debate*, de la Fundación Markle, que recoge el mensaje del día y una pregunta de un internauta que supuestamente deben responder los candidatos.

El ciberdebate pretende complementar los tres debates televisivos que se celebran durante estos comicios. Pero a diferencia de la televisión, en el ciberdebate están abiertos a cualquier candidato que aparezca en las listas electorales. El temor de los organizadores es que esta iniciativa, que se puso en marcha el pasado 1 de octubre, cuente con una participación escasa.

El baile de los candidatos

Los candidatos presidenciales también surgen en Internet con otros quehaceres menos intelectuales. En *Olsommer.com*, Bush y Gore bailan al ritmo de la música. Hillary Clinton tampoco se escapa del meneo. Desde www.gargaro.com/algore.html se puede viajar a otros enlaces, muchos, que parodian algunos rasgos de la personalidad de Al Gore.

Lo mismo ocurre con la página Gwbush.com. En ambas páginas no queda candidato con cabeza y ofrecen sus argumentos para no votarlos: mentiras o adicción a las drogas o al alcohol. Perfilan la otra cara, la más satírica, del demócrata Al Gore y el republicano George Bush. Y es que Internet, además de informar, también se ríe de las elecciones norteamericanas.

Ana Pantaleoni

The auction of votes by Internet clouds the North American electoral process

' webs' which they parodian to the candidates grows as it approaches the 7 of November

In case outside small the protagonism of the network in these American elections, the electronic auctions of votes have put the sour cherry. The page Web Voteauction.com allowed until the last week the voters to sell its vote to the best postor. They were registered up to 15,000 people, to about 10 dollars by vote. The authorities of Chicago forced to close the site that has taken hours in arranging dominion again: vote-aution.com. Yet, this pioneering and-campaign continues. The official pages face arduous rivals, those that parodian to the candidates. With images of Bush, bottle in hand, or documents on Gore and their assumption marijuana consumption.

50% of the North American population with right to vote remain in house the day of the elections, according to explains the Vote-auction.com page. If there is to choose between A Gore and George Bush, why not to become of passage with pesetillas, when Internet facilitates it? The site, that has been forced to close and to change the name dominion, remembers the tradition that exists in the United States of purchase of votes from the times of George Washington.

Whatsoever, to deal with the votes in the United States is illegal. The creator of Voteaction.com is a young person just licensed in

imagen.jpg

George Bush and To Gore in the dance of the candidates of Olsommer.com.

Political Sciences of called New York James Baumgartner. Its objective era to criticize the American electoral system, in which the companies donate money to the candidates.

Baumgartner, by advice of the authorities of New York, closed *the Web* and sold the dominion, at the end of August, to a company of electronic commerce in Austria. The company, by order of the authorities of Chicago, has had to change the dominion (it votes-auction.com). The new owner affirms that he is evaluating the impact of the site and, in case of success, equal applies it in other elections in the world. He has installed the servant in Bulgaria, far from the justice of EE UU. To the controversy added the fact that seven people hung their vote in the site of auctions eBay. He bids up it was retired immediately.

Votes separate, the network and both candidates to the presidential ones of the United States of 2000, the republican George Bush and the democrat To Gore, have become inseparable companions. For good and the bad thing. First it was to mount the page. Later to incorporate entrances in Spanish to the sites to gain to the 25 million hispanohablantes voters who already live in EE UU. Ahora all the candidates they can be in a new political sand, the one of the cyberspace, and participate in a virtual electoral forum. An initiative without precedents. A collaboration between the 17 sites with greater traffic, like Cnn or Yahoo, follows the activity daily of the electoral campaign. And *Blue is Web White 2000 Cyber Debate*, of the Markle Foundation, that gathers the message of the day and a question of an internaut which supposedly they must respond the candidates.

Ciberdebate tries to complement the three televising debates that are celebrated during these elections. But unlike the television, in ciberdebate they are open to any candidate who appears in the electoral lists. Fear of organizers is that it is initiative, that started up 1 of October the past, counts on a little participation.

The dance of the candidates

The presidential candidates also arise in Internet with other less intellectual tasks. In Olsommer.com, Bush and the Gores dance to the rate of music. Hillary Clinton does not escape either of I wag. From www.gargaro.com/algore.html it is possible to be traveled to other connections, many, that parodian some characteristics of the personality of A Gore.

The same it happens with the Gwbush.com page. In both pages it is not left candidate with head and offer its arguments not to vote

them: lies or addiction to drugs or the alcohol. They outline the other face, most satirical, of the democrat To Gore and the republican George Bush. And it is that Internet, besides to inform, also is ed ***reflx mng of the North American elections.

La subasta de votos por Internet enturbia el proceso electoral norteamericano

Las 'webs' que parodian a los candidatos crecen a medida que se acerca el 7 de noviembre

Por si fuera pequeño el protagonismo de la red en estas elecciones estadounidenses, las subastas electrónicas de votos han puesto la guinda. La página web **Voteauction**.com permitía hasta la semana pasada a los electores vender su voto al mejor postor. Se registraron hasta 15.000 personas, a unos 10 dólares por voto. Las autoridades de Chicago obligaron a cerrar el sitio que ha tardado horas en disponer de nuevo dominio: vote-auction.com.

imagen.jpg

George Bush y Al Gore en el baile de los candidatos de Olsommer.com.

Con todo, esta e-campaña pionera continúa. Las páginas oficiales se enfrentan a arduos rivales, las que parodian a los candidatos. Con imágenes de Bush, botella en mano, o documentos sobre Gore y su supuesto consumo de marihuana.

El 50% de la población norteamericana con derecho a voto se queda en casa el día de las elecciones, según explica la página Vote-auction.com. Si hay que elegir entre Al Gore y George Bush, ¿por qué no hacerse de paso con unas pesetillas, cuando Internet lo facilita? El sitio, que se ha visto obligado a cerrar y cambiar el nombre dominio, recuerda la tradición que existe en Estados Unidos de compra de votos desde los tiempos de George Washington.

Pese a todo, comerciar con los votos en Estados Unidos es ilegal. El creador de Voteaction.com es un joven recién licenciado en Ciencias Políticas de Nueva York llamado James Baumgartner. Su objetivo era criticar el sistema electoral estadounidense, en el que las empresas donan dinero a los candidatos.

Baumgartner, por consejo de las autoridades de Nueva York, cerró la *web* y vendió el dominio, a finales de agosto, a una empresa de comercio electrónico en Austria. La empresa, por orden de las autoridades de Chicago, ha tenido que cambiar el dominio (vote-auction.com). El nuevo dueño afirma que está evaluando el impacto del sitio y, en caso de éxito, igual lo aplica en otras elecciones en el mundo. Ha instalado el servidor en Bulgaria, lejos de la justicia de EE UU. A la polémica se sumó el hecho de que siete personas colgaron su voto en el sitio de subastas eBay. La puja fue retirada de inmediato.

Votos aparte, la red y los dos candidatos a las presidenciales de Estados Unidos de 2000, el republicano George Bush y el demócrata Al Gore, se han convertido en compañeros inseparables. Para lo bueno y lo malo. Primero fue montarse la página. Después incorporar entradas en español a los sitios para ganarse a los 25 millones de votantes hispanohablantes que viven en EE UU. Ahora todos los candidatos ya pueden encontrarse en una nueva arena política, la del ciberespacio, y participar en un foro electoral virtual. Una iniciativa sin precedentes. And the winner is...

Amerikanerne kom i havn med en ny president fra det ytterliggående høyrepartiet før året var omme. Det hele begynte jo å bli litt pinlig for myndighetene i guds eget land, verdens beste demokrati osv, med diverse rettslige kjennelser på at stemmene ikke kunne telles opp på nytt. Kalkulerer man inn fusk, ettersom en håndtelling ville vært så farlig?

Av Hans Berger

Valget på ny president i USA har lite med politikk å gjøre. Ingen andre steder er det lommeboka som til de grader bestemmer muligheten for å stille til valg. Bush' budsjett var på 3,3 mill pr dag. Nå ble ikke valget avgjort i valglokalene, men allerede ved denne seremonien gikk det klart fram hvor lite demokratisk dette sirkuset er. Halvparten av de stemmeberettigede fant det bryet verdt å stemme. Og ettersom markedskreftene er enerådende i USA, er det også mulig å selge stemmer pr auksjon. (nettsiden www.voteauction.com) Det er meldt om ekstremt store andeler forkastede stemmer fra svarte bydeler mange steder i Florida. Enkelte steder opp mot 30 %. Stemmesedlene i solskinsstaten var i tillegg utformet slik at det var svært lett å velge feil. Og som om ikke dette er nok: selve valgordningen er utformet på en uforståelig måte som gjør den som har flest stemmer til taper.

”Vinneren” av valget, tidligere Texas-senator Bush står fram som enda en skuespiller med skinnhelligdommen og dobbeltmoralen lysende i blikket. Som senator er han direkte ansvarlig for fullbyrdelsen av 163 dødsdommer. Vi har ikke glemt Karla Tucker eller oldemoren Betty Lou. Vi glemmer ikke psykisk utviklingshemmede Oliver Cruz, som med sin mentale alder sannsynligvis ikke forsto hva som skjedde da bødlene spente ham fast. Eller Johnny Penry som med IQ 56 trodde på julenissen. Bush' regime siler effektivt ut overskuddsbefolkningen. Det blir på samme nivå som en lokal am-car-entusiast uttrykte det før valget: ”Det kan jo være like greit å bli kvitt gærningene.”

31 millioner sulter i USA. 1, 8 millioner amerikanere sitter bak murene. Det er en fordobling siden muren falt i 1990. Bush' løsning er liberale våpenlover, mer politi og flere dødsdommer. Logrende akademikere står klar til å behandle symptomene på sykdommen ved å finne spissfindige feil i avvikernes hoder og gener. Dette er også business i mulighetenes land, hvor en større og større andel av den s.k. vellykkede befolkningen er avhengig av ulike kjemiske stimulanser for å klare hverdagsstresset (Prozac nation). Det er ikke uvanlig at amerikanerne må ta tre jobber for å få endene til å møtes.

Valget i USA gir begreper som ”demokrati” og ”valgfuske” nye dimensjoner og betydninger.

Det er klart det må juks til for å forsvare et slikt system. Men valget i USA vil uunngåelig øke motstanden mot galskapen i dette systemet. Frontene vil skjerpes mellom rik og fattig, hvor kapitalmakten vil ty til hardere midler for å slå ned opposisjon. (Jfr unntakstilstanden i Seattle 1999) De amerikanerne som slåss for rettferd skal vite at de har støtte i andre land. Vi må ta stilling og organisere aktiv motstand mot de kreftene som har tatt over verden. Utenrikspolitisk er nemlig USAs nye president livsfarlig.

「自票の売却」希望者が6000人以上も登録(上)

Mark K. Anderson

i-mode Mail to a Friend Print

探偵小説やテレビ番組によれば、犯罪者とは、違法な行動を密に行なう人のことだ。だが、現実世界の一部の法律違反者は、「手に入れたら、見せびらかせ」という格言を信奉している。

『ポートオークション・コム』(Voteauction.com)のオーストラリア人所有者は、最近、手に入れたものを見せびらかした。

ポートオークション社は、6000人以上の米国人が、自分たちの大統領選の票を最高額の入札者に売るべく、同社のオークションに登録していると豪語しているのだ。票を売るとは米国のあらゆる州の法律で違法とされている行為だが、同社は現在、さらにビジネスを拡大する計画を立てているところだ。

プレスリリースによれば、ポートオークション社は、『投票者エンパワーメント・キット』と『アクション・チーム』を使うことで、より多くの潜在的な顧客を獲得し、オンライン媒介者の介入なしに投票者の不正を促進できると考えているという。

こうした行為は、『誠実な投票プロジェクト』のデボラ・フィリップス氏を悩ませている。

フィリップス氏は、8月以来、露骨に違法行為を行なうポートオークション・コムにとってのいい話(英文記事)や悪い話(英文記事)を追い続けてきた。きっかけとなったのは、ワイアード・ニュースが8月、風刺的で非合法で貪欲な資本主義というこの奇妙な寄せ集めについて、初めてレポートした(英文記事)ことだ。

「なぜ米司法省は介入しないのか」とフィリップス氏。「なぜ米政府からのコメントがないのか。なぜ議会は公聴会を開かないのか」

連邦選挙委員会(FEC)のブラッド・スミス委員は、連邦および州の関係者が二の足を踏んでいるのには、3つの理由があると指摘した。

情報の漏洩が懸念されている。米政府は、ビザ無しで米国に入国できる27ヵ国すべてに対し、同種のパスポートの発行を10月までに開始するよう要請しているため、この問題には他国からも反論が出ている。

 [ブログで生計を立てる——あるブロガーの挑戦](#)

 [米グーグル：断片的な記憶で映画情報を検索可能に](#)

 [「ネット言葉」は表現の破壊？ それとも進化？](#)

 [「スタイリッシュな携帯電話」がユーザーのニーズ\(下\)](#)

1つは、同サイトを管理するはずの法的機関の対応を招くほどには、同サイトがメディアの注目を集めていないと思われるため。

2つ目は、同サイトが、他国から投票の不正行為を扇動するという新しい形をとっているため、どの法的機関が担当すべきかが不明だということだ。司法省が担当すべきなのか、国務省なのか、地方自治体の選挙管理委員会なのか、あるいは州全体の選挙管理委員会なのか、それとも、各州の検事総長なのか、インターネットの監視を専門に行なっているその他の機関なのか。(スミス委員は、この件をFECが扱うことはないだろうと見ている。)

3つ目の理由は、ポートオークションのようなサイトが持つ脅威が、どの程度に及ぶかまだ不明だということだという。

「だが、もしこれが大規模な問題になりはじめたら、何らかの行動が、迅速に取られると考えている」と、スミス委員は述べた。

ポートオークションは、ニューヨーク在住の大学院生であるジェームズ・バウムガートナー氏が開発し、それをオーストリアの事業家、ハンス・ベルンハルト氏が買い取ったもの。ベルンハルト氏によると、同氏の投資に対して、米国の反発はすでに始まっているという。

米国での違法行為を推進する企業を国外で運営していることに対して、嫌がらせの電子メールを受け取っていることに加え、同サイトは数多くのハッキングや電子的な攻撃を受けていると、ベルンハルト氏は報告している。

票の売り手と買い手を記載したポートオークションのリストについて、ベルンハルト氏は、「このデータに興味を持つであろう米国政府の各行政機関が、このリストにかなりの関心を持つということ、われわれはよく理解している」と述べた。「われわれの仕事は、このデータを守ることだ。このデータを公にすることは望まない」

このサイトを最初に思いついたバウムガートナー氏は、芸術学修士課程に在籍する学生。彼はこのサイトを、米国政治における大規模な腐敗を批評するものとして思いついたという。現時点で7万5000ドルの入札があることと、6000人の登録者がいることなど、いくつかの事実は公表できると彼は述べた。

全体的な傾向として言えば、票を売る方は20代の男性で、少なくとも何らかの大学教育を受けており、大学生も多く含まれているとバウムガートナー氏は述べた。一方、票を買う方の全体像は、40代の裕福な共和党員ということになるという。

票に対する入札は州ごと行なわれている。こういった入札のほとんどすべては、自分の支持者への票数を増やしたいという個人が行なっているものだ。ポートオークションの票に入札している企業は3社だけだが、それぞれの入札額は「2億ドルという規模」だとバウムガートナー氏は述べた。

バージニア大学の政治学者であり、1996年に出版された『ダーティー・リトル・シークレット：持続する米国政治の腐敗』(Dirty Little Secrets: The Persistence of Corruption in American Politics)の著者でもあるラリー・J・サバト氏によれば、インターネット・オークションのこういった売り手側、買い手側のプロフィールは、米国における票買収の歴史と一致するものだという。

特に興味深いのは、同サイトの記載によれば、1票あたりの値段は10～20ドルという範囲だという事実だ。この額は、インターネット以外の形態で個人の票が売買されている場合と同じなのだ。

「票の価格は、いつでもだいたい20ドルになるようだ」と、サバト氏は述べた。「これが現行の価格にちがいない。これは、考えてみると妥当な金額なのだ。10ドルには、かつてのような価値はない。20ドルあれば、店を選べばかなりいい食事ができる。票をそうやって考える人がいるのだと思う。彼らにとって、票は、1回の食事と同じ価値なのだろう。悲しいことだが、これが真実なのかもしれない」

" Sale applicant of our vote " as many as 6000 or more register (on)

Mark K Anderson

According to the detective novel and television program, the offender, the ことだ of the person who does illegal conduct secretly. Is, but the breach of law person of portion of the actual world, " when you insert in the hand, has believed the proverb that flaunt " .

' The boat auction * COM ' (the Voteauction.com) the Austrian human owner recently, flaunted those which were inserted in the hand.

The boat auction corporation, in order that the American 6000 or more, sells the vote of its own Presidential election in the bidder of the highest amount, you have boasted it has registered to the auction of the same company. The fact that vote is sold is the behavior which is made illegal with law of all states of the United States, but the same company presently furthermore is about the plan which expands business is raised.

According to press release, you say you think the boat auction corporation, ' the poll person エンパワーメント * kit ' and ' the action * team ' by the fact that you use, can acquire many latent customers, without intervention of the online mediator can promote the illegality of the poll person.

Such behavior ' [sincere poll project](#) ' has bothered デボラ * Philips.

Philips continued to chase ever since August, for the boat auction * COM which does injury [openly good story \(the english article\)](#) and [bad story \(the english article\)](#). Any where it has become opportunity, ワイアード * news August, being satirical, being illegal, it reported (the english article) it is thing for the first time concerning this strange [mixture, avaricious](#) capitalism.

" Why the American administration of justice ministry not intervening?" Philips. " Why there

[As for " net word " destruction of expression? Or evolution?](#)

[" Stylish portable telephone " needs of user \(under\)](#)

is no comment from American government? Why, as for the national assembly not opening public hearing?"

The blood * Smith member of federal election commission (FEC), pointed out to that the authorized personnel of federation and the state steps on two feet, there are three reasons.

As for one, in the extent which causes the correspondence of the legal system of the expectation which manages the same sight, because it is thought the same sight does not attract the attention of the media.

Because as for second, the new shape that is taken, the same sight, instigates the irregularities of poll from the foreign country, it means being unclear which legal system should take charge that. Being electoral commission of the or local self-governing body which is the or state department the administration of justice ministry should take charge, or being electoral commission of the whole state, or, being the other systems which do the supervision or Internet which are the Public Prosecutor General of each state specially? You see (as for the Smith member, probably there are no times when the FEC handles this case.

As for the 3rd reason, you say it means that the threat which the sight like boat auction has, is unclear is the oven which reaches to which.

" Is, but if this starts becoming large-scale problem, you think a some conduct is taken, quickly, ", the Smith member expressed.

The James * バウムガートナー person who is the graduate student of the New York residence develops boat auction, that the Austrian entrepreneur, those which ハンス * Bern hull To buys. According to the Bern hull To, as for the American rally you say vis-a-vis the investment of the same person, already it has started.

As for the same sight when the many hacking and electronic attack are received, the Bern hull To has reported in addition to receiving the email of the harassment vis-a-vis overseas, managing the enterprise which promotes the injury in the United States.

Concerning the seller of vote and the list of the boat auction which states the buyer, " we has understood the fact that, well each administrative organ of the American government the Bern hull To probably will have interest in this data, has considerable interest in this list, ", you expressed. " Our work is to protect this data. You do not desire the fact that this data is made public ",

As for the バウムガートナー person who first happens to think this sight, the student who is on the register in science of arts Master's degree program. As for him you say you happened to think as those which criticize the large-scale corruption in this sight, the American politics. It can publish, him you expressed, several facts such as being bid of 7 ten thousand 5000 dollars at present time and the fact that 6000 register people are.

If you say as entire tendency the method which sells vote with the man of 20 generations, has received a some university education at least, when also the university student is mainly included, the バウムガートナー person expressed. On one hand, as for the entire image of the person who buys vote, you say it means the affluent Republican Party member of 40 generations.

The bid for vote is done every state. It is something where such bid almost the individual that does everything, you would like to increase the number of votes to your own support person. The enterprise which has bid to the vote of boat auction is just 3, but when " 2 hundred million dollars the scale which is said " is, the バウムガートナー person expressed the respective bid amount.

It was the political scholar of the Virginian university, it was published in 1996 ' dirty * Little * secret: Corruption of the American politics which it continues ' (the Dirty Little Secrets: If the The Persistence of Corruption IN American Politics) according to the rally * J * サバト person who is the author, as for profile of such seller side and buyer side of Internet * auction, you say it is something which matches the history of the vote purchase in the United States.

As for especially being interesting, according to the statement of the same sight, as for price per 1 vote it is the fact that 10 - 20 dollars it is the range which is said. This amount is the same as the case where vote of the individual is bought and sold with form other than Internet.

" The price of vote, it seems that with anytime generally reaches 20 dollars ", the サバト person expressed. " Is this current price. This, when you try thinking, is the proper amount. There is no value the at one time way in 10 dollars. If 20 dollars it is, if the store is chosen, the rather good meal is possible. So doing vote, you think the person who thinks is. For them, vote probably is the same value as the meal of 1 time. It is sad forcing thing, perhaps, but this is truth "

Sale £ applicant of ¢ our vote as many as 6000 or more register (on)

Mark K Anderson

September 22nd of 2000 according to the 3:00am PDT detective novel and Ñ Ú Ë Þ program the ¢ offender is the , ±, Æ, ¾ ; of the person who does ¢ illegal conduct secretly, but as for the breach of law person of portion of the ¢ actual world when you insert in the ¢ ¢ hand, the ¢ flaunt believes the proverb, £ the ;

' The Î Þ ° Ä µ ° , ¼ ® Ý ¥ ° Ñ ' (the Voteauction.com) as for the µ ° ½ Ä Ø ± human owner the ¢ flaunts those which recently were inserted in the ¢ hand the ;

As for the Î Þ ° Ä µ ° , ¼ ® Ý corporation in order that the American ¢ 6000 or more sells the vote of ¢ its own Presidential election in the bidder of the highest amount, as for selling the ; vote you have boasted it has registered to the µ ° , ¼ ® Ý of the ¢ same company, it is the behavior which is made illegal with law of all states of the United States, but the ¢ same company presently the ¢ furthermore the plan which expands the Ë Þ ¼ Þ Ë ½ is raised about the ;

According to the Ì ß Ú ½ Ø Ø ° ½ you think the ¢ Î Þ ° Ä µ ° , ¼ ® Ý corporation the ¢ ' poll person ´ Ý Ê ß Ü ° Ò Ý Ä ¥ · - Ä ' and ' the ± , ¼ ® Ý ¥ Á ° Ñ ' can acquire many latent customers compared to the ¢ by the fact that you use and without intervention of the ¢ µ Ý × ² Ý mediator can promote the illegality of the poll person, the ;

As for such behavior the ¢ ' sincere poll Ì ß Û ¼ Þ ª , Ä ' bothers the Ä Þ Î Þ × ¥ Ì ° Ø - Ì ß ½ person the ;

As for the Ì ° Ø - Ì ß ½ person the ¢ ever since ¢ August for the Î Þ ° Ä µ ° , ¼ ® Ý ¥ ° Ñ which does injury openly good story (the english article) and bad story (the english article) that it had become the ; opportunity which is continued to chase the ¢ Ü ² ± ° Ä Þ ¥ Æ - ° ½ being the August ¢ satirical, being illegal, the ¢ the Ú Î ß ° Ä it did for the first time concerning this strange mixture, avaricious capitalism (the english article) is thing the ;

The ¢ why as for the American administration of justice ministry whether not intervening whether the £ and the Ì ° Ø - Ì ß ½ person ; ¢ why there is no ° Ò Ý Ä from American government the ; why the national assembly whether public hearing is not opened £

Federal election commission (the FEC) as for the Ì Þ × - Ä Þ ¥ ½ Ð ½ member it pointed out there is the reason of ¢ three to ¢ federation and the authorized personnel of the state stepping on two feet the ;

As for one because it is thought the ¢ same » ² Ä does not attract the attention of the Ò Ä Þ ° ± in the extent which causes the correspondence of the legal system of the expectation which manages the ¢ same » ² Ä ;

Because the new shape that is taken, as for second the ¢ same » ² Ä instigates the irregularities of poll from the ¢ foreign country, the ¢ which legal system should take charge, whether the ; administration of justice ministry which means being unclear, should take charge, whether being the ¢ state department whether being electoral commission of the ¢ local self-governing body whether being electoral commission of the whole ¢ or state whether being the Public Prosecutor General of ¢ or ¢

each state whether they are the other systems which do the supervision of the » ² Á À ° È - Ä specially the ; (the ½ Ð ½ member The ; which you see probably there are no times when the FEC handles this case of the »)

As for the 3rd reason means being unclear is the oven where the threat which the » ² Á like the » Í Ð ° Ä µ ° , ¼ ® Ý has reaches to » which the ;

It is the ¢, but if when the » this starts becoming large-scale problem, as for the £ and the » ½ Ð ½ member whom you think » some conduct is taken the » quickly, is expressed the ;

The ¼ Ð ° Ñ ½ Ð ¥ Ê Ð ³ Ñ ¶ Ð ° Ä Å ° person who is the graduate student of » Æ - ° Ö ° , residence develops the Í Ð ° Ä µ ° , ¼ ® Ý and according to the thing ; Í Ð Ù Ý Ê Ù Ä person where the entrepreneur » Ê Ý ½ ¥ Í Ð Ù Ý Ê Ù Ä person of the µ ° ½ Ä Ø ± buys » that vis-a-vis the investment of the » same person as for » American rally already has started, the ;

The enterprise which promotes the injury in the United States overseas, in addition to receiving the electronic Ò ° Ù of the » harassment vis-a-vis having managed as for the » same » ² Á when the many Ê ¯ · Ý , Ð and electronic attack are received, as for the » Í Ð Ù Ý Ê Ù Ä person has been reported the ;

The notion that where as for » us each administrative organ of the American government the » Í Ð Ù Ý Ê Ù Ä person probably will have interest in this Ä Ð ° Ä of the » ¢ concerning the seller of vote and the Ø ½ Ä of the Í Ð ° Ä µ ° , ¼ ® Ý which states the buyer has considerable interest in this Ø ½ Ä of the », the £ which you have understood well as for the ; ¢ our work which is expressed as for making this Ä Ð ° Ä of the ; which is to protect this Ä Ð ° Ä of the » public is not desired the £

As for the Ê Ð ³ Ñ ¶ Ð ° Ä Å ° person who first happens to think this » ² Á as for student ; him who is on the register in » science of arts Master's degree program as for » several facts such as being bid of 7 ten thousand 5000 Ä Ð Ù at the ; present time that you happened to think as those which criticize the large-scale corruption in this » ² Á » American politics and the fact that » 6000 register people are it can publish, as for him is expressed the ;

If you say as entire tendency the method which sells » vote the » has received a some university education at least with the man of 20 generations, when also the » university student is mainly included, as for the Ê Ð ³ Ñ ¶ Ð ° Ä Å ° person the ; one side where you express as for the entire image of the person who buys » vote means the affluent Republican Party member of » 40 generation the ;

As for the bid for vote every state almost as for everything of such bid of the ; which is done as for the enterprise which has bid to the vote of the ; Í Ð ° Ä µ ° , ¼ ® Ý which is something which the individual that is done you would like to increase the number of votes to the » your own support person, just 3 are, but as for » respective bid amount when it is the scale £, ¢ 2 hundred million Ä Ð Ù as for the Ê Ð ³ Ñ ¶ Ð ° Ä Å ° person is expressed the ;

It was the political scholar of the Ê Ð ° ¼ Ð Æ ± university and » it was published in 1996 ' the Ä Ð ° Ä ¯ ° ¥ Ø Ä Ù ¥ ¼ ° , Ú - Ä: corruption of the American politics which are continued ' (the Dirty Little Secrets: If the The Persistence of Corruption IN American Politics) according to the × Ø ° ¥ J ¥ » Ê Ð Ä person who is the author as for the Ì ß Ù Ì ¯ ° Ù of such seller side » buyer side of the » ² Ý À ° È - Ä ¥ µ ° , ¼ ® Ý is something which matches the history of the vote purchase in the » United

States the ;

As for especially being interesting according to the statement of the same » 2 Ä as for price per 1 vote as for this amount of the ; which is the fact that it is the range, 10 - 20 Ä P Û it is the same as the case where vote of the individual is bought and sold with form other than the » 2 Ý À ° È - Ä the ;

If as for price of ¢ vote, as for the £ and the » Ê P Ä kind of person who with » anytime generally become 20 Ä P Û ; this where ; ¢ this which is expressed is current price when the » you try thinking, as for the value if the » at one time way the ; 20 Ä P Û which is not it is in the ; 10 Ä P Û it is the proper amount chooses the » store, so doing the ; vote which can do the rather good meal, » vote as the meal of » 1 time is the ; sad forcing thing it probably is the same value for ; them whom you think the person who thinks is but Perhaps » this is truth the £

「自票の売却」希望者が6000人以上も登録(上)

Mark K. Anderson

2000年9月22日 3:00am PDT 探偵小説やテレビ番組によれば、犯罪者とは、違法な行動を密かに行なう人のことだ。だが、現実世界の一部の法律違反者は、「手に入れたら、見せびらかせ」という格言を信奉している。

『ボートアクション・コム』([Voteauction.com](#))のオーストリア所有者は、最近、手に入れたものを見せびらかした。

ボートアクション社は、6000人以上の米国人が、自分たちの大統領選の票を最高額の入札者に売るべく、同社のアクションに登録していると豪語しているのだ。票を売るとは米国のあらゆる州の法律で違法とされている行為だが、同社は現在、さらにビジネスを拡大する計画を立てているところだ。

プレスリリースによれば、ボートアクション社は、『投票者エンパワーメント・キット』と『アクション・チーム』を使うことで、より多くの潜在的な顧客を獲得し、オンライン媒介者の介入なしに投票者の不正を促進できると考えているという。

こうした行為は、『誠実な投票プロジェクト』のデボラ・フィリップス氏を悩ませている。

フィリップス氏は、8月以来、露骨に違法行為を行なうボートアクション・コムにとってのいい話(英文記事)や悪い話(英文記事)を追い続けてきた。きっかけとなったのは、ワイアード・ニュースが8月、風刺的で非合法で貪欲な資本主義というこの奇妙な寄せ集めについて、初めてレポートした(英文記事)ことだ。

「なぜ米司法省は介入しないのか」とフィリップス氏。「なぜ米政府からのコメントがないのか。なぜ議会は公聴会を開かないのか」

連邦選挙委員会(FEC)のブラッド・ミス委員は、連邦および州の関係者が二の足を踏んでいるのには、3つの理由があると指摘した。

1つは、同サイトを管理するはずの法的機関の対応を招くほどには、同サイトがメディアの注目を集めていないと思われるため。

2つ目は、同サイトが、他国から投票の不正行為を扇動するという新しい形をとっているため、どの法的機関が担当すべきかが不明だということだ。司法省が担当すべきなのか、国務省なのか、地方自治体の選挙管理委員会なのか、あるいは州全体の選挙管理委員会なのか、それとも、各州の検事総長なのか、インターネットの監視を専門に行なっているその他の機関なのか。(スミス委員は、この件をFECが扱うことはないだろうと見ている。)

3つ目の理由は、ポートオークションのようなサイトが持つ脅威が、どの程度に及ぶかまだ不明だということだという。

「だが、もしこれが大規模な問題になりはじめたら、何らかの行動が、迅速に取られると考えている」と、スミス委員は述べた。

ポートオークションは、ニューヨーク在住の大学院生であるジェームズ・パウムガーター氏が開発し、それをオーストリアの事業家、ハンス・ベルナルト氏が買い取ったもの。ベルナルト氏によると、同氏の投資に対して、米国の反発はすでに始まっているという。

米国での違法行為を推進する企業を国外で運営していることに対して、嫌がらせの電子メールを受け取っていることに加え、同サイトは数多くのハッキングや電子的な攻撃を受けていると、ベルナルト氏は報告している。

票の売り手と買い手を記載したポートオークションのリストについて、ベルナルト氏は、「このデータに興味を持つであろう米国政府の各行政機関が、このリストにかなりの関心を持つということ、われわれはよく理解している」と述べた。「われわれの仕事は、このデータを守ることだ。このデータを公にすることは望まない」

このサイトを最初に思いついたパウムガーター氏は、芸術学修士課程に在籍する学生。彼はこのサイトを、米国政治における大規模な腐敗を批評するものとして思いついたという。現時点で7万5000ドルの入札があることと、6000人の登録者がいることなど、いくつかの事実は公表できると彼は述べた。

全体的な傾向として言えば、票を売る方は20代の男性で、少なくとも何らかの大学教育を受けており、大学生も多く含まれているとパウムガーター氏は述べた。一方、票を買う方の全体像は、40代の裕福な共和党員ということになるという。

票に対する入札は州ごとに行なわれている。こういった入札のほとんどすべては、自分の支持者への票数を増やしたいという個人が行なっているものだ。ポートオークションの票に入札している企業は3社だけだが、それぞれの入札額は「2億ドルという規模」だとパウムガーター氏は述べた。

バージニア大学の政治学者であり、1996年に出版された『ダークティール・シークレット：持続する米国政治の腐敗』(Dirty Little Secrets: The Persistence of Corruption in American Politics)の著者でもあるリッチ・J・ハート氏によれば、インターネット・オークションのこういった売り手側、買い手側のプロファイルは、米国における票買収の歴史と一致するものだという。

特に興味深いのは、同サイトの記載によれば、1票あたりの値段は10～20ドルという範囲だとい

う事実だ。この額は、インターネット以外の形態で個人の票が売買されている場合と同じなのだ。

「票の価格は、いつでもだいたい20ドルになるようだ」と、ハト氏は述べた。「これが現行の価格にちがいない。これは、考えてみると妥当な金額なのだ。10ドルには、かつてのような価値はない。20ドルあれば、店を選べばかなりいい食事ができる。票をそうやって考える人がいるのだと思う。彼らにとって、票は、1回の食事と同じ価値なのだろう。悲しいことだが、これが真実なのかもしれない」

Whew, this story is sparking some interest. Ted Koppel brought it up last night in the Nader/Ventura Townhall on Nightline and it was a top side cover story in the St. Paul Pioneer Press.

My basic take is that the story will have a much greater influence on the vote than actual use of these sites. It builds awareness of the electoral college and the fact that it doesn't hurt Gore in Bush solid states to vote Nader and in swing states a Nader vote is a pretty big deal. As long as no money exchanges hands and the vote swapping remains voluntary, I think this is a free speech and freedom of association Internet-era activity. Vote swapping is a form of multi-state vote cancelling. Think of this way, you and your housemate or spouse get in a political argument, out of spite you decide to cancel their vote by voting against their candidate. If this form of communication isn't illegal, how can you tell someone that they can't communicate with someone else voluntarily and voluntarily allow it influence themselves in the voting booth? Vote trading might be unethical and a stupid thing for any political organization to promote overt or covertly, but that does not mean you should restrict group communication on the Internet. Online political speech and association should not be more regulated than legal pornography.

Below are three posts - one from Thom Wyszog, another from the Voting Integrity Project, and finally the real story about the Internet and last minute citizen-to-citizen election influence. I am getting handful of cc: messages everyday on this whole Nader/Gore thing - from individuals e-mailing their friends as well as random e-mail online petitions. Having just thrown a dart at the board ;-)) it tells me that 95 percent of all online political group communication occurs privately among friends and family - in social networks via E-MAIL. In the last week of the election don't be surprised if the e-mail masses have a great "politics online moment" that greatly influences the soft Nader/Bush/Gore/Other supporters and perhaps gets a few remaining undecideds to choose a candidate because X,Y,Z friends e-mail (tell) them to do so.

Cheers,
Steven Clift

Subject: Vote Traders Getting Ambushed

Late last week I posted some information on these vote-trading sites to ClueBot. I'd like to encourage your DO-WIRE subscribers to read through some additional information before thinking too seriously about trading, or swapping, their vote.

In particular, one critic seems to think that that vote-swapping is illegal in the US. If this is true, vote-swappers could be in for legal trouble with the government.

Also, it appears that the vote-trading sites are getting ambushed by people at the FreeRepublic website. Some of the comments posted encourage FreeRepublic people (Bush supporters) to join VoteExchange (one of the vote-trading sites) and pose as a Nader supporter from a battleground state, willing to trade a vote with a Gore supporter from elsewhere. This way they would, theoretically at least, get Gore voters to switch to Nader. I've also heard of people signing up multiple times, with different bogus identities and email addresses.

If the vote-swapping numbers were large enough (which doesn't seem likely), this ambush tactic would help to erode support for Gore and strengthen Bush's position.

The bottom-line seems to be that if you sign up to swap votes with someone, don't be too sure that they'll vote for your candidate - regardless of what they say online.

The critic/this-is-illegal page is ...

<http://www.egroups.com/message/e-lection/213>

The "ambush" page is ...

<http://www.freerepublic.com/forum/a39f86fd9739e.htm> (read the whole page to get the best idea of what they're up to)

The ClueBot page is

<http://www.cluebot.com/articles/00/10/27/1446240.shtml> (comments can be posted here)

Regards,
Thom

Subject: Internet vote trading !?

[Deborah Phillips from VIP sent me this. --LFC]

An alert VIP supporter just provided URL's for some sort of vote-swapping scheme being organized via the Internet. It is rather ingenious and is based on an agreement by third party voters to vote for leading candidates in key precincts in exchange for leading candidate supporters in those less critical precincts agreeing to vote for the third party candidates.

To access the sites and get a more detailed explanation please go to:

<http://www.voteexchange.org/vote001.htm>

<http://www.nadertrader.org/>

Some people have entirely too much time on their hands if you ask me!

But, nevertheless, I think such a scheme is just as illegal under federal and state law as selling your vote, because you are agreeing to accept "consideration" for your vote. Consideration in this case being a vote more favorable to your candidate in a key precinct. If I am correct about this, this is a felony and **SHOULD BE STOPPED IMMEDIATELY!**

Please let me know your thoughts and if you are an official in a position to do something about this, please do it now.

By the way, the perpetrators of VoteAuction.Com are now claiming this whole site is just a hoax. How convenient! Now that the arm of law seems to be ready to strike, they claim it is just a hoax. Well, how would we ever know if consideration (in this case money) had exchanged hands. If it is a hoax, the only way they can prove at this point that they are not violating the law is to open up their site to enforcement officials. Now's the time for the FBI to step in and confirm or deny what has been going on.

I will be so glad when this election is over!

Best regards,

Deborah

- clip -

Minnesota Secretary of State Mary Kiffmeyer wants it to halt, though. While the U.S. Attorney's office in Minnesota said Tuesday that vote-trading sites violate no federal election laws, Kiffmeyer said all the sites, including Win-Win's, are illegal in Minnesota.

``This is selling the electoral process. This is not the right use of the Internet or of your vote," she said. The secretary of state said her office intends to contact the trading sites and will issue a statement today condemning the practice.

Rick Stafford, chairman of the Gore campaign in Minnesota, isn't thrilled about the vote swapping either.

``They (the traders) have good intentions, but we're not encouraging it," he said. ``If (the Nader traders) can't compromise a little bit . . . they shouldn't be playing games and trading their votes with other people in other states."

Steven Clift, editor of Democracies Online Newsletter and one of the world's leading online democracy experts, criticized efforts to shut down the sites, saying they trample on free speech and the right of people to organize politically.

He said he thinks the ultimate impact of the trading sites will not be the direct transfer of votes but in raising the level of awareness among Nader supporters of the impact of their votes.

O'Connor, the Internet veteran, compared the phenomenon to Napster, the controversial company that allows people to share music files over the Internet without paying for them.

"I think the Internet is like water -- it runs around institutions that have existed since the horse and buggy days . . . like the Electoral College."

Here is the real story about how private group communication is influencing the vote . . .

Subject: Fwd: Getting the word out!
Date sent: Wed, 01 Nov 2000 09:31:04 CST

Hello, all,

My sister passed this on to me and I thought I should try and get the word out to my liberal/progressive friends, especially those who are considering a vote for Mr. Nader. And with some of you, I don't know exactly where you stand on politics, so I'm sending this to you, too.

Though I respect Ralph Nader and agree with him more than any other candidate, I'm not convinced that he would be an effective president. President Carter is an amazing, brilliant man, but he was not an effective president. I think Nader would be even less effective because he doesn't know how to play the partisan politics game. As stupid as it is, you gotta play the game in order to get anything done.

Add to this the fact that a vote for Nader is really a vote for W, at least in the swing states of Wisconsin, Minnesota, Michigan, Washington, Oregon, and Florida, and I know I can't vote for Nader knowing it will help W. (Illinois may not be a swing state, but Gore's lead is precarious at best.)

So read what a poli sci professor has to say -- or at least read the last

paragraph of the forwarded message. It might not change your mind, but it's a good overview of what we'll be dealing with if W is elected.

Thanks,

~M

Subject: Vote Traders Getting Ambushed

Late last week I posted some information on these vote-trading sites to ClueBot. I'd like to encourage your DO-WIRE subscribers to read through some additional information before thinking too seriously about trading, or swapping, their vote.

In particular, one critic seems to think that that vote-swapping is illegal in the US. If this is true, vote-swappers could be in for legal trouble with the government.

Also, it appears that the vote-trading sites are getting ambushed by people at the FreeRepublic website. Some of the comments posted encourage FreeRepublic people (Bush supporters) to join VoteExchange (one of the vote-trading sites) and pose as a Nader supporter from a battleground state, willing to trade a vote with a Gore supporter from elsewhere. This way they would, theoretically at least, get Gore voters to switch to Nader. I've also heard of people signing up multiple times, with different bogus identities and email addresses.

If the vote-swapping numbers were large enough (which doesn't seem likely), this ambush tactic would help to erode support for Gore and strengthen Bush's position.

The bottom-line seems to be that if you sign up to swap votes with someone, don't be too sure that they'll vote for your candidate - regardless of what they say online.

The critic/this-is-illegal page is ...

Subject: Internet vote trading !?

[Deborah Phillips from VIP sent me this. --LFC]

An alert VIP supporter just provided URL's for some sort of vote-swapping scheme being organized via the Internet. It is rather ingenuous and is based on an agreement by third party voters to vote for leading candidates in key precincts in exchange for leading candidate supporters in those less critical precincts agreeing to vote for the third party candidates.

To access the sites and get a more detailed explanation please go to:

<http://www.voteexchange.org/vote001.htm>

<http://www.nadertrader.org/>

Some people have entirely too much time on their hands if you ask me!

But, nevertheless, I think such a scheme is just as illegal under federal and state law as selling your vote, because you are agreeing to accept "consideration" for your vote. Consideration in this case being a vote more favorable to your candidate in a key precinct. If I am correct about this, this is a felony and **SHOULD BE STOPPED IMMEDIATELY!**

Please let me know your thoughts and if you are an official in a position to do something about this, please do it now.

By the way, the perpetrators of **VoteAuction**.Com are now claiming this whole site is just a hoax. How convenient! Now that the arm of law seems to be ready to strike, they claim it is just a hoax. Well, how would we ever know if consideration (in this case money) had exchanged hands. If it is a hoax, the only way they can prove at this point that they are not violating the law is to open up their site to enforcement officials. Now's the time for the FBI to step in and confirm or deny what has been going on.

I will be so glad when this election is over!

Best regards,

Deborah

- clip -

Minnesota Secretary of State Mary Kiffmeyer wants it to halt, though. While the U.S. Attorney's office in Minnesota said Tuesday that vote-trading sites violate no federal election laws, Kiffmeyer said all the sites, including Win-Win's, are illegal in Minnesota.

``This is selling the electoral process. This is not the right use of the Internet or of your vote," she said. The secretary of state said her office intends to contact the trading sites and will issue a statement today condemning the practice.

Rick Stafford, chairman of the Gore campaign in Minnesota, isn't thrilled about the vote swapping either.

``They (the traders) have good intentions, but we're not encouraging it," he said. ``If (the Nader traders) can't compromise a little bit . . . they shouldn't be playing games and trading their votes with other people in other states."

Steven Clift, editor of Democracies Online Newsletter and one of the world's leading online democracy experts, criticized efforts to shut down the sites, saying they trample on free speech and the right of people to organize politically.

He said he thinks the ultimate impact of the trading sites will not be the direct transfer of votes but in raising the level of awareness among Nader supporters of the impact of their votes.

O'Connor, the Internet veteran, compared the phenomenon to Napster, the controversial company that allows people to share music files over the Internet without paying for them.

``I think the Internet is like water -- it runs around institutions that have existed since the horse and buggy days . . . like the Electoral College."

Here is the real story about how private group communication is influencing the vote ...

Subject: Fwd: Getting the word out!
Date sent: Wed, 01 Nov 2000 09:31:04 CST

Hello, all,

My sister passed this on to me and I thought I should try and get the word out to my liberal/progressive friends, especially those who are considering a vote for Mr. Nader. And with some of you, I don't know exactly where you stand on politics, so I'm sending this to you, too.

Though I respect Ralph Nader and agree with him more than any other candidate, I'm not convinced that he would be an effective president. President Carter is an amazing, brilliant man, but he was not an effective

president. I think Nader would be even less effective because he doesn't know how to play the partisan politics game. As stupid as it is, you gotta play the game in order to get anything done.

Add to this the fact that a vote for Nader is really a vote for W, at least in the swing states of Wisconsin, Minnesota, Michigan, Washington, Oregon, and Florida, and I know I can't vote for Nader knowing it will help W. (Illinois may not be a swing state, but Gore's lead is precarious at best.)

So read what a poli sci professor has to say -- or at least read the last paragraph of the forwarded message. It might not change your mind, but it's a good overview of what we'll be dealing with if W is elected.

Thanks,

~M

Injunction Generator

übermorgen

Eine Dienstleistung von übermorgen.com via IPNIC.org

Gibt es eine Website, die Sie – mit Hilfe einer höchst subversiven Methode – gerne vom Netz nehmen lassen würden?

Auf unserem Server generieren Sie automatisch eine standardmäßige "gerichtliche Verfügung" (im PDF- oder RTF-Format), in der behauptet wird, die betroffene Website agiere auf illegaler Basis. Dieses Dokument wird anschließend an den zuständigen DNS-Registrar [DNS = Domain Name Service], den Eigner der Website sowie möglicherweise einige Journalisten zur weiteren Veranlassung übersandt. Alles, was Sie selbst zu tun haben, ist das Formular auszufüllen und abzusenden, was keine Viertelstunde in Anspruch nimmt. Sollte die Webseite tatsächlich vom Netz genommen werden, informieren wir Sie über E-Mail.

Diese äußerst nützliche Plattform [IPNIC] entwickelte sich aus unserem Projekt *[Vote-auction]*. Während der *[Vote-auction]*-Operation im Herbst 2001 erließ ein amerikanisches Gericht (Circuit Court von Cook County, Chicago) eine einstweilige Verfügung gegen die "Individuen" (übermorgen, James Baumgartner und andere) hinter *[Vote-auction]*. Diese Verfügung wurde dann per E-Mail an CORENIC, den DNS-Registrar in Genf (Schweiz), gesandt. Nach Erhalt der Verfügung beschloss CORENIC, alle DNS-Dienste betreffend die Domain "voteauction.com" ohne Vorwarnung zu sperren. Nun gehört zwar die Schweiz eindeutig nicht in den Jurisdiktionsbereich eines amerikanischen Gerichts und es ist auch eine ordnungsgemäße Zustellung eines gerichtlichen Schriftstücks über E-Mail nicht möglich, aber dennoch waren wir offline ... Dank dieser kreativen Aktion und Reaktion wurden wir aber dazu inspiriert, diesen öffentlichen Webseiten-Schließungsdienst einzurichten.

Eine Dokumentation zu unserem *[Vote-auction]* "MEDIA HACK" finden Sie unter <http://vote-auction.net> oder in der *Google-Datenbank*.

ACKNOWLEDGMENT

Injunction generator[ubermorgen](#)**A service of [ubermorgen.com](#) via [IPNIC.org](#)****Organizer:**
ORF upper Austria

Is there a Website, which would have you - with the help of a most subversiven method - taken gladly from the net?

On our server you generate automatically a "judicial order according to standard" (in the pdf or rtf format), in which are stated, the Website concerned act on illegal basis. This document is possibly sent afterwards to the responsible DNS Registrar [DNS = Domain Name service], the owner of the Website as well as some journalists for further veranlassung. Everything that you have to do, is to be filled out and mailed the form, which does not take quarter of an hour up. If the web page should be actually taken by the net, we inform you about E-Mail.

This extremely useful platform [IPNIC] developed from our project [*V]ote auction* . During [*V]ote auction* operation in the autumn 2001 issued an American court (Circuit Court of Cook County, Chicago) a provisional one order against the "individuals" (, James Baumgartner and others [ubermorgen](#)) behind [*V]ote auction* . This order was sent then by E-Mail at core NIC, the DNS Registrar in Geneva (Switzerland). After receipt of the order core NIC decided to close concerning all DNS services the Domain "voteauction.com" without preliminary warning. Now belonged Switzerland clearly not into the jurisdiction range of an American court and it is not also a normal feed of a judicial document over E-Mail possible, but we were off-lines nevertheless... Owing to this creative action and reaction we were inspired however to furnish this public web page locking service.

A documentation to ours [*V]ote auction* "MEDIA CHOP" find you under <http://vote.auction.net> or in the Google data base.

CASHVOTE: Stimmen im Zehntausender-Paket.

Das Angebot auf CASHVOTE.com klang verlockend, die Idee bestechend einfach. „Machen Sie Ihre Stimme zu barem Geld“, so die Aufforderung. Nur ein Online-Formular wäre auszufüllen, danach bei der deutschen Bundestagswahl nach Käuferwunsch zu wählen und schließlich zehn Euro zu kassieren. Die verkauften Stimmen sollten im Anschluss an KäuferInnen vermittelt werden. Da gab es das „Ecopaket“ mit 1000 Stimmen für 6250 Euro. Wer mehr wollte, konnte auch 10.000 Stimmen um 59.900 Euro kaufen – Mengenrabatt inklusive. Auf diese Weise, so die BetreiberInnen selbstlos, „würden sogar Nichtwähler zu Wählern“. Das „Vermittlungspotenzial“ bezifferte CASHVOTE.com auf 7,3 Millionen Stimmen.

Von den großen Nachrichtenagenturen DPA und AP über „Bild am Sonntag“ und „Stern“ bis hin zum „Spiegel“ wurde die Geschichte Mitte September groß gebracht. Der deutsche Bundeswahlleiter konterte empört mit dem Gesetzbuch, wonach auf derartigem Verkauf des Wahlrechts bis zu fünf Jahre Haft stehen würden, die Staatsanwaltschaft begann mit Ermittlungen.. Nach zwei Tagen medialer Erregung wurde auf der CASHVOTE-Website eine Stellungnahme veröffentlicht, in der sich das Projekt als Fake outete. Es wäre zu keinem Zeitpunkt ernsthaft daran gedacht worden, mit Stimmen zu handeln. Die Original-Website ist noch als Archiv-Version abrufbar. Die Idee ist nicht neu. In den USA erdachte ein Kunststudent vor zwei Jahren eine Parodie auf das System der Wahlkampf-Finanzierung, aus der im Handumdrehen Ernst wurde. Kurz vor der Präsidentschaftswahl sorgte voteauction.com für erhebliches Aufsehen: Binnen

kürzester Zeit meldeten sich dort 15.000 WählerInnen und etliche BieterInnen – Höchstsumme: knapp 200.000 US-Dollar. Auf vehemente Proteste reagierte der Betreiber der Seite gelassen: Immerhin sei es in den USA durchaus üblich, dass Lobbyisten die Parteien mit üppigem Geldsegen bedenken. Nicht einzusehen sei, warum dieselben Millionen nicht direkt an die WählerInnen ausgeschüttet werden sollen.

CASHVOTE: Voices in the ten thousand he package.

The offer on CASHVOTE.com sounded enticing, the idea captivatingly simple. "making it your voice cash money", so the request. Only one form for on-line would be to be filled out to select thereafter with the German election to the Bundestag according to buyer desire and to take finally ten euro. The sold voices should be obtained following buyers. There there was the "Ecopaket" with 1000 voices for 6250 euro. Who wanted more, also 10,000 voices could buy quantity discount around 59.900 euro - including. In this way, so operator inside selbstlos, "even Nichtwähler became voters". The "Vermittlungspotenzial" numbered CASHVOTE.com on 7.3 million voices.

By the large press agencies history in the middle of was largely brought to DPA and AP over "picture at Sunday" and "star" up to the "mirror" Septembers. The German federal returning officer countered indignant with the law book, according to which on such sales of the right to vote up to five years detention would stand, the public prosecutor's office began with determinations. After two days of medialer excitation on the CASHVOTE Website a statement one published, in which the project outete itself as Fake. It would have been seriously remembered at no time to act with voices. The original Website is still callable as archives version. The idea is not new. In the USA an art student devised before two years a Parodie on the system of the campaign financing, from which in the hand turning Ernst became. Briefly before the presidency election provided voteauction.com for substantial attention: Within shortest time there 15,000 wählerInnen announced themselves and some offering gutters -

CASHVOTE: Stimmen im Zehntausender-Paket.

Das Angebot auf CASHVOTE.com klang verlockend, die Idee bestechend einfach. ???Machen Sie Ihre Stimme zu barem Geld“, so die Aufforderung. Nur ein Online-Formular wäre auszufüllen, danach bei der deutschen Bundestagswahl nach Käuferwunsch zu wählen und schließlich zehn Euro zu kassieren. Die verkauften Stimmen sollten im Anschluss an KäuferInnen vermittelt werden. Da gab es das ???Ecopaket“ mit 1000 Stimmen für 6250 Euro. Wer mehr wollte, konnte auch 10.000 Stimmen um 59.900 Euro kaufen – Mengenrabatt inklusive. Auf diese Weise, so die BetreiberInnen selbstlos, ???würden sogar Nichtwähler zu Wählern“. Das ???Vermittlungspotenzial“ bezifferte CASHVOTE.com auf 7,3 Millionen Stimmen.

Von den großen Nachrichtenagenturen DPA und AP über ???Bild am Sonntag“ und ???Stern“ bis hin zum ???Spiegel“ wurde

die Geschichte Mitte September groß gebracht. Der deutsche Bundeswahlleiter konterte empört mit dem Gesetzbuch, wonach auf derartigem Verkauf des Wahlrechts bis zu fünf Jahre Haft stehen würden, die Staatsanwaltschaft begann mit Ermittlungen.. Nach zwei Tagen medialer Erregung wurde auf der CASHVOTE-Website eine Stellungnahme veröffentlicht, in der sich das Projekt als Fake outete. Es wäre zu keinem Zeitpunkt ernsthaft daran gedacht worden, mit Stimmen zu handeln. Die Original-Website ist noch als Archiv-Version abrufbar. Die Idee ist nicht neu. In den USA erdachte ein Kunststudent vor zwei Jahren eine Parodie auf das System der Wahlkampf-Finanzierung, aus der im Handumdrehen Ernst wurde. Kurz vor der Präsidentschaftswahl sorgte **voteauction.com** für erhebliches Aufsehen: Binnen kürzester Zeit meldeten sich dort 15.000 WählerInnen und etliche BieterInnen – Höchstsumme: knapp 200.000 US-Dollar. Auf vehemente Proteste reagierte der Betreiber der Seite gelassen: Immerhin sei es in den USA durchaus üblich, dass Lobbyisten die Parteien mit üppigem Geldsegen bedenken. Nicht einzusehen sei, warum dieselben Millionen nicht direkt an die WählerInnen ausgeschüttet werden sollen.

Bush e Gore: il duello

Ma forse una risata online li seppellirà

Bush-Gore: 2 a 0, come sembrano dire gli ultimi sondaggi della Cnn? Palla al centro? Con due dibattiti televisivi alle spalle e una manciata di giorni a dividerli dal **7 novembre**, quando gli americani diranno col voto la loro ultima parola, la partita tra i due aspiranti presidenti degli Stati Uniti sembra tutto fuorché chiusa.

Dopo il primo dibattito, il sondaggio settimanale della [Cnn](#) e di [Usa Today](#) vedeva il candidato repubblicano George Bush Jr raccogliere il **49%** delle preferenze, contro il **41%** del democratico Al Gore che invece una settimana prima registrava **11** punti di vantaggio. Altri sondaggi (per esempio quello della [Reuters](#)), nel frattempo, continuavano a dare i due candidati in quasi pareggio con Al Gore al **45%** e George Bush al **44**.

Ora, a secondo **faccia a faccia** televisivo avvenuto, la Cnn ha dichiarato che il **49%** dei suoi intervistati ha assegnato la vittoria al governatore del Texas e il **36%** al vicepresidente.

Insomma, i **numeri** sembrano confondere piuttosto che schiarire le idee... Ma gli americani, che sono dei burloni, non si sono fatti sfuggire la ghiotta occasione delle presidenziali e hanno scatenato online la loro vena **umoristico-satirica**.

Il materiale, certo, non manca. Dalla tendenza a esagerare e autocelebrarsi di Gore, alle defaillances linguistiche di Bush Jr... Fino a ironizzare su i progetti dei candidati sull'**economia** del paese «perché lo scarto tra ricchi e poveri non sta crescendo abbastanza velocemente».

Oppure giocando tutto sull'**emotività** dei votanti, come su [Georgebushlovesyou](#) o il suo mirror [Algorelovesyou](#). Si può sorridere anche dei programmi sulla **sanità**: succede, per esempio, sul sito [Gioca al dottore con Al Gore](#), o lasciare da parte ogni atteggiamento possibilista cliccando su [No Bush for me](#)...

In fondo anche la satira è una cosa **seria**... Pare infatti che il candidato Bush si sia preparato all'ultimo faccia a faccia televisivo, guardando e riguardando la cassetta del **varietà** «Saturday night live» in cui un comico lo sbeffeggiava selvaggiamente facendogli il verso...

Vendesi voto

Continua la telenovela di [VoteAuction](#), il sito che lo scorso agosto scatenò una bagarre proponendo ai cittadini americani di mettere in **vendita** il proprio voto (Perché, se è vero che la politica ormai è solo un business tra candidati e finanziatori - si era chiesto il creatore del sito -, gli unici a non guadagnarci niente devono essere sempre e solo gli elettori?). Il **comitato elettorale** della città di Chicago, nell'Illinois, ha chiesto al Dipartimento di Giustizia di Washington di intercedere per la chiusura del sito: su un totale di oltre **8.000** persone che, in tutti gli Stati Uniti, hanno messo a disposizione il loro voto, 380 provengono da abitanti dell'Illinois.

Sbadigli primari

Che noia, che barba. Che barba, che **noia**. Il primo e ultimo confronto tra i candidati vicepresidenti, il democratico **Joe Lieberman** e il repubblicano **Dick Cheney** è stato piuttosto deludente. Un dibattito televisivo, quello affrontato qualche sera fa, tanto noioso da stimolare più di uno sbadiglio. Tanto che pochi minuti dopo il

Bush and Gore: the duel

Perhaps but one risata online will bury them

Bush-Gore: 2 to 0, as they seem to say the last surveys of the Cnn? Ball to the center? With two you debate yourself television to the shoulders and one manciata of days to divide them from **7 November**, when the Americans will say with the ballot their last word, the game between the two aspirants presidents of the United States seems all fuorché sluce.

Fotogallery

After the first debate, the survey weekly magazine of [the Cnn](#) and [USA Today](#) saw the candidate republican George Bush Jr to collect **49%** of the preferences, against **41%** of the democratic To Gore who instead a week before recorded **11** competitive edges. Other surveys (as an example that one of [the Reuters](#)), in the meantime, continued to give the two candidates in nearly balancing with To Gore to **45%** and George Bush to the **44**.

Hour, to second **make happened** television face, the Cnn has declared that **49%** of interviewed its have assigned to the Victoria to the governor of Texas and **36%** to the vice president.

Insomma, **the numbers** seem to confuse rather than to schiarire the ideas... But the Americans, that they are of the jokers, have not made themselves to escape ghiotta the occasion of the presidential ones and have triggered online their umoristico-satirica **vein**.

The material, sure, does not lack. From the tendency to exaggerate and to autocelebrarsi of Gore, to the defaillances linguistiche of Bush Jr... Until ironizing on the plans of the candidates on [the economy](#) of the country "because the refuse between rich and poor is not growing enough fastly".

Or playing all on **the emotionality** of voting, like on [Georgebushlovesyou](#) or its mirror [Algorelovesyou](#). It can sorridere also of the programs on **the health**: it happens, as an example, on the situated one [It plays to the doctor with To Gore](#), or to leave from every part attitude possibilist cliccando on [Not Bush for me](#)...

In bottom also the satira serious what is **one**... It seems in fact that the Bush candidate has prepared itself for the last face to television face, watching and regarding the cassette of **the live** variety "Saturday night" in which a comedian sbeffeggiava wildly facendogli the back...

Vendesi ballot

The telenovela continues of [VoteAuction](#), the situated one that slid August triggered a row proposing to the citizens Americans to put in **sale** just the ballot (Because, if it is true that politics by now are only a business between candidates and backers - the creator had asked itself for the situated one -, the only ones not to earn nothing to us always must be and only the constituents). **The electoral committee** of the city of Chicago, in the Illinois, has asked the Department of Justice of Washington for intercedere for the closing of the situated one: on a total of beyond **8.000** persons who, in all the United States, have put to disposition their ballot, 380 come from inhabitants of the Illinois.

Sbadigli primary

That trouble, than beard. That beard, than **trouble**. The first and last comparison between the candidates vices president, the democratic **Joe Lieberman** and the republican **Dick Cheney** has been rather disappointing. A television debate, that one faced some evening ago, much boring to stimulate more than one sbadiglio. A lot that little minuteran after

the term of
contesa the
television
commentators did
not succeed to
establish who
were the winner of
the comparison.
The warm topics
have been always
the usuals:
abortion, taxes
and public
finance. Topics on
which Bernard
Shaw, the
anchorman of the
called Cnn to
make from
moderator, it has
tried to make to
scaldare the
minds. Invano.

A számok bővületében: közép-kelet-európai mobiltelefonía

A magyar Hírközlési Főfelügyelet (HÍF) 2000 augusztusában tette közzé legutolsó hivatalos Mobil gyorsjelentését. E szerint augusztus végén 23,61 mobiltelefon jutott 100 magyar lakosra - júliusban ez a szám még 22,43 volt. A legfrissebb adatok szerint azonban már a *Pannon* is átlépte az egymilliószámot (október 11-én - leginkább ez az apropója eme írásnak is), ez a *Westel* 1 millió 350 ezer felhasználójával, no és a *Vodafone* 140 ezer telefonosával valamint a *Westel/0660* 100 ezres táborával összeadva összesen annyi, mint 2 millió 590 ezer fő. Kis jóindulattal azt mondhatnánk, hogy mire ezt leírom, vagy önök elolvassák, ez a szám - szép az, ami kerek - 2,6 millió mobilost jelent idehaza. (Fontos megjegyzés persze, hogy a HÍF a 100 ezres 0660-as táborot nem jegyzi, mint ahogy a 0660-as rádiótelefon sem egészen mobiltelefon, de engedjék meg

Virtuális egyetemi nyílt napok

Az Egyetemi Felvételi Tanácsadók Országos Szövetsége (National Association of College Admission Counseling) első ízben terjeszti ki hagyományos országos nyílt napok rendezvénysorozatát tíz online programmal, lehetővé téve, hogy a középiskolás diákok saját otthonukból vagy az iskolai számítógépes termekből vehessék fel a kapcsolatot a kiszemelt egyetemekkel.

Afrika óriási osztályterme

Hamarosan Afrika legtávolabbi vidékeinek diákjai előtt is megnyílik az út, hogy internet-hozzáféréshez jussanak, és e-mailben kommunikáljanak európai és más fejlett országokban élő társaikkal. Az [Africast](#) nevű vezető portál ugyanis közzétette azt a tervét, amely szerint az információs szupersztrádára kívánja kapcsolni a fekete kontinens osztálytermeit.

nekem most egy kis adat- és fogalom-összemosás.) Elértük hát a 26%-os arányt: száz magyarból 26-ra bármikor rá lehet csörögni... Minden negyedik magyar lakos boldog mobiltulajdonos. Na és? - kérdezhetnénk. Miért érdekes mindez? Tudományosan szólva azért, mert sok mindent üzennek-jelentenek ezek a számok.

Kérdés például, hogy vajon magas ez a szám, vagy alacsony? Igen, az - adhatjuk a kétértelmű választ. Egyrészt alacsony, másrészt magas. Jó-jó, de mihez képest? Például nagyon alacsony ez a mobilos arány, ha szemünket a messzi, fejlett északra vetjük, mondjuk a szívemhez közelálló finnekre, ahol már igen régen átlépték a 70%-os határt. De további nyugati országok sora - több mint egy tucat - rég túl van az 50%-on. Már idén februárban megírhattuk az INFINIT Hírlevélben, hogy amíg "1998-ban 307 millió mobiltelefont használtak, addig tavaly a felhasználók száma elérte a 468 milliót. A világ 12 országában a mobiltelefon elterjedtsége meghaladja az 50%-ot, a listavezető Finnországban ez több mint 70%."

Nagyon magas viszont ez a magyar mobilos szám, ha a TEP (Technológiai Előretekintési Program) nemrég megjelent *Informatika, távközlés, média munkacsoportjának* jelentésében az anno tíz évvel ezelőtti, de 2000-re vonatkozó várakozást is látja az ember: "1990-ben indult az első nyilvános mobil rádiótelefon-szolgáltatás a 450 MHz-es sávban, NMT-rendszerrel. 1993-ban kapott GSM-szolgáltatásra koncessziót két cég. A növekedés meghaladta a legderülátóbb terveket is, az 1989-es tízéves fejlesztési program is csak 0,96 százalékos ellátottsággal számolt 2000-re (ez körülbelül 100 000 előfizetőt jelent). Az egymilliomodik mobiltelefon-előfizetőt 1998 decemberében köszöntötték. 1999. június végére a mobil-előfizetők száma 1 300 000 lett." Mára pedig 26-szorosan túlteljesítettük a tíz évvel ezelőtti elképzeléseket.

Alacsony viszont ugyanez a 26%-os arány, ha azt nézzük milyen várakozásokat fogalmazott meg a magyar kormányzat 2003-ra. Ezek szerint 65%-os - tehát kétharmados - mobiltelefon-penetrációval számolhatunk 3 év múlva - írja az Europemedia a World Telecoms Online-ra és a magyar kormányra hivatkozva. De még erre is az a piac reakciója, hogy a magyar kormányzat túlzottan konzervatív, hiszen akár már a mostani év végére elérhetőnek tűnik a 30%-os arány, amittől nincs is olyan messze a 65%. Emlékezzünk, még a legoptimistább becslések is csak 25%-ot vártak 2000 végére egy évvel ezelőtt. Amit elértünk szeptember végére úgy, hogy a köztudottan nagy emelkedést hozó karácsonyi szezon még a piac előtt van.

Kérdés persze az is, hogy mennyi lehetőség van még a magyar piacon? A szolgáltatók szerint rengeteg. Legalábbis ezt mutatja, hogy mennyiért kelt el tavaly az új, harmadik mobil-koncesszió. "Nagyon ígéretes piaccá váltunk, amit jól

AFRINET: jobb távközlési infrastruktúrát és szabályozást Afrikában!

A Nigériában megrendezett Afrikai Internetes Csúcstalálkozó és Kiállítás (AFRINET) előadói kiemelték, ha a földrész nem akar lemaradni a gazdasági fejlődésben, a távközlés és az internetes ipar gyors ütemű fejlesztésére van szükség Afrikában.

Javaslatok az internet jövőjéről

A National Research Council a kibertér jövőjét vizsgálva azt a javaslatot tette az amerikai kongresszusnak, hogy fontolja meg egy olyan utalványon alapuló támogatási rendszer bevezetését, amely elősegítené a szegényebb családok internetre kapcsolását. A tudományos tanácsadó testület ezen kívül a webes eladásokra adót kivetni szándékozó államok esetében átalányadó bevezetését tartaná elfogadhatónak.

[a cikk](#)

Statisztika

a hét statisztikája

Az európai online turisztikai piac nyertese a b2c szegmens

jelez egyebek között az is, hogy a lakosság számához és jövedelméhez viszonyítva világcsúcsot ért el 1999-ben a nyertes által felajánlott koncessziós díj a harmadik mobiltelefon-koncesszióért folyó versenyben. [...] A harmadik GSM szolgáltatási koncesszióért európai rekordösszeget, mintegy 48 milliárd forintot fizetett a nyertes konzorcium. A szolgáltatás 1999 novemberében az 1800 és 900 MHz-es sávokon a tervek szerint megindult." - írja ugyancsak a TEP.

Ha a szűkebb környezetünkben, Kelet-Közép Európában nézünk körbe, azt láthatjuk, hogy az élbolyban mozgunk ugyan, de nincs okunk a lazálásra. A velünk közel azonos gazdasági fejlettségi szinten lévő csehek most lépték át a 30%-os határt (Europemedia), amivel csak a másodikak a régióban, a 'legfejlettebb' mobilosok Európa ezen felén - talán elsöre meglepő - a szlovének, 40%-kal. De az elsőség sohasem biztos, a fejlődés-fejlesztés nem áll meg. A tömbben számos ország ezekben a hónapokban készíti elő a legújabb UMTS (Universal Mobile Telecommunications System) koncessziók eladását. A lengyel kormány azon töri a fejét, hogy hat vagy kevesebb koncessziót adjon-e el, rekordbevételre számítva. Romániában három UMTS koncesszióról szeretnének dönteni jövő márciusig, jelenleg a törvényi háttér kidolgozása folyik, az év végéig bezárólag. De a legérdekesebb és legtöbb reménnyel kecsegtető kísérlet a balti államoké, azt tervezik ugyanis, hogy közös, három államra kiterjedő UMTS koncessziókat kínálnak, hiszen ezek a kis országok együtt sokkal ütőképesebb piacot képeznek, mint egyenként, kicsi lakosságuk miatt.

Legvégül pedig egy biztató adat: az Európai Unióban, ahová ugye mindannyian tartanánk, ez a 26%-os arány jónak számít. Már évekkkel ezelőtt elértük a tagállamok gyengébbik csoportjának szintjét. A cél, hogy felzárkózzunk az élcsoporthoz, ami valljuk be, azért is nehéz, mert vásárlóerőn számítva igen költséges idehaza a telefonálás - részben, pontosan a magas koncessziós díjak miatt, részben viszont azért, mert mi jóval kevesebbet keresünk, mint azok, akikhez hasonlítjuk magunkat, vagy inkább: akikhez hasonlítani szeretnénk...

Ford: e-kereskedelem a fogyasztók megtartásáért

James Yost, a [Ford Motor Co.](#) alelnökének becslése szerint a Ford bemutatótermeibe ellátogatók 60 százaléka rengeteg internetről szerzett információval a tarsolyában érkezik. Az internet megváltoztatta a kereskedő és az ügyfél kapcsolatát, a fogyasztók rendelkezésére álló adatok azonban eleddig nem gyakoroltak nagy hatást az autóeladásra. Az új vállalati stratégia következtetéséppen a hosszú távú fogyasztói kapcsolatok kiépítésére, a márkahűségét erősítő termékek előállítására irányul.

[a cikk](#)

Az Egyesült Királyság az e-kereskedelem élén?

A brit kormány nemrég napvilágot látott felmérése szerint az Egyesült Királyság üzleti vállalkozásai világelsők az ügyfelek, cégek és beszállítók közti internetes tranzakciók terén. A vizsgálat arra is rámutatott, hogy a technológiai fejlődés nemcsak a nagyvárosokra korlátozódik.

Statisztika

a hét statisztikája

Az európai online turisztikai piac nyertese a b2c szegmens

milyen várakozásokat fogalmazott meg a magyar kormányzat 2003-ra. Ezek szerint 65%-os - tehát kétharmados - mobiltelefon-penetrációval számolhatunk 3 év múlva - írja az Europemedia a World Telecoms Online-ra és a magyar kormányra hivatkozva. De még erre is az a piac reakciója, hogy a magyar kormányzat túlzottan konzervatív, hiszen akár már a mostani év végére elérhetőnek tűnik a 30%-os arány, amittől nincs is olyan messze a 65%. Emlékezzünk, még a legoptimistább becslések is csak 25%-ot vártak 2000 végére egy évvel ezelőtt. Amit elértünk szeptember végére úgy, hogy a köztudottan nagy emelkedést hozó karácsonyi szezon még a piac előtt van.

Kérdés persze az is, hogy mennyi lehetőség van még a magyar piacon? A szolgáltatók szerint rengeteg. Legalábbis ezt mutatja, hogy mennyiért kelt el tavaly az új, harmadik mobil-koncesszió. "Nagyon ígéretes piaccá váltunk, amit jól jelez egyebek között az is, hogy a lakosság számához és jövedelméhez viszonyítva világcsúcsot ért el 1999-ben a nyertes által felajánlott koncessziós díj a harmadik mobiltelefon-koncesszióért folyó versenyben. [...] A harmadik GSM szolgáltatási koncesszióért európai rekordösszeget, mintegy 48 milliárd forintot fizetett a nyertes konzorcium. A szolgáltatás 1999 novemberében az 1800 és 900 MHz-es sávokon a tervek szerint megindult." - írja ugyancsak a TEP.

Ha a szűkebb környezetünkben, Kelet-Közép Európában nézünk körbe, azt láthatjuk, hogy az élbolyban mozgunk ugyan, de nincs okunk a lazulásra. A velünk közel azonos gazdasági fejlettségi szinten lévő csehek most lépték át a 30%-os határt (Europemedia), amivel csak a másodikak a régióban, a 'legfejlettebb' mobilosok Európa ezen felén - talán elsőre meglepő - a szlovének, 40%-kal. De az elsőség sohasem biztos, a fejlődés-fejlesztés nem áll meg. A tömbben számos ország ezekben a hónapokban készíti elő a legújabb UMTS (Universal Mobile Telecommunications System) koncessziók eladását. A lengyel kormány azon töri a fejét, hogy hat vagy kevesebb koncessziót adjon-e el, rekordbevételre számítva. Romániában három UMTS koncesszióról szeretnének dönteni jövő márciusig, jelenleg a törvényi háttér kidolgozása folyik, az év végéig bezárólag. De a legérdekesebb és legtöbb reménnyel kecsegtető kísérlet a balti államoké, azt tervezik ugyanis, hogy közös, három államra kiterjedő UMTS koncessziókat kínálnak, hiszen ezek a kis országok együtt sokkal ütőképesebb piacot képeznek, mint egyenként, kicsi lakosságuk miatt.

Legvégül pedig egy biztató adat: az Európai Unióban, ahová ugye mindannyian tartanánk, ez a 26%-os arány jónak számít. Már évekkal ezelőtt elértük a tagállamok gyengébbik csoportjának szintjét. A cél, hogy felzárkózzunk az élcsoporthoz, ami valljuk be, azért is nehéz, mert vásárlóerőn számítva igen költséges idehaza a telefonálás - részben, pontosan a magas koncessziós díjak miatt, részben

Ford: e-kereskedelem a fogyasztók megtartásáért

James Yost, a [Ford Motor Co.](#) alelnökének becslése szerint a Ford bemutatótermeibe ellátogatók 60 százaléka rengeteg internetről szerzett információval a tarsolyában érkezik. Az internet megváltoztatta a kereskedő és az ügyfél kapcsolatát, a fogyasztók rendelkezésére álló adatok azonban eleddig nem gyakoroltak nagy hatást az autóeladásra. Az új vállalati stratégia következtében a hosszú távú fogyasztói kapcsolatok kiépítésére, a márkahűségét erősítő termékek előállítására irányul.

[a cikk](#)

Az Egyesült Királyság az e-kereskedelem élén?

A brit kormány nemrég napvilágot látott felmérése szerint az Egyesült Királyság üzleti vállalkozásai világelsők az ügyfelek, cégek és szállítók közti internetes tranzakciók terén. A vizsgálat arra is rámutatott, hogy a technológiai fejlődés nemcsak a nagyvárosokra korlátozódik.

Politics

YAWNERGATE

How are we going to stay awake through four years of Bush?

WAGING CLASS WARFARE

It takes more than hardhats and overalls to camouflage Bush's tactics

THERE THEY GO AGAIN

Will the Reagan Legacy Project get the Gipper's face on Mount Rushmore and the \$10 bill?

WHEN DAVID HOROWITZ ATTACKS!

Are reparations racist?

FEAST & FAMINE

President Bush's tax plan tosses scraps to the poor

BEWITCHED & BEWILDERED

Wiccans and other minority religions throw a wrench into Bush's Charitable Choice plan

THE BUSH-KIM-MOON TRIANGLE

Dubya and South Korean President Kim Dae Jung disagree on North Korea. But they have a little-known bond: the political largesse of the Rev. Sun Myung Moon.

GLOBAL INJUSTICES

Four books take you around the world with the literary left

REINVIGORATING ENVIRONMENTALISTS

Bush and his pollution-loving cronies are just what enviro activists need to get them up and running again

NUTTY SITUATION

ACORN has led union campaigns across the country. Now the group's own employees claim they are being punished for organizing.

IT'S ALL RELATIVE

For the president's family, being famous without having any talent is a mixed blessing at best

DAMN THE ETHICS

The unintended legacy of William Jefferson Clinton

UNLEASHING THE PERFECT CANDIDATE

Hey, Lassie. Bark at that bad Republican man. Good girl!

REFORM STORM

The call to "fix democracy" is heard far and wide

POLITICS AS PERFORMANCE ART

It's journalism as drama review when Bush delivers his big speech

ALL CLINTON, ALL THE TIME

We've had our fill of Bill. Why can't the media cover some important stories for a change?

UNCIVIL DISCOURSE

The Republicans' Clinton bashing is a poor substitute for leadership

PRESS BLOWS FLORIDA AGAIN

In one more rush to judgment, the national news media exaggerate a partial tally by the Miami Herald into another premature call of the 2000 election

TAX FRAUD

Bush's tax cut plan shows he also has problems with "the vision thing"

FREEWHEELIN' JIMMY CARTER

A candid conversation with America's best ex-president

GOD IS HIS COPILOT

Will Jesus himself be the next member of Dubya's religious Right-leaning cabinet?

BACK TO THE WHITE HOUSE

If Democrats don't want Bush to serve eight years, they'd better find someone to inspire us and defend us from bad court nominees and help-the-rich tax schemes

BIPARTISAN FOLLY

In '92, Democrats shelved national security investigations involving G.H.W. Bush, and kept quiet about Iran-Contra pardons. The GOP had different plans for Clinton.

CUT RATE

Democrats have only themselves to blame for Greenspan's boost to tax-cut cuts

[CURIOUS, GEORGE](#)

With each passing day of newspaper-fueled recounts, Dubya loses more votes

[THE DECADE IN POLITICS](#)

The news stories you remember--and the more important ones you may have forgotten

[CONSERVATIVE RAGE VS. LIBERAL GUILT](#)

Will Democrats finally come out swinging?

[LOOKING BEYOND THE LOVE CHILD](#)

Black discernment and sophistication hold the key to whether Jesse Jackson will be able to continue in his unique role as a leader-at-lar

[DUBYA'S RISKY FOREIGN POLICY](#)

Tensions in the Middle East pose an early test of President Bush's "unilateralist" foreign policy

[THE SPOOK WHO WENT TO WASHINGTON](#)

New U.S. Rep. Rob Simmons' cold-blooded past

[HARD TIME](#)

Clinton's lack of courage left Leonard Peltier in prison and America with an energy crisis

[BUSH'S TRUE COLORS](#)

Bill Clinton was no liberal, but his successor is not only a conservative, he's a right-wing extremist

[WHO'RE YOU CALLING EVIL?](#)

Hip Democrats love to trash Republicans. So much for being tolerant.

[A STOLEN PRESIDENCY & THE SEATTLE COALITION](#)

How George W. Bush energized a broad-based progressive coalition that could threaten the conservative agenda he hopes to implement

[MONUMENTAL DECISIONS](#)

Do Clinton's last-minute national monuments stand a chance of surviving?

[DUBYA'S TRUE COLORS](#)

There's not much uniting going on here

[CLINTON'S NEXT STEP](#)

Why not buy the Boston Red Sox?

[ASHCROFT & RACISM](#)

Breaking the code

POLITICAL PUPPETEER

When William Rehnquist swore in George W. Bush, he completed a long struggle by conservative jurists to put their allies in control of the U.S. government

BLOWING HOLY SMOKE

Sen. Orrin Hatch strong-arms religious protection bills into law again and again--the Constitution be damned

BUSH'S SMOKESTACK CABINET

While W. and his petro-cronies deny that there's a climate change problem, the U.K. is taking action

BEYOND THE CLINTON ERA

Bill Clinton's broken promise of a politics of meaning exacerbated the cynical individualism of the nineties. It's high time we got idealistic again.

THE FIRE THIS TIME

Scenes from an inauguration protest

BEYOND THE SENATE

Is Hillary Clinton a lock for the Democratic presidential nomination in 2004?

DUBYA'S DEBUT

The inaugural address you didn't hear

ANOTHER REASON TO LOVE ASHCROFT

Not only is he a sanctimonious God squadder, but the Attorney General-designate is also deep inside the pockets of corporate special

THE COMPANY OF W

Corporate conservatism will be the defining feature of the Bush White House

LAWYERS LASH OUT AT THE SUPREMES

Anger from 554 law professors representing 120 American law schools targets the Supreme Court's five conservatives as partisans for George W. Bush's campaign

EMPEROR COMMODUS & PRESIDENT W

Some Americans may wonder if the Inauguration will be more reminiscent of the scene in "Gladiator" when Emperor Commodus is "honored" by Rome

THOMPSON & THE COMPASSIONATE CABINET

George W. Bush is killing us with kindness

BACKWARD THINKING

President-elect Bush takes a leap back with his cabinet picks

[THE RIGHT FRIEND](#)

He introduced you to the Ramones, porn and substance abuse. He voted for Bush. Can you still be pals?

[DEFENSIVE POSTURE](#)

Exploring the connections between Rev. Moon, the Bushes & Defense Secretary nominee Donald Rumsfeld

[JAMES WATT IN A SKIRT?](#)

Gale Norton, Dubya's choice for Interior Secretary, is no friend to the environment

[NOT SO FAST ON ASHCROFT](#)

Why Bush's hard-right nominee for attorney general should not be confirmed

[BUSH WILL BE BAD FOR BLACKS](#)

Civil rights and civil liberties will find foes in the new administration

[IDIOT BASTARD SON](#)

The Bush family staged the biggest demonstration election in the world

[DIRTY DATA](#)

How one company may have elected Bush--and how the media ignored the story

[BUSH WHACKED](#)

Searching for solace in a Bush win

[FANTASIA 2000](#)

The never-ending presidential election was stranger than fiction

[VOTING RIGHTS RESCINDED](#)

Blacks feel like they got robbed--again

[THE VOICE OF URBAN AMERICA?](#)

Leaders like Jesse Jackson offer more rhetorical flourish than serious leadership

[SELECT COMPANY](#)

George W. Bush's first batch of cabinet nominations go a long way toward establishing his credentials as a leader devoted to diversity

[YES, THEY STOLE THE ELECTION](#)

Is Bush an illegitimate president? Absolutely.

[THE DOG GETS HIS BONE](#)

What will Montana Gov. Marc Racicot receive for being Bush's pit bull?

BUSH FACES LEGITIMACY GAP

Who had equal protection in Florida?

COUNT ON CYNICISM

If you think it was ugly before...

OUTSIDE THE COURTHOUSE

History was being made inside the Supreme Court building, but the real fun was going on outside

CALLING IT LIKE IT IS

George W. Bush and his allies are trying to stage a coup, an overthrow of the will of the people, Michael Moore contends

A DARK CLOUD

The U.S. Supreme Court has blocked the counting of ballots for president for the first time in history, a dangerous turn for democracy

ORANGE CRUSH

Dems wage online "Boycott Florida" campaign

PUPPET THEATER OF THE ABSURD

A judge upheld charges against puppetistas arrested during the Republican convention, after both the prosecution and defense put on quite a show

ELECTION MYTHS

Here's a reality check to silly and wrongheaded ideas which are being reinforced about the presidential election

TRIGGER LOCKED

Gun champions win Congress, fight for Bush

THE WILL OF THE PEOPLE

Isn't it time for George W. Bush to face the basic fact that the American people--and the voters of Florida--wanted somebody else?

NO JUSTICE, NO GOLF

Sure conservatives dress funny, talk funny and think funny. Now we know they protest funny, too. Looking back at the Miami Golfers riot of 2000.

JUST LET THIS ELECTION END

All right, fine, democracy has collapsed. Just give back our prime-time shows

CALL IN THE CELEBS

Will the Chads and dimples deliver us from this never-ending election?

COUNTER POINT

The numbers game in Florida proves that the Democratic process still works

MOB RULE WINS

A mob assault on the Dade County election board intimidated the board into halting a crucial recount

WEA CULPA

A Nader supporter's open apology to Gore voters

ONE PUNCH, YOU'RE OUT

The fight's not over until the bell rings--or until the last vote is counted

GORE BREAKS 50 MILLION

The veep's national vote tally now exceeds 50 million votes, making him only the second U.S. presidential candidate ever to reach that figure

THE BRIGHT SIDE OF CHAOS

There are benefits to the PR war being waged by Gore and Bush

WHAT CRISIS?

The jabbering classes have it wrong: Voting irregularities and fraud are the real constitutional crisis

COMMANDER-IN-THIEF?

If Al Gore lawyers his way into running the country, Americans won't be happy

AN OPEN LETTER TO KOFI ANNAN

Michael Moore suggests: Send in the U.N. election observers!

OUT OF THE PARK

The secret to successful stadium referendums

THE GOP'S POPULAR VOTE HYPOCRISY

When the Republicans feared Al Gore might win the Electoral College but lose the popular vote, they planned to challenge the legitimacy of his victory

STOP, THIEF!

Michael Moore speaks out about the Florida cliffhanger and the looming electoral showdown

FLIPPING A COIN

It's a tie! What now?

CAPITOL PUNISHMENT

Did Voteauction.com subvert democracy?

ONE VOTER STRIKES BACK

An American voter, fed up with the media's exaggerations about Al Gore's exaggerations, has made a federal case out of it

NADER'S SURGE

How can we explain Nader's strong numbers, when third-party candidates traditionally fade in the weeks before an election?

VOTE LDS?

Republicans declare good Mormons can't vote Democrat. LDS leaders say otherwise, but will their flock take heed?

LET THE BLAME GAMES BEGIN

Accusing Nader of causing Gore's downfall is akin to blaming a warning label for a product that fails

ANYBODY HOME?

George W. Bush gets away with some serious stupidity

LIEBERMAN'S LARGESS

The senator who would be veep brings home the bacon to local defense contractors

SWINGING STATE?

An upstart Democrat mounts a surprisingly strong challenge against a Republican incumbent in Michigan's U.S. Senate race

THE KIDS ARE ALL RIGHT, UNLESS THEY PROTEST

George W. Bush's minions lay the smackdown on students at a California high school

BLACK MAGIC

After 200-plus years of white guys running Congress, African Americans are poised to take over 22 key House committees and subcommittees

NADER LETS LOOSE

Ralph is actually running a campaign full of good humor and crowd-pleasing punchlines

PARTY ANIMAL

Why she's not voting for Nader... and thinks you shouldn't, either

RUNNING SCARED

Some would-be Nader supporters are too frightened to abandon Gore, but the vice president and George W. Bush may be similar evils anyway

THE YOUTH VOTE

The Kids Voting project aims to instill lifetime voting habits

REGULAR JOE

Sen. Lieberman's daughter Rebecca says he's always been "a regular guy"

DADDY'S GIRL

Kristin Gore talks political apathy and why her father should win

CHECKING THE BALLOTS

How do we know there isn't cheating going on within the U.S. electoral system?

RAISING GREEN

Sounding off with Dead Kennedys guru Jello Biafra at a Green Party fundraiser

KISS ME, GEORGE

Is a kiss just a kiss? It's debatable.

FORTRESS FEINSTEIN

Does California Sen. Dianne Feinstein view her latest campaign as more of a coronation than an election?

NADER, THE DEBATES & YOU

Ralph Nader needs to be included in the presidential debates, if for no other reason than to force the twin candidates to focus on real issues

DUBYA, COAL & THE INTERNET

Without attribution, George W. Bush cites dubious coal-industry data to justify his energy plan

DEBATE SPINNING

When it comes to presidential debates, reality often gets washed away in a media spin cycle that opts for quick one-liners over complex reality

BROAD APPEAL

A male columnist asks, Are women too dumb to vote?

LA RAZA TO THE TOP

In the struggle for the hearts and votes of Latinos, Republicans are doing well, but Democrats are doing better

ENVIRONMENTAL CONTROLS

Al Gore and George W. Bush offer sharply contrasting strategies for energy production and the environment

CIVIL ENGINEER

Bouncing back from a Larry Flynt-ignited sex scandal, Congressman-turned-lobbyist Bob Livingston helped draft the feel-good Republican platform

RIDING WITH RALPH

Candidate Nader talks about corporations, race and his challenge to the two-party system

MR. SUBLIMINABLE

Can Bush's press machine save him from his dyslexic ways?

DOWN THE HATCH

Is Utah Sen. Orrin Hatch vulnerable to defeat?

WHITE HOUSE WARMING

A gallery exhibit examines the home-decorating tastes of U.S. presidents

OFFSTAGE CHATTER

Third-party candidates remain angry over their exclusion from debates

BETTING ON THE FAMILY FARM

Buchanan and Nader take on Big Agriculture at FarmAid

TEDDY'S CHARGE

Why U.S. Sen. Edward M. Kennedy will be reelected in November by a landslide

WHO'S ON THIRD?

Presidential debates are back on track--and sure to be dull as dirt

NADER'S LONG MARCH

Ralph Nader tries to do nothing less than revive American democracy

THE NADER DILEMMA

He's a great protester, but would he be a good president?

VOTE THE ROCK

No one Rocks The Vote anymore. Apparently, you are now required to Smackdown Your Vote.

MUSIC WITH A MESSAGE

The Jello Biafra-fronted No WTO Combo throws down "Live From the Battle of Seattle"

LEADING LADY

Betty Friedan's memoir, "Life So Far," chronicles the progress of feminism

WOMEN ON THE VERGE

President Nixon's 1970 Knoxville appearance provoked ordinary kids to anger 75,000 spectators

THINGS GET HOPPIN' WHEN THINGS GET GREEN

Ralph Nader's Green Party wants to shake things up, come November

OTHER WHITE MEAT

The book on "pork" that Washington doesn't want you to read

VOTE YOUR BRAIN, NOT YOUR TYPE

Should a feminist want Elizabeth Dole to become a nominee for vice president? Not necessarily.

RUDY'S VALLEY

Rudy Giuliani's crash and burn doesn't mean Hillary Clinton will automatically ascend to the U.S. Senate

MEDIA RARE

Minnesota Guv Jesse Ventura takes his outspoken political show on the road once again

HOMETOWN HERO

The Texas press corps has a soft spot for native son George W. Bush

TO BEAT OR NOT TO BEAT

When tens of thousands of demonstrators arrive in Philadelphia for the Republican National Convention, the city will be in for a wild few days

BALL OF CONFUSION

Are environmentalists out to destroy technology?

BEING HILLARY

The Senate race seems to be doing the first lady some good

SWEET DREAMS

A behind-the-scenes look at a secret meeting between George W. Bush and his campaign advisors as they scramble to get their ship back on course

WALKING THE PLANK

Pennsylvania's pro-choice Tom Ridge, host governor for the GOP National Convention and a potential veep candidate, tries to avoid an abortion-rights dustup

OF PRIMARIES & PROGRESSIVE PUNDITS

Barbara Ehrenreich fingers the latest trends in political nose-picking

PRESIDENTS ARE PEOPLE TOO

Clinton has made a bit of a mess of his personal life. So? Your neighbor has too, and you don't seem to mind.

GREENHOUSE EFFECT

Green Party candidate Ralph Nader doesn't have the money, charisma or good looks to be president, but he says you should vote for him anyway

BEYOND THE VALLEY OF THE DEMOPUBLICANS

Third-party and indie candidates abound in 2000--and you can find out all about them here

CARRYING THE BURDEN

You'd think Dubya would have heard if there are pockets of hunger in Texas, especially if one is just miles from his front door

PRESIDENTIAL PETTIFOGGERY

We won't get straight talk from our candidates until we elect them to speak it

GOING TO THE DOGS

The first permit to demonstrate at this summer's Republican National Convention has been issued--to the National Greyhound Adoption Program

D.C. TALK

Protests against globalization are becoming the norm

BRING ON THE BOREDOM

Our political campaigns should swap last-minute drama for long-term substance

ACTIVIST AGENDA

The World Bank protests prove that Seattle wasn't a fluke

CLINTON'S DIGITAL DISCONNECT

Our president says the solution to poverty is technology. Huh?

ACTIVIST ACTORS

The World Bank/IMF protests featured street theater at its best

GREEN DAY

Ralph Nader is a true Reformer with Results--and he never even did blow

GREENSPAN SHRUGGED

The Fed chair's philosophy differs little from his Ayn Rand days

SLOPPY SECONDS

One Bush was enough, but thank you

THE CONSUMER'S CANDIDATE

Can Ralph Nader overcome the stigma of his lackluster 1996 campaign and convince voters he's serious about running for president in 2000?

COURTING CONSERVATIVES

Who would Dubya appoint to the Supreme Court?

SWITCH HITTING

When it comes to the Log Cabin Republicans, Dubya wants to have it both ways

[THE SOCIALIST SPLINTER](#)

Presidential hopeful David McReynolds takes on the big boys

[CONSPIRACY TO SILENCE?](#)

When it comes to protests at the 2000 Republican National Convention, the revolution will be organized

[RUNNING MATE DANCE](#)

Is Al Gore considering Senator Russ Feingold for veep?

[POLITICAL PANDERING](#)

Why Al Gore's decision to support ad hoc American citizenship for young Elian Gonzales is unconscionable

[TWO ON THE BUSHES](#)

New books about the first father and son of presidential politics reveal less-than-mighty men

[THE MONEY TRAIL](#)

When it comes to campaign finance reform, Granny D walks the walk

[LONGSHOT IN THE ARM](#)

For a third political party--Reform, Libertarian or Green--victory won't come by winning. It will come by finishing second.

[THE SWING OF THINGS](#)

How Hillary Clinton plans to woo suburban New Yorkers

[THE POLITICS OF BONDAGE](#)

Is George W. looking for a dominatrix?

[RUDY'S RAP SHEET](#)

As he races for a U.S. Senate seat, Giuliani flaunts his pernicious disregard for the Bill of Rights

[JOHNNY ON THE SPOT](#)

How McCain could have won the GOP nomination

[THE NEW UNREST](#)

Radicals are finally finding their voices again

[LOYAL LIEUTENANTS](#)

For George W. Bush, only one issue matters in choosing his inner circle: loyalty

[THAT OLD BLACK MAGIC](#)

Alan Keyes may be the first flesh-and-blood trickster to come along in years

SHHHHH!

Activists planning to demonstrate during the GOP convention say they are being silenced

TWEEDLEDUM, TWEEDLEDEE & RALPH

Nader takes his tireless activism on behalf of the little guy onto the presidential campaign trail

WEB SLINGER

With a parody Web site of George W. Bush's campaign, Zack Exley changed the way politics is seen online

THE GREENSPAN RULES

How the Federal Reserve thumbs its nose at Congress and laws it doesn't like

DISSING JESSE

Urban activists just don't respect Jesse Jackson like they used to

HITTIN' CLINTON

"The Hunting of the President" suggests that "vast right-wing conspiracy" isn't so far-fetched after all

PROZAC POLITICS

When Congressman Patrick Kennedy said he was on antidepressants, no one batted an eye. Have we really come that far?

GAY-FRIENDLY GOP?

Log Cabin Republicans try to pull their party out of the conservative closet

TAKING THE LOSS

Why the Republicans abandoned the center and crowned a weak George W. Bush

GOING FOR GREEN

Bard College prof Joel Kovel takes on Ralph Nader for the Green Party presidential nomination

RED, WHITE & GREEN

With \$5 million and the will to run hard, can Ralph Nader rain on Al Gore's parade?

PARTY OF NONE

Can the Reform Party mount a credible presidential campaign?

STEPPING OUT

A gay activist ditches the all-too-centrist New Democrats

BEATING AROUND BUSH

Molly Ivins takes on Dubya in a grisly Clash of the Texans called "Shrub: The Short But Happy Political Life of George W. Bush"

GORING BRADLEY

Why the Tennessee Titan will beat the Old Knick in the New York primary

CANDIDATE OF DEATH

George W. Bush has presided over more executions--120--than any other governor in the nation, possibly in history

NOW THERE'S A LOSER

Bill Bradley is the kind of guy you want to hug, but only because it would be really easy to pick his pocket

FROM RUDY WITHOUT LOVE

New York City streets are quieter under Giuliani, for better and worse

THE BLACK PANTHERS, THEN AND NOW

The political party that terrified your parents turns 34

VAST AND UGLY, TOO

Opportunistic O.J. author Jeffrey Toobin's next meal ticket? Bill and Monica.

HAUNTED BY SPIRITS

A look at John McCain's bootlegging in-laws, and the Senator's loyalty to them

15 MINUTES WITH AL

The Veep discusses why he won't raise taxes on the rich, why he supports the death penalty--and why liberals should back him over Bill Bradley

BENEVOLENT AGITATOR

Jim Hightower pours out his undiluted populism in "If the Gods Had Meant Us to Vote, They Would Have Given Us Candidates"

LET ME FINISH

Al Gore's real 21st century challenge: seducing a skeptical press corps

MUGGED BY THE MEDIA

Hillary Clinton encounters some bumps as her Senate campaign hits the road in New York

MOMENTS OF TRUTH

South Carolina and Michigan will determine whether John McCain has a legitimate shot at the GOP nomination

DRESSING DOWN

That's about all the presidential wannabes are doing to capture the youth vote

[TAKING THE LOW ROAD](#)

Presidential candidates campaign on campuses with racist, antigay policies

[HEIR PRESSURE](#)

A new book asks, Can the charismatic-yet-lackluster George W. fill his father's shoes?

[FINAL FOUR](#)

Early primaries cut the presidential pool down to size in more ways than one

[PARTY HOPPING](#)

John McCain fires up support in unlikely quarters

[STILL DOLLAR BILL](#)

Bradley, the candidate of the corporate tax giveaway, runs as a progressive

[SUING DUBYA?](#)

The Bush campaign went after Zack Exley for his gw bush.com parody site. Now Exley and some powerful new friends may fight back in court.

[FIRST LADIES](#)

Women advisors take lead roles in crafting the messages of Gore, Bradley and Bush

[CALLING THE RACE](#)

Why Al Gore will beat Dubya for the presidency

[STRAIGHT SHOOTER?](#)

There's nothing wrong with negative ads that tell the truth

[MR. LIBERAL?](#)

Bill Bradley's slide to the left was well-timed

[ROCKING THE VOTE](#)

On the eve of the New Hampshire primary, MTV launches another round of Choose or Lose campaign coverage

[HEEERE'S JOHNNY](#)

McCain is the anti-Bush--old, accomplished and principled

[BALD FACTS](#)

Can you trust a candidate with bad hair?

THIS TIME FOR REAL

When he runs for president under the Green Party banner once again, Ralph Nader says, he'll take the quest more seriously

CONSIDER THE ALTERNATIVE

Isn't it time to look into supporting a third-party presidential candidate?

SLICK BILLY

Why Bill Bradley is the real phony in the New Hampshire primary

WEIGHING THE POLLS

Why using opinion numbers to limit the number of presidential debate participants is a bad idea

NEW HAMPSHIRE DIARY

Is McCain a political cross-dresser? Is Bush letting conservative hatchet men fight his battles?

WHO IS BILL BRADLEY?

Is this "Non-AI" with a liberal vision a man for the time?

GENDER BENT

Eight years ago, the "Year of the Woman" nearly doubled the number of women in Congress. It's been slim pickings ever since.

BAD RECEPTION

The media scandal behind John McCain's media fundraising scandal

PRIVATE LANDS, PUBLIC HANDS

An advisor to George W. Bush argues for selling off the national parks and forests

SLING THAT MUD

Campaign 2000 is already turning ugly--but that may be just the ticket to exposing issues voters must confront in selecting the next president

BILL IN THE WILDERNESS

Western Republicans assail Clinton's proposal to keep millions of national forest acres roadless

OF PIGS & POLITICIANS

On the ground in Iowa, taking the pulse of the caucus to come

LEAVING AT THE TOP

Boris Yeltsin quit to give his successor a boost. Why can't Clinton do the same?

STOP, LOOK, LISTEN

New CDs by Noam Chomsky and Angela Davis dole out millennial advice to save America from a cultural train wreck

HIGHLIGHTS & LOWLIFES

1999 began with the dark cloud of the Clinton scandal and ended with a ray of light in Seattle

HATCHING A SCANDAL

Could GOP presidential hopeful Orrin Hatch be sucked into Utah's Olympic bribery investigation?

COUPS D'ÉTAT

Books to help budding activists fight the powers that be

IN THE RUNNING

Why not throw your own hat into the presidential race?

LABOR PAINS

The alliance between Al Gore and big labor exposes the Clinton administration's soft line on union corruption

GOING FOR BROKE

Al Gore is running out of money. Be afraid. Be very afraid.

DUBYA DROPS IN

George W. Bush's first campaign stop on Al Gore's home turf suggests his strengths might be his weaknesses

IMPEACHMENT PLUS ONE

A year after failing to topple the president, congressional Republicans rev up their political game of chicken

THE MAN & HIS MUSIC

A tuneful look at presidential hopeful and songwriting fool Sen. Orrin Hatch

NOT WORTH THE PAPER

What the Justice Department writes about corporate crime isn't close to what it does

CHASING AFTER CHINAGATE

An explosive political climate has clouded the nuclear espionage investigation

BLOWIN' & GOIN'

Candidate Buchanan breezes into town, but it's an ill wind that clarifies nothing

Four books take you around the world with the literary left

[REINVIGORATING ENVIRONMENTALISTS](#)

Bush and his pollution-loving cronies are just what enviro activists need to get them up and running again

[NUTTY SITUATION](#)

ACORN has led union campaigns across the country. Now the group's own employees claim they are being punished for organizing.

[IT'S ALL RELATIVE](#)

For the president's family, being famous without having any talent is a mixed blessing at best

[DAMN THE ETHICS](#)

The unintended legacy of William Jefferson Clinton

[UNLEASHING THE PERFECT CANDIDATE](#)

Hey, Lassie. Bark at that bad Republican man. Good girl!

[REFORM STORM](#)

The call to "fix democracy" is heard far and wide

[POLITICS AS PERFORMANCE ART](#)

It's journalism as drama review when Bush delivers his big speech

[ALL CLINTON, ALL THE TIME](#)

We've had our fill of Bill. Why can't the media cover some important stories for a change?

[UNCIVIL DISCOURSE](#)

The Republicans' Clinton bashing is a poor substitute for leadership

[PRESS BLOWS FLORIDA AGAIN](#)

In one more rush to judgment, the national news media exaggerate a partial tally by the Miami Herald into another premature call of the 2000 election

[TAX FRAUD](#)

Bush's tax cut plan shows he also has problems with "the vision thing"

[FREEWHEELIN' JIMMY CARTER](#)

A candid conversation with America's best ex-president

[GOD IS HIS COPILOT](#)

Will Jesus himself be the next member of Dubya's religious Right-leaning cabinet?

[BACK TO THE WHITE HOUSE](#)

If Democrats don't want Bush to serve eight years, they'd better find someone to inspire us and defend us from bad court nominees and help-the-rich tax schemes

[BIPARTISAN FOLLY](#)

In '92, Democrats shelved national security investigations involving G.H.W. Bush, and kept quiet about Iran-Contra pardons. The GOP had different plans for Clinton.

[CUT RATE](#)

Democrats have only themselves to blame for Greenspan's boost to tax-cut cuts

[CURIOUS, GEORGE](#)

With each passing day of newspaper-fueled recounts, Dubya loses more votes

[THE DECADE IN POLITICS](#)

The news stories you remember--and the more important ones you may have forgotten

[CONSERVATIVE RAGE VS. LIBERAL GUILT](#)

Will Democrats finally come out swinging?

[LOOKING BEYOND THE LOVE CHILD](#)

Black discernment and sophistication hold the key to whether Jesse Jackson will be able to continue in his unique role as a leader-at-lar

[DUBYA'S RISKY FOREIGN POLICY](#)

Tensions in the Middle East pose an early test of President Bush's "unilateralist" foreign policy

[THE SPOOK WHO WENT TO WASHINGTON](#)

New U.S. Rep. Rob Simmons' cold-blooded past

[HARD TIME](#)

Clinton's lack of courage left Leonard Peltier in prison and America with an energy crisis

[BUSH'S TRUE COLORS](#)

Bill Clinton was no liberal, but his successor is not only a conservative, he's a right-wing extremist

[WHO'RE YOU CALLING EVIL?](#)

Hip Democrats love to trash Republicans. So much for being tolerant.

[A STOLEN PRESIDENCY & THE SEATTLE COALITION](#)

How George W. Bush energized a broad-based progressive coalition that could threaten the conservative agenda he hopes to implement

[MONUMENTAL DECISIONS](#)

Do Clinton's last-minute national monuments stand a chance of surviving?

[DUBYA'S TRUE COLORS](#)

There's not much uniting going on here

[CLINTON'S NEXT STEP](#)

Why not buy the Boston Red Sox?

[ASHCROFT & RACISM](#)

Breaking the code

[POLITICAL PUPPETEER](#)

When William Rehnquist swore in George W. Bush, he completed a long struggle by conservative jurists to put their allies in control of the U.S. government

Who had equal protection in Florida?

[COUNT ON CYNICISM](#)

If you think it was ugly before...

[OUTSIDE THE COURTHOUSE](#)

History was being made inside the Supreme Court building, but the real fun was going on outside

[CALLING IT LIKE IT IS](#)

George W. Bush and his allies are trying to stage a coup, an overthrow of the will of the people, Michael Moore contends

[A DARK CLOUD](#)

The U.S. Supreme Court has blocked the counting of ballots for president for the first time in history, a dangerous turn for democracy

[ORANGE CRUSH](#)

Dems wage online "Boycott Florida" campaign

[PUPPET THEATER OF THE ABSURD](#)

A judge upheld charges against puppetistas arrested during the Republican convention, after both the prosecution and defense put on quite a show

[ELECTION MYTHS](#)

Here's a reality check to silly and wrongheaded ideas which are being reinforced about the presidential election

TRIGGER LOCKED

Gun champions win Congress, fight for Bush

THE WILL OF THE PEOPLE

Isn't it time for George W. Bush to face the basic fact that the American people--and the voters of Florida--wanted somebody else?

NO JUSTICE, NO GOLF

Sure conservatives dress funny, talk funny and think funny. Now we know they protest funny, too. Looking back at the Miami Golfers riot of 2000.

JUST LET THIS ELECTION END

All right, fine, democracy has collapsed. Just give back our prime-time shows

CALL IN THE CELEBS

Will the Chads and dimples deliver us from this never-ending election?

COUNTER POINT

The numbers game in Florida proves that the Democratic process still works

MOB RULE WINS

A mob assault on the Dade County election board intimidated the board into halting a crucial recount

WEA CULPA

A Nader supporter's open apology to Gore voters

ONE PUNCH, YOU'RE OUT

The fight's not over until the bell rings--or until the last vote is counted

GORE BREAKS 50 MILLION

The veep's national vote tally now exceeds 50 million votes, making him only the second U.S. presidential candidate ever to reach that figure

THE BRIGHT SIDE OF CHAOS

There are benefits to the PR war being waged by Gore and Bush

WHAT CRISIS?

The jabbering classes have it wrong: Voting irregularities and fraud are the real constitutional crisis

COMMANDER-IN-THIEF?

If Al Gore lawyers his way into running the country, Americans won't be happy

AN OPEN LETTER TO KOFI ANNAN

Michael Moore suggests: Send in the U.N. election observers!

[OUT OF THE PARK](#)

The secret to successful stadium referendums

[THE GOP'S POPULAR VOTE HYPOCRISY](#)

When the Republicans feared Al Gore might win the Electoral College but lose the popular vote, they planned to challenge the legitimacy of his victory

[STOP, THIEF!](#)

Michael Moore speaks out about the Florida cliffhanger and the looming electoral showdown

[FLIPPING A COIN](#)

It's a tie! What now?

[CAPITOL PUNISHMENT](#)

Did **Voteauction**.com subvert democracy?

[ONE VOTER STRIKES BACK](#)

An American voter, fed up with the media's exaggerations about Al Gore's exaggerations, has made a federal case out of it

[NADER'S SURGE](#)

How can we explain Nader's strong numbers, when third-party candidates traditionally fade in the weeks before an election?

[VOTE LDS?](#)

Republicans declare good Mormons can't vote Democrat. LDS leaders say otherwise, but will their flock take heed?

[LET THE BLAME GAMES BEGIN](#)

Accusing Nader of causing Gore's downfall is akin to blaming a warning label for a product that fails

[ANYBODY HOME?](#)

George W. Bush gets away with some serious stupidity

[LIEBERMAN'S LARGESS](#)

The senator who would be veep brings home the bacon to local defense contractors

[SWINGING STATE?](#)

An upstart Democrat mounts a surprisingly strong challenge against a Republican incumbent in Michigan's U.S. Senate race

[THE KIDS ARE ALL RIGHT, UNLESS THEY PROTEST](#)

George W. Bush's minions lay the smackdown on students at a California high school

[BLACK MAGIC](#)

After 200-plus years of white guys running Congress, African Americans are poised to take over 22 key House committees and subcommittees

[NADER LETS LOOSE](#)

Ralph is actually running a campaign full of good humor and crowd-pleasing punchlines

[PARTY ANIMAL](#)

Why she's not voting for Nader... and thinks you shouldn't, either

[RUNNING SCARED](#)

Some would-be Nader supporters are too frightened to abandon Gore, but the vice president and George W. Bush may be similar evils anyway

[THE YOUTH VOTE](#)

The Kids Voting project aims to instill lifetime voting habits

[REGULAR JOE](#)

Sen. Lieberman's daughter Rebecca says he's always been "a regular guy"

[DADDY'S GIRL](#)

Kristin Gore talks political apathy and why her father should win

[CHECKING THE BALLOTS](#)

How do we know there isn't cheating going on within the U.S. electoral system?

[RAISING GREEN](#)

Sounding off with Dead Kennedys guru Jello Biafra at a Green Party fundraiser

[KISS ME, GEORGE](#)

Is a kiss just a kiss? It's debatable.

[FORTRESS FEINSTEIN](#)

Does California Sen. Dianne Feinstein view her latest campaign as more of a coronation than an election?

[NADER, THE DEBATES & YOU](#)

Ralph Nader needs to be included in the presidential debates, if for no other reason than to force the twin candidates to focus on real issues

[DUBYA, COAL & THE INTERNET](#)

Without attribution, George W. Bush cites dubious coal-industry data to justify his energy plan

DEBATE SPINNING

When it comes to presidential debates, reality often gets washed away in a media spin cycle that opts for quick one-liners over complex reality

BROAD APPEAL

A male columnist asks, Are women too dumb to vote?

LA RAZA TO THE TOP

In the struggle for the hearts and votes of Latinos, Republicans are doing well, but Democrats are doing better

ENVIRONMENTAL CONTROLS

Al Gore and George W. Bush offer sharply contrasting strategies for energy production and the environment

CIVIL ENGINEER

Bouncing back from a Larry Flynt-ignited sex scandal, Congressman-turned-lobbyist Bob Livingston helped draft the feel-good Republican platform

RIDING WITH RALPH

Candidate Nader talks about corporations, race and his challenge to the two-party system

MR. SUBLIMINABLE

Can Bush's press machine save him from his dyslexic ways?

DOWN THE HATCH

Is Utah Sen. Orrin Hatch vulnerable to defeat?

WHITE HOUSE WARMING

A gallery exhibit examines the home-decorating tastes of U.S. presidents

OFFSTAGE CHATTER

Third-party candidates remain angry over their exclusion from debates

BETTING ON THE FAMILY FARM

Buchanan and Nader take on Big Agriculture at FarmAid

TEDDY'S CHARGE

Why U.S. Sen. Edward M. Kennedy will be reelected in November by a landslide

WHO'S ON THIRD?

Presidential debates are back on track--and sure to be dull as dirt

NADER'S LONG MARCH

Ralph Nader tries to do nothing less than revive American democracy

[THE NADER DILEMMA](#)

He's a great protester, but would he be a good president?

[VOTE THE ROCK](#)

No one Rocks The Vote anymore. Apparently, you are now required to Smackdown Your Vote.

[MUSIC WITH A MESSAGE](#)

The Jello Biafra-fronted No WTO Combo throws down "Live From the Battle of Seattle"

[LEADING LADY](#)

Betty Friedan's memoir, "Life So Far," chronicles the progress of feminism

[WOMEN ON THE VERGE](#)

A pair of pundits essay politics' ultimate gender gap

[KARL ROVE'S QUICK COUNT](#)

As the presidential race tightens, the Bush campaign doesn't seem to be worried

[POWER, POLITICS & THE HILLARY TRAP](#)

Laura Ingraham joins the war on Hillary Clinton

[RIGHT HOOK](#)

Joseph Lieberman's punches at popular culture reveal a man who has more in common with the Christian Coalition than mainstream America

[CAMPAIGN BUTTONS](#)

The Web should be our best way to find out about any candidate's platform

[SURVIVING THE ELECTION](#)

Mr. Bush, your Tiki torch please

[A NIGHT TO REMEMBER](#)

Dreaming of a Ralph Nader win

[LIFE OF THE PARTY](#)

Gore's too boring to say many stupid things, but Bush doesn't suffer under such restrictions

[MILLIONAIRE LAWYER FOR PRESIDENT](#)

Another side to crusading anti-corporate and ideological outsider Ralph Nader

[SMART ASSET](#)

Project Vote Smart continues its work to save democracy--and it doesn't cost you a penny

CANDIDATE AT THE TROUGH

As Halliburton CEO, Dick Cheney and his employer made millions on government projects

BARE CUPBOARD

The political brain drain emerges in force

STILL VOTING FOR NADER

Only one man running for president deserves a single honest vote, and don't let anybody scare you into thinking otherwise

POLITICS OF ROCK

How the next president could affect the music you're allowed to buy

MOLDED TO RUN

Supporting Barbie for president

HOLY SMOKE & MIRRORS

The Gore-Lieberman campaign brings a theocratic style to the Democratic Party

JOCK THE VOTE

Ex-football stars are filling the Republican ranks--and former Nebraska coach Tom Osborne may soon join them

A NEW POLL TAX?

Coverage of the recent political conventions proved that you'll have to pony up for cable to get a full dose of democracy in action

L.A. STORIES

The protests in Philadelphia were like a day at the shore compared to the action in Los Angeles

GORE ON THE FLOOR

If he wants his campaign to really take off, Al needs to learn from Bill Bradley's mistakes

BY ANY MEANS NECESSARY

In his bid for the White House, Al Gore campaigns with a Fatboy Slim song from a record he and his wife once would have fought to "clean up"

WRESTLING FOR VOTES

Can the WWF swing the presidential election?

CATCH-UP TIME

With Ford and Lieberman in tow, Gore makes a move toward the political center

[BIG AL'S OIL FARM](#)

Gore's ties to Occidental Petroleum are troublesome for a candidate who has depicted himself as a friend of the environment and of the little man

[RESTORE THE HORROR?](#)

George W. Bush wants to spend about \$1 trillion on a revised Star Wars missile system that probably won't work

[FREE TO BE THE GOP](#)

Despite the right-wing butt-kissing, the Bush-Cheney ticket marks the party's return to its roots: big money and big business

[POLITICAL MISMATCH](#)

What's wrong with the presidential debates

[THE SUSPECT SLUR](#)

Funny, Hillary Clinton doesn't look anti-Semitic

[HOMEGROWN](#)

Smoking out the dope from Texas

[CRUEL CONVENTIONS](#)

Corporate payoffs and police brutality commingle at the Republican and Democratic confabs

[REARRANGING JUSTICE](#)

What would Bush's Supreme Court look like?

[TUNED OUT](#)

As the Republican and Democratic conventions become increasingly scripted, TV networks provide less coverage

[ACTING UP](#)

Energized activists promise dozens of marches, rallies and direct-action protests at the Republican National Convention

[GIVING PEACE A CHANCE](#)

Peace Action keeps candidates' feet to the fire on the nuclear weapons issue

[THE ALSO-RANS](#)

Taking a dip into George W. Bush's veep pool

[CASTAWAY](#)

Fed up with the political process? Don't vote.

[NO FREAKS](#)

Philly cops start cracking down as the Republican Convention hits town

ODD MAN OUT

Alan Keyes may not have a prayer of winning the Republican nomination, but for him, it's principle that counts

CORPORATE RECEPTION

Big business shells out big bucks to hobnob with the government

NADER GETS UP TO SPEED

Major parties move when third parties scare 'em

BEYOND THE RANT

Funded by the nonprofit Democracy Project, Quorum.org attempts to create a useful forum for politically minded folks of all stripes

MOVE YOUR DAMN BOX

With recent demonstrations in Seattle and Detroit, Philly police are leaving nothing to chance in preparing for the Republican National Convention

THE GREENING OF AMERICA

A fledgling political party tries to make its mark on the United States

OVAL OFFICE ASPIRATIONS

Nader will run like a winner for the presidency

PAIN IN THE CAMPAIGN

George W. Bush just won't let the controversy over Zack Exley's parody site die

THINKING BIG

The U.S. House of Representatives takes a look at corporate accountability

NADERING NABOBS OF POSITIVISM

Ralph Nader ain't perfect, but he's saying some right things and thinking down the political road

UNCONVENTIONAL POLITICS

While the two big parties hold their national conventions, Arianna Huffington will be throwing shadows

THE GREEN TEAM

The Green Party got together in Denver and decided that Al Gore and George W. Bush make them want to Ralph

TEXAS TWISTER

Lefty-at-large Jim Hightower says presidential politics is just so much horse manure

TALK OF THE TOWN

James McCourt's novel "Delancey's Way" doubles as an insider's guide to Beltway culture

STUMPING THE POLS

What questions would you ask the candidates?

POLL POT

VoteHemp.com aims to distribute voter guides containing every state and federal candidate's official position on industrial hemp in the 2000 elections

HE'S NO UNABOMBER

Right-wing ranters aside, Al Gore is not out to destroy industrial civilization

GLOBAL COOLING

The Kyoto Accord on global warming stands no chance of taking effect until developing nations are brought into the loop

REALITY POLITICS?

If it works for "Big Brother," let's get the candidates on camera 24/7

NADER'S RAIDERS

Greens color up the political landscape in an otherwise-tedious election year

THE F WORD

Laura Ingraham's disgust with liberal feminism drives the refreshing rant "The Hillary Trap"

UNIFIED MOVEMENTS

Should the IMF be reformed, or destroyed? What's at stake? And can a decentralized movement really do battle with such powerful institutions?

SILENT AL

Innocent men are being sentenced to death, and Gore has nothing to say about it

CAMPUS COMEDY

The Web's Pseudo Politics edges out Comedy Central for skybox space at the GOP convention

DIGITAL DIVISION

Can "e-government" bring us point-and-click democracy?

CALLING ALL CARPETBAGGERS

Criticizing Hillary Clinton for running for Senate in a state she's not from is just ridiculous.

UNCONVENTIONAL COVERAGE

Independent journalists create a news center to cover the Republican convention in Philadelphia

THE DEBATE DEBACLE

Keeping candidates out of the presidential debates is the secret shame of American politics

FALWELL'S GAY OLD TIME

Regardless of how the message is cloaked, the religious right lacks concern for human decency, one columnist charges

VOTE FOR ONLINE BALLOTS

It's time to allow Internet voting

[love & sex](#)
[comix](#)
[politics](#)
[consumer passions](#)

A combination of pop-culture pageant and important civic event, the 2000 presidential race bears watching both for pure [entertainment value](#) and because the choices we make after closing the ballot-box curtain will determine who [shapes](#) U.S. policy heading into the 21st century.

But that doesn't mean you have to swallow the campaign coverage served up by [conventional](#)

sources. That's where Newcity.com's Alternative Vote 2000 comes in.

Drawing from a deep pool of content sites and alternative weeklies--including three in Al Gore's Tennessee and two in George W. Bush's Texas--this site links to hundreds of unconventional news and investigative reports, not to mention features and analysis by the likes of controversial sex columnist Dan Savage and third-party candidate Ralph Nader. It's our goal to collect a raw, heady mix of activist political journalism and canny commentary of a quality not seen since [Hunter Thompson](#) roamed the campaign trail.

Scroll down this page to find general campaign stories. For reports focusing on specific parties and candidates, click on the links below for [Democrats](#), [Republicans](#), [Third Parties](#) and [Other Key Races](#). The latter section includes extensive coverage of Hillary Clinton vs. Rick Lazio for that U.S. Senate seat in New York. In addition, the column of links at left will take you into Newcity.com's irregular content sections, while the navigation bar at the bottom of the browser will take you to the network home page and to all of our affiliate sites.

We also encourage you to use the link to our discussion section at the top of the page to post your own election news, views, theories and gossip. And if all of that's not enough to make Alternative Vote 2000 a regular stop on your campaign trail, we've collected an offbeat selection of off-network links to give you a well-rounded diet of basic information to go with our political reports and discourse, including:

Candidate sites for [Al Gore](#), [George W. Bush](#) -- oddly, you can also get to

Voter information, registration and participation sites, such as the invaluable [Project Vote Smart](#), plus "America's Interactive Town Hall" [E-The People](#), [ElecNet's](#) gateway to election-related sites covering all 50 states, the good-government folks at the [League of Women Voters](#), [The Democracy Network](#), a site devoted to [other political sites](#), a look at the [total cash](#) raised by presidential hopefuls, a forum for [black political thought](#), a 21st-century [feminist](#) movement, a new source for public opinion and [policy analysis](#), candidate [videos](#), the activists of [Common Cause](#), the gossipmongers of [The Skeleton Closet](#) and the ten-year-old [Rock the Vote](#) campaign

Partisan journals [The Nation](#), [The New Republic](#), [The Weekly Standard](#), [National Review](#), and The Heritage Foundation's [Townhall.com](#)

And just-for-fun links to parodies of [Al Gore](#), [George W. Bush](#) and the [Not The Bush Campaign Headquarters](#) site.

Finally, here's your chance to bypass the media entirely and warp the images of [Gore](#) and [Bush](#) all by yourself. And if you get sick of Campaign 2000, you can always check on the early [entrants](#) to the [2024](#) presidential [race](#).

[Frank Sennett](#) [editor]

THE DOG GETS HIS BONE

What will Montana Gov. Marc Racicot receive for being Bush's pit bull?

GOOD RIDDANCE

A look at the top stories that will hopefully disappear now that the election is over

BUSH FACES LEGITIMACY GAP

Who had equal protection in Florida?

STEAL THIS ELECTION

An urgent call for progressives to unite and fight a Bush presidency

COUNT ON CYNICISM

If you think it was ugly before...

W'S COUP D'ETAT

The 5-4 ruling by the U.S. Supreme Court blocking Florida recounts short-circuits democracy and reveals the nation's highest court to be the ultimate partisan weapon

OUTSIDE THE COURTHOUSE

History was being made inside the Supreme Court building, but the real fun was going on outside

PEOPLE, GET READY

Those Democrats are about to cave in, writes Michael Moore. But should we?

CALLING IT LIKE IT IS

George W. Bush and his allies are trying to stage a coup, an overthrow of the will of the people, Michael Moore contends

SATURATION COVERAGE

What if other issues got the same treatment as Election 2000?

SUPREME COURT INTRIGUE

Justice Sandra Day O'Connor, a supposed "swing vote" on the U.S. Supreme Court, may have a personal incentive to ensure the election of George W. Bush

A DARK CLOUD

The U.S. Supreme Court has blocked the counting of ballots for president for the first time in history, a dangerous turn for democracy

AT WAR WITH THE BALLOTS

George W. Bush continues his trench warfare against counting Florida's votes

WHERE'S WALDO?

It's not your imagination: W. is shrinking

REPUBLICAN FASCISTS & DEMOCRATIC WIMPS

Imported, mobile thugs were allowed to trash the law in Miami

RECOUNTING THE BATTLE

Will Durst names the winners and losers of the Florida vote fight

ORANGE CRUSH

Dems wage online "Boycott Florida" campaign

HEALING THE AMERICAN PIMPLE

The Gore Sore and the Bush Boil have bad tastes

LET'S HAVE A RUNOFF

Australians do it, Londoners do it, so why can't we?

WINNING PROPOSITION

The pundits seem to think judges create democratic legitimacy, when that really comes from the votes

ELECTION MYTHS

Here's a reality check to silly and wrongheaded ideas which are being reinforced about the presidential election

MISSING THE HONEYMOON

The media bemoan a dire shortage of preinaugural schlock

A SUPER SOLUTION TO THE ELECTION MADNESS

Guess what state the Super Bowl is being held in this year?

TRIGGER LOCKED

Gun champions win Congress, fight for Bush

THE WILL OF THE PEOPLE

Isn't it time for George W. Bush to face the basic fact that the American people--and the voters of Florida--wanted somebody else?

THE COURTS & THE COUNT

Reagan-Bush appointees to the U.S. Supreme Court seem ready to enforce legal technicalities that could ensure Texas Gov. George W. Bush's election

FLORIDA RECOUNT

Finally, a huge media spectacle that really matters?

NO JUSTICE, NO GOLF

Sure conservatives dress funny, talk funny and think funny. Now we know they protest funny, too. Looking back at the Miami Golfers riot of 2000.

A BUSH FAMILY SLIP-UP

The official story is that Florida Gov. Jeb Bush has stayed out of his state's electoral fray. But his father thinks otherwise.

DYSFUNCTION OF THE FOURTH ESTATE

Where the hell was the press during the presidential election?

JUST LET THIS ELECTION END

All right, fine, democracy has collapsed. Just give back our prime-time shows

LOUSY ELECTION COVERAGE CONTINUES

Media spinners still ignore the obvious

BALLOT BALLET

Three Philadelphians travel to West Palm Beach for a front row seat at the dance of democracy

THE RIGHT TO BE HEARD

The Florida Supreme Court's ruling sums up what this whole political soap opera is all about: the rights of the voters to have their voices count

WHAT'S THE HURRY?

The media's premature anointing of Bush has distorted our perception of what has happened since, and threatens to taint the outcome

ELECTORAL PLAYBOOK

Available only as an ebook, "After the Vote: A Guide to the Electoral College" answers just about every question a political junkie could pose

THE OLD COLLEGE TRY

The Bush-Gore fiasco shows the electoral system at its worst

CALL IN THE CELEBS

Will the Chads and dimples deliver us from this never-ending election?

DOWN FOR THE COUNT

For Duval County Florida's African-American voters, invalid ballots are part of a system that has long failed to represent them

BASEBALL'S CRUEL POLITICAL SATIRE

An email rumor about an interview with the presidential candidates is an obvious caricature, and apparently true

COUNTER POINT

The numbers game in Florida proves that the Democratic process still works

BUSH & THE LAW

Dubya rallied his angry troops in Florida with a speech suggesting that this would-be president doesn't understand how the American constitutional system works

GORE'S FLORIDA VICTORY

A new analysis of the Florida vote indicates that Vice President Al Gore was the voters' choice

MOB RULE WINS

A mob assault on the Dade County election board intimidated the board into halting a crucial recount

TRIUMPH OF THE W

"President-Elect" Bush demonstrates how hardball politics can take precedence over the will of the voters

DUELING PARTIES

West Palm Beach: A tale of two cities amid Florida's election madness

COUNT ME IN

All right. Here we go again.

A SINGLE VOTE COUNTS

Lessons from campaign 2000, and an opinion on the hotness of Florida Secretary of State Katherine Harris

WEA CULPA

A Nader supporter's open apology to Gore voters

WHATEVER WORKS

The election mess underscores that our government was not designed to work efficiently

ONE PUNCH, YOU'RE OUT

The fight's not over until the bell rings--or until the last vote is counted

LIFE BEYOND THE RECOUNT

No matter who shuffles to the podium on January 20, life--and politics--will go on

DITCH THE ELECTORAL COLLEGE

How an antiquated system still protects the interests of Southern white males

DIRECT DEMOCRACY VS. THE ELECTORAL COLLEGE

Arguments for direct election of the president

OPEN LETTER TO THE FLORIDA SECRETARY OF STATE

The following was written by Rabbi Richard M. Yellin of Palm Beach County

THE BRIGHT SIDE OF CHAOS

There are benefits to the PR war being waged by Gore and Bush

HEARTLAND HEAVE-HO

The presidential election shows it's about time to cleave the country in two

PUBLIC VS. THE PUNDITS

When it came to election 2000, the people's patience put beltway journalists in their place

WHINERS & LOSERS

A Gore election would only mean four more years of whining by Republicans and their mouthpiece, Rush Limbaugh

BECOMING THE STORY

As long as voters pay attention to the news media, the way they cover election campaigns has the potential to influence the outcome

SIMPLISTIC SIMONS

The press has divided this most important of matters into black-and-white terms

PRAISE THE LORD & PASS THE AMMUNITION

Atrocities from Decision 2000

BITTER ELECTIONS & DEMOCRATIC DREAMS

Like it or not, the new president will face reform at grassroots level

PRESIDENTIAL GRIDLOCK SUCKS

Brainless Bush or charmless Gore, America's going to get just what it deserves

WHO-WUN-IT

Counting the angry, white Chads

WHAT CRISIS?

The jabbering classes have it wrong: Voting irregularities and fraud are the real constitutional crisis

RUTHERFORD B. HAYES SPEAKS OUT

Our 19th President, who knew a thing or two about electoral controversy, offers his services as a talking head

A VOTE FOR SANITY

When it comes to how the Florida voting irregularities were spun, the inept Democrats once again allowed the Republicans to gain the upper hand

FUZZY VOTING

A rush to judgment won't clear up Indecision 2000

HITTING THE MYTHS

10 myths about the 2000 election results

GREETINGS FROM THE SUNSHINE STATE

Transcribing a testy conversation between Al & Dubya

LET'S MAKE A DEAL

We wouldn't be in this mess if the candidates actually stood for something

AN OPEN LETTER TO KOFI ANNAN

Michael Moore suggests: Send in the U.N. election observers!

THE CAMPAIGN ISSUE THAT WASN'T

Dick Cheney's oil company engaged in shady business deals with Iraq

FLIPPING THE ELECTORAL COIN

Admit the truth: Bush and Gore essentially ended up in a tie

BEYOND MISTAKES IN FLORIDA

Allegations of outright vote fraud are leveled at shady supporters of George W. Bush

THE GOP'S POPULAR VOTE HYPOCRISY

When the Republicans feared Al Gore might win the Electoral College but lose the popular vote, they planned to challenge the legitimacy of his victory

WHO SHOULD CONCEDE?

The Republican/media demands that Al Gore do "what's good for the country" and concede the election distort what really happened in recent U.S. political history

BROADCAST ARROGANCE

TV networks compound a national crisis

ELECTILE DIFFICULTIES

It's hard to write a sex column when you don't know who the president is

SUNSHINE STATEMENTS

A conversation between two political junkies about the ramifications of the Florida recount

STOP, THIEF!

Michael Moore speaks out about the Florida cliffhanger and the looming electoral showdown

MISSOURI: THE REAL SWING STATE

You think things in Florida are crazy? You should see what's happening in the Show-Me State.

FEELING BUSHED

A Democrat makes a long Election Day's journey into night

VOTE SCAM IN FLORIDA?

Writers, conspiracy theorists and underground culture icons sound off about the Florida cliffhanger

VICTOR BEWARE

The loser of the presidential election might someday be happy to have avoided the White House--and "Tecumseh's Curse"

FLIPPING A COIN

It's a tie! What now?

EYES WIDE OPEN

The close election results might actually be a good thing

ELECTORAL CARNAGE

He knew it was going to be a bizarre night when the first person he met at the polls was a woman named Carter-Ford

RETURN OF THE BULL MOOSE

Look out Republican Party: Here come the young Bulls

CAPITOL PUNISHMENT

Did Voteauction.com subvert democracy?

SHOCK THE POWERFUL: VOTE

As screwed up as the system may be, you have the ability to change it

HELL NO, WE WON'T VOTE

Interviews with more than 100 young people across the country reveal many reasons behind their disdain for the political process

READY TO VOTE

Fifteen young Americans reveal the issues that matter to them and what they feel about the candidates

HISTORY ON THE BALLOT

This presidential election could determine whether Americans gain access to Cold War history

FLUNKING OUT?

The perils of the electoral college

FIGHT FOR YOUR WRITE-IN RIGHT

Even in the U.S., voting for a candidate of choice has sometimes landed

citizens behind bars

WING AND A PRAYER

"The West Wing" gives us the president we wish we deserved

SURPLUS LIES

The candidates are battling over how to spend money the nation doesn't really have

WHO CAN SHOUT THE LOUDEST?

Gore and Nader supporters square off during a Wisconsin campaign rally

VOTE LDS?

Republicans declare good Mormons can't vote Democrat. LDS leaders say otherwise, but will their flock take heed?

STORIED GROUND

Decoding the presidential candidates' rhetoric on use of public lands

THE NORWEGIAN DIALECTIC

Don't elect a president based on looks or charm; use the rule of opposites instead

FACING OFF

Creating the presidential debate that might have been

LET THE BLAME GAMES BEGIN

Accusing Nader of causing Gore's downfall is akin to blaming a warning label for a product that fails

BUSH'S MYSTERIOUS \$40 TRILLION

Analyzing George W. Bush's claim that Al Gore's Social Security plan will produce a \$40 trillion debt by 2050

CAMPAIGN BUTTONS

Don't let a lack of information stop you from casting a ballot that counts. Here's a crash course on the best sites to visit before election day.

IGNORANCE AIN'T BLISS

Thanks to the Commission on the Presidential Debates, a large segment of the population won't know who some of the candidates are on election day

STILL UNDECIDED

As election day looms, one columnist still can't choose a candidate

20 QUESTIONS

Important queries reporters have failed to make on the campaign trail

COLLEGE EXAM

If the Electoral College system goes haywire, Dick Cheney could be our next president

SOCIAL INSECURITY

The elderly aren't the only ones who may lose

WORSHIP AND LUST

Gore and Bush salivate over high-tech support

STUMPED SPEECH

Political ads are a goldmine for TV stations. Is that why they're cutting campaign coverage?

VIRGINS MAKE A DIFFERENCE

Meet the last uncynical voting group in America

THE BRIGHT STUFF

Forget soft money issues: The smart money is in electing intelligent candidates for public office

REPORTER FROM ANOTHER PLANET

A columnist from the Galactic Syndicate analyzes the earth media's superficial coverage of campaign 2000

THE GREAT AMERICAN YARD SALE

Bush vs. Gore? That's like choosing between the \$3 lawn chairs and the \$4 box of baseball cards.

ELECTORAL ATTACKING

"Hats in the Ring: An Illustrated History of American Presidential Campaigns" shows negative campaigning is nothing new

SUPREME CHALLENGE

Who should nominate the next justices to the land's highest court?

RUNNING SCARED

Some would-be Nader supporters are too frightened to abandon Gore, but the vice president and George W. Bush may be similar evils anyway

STOP THE PRESS... PLEASE

In campaign 2000, the media continues to trivialize the discussion of any issue or institution, no matter how large

THE YOUTH VOTE

The Kids Voting project aims to instill lifetime voting habits

CHECKING THE BALLOTS

How do we know there isn't cheating going on within the U.S. electoral system?

PROTECTING BUSH-CHENEY

While bashing Al Gore at every turn, the national press corps has turned a blind eye to lying and hypocrisy by George W. Bush and Dick Cheney

KISS ME, GEORGE

Is a kiss just a kiss? It's debatable.

NADER, THE DEBATES & YOU

Ralph Nader needs to be included in the presidential debates, if for no other reason than to force the twin candidates to focus on real issues

NONE OF THE ABOVE

PBS spotlights a few presidential candidates who aim to rock the vote

DEBATE SPINNING

When it comes to presidential debates, reality often gets washed away in a media spin cycle that opts for quick one-liners over complex reality

BROAD APPEAL

A male columnist asks, Are women too dumb to vote?

LA RAZA TO THE TOP

In the struggle for the hearts and votes of Latinos, Republicans are doing well, but Democrats are doing better

ENVIRONMENTAL CONTROLS

Al Gore and George W. Bush offer sharply contrasting strategies for energy production and the environment

EARTH IN THE BALANCE?

How the major-party presidential candidates would treat the environment

GORE, OR LESS

Thinking of voting for Ralph Nader? Anti-nuke activist Daniel Ellsberg has one word for you: Ka-boom!

KEEPING SCORE

An annotated guide to candidates Bush and Gore

MYTH OF THE REPUBLICRATS

In politics, as in life, differences matter

MR. CONGENIALITY VS. THE DRONE

Charm matters more than talent in the presidential race

WHO'S ON THIRD?

Presidential debates are back on track--and sure to be dull as dirt

VOTE THE ROCK

No one Rocks The Vote anymore. Apparently, you are now required to Smackdown Your Vote.

CAMPAIGN COVERAGE CONFLICTS?

A new report looks at the campaign contributions and political agenda of major media companies

WOMEN ON THE VERGE

A pair of pundits essay politics' ultimate gender gap

CAMPAIGN BUTTONS

The Web should be our best way to find out about any candidate's platform

SURVIVING THE ELECTION

Mr. Bush, your Tiki torch please

DIVERSION, NOT DIRECTION

Foes of George W. are playing with fire by supporting Ralph Nader

TRUE CONVICTIONS

Barbara Ehrenreich on why she's sticking with Ralph Nader even as Democrats say such votes may cost Gore the election

SMART ASSET

Project Vote Smart continues its work to save democracy--and it doesn't cost you a penny

ISN'T THE TWO-PARTY SYSTEM COOL?

You'd think so if you listened to the mainstream media

A combination of pop-culture pageant and important civic event, the 2000 presidential race bears watching both for pure [entertainment value](#) and because the choices we make after closing the ballot-box curtain will determine who [shapes](#) U.S. policy heading into the 21st century.

But that doesn't mean you have to swallow the campaign coverage served up by [conventional](#) sources. That's where Newcity.com's Alternative Vote 2000 comes in. Drawing from a deep pool of content sites and alternative weeklies--including three in Al Gore's Tennessee and two in George W. Bush's Texas--this site links to hundreds of unconventional news and investigative reports, not to mention features and analysis by the likes of controversial sex columnist Dan Savage and third-party candidate Ralph Nader. It's our goal to collect a raw, heady mix of activist political journalism and canny commentary of a quality not seen since [Hunter Thompson](#) roamed the campaign trail.

wieso bekommt der Provider die ganze Kohle?

Das ist schon ziemlich pervers, immerhin wurde ja auch nicht die Post belangt, weil sie Briefbomben ausgeliefert hat. Warum bekommen also nicht die Adressaten wirklich 10 dollar pro email? Oder warum wird nicht endlich Kohle für eine Globale AntiSpam Initiative gesammelt? Trotzdem ganz gut für die Antispam Front... Die Spam-Wars gehen weiter!

Kommentar zu **Eine Milliarde Dollar Entschädigung für Spam-Mails**

microsoft klärt auf

na endlich klärt uns microsoft mal auf, was unsere kinder so treiben, wurde ja auch schon zeit. diese ganzen neuen bedrohungen durch das internet sind ja auch wahnsinn. und microsoft sind immer die ersten, die sowas auf den punkt bringen (l33t gibts sicher seit dem es schreibmaschinen gibt) warum nur die kinder l33t schr3iben sollen, versteh ich nicht ganz, und warum das ganze eine bedrohung darstellt noch weniger. allerdings hat l33t und diese art zu schreiben mittlerweile eine andere bedeutung: und zwar bei SPAM. ziel ist hier, die SPAMfilter zu umgehen. und das funktioniert soweit. v14gra haben wir alle ja schon mal per email angeboten bekommen...

absicht?

das spammen kommt ja nicht von den chinesen, sondern von amerikanischen firmen, die sich in china server mieten, die dann spammen. als mögliche antwort kann man zb. alle chinesischen IPs bannen. das blockt dann aber auch alle surfer aus china. ich habe einen längeren artikel über genau dieses thema geschrieben http://parasew.com/archives/2005/01/china_ist_fuer.html

spyware...

schaut euch mal "Spybot Search and Destroy" an, meiner Meinung nach das beste Anti-Spyware Tool. (<http://www.safer-networking.org>) Und nochwas kann ich euch empfehlen: XPY Windows, ein Tool um Windows sicherer zu machen (<http://xpy.sf.net>)

wieso bekommt der Provider die ganze Kohle?

Das ist schon ziemlich pervers, immerhin wurde ja auch nicht die Post belangt, weil sie Briefbomben ausgeliefert hat. Warum bekommen also nicht die Adressaten wirklich 10 dollar pro email? Oder warum wird nicht endlich Kohle für eine Globale AntiSpam Initiative gesammelt? Trotzdem ganz gut für die Antispam Front... Die Spam-Wars gehen weiter!

verurteilung

der typ sollte das ganze verdiente geld abgeben müssen. das könnte dann zb. in opensource entwicklung fließen, in die weiterentwicklung von spamassasin, mozilla, etc. aber das wird ja eh nicht passieren, wollte nur meinen senf dazugeben, weil ich nicht glaube dass jemanden eine gefängnisstrafe abschreckt, bei diesen gewinnen, die da erzielt werden können.

spamcop

kennt eigentlich jemand SPAMCOP? <http://www.spamcop.net/> weil der beste trick sind ja diese "blacklists" (auch robinson-liste genannt), wo sich leute mit ihrer richtigen adresse eintragen um so nie wieder spam zu erhalten; genau das gegenteil ist aber der fall. bei spamcop bin ich mir nicht ganz sicher, wer weiss mehr?

voteauction

2000 zur US-Wahl Bush/Gore gab es ein nettes Projekt von der Gruppe ubermorgen.com, die damals eine Online Plattform zur Versteigerung der Wahlstimmen gegründet hatten. Das Nachfolgeprojekt heisst **sellthevote.com**, allerdings nicht von [ubermorgen](http://ubermorgen.com), die machen gerade die **agency for manual election recounts**. gute ansätze, vor allem der eine: Warum soll nicht jeder Erdenbewohner mitbestimmen dürfen wer US-Präsident werden soll, wo dieser doch wesentlich globale Themen definiert? die es interessiert finden hier einen längeren artikel von mir dazu: <http://parasew.5uper.net/archives/2004/11/sellthevotecom.html>

DAILY DOXA

A Fiction of Dubious Merit

By Christopher Robbins

| [\[permanent link\]](#)

Friday, October 18, 2002: such a silly world we live in
Thursday, October 31, 2002: Bellybuttons in space and time

we have to warn you that if you live in one of the following countries it might be illegal for you to download and/or use Blade Enc. Wading through a sea of generic academicese as I try to find some useful stats on computer and internet access in the South Pacific, this one takes the cake: [On the Internet Thinking in Action](#), By Hubert L. Dreyfus

Australia, Austria, Canada, Belgium, Denmark, Finland, France, Germany, Great Britain, Greece, Hong Kong, Hungary, Ireland, Italy, Japan, Korea, Liechtenstein, Luxembourg, Monaco, Norway, Russia, Singapore, Spain, Sweden, Switzerland, The Netherlands, USA Published in 2001, this 144 page book uses philosophical analysis to explore questions such as whether the Internet can solve the problem of mass education and bring human beings to a new level of community. Drawing on philosophers such as Søren Kierkegaard, Friedrich Nietzsche,

| [\[permanent link\]](#)

and Maurice Merleau-Ponty, Dreyfus raises questions like the following: Can we leave our vulnerable bodies while preserving relevance, learning, reality, and meaning? Does life on the Internet achieve Plato's dream of overcoming space and time as well as body?

Thank you for this useful analysis of the Internet in Education. It has really helped me decide if my Introduction to Technical Drawing CD is gonna make any sense in Nauru. | [\[permanent link\]](#)

Thursday, October 17, 2002: Exposed roots

With a light touch, default HTML can be beautiful. | [\[permanent link\]](#)

Wednesday, October 30, 2002: Another attractive web font

More Sexy CSS from [In These Times](#), this time the fashionable Georgia:

Tuesday, October 15, 2002: urbanev: || thinking in flash ||

```
.storytitle {
```

This is quite a discovery: intelligent writing about Flash without the unnecessary surfer-dude or techno-jargon fluff. He starts on a theory, demonstrates it with a concrete example, and then generalizes the rule so that we can apply it to similar problems. A fantastic approach in a get-code-quick world. [\[permanent link\]](#)

```
font-family: Georgia, Times, serif;
```

```
line-height: 18px
```

```
}
```

Tuesday, October 15, 2002: Printed web pages

Back on the text/old media tip: ever noticed that a website hasn't *really* made it until its made it to print?

[case in point](#) | [\[permanent link\]](#)

Wednesday, October 30, 2002: Nice Fat Arial

Just spotted another instance of damn fine art. ~~This one~~ * * * * * looks best with Opera's tight kerns:

Good Fela

Tuesday, October 15, 2002: Situationing bombs in Iraq

Guy Debord gets righter every day: We have entered the age of meta-wars from in These Times - Good Fela | [\[permanent link\]](#)

(and isn't it just like a wannabe-academic to philosopsize bite-size marketed violence) | [\[permanent link\]](#)

Wednesday, October 30, 2002: Interesting physics speak, with .mov!

Tuesday, October 15, 2002: Using text in a new-media way

I don't know what the Evolution of the tinkerbell chaotic attractor or the Rotating Lorenz Attractor are, but they sure got funny names! | [\[permanent link\]](#)

Whether or not you consider what you do *art*, this strikes me as useful to inform your work, whatever it is:

5. Infuse work with meaning; don't rely on artistic statement ~~by~~ title ~~to~~ bridge gaps in incomplete work

Frankly, of all the new-fangled tools and media that make up *Interactive Media* (or whatever it is called on the streets of London these days), **text** has the most direct brute force for communicating meaning. At the same time, it feels so *old-media*. When I find I have created a piece that is some flashThing+text, it feels like the flash is the work and the text is the description. But text is a powerful tool, so I really should find a method that makes it a *part* of the work rather than a bridge *to* the work. Perhaps integrating the text comic-book style, or having it uncovered phrase by phrase are methods for making text a more fluid part of These Many Media. **and decide that if anyone has anything better to do with it, they can contact me.** One thing for certain: the floating poetry as projectile-vomit-in-reduced-gravity is **not** an option.

Elegant hack has clearly wrestled with their blog's identity as well, and have set my heart a tad more at ease with their wordy tagline, Information architecture, usability and interaction design issues, plus every single damn thing on the web that catches my, plus a few more oddities....

Talk here. | [\[permanent link\]](#)

Of course, they don't have nearly as prusumptuos a web-address as I. | [\[permanent link\]](#)

Monday, October 14, 2002: Parasitic Circuits

Wednesday, October 30, 2002: Archival Database Saved by Hackers

As much as I detest the buzzword *synergy*, I believe that I am experiencing something like it: just as my mind refuses to leave holiday Archival Database Saved by Hackers post | [\[permanent link\]](#) Rik Abel's blog stops dithering on about cool stuff he wants to buy and picks up the slack with some mighty fine links:

1. An automated design process that resulted in a circuit becoming a parasite.

In essence, the evolving circuit had cheated, relaying oscillations generated elsewhere, rather than generating it.
Wednesday, October 30, 2002:

2. A script that looks for the word "copyright" and then proceeds to build a page reassembled from the images and text on that page. If the website was anti-copyright, they probably want their words to be spread; if not, then they deserve to be teased as such. | [\[permanent link\]](#)
n.b. I have misused the word synergy, which is appropriate because it sucks. | [\[permanent link\]](#)

Wednesday, October 30, 2002: Digger Papers: Trip Without A Ticket

Monday, October 14, 2002: They Say Small

Some recent Word of the day: some ambulatory. As in

1. The SA Maddeningly sterile jobs for straitjackets, love scrubbed into an insipid "functional personal relationship" and Art as a fantasy pacifier....But there is a real danger in suddenly waking a
2. Robert Small, an Ambulist Proponent, Geometrist, Rotherhithe University, has written two pieces analysing images extracted from the SAY ether: TheySayCarte: an historic exercise in futility, and HouseScape: a comparative critique of identity and space also *sleepwalking* | [permanent link]
3. There' also a raw and unexplained image that has arisen from the SAY current

All packaged in a brightly colored, overlapping menu that is nearly impossible to read. (I like it best abstractly after most of the links have become a:visited). Word is a description of what it **feels** like to plumb the ether is coming up next from Robert a. Small, as well as an alternate navigation method. | [permanent link]

Wednesday, October 30, 2002: Improving transient erros

1. mean 403 : nice 403
2. cold redundant 404: coy 404

Wednesday, October 09, 2002: A burdgeoning virtual library in the Pacific | [permanent link]

This looks promising: with some funding from AUSAid, the University of the South Pacific has begun digitalising its library. The collection so far encompasses some Public Domain classics, books writing the South Pacific, and a few historical photos.

But it is a great start, and the way paper and photos rot around here, added to the fact that 50% of the students at the University of the South Pacific study from computer terminals at remote islands, rarely setting foot on the actual campus, this could become something really useful. | [permanent link]

I'd like to take a moment, or rather, I'd like *you* to take a moment to reflect on the gentler, transitory moments of the web. I remember reading somewhere someone talking about the only *real* moments of our lives being those fleeting segments when we catch ourselves off-guard, suddenly realizing we are in between activities.

The limbo, in between. Like working late, walking to the car, stopping as you put the key in the door and smell the rain on the pavement. And just realizing, for a moment, that you are there. That was the example the author gave. Rick says read this book for a good dose of technodreamy-nostalgia. I, for one, will do so.

Tuesday, October 08, 2002: Metrophage

Only 2 days left till I can back from holiday and without an excuse for these short and shallow posts. | [permanent link]
The same can be said of a 404 error. Amidst the hustle and bustle, the impatient waiting for a page to load, the search and click, we are occasionally graced with a rest period. A grace note. A limbo. A space between the actual content of the web. It forces us, like those occasional, off-guard moments in life, to stop and remember that we are here. And it is just as valid a part of the experience as the actual destinations, as the activities themselves.

So let us take a moment of silence for the gentle breeze of a 404.

And while we are gaping happily at the transitory moments of our general web experience, think to the experience of a web page loading, the pieces slowly coming together, nestling into place, until we are presented with the final mise-en-scene. This can be thought of as part of the journey, too. And sometimes, those mid-moments are more desirable than the final product.

Take this for example. A white palette with an ambiguous thread of gentle green script. Once the page was fully built it felt like many others, but at this point, before its function became clear, it was an unintentional art piece. A pretty quiet canvas. Potential incarnate. And this; the unintentional web patterns.

The final under-rated moment of the web experience I'd like us to appreciate today is the directory index. Something Zeldman recently found an embarrassment, but something I am always delighted to come upon. It gives us a back door into a website, the path less trodden, and it truly gives us more than any array of hyperlinks, an opportunity to create our own experience. Forgotten images. Draft designs. Incomplete

Tuesday, October 29, 2002: The Diggers

“Oooh ooh ooh,” I say excitedly, “I just found a good new spore that will soon bloom into some sort of thought or action”:

The Diggers

| [\[permanent link\]](#)

Tuesday, October 29, 2002: Chemical playfare

Today is incredibly retentive and repetitive work, running through dozens of flash animations aliasing the text and changing every *double n* to *m* dash. But this is fascinating. In a time of Primo's mystery gas and Saddam's evil agents, it is interesting to see the U.S.'s own history with chemical weapons, in this case hallucinogenic ones.

During the early 1960s Edgewood Arsenal, headquarters of the US Army Chemical Corps, received an average of four hundred chemical 'rejects' every month from the major American pharmaceutical firms. Rejects were drugs found to be commercially useless because of their undesirable side effects. Of course, undesirable side effects were precisely what the army was looking for.

Because the effects of LSD were temporary (in contrast to the fatal nerve agents), Gottlieb saw important strategic advantages for its use in covert operations.

During the Cold War top-level military brass waxed enthusiastic over the prospect of a new kind of chemical weapon that would revolutionize combat. They imagined aircraft swooping over enemy territory releasing clouds of 'madness gas' that would disorient people and dissolve their will to resist.

Experimentation ensued, some more targetted than others:

In one experiment a hallucinogen was administered along with a local anesthetic and the subject was told to describe his visual experiences as surgeons removed chunks of his cerebral cortex.

This taken in small doses between

```
repeat with i = 1 to infinity {
click - use Device fonts - click - option shift dash - click ;
i++;
}
```

| [\[permanent link\]](#)

Tuesday, October 29, 2002: The clothesline and the fishingline: when trends become tools

Shared confines

THE PAGE has become a unit of ill repute in the web world, with its connotations of bound (and binding) old media. And while our current webpage is a flexible unit, it shares much with its print media counterpart.

Call it a *light-space*, complicate its borders with adornment, but the fact remains that we still view our work through a rectangular eye piece. And one that has surprisingly similar dimensions to its A4 cousin. If anything, I have found the need to tether my work to these borders *more* than with print media, where I could be assured of consistent gutters and margins.

An artfully floating layout on 800x600 becomes forlornly disjointed on 1024x768. But tether that bit of layout to the borders of the browser with a fishing line (vertical) or clothesline (horizontal) and the layout still clings regardless of size.

The convention of the navigation bar, though often clunky and overbearing, was probably the first clothesline, and had the benefit of welding function to tis form. Volumeone was the first I noticed using the clothesline in its more artful incarnation, as an axis. Whether it hung with japense toys or motorcycle helmets, his layouts tended to follow that same axis, cementing them to the browser borders regardless of size.

The *colorbars* stretch-striations/ single-pixel repat is another popular manifestation of this technique, though it too has fallen into disrepute as an overused kneejerk style.

Breaking free?

Flashers have often tried another approach, attempting to free themselves from the tyranny of the borwser border with their pop-up chromeless windows, with bizarre results in most browsers and sacrificng much functionality in all. And even with all this buggy code and lost ability to bookmark, we've still got that rectangle. And anyone who thinks we'll soon lose it should look at the shape of books and cinema screens after centuries and decades (respectively) of development.

Just as paintings have frames, so we have the browser, and just as we can hang whatever clothes we like between 2 buildings on a clothesline, so can this technique be versatile and 'physically' necessary.

Obviously the clothesline is nothing revolutionary, nor is it a panacea. But I believe that as our approach to these media develops, some of our stylistic trends will turn out to be useful conventions, and I'd say the clothesline/ fishingline is one of them. | [\[permanent link\]](#)

haXored. ha HA ha.

Or not. People need to relax. It not liek this is real life or anything. Right? | [[permanent link](#)]

Monday, October 28, 2002: in boxes.

There are so many cliches I think it must be fiction. And then there are the touching moments that utterly convince me that it is fiction. And then I remember that little children can get really upset when a shoelace breaks, and I remember that priorities change, and I realise that this diary is probably real, and that this is the most unselfconscious personal thing I've seen on the net.

I hope he gets the girl. | [[permanent link](#)]

Monday, October 28, 2002: Redundant Technology Initiative

Access Space uses zero cost computers reclaimed from the trash, and Linux, the revolutionary free operating system. | [[permanent link](#)]

Monday, October 28, 2002: Photocopy Art

This description of emo cover art intrigued me:

Artwork, too, tends toward abstract black-and-white photographs of rusted/broken things (especially machinery), drawings of flowers, and pictures of old men, little boys, and little girls.

And while I could not find any Emo cover art online, I did find two interesting exhibits of photocopier art. One

of them even has the best navigation method ever invented: [an indexable directory](#). | [\[permanent link\]](#)

Monday, October 28, 2002: Commercials everywhere

I am a great fan of Amazon's Listmania, as it utilizes the social/soapbox aspects of the web in an efficient and practical fashion. But their recent [So you'd like to ...](#) ploy, which turns amateur articles into advertisements, leaves my belly a bit sour. The article mentioned, for instance, is a misspelt litanny about consumers gullibility and lack of curiosity in eating up what the labels decide is good music (read: boy bands), which is then followed by a list of **Products mentioned include:**.

A bit blunt, eh? | [\[permanent link\]](#)

Monday, October 28, 2002: An email about Jesus and Neen and Art with Miltos Manetas

The context for this can be found in [some of last week's posts](#):

Ah Jesus. Such good fodder.
I think the "art" of it is the fact that it is so popular.
Vapor-marketing strikes me as one of the most exciting new media today.
Your uHaul thing, gunsforkids, voteauction, the yesmen, etc.
If some kid had done it for a Flash 101 course, it wouldn't make it to his or her portfolio.

But done by Manetas it is art.

Which perhaps throws a kink in the old Fluxist "it's art if I say it's art" thing, becoming instead "it's art if it was done by an artist."

But enough semantic bollocks:
deciding whether or not something is art
is for talentless critics to do.
And religious rightwingers.

Which brings us back to Jesus.

o

Friday, October 25, 2002: The magic of google happens when you change its context

Now, I make certain assumption of the people who peruse this site. One is that when I show you something that you like, you will have the cleverness to chop back at the url untill you get to the root to determine who did it. Which is why I did not bother linking directly to the root of Iterature, where you would also have found this cute little idea. | [\[permanent link\]](#)

Friday, October 25, 2002: Gogol: good semantic karma

I think some words are just blessed with positive randomness [GOGOLBORDELLO IS AN AWARD WINNING UKRAINIAN PUNK CABARET](#) | [\[permanent link\]](#)

Friday, October 25, 2002: The most expensive word is "free"!

Fantastic! What an obvious and ingenious idea. To battle the creeping lucre, the insidious net-o-yen with nonsense verse. [Iterature's Adwords Poetry](#) consists of purchasing keywords from Google and putting in Ads that consist of nonsense poetry.

This was, of course, brought to a halt. A non-commercial use of something clearly designed for commerce must be dangerous, eh? But there were some lesson's learned from this exercise. Namely, the value of words:

The word "sex" is worth \$3,837, the word "art" \$410, "net art" is only \$0.05 (prices on the 11 of April 2002). And the most expensive word is "free"!

Anal costs must more than capitalism. Dreams much more than suicide. Perhaps the proper response to this sort of economic censure is to live a day according to these guidelines. And the perpetrators get extra points for not mentioning Guy Debord nor the word *recontextualise* in their breakdown of the affair, though they seem frightened by the eventualities of their censure.

Right now, we may not realize the importance of this fact because the web is not such a big part of our existence. But imagine the day when a search engine will rule the whole textual content of the web, in which the memory of mankind will be stored. Think of the power in their hands.

Which is why we all obey rule number one, never click anything that is an ad, even if you want what is behind it. Think of it as a necessary bit of civil disobedience, though all you disobey is some marketer's pre-conception of what you want. But I must give them kudos for *The memory of mankind*. Nice! I think I'll use it in [theysaysmall](#).

This is not their only Google hijinx: also check out [Gogol Chat](#), which combines a chatbot with google searches on terms you 'discuss' plus some live shenanigans and, of course, a bit of randomness.

I lose points for using the words *shenanigans* and *hijinx*. But I gain points for my own google madness: [LA L! NKiS!](#) and [an idea for a live search-engine jam session \(PDF\)](#). | [\[permanent link\]](#)

Thursday, October 24, 2002: Rural Sri Lankan Internet

More on bringing the Internet to Rural Communities in the Developing World, [Kothmale Community Radio/Internet Project: Expanding the Knowledge Base](#) | [\[permanent link\]](#)

Thursday, October 24, 2002: Flexible rights system

Hey lookie here: they've written a flexible copyright system into the IDML schema itself:

0 = May be used freely but source must be credited 1 = May not be used in for-profit systems 2 = May only be used by authorized users 3 = May not be released

| [\[permanent link\]](#)

Thursday, October 24, 2002: XML for do-gooders

Something else of interest from Bellanet: the International Development Markup Language Initiative, or IDML, *A multi-agency effort to create an XML-based standard for the markup and exchange of international development information.* | [\[permanent link\]](#)

Thursday, October 24, 2002: [mailto:www4mail@access.bellanet.org?body=GET http://www.google.com/search?q=KEYWORD&num=100](mailto:www4mail@access.bellanet.org?body=GET+http://www.google.com/search?q=KEYWORD&num=100)

Back to technology that is useful for developing countries, here is the most practical tool I've yet seen: Bellanet's Web-to-Email: How to use email to surf the Web. Running your site through this could be a good test of the impact of standards on accesibility. | [\[permanent link\]](#)

Thursday, October 24, 2002: Image, Language, and Belief in Synthesis

And on the complete flip-side from the Development clique trying to see how the Net can benefit people practically, we have someone from the academic clique exploring how it changes us conceptually. That technology affects how we see ourselves is a common contention, but Legrady examines it in a much more experiential light than most.

Toward noon he lay down for a nap ... On awakening, he thought that he saw an extraordinary mobile creature next to his face, an insect or mollusc which stirred in the shadow of his head. An almost terrifying power of life dwelt within that fragile thing. In less than an instant, and even before his vision could be formulated in thought, Zeno realized that what he was seeing was only his own eye reflected and enlarged by the glass, behind which the grass and sand formed a backing like that of a mirror.

The sixteenth-century alchemist Zeno, catching himself in the act of seeing, was shocked by the unusual sight of his own eye mirrored by a technology

I really like his margin-notes. It seems his view of the *page* hasn't been changed much by technology. But then, as he points out, often these virtual views we create through technology end up simply mimicking the views we are used to, creating *an environment that is totally fictional, defined mathematically, and based on laws of physics*. I guess the point is not that the views we aim to create with technology are so different from our usual views, but that through recreating these views with technology we first become aware that they are merely perspectives, and can be seen with an entirely different focus.

Like the frightening magnified eyeball of Zeno. | [[permanent link](#)]

Thursday, October 24, 2002: The changing role of computing and it its any good

I found an interesting and succinct table in Telecentres in Rural Asia: Towards a Success Model, a paper given at the conference in Nepal I spoke of yesterday. The basic contention of the paper is that in most rural areas of developing countries, personal computers will never be common. So, they reccomend installing community based *telecentres* to give access in these remote areas.

And while setting up an Internet Kiosk in the bush of Africa sounds like a wonderful bit of fun, we are still stuck with the question of whether or not it really does any good.

I guess if I became incredibly wealthy I'd go back to Benin and start installing iron-clad net-kiosks in random villages. Just big always-connected weatherproof machines next to little dirt paths. I assume most people would end up using it for hotmail, and it would probably cause some sort of infighting. People speak of the Digital Divide and how bringing the Net to *these people* would change their lives. From my experience, their lives wouldn't necessarily benefit from that sort of change. I just like the Internet I think it would be nice if others got to use it too, and I think its perfect adoption would be casually. A farmer checking email on the way home from the field.

As far as installing them in hospitals for doctors use, I've seen too many coolers donated to preserve vaccinations that were filled with beer (for sale) to think that it would really end up helping the doctors.

According to the paper:

An initial survey indicated that the community placed most importance on information relating to agricultural, medical and religious practices. Information technology, job opportunities, government policies and family matters rated slightly less important. Current patterns of information actually received were dominated by religious information, with agricultural and family matters ranking next. Most information that is sent outside of the community concerned families, with religious information ranking closely behind. Relatives were the major source of information. In this respect, face-to-face contacts outweigh all others as channels of incoming information, with the radio, church congregation and community meetings ranking about equally next. (Harris et. al, 2001)

In the end, people talk to people: social usage outweighs 'practical'. Which is proper. It means that internet can be brought in without destroying the way of life.

Regardless, I like this table, and am particularly intrigued that it puts Social Science as the most relevant field. While that struck me as a bit *academic* a decision at first, it jives with what we've just discussed:

Table 4. Information Systems as an Evolving Discipline

Dominant Technology	Information Systems Locus	Work Group Focus	Dominant Referent Discipline	Scope
1960-70 MAINFRAME COMPUTERS	Electronic Data Processing	Clerical staff	Computer Science	THE ORGANISATION
1970-80 MINI COMPUTERS	Management Information Systems	Managers	Management	
1980-90 PERSONAL COMPUTERS	End-User Computing	Knowledge workers	Organisational Behaviour	
1990-2000 NETWORKS	Strategic Information Systems	Shareholders	Economics Marketing	
2000- THE INTERNET	Community Informatics	Citizens	Social Science	SOCIETY

And in the end, if *good* just means enhancing the social net a bit, then I guess the Net does do good.

Wednesday, October 23, 2002: We Are A Camera

We are a camera shows the importance of framing. After being wowed by the simple ingenuity of bringing people's experiences together by having them all upload photos of their lives wherever they are each day into a publicly accessible gallery,

(breathe)

I realised that it is just a bloody public gallery. Nevertheless, I am still in love with it (and not with the dozens of others) because of how they framed the idea. So then marketing isn't *necessarily* evil, just most of its perpetrators are.

The light and uneven design helps as well. | [\[permanent link\]](#)

Wednesday, October 23, 2002: African Ascii

While I was looking for some Internet in Africa, I came upon this **Traditional African Ascii Pattern:**

Wednesday, October 23, 2002: An open directory of chunky little badly-drawn pixel people

If you've been here for very long, you should know that I love sifting through other people's directories. And you should also know that I love ugly-amateur web. Well, here we have [an open directory of chunky little badly-drawn pixel people](#). Adorable! | [\[permanent link\]](#)

Wednesday, October 23, 2002: Can the Net help, really?

When I got back from the [Peace Corps in Benin, West Africa](#), I saw two options in front of me:

1. [Work with farmers in Vietnam](#)
2. Stay in New York and do something with my graphics side.

I chose the latter, and though I love the Internet, I'd like to use it to help people in some 'Developing' tropical paradise after all (which, purportedly, [I am](#)). But nagging questions about the actual usefulness of this high-tech tangle to — well, to farmers in Cambodia, for instance — never fail to rear their good-pointed heads.

Fortunately, the [International Conference on Information Technology, Communications & Development](#) is asking just those sorts of questions:

- What is the context between ICT and development?
- Is the www so powerful in development as many people think it is?
- Can ICT really a make difference in the poorest parts of the world?

True, they are talking more *infrastructure* than *presentation vs. structure*, so the front-end stuff I do is really rather besides the point. And the question this conference raises to me is, *Are people who's life work is ICT for Development really gonna say it is worthless?* Though to be fair, working in development, nmore than anything else, made me feel that most development is *at best* worthless. Low impact stuff like Peace Corps, of course, being excepted.

Perhaps [last year's papers](#) can help us answer that question. | [\[permanent link\]](#)

Monday, October 21, 2002: Paul Geller, or, An Intellectual Petri Dish in its Formative Stages

Without reading the article, I have decided that Hiroshige vs. Van Gogh : Resolving the Dilemma of Copyright Scope in Remediating Infringement begs the question *is a bad copy infringement?*

I have decided this because a quick scan determines that he uses the boring example of Jeff Koons in his argument, which I am sick of. I have realised that

instinct :knee-jerk reaction :: scientific analysis: academic bollocks

and so in order to find any material truth in this world we need to approach questions with the combination of common-sense (i.e.: Would I sleep with it?) and logic that I've seen best put to use by The Society of Amateur Scientists.

When perception and marketing have more power than any ethereal sense of truth, our world is what we believe it is. At least, that's all it has to be for the narrow slices of world we ever have a chance to dissect. And most of us prefer it that way.

Like when one mishears the lyrics to a song, and, upon further analysis discovers the real words, one is rather disappointed as one's own lyrics were indeed better. As such, the copyright dilemma is a moot point, because the civil disobedience of MP3 and biking along canals in London is so widespread and decentralized that, really, the big boys can only ever go after the big boys.

The point is, I am more intrigued by the philosophical question *is a bad copy an infringement* than by whatever intelligent points the article raises without being cut-off by my lack of attention. Besides, I can always come back later and nibble a few more morsels.

Tangents in conversation or line of thought are like hyperlinks: when we relinquish our old-media urge to absorb media linearly, we are free to create our own associations. For instace, this entire post has served to

justify my point that I picked out an interesting point from an article without ever reading the article, yet my post has not even examined that point I (so prematurely) decided was interesting.

There have been a lot of *points* and a lot of *decisions* in this post, yet no points nor decisions were made. As we are a tool-seeking people, we as creators go through the world looking for fodder, so I am actually doing you a service by giving you such ample humus¹ without denying you the EUREKA! for yourself.

¹When i say humus I mean the black organic nutrient NOT the middle-eastern food-stuff. | [\[permanent link\]](#)

Monday, October 21, 2002: NEEN AND TELIC

NEEN AND TELIC is psuedo-illuminating psychostroking by defining new words:

Telic is magic through technology. Telic is our relationship with the tools which help us to design the World and to see things in a perspective.

Telic is Giacometti , Neen is Fontana. Nature is Telic and miracles are Neen. Miracles which have a purpose , become Telic, stupid miracles instead, like the one where Jesus walks on the water, stay Neen for centuries. But again, if Jesus would come back today and he will start walking on the water, that would be Telic.

And while we scramble for words to aptly describe these screen-based media: ~~multimedia new-media interactive~~, *telic* does seem a more apt approach. it sounds like an adjective rather than a Proper Noun. Of course, if we were to follow Mark Tranmer's approach, who simply calls what he makes *sounds*, instead of pre-judging it with the label *music*, I guess we'd just call it screen-based media. | [\[permanent link\]](#)

Monday, October 21, 2002: Confusing on purpose

It was a busy weekend at theysaysmall:

1. The section formerly known as Abril 2002 has been clarified
2. An early communication from the *say* ether was discovered in HeartHart, which seems to be an attempt at assigning body parts their proper function while exhibiting the tug between the real and virtual (how very topical)
3. Also coming to terms with the non-physical identities of physical entities, *say* looks at the site itself and asks this...you(?)
4. And their attempt at art has been re-narrated to be more in character
5. Finally. Robert s. Small is still working on his description of plumbing the ether, and a more experiential navigation system.

| [\[permanent link\]](#)

Monday, October 21, 2002: More people who believe that red pixels are real

Curt Cloninger's recent post at the altsense library brings to mind these words of Sherry Turkle's:

Once a computer has saved your life, once you have fallen in love with a computer, once you have a relationship with it, do you care about the 'really, really'? Not really.

This quote is well-followed by my confused discussion of semiurgy and the fact that RED PIXELS ARE REAL!

N'est ce pas? | [\[permanent link\]](#)

Monday, October 21, 2002: XHTML part II

The brief but turned-on FCD blog: Web Development points us, among other things to 'this practical (meaning that I could understand it) explanation of the recently released XHTML 2.0 working draft.'

In a nutshell:

- `
` : `<line> </line>` (*finally*)
- href will be able to go in any element: i.e.: `<li href="">`, `<p href="">`, etc.
- XML Events could give us quite specific access to the DOM at many levels without buggy javascript. (of course, let us not forget that the DOM itself is a perfect panacea that hasn't quite settled from the clouds)
- In a move I don't yet understand, global hierarchical headings (`<h1>`, `<h2>`, etc.) to be replaced by nested ones:

```
<section>
  <h></h>
  <section>
    <h></h>
  <section>
</section>
```

As I said, I don't yet *get* this one.

| [\[permanent link\]](#)

Monday, October 21, 2002: More unfinished thoughts from the weekend

I feel much farther from the truth here in Fiji than I did when i lived in Africa. And by the truth I just mean the realization that we are separate from the world, that all the rules and identities we create are just ideas we have created; that they're not really necessary.

In Benin I used to picture myself as a sticker and society as a window, and that I could peel myself up from the window so that I still stuck to it but that most of me was raised off of the surface. i used to picture that in my mind, and then i would act without social fear.

It was very liberating.

Now I think about how freeing it would be to forget who I am, how much there is in the world if I just wandered about it without this conviction of who i am am how I act and where it is safe for me to go. And then I realise that I really don't need to forget who i am to do these things; I am completely free right now.

But in actuality I put myself through a cordoned rut. I don't take any interest in the local culture like I did in Africa, so I find I explore less. All I am interested in is climbing pretty mountains and swimming in the ocean and lying on sunny beaches. i just want to eat lots of fresh seafood and drink enough beer to make my head light without making me feel heavy or get fat.

Many philosophers speak of selfless work as a path to spirituality. They don't mean do-gooder work, just work that doesn't have one's own interests at heart. The entire culture of the career flies in the face of this. I can honestly say that i don't do my current job for money, as I took an 80% pay-cut to work here. I do it for myself because it is work that I truly enjoy, and it is in a setting where I can learn and research in a self-directed way.

Western spirituality seems to say that self-ful work is best. Work done for enjoyment, for the moment -- self-actualizing work. This as opposed to work done for others -- to impress or indebt.

My personal work on the web is a strange mix. I do it because I enjoy it (to an unhealthy degree, as 6 days a week in front of a computer will contest), but I put it on the web for others. I want others to enjoy it, understand it, link to it. I know it is easy to acheive "fame" of a sort by skillfully parroting whatever the recent style is, and I believe the only way I won't do exactly that is by avoiding the popular design portals.

When I find myself buying dark wide jeans and tight t-shirts that I found ridiculous a year ago, I know that -- although I do not own a TV and listen only to noncommercial radio -- I know that marketing works in its insidious way. The same way with style trends, "Looking is Stealing" and I am frequently surprised to find aspects I once hated appear in my work.

I no longer believe I am all that talented. I know I have great ideas, and I know that I cannot often express them well, and rarely (if ever) have the skill to present them as envisioned. And I know that my desire to present them for others takes too much of the role, and can be a draining debilitating vice.

Avoiding something just because it has been done is as bad as imitating it. Especially in a field in which precedence (or standards) are so important to peoples comprehension. Like self-editing once we start to internalize and presuppose the Art Director's approach. Who exactly are we talking to when we blog? If I make my stuff for others, who am I making it for?

If I don't know even that, perhaps I should not worry about the rules by which I assume they are judging.
| [\[permanent link\]](#)

Monday, October 21, 2002: frantic

It happens and I can,t stop it. It just comes at me. I get frantic, my heart actually tightens. I can feel the blood and it is bubbling in me. I get reckless, I just keep going. Mergeing layers, I flatten the documents, and in two minutes it looks nothing like I started with.

What is it? A blob? Lungs, a burnt heart fragment? It was a preacher a minute ago.

Okay two.

.
.

.
.
. And then I get worried. Will I find this stuff again? I,m suddenly organziing, stroing. Trying 5 different categorization methods none of which i trust.

. But I know

later. the peace. The quiet bliss of sifting through every file on my hardrive and iterating again. And always wondering if I will do anything *more* with it.

I love this stuff and I apologize it is not webactivismn. But do you know what i,m talking about?.

Do
you
look
at sites
and feel it in your chest?
physically?

Like a dark breeze. | [\[permanent link\]](#)

Wednesday, October 30, 2002: Interesting physics speak, with .mov!

Tuesday, October 15, 2002: Using text in a new-media way

I don't know what the **Evolution of the tinkerbell chaotic attractor** or the **Rotating Lorenz Attractor** are, but

Whether they're fun or consider what you do *art*, this strikes me as useful to inform your work, whatever it is: [\[permanent link\]](#)

5. Infuse work with meaning; don't rely on artistic statement or title to bridge gaps in incomplete work

Frankly, of all the new-fangled tools and media that make up *Interactive Media* (or whatever it is called on the streets of London these days), **text** has the most direct brute force for communicating meaning. At the same time, it feels so *old-media*. When I find I have created a piece that is ~~more flash than text~~ the flash is the work and the text is the description. But text is a powerful tool, so I really should find a method that makes it a *part* of the work rather than a bridge *to* the work. Perhaps integrating the text ~~to make it look like a part of the work~~ *to make it look like a part of the work* is a method for making text a more fluid part of *Interactive Media*. ~~And this for that the flash has nothing better to do with it, they can contact me.~~ *And this for that the flash has nothing better to do with it, they can contact me.*

So partners, that's our nuggest to chew on now: what are some methods we have used or seen that use text in a fashion appropriate explicitly to new media? And are there any ways to integrate text in a fashion *unique* to new media?

Elegant hack has clearly wrestled with their blog's identity as well, and have set my heart a tad more at ease with their wordy tagline: *Information architecture, usability and interaction design issues, plus every*

single damn thing on the web that catches my, plus a few more oddities.....

Talk here. | [\[permanent link\]](#)

Of course, they don't have nearly as presumptuos a web-address as I. | [\[permanent link\]](#)

Monday, October 14, 2002: TheySaySmall

Wednesday, October 30, 2002: Digger Papers: Trip Without A Ticket

Some recent developments at [theysaysmall.com](#):

Word of the day: somnambulist. As in

1. The SAY ether has produced a sequel to The Lights Going Out entitled A Mission To Save Time As We Know It And Have Sex. Maddeningly sterile jobs for strait-jackets, love scrubbed into an insipid "functional personal relationship" and Art as a fantasy pacifier. But there is a real danger in suddenly waking a
2. Robert a. Small, Assistant Professor Geometrist, Rotherhithe University, has written two pieces analysing images extracted from the Somnambulist's patient an historic exercise in futility, and HouseScape: a comparative critique of identity and space.
3. See also sleepwalking explained in magenta links arisen from the SAY current

All packaged in a brightly colored, overlapping menu that is nearly impossible to read. (I like it best abstractly after most of the links have become a:visited). Word is a description of what it feels like to plumb the ether is coming up next from Robert a. Small, as well as an alternate navigation method. | [\[permanent link\]](#)

Wednesday, October 30, 2002: Improving transient erros 

1. mean 403 : nice 403
2. cold redundant 404: coy 404

Wednesday, October 09, 2002: A burdgeoning virtual library in the Pacific

[\[permanent link\]](#)

This looks promising: with some funding from AUSAid, the University of the South Pacific has begun digitalising its library. The collection so far encompasses some Public Domain classics, a little writing on the South Pacific, and a few historical photos.

But it is a great start, and the way paper and photos rot around here, added to the fact that 50% of the students at the University of the South Pacific study from computer terminals at remote islands, rarely setting foot on the actual campus, this could become something really useful. | [\[permanent link\]](#)

Wednesday, October 30, 2002: Waxing poetic on unappreciated parts of the web experience

I'd like to take a moment, or rather, I'd like you to take a moment to reflect on the gentler, transitory moments of the web. I remember reading somewhere someone talking about the only *real* moments of our lives being those fleeting segments when we catch ourselves off-guard, suddenly realizing we are in between activities.

Tuesday, October 08, 2002: Metrophage

The limbo, in between. Like working late, walking to the car, stopping as you put the key in the door and smell the rain on the pavement. And just realizing, for a moment, that you are there. That was the example the author gave.

Rick says read this book for a good dose of technodreamy-nostalgia. I, for one, will do so.

Only 2 days left till I am back from holiday and without an excuse for these short and shallow posts. | [\[permanent link\]](#)

The same can be said of a 404 error. Amidst the hustle and bustle, the impatient waiting for a page to load, the search and click, we are occasionally graced with a rest period. A grace note. A limbo. A space between the actual content of the web. It forces us, like those occasional off-guard moments in life, to stop and remember that we are here. And it is just as valid a part of the experience as the actual destinations, as the activities themselves.

So let us take a moment of silence for the gentle breeze of a 404.

And while we are gaping happily at the transitory moments of our general web experience, think to the experience of a web page loading, the pieces slowly coming together, nestling into place, until we are presented with the final mise-en-scene. This can be thought of as part of the journey, too. And sometimes, those mid-moments are more desirable than the final product.

Take [this](#) for example. A white palette with an ambiguous thread of gentle green script. Once the page was fully built it felt like many others, but at this point, before its function became clear, it was an unintentional art piece. A pretty quiet canvas. Potential incarnate. And [this](#); the unintentional patterns.

The final under-rated moment of the web experience I'd like us to appreciate today is the directory index. Something [Zeldman recently found an embarrassment](#), but something I [always delighted to come upon](#). It gives us a back door into a website, the path less trodden, and it truly gives us, more than any array of hyperlinks, an opportunity to create our own experience. Forgotten images. Draft designs. Incomplete experiments. The directory index is the web in its raw state, before it has put on its makeup and decided how it is going to act. It is a woman in the morning.

Take a moment now to appreciate these wabi-sabi moments of web-life.

- .
- .
- .

Okay, back to the bustle. | [\[permanent link\]](#)

Tuesday, October 29, 2002: The Diggers

“Oooh ooh ooh,” I say excitedly, “I just found a good new spore that will soon bloom into some sort of thought or action”:

The Diggers

| [\[permanent link\]](#)

Tuesday, October 29, 2002: Chemical playfare

Today is incredibly retentive and repetitive work, running through dozens of flash animations aliasing the text and changing every *double n* to *m* dash. But [this](#) is fascinating. In a time of [Pain's](#) mystery gas and Saddam's evil agents, it is interesting to see the U.S.'s own history with chemical weapons, in this case hallucinogenic ones.

During the early 1960s Edgewood Arsenal, headquarters of the US Army Chemical Corps, received an average of four hundred chemical 'rejects' every month from the major American

pharmaceutical firms. Rejects were drugs found to be commercially useless because of their undesirable side effects. Of course, undesirable side effects were precisely what the army was looking for.

Because the effects of LSD were temporary (in contrast to the fatal nerve agents), Gottlieb saw important strategic advantages for its use in covert operations.

During the Cold War top-level military brass waxed enthusiastic over the prospect of a new kind of chemical weapon that would revolutionize combat. They imagined aircraft swooping over enemy territory releasing clouds of 'madness gas' that would disorient people and dissolve their will to resist.

Experimentation ensued, some more targetted than others:

In one experiment a hallucinogen was administered along with a local anesthetic and the subject was told to describe his visual experiences as surgeons removed chunks of his cerebral cortex.

This taken in small doses between

Tuesday, October 29, 2002: The clothesline and the fishingline: when trends become tools

Shared confines

THE PAGE has become a unit of ill repute in the web world, with its connotations of bound (and binding) old media. And while our current webpage is a flexible unit, it shares much with its print media counterpart.

Call it a *light-space*, complicate its borders with adornment, but the fact remains that we still view our work through a rectangular eye piece. And one that has surprisingly similar dimensions to its A4 cousin. If anything, I have found the need to tether my work to these borders *more* than with print media, where I could be assured of consistent gutters and margins.

An artfully floating layout on 800x600 becomes forlornly disjointed on 1024. But tether that bit of layout to the borders of the browser with a fishing line (vertical) or clothesline (horizontal) and the layout still clings regardless of size.

The convention of the navigation bar, though often clunky and overbearing, was probably the first clothesline, and had the benefit of welding function to tis form. Volumeone was the first I noticed using the clothesline in its more artful incarnation, as an axis. Whether it hung with japense toys or motorcycle helmets, his layouts tended to follow that same axis, cementing them to the browser borders regardless of size.

The *colorbars* stretch-striations/ single-pixel repat is another popular manifestation of this technique, though it too has fallen into disrepute as an overused kneejerk style.

Breaking free?

BY THE WAY,
MY SISTER
IS DEAD

Flashers have often tried another approach, attempting to free themselves from the tyranny of the browser border with their pop-up chromeless windows, with bizarre results in most browsers and sacrificng much functionality in all. And even with all this buggy code and lost ability to bookmark, we've still got that rectangle. And anyone who thinks we'll soon lose it should look at the shape of books and cinema screens after centuries and decades (respectively) of development.

Just as paintings have frames, so we have the browser, and just as we can hang whatever clothes we like between 2 buildings on a clothesline, so can this technique be versatile and 'physically' necessary.

Obviously the clothesline is nothing revolutionary, nor is it a panacea. But I believe that as our approach to these media develops, some of our stylistic trends will turn out to be useful conventions, and I'd say the clothesline/ fishingline is one of them. | [\[permanent link\]](#)

Monday, October 28, 2002: Photocopy Art

This description of emo cover art intrigued me:

Artwork, too, tends toward abstract black-and-white photographs of rusted/broken things (especially machinery), drawings of flowers, and pictures of old men, little boys, and little girls.

And while I could not find any Emo cover art online, I did find two interesting exhibits of photocopier art. One of them even has the best navigation method ever invented: an indexable directory. | [\[permanent link\]](#)

Monday, October 28, 2002: Commercials everywhere

I am a great fan of Amazon's Listmania, as it utilizes the social/soapbox aspects of the web in an efficient and practical fashion. But their recent So you'd like to ... ploy, which turns amateur articles into advertisements, leaves my belly a bit sour. The article mentioned, for instance, is a misspelt litany about consumers gullibility and lack of curiosity in eating up what the labels decide is good music (read: boy bands), which is then followed by a list of **Products mentioned include:**.

A bit blunt, eh? | [\[permanent link\]](#)

Monday, October 28, 2002: An email about Jesus and Neen and Art with Miltos Manetas

The context for this can be found in some of last week's posts:

Ah Jesus. Such good fodder.
I think the "art" of it is the fact that it is so popular.
Vapor-marketing strikes me as one of the most exciting new media today.
Your uHaul thing, gunsforkids, **voteauction**, the yesmen, etc.
If some kid had done it for a Flash 101 course, it wouldn't make it to his or her portfolio.

But done by Manetas it is art.

Which perhaps throws a kink in the old Fluxist "it's art if I say it's art" thing, becoming instead "it's art if it was done by an artist."

But enough semantic bollocks:
deciding whether or not something is art
is for talentless critics to do.
And religious rightwingers.

Which brings us back to Jesus.

Friday, October 25, 2002: The magic of google happens when you change its context

Now, I make certain assumption of the people who peruse this site. One is that when I show you something that you like, you will have the cleverness to chop back at the url untill you get to the root to determine who did it. Which is why I did not bother linking directly to the root of Iterature, where you would also have found this cute little idea. | [\[permanent link\]](#)

Friday, October 25, 2002: Gogol: good semantic karma

I think some words are just blessed with positive randomness GOGOLBORDELLO IS AN AWARD WINNING UKRAINIAN PUNK CABARET | [\[permanent link\]](#)

Friday, October 25, 2002: The most expensive word is "free"!

Fantastic! What an obvious and ingenious idea. To battle the creeping lucre, the insidious net-o-yen with nonsense verse. Iterature's Adwords Poetry consists of purchasing keywords from Google and putting in Ads that consist of nonsense poetry.

This was, of course, brought to a halt. A non-commercial use of something clearly designed for commerce must be dangerous, eh? But there were some lesson's learned from this exercise. Namely, the value of words:

The word "sex" is worth \$3,837, the word "art" \$410, "net art" is only \$0.05 (prices on the 11 of April 2002). And the most expensive word is "free"!

Anal costs must more than capitalism. Dreams much more than suicide. Perhaps the proper response to this sort of economic censure is to live a day according to these guidelines. And the perpetrators get extra points for not mentioning Guy Debord nor the word *recontextualise* in their breakdown of the affair, though they seem frightened by the eventualities of their censure.

Right now, we may not realize the importance of this fact because the web is not such a big part of our existence. But imagine the day when a search engine will rule the whole textual content of the web, in which the memory of mankind will be stored. Think of the power in their hands.

Which is why we all obey rule number one, never click anything that is an ad, even if you want what is behind it. Think of it as a necessary bit of civil disobedience, though all you disobey is some marketer's pre-conception of what you want. But I must give them kudos for *The memory of mankind*. Nice! I think I'll use it in [theysaysmall](#).

This is not their only Google hijinx: also check out [Gogol Chat](#), which combines a chatbot with google searches on terms you 'discuss' plus some live shenanigans and, of course, a bit of randomness.

I lose points for using the words *shenanigans* and *hijinx*. But I gain points for my own google madness: [LA L!](#)

Thursday, October 24, 2002: [mailto:www4mail@access.bellanet.org?body=GET http://www.google.com/search?q=KEYWORD&num=100](mailto:www4mail@access.bellanet.org?body=GET+http://www.google.com/search?q=KEYWORD&num=100)

Back to technology that is useful for developing countries, here is the most practical tool I've yet seen: [Bellanet's Web-to-Email: How to use email to surf the Web](#). Running your site through this could be a good test of the impact of standards on accesibility. | [\[permanent link\]](#)

Thursday, October 24, 2002: Image, Language, and Belief in Synthesis

And on the complete flip-side from the Development clique trying to see how the Net can benefit people practically, we have someone from the academic clique [exploring how it changes us conceptually](#). That technology affects how we see ourselves is a common contention, but Legrady examines it in a much more experiential light than most.

Toward noon he lay down for a nap ... On awakening, he thought that he saw an extraordinary mobile creature next to his face, an insect or mollusc which stirred in the shadow of his head. An almost terrifying power of life dwelt within that fragile thing. In less than an instant, and even before his vision could be formulated in thought, Zeno realized that what he was seeing was only his own eye reflected and enlarged by the glass, behind which the grass and sand formed a backing like that of a mirror.

The sixteenth-century alchemist Zeno, catching himself in the act of seeing, was shocked by the unusual sight of his own eye mirrored by a technology

I really like his margin-notes. It seems his view of the *page* hasn't been changed much by technology. But then, as he points out, often these virtual views we create through technology end up simply mimicking the views we are used to, creating *an environment that is totally fictional, defined mathematically, and based on laws of physics*. I guess the point is not that the views we aim to create with technology are so different from our usual views, but that through recreating these views with technology we first become aware that they are merely perspectives, and can be seen with an entirely different focus.

Like the frightening magnified eyeball of Zeno. | [\[permanent link\]](#)

Thursday, October 24, 2002: The changing role of computing and it its any good

I found an interesting and succinct table in [Telecentres in Rural Asia: Towards a Success Model](#), a paper given at the conference in Nepal I spoke of yesterday. The basic contention of the paper is that in most rural areas of developing countries, personal computers will never be common. So, they recommend installing community based *telecentres* to give access in these remote areas.

And while setting up an Internet Kiosk in the bush of Africa sounds like a wonderful bit of fun, we are still stuck with the question of whether or not it really does any good.

I guess if I became incredibly wealthy I'd go back to Benin and start installing iron-clad net-kiosks in random villages. Just big always-connected weatherproof machines next to little dirt paths. I assume most people would end up using it for hotmail, and it would probably cause some sort of infighting. People speak of the Digital Divide and how bringing the Net to *these people* would change their lives. From my experience, their lives wouldn't necessarily benefit from that sort of change. I just like the Internet I think it would be nice if others got to use it too, and I think its perfect adoption would be casually. A farmer checking email on the way home from the field.

As far as installing them in hospitals for doctors use, I've seen too many coolers donated to preserve vaccinations that were filled with beer (for sale) to think that it would really end up helping the doctors.

According to the paper:

An initial survey indicated that the community placed most importance on information relating to agricultural, medical and religious practices. Information technology, job opportunities, government policies and family matters rated slightly less important. Current patterns of information actually received were dominated by religious information, with agricultural and family matters ranking next. Most information that is sent outside of the community concerned families, with religious information ranking closely behind. Relatives were the major source of information. In this respect, face-to-face contacts outweigh all others as channels of incoming information, with the radio, church congregation and community meetings ranking about equally next. (Harris et. al, 2001)

In the end, people talk to people: social usage outweighs 'practical'. Which is proper. It means that internet can be brought in without destroying the way of life.

Regardless, I like this table, and am particularly intrigued that it puts Social Science as the most relevant field. While that struck me as a bit *academic* a decision at first, it jives with what we've just discussed:

Table 4. Information Systems as an Evolving Discipline

Dominant Technology	Information Systems Locus	Work Group Focus	Dominant Referent Discipline	Scope
1960-70 MAINFRAME COMPUTERS	Electronic Data Processing	Clerical staff	Computer Science	THE ORGANISATION
1970-80 MINI COMPUTERS	Management Information Systems	Managers	Management	
1980-90 PERSONAL COMPUTERS	End-User Computing	Knowledge workers	Organisational Behaviour	
1990-2000 NETWORKS	Strategic Information Systems	Shareholders	Economics Marketing	
2000- THE INTERNET	Community Informatics	Citizens	Social Science	SOCIETY

And in the end, if *good* just means enhancing the social net a bit, then I guess the Net does do good.

| [\[permanent link\]](#)

Wednesday, October 23, 2002: We Are A Camera

We are a camera shows the importance of framing. After being wowed by the simple ingenuity of bringing people's experiences together by having them all upload photos of their lives wherever they are each day into a publicly accesible gallery,

(breathe)

I realised that it is just a bloody public gallery. Nevertheless, I am still in love with it (and not with the dozens of others) because of how they framed the idea. So then marketing isn't *necessarily* evil, just most of its perpetrators are.

The light and uneven design helps as well. | [\[permanent link\]](#)

Wednesday, October 23, 2002: African Ascii

While I was looking for some Internet in Africa, I came upon this **Traditional African Ascii Pattern**:

| [\[permanent link\]](#)

Wednesday, October 23, 2002: An open directory of chunky little badly-drawn pixel people

If you've been here for very long, you should know that I love sifting through other people's directories. And you should also know that I love ugly-amateur web. Well, here we have an open directory of chunky little badly-drawn pixel people. Adorable! | [\[permanent link\]](#)

Wednesday, October 23, 2002: Can the Net help, really?

When I got back from the Peace Corps in Benin, West Africa, I saw two options in front of me:

1. Work with farmers in Vietnam
2. Stay in New York and do something with my graphics side.

I chose the latter, and though I love the Internet, I'd like to use it to help people in some 'Developing' tropical paradise after all (which, purportedly, I am). But nagging questions about the actual usefulness of this high-tech tangle to — well, to farmers in Cambodia, for instance — never fail to rear their good-pointed heads.

Fortunately, the International Conference on Information Technology, Communications & Development is asking just those sorts of questions:

- What is the context between ICT and development?
- Is the www so powerful in development as many people think it is?
- Can ICT really a make difference in the poorest parts of the world?

True, they are talking more *infrastructure* than *presentation vs. structure*, so the front-end stuff I do is really rather besides the point. And the question this conference raises to me is, *Are people who's life work is ICT for Development really gonna say it is worthless?* Though to be fair, working in development, nmore than anything else, made me feel that most development is *at best* worthless. Low impact stuff like Peace Corps, of course, being excepted.

Perhaps last year's papers can help us answer that question. | [\[permanent link\]](#)

Look, a Flash by Manetas that is not crap! | [permanent link]

Monday, October 21, 2002: Paul Geller, or, An Intellectual Petri Dish in its Formative Stages

Without reading the article, I have decided that Hiroshige vs. Van Gogh : Resolving the Dilemma of Copyright Scope in Remediating Infringement begs the question *is a bad copy infringement?*

I have decided this because a quick scan determines that he uses the boring example of Jeff Koons in his argument, which I am sick of. I have realised that

instinct :knee-jerk reaction :: scientific analysis: academic bollocks

and so in order to find any material truth in this world we need to approach questions with the combination of common-sense (i.e.: Would I sleep with it?) and logic that I've seen best put to use by The Society of Amateur Scientists.

When perception and marketing have more power than any ethereal sense of truth, our world is what we believe it is. At least, that's all it has to be for the narrow slices of world we ever have a chance to dissect. And most of us prefer it that way.

Like when one mishears the lyrics to a song, and, upon further analysis discovers the real words, one is rather

dissatisfied as one's own lyrics were indeed better. As such, the copyright dilemma is a moot point, because the civil disobedience of MP3 and biking along canals in London is so widespread and decentralized that, really, the big boys can only ever go after the big boys.

The point is, I am more intrigued by the philosophical question *is a bad copy an infringement* than by whatever intelligent points the article raises without being cut-off by my lack of attention. Besides, I can always come back later and nibble a few more morsels.

Tangents in conversation or line of thought are like hyperlinks: when we relinquish our old-media urge to absorb media linearly, we are free to create our own associations. For instance, this entire post has served to justify my point that I picked out an interesting point from an article without ever reading the article, yet my post has not even examined that point I (so prematurely) decided was interesting.

There have been a lot of *points* and a lot of *decisions* in this post, yet no points nor decisions were made. As we are a tool-seeking people, we as creators go through the world looking for fodder, so I am actually doing you a service by giving you such ample humus¹ without denying you the EUREKA! for yourself.

¹When I say humus I mean the black organic nutrient NOT the middle-eastern food-stuff. | [\[permanent link\]](#)

Monday, October 21, 2002: NEEN AND TELIC

NEEN AND TELIC is pseudo-illuminating psychostroking by defining new words:

Telic is magic through technology. Telic is our relationship with the tools which help us to design the World and to see things in a perspective.

Telic is Giacometti, Neen is Fontana. Nature is Telic and miracles are Neen. Miracles which have a purpose, become Telic, stupid miracles instead, like the one where Jesus walks on the water, stay Neen for centuries. But again, if Jesus would come back today and he will start walking on the water, that would be Telic.

And while we scramble for words to aptly describe these screen-based media: ~~multimedia new-media interactive~~, *telic* does seem a more apt approach. It sounds like an adjective rather than a Proper Noun. Of course, if we were to follow Mark Tranmer's approach, who simply calls what he makes *sounds*, instead of pre-judging it with the label *music*, I guess we'd just call it screen-based media. | [\[permanent link\]](#)

Monday, October 21, 2002: Confusing on purpose

It was a busy weekend at theysaysmall:

1. The section formerly known as Abril 2002 has been clarified
2. An early communication from the *say* ether was discovered in HeartHart, which seems to be an attempt at assigning body parts their proper function while exhibiting the tug between the real and virtual (how very topical)
3. Also coming to terms with the non-physical identities of physical entities, *say* looks at the site itself and asks this...you(?)

4. And their attempt at art has been re-narrated to be more in character
5. Finally. Robert s. Small is still working on his description of plumbing the ether, and a more experiential navigation system.

| [\[permanent link\]](#)

Monday, October 21, 2002: More people who believe that red pixels are real

Curt Cloninger's recent post at the altsense library brings to mind these words of Sherry Turkle's:

Once a computer has saved your life, once you have fallen in love with a computer, once you have a relationship with it, do you care about the 'really, really'? Not really.

This quote is well-followed by my confused discussion of semiurgy and the fact that RED PIXELS ARE REAL!

Monday, October 21, 2002: XHTML part II

The brief but turned-on FCD blog: Web Development points us, among other things to 'this practical (meaning that I could understand it) explanation of the recently released XHTML 2.0 working draft.'

In a nutshell:

- `
` : `<line> </line>` (*finally*)
- href will be able to go in any element: i.e.: `<li href="">`, `<p href="">`, etc.
- XML Events could give us quite specific access to the DOM at many levels without buggy javascript. (of course, let us not forget that the DOM itself is a perfect panacea that hasn't quite settled from the clouds)
- In a move I don't yet understand, global hierarchical headings (`<h1>`, `<h2>`, etc.) to be replaced by nested ones:

```
<section>
  <h></h>
  <section>
    <h></h>
  <section>
</section>
```

As I said, I don't yet *get*this one.

Monday, October 21, 2002: More unfinished thoughts from the weekend

I feel much farther from the truth here in Fiji than I did when i lived in Africa. And by the truth I just mean the realization that we are separate from the world, that all the rules and identities we create are just ideas we have created; that they're not really necessary.

In Benin I used to picture myself as a sticker and society as a window, and that I could peel myself up from the window so that I still stuck to it but that most of me was raised off of the surface. i used to picture that in my mind, and then i would act without social fear.

It was very liberating.

Now I think about how freeing it would be to forget who I am, how much there is in the world if I just wandered about it without this conviction of who i am am how I act and where it is safe for me to go. And then I realise that I really don't need to forget who i am to do these things; I am completely free right now.

But in actuality I put myself through a cordoned rut. I don't take any interest in the local culture like I did in Africa, so I find I explore less. All I am interested in is climbing pretty mountains and swimming in the ocean and lying on sunny beaches. i just want to eat lots of fresh seafood and drink enough beer to make my head light without making me feel heavy or get fat.

Many philosophers speak of selfless work as a path to spirituality. They don't mean do-gooder work, just work that doesn't have one's own interests at heart. The entire culture of the career flies in the face of this. I can honestly say that i don't do my current job for money, as I took an 80% pay-cut to work here. I do it for myself because it is work that I truly enjoy, and it is in a setting where I can learn and research in a self-directed way.

Western spirituality seems to say that self-ful work is best. Work done for enjoyment, for the moment -- self-actualizing work. This as opposed to work done for others -- to impress or indebt.

My personal work on the web is a strange mix. I do it because I enjoy it (to an unhealthy degree, as 6 days a week in front of a computer will contest), but I put it on the web for others. I want others to enjoy it, understand it, link to it. I know it is easy to acheive "fame" of a sort by skillfully parroting whatever the recent style is, and I believe the only way I won't do exactly that is by avoiding the popular design portals.

When I find myself buying dark wide jeans and tight t-shirts that I found ridiculous a year ago, I know that -- although I do not own a TV and listen only to noncommercial radio -- I know that marketing works in its insidious way. The same way with style trends, "Looking is Stealing" and I am frequently surprised to find aspects I once hated appear in my work.

I no longer believe I am all that talented. I know I have great ideas, and I know that I cannot often express them well, and rarely (if ever) have the skill to present them as envisioned. And I know that my desire to present them for others takes too much of the role, and can be a draining debilitating vice.

Avoiding something just because it has been done is as bad as imitating it. Especially in a field in which precedence (or standards) are so important to peoples comprehension. Like self-editing once we start to internalize and presuppose the Art Director's approach. Who exactly are we talking to when we blog? If I make my stuff for others, who am I making it for?

If I don't know even that, perhaps I should not worry about the rules by which I assume they are judging.

Monday, October 21, 2002: frantic

It happens and I can,t stop it. It just comes at me. I get frantic, my heart actually tightens. I can feel the blood and it is bubbling in me. I get reckless, I just keep going. Mergeing layers, I flatten the documents, and in two minutes it looks nothing like I started with.

What is it? A blob? Lungs, a burnt heart fragment? It was a preacher a minute ago.

Okay two.

.
. .
. .
. .

.And then I getw orried. Will I find this stuff again? I,m suddenly organziing, stroing. Trying 5 different categorization methods none of which i trust.

.

. But I know

later. the peace. The quiet bliss of sifting through every file on my hardrive and iterating again. And always wondering if I will do anything *more* with it.

I love this stuff and I apologize it is not webactivismn. But do you know what i,m talking about?.

Do
you
look
at sites
and feel it in your chest.?
physically?

Like a dark breeze. | [\[permanent link\]](#)

Hieroglyphs of the Future: Jacques Rancière and the Aesthetics of Quality

Brian Holmes

We're not a surplus, we're a plus. The slogan appeared at the demonstrations of the French jobless movement in the mid-90s in journals, on banners, and on tracts printed by the political art group, Ne pas plier. It knitted the critical force and the subjective claims of the movement into a single phrase. To be "a surplus" (laid off, redundant) was to be reduced to silence in a society that subtracted the jobless from the public accounts, that made them into a kind of residue—invisible, inconceivable except as a statistic under a negative sign. Excluded, in short: cut out of a system based on the status of the salaried employee. Until they finally came together to turn the tables, reverse the signs, and claim a new name on a stage they had created, by occupying unemployment offices in a nation-wide protest during the winter of 1997-98. The people with nothing erupted onto the public scene. "*We're a plus,*" they said, intruding through the TV cameras into the country's living rooms. Which also meant, "We'll drink champagne on Christmas eve."

A way to grasp the aesthetic language of the French social movements in the 90s—and of the transnational movements now emerging—is through the work of Jacques Rancière and his writings on the politics of equality. In *Disagreement* (published originally in 1995), he confronted the philosophy of government with the scandal of the political.¹ Government fulfills an ideal of order when it administers, manages, and tries to totally account for a population; but its reality is the police. The police keeps everyone in their place, imposes the calculations of value, apports out the shares in society.

The political is an opposite process, and it is rare. It happens when outcasts stand up to say that the calculations are wrong, when they refuse the names and the places they've been given (*we're not a surplus*), to claim both a share in society and another name, which will signify their particular addition to universal equality (*we're a plus*). This is because the equality of one speaking being with any other—the fundamental presupposition of democracy—does not exist in the abstract. It only becomes universal each time it is proven, in a new language and on a newly visible stage. Equality is the groundless claim of a minority to have the rights of any other group, to be the *demos*, the people. But it is a claim whose naked truth does not suffice; it has to be put to the test, publicly verified. This is why the political always takes the form of a *demonstration*: a logical proof against all prevailing logic, and the mobile presence of a crowd against the fixed frames of an institution.

Rancière's description was in synch with its time. It anticipated the general strike of French state workers in December 1995, massively supported by the

public, and it accompanied the later revolts of the homeless, the jobless, the paperless— the *mouvement des sans*—who rose up to demand a new division and sharing of the social whole, beyond the accounting systems of the industrial state. But it also offered a key that could reopen the airlocks between the æsthetic and the political.

In an essay written just after *Disagreement*, Rancière explained that the political always involves a disidentification with some aspect of the existing community—for example, with the police state that expels the jobless or the paperless. At the same time, it requires an impossible identification with "the cause of the other."² This impossible identification suggests a new, subjective figure of political commitment. Its paradigm in France is the identification of an entire generation on the left with the Algerian demonstrators thrown brutally into the Seine by the police in 1961. To identify with the murdered Algerians was not to speak *for them*—an absurd idea, while their fellows were completing a revolution in Algeria— but to live on *in their place*, in opposition to a national institution that excluded certain citizens (those of the former colonies) and included others (those of the metropole). That impossible identification would return in the transnational, transhistorical assertion of the students in May 1968, "*We are all German Jews.*" And then again in the specific legal and political context of the late 90s, with the public act, often performed in theaters, of *parrainage* or "god-parenting," which meant taking a quasi-familial, quasi-legal responsibility for an undocumented individual.

This theatrical fiction, like the poetics of the '68 slogan, points to the specifically artistic aspect of political engagement, sketched out in a few pages of *Disagreement*. Rancière begins by opposing Habermas's view that the surprise of æsthetic experience, the opening to the world effected by metaphor, must be distinguished from the norms of communicative action. He claims instead that the uncertain reality of art, the shift or transport of meaning that defines metaphor, is an inherent part of every political dispute, where the argument itself bears first of all on the legitimacy or even the reality of one of the fundamental elements that configure the disagreement (its place, its object, its subjects). The place-changing action of metaphor—one thing or person for another— is what allows the creation or extension of a community of speaking subjects; and this potential extension of a community is needed for any argument about equality. This is why the modern forms of political group-formation, or subjectivization, are historically linked to the emergence of an autonomous, æsthetic dimension split from any practical manipulation of usable objects: an unpredictable, infinitely extensible realm defining "a world of virtual community— of community demanded—superimposed on the world of commands and lots that give everything a use."³

Metaphors are the hieroglyphs of an unknown language, the demand for an unheard-of community. When the group *Ne pas plier*, in collaboration with the jobless association *l'APEIS* (*l'Association pour l'emploi, l'information et la solidarité*), raised Marc Pataut's anonymous portraits above the crowd in 1994— singular faces above a sea of demonstrating humanity— the question was not whether these meter-high photographs, carried on a wooden picket, really represented identifiable jobless people. The question was whether a social issue

could be extended beyond individual cases, to call for a general reconfiguration of society; whether each anonymous face was potentially the face of the unemployed *peuple* reclaiming its right to speak; and whether the gesticulating debates on Republic Square could compare to the ones in the National Assembly. A visual uncertainty, a metaphoric possibility of "one-for-another," intertwined with a political argument bearing on proper or improper names, on the proper or improper division and sharing of resources, of roles, of sensuous reality. In lieu of an answer, the question itself gestured toward a possible future that could only be opened up, among the existing divisions of the world, by an argumentative logic knit together with an artistic metaphor.

A Change of Regime

Rancière's thinking of the political was formulated during the long French slide into recession and racism, when the status of salaried labor was falling into tatters along with welfare-state guarantees, when immigrants were being outlawed in the name of union jobs and the unemployed were being proclaimed the impossible political subject. Yet the threat of the flexible, trans-national, networked regime—the so-called "economic horror"—sparked original forms of protest and debate. A breach was reopened, marked in political economy by the work of André Gorz, *Misère du présent, richesses du possible* (Poverty of the Present, Wealth of the Possible), which turned the questions of flexible work and unemployment back on an entire system, to explore the reasons for maintaining a politics of scarcity in a society of automated production.

That breach seems to have closed today. *Disagreement* had already shown how certain forms of political consensus act to freeze social identities, eliminating the disruptive claims of equality. There is the welfare-state conception of society as an interplay of "partners" (unions, businesses, public services); the neo-liberal idea that society does not exist, only desiring, enterprising individuals; the multicultural vision of separate, Balkanized communities, each bound by their own beliefs. All exclude the political conflict formerly brought by the subject called "proletariat"—the most recent name of the antique *demos* or the revolutionary *peuple*. After integrating much of the National Front's racism, the French socialist party has now found an original mix of the first two forms of consensus: They intensify the neo-liberal program of flexible trans-national labor relations, in hopes of returning to the salaried employment on which the postwar social contract of the nationstate was based! As though the challenges raised by the "*mouvement des sans*" never even existed.

But what is happening now is that similar movements are expanding, proliferating, in an attempt to meet their adversaries on another stage: the stage set by the transnational corporations. This proliferation involves an identification with the cause of an impossibly distant other—Mayan peasant, Brazilian autoworker, Nigerian tribesman, Indian farmer... But to explore the role of art in these movements, I think we had better start with something much closer to home: the language machine that knits the transnational system together, and the kind of labor that is done with it.

The Internet has widely (and rightly) been seen on the left as providing the infrastructure for what is called "digital capitalism."⁴ But what the leftist commentators forget—one wonders why?—is that the simplest net application of

them all, email, has offered an extraordinary chance to what Rancière calls "the literary animal." As large parts of the former working classes gained education, refused industrial discipline, and split away from their former position in the social hierarchy, they became "immaterial laborers" facing the new predicament of flexibilized conditions⁵—but they also found themselves in possession of a new writing tool. And as they taught themselves to use it and invented more applications every day, what did they claim, against all prevailing logic? That here, everyone is equal. The virtual realities of the 1990s saw the return of a utopia whose emergence Rancière has chronicled in his accounts of the self-education of the artisan classes in the early nineteenth century: "Thus one can dream of a society of emancipated individuals that would be a society of artists. Such a society would repudiate the divide between those who know and those who do not know, between those who possess or who do not possess the property of intelligence. It would recognize only active minds: humans who act, who speak of their actions and thereby transform all their works into ways of signaling the humanity within themselves and everyone."⁶

That dream was bound to run up against what Rancière has called "the society of disdain." In the late 20th century it took the usual form of the expropriation of a popular language, and its replacement by manipulated simulacra. Yet even as the dominance of the Internet by the commercial and financial spheres became clear, even as the figure of the shareholder emerged as the only one with a right to participate politically in the new economy, political activism took a new twist, and disruptions began appearing in the fabric of corporate and governmental speech.

Since 1993, the anonymously run ®™ark group has been launching parodies into the ideological mix: consultancy and funding for consumer-product sabotage, following the actions of the infamous Barbie Liberation Organization; direct e-mail campaigns promoting subversion, like the Call-in Sick Day to celebrate the non-holiday (in Anglo-Saxon lands) of 1 May; pseudo-official sites like *gwbush.com*, *voteauction.com*, or *gatt.org*.⁷ Masquerading beneath a corpor-ate-bureaucratic veneer—lackluster logos, deadpan graphics, pompous speech—the ®™ark web sites start off believable, waver in mid-flight, then tailspin into scandalous denunciation by an excess of liberal truth. Another movement, Kein Mensch ist Illegal, more recently took up the same kind of strategy with its Deportation-Class cam-paign: web sites, a poster contest, informa-tion kits, super-activist mileage programs... all opportunities for Lufthansa's stockholders to find out just how much it could cost them to go on deporting illegal immigrants for the police. Then, in a parody of the Oneworld™ airline alliance, the Deportation-Alliance emerged, with collaboration from ®™ark and many others. Meanwhile, a group of slow-thinking Austrian lawyers stumbled on the *gatt.org* site and wanted Mike Moore of the WTO to come pep up their meeting in Salzburg. "Mike Moore" declined, but sent two substitutes—later revealed to be the "Yes Men"—who stood before the unwitting lawyers to explain a vast but rather shocking program for the extension of free trade. The whole incident was documented on video ("tactical embarrassment," as the activist Jordi Claramonte likes to say).

Through mimicry and imagination, groups like ®™ark create a short-circuit

between the anonymous, abstract equality of immaterial labor and the subjective exceptionalism of art. "The mimic gives the 'private' principle of work a public stage. He constitutes a common stage with what ought to determine the confinement of each to his place," writes Rancière in *Le partage du sensible*. But this "common stage" is a scene, not of stifling unity but of dissensus: The mimic transmits "blocks of speech circulating without a legitimate father," literary and political statements that "grab hold of bodies and divert them from their destination," that "contribute to the formation of collective speakers who throw into question the distribution of roles, of territories, of languages—in short, political subjects who upset an established sharing and division of the sensible."⁸ [®]Mark or Deportation-Class are ways for immaterial laborers to claim a voice, a non-economic share, against the stockmarket rules of a shareholder's society. They are also vectors of a new kind of transnational collaboration or reciprocity. They offer a way to rejoin the direct action movements, Art and Revolution, Attac, and dozens if not hundreds of other organizations—the newest way into a much older configuration of the aesthetic and the political, which is also called democracy.

The duplicity of art/work hardly began with Internet. It reaches back to what Rancière calls the aesthetic regime of the arts, which emerged, not coincidentally, at the end of the *ancien régime*. Aesthetics is the name of an indistinction, where fact is inseparable from fiction, where the lowest can become the highest and vice versa. The aesthetic regime of the arts ruins the historically prior regime of representation, with its hierarchies, decorum, and strict separation of genres, but also its Aristotelian distinction between chaotic, accidental history, and well-constructed, plausible fiction. Working initially through mimetic or testimonial techniques—realist literature or painting, photography or cinema—the new regime determines the paradoxical beauty of the anonymous subject, of whoever or whatever: "The ordinary becomes beautiful as a trace of the true... when it is torn away from the obvious and made into mythological or phantasmagorical hiero-glyph."⁹ Before and beyond any "modernist" or "post-modernist" program, the aesthetic regime "makes art into an autonomous form of life, thus simultaneously positing both the autonomy of art and its identification with a moment in a process of life's self-formation."¹⁰ The understanding of activist art begins right here, with the notion of life's self-formation.

Fictionable Futures

The originality of Rancière's work on the aesthetic regime is to clearly show how art can be historically effective and directly political. Art achieves this by means of fictions: arrangements of signs that inhere to reality, yet at the same time make it legible to the person moving through it— as though history were an unfinished film, a documentary fiction, of which we are both cameramen and actors.

That would be one way to describe an event like the "Carnival against Capital," staged by the 10,000 actors of Reclaim the Streets in the City of London on 18 June 1999. Wearing masks of four different colors, the crowd wove converging paths through the City, displaying signs, creating images, knitting its mobile music and language into urban reality—weaving another world in order to tangle

with the one managed by finance capital (and to tangle directly with the police). The 18 June event taught us to read a new story at the center of finance capitalism. But no privileged viewpoint could wrap up the film, gather the whole of this "artwork" into a totality and reduce its contradictions—because the idea had already crisscrossed not just Britain but the earth, spreading and dividing like the wildfire of equality. By tracts, images, Internet, and word of mouth; by collaboration and spontaneous reinvention, the "disorgan-ization" of Reclaim the Streets and the Peoples' Global Action network had mapped out a new kind of world, in which collectives in over 70 different countries could protest against the same abstract processes of neo-liberal capitalism, under vastly different local conditions but on the same day. Did the "film" of Seattle, Prague, and so on begin right here, with this "artistic" event? But where was "here"? And what did the "event" really consist of?

If anarchic, artistic demonstrations like 18 June are political, it is because they involve a disagreement, a direct confrontation with the existing divisions or shares of sensuous reality. They make visible the "invisible government" of the financial institutions (i.e. the new world police). But if they are æsthetic, it is because they bring a blur of indistinction to the proper subjects, objects, and places of the debate. They create another stage for politics: like the protesters in London opening a fire hydrant to symbol-ically return a long-buried river to the surface of the street, to reclaim that stream from the layered abstractions of capital. Or like the social forces in Porto Alegre displacing the wintry Davos economic forum to the summer weather of the South, turning the agenda and the very seasons of capitalist globalization upside down.

It is certain that such confrontations must become more precise, more reasoned, more explicit, if the new claim to equality is to have any effect on the existing divisions of the world. The æsthetic "plus" of the demonstrations must find a way to return to each local environment, to the specific frameworks that govern the homeless, the paperless, the unemployed. This is the risky gambit that the far left is now making, on a world scale. But to be explicit is not to speak the opponent's language (neoclassical eco-nomics)—which would always be to play an unequal hand in a losing game. Instead, it is to engage in an unstable mimicry that seeks to prove its claim to equality on a public stage, while inventing new signs, new pathways through the world, new political subjectivities.

Hieroglyphs of the Future: Jacques Rancière and the Aesthetics of Quality

Brian Holmes

[A+](#) [A-](#)

We're not a surplus, we're a plus. The slogan appeared at the demonstrations of the French jobless movement in the mid-90s in journals, on banners, and on tracts printed by the political art group, Ne pas plier. It knitted the critical force and the subjective claims of the movement into a single phrase. To be "a surplus" (laid off, redundant) was to be reduced to silence in a society that subtracted the jobless from the public accounts, that made them into a kind of residue—invisible, inconceivable except as a statistic under a negative sign. Excluded, in short: cut out of a system based on the status of the salaried employee. Until they finally came together to turn the tables, reverse the signs, and claim a new name on a stage they had created, by occupying unemployment offices in a nation-wide protest during the winter of 1997-98. The people with nothing erupted onto the public scene. "*We're a plus,*" they said, intruding through the TV cameras into the country's living rooms. Which also meant, "We'll drink champagne on Christmas eve."

A way to grasp the aesthetic language of the French social movements in the 90s—and of the transnational movements now emerging—is through the work of Jacques Rancière and his writings on the politics of equality. In *Disagreement* (published originally in 1995), he confronted the philosophy of government with the scandal of the political.¹ Government fulfills an ideal of order when it administers, manages, and tries to totally account for a population; but its reality is the police. The police keeps everyone in their place, imposes the calculations of value, apportioning out the shares in society.

The political is an opposite process, and it is rare. It happens when outcasts stand up to say that the calculations are wrong, when they refuse the names and the places they've been given (*we're not a surplus*), to claim both a share in society and another name, which will signify their particular addition to universal

equality (*we're a plus*). This is because the equality of one speaking being with any other—the fundamental presupposition of democracy—does not exist in the abstract. It only becomes universal each time it is proven, in a new language and on a newly visible stage. Equality is the groundless claim of a minority to have the rights of any other group, to be the *demos*, the people. But it is a claim whose naked truth does not suffice; it has to be put to the test, publicly verified. This is why the political always takes the form of a *demonstration*: a logical proof against all prevailing logic, and the mobile presence of a crowd against the fixed frames of an institution.

Rancière's description was in synch with its time. It anticipated the general strike of French state workers in December 1995, massively supported by the public, and it accompanied the later revolts of the homeless, the jobless, the paperless—the *mouvement des sans*—who rose up to demand a new division and sharing of the social whole, beyond the accounting systems of the industrial state. But it also offered a key that could reopen the airlocks between the aesthetic and the political.

In an essay written just after *Disagreement*, Rancière explained that the political always involves a disidentification with some aspect of the existing community—for example, with the police state that expels the jobless or the paperless. At the same time, it requires an impossible identification with "the cause of the other."² This impossible identification suggests a new, subjective figure of political commitment. Its paradigm in France is the identification of an entire generation on the left with the Algerian demonstrators thrown brutally into the Seine by the police in 1961. To identify with the murdered Algerians was not to speak *for them*—an absurd idea, while their fellows were completing a revolution in Algeria—but to live on *in their place*, in opposition to a national institution that excluded certain citizens (those of the former colonies) and included others (those of the metropole). That impossible identification would return in the transnational, transhistorical assertion of the students in May 1968, "*We are all German Jews*." And then again in the specific legal and political context of the late 90s, with the public act, often performed in theaters, of *parrainage* or "god-parenting," which meant taking a quasi-familial, quasi-legal responsibility for an undocumented individual.

This theatrical fiction, like the poetics of the '68 slogan, points to the specifically artistic aspect of political engagement, sketched out in a few pages of *Disagreement*. Rancière begins by opposing Habermas's view that the surprise of aesthetic experience, the opening to the world effected by metaphor, must be distinguished from the norms of communicative action. He claims instead that the uncertain reality of art, the shift or transport of meaning that defines metaphor, is an inherent part of every political dispute, where the argument itself bears first of all on the legitimacy or even the reality of one of the fundamental elements that configure the disagreement (its place, its object, its subjects). The place-changing action of metaphor—one thing or person for another—is what allows the creation or extension of a community of speaking subjects; and this potential extension of a community is needed for any argument about equality. This is why the modern forms of political group-formation, or subjectivization, are historically linked to the emergence of an

autonomous, æsthetic dimension split from any practical manipulation of usable objects: an unpredictable, infinitely extensible realm defining "a world of virtual community— of community demanded—superimposed on the world of commands and lots that give everything a use."³

Metaphors are the hieroglyphs of an unknown language, the demand for an unheard-of community. When the group *Ne pas plier*, in collaboration with the jobless association *l'APEIS (l'Association pour l'emploi, l'information et la solidarité)*, raised Marc Pataut's anonymous portraits above the crowd in 1994— singular faces above a sea of demonstrating humanity— the question was not whether these meter-high photographs, carried on a wooden picket, really represented identifiable jobless people. The question was whether a social issue could be extended beyond individual cases, to call for a general reconfiguration of society; whether each anonymous face was potentially the face of the unemployed *peuple* reclaiming its right to speak; and whether the gesticulating debates on Republic Square could compare to the ones in the National Assembly. A visual uncertainty, a metaphoric possibility of "one-for-another," intertwined with a political argument bearing on proper or improper names, on the proper or improper division and sharing of resources, of roles, of sensuous reality. In lieu of an answer, the question itself gestured toward a possible future that could only be opened up, among the existing divisions of the world, by an argumentative logic knit together with an artistic metaphor.

A Change of Regime

Rancière's thinking of the political was formulated during the long French slide into recession and racism, when the status of salaried labor was falling into tatters along with welfare-state guarantees, when immigrants were being outlawed in the name of union jobs and the unemployed were being proclaimed the impossible political subject. Yet the threat of the flexible, trans-national, networked regime—the so-called "economic horror"—sparked original forms of protest and debate. A breach was reopened, marked in political economy by the work of André Gorz, *Misère du présent, richesses du possible* (Poverty of the Present, Wealth of the Possible), which turned the questions of flexible work and unemployment back on an entire system, to explore the reasons for maintaining a politics of scarcity in a society of automated production.

That breach seems to have closed today. *Disagreement* had already shown how certain forms of political consensus act to freeze social identities, eliminating the disruptive claims of equality. There is the welfare-state conception of society as an interplay of "partners" (unions, businesses, public services); the neo-liberal idea that society does not exist, only desiring, enterprising individuals; the multicultural vision of separate, Balkanized communities, each bound by their own beliefs. All exclude the political conflict formerly brought by the subject called "proletariat"—the most recent name of the antique *demos* or the revolutionary *peuple*. After integrating much of the National Front's racism, the French socialist party has now found an original mix of the first two forms of consensus: They intensify the neo-liberal program of flexible trans-national labor relations, in hopes of returning to the salaried employment on which the postwar social contract of the nationstate was based! As though the challenges raised by the "*mouvement des sans*" never even existed.

But what is happening now is that similar movements are expanding, proliferating, in an attempt to meet their adversaries on another stage: the stage set by the transnational corporations. This proliferation involves an identification with the cause of an impossibly distant other—Mayan peasant, Brazilian autoworker, Nigerian tribesman, Indian farmer... But to explore the role of art in these movements, I think we had better start with something much closer to home: the language machine that knits the transnational system together, and the kind of labor that is done with it.

The Internet has widely (and rightly) been seen on the left as providing the infrastructure for what is called "digital capitalism."⁴ But what the leftist commentators forget—one wonders why?—is that the simplest net application of them all, email, has offered an extraordinary chance to what Rancière calls "the literary animal." As large parts of the former working classes gained education, refused industrial discipline, and split away from their former position in the social hierarchy, they became "immaterial laborers" facing the new predicament of flexibilized conditions⁵—but they also found themselves in possession of a new writing tool. And as they taught themselves to use it and invented more applications every day, what did they claim, against all prevailing logic? That here, everyone is equal. The virtual realities of the 1990s saw the return of a utopia whose emergence Rancière has chronicled in his accounts of the self-education of the artisan classes in the early nineteenth century: "Thus one can dream of a society of emancipated individuals that would be a society of artists. Such a society would repudiate the divide between those who know and those who do not know, between those who possess or who do not possess the property of intelligence. It would recognize only active minds: humans who act, who speak of their actions and thereby transform all their works into ways of signaling the humanity within themselves and everyone."⁶

That dream was bound to run up against what Rancière has called "the society of disdain." In the late 20th century it took the usual form of the expropriation of a popular language, and its replacement by manipulated simulacra. Yet even as the dominance of the Internet by the commercial and financial spheres became clear, even as the figure of the shareholder emerged as the only one with a right to participate politically in the new economy, political activism took a new twist, and disruptions began appearing in the fabric of corporate and governmental speech.

Since 1993, the anonymously run ®™ark group has been launching parodies into the ideological mix: consultancy and funding for consumer-product sabotage, following the actions of the infamous Barbie Liberation Organization; direct e-mail campaigns promoting subversion, like the Call-in Sick Day to celebrate the non-holiday (in Anglo-Saxon lands) of 1 May; pseudo-official sites like *gwbush.com*, *voteauction.com*, or *gatt.org*.⁷ Masquerading beneath a corpor-ate-bureaucratic veneer—lackluster logos, deadpan graphics, pompous speech—the ®™ark web sites start off believable, waver in mid-flight, then tailspin into scandalous denunciation by an excess of liberal truth. Another movement, Keim Mensch ist Illegal, more recently took up the same kind of strategy with its Deportation-Class cam-paign: web sites, a poster contest, informa-tion kits, super-activist mileage programs... all opportunities for

Lufthansa's stockholders to find out just how much it could cost them to go on deporting illegal immigrants for the police. Then, in a parody of the Oneworld™ airline alliance, the Deportation-Alliance emerged, with collaboration from ®™ark and many others. Meanwhile, a group of slow-thinking Austrian lawyers stumbled on the *gatt.org* site and wanted Mike Moore of the WTO to come pep up their meeting in Salzburg. "Mike Moore" declined, but sent two substitutes—later revealed to be the "Yes Men"—who stood before the unwitting lawyers to explain a vast but rather shocking program for the extension of free trade. The whole incident was documented on video ("tactical embarrassment," as the activist Jordi Claramonte likes to say).

Through mimicry and imagination, groups like ®™ark create a short-circuit between the anonymous, abstract equality of immaterial labor and the subjective exceptionalism of art. "The mimic gives the 'private' principle of work a public stage. He constitutes a common stage with what ought to determine the confinement of each to his place," writes Rancière in *Le partage du sensible*. But this "common stage" is a scene, not of stifling unity but of dissensus: The mimic transmits "blocks of speech circulating without a legitimate father," literary and political statements that "grab hold of bodies and divert them from their destination," that "contribute to the formation of collective speakers who throw into question the distribution of roles, of territories, of languages—in short, political subjects who upset an established sharing and division of the sensible."⁸ ®™ark or Deportation-Class are ways for immaterial laborers to claim a voice, a non-economic share, against the stockmarket rules of a shareholder's society. They are also vectors of a new kind of transnational collaboration or reciprocity. They offer a way to rejoin the direct action movements, Art and Revolution, Attac, and dozens if not hundreds of other organizations—the newest way into a much older configuration of the aesthetic and the political, which is also called democracy.

The duplicity of art/work hardly began with Internet. It reaches back to what Rancière calls the aesthetic regime of the arts, which emerged, not coincidentally, at the end of the *ancien régime*. Aesthetics is the name of an indistinction, where fact is inseparable from fiction, where the lowest can become the highest and vice versa. The aesthetic regime of the arts ruins the historically prior regime of representation, with its hierarchies, decorum, and strict separation of genres, but also its Aristotelian distinction between chaotic, accidental history, and well-constructed, plausible fiction. Working initially through mimetic or testimonial techniques—realist literature or painting, photography or cinema—the new regime determines the paradoxical beauty of the anonymous subject, of whoever or whatever: "The ordinary becomes beautiful as a trace of the true... when it is torn away from the obvious and made into mythological or phantasmagorical hiero-glyph."⁹ Before and beyond any "modernist" or "post-modernist" program, the aesthetic regime "makes art into an autonomous form of life, thus simultaneously positing both the autonomy of art and its identification with a moment in a process of life's self-formation."¹⁰ The understanding of activist art begins right here, with the notion of life's self-formation.

Fictionable Futures

The originality of Rancière's work on the aesthetic regime is to clearly show how art can be historically effective and directly political. Art achieves this by means of fictions: arrangements of signs that inhere to reality, yet at the same time make it legible to the person moving through it— as though history were an unfinished film, a documentary fiction, of which we are both cameramen and actors.

That would be one way to describe an event like the "Carnival against Capital," staged by the 10,000 actors of Reclaim the Streets in the City of London on 18 June 1999. Wearing masks of four different colors, the crowd wove converging paths through the City, displaying signs, creating images, knitting its mobile music and language into urban reality—weaving another world in order to tangle with the one managed by finance capital (and to tangle directly with the police). The 18 June event taught us to read a new story at the center of finance capitalism. But no privileged viewpoint could wrap up the film, gather the whole of this "artwork" into a totality and reduce its contradictions—because the idea had already crisscrossed not just Britain but the earth, spreading and dividing like the wildfire of equality. By tracts, images, Internet, and word of mouth; by collaboration and spontaneous reinvention, the "disorgan-ization" of Reclaim the Streets and the Peoples' Global Action network had mapped out a new kind of world, in which collectives in over 70 different countries could protest against the same abstract processes of neo-liberal capitalism, under vastly different local conditions but on the same day. Did the "film" of Seattle, Prague, and so on begin right here, with this "artistic" event? But where was "here"? And what did the "event" really consist of?

If anarchic, artistic demonstrations like 18 June are political, it is because they involve a disagreement, a direct confrontation with the existing divisions or shares of sensuous reality. They make visible the "invisible government" of the financial institutions (i.e. the new world police). But if they are aesthetic, it is because they bring a blur of indistinction to the proper subjects, objects, and places of the debate. They create another stage for politics: like the protesters in London opening a fire hydrant to symbol-ically return a long-buried river to the surface of the street, to reclaim that stream from the layered abstractions of capital. Or like the social forces in Porto Alegre displacing the wintry Davos economic forum to the summer weather of the South, turning the agenda and the very seasons of capitalist globalization upside down.

It is certain that such confrontations must become more precise, more reasoned, more explicit, if the new claim to equality is to have any effect on the existing divisions of the world. The aesthetic "plus" of the demonstrations must find a way to return to each local environment, to the specific frameworks that govern the homeless, the paperless, the unemployed. This is the risky gambit that the far left is now making, on a world scale. But to be explicit is not to speak the opponent's language (neoclassical eco-nomics)—which would always be to play an unequal hand in a losing game. Instead, it is to engage in an unstable mimicry that seeks to prove its claim to equality on a public stage, while inventing new signs, new pathways through the world, new political subjectivities.

About Project:

Wir leben in einer hyperphysischen Welt und gleichzeitig veraendert die digitale Revolution unsere mediale Welt radikal. Aber wie das papierlose Buerau uns in den letzten 10 Jahren eine Papierzunahme von 1000% gebracht hat, wird uns digitale Kunst in der naechsten Dekade eine 1000% Zunahme an physikalischen Objekten bringen. Pixelpaintings - Wie kann etwas gezeigt werden das nicht existiert? Wie kann einem digitalen Leben organisches Leben eingehaucht werden? Diese "Produkt-Linie" ist eine strategische Kombination von Neucode (technisch / digitaler Aktionismus) und Altcode (organisch / Malerei) zwecks Infiltration des Kunstmarktes.

Werktitel: Pixelpainting - 3 shopping carts auf einer .html-Wand

100x80cm, Oel auf Industrieleinwand <http://www.lizvix.com/pages/shoppingbaskets.html>

About Project:

Wir leben in einer hyperphysischen Welt und gleichzeitig veraendert die digitale Revolution unsere mediale Welt radikal. Aber wie das papierlose Buerau uns in den letzten 10 Jahren eine Papierzunahme von 1000% gebracht hat, wird uns digitale Kunst in der naechsten Dekade eine 1000% Zunahme an physikalischen Objekten bringen. Pixelpaintings - Wie kann etwas gezeigt werden das nicht existiert? Wie kann einem digitalen Leben organisches Leben eingehaucht werden? Diese "Produkt-Linie" ist eine strategische Kombination von Neucode (technisch / digitaler Aktionismus) und Altcode (organisch / Malerei) zwecks Infiltration des Kunstmarktes.

nove tehnologije

Anarhisti in antiglobalisti na pohodu

Neodvisni mediji postajajo trn v peti 1tevilnim vladam in alternativa mainstreamovskemu medijskemu prostoru

Spletne strani in portali z anarhističnimi in antiglobalističnimi vsebinami ter novicami o najrazličnejših korporativističnih in vladnih zarotah so se močno okrepili po znamenitih antiglobalističnih demonstracijah konec leta 1999 v Seattlu, kjer se je sestal vrh svetovne trgovinske organizacije WTO. Ves svet je bil osupel nad okoli petdesettisočglavo množico protestnikov proti svetovnim gospodarskim oligarhom. Nekateri so te proteste poimenovali kar digitalne demonstracije. Internet je bil uporabljen kot osnovno sredstvo globalne komunikacije in lele tedaj je večina svetovnih vlad spoznala, kaj v resnici pomeni medmrežje, ter začela razmišljati, kako bi ga bilo dobro nadzorovati in le bolje cenzurirati. S popularizacijo antiglobalističnih in drugih podobnih gibanj so se razvili tudi alternativni neodvisni mediji, nasprotje mainstreamovskemu medijskemu prostoru, ki za takšne skupine najpogosteje ni imel kdove koliko posluha. Spletne strani, ki jih je urejalo nekaj navdušencev, so z vedno več angažiranimi posamezniki prerasle v medijska središča. Eno takšnih, ki tako rekoč postaja institucija za 1tevilna radikalna gibanja, je Independent Media Center, bolj znan pod imenom Indymedia (www.indymedia.org). Ustanovljen je bil za poročanje o seattleških protestih proti WTO, saj so organizatorji protestov pričakovali, da veliki mediji ne bodo dovolj objektivno opisovali dogodkov. Med tisoči demonstrantov se je pojavilo tudi okoli 400 mladcev z bedžji z znakom Indymedia, oboroženih s kamkorderji, ki so snemali dogodke. Po Seattlu je začel Indymedia prek lokalnih medijskih aktivistov ustanavljati neodvisne medijske centre po ZDA in drugod po svetu in ti so začeli spremljati demonstracije in druge dogodke tudi v drugih mestih in državah. Center je le vedno v Seattlu, kjer izdajajo tudi časopis, ki se distribuira po pošti ali prek interneta. "Lani sem naredil intervju s sodelavcem Indymedia, ki je tam od samega začetka. Ko so bile demonstracije v Pragi, je bilo slišati kritiko, zakaj sploh potrebujemo Indymedio, če lahko točnejše informacije dobimo na CNN-u, predvsem zaradi ideoloških izjav, ki so se pojavljale. Povedal mi je, da se zaveda, da je sistem precej odprt in dozveten za napake. Prav zaradi 1tevilnih kritik so začeli dvakrat preverjati informacije. Mainstreamovski mediji pa informacij večinoma ne preverjajo. Novinarji, ki so bili pod udarom, so potemtakem imeli precej bolj izdelan sistem verifikacije kot siceršnji mediji in veljajo za verodostojne," o verodostojnosti Indymedia pravi **Tomaž Trplan**, sodelavec Mirovnega inštituta, ki vodi 1tevilne revije, časopise, pamflete, fanzini, knjige in videokasete z radikalnejšimi vsebinami, ki bi jih zaman iskali v navadnih knjižnicah.

Solidarnost z ljubljanskim skvotom na srbskih internetnih straneh

Copyright (c) 2002 Mladina d.d.

Razmnoževanje ali uporaba besedila ali dela besedila je prepovedana, razen ob pisnem soglasju Mladine d.d.

Na internetu je sicer morje spletnih strani posvečenih antiglobalizmu, anarhizmu, radikalnemu levičarstvu ..., predstavlja se tako rekoè vsaka najmanj¹a delujoèa skupinica. Med spletnimi stranmi in portali pa jih je kar nekaj, ki veljajo za nekaj¹no globalno povezavo in so bogato opremljeni z novicami in literaturo. Ainfos (www.ainfos.ca) je javni, bolj anarhistièno usmerjen novièarski stre³/₄nik, ki ponuja vsebino v ¹tevilnih jezikih. Infoshop (www.infoshop.org) je spletni portal nekje na stièi¹èu anarhizma in antiglobalizma, kjer vzporedno z vsebino teèe tudi mailing lista, namenjena sporoèanju razliènih novic. Med bolj priljubljenimi je ¹e manj anarhistièen in bolj levièarski Znet (www.zmag.org), ki je iz¹el iz tiskane razlièice Zmag. Spletno-tiskan je tudi britanski Schnews (www.schnews.com). Gre za povsem resen èasopis, ki ima zelo resen pristop, èeprav temelji na prostovoljnem delu. Schnews izhaja v Brightonu, mestu, ki je postalo sredi¹èe britanske anarhistiène scene. Vsak teden izdajo èasopis na formatu A4 in ga postavijo na spletno stran, da si ga lahko bralci tudi stiskajo. K nekoliko ¹aljive¹emu uporni¹kemu lotevanju stvari spodbuja Rtmark (www.rtmark.com). Namesto kamenja v ¹ipe McDonaldsov ali boja s palicami proti policistom, kar prakticirajo nekatere anarho-antiglobalistiène skupine, Rtmark sprejema vse mogoèe ¹aljive zamisli, kako èim bolj osme¹iti korporacije in vladajoèo elito. Sponzorirali so recimo spletno stran votauction.com, kjer so volilci na dra³/₄bi ponujali svoje glasove najbolj¹emu ponudniku. Nekaj trenutnih predlogov - hackiranje spletne strani s seznamom ³/₄rtev napada na WTC in dodajanje imen ³/₄rtev bombardiranj v Afganistanu; odmetavanje paketov s hrano nad revnej¹imi predeli ZDA ...

Slovenska scena je, kar se tièe kak¹nih neodvisnih medijev in spletnih strani, precej borna oziroma, èe noèemo biti ravno kritièni, v povojih. *"V Sloveniji je vedno tako, da se pojavi zamisel, potem pa vse skupaj zamre. Pogovarjali smo se tudi o ustanovitvi neodvisnega medijskega centra Indymedia, vendar nismo pri¹li dlje od dogovarjanja. S pomanjkanjem zanimanja ni te³/₄av, te³/₄ko pa je najti ljudi, ki so sposobni to delati,"* pravi Toma³/₄ Trplan. Indymedia se prav zdaj ustanavlja na Hrva¹kem, zraven je vodilni zagreb¹ki kiberklub Mama. Kaj je v Sloveniji vredno omembe? Najaktualnej¹a je akcija Recine Nato (www.geocities.com/recinenato/nenato), kjer aktivisti pozivajo na razliène akcije in jih tudi pripravljajo, recimo protinatovsko dekoracijo slovenskih nadvozov. Med dejavnimi je ¹e osrednji slovenski anarhistièni portal (www.ruleless.com), ki je med drugim izdelal parodijo na pronatovsko propagandno stran slovenske vlade - Slovenija ne Nato, pri èemer gre za vizualno skoraj identièno spletno stran s spremenjenimi besedili. ©kratova èitalnica se tudi lahko pohvali s svojo spletno stranjo (www.ljudmila.org/anarhiv/), dejavni, vsaj kar zadeva novice, so ¹e slovenski antiglobalisti s svojo Globalo (www.ljudmila.org/globala/). Seveda ne gre pozabiti spletne strani AC Molotov <http://213.143.79.69/molotov/>, kjer pa se v glavnem spremljajo dogodki na Kurilni¹ki 3.

Teroristi.Kje je Bush, da vam pokaže kaj pomeni disciplina:)?

Malo za 'alo, veliko za res

2002-09-03 14:29 by **Dejan**

An airplane was about to crash; there were 5 passengers on board but only 4 parachutes. The first passenger said, "I'm Kobe Bryant, the best NBA basketball player, the Lakers need me, I can't afford to die...."

So he took the first pack and left the plane. The second passenger, Hillary Clinton, said, "I am the wife of the former president of the United States, I am also the most ambitious woman in the world and I am a New York Senator and a potential future president." She just took the second parachute and jumped out of the plane. The third passenger, George W. Bush, said : "I'm President of the United States of America, I have a great responsibility being the leader of a superpower nation. And above all I'm the cleverest President in American history, so America's people won't let me die." So he put on the pack next to him and jumped out of the plane. The fourth passenger, the Pope, says to the fifth passenger, a 10 year-old school boy, "I am old and frail and I don't have many years left, as a Catholic I will sacrifice my life and let you have the last parachute. The boy

said, "it's OK, there's a parachute left for you. America's cleverest President has taken my schoolbag.

Anarhisti in antiglobalisti na pohodu

Neodvisni mediji postajajo trn v peti 1tevilnim vladam in alternativa mainstreamovskemu medijskemu prostoru

Spletne strani in portali z anarhističnimi in antiglobalističnimi vsebinami ter novicami o najrazličnejših korporativističnih in vladnih zarotah so se močno okrepili po znamenitih antiglobalističnih demonstracijah konec leta 1999 v Seattlu, kjer se je sestal vrh svetovne trgovinske organizacije WTO. Ves svet je bil osupel nad okoli petdesettisočglavo množico protestnikov proti svetovnim gospodarskim oligarhom. Nekateri so te proteste poimenovali kar digitalne demonstracije. Internet je bil uporabljen kot osnovno sredstvo globalne komunikacije in 1ele tedaj je večina svetovnih vlad spoznala, kaj v resnici pomeni medmrežje, ter začela razmišljati, kako bi ga bilo dobro nadzorovati in 1e bolj cenzurirati. S popularizacijo antiglobalističnih in drugih podobnih gibanj so se razvili tudi alternativni neodvisni mediji, nasprotje mainstreamovskemu medijskemu prostoru, ki za takšne skupine najpogosteje ni imel kdove koliko posluha. Spletne strani, ki jih je urejalo nekaj navdušencev, so z vedno več angažiranimi posamezniki prerasle v medijska središča. Eno takšnih, ki tako rekoč postaja institucija za 1tevilna radikalna gibanja, je Independent Media Center, bolj znan pod imenom Indymedia (www.indymedia.org). Ustanovljen je bil za poročanje o seattleških protestih proti WTO, saj so organizatorji protestov pričakovali, da veliki mediji ne bodo dovolj objektivno opisovali dogodkov. Med tisoči demonstrantov se je pojavilo tudi okoli 400 mladcev z bedžji z znakom Indymedia, oboroženih s kamkorderji, ki so snemali dogodke. Po Seattlu je začel Indymedia prek lokalnih medijskih aktivistov ustanavljati neodvisne medijske centre po ZDA in drugod po svetu in ti so začeli spremljati demonstracije in druge dogodke tudi v drugih mestih in državah. Center je 1e vedno v Seattlu, kjer izdajajo tudi časopis, ki se distribuira po pošti ali prek interneta.

Copyright (c) 2002 Mladina d.d.

Razmnoževanje ali uporaba besedila ali dela besedila je prepovedana, razen ob pisnem soglasju Mladine d.d.

"Lani sem naredil intervju s sodelavcem Indymedie, ki je tam od samega začetka. Ko so bile demonstracije v Pragi, je bilo slišati kritiko, zakaj sploh potrebujemo Indymedio, če lahko točnejše informacije dobimo na CNN-u, predvsem zaradi ideoloških izjav, ki so se pojavljale. Povedal mi je, da se zaveda, da je sistem precej odprt in dovzeten za napake. Prav zaradi številnih kritik so začeli dvakrat preverjati informacije. Mainstreamovski mediji pa informacij večinoma ne preverjajo. Novinarji, ki so bili pod udarom, so potemtakem imeli precej bolj izdelan sistem verifikacije kot siceršnji mediji in veljajo za verodostojne," o verodostojnosti Indymedie pravi **Tomaž Trplan**, sodelavec Mirovnega inštituta, ki vodi škratovo žitnico v sklopu Kuda Anarchiv, infoteko, kjer so zbrani številne revije, časopisi, pamfleti, fanzini, knjige in videokasete z radikalnejšimi vsebinami, ki bi jih zaman iskali v navadnih knjigah.

Na internetu je sicer morje spletnih strani posvečenih antiglobalizmu, anarhizmu, radikalnemu levitarstvu ..., predstavlja se tako rekoč vsaka najmanjša delujoča skupinica. Med spletnimi stranmi in portali pa jih je kar nekaj, ki veljajo za nekakšno globalno povezavo in so bogato opremljeni z novicami in literaturo. Ainfos (www.ainfos.ca) je javni, bolj anarhistično usmerjen novinarski strežnik, ki ponuja vsebino v številnih jezikih. Infoshop (www.infoshop.org) je spletni portal nekje na stičišču anarhizma in antiglobalizma, kjer vzporedno z vsebino teče tudi mailing lista, namenjena sporočanju različnih novic. Med bolj priljubljenimi je še manj anarhističen in bolj levitarski Znet (www.zmag.org), ki je izšel iz tiskane različice Zmag. Spletno-tiskan je tudi britanski Schnews (www.schnews.com). Gre za povsem resen časopis, ki ima zelo resen pristop, čeprav temelji na prostovoljnem delu. Schnews izhaja v Brightonu, mestu, ki je postalo središče britanske anarhistične scene. Vsak teden izdajo časopis na formatu A4 in ga postavijo na spletno stran, da si ga lahko bralci tudi tiskajo. K nekoliko bolj živemu upornikemu lotevanju stvari spodbuja Rtmark (www.rtmark.com). Namesto kamenja v tipe McDonaldsov ali boja s palicami proti policistom, kar prakticirajo nekatere anarho-antiglobalistične skupine, Rtmark sprejema vse mogoče boljše zamisli, kako čim bolj osmežiti korporacije in vladajočo elito. Sponzorirali so recimo spletno stran voteauction.com, kjer so volilci na dražbi ponujali svoje glasove najboljšemu ponudniku. Nekaj trenutnih predlogov - hackiranje spletne strani s seznamom števil napada na WTC in dodajanje imen števil bombardiranj v Afganistanu; odmetavanje paketov s hrano nad revnejšimi predeli ZDA ...

Slovenska scena je, kar se tiče kakšnih neodvisnih medijev in spletnih strani, precej borna oziroma, če nočemo biti ravno kritični, v povojih. "V Sloveniji je vedno tako, da se pojavi zamisel, potem pa vse skupaj zamre. Pogovarjali smo se tudi o ustanovitvi neodvisnega medijskega centra Indymedie, vendar nismo prišli dlje od dogovarjanja. S pomanjkanjem zanimanja ni težavo, težko pa je najti ljudi, ki so sposobni to delati," pravi Tomaž Trplan. Indymedia se prav zdaj ustanavlja na Hrvaškem, zraven je vodilni zagrebški kiberklub Mama. Kaj je v Sloveniji vredno omembe? Najaktualnejša je akcija Reci ne Nato (www.geocities.com/recinenato/nenato), kjer aktivisti pozivajo na različne akcije in jih tudi pripravljajo, recimo protinatovsko dekoracijo slovenskih nadvozov. Med dejavnimi je še osrednji slovenski anarhistični portal (www.ruleless.com), ki je med drugim izdelal parodijo na protinatovsko propagandno stran slovenske vlade - Slovenija

ne Nato, pri èemer gre za vizualno skoraj identièno spletno stran s spremenjenimi besedili. ©kratova èitalnica se tudi lahko pohvali s svojo spletno stranjo (www.ljudmila.org/anarhiv/), dejavni, vsaj kar zadeva novice, so 1e slovenski antiglobalisti s svojo Globalo (www.ljudmila.org/globala/). Seveda ne gre pozabiti spletne strani AC Molotov <http://213.143.79.69/molotov/>, kjer pa se v glavnem spremljajo dogodki na Kurilni4ki 3.

Internet et la politique:

Tous en ressentirons l'impact

Tout comme la télévision à partir de 1956, l'impact que connaît internet aux États-Unis depuis cette année atteindra un jour la plupart des pays du monde et contribuera à modifier le panorama politique. Il n'est pas trop tôt pour se demander de quelle façon.

Si on s'en tient aux chiffres, l'internet ne fait pas encore le poids face à la télévision. Le nombre d'Américains qui ont regardé le premier débat entre Al Gore et George Bush se comptait en dizaines de millions, alors que le nombre de personnes qui visitaient les sites des candidats au même moment ne dépassait pas les centaines de milliers. Pourtant, l'impact d'internet est réel et il se mesure à plusieurs niveaux:

- ▶ L'interactivité et la logique de réseau propres à internet sont en train de gagner du terrain. On n'utilise plus la toile simplement comme instrument de propagande, pour communiquer les positions des partis. Les candidats ont une «véritable stratégie internet». Le réseau est devenu un instrument fondamental pour l'organisation des militants et pour recueillir des fonds.
- ▶ Les citoyens s'organisent, et ceux qui souhaitent obtenir des informations sur les candidats, les partis, et tous les sujets importants peuvent les trouver sur des sites indépendants. Ceux-ci sont particulièrement intéressants lorsqu'ils permettent de savoir d'où proviennent les fonds utilisés dans chaque campagne.
- ▶ Cohérents avec leur position favorable au néo-libéralisme économique, la plupart des gens des point-coms sont en faveur du candidat républicain, George Bush (75%, contre 38% en faveur d'Al Gore). Le lobby informatique a de plus en plus de force. Sa participation au financement des campagnes des deux principaux partis a triplé depuis les dernières élections présidentielles.
- ▶ Cette année, les démocrates d'Arizona ont pu participer aux primaires en votant "depuis" leur PC. Ce phénomène devrait être encore plus important dans 4 ans. Mais, nul ne peut

ignorer les deux problèmes qu'il implique une telle pratique: la sécurité et la confidentialité du vote, d'une part, et le fait, d'autre part, que voter par l'internet favorise les plus riches - plus susceptibles d'avoir accès à un ordinateur - et leur permettrait donc d'accroître leur participation au scrutin.

Deux expériences mineures et rapidement contrôlées par les autorités ont attiré l'attention sur la probable apparition de conséquences inattendues liées au développement des technologies de l'information:

▶ La plus curieuse est peut-être la tentative d'acheter des voix sur l'internet inventée par un étudiant, créateur du site [VoteAuction.com](#). Les autorités l'ont obligé à fermer le site et il affirme maintenant qu'il s'agissait d'une plaisanterie dont le but était de démontrer les excès de "l'industrie électorale". Mais on ne peut pas ignorer la possibilité que d'autres essayent de copier le mécanisme à d'autres fins.

▶ La deuxième expérience est plus intéressante parce que son illégalité n'a pas encore été démontrée (même si plusieurs sites ont cessé d'offrir ce service suite aux pressions exercées par les autorités californiennes). Il s'agit de la tentative de [NaderTrader.org](#) - entre autres - d'organiser un échange de voix entre les partisans de Gore et de Nader. Ceux qui préfèrent Nader voteraient pour Gore dans les états où le démocrate a besoin de toutes les voix pour s'imposer, et en contrepartie, les partisans de Gore voteraient pour Nader dans les états où Bush est sûr de gagner. L'objectif est de permettre à Gore de remporter la présidentielle et à Nader de rassembler les 5% de voix nécessaires aux écologistes pour être reconnus et recevoir des fonds fédéraux.

Tout comme la télévision, l'internet finira par modifier les pratiques politiques dans le monde entier. Il est toutefois impossible de prévoir quand l'impact se fera sentir sur la vie politique des autres pays. Souvenons-nous en effet qu'au Mexique, pays voisin des États-Unis, le plein impact de la télévision sur la vie politique ne s'est fait sentir que cette année.

Internet and the policy:

All will feel of them L ' impact

Just like television since 1956, L ' impact which Internet in the United States has known for this year will reach one day the majority of the countries of the world and will contribute has to modify the political panorama. It N ' is not too early to wonder how.

If one sticks to the figures, the Internet does not make yet the weight vis-a-vis television. The number D ' American which looked at the first debate between Al Gore and George Bush counted of tens of million, whereas the number of people who visited the sites of the candidates at the same time did not exceed the hundreds of thousands. However, L ' impact D ' Internet is real and it is measured on several levels:

▶ L ' interactivity and the logic of network specific to Internet are gaining ground. One N ' simply uses more the fabric as instrument of propaganda, to communicate the positions of the parties. The candidates have a "true strategy Internet". The network became a fundamental instrument for L ' organization of the militants and to collect funds.

▶ The citizens S ' organize, and those which wish to obtain information on the candidates, the parties, and all the significant subjects can find them on independent sites. Those are particularly interesting when they make it possible to know D ' où come the funds used in each countryside.

▶ Coherent with their position favorable to the economic neoliberalism, the majority of people of the point-coms are in favour of the republican candidate, George Bush (75%, against 38% in favour D ' Al Gore). The data-processing lobby has force more and more. Its participation in the financing of the campaigns of the two principal parties has triplet since the last presidential elections.

▶ This year, the democrats D ' Arizona could take part in the primary educations as a voter "since" their PC. This

phenomenon should be even more significant in 4 years. But, no one cannot be unaware of two problems qu ' implies such a practice: the safety and confidentiality of the vote, on the one hand, and the fact, on the other hand, that to vote by the Internet richest - more likely D support ' to have access to a computer - and would thus enable them D ' to increase their participation in the poll.

Two minor experiments and quickly controlled by the authorities attracted L ' attention on the probable appearance of unexpected consequences related to the development of technologies of L ' information:

▶ Most curious is perhaps the attempt D ' to buy voices on the Internet invented by a student, creator of the VoteAuction.com site. The authorities obliged it to close the site and it now affirms qu ' it S ' acted D ' a joke of which the goal was to show excesses of "L ' electoral industry". But one cannot be unaware of the possibility that D ' different try to copy the mechanism at other ends.

▶ The second experiment is more interesting parce than its illegality N ' was not shown yet (even if several sites ceased D ' offering this service following the pressures exerted by the Californian authorities). It S ' acts of the attempt at NaderTrader.org - inter alia - D ' to organize an exchange of voice between the partisans of Gore and Nader. Those which prefer Nader would vote for Gore in the states où the democrat needs all the voices for S ' to impose, and n the other hand, the partisans of Gore would vote for Nader in the states où Bush is sure to gain. L ' objective is to make it possible Gore to gain the presidential one and Nader to gather the 5% of voices necessary to the ecologists to be recognized and to receive federal funds.

Just like television, the Internet will end up modifying the political practices in the whole world. It is however impossible to envisage when L ' impact will be felt on the political life of the other countries. Let us remember indeed qu ' in Mexico, country close to the United States, the full impact of television on the political life S ' is made feel only this year.

Internet et la politique:

Tous en ressentirons l'impact

Tout comme la télévision à partir de 1956, l'impact que connaît internet aux États-Unis depuis cette année atteindra un jour la plupart des pays du monde et contribuera à modifier le panorama politique. Il n'est pas trop tôt pour se demander de quelle façon.

Si on s'en tient aux chiffres, l'internet ne fait pas encore le poids face à la télévision. Le nombre d'Américains qui ont regardé le premier débat entre Al Gore et George Bush se comptait en dizaines de millions, alors que le nombre de personnes qui visitaient les sites des candidats au même moment ne dépassait pas les centaines de milliers. Pourtant, l'impact d'internet est réel et il se mesure à plusieurs niveaux:

► L'interactivité et la logique de réseau propres à internet sont en train de gagner du terrain. On n'utilise plus la toile simplement comme instrument de propagande, pour communiquer les positions des partis. Les candidats ont une «véritable stratégie internet». Le réseau est devenu un instrument fondamental pour l'organisation des militants et pour recueillir des fonds.

► Les citoyens s'organisent, et ceux qui souhaitent obtenir

des informations sur les candidats, les partis, et tous les sujets importants peuvent les trouver sur des sites indépendants. Ceux-ci sont particulièrement intéressants lorsqu'ils permettent de savoir d'où proviennent les fonds utilisés dans chaque campagne.

- ▶ Cohérents avec leur position favorable au néo-libéralisme économique, la plupart des gens des point-coms sont en faveur du candidat républicain, George Bush (75%, contre 38% en faveur d'Al Gore). Le lobby informatique a de plus en plus de force. Sa participation au financement des campagnes des deux principaux partis a triplé depuis les dernières élections présidentielles.

- ▶ Cette année, les démocrates d'Arizona ont pu participer aux primaires en votant "depuis" leur PC. Ce phénomène devrait être encore plus important dans 4 ans. Mais, nul ne peut ignorer les deux problèmes qu'il implique une telle pratique: la sécurité et la confidentialité du vote, d'une part, et le fait, d'autre part, que voter par l'internet favorise les plus riches - plus susceptibles d'avoir accès à un ordinateur - et leur permettrait donc d'accroître leur participation au scrutin.

Deux expériences mineures et rapidement contrôlées par les autorités ont attiré l'attention sur la probable apparition de conséquences inattendues liées au développement des technologies de l'information:

- ▶ La plus curieuse est peut-être la tentative d'acheter des voix sur l'internet inventée par un étudiant, créateur du site **VoteAuction**.com. Les autorités l'ont obligé à fermer le site et il affirme maintenant qu'il s'agissait d'une plaisanterie dont le but était de démontrer les excès de "l'industrie électorale". Mais on ne peut pas ignorer la possibilité que d'autres essayent de copier le mécanisme à d'autres fins.

- ▶ La deuxième expérience est plus intéressante parce que son illégalité n'a pas encore été démontrée (même si plusieurs sites ont cessé d'offrir ce service suite aux pressions exercées par les autorités californiennes). Il s'agit de la tentative de NaderTrader.org - entre autres - d'organiser un échange de voix entre les partisans de Gore et de Nader. Ceux qui préfèrent Nader voteraient pour Gore dans les états où le démocrate a besoin de toutes les voix pour s'imposer, et en contrepartie, les partisans de Gore voteraient pour Nader dans les états où Bush est sûr de gagner. L'objectif est de permettre à Gore de remporter la présidentielle et à Nader de rassembler les 5% de voix nécessaires aux écologistes pour être reconnus et recevoir des fonds fédéraux.

Tout comme la télévision, l'internet finira par modifier les pratiques politiques dans le monde entier. Il est toutefois impossible de prévoir quand l'impact se fera sentir sur la vie politique des autres pays. Souvenons-nous en effet qu'au Mexique, pays voisin des États-Unis, le plein impact de la

télévision sur la vie politique ne s 'est fait sentir que cette année.

THE CMYK - CULTURE JAMMING, HACKTIVISM, URBAN-, GUERRILLA AND MEDIA ART FESTIVAL
1. - 3. APRIL 2004 - BERLIN, TORSTRASSE

DONNERSTAG, 01. APRIL 2004

REBOOT.FM >>> 15 - 17 Uhr >>> fforming audio resistance

REBEL:ART FM

1 h mit **Chloé** (Paris) und **Sum1** (Berlin): Illegal Audio Art & Live-Performance

1 h mit mit **Volker von Choltiz** (Feiern Crew) und **Jiri Hönes** (Heckengäu)

CLUB DER POLNISCHEN VERSAGER >>> ab 15 Uhr >>> fforming a new medium

REBEL:ART CONNECTS

Vernissage mit **Christian Keinstar** (Köln), **Antonio Riello** (Milano), **Robert Praxmarer** (Linz),
Federico Bucalossi (Florenz). Musikalische Untermalung: **Feiern Crew** (Heckengäu)

CLUB DER POLNISCHEN VERSAGER >>> 17.30 - 19.30 Uhr >>> fffighting with words

Die Geschichte von der Kapitalismusmaschine und dem alten Mann

Mit **kapitalismusmaschine/isidor** (Berlin)

"Die Geschichte von der Kapitalismusmaschine und dem alten Mann" ist ein interaktives Videomanifest für eine lebenswertere Welt. Als Ausgangspunkt wird der aktuelle Ist-Zustand der Gesellschaft im kapitalistischen System mit seinen scheinbaren Früchten und Tücken gezeigt. Und dann? Dann folgen via Videoclip 6 Aktionen die dem bunten kapitalistischen Drumherum Realutopisches entgegensetzen. Damit ist gemeint: Das ist unsere Welt. Wir können sie verändern und wir fangen heute damit an. Alle Punkte stellen Aufrufe zu konkreten Handlungsmöglichkeiten innerhalb des Systems und über es hinaus dar. Keine endgültigen Lösungen werden hierbei angeboten sondern Spielräume eröffnet und Technologien des kulturellen Widerstandes angeboten. Isidors Realutopie wird so für jeden lebbar und die wahre Geschichte beginnt vielleicht erst nach dem Betrachten des Projekts, weit entfernt von Isidor... Isidor, Berlin sind: Pamela Büttner, Agathe Gorocz, Maria Johanna Ochsenhofer, Mark Perleberg und Martin Schaffner.

KAFFEE BURGER >>> ab 20 Uhr >>> fforming audio resistance

HITLER KEBAP, KARAOKE & ROCK'N ROLL

20.30 LESUNG: **Serdar Somuncu: „Hitler Kebap! Heute Döner, morgen die ganze Welt - Serdar Somuncu liest aus seinen Büchern"**

1996 tourte Somuncu mit einer spektakulären Lesung aus Adolf Hitlers „Mein Kampf“ durch Europa. Im September 2000 startete Somuncu mit einer weiteren Lesung: Unter dem Titel „Wollt ihr den totalen Krieg“ liest er Ausschnitte aus der berühmt berüchtigten Rede des Reichspropagandaministers Joseph Goebbels. Somuncu gibt im Kaffee Burger einen Querschnitt seines künstlerischen Schaffens zum Besten.

22.00 LIVE MUSIK: **discoteca flamingstar** (glamorous hardcore karaoke)

23.00 LIVE MUSIK: **madmen's night affair** (funkadelic rock)

23.30 PARTY: Die **Burger-DJ-Crew** spielt zum Tanz auf.

BLACKBOX >>> ab 00 Uhr >>> fforming audio resistance

AFTER RIOT LOUNGE

Mit **Externe Speichereinheit** (Berlin) und **Feiern Crew** (Heckengäu)

FREITAG, 02. APRIL 2004

CLUB DER POLNISCHEN VERSAGER >>> 15 - 17 Uhr

SUBVERTISING WORKSHOP

Mit Stephan / **Camp Kleister**, Berlin - bitte anmelden: rebelart@onreact.com

Subvertising ist eine Art von kulturellem Widerstand. Angegriffen werden die Symbole eines Systems, dass versucht alle Bereiche des Lebens für den Verkauf von Produkten zu instrumentalisieren. Der Schlüsselprozess des Subvertisements ist die Rückeroberung des von der Werbung besetzten Raumes. Die unterschiedlichen Wege, die gegangen werden können, um in diesem Bereich Systemkritik zu üben, sind das Thema des Workshops. Die Ergebnisse des Workshops werden unter anderem auf der Internetseite: www.subvertisement.info veröffentlicht.

OUTDOOR >>> 15 - 17 Uhr

DERIVE WORKSHOP

mit **Claudia Basrawi** (Psychogeographin / Gruppe M, Berlin) - bitte anmelden: rebelart@onreact.com

CLUB DER POLNISCHEN VERSAGER >>> 17 - 20 Uhr >>> fighting for freedom

THE FUTURE OF ELECTRONIC RESISTANCE: HACKTIVISM AND COPYRIOT

Filme, Open Space, Illegal Audio und Diskussion

Tatiana Bazzichelli (AHA, Rom)

Federico Bucalossi (Nothuman, Florenz)

Sebastian Luetgert (textz.com, Berlin)

Seamus O' Donnell (NoisiV, T.O.B., Salon Bruit, Berlin)

Tina Lorenz (Haecksen / CCC, Berlin)

BAIZ >>> 20 - 22 Uhr >>> demolish serious culture

VA BANQUE!

Filme, Diskussion mit **Initiative Berliner Bankenskandal**

"Va Banque!" (20 min) ist ein Doku-Drama über die Chronik des Bankenskandals. "Rettet Berlin!" (3 min) ist der Spot "Initiative Berliner Bankenskandal goes Goethe".

CLUB DER POLNISCHEN VERSAGER >>> 20.30 - 22 Uhr >>> demolish serious culture

BRENER & SCHURZ: TEXTE GEGEN DIE KUNST

Alexander Brener und **Barbara Schurz** lesen neue Texte und Poems für und wider die Kunst.

CLUB DER POLNISCHEN VERSAGER >>> 22 - 00 Uhr >>> demolish serious culture

NEOISM NOW AND THEN!

Mit **Florian Cramer** und **Monty Cantsin** - u.a. eine experimentelle Telefonkonferenz mit amerikanischen Neoisten wie TENTATIVELY, a cONVENIENCE etc.

CLUB DER POLNISCHEN VERSAGER ab 23 >>> fiction follows form

VISUAL EXPLORER 001

Cut-Ups mit **Daniel Kulla** (Systemausfall, Berlin) und **271** (Berlin)

CLUB DER POLNISCHEN VERSAGER >>> 20.15 - 22 Uhr >>> ffighting with words

Extremboutique Nagy / die guten Atmosphären

Mit **monochrom** (Wien)

// den letzten Jahren entwickelte sich in vielen geisteswissenschaftlichen Disziplinen die Erforschung und Diskussion von „Atmosphären“, verstanden als die emotionale Wahrnehmung sinnlicher Ereignisse und Ereignisräume. PhilosophInnen, KulturtheoretikerInnen, KommunikationswissenschaftlerInnen, ArchitektInnen, Stadt- und RaumplanerInnen, KünstlerInnen, AusstellungsmacherInnen und viele mehr haben wichtige Beiträge zu diesem Diskurs geliefert. monochrom hat diese Stimmen gesammelt, gesichtet, ausgewertet, durcheinandergewürfelt und die Ernte zu einer abendfüllenden Powerpointoperette fusioniert, die zwingend um 20:15 zu beginnen hat: Das Ergebnis ist ein 90-minütiges Restessen aus Powerpointeinspielungen, Livemusik (und wir meinen: Livemusik!), Installation, Klangwolke, Medienkritik (incl. Kritik-der-Medienkritik und deren Kritik), Bildungsroman, Gala, Archäologie, Diskurskritik (incl. Kritik-der-Diskurskritik und deren Kritik) und ordentlich Schmerz bzw. Schmelz. Simultan-Phänomenologie, Geschwür und ein Ballett der Ränder. Die geradebrechte Geballtheit ist indes nur ein stummer Schrei nach Liebe zum Detail.

ZURMÖBELFABRIK >>> ab 21 Uhr >>> electronic resistance II

ELECTRO RIOT LOUNGE

(((controller-band. : (((controller-beat. (Berlin)

(((controller-beat. ist das jüngste einer Reihe von Projekten: Joysticks und andere Computerspielcontroller werden als Steuergeräte zur Bedienung von Musiksoftware benutzt. Die Verwendung dieser Geräte in Verbindung mit einem dafür entwickelten Softwareinterface ermöglicht es live zu improvisieren, ohne zu Hilfenahme von Bildschirm, Maus und Tastatur. Es ist also möglich die Musik intuitiv und als Gesamtheit zu steuern. (((controller-beat. ist nun die Erweiterung dieser Controller-Idee auf den tanzbaren Bereich, wobei (((controller-beat. nicht als Band mit festen Spielern zu verstehen ist, sondern eher als Vorrichtung, an welcher unterschiedliche Spieler improvisieren können. (((controller-band. sind michael wilhelmi und thomas kusitzky aus Berlin: Info

Fortransit - Fortran 1.0 (Zürich)

Fortransit is an automatic coding system for the IBM 650 data processing system by superimposing a translator on the compiler developed at the Carnegie Institute of Technology. Fortransit makes available to 650 users the language of Fortran. Fortran, a language developed for the IBM 704, closely resembles the language of mathematics; it was designed primarily for scientific and engineering computation.

Christian Keinstar - Laptop live (Köln)

Christian Keinstar macht schon seit Jahren Laptop Art & Audio. Seine live-Shows sind ein experimenteller Augen- und Ohrenschaus.

Federico Bucalossi - Nothuman (Florenz)

Bucalossi präsentiert sein neues Projekt Nothuman - Net.Art und Media Art Installationen

flyer soziotope - rebelflyers united (Berlin)

Das Flyer Soziotope präsentiert eine kleine Auswahl internationaler rebel:flyer

nicolas-bourbaki VJ Crew (Berlin/FFM)

Die nicolas-bourbaki VJ Crew aus Berlin und Frankfurt wird auch dieses Mal wieder eine VJ-Show der Extraklasse präsentieren.

Robert Praxmarer - t(error) (Linz)

Robert Praxmarer, Mitglied des ars electronica futurelab, präsentiert seine interaktive Videoinstallation

Oliver Schneider - CasualHero (Berlin)

Oliver Schneider stellt Arbeiten aus seiner neuen Fotoserie "CasualHero" aus.

REBEL:ART CONNECTS

Vernissage mit Christian Keinstar (Köln), Antonio Riello (Milano), Robert Praxmarer (Linz), Federico Bucalossi (Florenz). Musikalische Untermalung: Feiern Crew (Heckengäu)

CLUB DER POLNISCHEN VERSAGER >>> 17.30 - 19.30 Uhr >>> ffighting with words

Die Geschichte von der Kapitalismusmaschine und dem alten Mann

Mit kapitalismusmaschine/isidor (Berlin)

"Die Geschichte von der Kapitalismusmaschine und dem alten Mann" ist ein interaktives Videomanifest für eine lebenswertere Welt. Als Ausgangspunkt wird der aktuelle Ist-Zustand der Gesellschaft im kapitalistischen System mit seinen scheinbaren Früchten und Tücken gezeigt. Und dann? Dann folgen via Videoclip 6 Aktionen die dem bunten kapitalistischen Drumherum Realutopisches entgegensetzen. Damit ist gemeint: Das ist unsere Welt. Wir können sie verändern und wir fangen heute damit an. Alle Punkte stellen Aufrufe zu konkreten Handlungsmöglichkeiten innerhalb des Systems und über es hinaus dar. Keine endgültigen Lösungen werden hierbei angeboten sondern Spielräume eröffnet und Technologien des kulturellen Widerstandes angeboten. Isidors Realutopie wird so für jeden lebbar und die wahre Geschichte beginnt vielleicht erst nach dem Betrachten des Projekts, weit entfernt von Isidor... Isidor, Berlin sind: Pamela Büttner, Agathe Gorocz, Maria Johanna Ochsenhofer, Mark Perleberg und Martin Schaffner.

KAFFEE BURGER >>> ab 20 Uhr >>> fforming audio resistance

HITLER KEBAP, KARAOKE & ROCK'N ROLL

20.30 LESUNG: Serdar Somuncu: „Hitler Kebap! Heute Döner, morgen die ganze Welt - Serdar Somuncu liest aus seinen Büchern"

1996 tourte Somuncu mit einer spektakulären Lesung aus Adolf Hitlers „Mein Kampf“ durch Europa. Im September 2000 startete Somuncu mit einer weiteren Lesung: Unter dem Titel „Wollt ihr den totalen Krieg“ liest er Ausschnitte aus der berühmt berüchtigten Rede des Reichspropagandaministers Joseph Goebbels. Somuncu gibt im Kaffee Burger einen Querschnitt seines künstlerischen Schaffens zum Besten.

22.00 LIVE MUSIK: discoteca flamingstar (glamorous hardcore karaoke)

23.00 LIVE MUSIK: madmen's night affair (funkadelic rock)

23.30 PARTY: Die Burger-DJ-Crew spielt zum Tanz auf.

FREITAG, 02. APRIL 2004

CLUB DER POLNISCHEN VERSAGER >>> 15 - 17 Uhr

SUBVERTISING WORKSHOP

Mit Stephan / Camp Kleister, Berlin - bitte anmelden: rebelart@onreact.com

Subvertising ist eine Art von kulturellem Widerstand. Angegriffen werden die Symbole eines Systems, dass versucht alle Bereiche des Lebens für den Verkauf von Produkten zu instrumentalisieren. Der Schlüsselprozess des Subvertisements ist die Rückeroberung des von der Werbung besetzten Raumes. Die unterschiedlichen Wege, die

gegangen werden können, um in diesem Bereich Systemkritik zu üben, sind das Thema des Workshops. Die Ergebnisse des Workshops werden unter anderem auf der Internetseite: www.subvertisement.info veröffentlicht.

OUTDOOR > > > 15 - 17 Uhr

DERIVE WORKSHOP

mit Claudia Basrawi (Psychogeographin / Gruppe M, Berlin) - bitte anmelden: rebelart@onreact.com

CLUB DER POLNISCHEN VERSAGER >>> 17 - 20 Uhr >>> fffighting for freedom

Extremboutique Nagy / die guten Atmosphären

Mit monochrom (Wien)

// den letzten Jahren entwickelte sich in vielen geisteswissenschaftlichen Disziplinen die Erforschung und Diskussion von „Atmosphären“, verstanden als die emotionale Wahrnehmung sinnlicher Ereignisse und Ereignisräume. PhilosophInnen, KulturtheoretikerInnen, KommunikationswissenschaftlerInnen, ArchitektInnen, Stadt- und RaumplanerInnen, KünstlerInnen, AusstellungsmacherInnen und viele mehr haben wichtige Beiträge zu diesem Diskurs geliefert. monochrom hat diese Stimmen gesammelt, gesichtet, ausgewertet, durcheinandergewürfelt und die Ernte zu einer abendfüllenden Powerpointoperette fusioniert, die zwingend um 20:15 zu beginnen hat: Das Ergebnis ist ein 90-minütiges Restessen aus Powerpointeinspielungen, Livemusik (und wir meinen: Livemusik!), Installation, Klangwolke, Medienkritik (incl. Kritik-der-Medienkritik und deren Kritik), Bildungsroman, Gala, Archäologie, Diskurskritik (incl. Kritik-der-Diskurskritik und deren Kritik) und ordentlich Schmerz bzw. Schmelz. Simultan-Phänomenologie, Geschwür und ein Ballett der Ränder. Die geradebrechte Geballtheit ist indes nur ein stummer Schrei nach Liebe zum Detail.

ZURMÖBELFABRIK >>> ab 21 Uhr >>> electronic resistance II

ELECTRO RIOT LOUNGE

(((controller-band. : (((controller-beat. (Berlin)

(((controller-beat. ist das jüngste einer Reihe von Projekten: Joysticks und andere Computerspielcontroller werden als Steuergeräte zur Bedienung von Musiksoftware benutzt. Die Verwendung dieser Geräte in Verbindung mit einem dafür entwickelten Softwareinterface ermöglicht es live zu improvisieren, ohne zu Hilfenahme von Bildschirm, Maus und Tastatur. Es ist also möglich die Musik intuitiv und als Gesamtheit zu steuern. (((controller-beat. ist nun die Erweiterung dieser Controller-Idee auf den tanzbaren Bereich, wobei (((controller-beat. nicht als Band mit festen Spielern zu verstehen ist, sondern eher als Vorrichtung, an welcher unterschiedliche Spieler improvisieren können. (((controller-band. sind michael wilhelmi und thomas kusitzky aus Berlin: Info

Fortransit - Fortran 1.0 (Zürich)

Fortransit is an automatic coding system for the IBM 650 data processing system by superimposing a translator on the compiler developed at the Carnegie Institute of Technology. Fortransit makes available to 650 users the language of Fortran. Fortran, a language developed for the IBM 704, closely resembles the language of mathematics; it was designed primarily for scientific and engineering computation.

Christian Keinstar - Laptop live (Köln)

Christian Keinstar macht schon seit Jahren Laptop Art & Audio. Seine live-Shows sind ein experimenteller Augen- und Ohrenschaus.

Federico Bucalossi - Nothuman (Florenz)

Bucalossi präsentiert sein neues Projekt Nothuman - Net.Art und Media Art Installationen

flyer soziotope - rebelflyers united (Berlin)

Das Flyer Soziotope präsentiert eine kleine Auswahl internationaler rebel:flyer

nicolas-bourbaki VJ Crew (Berlin/FFM)

Die nicolas-bourbaki VJ Crew aus Berlin und Frankfurt wird auch dieses Mal wieder eine VJ-Show der Extraklasse präsentieren.

Robert Praxmarer - t(error) (Linz)

Robert Praxmarer, Mitglied des ars electronica futurelab, präsentiert seine interaktive Videoinstallation

Oliver Schneider - CasualHero (Berlin)

Oliver Schneider stellt Arbeiten aus seiner neuen Fotoserie "CasualHero" aus.

Aktivismus a různé formy angažovaného umění na internetu

slovníček: aktivismus

diskuse na bloggeru <http://kyberumeni.blogspot.com/....>

1) typická antiglobalizační hnutí: strategie

<http://www.mcspotlight.org/>

<http://www.eco.utexas.edu/faculty/Cleaver/zapsincyber.html>

<http://www.spunk.org/>

<http://www.peta.org/>

2) (dez)informační aktivismus

Záměrné tvoření šumu jako typ práce s (dez)informacemi a veřejností je nejen účinnou strategií ochrany soukromí, ale také celkem oblíbenou strategií aktivistických skupin, jako je "Úřad pro umění a technologie vlády Spojených Států" (US Department of Art and Technology) ěili <http://www.usdept-artech.net/> a jejich iniciativa - "Globální Virtualizační Rada" (Global Virtualization Council) a "Berlínská virtualizační charta" (Berlin Virtualization Charter), kterou podepsalo 9 vyslanců, mezi ostatními také ěeská umilkyni Petra Vargová za ěR. Tato rada má za cíl mobilizovat a mezinárodní koordinovat umilké síly virtualizace, totiž pohyb aktivistických, hyper - medializovaných a utopistických ideologií, a chránit práva umilků na kreativní svobodu bez ohledu na disciplinu, medium, rod nebo identitu (9 ělánků, paragrafy a, b a c)... Celá ěeě a webové stránky této skupiny jsou dokonalou ukázkou parodie na politické a oficiální ěeěi a obraty, které vlastni nic neěkají, ale jenom prezentují urěitou autoritu a moc.

Aktivisté využívají PR strategií velkých korporací a tento "newspeak" byrokratických struktur a politických stran, k vlastním, většinou parodickým zájmům. Mystifikují tím veřejnost, ale také zesmění samotné pědstavitelě moci a podobni váž ných politických diskursů.

Dobrým pěíkladem je také konspirační aktivismus Konrada Beckera, ěeditelě organizace Public Netbase Vienna, který pědstavil projekt www.World-Information.org. V dokonalěm vzhledu managera s bílou košilí a kravatou na festivalech pědvádí, jak vypadá "vymývání mozku" a jak snadno pěijímáme autoritu urěitých ěeěi, které napodobují formu politických a oficiálních proslovů ěi televizních zpráv. Po podobné lekci kaŹ dý musí uznat, Ź e není věbec snadné rozeznat manipulaci veřejného mínění od pouhého informování.

K mediálnímu aktivismu ěadíme také organizace, které bojují pěimo proti marketingovým a PR strategiím různých korporací pomocí internetu a ostatních médií. Cílem je zasáhnout samotný image korporací, buě pomocí tiskových zpráv a různých PR akcí nebo jednoduě tím, Ź e se napodobí jejich stránky a změní obsah. Zvláště úspěšná je v tomto komplexnějším typu mediálního aktivismu skupina, www.RtMark.com. Tato "investorská spoleěnost" a "korporace" nabízí podporu pro nejrůznnější projekty, které mají za cíl nabourat image velkých korporací. RtMark používá stejné strategie, jakě jsou pro podobné korporace biŹ né, totiž vytváěení různých fondů, PR akce v podobě podpory různých umilků a projektů, psaní tiskových zpráv. Tyto techniky moci ověem obrací proti samotným korporacím. Podle mediálního úspěchu RtMarku můŹ eme soudit, Ź e je tato strategie velmi účinná. Napěíklad podporovaný projekt z roku 1993, který provedla Organizace za vysvobození panenky Barbie (Barbie Liberation Organization) měl velký ohlas v médiích. Tato organizace vyměnila zvukové ěipy panenky Barbie a vojáka G.I. Joe, takŹ e Barbie vyhrůŹ ovala zabitím zatímco militantní panenka G.I. Joe pobízela k nákupům. Známá se také stala kauza kolem doměny etoy.com, kterou vlastnila umilká skupina Etoy a na kterou si dělalo nárok největší hraěkáěství na internetu, spoleěnost

etoys.com (v únoru 2001 zkrachovali). Po řadě soudních sporů se zdálo, že Etoy ztratí svoji doménu, ale RtMarku se podařilo tomu zabránit řadou PR akcí, tiskových zpráv a také hackerských útoků na stránky etoys.com. Z jejich novějších projektů bychom měli zmínit stránku www.voteauction.com (<http://62.116.31.68/>), která umožňuje voličům prodat svůj hlas velkým korporacím. Právě tuto stránku uvádil jako vzor demokratizačních a liberalizačních procesů člen skupiny "Yes Men" (odnož RtMarku), který se infiltroval jako zástupce Světové obchodní organizace na Konferenci právníků zabývajících se mezinárodním právem (Center for International Legal Studies) v Salzburgu v říjnu 2000. Svým neuvěřitelným projevem a power point prezentací, v které kromě prodávání hlasů také hlásal, že se musí změnit špatná pracovní morálka Italů, která zpomaluje růst globalizace, nezbudil ani nejmenší podezření. Nikoho ani nenapadlo, že přednášející nezastupuje Světovou Banku, jak se domnívali, ale organizaci, která "mluví jménem Světové banky mnohem úpěimněji než to dílá samotná Světová banka". Z celé události existuje i video záznam, který skupina ukazovala při své pražské návštěvě a který je skutečnou ukázkou netečnosti a hlouposti podobných konferencí, ale také smutným dokladem o tom, jak lidé, kteří mají rozhodovat za svět neumí samostatně myslet. K záměni došlo díky stránkám, které pro skupiny "Yes Men" vytvořil RtMark na adrese <http://www.gatt.org/>. Tyto stránky používají v názvu starou zkratku pro Světovou obchodní organizaci a na první pohled vypadají tak přesvědčivě, že dostali pozvánku na Konferenci právníků o mezinárodních službách v Salzburgu.

TheYesMen <http://theyesmen.org/> vyvinula dokonalou strategii podobných manipulací a parodií. TheYesMen "převlečení" za zástupce Světové banky nyní často dílají podivné semináře po celém světě, které pak natáčí na video, aby ukázali, jak nebezpečné a bizarní teorie jsou lidé schopni přijmout jen proto, že to pronášejí "zástupci" Světové Banky. Jejich posledním velkým úspěchem byla přednáška ve Finsku pro profesionály z textilního průmyslu, kterou promítali na Transmediale.02. Ve Finsku vystoupil "zástupce" Světové Banky, Hank Hardy Unruh, s dlouhou řečí o výhodách otroctví a hlouposti Gandhiho, aby se pak nečekání svlékl a přítomným předvedl tzv. "manažerský oblek pro volný čas (management leisure suit). Tento oblek budoucnosti, který má upevnit vztahy mezi vedením společnosti a dělníky, představuje přílišná zlatý kostým, ke kterému je připojen metrový nafukovací falus. Přes něj manažer komunikuje s dělníky, kteří mají umístěné čipy v mozku. Tato naprosto bizarní přednáška a komické ukázky obleku samozřejmě vyvolaly potlesk nic netušících zástupců textilního průmyslu ve Finsku, kterým to nejspíš nepřišlo vůbec divné.

Mezi podobné skupiny, kterým se daří parodovat celé organizace a korporace, patří i <http://www.happyclown.com/>, kteří se také tváří jako PR společnost a arodují hlavní některé nápady velkých korporací nebo jejich editore tím, že každý měsíc jednoho z nich překreslí na klauna. V podobném duchu jsou také stránky <http://www.thecorporation.com/>, které parodují jazyk, styl psaní a způsob komunikace velkých korporací.

Podobný typ aktivismu se stále více podobá umělecké performanci na veřejném prostoru než politickému protestu. Dokládá to i skupina "Herci před průmyslovou kamerou" Surveillance Camera Players <http://www.surveillancecameraplayers.org/> nebo <http://www.notbored.org/the-scp.html>. Tato skupina protestuje proti špehujícím kamerám, které narušují soukromí lidí na všech veřejných místech a připravují pro ni speciální performance a divadelní představení. Tyto krátké hry jsou podobné starým němým filmům, protože pozorovací kamery většinou natáčí černo-bílý a velmi nekvalitní obraz bez zvuku. Herci jsou nuceni používat plakáty s nápisy, aby díky vysvětlili jako ve starých filmech. Navíc, plakát je tradičním politickým médiem, a proto se dokonale hodí k heslům typu "1984", "Big brother is watching" (velký bratr tě pozoruje) apod.

Zajímavé, ovšem těžko zařaditelné jsou organizace, které hledají originální způsoby aktivismu, aby získaly mediální pozornost. Jsou to například "Biotic Baking Brigade" (Biotická brigáda pekařů) na <http://www.asis.com/~agit-prop/bbb/>, kteří se specializují na házení různých dortů do oblíbených nepopulárních osobností (je tam i

archiv videí nejúspěšnějších akcí), pak také organizaci "Team 7" <http://www.geocities.com/SoHo/9959/main.html>, kteří jsou známí svými nelegálními stavbami na dálnicích a dalších veřejných místech (urban offensive). Podobně se snaží ovládnout veřejný prostor také stránky <http://www.infiltration.org/>, které popisují způsoby, jak se dostat tam, kam nemáte a kde je to zakázané: jak se infiltrovat do budov a kanceláří velkých společností, drahých hotelů a podobně. U každé kategorie je detailní popis nejen, jak to uděláte, ale také co tím riskujete a odkazy na filmy, kde se můžete podívat na konkrétní příklady. Známe jsou i stránky skupiny "Ruckus" <http://www.ruckus.org/>, které nabízejí manuál a kurzy, jak viset na billboardu nebo jiné komerční stavbě jako tip protestu. Dále pak "Institute of Applied Autonomy" <http://www.appliedautonomy.com/>, kteří se tváří jako výzkumný ústav (Ústav Aplikované Autonomie) vyvíjející umělou inteligenci - roboty. Nejsou to ovšem ledajaké roboty, ale roboti - aktivisté, kteří umí kreslit graffiti nebo jinak agitovat: rozdávat letáky apod. Podobně zaměřené jsou také stránky, které nabízejí počítačové hry, v kterých bojujete proti korporacím a ničíte jejich loga na <http://www.urban75.com/Mag/brand.html> nebo celá řada antikorporačních her na stránkách <http://www.globalarcade.org/>.

Katalog všech možných subverzí je na adrese <http://www.subvertise.org/>, která funguje jako jakýsi portál mediálního aktivismu na internetu, kde jsou jednotlivé projekty zařazeny do kategorií podle konzumního zboží a značek. Ještě obsírnější a zajímavější je katalog nejrůznějších příkladů mediálního a dalšího záškodnictví na stránkách hnutí Idiosyntactix <http://www.syntac.net/hoax/>, a pokud by nikoho zajímali příklady z dějin, pak je tu bohatý archiv na stránkách "Muzea mystifikací a žertů" s adresou <http://www.museumofhoaxes.com>.

Některé skupiny na internetu si pak ani nepřejí být nazývané aktivisté, ale mají vlastní název pro svoje učení, jako je incidentalismus v případě hnutí Idiosyntactix Strategic Arts & Sciences Alliance (Aliance Idiosyntaktických umění a věd) <http://www.syntac.net/>. Incidentalismus není žádný originální objev, vynález nebo umělecký styl, ale revoluční pohled na celé umění. Umění není definované svým předmětem, ale incidentem, náhodným jevem, událostí nebo vedlejšími a nečekanými důsledky. Hodnota incidentu je v tom, že se jedná o moment překvapení, který údajně přináší osvícení. Takto chápané umění proto nevyjadřuje naše vidění, schopnosti nebo nápady, ale spíše naši spontaneitu a otevřenost vůči nečekaným událostem. Na tomto hnutí je také zajímavé tvrzení, že neuznávají intelektuální nebo umělecké vlastnictví ani originalitu. Kromě zmíněného osvícení a resonance, jak nazývají moment sdílení a vzdání se nároku na originalitu a autorství, nemůžeme očekávat žádnou další odměnu. Jejich umění tedy není elitistické, což se snaží dokázat také tím, že svoje umělecké projekty označují za recepty. Cílem je jednoduše připravit prostor pro nečekané a nové efekty.

3) umělecké reflexe na 11.09.2001

- * Anatomie smutku - patriotismus, sentiment, křé, abstrakce
- * Pixelizovaná kritika televizního spektaklu
- * Webové performance a další ikonoklastické reakce na tragedii

Hlavním médiem uměleckého projevu se v prvním období staly překvapivě básně a koláže šířené po internetu, které z větší části představují patriotický a sentimentální křé. Nejlepší ukázkou těchto původních vizuálních a uměleckých projevů, chronologicky uspořádaných podle data, jsou stránky projektu "Proč: Umělecké reakce na útoky na Svitové Obchodní Centrum a Pentagon" (WHY: Art about the attack on the World Trade Center & Pentagon) na <http://www.whyproject.org/>, které vznikly přesně 11. září večer. Většinou jsou to koláže, které recyklují mediální obrazy útoku a zdůrazňují jejich destrukci a hrůzu nebo naopak neutralizují šok patriotickými symboly amerických vlajek, citátů z Bible a výroky typu "United we stay" (Spojení zůstaneme) apod. Záplavu těchto symbolů útichy dobře prezentují stránky projektu "Jeden den" <http://www.altarts.org/OneDay/oneday/index.html>, na kterých se najednou začnou otevírat pop-up okna s fotkami amerických vlajek, které autor za jeden den viděl na ulici, nebo podobný projekt

spojující v java aplikaci americkou vlajku s obrazem Usamy bin Ladina <http://www.a-virtual-memorial.org/memorials/terror/chambers/usobl.html>.

Postupně se dominující obrazy hořících a padajících věží i během několika týdnů přeměňují na symboly, jako je tarotová karta è. 16 (Pád z věž e) nebo Babylonská věž , a také nabývají abstraktní podoby, která vyjadřuje solidaritu s New Yorkem tím, že budovy vidí a promítá do všeho. Například do oken na počítačové obrazovce Macintoshe vytvarované myší, což představuje velice osobní poctu budovi dvojčat (jimpunk z Francie, 25.09.2001 http://www.whyproject.org/images/jimpunk_remember.gif), nebo jako prázdné plochy neexistujících obrázků vyjadřující pocit smutku z jejich zmizení na webové stránce "110901" <http://www.mixedmediaonline.com/091101.html>. Vytváření abstrakcí dvojice budov jako projev pocty představuje celý žánr, což ukazuje i archiv jedné z prvních výstav vinované událostem z 11.září na <http://www.kentlertgallery.org/pages/archives/2.html> nebo projevy lidové tvorivosti, která například spojuje číslo 11 z data s obrazem těchto dvou budov: Melissa Gould na <http://www.megophone.com/wtc.html> nebo podobné dílo francouzské skupiny <http://rebusparis.com/elevenseptember/>. Kromě symbolického významu a snahy vyjádřit poctu obětem, abstraktní reprezentace budov WTC také zdůrazňují jejich krásu a geometrickou dokonalost, jako například dílo Tiia Johannsona "Skyscaper" http://www.a-virtual-memorial.org/memorials/terror/artists/tiia_johannson.htm. Právní na jejich architektonickou dokonalost, která reprezentuje ducha racionality a pokroku západní civilizace apeluje také projekt z Pákistánu, "Art, Architecture, Space" od Asifa R. Naqvi, kterým vyjadřuje svůj nesouhlas s válkou viz <http://www.asifnaqvi.com/> v sekci "Just kidding". V této flashové animaci vidíme různé objektivizující pohledy na budovu WTC spojené s definicemi odborných pojmů z architektury, která má vyjadřovat racionální postoj, a je vlastně naší nejlepší obranou proti iracionalitě terorismu. Tento umělecký projekt má proto v podnázvu vysvětlení, že se jedná o "Interaktivní slovník NYCWTC 911". Tím nám vlastně připomíná, že bychom o této budově měli stále myslet jako o díle fascinující architektury, která tento svět miní k lepšímu, a teprve pak jako o objektu barbarského ničení, s kterým je těžké se vyrovnat. Proti jazyku terorismu, války a ničení je třeba vždy připomínat tento jazyk budování a velikosti lidského ducha, který budova WTC vlastně stále prezentuje. Je velmi dojemné, že podobný projekt oslavující pozitivní hodnoty ducha západní civilizace vznikl právě v Pákistánu, kde bychom očekávali nenávisť a oslavu terorismu. S tragédií jsou spojeny také různé obrazy údajného předpovídání těchto událostí, jak si to o svém díle myslí David Cheung z Kanady http://www.whyproject.org/images/David_Cheung_9-11.htm nebo Charles Burwell ze Spojených států <http://www.911-groundzero.org/wow/gallery/b/burwell.html> či oskenované obrazy na <http://www.geocities.com/aocaamw/wtc.htm> a řada dalších "prorockých" malířů a grafiků. V podobné náladě nejspíše vznikaly i první projevy vdičnosti k hasičům nebo velice slavný obrázek školačky Elizy Gauger, který jednu dobu zaplavil celý New York obrazem sochy svobody jako matky, která brání svoje dítě http://www.whyproject.org/images/Eliza_Gauger_MommyLiberty.html.

Celá tato hysterie a patriotismus postupně mizí až koncem září, kdy se na stránkách projektu "Proè" objevují i první kritické projevy. Události z 11.září jsou najednou v některých elektronických kolážích vnímány i jako trest Ameriky za její údajnou zpupnost, bohatství či podobně. Například obrázek, v kterém jsou dvojčata ironicky zobrazena jako dvě vertikální čáry v symbolu dolaru, které zasáhly letadla (Rakousko, Matthias Klien, 25.09.2001 http://www.whyproject.org/images/matthias_klien_money.gif). Vznikají také první antireklamy, které porovnávají Bin Ladina s novou hračkou pro Američany http://www.whyproject.org/images/Alfredo_Llanos_BinLadenToy.jpg nebo zesměšňují Busha, který se opíje a napodobuje teroristy svým útokem na Afganistan (John Clark, USA, 08.10.2001, http://www.whyproject.org/images/John_Clark_Monkey.jpg) či nosí knížku, z které se učí "Terorismus pro začátečníky" (v doslovném překladu "terorismus pro blběky"). Provokativní interpretaci celého útoku nabízí i koláž , která budovy a letadla zobrazuje jako falusy, čili náražní a "patriarchální" a militantní charakter celého konfliktu. Je to celé prostě o pár primitivních

chlapů, kteří si to potřebují rozdat, aby se vidělo, kdo je nejsilnější: Brad Warner <http://electricfuckingeels.com/polemic/warner.html?Submit=I+agree> Velkou sbírku těchto původních reakcí na teroristické útoky nabízí kromě <http://www.whyproject.org/> a <http://www.911-groundzero.org/> také stránky <http://www.theartproject.net/> nebo <http://www.a-virtual-memorial.org/>. Tyto původní reakce představují jakousi anatomii šoku a smutku. Od původní nenávisti a strachu se lidé postupně léčili pomocí spirituálních motivů andělů a Bible nebo pomocí abstrakce, která vede k "zvícnině" bolesti, až postupně se dobrali k ironii a humoru. Na těchto původních uměleckých projevech je třeba zdůraznit také bezprecedentní propojení starých a nových médií. Na stránkách dominuje množství naskenovaných obrazů, ale i koláže, a už přímo vytvořených pomocí Photoshopu nebo také naskenovaných. V každém případě jsou to díla statická a používají internet pouze jako distributivní médium. Teprve v dalším období vznikají flashové a dynamické prezentace, které se snaží plně využít možnosti nových médií.

kritika médií

Chris Csikszentmihalyi "Afghan Explorer" http://compcult.media.mit.edu/afghan_x/
John Klima "Great Game" at <http://www.cityarts.com/greatgame>

pixelizovaná kritika médií

otázky a úkoly:

1) Podívat se na příklady uvedených aktivistických stránek.

Dovedli byste shrnout jejich strategii?

Najdete na internetu další příklady aktivistických stránek.

Jak se jednotlivá aktivistická hnutí liší mezi sebou (například pravicový a levicový aktivismus na webu)?

Odpovědit v Bloggeru buď vlastním příspěvkem nebo komentářem k cizímu příspěvku.

2) Ěm se (dez)informační a mediální aktivismus liší od běžného aktivismu?

Jaká je funkce umění v uvedených projektech?
Myslíte si, že jsou podobné projekty účinné?

Odpovědit v Bloggeru buď vlastním příspěvkem nebo komentářem k cizímu příspěvku.

3) Jak hodnotíte projekty spojené s 11.09.2001? Je to umění nebo aktivismus?
Kde leží hranice mezi uměním a aktivismem?

Odpovědit v Bloggeru buď vlastním příspěvkem nebo komentářem k cizímu příspěvku.

Aktivismus a různé formy angažovaného umění na internetu

slovníček: aktivismus

diskuse na bloggeru <http://kyberumeni.blogspot.com/....>

1) typická antiglobalizační hnutí: strategie

<http://www.mcspotlight.org/>

<http://www.eco.utexas.edu/faculty/Cleaver/zapsincyber.html>

<http://www.spunk.org/>

<http://www.peta.org/>

2) (dez)informační aktivismus

Záměrné tvoření šumu jako typ práce s (dez)informacemi a veřejností je nejen účinnou strategií ochrany soukromí, ale také celkem oblíbenou strategií aktivistických skupin, jako je "Úřad pro umění a technologie vlády Spojených Států" (US Department of Art and Technology) ěili <http://www.usdept-arttech.net/> a jejich iniciativa - "Globální Virtualizační Rada" (Global Virtualization Council) a "Berlínská virtualizační charta" (Berlin Virtualization Charter), kterou podepsalo 9 vyslanců, mezi ostatními také ěeská umilkyni Petra Vargová za ěR. Tato rada má za cíl mobilizovat a mezinárodní koordinovat umilké síly virtualizace, totiž pohyb aktivistických, hyper - medializovaných a utopistických ideologií, a chránit práva umilků na kreativní svobodu bez ohledu na disciplinu, medium, rod nebo identitu (9 ělánků, paragrafy a, b a c)... Celá ěeě a webové stránky této skupiny jsou dokonalou ukázkou parodie na politické a oficiální ěeěi a obraty, které vlastni nic neěikají, ale jenom prezentují urěitou autoritu a moc.

Aktivisté využívají PR strategií velkých korporací a tento "newspeak" byrokratických struktur a politických stran, k vlastním, vltšinou parodickým zájmům. Mystifikují tím veřejnost, ale také zesměšni samotné pědstavitelě moci a podobni váž ných politických diskursů.

Dobrým pěíkladem je také konspirační aktivismus Konrada Beckera, ěeditelě organizace Public Netbase Vienna, který pědstavil projekt www.World-Information.org. V dokonalěm vzhledu managera s bílou košilí a kravatou na festivalech pěedvádí, jak

vypadá "vymývání mozku" a jak snadno přijímáme autoritu určitých lidí, které napodobují formu politických a oficiálních proslavů či televizních zpráv. Po podobné lekci každému musí uznat, že není vůbec snadné rozeznat manipulaci veřejného mínění od pouhého informování.

K mediálnímu aktivismu patří také organizace, které bojují přímo proti marketingovým a PR strategiím různých korporací pomocí internetu a ostatních médií. Cílem je zasáhnout samotný image korporací, buď pomocí tiskových zpráv a různých PR akcí nebo jednoduše tím, že se napodobí jejich stránky a změní obsah. Zvláště úspěšná je v tomto komplexnějším typu mediálního aktivismu skupina, www.RtMark.com. Tato "investorská společnost" a "korporace" nabízí podporu pro nejrůznější projekty, které mají za cíl nabourat image velkých korporací. RtMark používá stejné strategie, jaké jsou pro podobné korporace běžné, totiž vytváření různých fondů, PR akce v podobě podpory různých umělců a projektů, psaní tiskových zpráv. Tyto techniky moci ovšem obrací proti samotným korporacím. Podle mediálního úspěchu RtMarku můžeme soudit, že je tato strategie velmi účinná. Například podporovaný projekt z roku 1993, který provedla Organizace za vysvobození panenky Barbie (Barbie Liberation Organization) měl velký ohlas v médiích. Tato organizace vymínila zvukové efekty panenky Barbie a vojáka G.I. Joe, takže Barbie vyhrožovala zabitím zatímco militantní panenka G.I. Joe pobízela k nákupům. Známa se také stala kauza kolem domény etoy.com, kterou vlastnila umělecká skupina Etoy a na kterou si dělala nárok největší hráčkářství na internetu, společnost etoys.com (v únoru 2001 zkrachovali). Po řadě soudních sporů se zdálo, že Etoy ztratí svoji doménu, ale RtMarku se podařilo tomu zabránit řadou PR akcí, tiskových zpráv a také hackerských útoků na stránky etoys.com. Z jejich novějších projektů bychom mohli zmínit stránku www.voteauction.com (<http://62.116.31.68/>), která umožňuje voličům prodat svůj hlas velkým korporacím. Právě tuto stránku uvádil jako vzor demokratizačních a liberalizačních procesů člen skupiny "Yes Men" (odnož RtMarku), který se infiltroval jako zástupce Světové obchodní organizace na Konferenci právníků zabývajících se mezinárodním právem (Center for International Legal Studies) v Salzburku v říjnu 2000. Svým neuvěřitelným projevem a power point prezentací, v které kromě prodávání hlasů také hlásal, že se musí změnit špatná pracovní morálka Italů, která zpomaluje růst globalizace, nezbudil ani nejmenší podezření. Nikoho ani nenapadlo, že přednášející nezastupuje Světovou Banku, jak se domnívali, ale organizaci, která "mluví jménem Světové banky mnohem úpěimněji než to dělá samotná Světová banka". Z celé události existuje i video záznam, který skupina ukazovala při své pražské návštěvě a který je skutečnou ukázkou netečnosti a hlouposti podobných konferencí, ale také smutným dokladem o tom, jak lidé, kteří mají rozhodovat za svět neumí samostatně myslet. K záměně došlo díky stránkám, které pro skupinu "Yes Men" vytvořil RtMark na adrese <http://www.gatt.org/>. Tyto stránky používají v názvu starou zkratku pro Světovou obchodní organizaci a na první pohled vypadají tak přesvědčivě, že dostali pozvánku na Konferenci právníků o mezinárodních službách v Salzburku.

TheYesMen <http://theyesmen.org/> vyvinula dokonalou strategii podobných manipulací a parodií. TheYesMen "převlečení" za zástupce Světové banky nyní často dělají podivné semináře po celém světě, které pak natáčejí na video, aby ukázali, jak nebezpečné a bizarní teorie jsou lidé schopni přijmout jen proto, že to pronášejí "zástupci" Světové Banky. Jejich posledním velkým úspěchem byla přednáška ve Finsku pro profesionály z textilního průmyslu, kterou promítali na Transmediale.02.

Ve Finsku vystoupil "zástupce" Světové Banky, Hank Hardy Unruh, s dlouhou řečí o výhodách otroctví a hlouposti Gandhího, aby se pak nečekání svlékl a přítomným předvedl tzv. "manažerský oblek pro volný čas (management leisure suit). Tento oblek budoucnosti, který má upevnit vztahy mezi vedením společnosti a dělníky, představuje přílišný zlatý kostým, ke kterému je připojen metrový nafukovací falus. Přes něj manažer komunikuje s dělníky, kteří mají umístěné čipy v mozku. Tato naprosto bizarní přednáška a komické ukázky obleku samozřejmě vyvolaly potlesk nic netušících zástupců textilního průmyslu ve Finsku, kterým to nejspíš nepřišlo vůbec divné.

Mezi podobné skupiny, kterým se daří parodovat celé organizace a korporace, patří i <http://www.happyclown.com/>, kteří se také tváří jako PR společnost a arodují hlavní

nikteré nápady velkých korporací nebo jejich øeditele tím, že každé mìsíc jednoho z nich øekreslí na klauna. V podobném duchu jsou také stránky <http://www.thecorporation.com/>, které parodují jazyk, styl psaní a způsob komunikace velkých korporací.

Podobný typ aktivismu se stále více podobá umìlecké performanci na veřejném prostoru než politickému protestu. Dokládá to i skupina "Herci øed průmyslovou kamerou" Surveillance Camera Players <http://www.surveillancecameraplayers.org/> nebo <http://www.notbored.org/the-scp.html>. Tato skupina protestuje proti øpehujícím kamerám, které narušují soukromí lidí na všech veřejných místech a øipravují pro ni speciální performance a divadelní øedstavení. Tyto krátké hry jsou podobné starým nímým filmùm, protože pozorovací kamery vùšinou natáèejí èerno-bílý a velmi nekvalitní obraz bez zvuku. Herci jsou nuceni použít plakáty s nadpisy, aby dìj vysvětlili jako ve starých filmech. Navíc, plakát je tradičním politickým médiem, a proto se dokonale hodí k heslùm typu "1984", "Big brother is watching" (velký bratr ti pozoruje) apod.

Zajímavé, ovšem tiž ko zaøaditelné jsou organizace, které hledají originální zpùsoby aktivismu, aby získaly mediální pozornost. Jsou to například "Biotic Baking Brigade" (Biotická brigáda pekaøù) na <http://www.asis.com/~agit-prop/bbb/>, kteøí se specializují na házení různých dortù do oblíbených nepopulárních osobností (je tam i archiv videí nejúspišnějších akcí), pak také organizaci "Team 7" <http://www.geocities.com/SoHo/9959/main.html>, kteøí jsou známí svými nelegálními stavbami na dálnicích a dalších veřejných místech (urban offensive). Podobní se snaží ovládnout veřejný prostor také stránky <http://www.infiltration.org/>, které popisují zpùsoby, jak se dostat tam, kam nemáte a kde je to zakázané: jak se infiltrovat do budov a kanceláøí velkých spoleèností, drahých hotelù a podobní. U každé kategorie je detailní popis nejen, jak to udíláte, ale také co tím riskujete a odkazy na filmy, kde se mùžete podívat na konkrétní øíklady. Známe jsou i stránky skupiny "Ruckus" <http://www.ruckus.org/>, které nabízejí manuál a kurzy, jak viset na billboardu nebo jiné komerèní stavbi jako tip protestu. Dále pak "Institute of Applied Autonomy" <http://www.appliedautonomy.com/>, kteøí se tváøí jako výzkumný ústav (Ústav Aplikované Autonomie) vyvíjející umìlou inteligenci - roboty. Nejsou to ovšem ledajaké roboty, ale roboti - aktivisté, kteøí umíjí kreslit graffiti nebo jinak agitovat: rozdávat letáky apod. Podobní zamìøené jsou také stránky, které nabízejí poèítaèové hry, v kterých bojujete proti korporacím a nièíte jejich loga na <http://www.urban75.com/Mag/brand.html> nebo celá øada antikorporaèních her na stránkách <http://www.globalarcade.org/>.

Katalog všech možných subverzí je na adrese <http://www.subvertise.org/>, která funguje jako jakýsi portál mediálního aktivismu na internetu, kde jsou jednotlivé projekty zaøazeny do kategorií podle konzumního zboží a znaèky. Ještì obšírnější a zajímavější je katalog nejrůznějších øíkladù mediálního a dalšího záškodnictví na stránkách hnutí Idiosyntactix <http://www.syntac.net/hoax/>, a pokud by nikoho zajímali øíklady z dijin, pak je tu bohatý archiv na stránkách "Muzea mystifikací a žertù" s adresou <http://www.museumofhoaxes.com>.

Nikteré skupiny na internetu si pak ani nepøejí být nazývané aktivisté, ale mají vlastní název pro svoje uèení, jako je incidentalismus v øípadì hnutí Idiosyntactix Strategic Arts & Sciences Alliance (Aliance Idiosyntaktických umíní a vidí) <http://www.syntac.net/>. Incidentalismus není žádný originální objev, vynález nebo umìlecký styl, ale revoluèní pohled na celé umíní. Umíní není definované svým øedmìtem, ale incidentem, náhodným jevem, událostí nebo vedlejšími a neèekanými dùsledky. Hodnota incidentu je v tom, že se jedná o moment øekvapení, který údajní øoináší osvícení. Takto chápané umíní proto nevyjadøuje naše vidíní, schopnosti nebo nápady, ale spíše naši spontaneitu a otevøenost vůèi neèekaným událostem. Na tomto hnutí je také zajímavé tvrzení, že neuznávají intelektuální nebo umìlecké vlastnictví èi originalitu. Kromì zmínìného osvícení a resonance, jak nazývají moment sdílení a vzdání se nároku na originalitu a autorství, nemůžeme øekávat žádnou další odminu. Jejich umíní tedy není elitistické, což se snaží dokázat také tím, že svoje umìlecké projekty oznaèují za recepty. Cílem je

jednoduše připravit prostor pro nečekané a nové efekty.

3) umělecké reflexe na 11.09.2001

- * Anatomie smutku - patriotismus, sentiment, kýè, abstrakce
- * Pixelizovaná kritika televizního spektaklu
- * Webové performance a další ikonoklastické reakce na tragedii

Hlavním médiem uměleckého projevu se v prvním období staly překvapivě básně a koláže šířené po internetu, které z větší části představují patrioticky a sentimentální kýè. Nejlepší ukázkou těchto původních vizuálních a uměleckých projevů, chronologicky uspořádaných podle data, jsou stránky projektu "Proč: Umělecké reakce na útoky na Světové Obchodní Centrum a Pentagon" (WHY: Art about the attack on the World Trade Center & Pentagon) na <http://www.whyproject.org/>, které vznikly přesně 11. září večer. Většinou jsou to koláže, které recyklují mediální obrazy útoku a zdůrazňují jejich destrukci a hrůzu nebo naopak neutralizují šok patriotickými symboly amerických vlajek, citátů z Bible a výroky typu "United we stay" (Spojení zůstaneme) apod. Záplavu těchto symbolů útichy dobře prezentují stránky projektu "Jeden den" <http://www.altarts.org/OneDay/oneday/index.html>, na kterých se najednou zaenou otevírat pop-up okna s fotkami amerických vlajek, které autor za jeden den viděl na ulici, nebo podobný projekt spojující v java aplikaci americkou vlajku s obrazem Usamy bin Ládina <http://www.a-virtual-memorial.org/memorials/terror/chambers/usobl.html>.

Postupně se dominující obrazy hořících a padajících věží i během několika týdnů přeměňují na symboly, jako je tarotová karta è. 16 (Pád z věže) nebo Babylonská věž, a také nabývají abstraktní podoby, která vyjadřuje solidaritu s New Yorkem tím, že budovy vidí a promítá do všeho. Například do oken na počítačové obrazovce Macintoshe vytvarované myší, což představuje velice osobní poctu budovi dvojčet (jimpunk z Francie, 25.09.2001 http://www.whyproject.org/images/jimpunk_remember.gif), nebo jako prázdné plochy neexistujících obrázků vyjadřující pocit smutku z jejich zmizení na webové stránce "110901" <http://www.mixedmediaonline.com/091101.html>. Vytváření abstrakcí dvojice budov jako projev pocty představuje celý žánr, což ukazuje i archiv jedné z prvních výstav vinované událostí z 11. září na <http://www.kentlertgallery.org/pages/archives/2.html> nebo projevy lidové tvorivosti, která například spojuje číslo 11 z data s obrazem těchto dvou budov: Melissa Gould na <http://www.megophone.com/wtc.html> nebo podobné dílo francouzské skupiny <http://rebusparis.com/elevenseptember/>. Kromě symbolického významu a snahy vyjádřit poctu obětem, abstraktní reprezentace budov WTC také zdůrazňují jejich krásu a geometrickou dokonalost, jako například dílo Tiia Johannsona "Skyscaper" http://www.a-virtual-memorial.org/memorials/terror/artists/tiia_johannson.htm. Právi na jejich architektonickou dokonalost, která reprezentuje ducha racionality a pokroku západní civilizace apeluje také projekt z Pákistánu, "Art, Architecture, Space" od Asifa R. Naqvi, kterým vyjadřuje svůj nesouhlas s válkou viz <http://www.asifnaqvi.com/> v sekci "Just kidding". V této flashové animaci vidíme různé objektivizující pohledy na budovu WTC spojené s definicemi odborných pojmů z architektury, která má vyjadřovat racionální postoj, a je vlastně naší nejlepší obranou proti iracionalitě terorismu. Tento umělecký projekt má proto v podnázvu vysvětlení, že se jedná o "Interaktivní slovník NYCWTC 911". Tím nám vlastně připomíná, že bychom o této budově měli stále myslet jako o díle fascinující architektury, která tento svět miní k lepšímu, a teprve pak jako o objektu barbarského ničení, s kterým je těžké se vyrovnat. Proti jazyku terorismu, války a ničení je třeba vždy připomínat tento jazyk budování a velikosti lidského ducha, který budova WTC vlastně stále prezentuje. Je velmi dojemné, že podobný projekt oslavující pozitivní hodnoty ducha západní civilizace vznikl právi v Pákistánu, kde bychom očekávali nenávisť a oslavu terorismu. S tragedií jsou spojeny také různé obrazy údajného předpovídání těchto událostí, jak si to o svém díle myslí David Cheung z Kanady http://www.whyproject.org/images/David_Cheung_9-11.htm nebo Charles Burwell ze Spojených států <http://www.911-groundzero.org/wow/gallery/b/burwell.html> èi oskenované obrazy na <http://www.geocities.com/aocaamw/wtc.htm> a řada

dalších "prorockých" malbů a grafiků. V podobné náladě nejspíše vznikaly i první projevy vdičnosti k hasičům nebo velice slavný obrázek školačky Elizy Gauger, který jednu dobu zaplavil celý New York obrazem sochy svobody jako matky, která brání svoje dítě http://www.whyproject.org/images/Eliza_Gauger_MommyLiberty.html.

Celá tato hysterie a patriotismus postupně mizí až koncem září, kdy se na stránkách projektu "Proè" objevují i první kritické projevy. Události z 11.září jsou najednou v některých elektronických kolážích vnímány i jako trest Ameriky za její údajnou zpupnost, bohatství či podobně. Například obrázek, v kterém jsou dvojčata ironicky zobrazena jako dvě vertikální čáry v symbolu dolaru, které zasáhly letadla (Rakousko, Matthias Klien, 25.09.2001 http://www.whyproject.org/images/matthias_klien_money.gif).

Vznikají také první antireklamy, které porovnávají Bin Ladina s novou hračkou pro Američany http://www.whyproject.org/images/Alfredo_Llanos_BinLadenToy.jpg nebo zesměšňují Bushe, který se opíje a napodobuje teroristy svým útokem na Afganistan (John Clark, USA, 08.10.2001, http://www.whyproject.org/images/John_Clark_Monkey.jpg) či nosí knížku, z které se učí "Terorismus pro začátečníky" (v doslovném překladu "terorismus pro blběky"). Provokativní interpretaci celého útoku nabízí i koláž, která budovy a letadla zobrazuje jako falusy, čili náraží na "patriarchální" a militantní charakter celého konfliktu. Je to celé prostě o pár primitivních chlapů, kteří si to potěbují rozdat, aby se vidilo, kdo je nejsilnější: Brad Warner <http://electricfuckingeels.com/polemic/warner.html?Submit=I+agree> Velkou sbírku těchto původních reakcí na teroristické útoky nabízí kromě <http://www.whyproject.org/> a <http://www.911-groundzero.org/> také stránky <http://www.theartproject.net/> nebo <http://www.a-virtual-memorial.org/>. Tyto původní reakce představují jakousi anatomii šoku a smutku. Od původní nenávisti a strachu se lidé postupně léčili pomocí spirituálních motivů andělů a Bible nebo pomocí abstrakce, která vede k "zvicnění" bolesti, až postupně se dobrali k ironii a humoru. Na těchto původních uměleckých projevech je třeba zdůraznit také bezprecedentní propojení starých a nových médií. Na stránkách dominuje množství naskenovaných obrazů, ale i koláž i, a už přímo vytvořených pomocí Photoshopu nebo také naskenovaných. V každém případě jsou to díla statická a používají internet pouze jako distributivní médium. Teprve v dalším období vznikají flashové a dynamické prezentace, které se snaží plně využít možnosti nových médií.

kritika médií

otázky a úkoly:

1) Podívat se na příklady uvedených aktivistických stránek.

Dovedli byste shrnout jejich strategii?

Najděte na internetu další příklady aktivistických stránek.

Jak se jednotlivá aktivistická hnutí liší mezi sebou (například pravicový a levicový aktivismus na webu)?

Odpovědět v Bloggeru buď vlastním příspěvkem nebo komentářem k cizímu příspěvku.

2) Ěím se (dez)informační a mediální aktivismus liší od běžného aktivismu?

Jaká je funkce umění v uvedených projektech?

Myslíte si, že jsou podobné projekty účinné?

Odpovědět v Bloggeru buď vlastním příspěvkem nebo komentářem k cizímu příspěvku.

3) Jak hodnotíte projekty spojené s 11.09.2001? Je to umění nebo aktivismus?

Kde leží hranice mezi uměním a aktivismem?

Odpovědět v Bloggeru buď vlastním příspěvkem nebo komentářem k cizímu příspěvku.

Cultur Clip 10/2000

Kom bare an, hackere!

Musikbranchens store initiativ - [Secure Digital Music Initiative](#) - til at sikre sig mod kopiering af musikfiler inviterer nu alle hackere: bryd vores kode og tjen 10.000\$. Efter halvandet års arbejde er SDMI klar med en betaversion af det kopisikre værktøj. Potentielle hackere kan gå til siden www.hacksdmi.org. Fristen for bidrag udløber 7. oktober, men indtil videre er SDMI-folkene skuffede over manglende bidrag...

Rumrejsen 2002

TV-stationen [NBC](#) har nu fundet konceptet, der må få Robinson-konceptmagerne til at føle sig som fortidsøgler. Bliv kosmonaut for nogle uger - vind en rumrejse.

NBC har aftalt et samarbejde med den russiske rumstation Mir. 12 almindelige borgere vælges til at konkurrere om at indgå i kosmonauternes træningsprogram. Hver uge sorteres en af de 12 deltagere fra - og den endelige vinder får love til at komme med rumfartøjet *Soyuz* op til rumstationen Mir. TV-serien *Destination Mir* starter efteråret 2001 med afslutning foråret 2002.

Rumstationen Mir har egentlig et videnskabeligt formål. Men den svage russiske økonomi har gjort at man har etableret en kommerciel virksomhed, [MirCorp](#), som med base Holland skal etablere kommercielle sponsorater for det videre russiske rumeventyr.

Køb en stemme

Meget har været diskuteret om demokrati op til den danske folkeafstemning. Men et helt nyt ikke-demokratisk element kan komme ved kommende valgkampe. Sitet [Voteauction.com](#) har lanceret en auktion, hvor du kan sælge din stemme (til det amerikanske præsidentvalg) til højstbydende. Auktionen er sat op delstat for delstat - og priserne ser ud til at være højest i de stater, hvor valget er på vippen mellem de to præsidentkandidater. Ved redaktionens slutning var stemmer i Colorado dyrest - 33\$ pr. stk.

De amerikanske myndigheder har ikke gjort noget for at stoppe sitet. Dels fordi en retssag kan skabe mere reklame for stedet - dels fordi sitet er lokaliseret - af alle *demokratiske* lande - i Østrig!

Hvis Hitler havde vundet

...så var 2. verdenskrig fortsat igang. - Det er scenariet i det tyske strategispil [Sudden Strike](#). Spillet går frem til det tredje årtusinde i det

tredje rige. Blandt de mange *options* er muligheden for selv at indrette koncentrationslejre.

Sprogstrid i Letland

Det lettiske parlament har vedtaget en ny sprogreform, som giver større vanskeligheder for minoritetssprog - læs: russisk. Venstrefløjspartier og russiske minoriteter har protesteret. Den letsike Human Rights Committee (LHRC) har blandt andet protesteret mod reglen om, at det er forbudt for offentlige myndigheder at tage imod henvendelser fra private mennesker, hvis de er formuleret på andet end det officielle statsprog. OSCE har ikke nogen indvendinger imod sprogreformen.

Gode gammeldags kopityve florerer stadig

Det kan godt være at piratkopiering via Internet stjæler mediernes rampelys, men den mest alvorlige trussel mod kunstneres indtægter er fortsat gode gammeldags pirat-CD'er. Den amerikanske pladeselskabssammenslutning, [RIAA](#), har offentliggjort en halvårsstatistik som viser en voldsom stigning i antallet beslaglagte piratplader. Antallet beslaglagte pirat-CD-R steg fra 155.000 i første halvår af 1999 til 539.000 i første halvår af 2000. Antallet arrestationer og tiltaler er øget fra 438 til 932.

Afrikansk biograf i Paris

Frankrig har hele tiden været foran i afsøgning af tredje verdenskultur. I oktober åbner så en biograf, som kun vil vise afrikanske film - Sept Parnassiens i Paris.

Er du sur, kan du gå

[Washington Post](#) beretter om et nyt fænomen blandt studerende: skribenter som ikke får deres artikler optaget i de officielle studenteraviser opretter blot egne undergrunds-netzines. Der er mere end 10.000 sådanne studenter-undergrundsblade på nettet. Universitetsledelserne gør et behjertet forsøg på at få de studerende til at bruge de *officielle* og *anerkendte* undergrundsmagasiner - som trods alt har sans for sædvanlige redaktionelle principper. Mere kan læses hos [Student Press Law Center](#).

[net.art] RTMark. Tilmans Baumgertels

RTMark aktīvistus, kas sēp man pretī intervijā Berlīnes Bethanien mākslinieku namā, sauc Frenks un Ernests. Uzvārdu viņiem nav. Ernests ir sieviete. Viņiem abiem trūkst vļ tikai saulesbrīiņu un mākslīgu bārdu.

Slepenībai ir savs pamats, jo RTMark (ko izrunā kā "artī mark", vārdu spēle ar trademark (preēu zīme) un "arty" (māksliniecisks) galvenais uzdevums ir finansēt subversīvas aktivitātes.

Amerikāņu mākslinieku anarhistu grupa piedāvā finansiālus līdzekļus cilvēkiem, kuri grib dot mazus belzienus lielām kompānijām. Savā mājas lapā politiskās mākslas grupa, kas vairs negrib būt mākslas grupa, iekārto darbādus "veicināšanas stūrīdus" subversīvām aktivitātēm un vāc ziedojumus plānotajām akcijām. Organizācija uzskata sevi par forumu, kas pulcina un atbalsta savu darbādo projektu dalībniekus. Viss notiek līdzīgi kā birpā, sponsori var "investēt" darbādos pasākumos. "Strādnieki" izdara apmaksātas akcijas - un dabreiz tādējādi riskē ar savu darba vietu. "Dividende" nav vis nauda, bet gan preses ziņojums un personisks apmierinājums.

Powered by RTMark kāds amerikāņu mūziķis samiksēja CD ar popzvaigznes Beck gabaliem. Beck, kas pats labprāt izmanto citu mūziķu dziesmu materiālu, draudēja iesūdzēt viņu tiesā, un mediji visā pasaulē ziņoja par apvainoto popmūziķi. Ievēriību izraisīja arī gadījums, kad pēķdōi kāda Panasonic datormācību programma sāka mācīt bērniem lamuvārdus. "Programmām nevajadzētu aizvietot kontaktu starp bērniem un vecākiem", sacīja programmtājs un saōcma papildus 1000 dolāru, ko RTMark piedēīra ņim projektam. Kas tas ir - politiska subversija vai koietēšana ar aizliegto augli?

Uz RTMark rēiina bijuōi gan homoseksuālie bumbvedēju piloti, ko kāds programmtājs iefiltrēja spēlē SimCopter, gan bārbijas, kas piepeōi sāka izdot kareivīgas skaōas: organizācija, kas saucas Barbie Liberation Front ielika viņām lelles - karavīra G.I.Joe valodas moduli. Bārbijas, kas iepriekō bija mīi teikuōas: "Māmiō, vai iesim iepirkties?", tagad rupjā balsī draudēja: "Nemelo, mironi!" Nesen viņi atbalstīja tīkla mākslas grupu etoy viņu juridiskajā strīdā ar amerikāņu rotālietu izsūtītāju eToys. Arī Web lapu voteaution.com, kurā amerikāņu politiīi ASV prezidenta vļēšanu laikā it kā varēja pirkt vļērtāju balsis, sponsorēja RTMark.

Arī ja RTMark sevi neuzskata par tīkla māksliniekiem, bet gan par politiskiem aktīvistiem, viņu organizācija internetā ir īpaōi aktīva. Biepi vien grupa maldina interneta lietotājus ar "viltus" www lapām, kas līdz samainīšanai izskatās līdzīgi politiīu un uzōcmēju oficiālajām lapām. ņādas tīkla sabotāpas upuris bija arī ņpordps V. Buōs, kuram adresē GWBush.com tika atgādināta viņa it kā bijusī kokaīna lietošanas pieredze. Preses konferencē Buōs tikai izgāzās, kad pieprasīja ierādīt "brīvībai tās robežas".

Arī citiem neapstrīdētiem amerikāņu politiīiem veltīti nedaudz variēti Web saiti ar viņu adresei līdzīgu nosaukumu. Tā, piemēram, bijuōajam ņujorkas mēram Rudijam ņpulkanam. Arī tie, kas meklē internetā Jorgu Haideru un viņa FPO, nonāk www.fpo.at viltus lappusē, kurā tādi vārdi kā "darbs ar sabiedrisko domu" nomainīti ar vārdu "propoganda", bet saites ved uz nacionālistiskām un labējo ekstrēmistu mājas lapām. Tiesām biepi jānodarbojas ar ņiem viltojumiem. Voteaution.com lieta ASV noveda pat pie precedentā procesa. Sekojoōais mediju bums ir svarīga ņo mājas lapu akcijas daīa.

Austrijas mediju festivālā Ars Electronica, kas 1998. gadā notika ar moto Infowar ("infokarš"), RTMark saņēma prēmiju par labāko "infoieroci". Uzvarētāji bija iedzīvotāji no meksikāņu ciema Popotla, pie kuru krasta pirms trīs gadiem notika Holivudas drāmas "Titāniks" uzņemšanas darbi. Lai atturētu ciema iedzīvotājus no tuvošanās uzņemšanas laukumam, filmas grupa bija uzcēlusi augstu betona sienu, aiz kuras notika filmēšana. Bet meksikāņi izskaistināja mūri ar sienas gleznojumu no atkritumiem. Par šo "ievērojamo low-tech vēršanos pret neiepriecinošu high-tech situāciju" RTMark gribēja pagodināt meksikāņu zemniekus Austrijas mediju festivālā. Īpaši komiski bija tas, ka arī "Titānika" autori saņēma Ars Electronica balvu par digitālajiem specefektiem. Meksikāņu zemnieku un amerikāņu kinoāušu tikšanās, ko RTMark gribēja organizēt, gan tā arī nenotika.

Tilmans Baumgertels: Pēc jūsu laika mākslas un interneta aprindās jūs esat kļuvuši ievērojami ar subversīvu akciju finansēšanu. Vai varat izskaidrot savu stratēģiju?

"Ernests": Mēs gādājam naudu subversīvajām akcijām un produktu sabotāpai, kā arī reklamācijām šīs akcijas, lai tās nonāktu medijos. Internetā mums ir sava datu banka, kurā ievietots visu mūsu projektu saraksts. No tā var uzzināt, kā iespējams piedalīties. Tur var pārskatīt naudu, un, ja vēlas, sadarboties, sūtot mums e-pasta vēstuli.

Cik nozīmīgs jūsu darbā ir internets?

"Frenks": Ļoti nozīmīgs. Kad mēs pamanījām, ka iespējams strādāt ar tīklu, paliekot anonīmiem, uzreiz sākām to izmantot. Tagad savas aktivitātes mēs publiskojam tikai tīklā. Grupām, kurām nav naudas, tas ir perfekti. Mums par savu mājas lapu nedaudz jāmaksā, bet tas ir maz, salīdzinot ar to, cik maksātu paziņojumi presē.

"Ernests": Bez tam mēs dzīvojam dažādās ASV vietās, un internets ir labākā metode, kā, neskatoties uz to, strādāt kopā.

Vai jūs zināt, kas jums maksā naudu?

"Frenks": Lielākā daļa ir sīki ziedojumi, ap simts dolāru. Vairāki tūkstoši dolāru ir retums. Vairums ir pavisam parasti cilvēki. Vārdus mēs viņiem nejautājam...

Un jūs uzņematies risku šajās akcijās?

"Frenks": Mēs strādājam kā ekonomisks uzņēmums. ASV uzņēmumiem ir tādas pašas tiesības kā indivīdiem. Tā cilvēki, kam ir uzņēmums, samazina savu risku. Ja viņu firma kādu nogalina vai nolīdzina ar zemi kādu Meksikas ciemu, tad viņi nav personiski atbildīgi, atbildību uzņemas firma. Sliktākajā gadījumā uzņēmums tiek slēgts, bet atbildīgajam menedžerim cietumā tuptāt nevajag gandrīz nekad.

Kâdas bijuðas jûsu ievçrojamâkâs akcijas?

"Ernests": Barbie Liberation Organisation mçs devâm naudu par to, ka viòì kâdâ supermârketa apmainîja bârbiju un Dp.A.Dpoi (G.I.Joe) leïïu skaòas èipus. Tad Dpoi teica "Vai iesim iepirkties?", Bârbijas: "Nemelo, mironi!" Bez tam kâds datorprogramçtâjs mûsu uzdevumâ videospçlç SimCopter ieslçpa divus jaunekiïus, kas skûpstâs. No ðîs izmainîtâs versijas daþi simti eksemplâru jau bija nonâkuði pârhoðanâ, pirms kâds to pamanîja. Nauda tam nâca no kâda zemes îpaðnieka, tas arî ir viens no retajiem gadîjumiem, kur mçs zinâm, kas ziedojs.

Un ko tieði jûs ðeit uzskatat par panâkumiem? To, ka ðî spçle nonâca pârhoðanâ, vai to, ka par to ziòoja mediji?

"Frenks": Mediju ziòojumu. Ja cilvçks vçlas, lai viòa politiskâs aktivitâtes tiktu ðemtas verâ, tâs ir jâpublisko, tâtad tâm jânonâk medijos. Amerikâou mâkslinieku grupa Act Up ir ðâdas darbîbas agrînâ perioda modelis. Mçs sapratâm, ka politisks aktîvisms 20. gs. beigâs nozîmç, ka tam jâparâdâs medijos, jo pretçjâ gadîjumâ neviens to neuztvers. Ja realizç subversîvu akciju, un neviens par to neko neuzzina, tad tâdas vispâr nav.

Bet Act Up bija tikai viena politiska tçma - AIDS. Jûsu gadîjumâ iekîûðana medijos izskatâs gandrîz kâ paðmçrîis...

"Ernests": Nç, mûs uztrauc daudz kas vairâk. SimCopter, piemçram, ir maèò garâ un îoti agresîva. Ðâdâ spçlç ielikta divus samîlçjuðos pilotus ir pietiekoði radikâli.

Vai jûs domâjat, ka tas kaut ko mainîs veidâ, kâ cilvçki attiecas pret ðîm spçlçm?

"Frenks": Nç, bet tas parâda, kâdas ðîs datorspçles ir patiesîbâ. Arî bârbijelle, kas pçkðòì saka: "Cîòâ!Cîòâ!", laikam uzreiz neko neizmainîs. Bet tas, ka par to tiek vispâr runâts un ziòots, ir panâkums. Tâ mçs tiekam pie plaðas publikas. Vçrðamies ne tik daudz pie mâkslas publikas, kâ visas sabiedrîbas. RTMark nav mâkslas projekts, tas iet daudz tâlâk.

Bet pie kâ vçrðas jûsu akcijas? Pie nabaga mazâs meitenîtes, kurai pçkðòì ir lelle, kas izklien militârus saukiïus?

"Ernests": Nç, to jau arî bija tikai kâdas 300. Bet par ðo akciju tika ziòots tik daudz, ka mçs ar mûsu tçmâm sasniedzâm daudz cilvçku. Par bârbiju akciju ziòoja CNN un visi lielâkie ASV raidîtâji. Un domâju, ka gan jau cilvçki tâ rezultâtâ padomâja: "Hm, varbût nevajadzçtu notikt tâ, ka lelle sûta mûsu mazuli karot..."

Tâ visa bija tikai vienreizçja akcija. Ja Barbie Liberation Front bûtu producçjis tûkstoð leïïu, tas bûtu bijis savâdâk. Arî SimCopter gadîjumâ tas bija tikai viens programmçtâjs no daudziem, kas to atîâvâs izdarît. Protams, viòu tûlît atlaida, bet tâlâkas tiesiskas konsekvences nesejoja. Viòam tas bija vienalga. RTMark vçlas ðâdâ gadîjumâ piedâvât nelielu droðîbas tîklu. 5000 dolâru, ko viòð saòçma no mums, atviegloja pâreju no viena darba uz otru, kas gan viòam praktiski arî tûlît tika piedâvâts.

Varbūt cilvēki, redzēdami to pa televizoru, tikai iīina, tātāk nepadomājot...

"Frenks": Mūsu uzdevums ir darīt iespējamu pretošanās tur, kur parasti tās nav. Tādēi arī prese mums ir tik svarīga. Mēs vālamies šos īsos pretošanās momentus padarīt redzamus.

"Ernests": Ja cilvēki, redzēdami to CNN, tikai smejas, tam varbūt nav tūlītēja efekta, bet pamazām kaut kas rodas. Kaut kas tāds paliek, labas akcijas cilvēki atceras vā ilgi. Vismaz mēs katrā gadījumā tā ceram...

Ja jūs uzskatāt, ka jūsu uzdevums ir sasmēdināt īaudis, tad jau tas, ko jūs piedāvājat, pirmkārt jau ir izklaide...

"Ernests": Jā, tas, ko mēs darām, IR izklaide. Mēs izmantojam reklāmas un izklaides metodes.

"Frenks": Tagad jau pat ziādas ir izklaide, seviēi Savienotajās Valstīs. Televīzijā vispār nevar nokīūt nekas, kas nav izklaidējošs vai komisks. Ja grib izplatīt informāciju par indīgu atkritumu izgāztuvi, tai ir jābūt īoti indīgai, lai kāds vispār par to interesētos. Un pat tad šāda veida kampaāa maksā lielu naudu. Ja cilvēkam nav pietiekošu līdzekļu, tomēr viēš grib komunicēt, tad viņam savs vēstījums jāpadara izklaidējošs.

"Frenks": Domāju, ka visas subversīvās akcijas beigās var darboties citiem mēriem. Tādēi jāriko vairāk subversīvo akciju, kas tad atkal tiek sarunātas, un tā tātāk. Protams, vienmēr pastāv "subversīvā šika" briesmas. Stājoties pretī valdošajai kultūrai, nevar būt pilnīgi tīrs, jo arī pati šī kultūra tāda nav.

[net.art] RTMark. Tilmans Baumgertels

RTMark aktīvistus, kas sçp man pretī intervijā Berlīnes Bethanien mākslinieku namā, sauc Frenks un Ernests. Uzvārdu viõiem nav. Ernests ir sieviete. Viõiem abiem trūkst vçl tikai saulesbrīli un mākslīgu bārdu.

Slepenībai ir savs pamats, jo RTMark (ko izrunā kā "artī mark", vārdu spçle ar trademark (preðu zīme) un "arty" (māksliniecisks) galvenais uzdevums ir finansçt subversīvas aktivitātes.

Amerikāðu mākslinieku anarhistu grupa piedāvā finansiālus līdzekļus cilvēkiem, kuri grib dot mazus belzienus lielām kompānijām. Savā mājas lapā politiskās mākslas grupa, kas vairs negrib būt mākslas grupa, iekārto dabādus "veicināðanas stūrīðus" subversīvām aktivitātçm un vāc ziedojumus plānotajām akcijām. Organizācija uzskata sevi par forumu, kas pulcina un atbalsta savu dabādo projektu dalībniekus. Viss notiek līdzīgi kā birpā, sponsori var "investçt" dabādos pasākumos. "Strādnieki" izdara apmaksātas akcijas - un dabreiz tādçjādi riskç ar savu darba vietu. "Dividende" nav vis nauda, bet gan preses ziðojums un personisks apmierinājums.

Powered by RTMark kāds amerikāðu mūziķis samiksçja CD ar popzvaigznes Beck gabaliem. Beck, kas pats labprāt izmanto citu mūziķu dziesmu materiālu, draudçja iesūdzçt viðu tiesā, un mediji visā pasaulç ziðoja par apvainoto popmūziķi. Ievçrību izraisīja arī gadījums, kad pçkðõi kāda Panasonic datormācību programma sāka mācīt bçrniem lamuvārdus. "Programmām nevajadzçtu aizvietot kontaktu starp bçrniem un vecākiem", sacīja programmçtājs un saòçma papildus 1000 dolāru, ko RTMark pieðīra ðim projektam. Kas tas ir - politiska subversija vai koietçðana ar aizliegto augli?

Uz RTMark rçina bijuði gan homoseksuālie bumbvedçju piloti, ko kāds programmçtājs iefiltrçja spçç SimCopter, gan bārbijas, kas piepeði sāka izdot kareivīgas skaòas: organizācija, kas saucas Barbie Liberation Front ielika viðām lelles - karavīra G.I.Joe valodas moduli. Bārbijas, kas iepriekð bija mīi teikuðas: "Māmiò, vai iesim iepirkties?", tagad rupjā balsī draudçja:

Bet pie kā vēršas jūsu akcijas? Pie nabaga mazās meitenītes, kurai pēkšņi ir lelle, kas izkļūdz militārus saukļus?

"Ernests": Nē, to jau arī bija tikai kādas 300. Bet par šo akciju tika ziņots tik daudz, ka mēs ar mūsu tīmekļa sasniedzām daudz cilvēku. Par bārbiju akciju ziņoja CNN un visi lielākie ASV raidītāji. Un domāju, ka gan jau cilvēki tā rezultātā padomāja: "Hm, varbūt nevajadzētu notikt tā, ka lelle sūta mūsu mazuli karot..."

Tā visa bija tikai vienreizēja akcija. Ja Barbie Liberation Front būtu producējis tūkstošus leļļu, tas būtu bijis savādāk. Arī SimCopter gadījumā tas bija tikai viens programmētājs no daudziem, kas to atīvēs izdarīt. Protams, viņi tūlīt atlauda, bet tālākas tiesiskas sekas nesekoja. Viņam tas bija vienalga. RTMark vēlas šādā gadījumā piedāvāt nelielu drošības tīklu. 5000 dolāru, ko viņš saņēma no mums, atvieglāja pāreju no viena darba uz otru, kas gan viņam praktiski arī tūlīt tika piedāvāts.

Varbūt cilvēki, redzēdami to pa televizoru, tikai īīīina, tālāk nepadomājot...

"Frenks": Mūsu uzdevums ir darīt iespējamu pretošanās tur, kur parasti tās nav. Tādēļ arī prese mums ir tik svarīga. Mēs vēlamies šos īsos pretošanās momentus padarīt redzamus.

"Ernests": Ja cilvēki, redzēdami to CNN, tikai smejas, tam varbūt nav tūlītēja efekta, bet pamazām kaut kas rodas. Kaut kas tāds paliek, labas akcijas cilvēki atceras vēl ilgi. Vismaz mēs katrā gadījumā tā ceram...

Ja jūs uzskatāt, ka jūsu uzdevums ir sasmēdināt ļaudis, tad jau tas, ko jūs piedāvājat, pirmkārt jau ir izklaide...

"Ernests": Jā, tas, ko mēs darām, IR izklaide. Mēs izmantojam reklāmas un izklaides metodes.

"Frenks": Tagad jau pat ziņas ir izklaide, sevišķi Savienotajās Valstīs. Televīzijā vispār nevar nokļūt nekas, kas nav izklaidējošs vai komisks. Ja grib izplatīt informāciju par indīgu atkritumu izgāztuvi, tai ir jābūt ļoti indīgai, lai kāds vispār par to interesētos. Un pat tad šāda veida kampaņa maksā lielu naudu. Ja cilvēkam nav pietiekošu līdzekļu, tomēr viņš grib komunicēt, tad viņam savs vēstījums jāpadara izklaidējošs.

"Frenks": Domāju, ka visas subversīvās akcijas beigās var darboties citiem mērķiem. Tādēļ jāriko vairāk subversīvo akciju, kas tad atkal tiek sarunātas, un tā tālāk. Protams, vienmēr pastāv "subversīvā ēika" briesmas. Stājoties pretī valdošajai kultūrai, nevar būt pilnīgi tīrs, jo arī pati šī kultūra tāda nav.

net art reviews by Jonathan Lipkin

Jonathan Lipkin is Associate Professor of Digital Media at Ramapo College, NJ. He is also on the graduate faculty of the School of Visual Arts, NYC, MFA Photography and MFA Computer Art.

01/03

THE INTERNET is today controlled by a series of commercial agreements between large telecos who own the equipment and software which run it. This sometimes puts the folks who control much of the Internet at odds with those who use it. Such is the case with Verio, who leases bandwidth to thing.net, the Internet Service Provider for thing.net. It seems that the Yes Men (<http://www.theyesmen.org/>), who host their sites (also <http://www.theyesmen.org/>) on thing.net, posted a parody of Dow Chemical. It contained fake press releases from Dow, side-stepping moral responsibility for the disaster at a Union Carbide plant in Bhopal, India, which is thought to have caused 20,000 deaths. Dow threatened suit, and Verio is pulling the plug on thing.net (<http://www.theyesmen.org/dow/#release>) in the middle of March. The whole story can be seen at the Yes Men's site (<http://www.theyesmen.org/dow/>). While Dow may have succeeded in killing one incarnation of the site, dozens of others have sprung up around the 'net and across the globe. If thing.net goes down, it will truly be a shame: they've hosted a lot of important art and hactivist sites, including some I've written about in this

column in months past (Ricardo Dominguez comes to mind (<http://www.thing.net/~rdom>) as does etoy.com). What can you do? A good start would be to toss some money their way to help the move to a new ISP (Wolfgang Staehle, who runs thing.net, is reportedly planning to relocate). Follow the case in the press (wired.com and the New York Times have pretty good coverage), join the Electronic Frontier Foundation (<http://www.eff.org>), read their website, and hope for the best for Wolfgang.

02/02

PEDESTRIAN -

Although you may have missed this week's opening, it's not too late to visit or participate in some of the public programs for Pedestrian, an installation currently on view at the Studio Museum in Harlem (144 West 125th Street), the Rockefeller Center in Midtown (51st Street, between 5th and 6th Avenue), and Eyebeam in Chelsea (540-548 West 21st Street). The public programs include talks for children and panel discussions for adults, and are listed on the project's Web site (<http://www.pedestrianweb.org>). Pedestrian makes use of digital technology to create animations of the human figure in motion, specifically an aerial view of imaginary street scenes populated by imaginary pedestrians, which are then projected onto the sidewalk. Paul Kaiser and Shelley Eshkar created the project, with help from programmers and other designers, by capturing human motion and mapping that motion onto the animated figures. This process has often been used in video games, animated motion pictures, and by the artists themselves in their earlier works, notably collaborations with Bill T. Jones and Merce Cunningham (see Biped and Ghostcatching among others at <http://riverbed.com/>).

The work is choreographed, the virtual actors set to explore their virtual environment in a pre-determined pattern. The resulting digital work, which combines the pre-rendered figures, resembles the antecedents the artists mention: the work of Russian photographer Alexander Rodchenko and the computer game the Sims. But today we see an increasing number of events from the vantage point of a helicopter (the spectacle of the O.J. Simpson chase, or any of the real life's television police shows that are

increasingly becoming part of modern visual culture.

01/02

An interest in randomness and art surfaced in the West around the end of the nineteenth century, as a series of artists and art movements used dice and a variety of other methods to choose words in poems, or the placement of paint on a canvas. Modern art was born at the same time as this fascination, and so it is perhaps not surprising that the randomly generated work of Kurt Baumann looks like many twentieth-century art, especially that of Piet Mondrian. His site ARTificial ART (<http://home.att.net/~artificial-art/index.html>) has six Java applets (short programs written in the Java programming language specifically for distribution over the Web) which create distinctive visual patterns. *ãKyotoä* draws spare, plant-like structures that resemble I-systems based on the work of Aristid Lindenmeyer. *ãChanceä* draws a series of different types of images, some whose recursive squares look like Mondrian's monochrome canvasses, while *ãneogeoä* creates images that often look like Mondrian's color paintings. Often, however, they look like bad motel art.

The work is part of a long history of using programs to generate visual images, and which is well documented in Cynthia Goodman's 1987 book *Digital Visions*. See also John Simon's work (<http://www.numeral.com>) <http://www.numeral.com>, especially his pen plotter drawings.

12/01

Artist John Simon is not technically a net artist (he uses the net to present his work, instead of make his work), he's interesting enough to discuss here. What interests me, and what is related to net art, is the fact that Simon makes his own digital tools, as do many net artists. That is, instead of using pre-packaged software, like Photoshop, he taught himself to program, and considers the programs he writes his art. Of course, he is still using a programming language, compiler, operating system and hardware designed by someone else, but few painters make their own paint. The precedent for artists writing their own software was set in the 1970s and 80s by

artists such as Vera Molnar and Manfred Mohr, who programmed computers to run plotters (early printers which worked by moving a pen across a piece of paper). Their work, and others like them is well chronicled in Cynthia Goodman's book *Digital Visions*.

One of Simon's most interesting pieces is *Every Icon*, which attempts to draw every possible icon that can be created in a 32 by 32 square grid. Images on the computer, from photographs to paintings, are 'bitmapped,' that is, they are made up of a grid in which every square, called a pixel, is assigned one or more numbers to represent its color, hue and so forth. Simon's piece starts out with a grid that is entirely white, then blackens the squares in an attempt to create every possible image that can be represented. This is essentially like counting from 0 to 2 raised to the 1024th power, an astronomically large number. The image changes several times each second, and even so, Simon calculates that the sun will burn out long before the process is finished.

His work can be seen at his website (<http://www.numeral.com>) <http://www.numeral.com>, and you can buy a personalized copy of the *Every Icon* applet which you can run on your own computer (and support John Simon) at his Amazon shop (<http://s1.amazon.com/exec/varzea/ts/exchange-glance/Y01Y4427168Y2611576>).

bought mine last week.

10/01

There have been a variety of responses to the events of September 11th, among them websites which solicit online donations. Amazon (<http://www.amazon>) offered its ecommerce system, and gathered nearly seven million dollars, most of it in the first few days after the attack. After having their site featured on a prominent search engine, Fire Donations (<http://www.firedonations.com>) saw a huge increase in traffic, and the Red Cross needed technicians around the clock to help them upgrade their servers.

An online visual response is developing as well. Here in New York is a remarkable gallery show at 116 Prince Street in

SOHO, and perhaps the first physical Website. Photographers, from prestigious photojournalists to everyday people have contributed photographs, which are scanned and then digitally printed and hung on the walls, ceiling, and any available space in the gallery, which has also taken over an adjacent storefront. Visitors, who number in the thousands on the weekends, are able to purchase prints, with the proceeds going to benefit the children of victims.

A website (<http://hereisnewyork.org>) is in the planning stages, and will continue the exhibition after its physical presence ends.

08/01

Ever since Pedro Meyer's pioneering 1990 CD-ROM I Photograph to Remember, photographers have been exploring new media as a means to present their work (photography itself is only one hundred and fifty years old, hardly an old medium). Meyer's CD was a combination of narration and photographs documenting the death of his father, and published by Voyager (<http://www.voyagerco.com>), a pioneering publishing house, now semi-defunct. Meyer's work is still available, though, at his website (<http://www.zonezero.com>), which is dedicated to presenting photography over the Internet. Meyer's essay appears at <http://www.zonezero.com/exposiciones/fotografos/fotografio> . After the initial excitement about CD-ROM as an alternate publishing venue faded in the early nineties, the Web came to be the most viable medium for photographers to show their work. Photographer Gilles Peres shows his portfolio of Bosnia photographs on the New York Times' site (<http://www.nytimes.com/specials/bosnia/>) which combines Peres' stunning, intelligent and moving images with his commentary on the end of the war in that country (he has also published his photographs in a book titled Farewell to Bosnia). While the quality of an image on the screen cannot match a high-quality art book (though many computer screens far surpass newsprint), the Web allows access to a wider audience than a book might, and at a lower cost (after the initial investment in a computer). The Web also allows some measure of interactivity, and the Times site included discussion forums which were left open for two months after

the site opened in 1996.

Susan Meiselas was recently awarded a MacArthur grant, and her recent project AKA Kurdistan can be found at <http://www.akakurdistan.com> . The site was created after the publication of Meiselas' book Kurdistan: in the Shadow of History, a chronicle of the Kurdish people in the twentieth century. The site is meant to continue the work of the book by allowing anyone to contribute stories or identify images posted on the site.

07/01

How does one create work which addresses political and or social themes in the 21st century? Certainly the decline of the photo-magazines of the 1940s and 50s was related to the rise of television and its mass-distribution of images. As we become increasingly saturated with images of suffering through rapidly multiplying media channels, it seems that using photographic, or even realistic images as a means to evoke an emotional response in a viewer. Witness the critical response to Magnum photojournalist Salbastio Salgado, who regularly travels to the sites of humanitarian disasters, famines and the like. A recent article in the New York Times entitled "Can Suffering Be Too Beautiful" <http://www.nytimes.com/2001/07/13/arts/design/13KIMM.html> takes issue with Salgado's aestheticization of suffering, while Ingrid Sischy wrote in the New Yorker ten years ago of overhearing a woman at a Salgado exhibition remark "I can't look at these images, they make me cry." Yet, remarked Sischy, the woman did look at the images, and did not cry. This rather long intro leads me into a review of one of the more successful means of dealing with political and social issues over the Web: rtmark.com. Along with other activist sites, such as Ricardo Dominguez (www.thing.net/~rdom), rtmark.com attempts to foment political action through documentation of past actions and suggestions for future ones. One past action chronicles the infiltration of a WTO conference by a group called The Yes Men, who sent a speaker who proposed, among other things, replacing the inefficiency of voting with a system of selling votes to the highest bidder (see <http://www.voteauction.com>).

Another section of the site presents the rtmark "mutual funds," each of which has a dollar value, related to how much money donors have contributed to the fund (project). In addition, each "fund" has a discussion centered around its proposal, such as dubbing a short film about racism and mandatory drug sentencing into the preview section of rented videotapes (symbol DUBM, value \$0). Unfortunately, though, there is not much interesting discussion, non-withstanding their moderators (DJ Spooky, Andrei Codrescu, Negativland). Be sure to check out Cue Jack, a hack of the CueCat device (<http://rtmark.com/cuejack>). Also of note this month is Picture Project's <http://www.360degrees.org> , which presents "perspectives on the criminal justice system.," and includes a history of the justice system (though entirely focusing on the West), and short documentaries.

06/01

Thanks to an email from Kathy Brew's Thundergulch, I was alerted to a talk on 6/13 at the Museum of Natural History, featuring artist Natalie Jeremijenko, centered around art concerned with genomic research. At the talk, she showed an older, though very interesting work which she says was inspired by hobbyist magazines, the ones which catered to the amateur hobbyist who built their own amplifiers or radios. It seems that the days of such electronic tinkering are mostly over, and we are insulated from the interior workings of much of the technology that surrounds us. Her Biotech Hobbyist Magazine caters to the new tinkerer - one who tinkers in biotechnology. It's only issue, published in the summer of 1998, concerns itself with growing skin. There are links to retailers who can provide the necessary supplies, along with some rudimentary advice. Jeremijenko's work is reminiscent of Donna Haraway's writing on oncomouse (see her books Simians, Cyborgs, and Women and modest_witness@ etc) and the work of Eduardo Kac, whose work I've profiled in earlier reviews. In a somewhat eerie later piece, she exhibited lab-grown synthetic skin. <http://www.irational.org/biotech/>

net art reviews by Jonathan Lipkin

Jonathan Lipkin is Associate Professor of Digital Media at Ramapo College, NJ. He is also on the graduate faculty of the School of Visual Arts, NYC, MFA Photography and MFA Computer Art.

01/03

THE INTERNET is today controlled by a series of commercial agreements between large telcos who own the equipment and software which run it. This sometimes puts the folks who control much of the Internet at odds with those who use it. Such is the case with Verio, who leases bandwidth to thing.net, the Internet Service Provider for thing.net. It seems that the Yes Men (<http://www.theyesmen.org/>), who host their sites (also <http://www.theyesmen.org/>) on thing.net, posted a parody of Dow Chemical. It contained fake press releases from Dow, side-stepping moral responsibility for the disaster at a Union Carbide plant in Bhopal, India, which is though to have

caused 20,000 deaths. Dow threatened suit, and Verio is pulling the plug on thing.net (<http://www.theyesmen.org/dow/#release>) in the middle of March. The whole story can be seen at the Yes Men's site (<http://www.theyesmen.org/dow/>). While Dow may have succeeded in killing one incarnation of the site, dozens of others have sprung up around the 'net and across the globe. If thing.net goes down, it will truly be a shame: they've hosted a lot of important art and hactivist sites, including some I've written about in this column in months past (Ricardo Dominguez comes to mind (<http://www.thing.net/~rdom>) as does etoy.com). What can you do? A good start would be to toss some money their way to help the move to a new ISP (Wolfgang Staehle, who runs thing.net, is reportedly planning to relocate). Follow the case in the press (wired.com and the New York Times have pretty good coverage), join the Electronic Frontier Foundation (<http://www.eff.org>), read their website, and hope for the best for Wolfgang.

02/02

PEDESTRIAN -

Although you may have missed this week's opening, it's not too late to visit or participate in some of the public programs for Pedestrian, an installation currently on view at the Studio Museum in Harlem (144 West 125th Street), the Rockefeller Center in Midtown (51st Street, between 5th and 6th Avenue), and Eyebeam in Chelsea (540-548 West 21st Street). The public programs include talks for children and panel discussions for adults, and are listed on the project's Web site (<http://www.pedestrianweb.org>). Pedestrian makes use of digital technology to create animations of the human figure in motion, specifically an aerial view of imaginary street scenes populated by imaginary pedestrians, which are then projected onto the sidewalk. Paul Kaiser and Shelley Eshkar created the project, with help from programmers and other designers, by capturing human motion and mapping that motion onto the animated figures. This process has often been used in video games, animated motion pictures, and by the artists themselves in their earlier works, notably collaborations with Bill T. Jones and Merce Cunningham (see Biped and Ghostcatching among others at <http://>

riverbed.com/).

The work is choreographed, the virtual actors set to explore their virtual environment in a pre-determined pattern. The resulting digital work, which combines the pre-rendered figures, resembles the antecedents the artists mention: the work of Russian photographer Alexander Rodchenko and the computer game the Sims. But today we see an increasing number of events from the vantage point of a helicopter (the spectacle of the O.J. Simpson chase, or any of the real life's television police shows that are increasingly becoming part of modern visual culture.

01/02

An interest in randomness and art surfaced in the West around the end of the nineteenth century, as a series of artists and art movements used dice and a variety of other methods to choose words in poems, or the placement of paint on a canvas. Modern art was born at the same time as this fascination, and so it is perhaps not surprising that the randomly generated work of Kurt Baumann looks like many twentieth-century art, especially that of Piet Mondrian. His site ARTificial ART (<http://home.att.net/~artificial-art/index.html>) has six Java applets (short programs written in the Java programming language specifically for distribution over the Web) which create distinctive visual patterns. "Kyoto" draws spare, plant-like structures that resemble I-systems based on the work of Aristid Lindenmeyer. "Chance" draws a series of different types of images, some whose recursive squares look like Mondrian's monochrome canvasses, while "neogeo" creates images that often look like Mondrian's color paintings. Often, however, they look like bad motel art.

The work is part of a long history of using programs to generate visual images, and which is well documented in Cynthia Goodman's 1987 book Digital Visions. See also John Simon's work (<http://www.numeral.com>) <http://www.numeral.com> , especially his pen plotter drawings.

12/01

Artist John Simon is not technically a net artist (he uses the net to present his work, instead of make his work), he's interesting

enough to discuss here. What interests me, and what is related to net art, is the fact that Simon makes his own digital tools, as do many net artists. That is, instead of using pre-packaged software, like Photoshop, he taught himself to program, and considers the programs he writes his art. Of course, he is still using a programming language, compiler, operating system and hardware designed by someone else, but few painters make their own paint. The precedent for artists writing their own software was set in the 1970s and 80s by artists such as Vera Molnar and Manfred Mohr, who programmed computers to run plotters (early printers which worked by moving a pen across a piece of paper). Their work, and others like them is well chronicled in Cynthia Goodman's book *Digital Visions*.

One of Simon's most interesting pieces is *Every Icon*, which attempts to draw every possible icon that can be created in a 32 by 32 square grid. Images on the computer, from photographs to paintings, are 'bitmapped,' that is, they are made up of a grid in which every square, called a pixel, is assigned one or more numbers to represent its color, hue and so forth. Simon's piece starts out with a grid that is entirely white, then blackens the squares in an attempt to create every possible image that can be represented. This is essentially like counting from 0 to 2 raised to the 1024th power, an astronomically large number. The image changes several times each second, and even so, Simon calculates that the sun will burn out long before the process is finished.

His work can be seen at his website (<http://www.numeral.com>) <http://www.numeral.com> , and you can buy a personalized copy of the *Every Icon* applet which you can run on your own computer (and support John Simon) at his Amazon shop (<http://s1.amazon.com/exec/varzea/ts/exchange-glance/Y01Y4427168Y2611576>).

bought mine last week.

10/01

There have been a variety of responses to the events of September 11th, among them websites which solicit online

donations. Amazon (<http://www.amazon>) offered its ecommerce system, and gathered nearly seven million dollars, most of it in the first few days after the attack. After having their site featured on a prominent search engine, Fire Donations (<http://www.firedonations.com>) saw a huge increase in traffic, and the Red Cross needed technicians around the clock to help them upgrade their servers.

L'INTERVIEW

EDITO : Une élection pas Net.

Après un an et demie de campagne active, une demi-douzaine de sites web pour chacun des deux candidats, des dizaines de milliers d'emails destinés à créer le plus large réseau militant jamais mis en place, un barrage médiatique sans précédent annonçant l'année du Net en politique, on s'attendait presque à voir le nouveau président américain adoubé en ligne. Le JF Kennedy du Net, pourtant, n'est jamais apparu. L'élection américaine cuvée 2000 n'aura pas été l'équivalent de 1960, année du célèbre débat Kennedy-Nixon qui consacra à jamais le rôle de la télévision en politique.

Dire cependant que le Net n'a joué aucun rôle dans cette élection serait une erreur. Dans une élection où quelques centaines de bulletins de vote feront la différence entre GW Bush et Al Gore, il serait absurde de dire que tous les efforts d'information, de recrutement et de mobilisation online n'auront eu aucun impact. Avec une marge de différence si étroite, la moindre voix, la moindre poignée de main, le moindre email peut-être aura compté.

Gageons que ces questions alimenteront à nouveau les réflexions des universitaires et des observateurs avisés lorsque la fièvre médiatico-politico-juridique suscitée par la confusion électorale en Floride sera retombée. D'ici là, Netpolitique.net apporte sa pierre à l'édifice avec l'interview du mois et revient sur les leçons à tirer de la campagne américaine.

International

Les parlementaires britanniques sont mous du Net.

The Guardian, 2/11/00

Une étude publiée en Grande-Bretagne a passé en revue les sites des parlementaires britanniques : le résultat n'est pas brillant. The Institute of Economic Affairs juge la construction de certains sites "inepte, à la limite du comique". Ces sites sont pour la plupart d'entre eux "creux et mal fagotés". Seul un petit nombre d'élus ont su mettre à profit les possibilités offertes par le Net pour communiquer avec leurs électeurs et se faire entendre.

Traite anti-cybercriminalité : les internautes font pression "Le traité anti-cybercriminalité serait-il hors la loi ?"

Transfert, le 13 novembre 2000

Le Conseil de l'Europe, chargé de la rédaction d'un traité international de lutte contre la cybercriminalité doit revoir sa copie dans le courant de la semaine. C'est ce que vient d'annoncer l'un des responsables de l'organisation, qui met en avant le mauvais accueil du projet par la société civile. Selon l'agence Reuters, qui révèle le report, les autorités chargées de négocier le traité auraient reçu pas moins de 400 e-mails de protestation depuis avril dernier. 400 e-mails en 7 mois suffiraient-ils à faire changer d'opinion les négociateurs, policiers ou politiques, de 47 pays?

La guerre électronique est un terrorisme comme les autres

L'ancien ministre des science israélien a dénoncé le jihad électronique qui met à mal le réseau Internet israélien (voir Netpolitique Newsletter No 4). Il appelle à une convention internationale pour condamner le sabotage par Internet au même titre que tout autre acte de terrorisme.

Article de Newsbytes (en anglais)

<http://www.newsbytes.com/news/00/157986.html>

Du Peer-to-Peer (P2P) au Voter-to-Voter

Après voteauction.com, l'Ebay de la politique où l'on pouvait vendre son vote au plus offrant, les dernières semaines de la campagne américaine ont vu apparaître un nouveau site trouble-fête: nadertrader.org, le Napster de la politique où militants verts et sympathisants démocrates pouvaient troquer leur vote comme des cartes Pokémon.

Le site, rapidement suivi par une série de clones, a été créé par des supporters du candidat des Verts, Ralph Nader, pour résoudre le douloureux dilemme de dizaines de milliers de démocrates : voter "utile" pour Gore –et ainsi contrer Bush- ou voter pour Nader, le chevalier blanc de la gauche américaine et lui permettre ainsi d'atteindre la barre fatidique des 5%, limite légale du remboursement des frais de campagne (uniquement pour les candidats qui ont opté pour le financement public).

Nadertrader.org aura finalement permis à plusieurs milliers d'électeurs de faire les deux. Le site, aujourd'hui mis en veille, offrait la possibilité de mettre en relation des sympathisants de l'un et de Gore et Bush étaient au coude à coude contre une promesse de vote pour Nader dans un Etat déjà considéré acquis au candidat républicain.

Ce système inédit, s'il persiste, devrait fournir un beau sujet de recherche pour les chercheurs en sciences politiques ... et un sérieux casse-tête pour les sondeurs et stratèges politiques.

Le site et ses "clones":

- *the electronic war is a terrorism like the others*
- *Of Peer-to-Peer (P2P) to Vote-to-Voting*

The INTERVIEW

EDITO : An election not Net.

After one year and half of active countryside, a half-dozen of Web sites for each of the two candidates, of tens of thousands of emails intend has to create the broadest network militant ever set up, a media stopping without precedent announcing the year of the Net in policy, one almost expected to see the new American president adoubé on line. The JF Kennedy of the Net, however, never appeared. The fermented American election 2000 will not have been the equivalent of 1960, year of the famous Kennedy-Nixon debate which devoted forever the role of television in policy.

To however say that the Net does not have cheek any role in this election would be an error. In an election where a few hundreds of ballot papers will make the difference between GW Bush and Al Gore, it would be absurd to say that all the efforts of information, recruitment and mobilization online will not have had any impact. A margin of so narrow difference, the least voice, the least handshake, the least email perhaps will have taken into account.

Let us guarantee that these questions will feed the reflexions of the academics again and of the observers warn when the médiatico-politico-legal fever caused by electoral confusion in Florida falls down. By then, Netpolitique.net adds its contribution has the building with the interview of the month and amounts on the lessons drawing from the American countryside.

S.M.

REVIEW Of ACTU

France

Congress of the PS: the Net breaks environment

Transfer, November 25, 2000

The congress of the PS is on Internet. Speech, motions, forum of discussion, little attended: on the Web, the policy trails the feet.

http://www.transfert.net/fr/cyber_societe/article.cfm?idx_rub=87&idx_art=2713

FranceElectorale.com joins together Charles Millon, Domenica Voynet and more than 50 other candidates

Sam-mag, 1/11/00

This site dedicated to the elections, to the elected officials and the electoral futurology, proposes to all the candidates to record easily and free their candidature for the local elections. By a simple form, they enrich an electoral chart posting the current elected officials. The candidates with the next local elections can thus diffuse on the Net, on a site independent of very political

First congers virtual for the German greens

Transfer, it/11/00

The federation of Bade-Württemberg of the party ecologist will organize, at the end of November, a meeting of its authorities on the Net.

To see the article http://www.transfert.net/fr/cyber_societe/article.cfm?idx_rub=87&idx_art=2450

Anti-cybercriminalité draft: the Net surfers make pressure "would the anti-cybercriminalité treaty be out the law?"

Transfer, November 13, 2000

The Council of Europe, in charge of the drafting of an international treaty of fight against the cybercriminality must re-examine its copy in the current of the week. It is what has just announced one of the persons in charge for the organization, which proposes the bad reception of the project by the civil company. According to the Reuters agency, which reveals the carryforward, the authorities charged to negotiate the treaty would have received not less than 400 e-mail of protest since last April. would 400 e-mail in 7 months be enough to make change opinion the negotiators, police officers or policies, of 47 countries?

http://www.transfert.net/fr/articles/imprime_article.cfm?idx_rub=87&idx_art=2529

The electronic war is a terrorism like the others

The former Israeli minister for science denounced the electronic jihad which puts at evil Israeli Internet network (see Netpolitique Newsletter No 4). He calls has a International Convention to condemn sabotage by Internet as well as any other act of terrorism.

Article of Newsbytes (in English)

<http://www.newsbytes.com/news/00/157986.html>

Of Peer-to-Peer (P2P) to Vote-to-Voting

After voteauction.com, Ebay of the policy where one could sell his vote with highest offerer, the last weeks of the American countryside saw appearing a new site spoilsport: nadertrader.org, Napster of the policy where militant greens and democratic sympathizers could exchange their vote like Pokémon charts.

The site, quickly followed by a series of clones, was creates by supporters of the candidate of the Greens, Ralph Nader, to solve the painful dilemma of tens of thousands of democrats: to vote "useful" for Gore - and thus to counter Bush- or vote for Nader, the white knight of the American left and to thus allow him to reach the fateful bar of the 5%, legal limit of the refunding of the expenses of countryside (only for the candidates which chose the public financing).

Nadertrader.org will have finally made it possible several thousands of voters to make both. The site, now put in day before, made it possible to connect sympathizers of the one and of Gore and Bush were with the elbow with elbow against a promise of vote for Nader in a State already considered won over to the republican candidate.

This new system, if it persists, should provide a beautiful subject of research for the researchers in political sciences... and a serious

headache for the political sounders and strategists.

The site and its "clones":

<http://www.nadertrader.org>

<http://www.voteexchange.com>

L'INTERVIEW

EDITO : Une élection pas Net.

Après un an et demie de campagne active, une demi-douzaine de sites web pour chacun des deux candidats, des dizaines de milliers d'emails destinés à créer le plus large réseau militant jamais mis en place, un barrage médiatique sans précédent annonçant l'année du Net en politique, on s'attendait presque à voir le nouveau président américain adoubé en ligne. Le JF Kennedy du Net, pourtant, n'est jamais apparu. L'élection américaine cuvée 2000 n'aura pas été l'équivalent de 1960, année du célèbre débat Kennedy-Nixon qui consacra à jamais le rôle de la télévision en politique.

Dire cependant que le Net n'a joué aucun rôle dans cette élection serait une erreur. Dans une élection où quelques centaines de bulletins de vote feront la différence entre GW Bush et Al Gore, il serait absurde de dire que tous les efforts d'information, de recrutement et de mobilisation online n'auront eu aucun impact. Avec une marge de différence si étroite, la moindre voix, la moindre poignée de main, le moindre email peut-être aura compté.

Gageons que ces questions alimenteront à nouveau les réflexions des universitaires et des observateurs avisés lorsque la fièvre médiatico-politico-juridique suscitée par la confusion électorale en Floride sera retombée. D'ici là, Netpolitique.net apporte sa pierre à l'édifice avec l'interview du mois et revient sur les leçons à tirer de la campagne américaine.

REVUE D'ACTU

France

Congrès du PS : le Net casse l'ambiance

Transfert, le 25 novembre 2000

Le congrès du PS est sur Internet. Discours, motions, forum de discussion, peu fréquenté : sur le Web, la politique traîne les pieds.

http://www.transfert.net/fr/cyber_societe/article.cfm?idx_rub=87&idx_art=2713

La FranceElectorale.com réunit Charles Millon, Dominique Voynet et plus de 50 autres candidats

Sam-mag, le 1/11/00

Ce site dédié aux élections, aux élus et à la prospective électorale, propose à tous les candidats d'enregistrer facilement et gratuitement leur candidature aux élections municipales. Par un formulaire simple, ils enrichissent une carte électorale affichant les élus actuels. Les candidats aux prochaines élections municipales peuvent ainsi diffuser sur le net, sur un site indépendant de tout parti politique, les premières informations sur leur campagne électorale.

Tocqueville et Internet

Dossier d'arrêt sur images, émission du 9 novembre consacrée à la publicité politique

<http://www.lacinqieme.fr/asi/003387/32/10940.cfm>

International

Les parlementaires britanniques sont mous du Net.

The Guardian, 2/11/00

Une étude publiée en Grande-Bretagne a passé en revue les sites des parlementaires britanniques : le résultat n'est pas brillant. The Institute of Economic Affairs juge la construction de certains sites "inepte, à la limite du comique". Ces sites sont pour la plupart d'entre eux "creux et mal fagotés". Seul un petit nombre d'élus ont su mettre à profit les possibilités offertes par le Net pour communiquer avec leurs électeurs et se faire entendre.

Article du Guardian (en anglais): <http://www.guardianunlimited.co.uk/Archive/Article/0,4273,4085304,00.html>

Autres liens: <http://www.iea.org.uk/wpapers/mpsites.htm>

Premier congrès virtuel pour les verts allemands

Transfert, le /11/00

La fédération du Bade-Württemberg du parti écologiste organisera, fin novembre, une réunion de ses instances sur le Net.

Lire l'article http://www.transfert.net/fr/cyber_societe/article.cfm?idx_rub=87&idx_art=2450

Traite anti-cybercriminalité : les internautes font pression "Le traité anti-cybercriminalité serait-il hors la loi ?"

Transfert, le 13 novembre 2000

Le Conseil de l'Europe, chargé de la rédaction d'un traité international de lutte contre la cybercriminalité doit revoir sa copie dans le courant de la semaine. C'est ce que vient d'annoncer l'un des responsables de l'organisation, qui met en avant le mauvais accueil du projet par la société civile. Selon l'agence Reuters, qui révèle le report, les autorités chargées de négocier le traité auraient reçu pas moins de 400 e-mails de protestation depuis avril dernier. 400 e-mails en 7 mois suffiraient-ils à faire changer d'opinion les négociateurs, policiers ou politiques, de 47 pays?

http://www.transfert.net/fr/articles/imprime_article.cfm?idx_rub=87&idx_art=2529

La guerre électronique est un terrorisme comme les autres

L'ancien ministre des science israélien a dénoncé le jihad électronique qui met à mal le réseau Internet israélien (voir Netpolitique Newsletter No 4). Il appelle à une convention internationale pour condamner le sabotage par Internet au même titre que tout autre acte de terrorisme.

Article de Newsbytes (en anglais)

<http://www.newsbytes.com/news/00/157986.html>

Du Peer-to-Peer (P2P) au Voter-to-Voter

Après [voteauction.com](http://www.voteauction.com), l'Ebay de la politique où l'on pouvait vendre son vote au plus offrant, les dernières semaines de la campagne américaine ont vu apparaître un nouveau site trouble-fête: [nadertrader.org](http://www.nadertrader.org), le Napster de la politique où militants verts et sympathisants démocrates pouvaient troquer

Le livre du mois

Les Blogs de Benoit Desavoie

» **Détails**

leur vote comme des cartes Pokémon.

Le site, rapidement suivi par une série de clones, a été créé par des supporters du candidat des Verts, Ralph Nader, pour résoudre le douloureux dilemme de dizaines de milliers de démocrates : voter "utile" pour Gore –et ainsi contrer Bush- ou voter pour Nader, le chevalier blanc de la gauche américaine et lui permettre ainsi d'atteindre la barre fatidique des 5%, limite légale du remboursement des frais de campagne (uniquement pour les candidats qui ont opté pour le financement public).

Nadertrader.org aura finalement permis à plusieurs milliers d'électeurs de faire les deux. Le site, aujourd'hui mis en veille, offrait la possibilité de mettre en relation des sympathisants de l'un et de Gore et Bush étaient au coude à coude contre une promesse de vote pour Nader dans un Etat déjà considéré acquis au candidat républicain.

Ce système inédit, s'il persiste, devrait fournir un beau sujet de recherche pour les chercheurs en sciences politiques ... et un sérieux casse-tête pour les sondeurs et stratèges politiques.

Le site et ses "clones":

RTMark, ziberaktibismoa eta umore garratza

Aldarrikapen politikoa umorearekin nahasten duen kolektiboa

Subertsio lan mingarria izan daiteke Interneten norbaiten parodia egitea. Haren trapu zaharrak denen aurrean eskegitzeko modu hobetik ez dago. Sareak ematen duen izengabetasuna profitatuz egiten dute askok, baina beste batzuek talde baten izenean hartzen dute ekintzon aitatasuna. Ezagunena rMark izenarekin aritzen den EEBBetako ziberekintzaileen taldea da.

RTMark-eko kideek aldi berean aktibistak eta artistak dira, *artibistak* beraz. Euren tresnak webguneen diseinua eta e-postaren bidezko kanpainak dira eta euren parodien biktimak korporazio handiak eta politikariak dira. Korporazio handien harrokeriaren aurka aritzen diren arren, RTMark bera korporazio bezala eratu dute. Paradoja eman dezake honek baina eurek diotenez, euren buruak babesteko egin dute: "korporazioek erantzukizun mugatua dute. Horrek zera esan nahi du, gure sabotaiak ekintzen ondorioengatik taldeko kide banakooi ez zaigula ezer gertatuko". Taktika hori balio izan zaie korporazioen arduragabekeria eta sistemak korporazioen jokabidea faboretzen duela agerian uzteko.

Korporazio guztien xedea onura, diru onura den bitartean, bertako akzioak erosten dituztenei kultur onura eskaintzen die RTMark-ek. Ekintzek komunikabideetan izan duten oihartzuna erabiltzen dute enpresaren arrakasta neurtzeko. Egun, denek *puntucom* enpresekin aberastu nahi dutenean, dirua galtzeko egina dagoen enpresa sortu dute, dirua oihartzun mediatiko bihurtzeko hobe esan. Euren nortasun indibidualei uko eginda, RTMark enpresaren irudi korporatiboa eraiki dute eta nahiko famatua bihurtu da dagoeneko.

Funtsean, kanpainei dagokienez, enpresaren funtzionamendua honelakoxea da: Norbaitek kanpaina bat proposatzen du, esaterako, korporazio baten aurka. Arrazoiak emanez, kanpainak zer eta nola nabarmendu behar duen proposatzen du. Inbertitzaileek, kanpaina irudimentsua bada eta xedea euren aburuz lagundu behar bada, dirua inbertituko dute eta kanpaina aurrera aterako da. Jendea eta dirua lortzen ez den bitartean kanpaina ez da abiatuko, eta horrelako egoeran daude RTMark-en kanpaina asko.

Webgunearen hasierako orrialdean taldeak egin dituen edo egiten ari den kanpainen zerrenda

luzea dago, zein baino zein originalagoa eta ikusgarriagoa. Lau hizkiz bereiztuta daude kanpainak eta bakoitza sakatuta, zein urratsetan dagoen azalduko digute.

Hainbat taldek motibazio politiko argirik ez izatea leporatu dien bitartean, eurek EEBBetan egun aldarrikapen politikoak egiteko dagoen modurik onena umorea eta ironia dela diote. Ezker tradizionalaren diskurtso serioa erabiliz oso gaitza omen da inor zureganatzea EEBBetan, baina erradikaltasunaren estigma hori gaindi daiteke kritika politikoa umorearekin nahasita badoa.

Webgune xebreak

Euren arrakasta mediatikoen zerrenda azken aldian puri-purian izan den gai batekin has dezakegu: EEBBetako hauteskundeetan hautagai izan den George Bush erridikuluan uzten duen webgunea aurki dezakegu gwush.com domeinuan. Bertan, Bushen benetako orrialdearen antz handia duen webgunean, benetako irudiak ageri dira: Bush jai batean erabat mozkor eginda edo bere sudurrean hatzamarrarekin lanean ari dela ikus daiteke. Haren deklaraziorik polemikoenen bilduma ederra ere topa daiteke bertan. Honekin lotuta, jendearen botoa salgai jartzen duen webgunea ere rMark-en lana da: nork bere botoa eskain dezake, hautagaiek enkantean eros dezakete eta azkenean denak pozik. Eskandaluak webgunearen itxiera ekarri du, hauteskuden batzordearen aginduz.

Beste ekintza famatu bat Popotla mexikar herrikoa izan zen. Herrixka horretan *Titanic* filmaren pasarte batzuk filmatu zituzten. Untziaren ondoratzea irudikatzeko izugarritzko ur ontziak eraki zituzten hondartzaren erdian. Herritarrentzat hondartza ixteaz gain, ura ere kutxatu zuten ontzi erraldoitik zetozen filtrazioekin. Popotlarrek ontziak inguratzen zituen orma zaborrez *apaindu* zuten protesta moduan. rTMark-ekoak Ars Electronica jaialdian epaimahaian zeudela jakin zuten *Titanic*-entzat izango zela animazioaren saria. Erantzun moduan Popotlarrei beste sari bat eman zieten eta ez bertara aurkeztu ziren filmi. Webgunean bertan badira talde honek eginiko lan gehiago.

RTMark, ziberaktibismoa eta umore garratza

Aldarrikapen politikoa umorearekin nahasten duen kolektiboa

Subertsio lan mingarria izan daiteke Interneten norbaiten parodia egitea. Haren trapu zaharrak denen aurrean eskegitzeko modu hobetik ez dago. Sareak ematen duen izengabetasuna profitatuz egiten dute askok, baina beste batzuek talde baten izenean hartzen dute ekintzon aitatasuna. Ezagunena rMark izenarekin aritzen den EEBBetako ziberekintzaileen taldea da.

RTMark-eko kideek aldi berean aktibistak eta artistak dira, *artibistak* beraz. Euren tresnak webguneen diseinua eta e-postaren bidezko kanpainak dira eta euren parodien biktimak korporazio handiak eta politikariak dira. Korporazio handien harrokeriaren aurka aritzen diren arren, RTMark bera korporazio bezala eratu dute. Paradoja eman dezake honek baina eurek diotenez, euren buruak babesteko egin dute: "korporazioek erantzukizun mugatua dute. Horrek zera esan nahi du, gure sabotaiak ekintzen ondorioengatik taldeko kide banakooi ez zaigula ezer gertatuko". Taktika hori balio izan zaie korporazioen arduragabekeria eta sistemak korporazioen jokabidea faboretzen duela agerian uzteko.

Korporazio guztien xedea onura, diru onura den bitartean, bertako akzioak erosten dituztenei

kultur onura eskaintzen die RTMark-ek. Ekintzek komunikabideetan izan duten oihartzuna erabiltzen dute enpresaren arrakasta neurtzeko. Egun, denek *puntucom* enprekin aberastu nahi dutenean, dirua galtzeko egina dagoen enpresa sortu dute, dirua oihartzun mediatiko bihurtzeko hobe esan. Euren nortasun indibidualei uko eginda, RTMark enpresaren irudi korporatiboa eraiki dute eta nahiko famatua bihurtu da dagoeneko.

Funtsean, kanpainei dagokienez, enpresaren funtzionamendua honelakoxea da: Norbaitek kanpaina bat proposatzen du, esaterako, korporazio baten aurka. Arrazoiak emanez, kanpainak zer eta nola nabarmendu behar duen proposatzen du. Inbertitzaileek, kanpaina irudimentsua bada eta xedea euren aburuz lagundu behar bada, dirua inbertituko dute eta kanpaina aurrera aterako da. Jendea eta dirua lortzen ez den bitartean kanpaina ez da abiatuko, eta horrelako egoeran daude RTMark-en kanpaina asko.

Webgunearen hasierako orrialdean taldeak egin dituen edo egiten ari den kanpainen zerrenda luzea dago, zein baino zein originalagoa eta ikusgarriagoa. Lau hizkiz bereiztuta daude kanpainak eta bakoitza sakatuta, zein urratsetan dagoen azalduko digute.

Hainbat taldek motibazio politiko argirik ez izatea leporatu dien bitartean, eurek EEBBetan egun aldarrikapen politikoak egiteko dagoen modurik onena umorea eta ironia dela diote. Ezker tradizionalaren diskurtso serioa erabiliz oso gaitza omen da inor zureganatzea EEBBetan, baina erradikaltasunaren estigma hori gaindi daiteke kritika politikoa umorearekin nahasita badoa.

Webgune xelebreak

Euren arrakasta mediatikoen zerrenda azken aldian puri-purian izan den gai batekin has dezakegu: EEBBetako hauteskundeetan hautagai izan den George Bush erridikuluan uzten duen webgunea aurki dezakegu gwobush.com domeinuan. Bertan, Bushen benetako orrialdearen antz handia duen webgunean, benetako irudiak ageri dira: Bush jai batean erabat mozkor eginda edo bere sudurrean hatzamarrarekin lanean ari dela ikus daiteke. Haren deklaraziorik polemikoenen bilduma ederra ere topa daiteke bertan. Honekin lotuta, jendearen botoa salgai jartzen duen webgunea ere rMark-en lana da: nork bere botoa eskain dezake, hautagaiek enkantean eros dezakete eta azkenean denak pozik. Eskandaluak webgunearen itxiera ekarri du, hauteskuden batzordearen aginduz.

Beste ekintza famatu bat Popotla mexikar herrikoa izan zen. Herrixka horretan *Titanic* filmaren pasarte batzuk filmatu zituzten. Untziaren ondoratzea irudikatzen izugarritzeko ur ontziak eraki zituzten hondartzaren erdian. Herritarrentzat hondartza ixteaz gain, ura ere kutxatu zuten ontzi erraldoitik zetozen filtrazioekin. Popotlarrek ontziak inguratzen zituen orma zaborrez *apaindu* zuten protesta moduan. rMark-ekoak Ars Electronica jaialdian epaimahaian zeudela jakin zuten *Titanic*-entzat izango zela animazioaren saria. Erantzun moduan Popotlatarrei beste sari bat eman zieten eta ez bertara aurkeztu ziren filmei. Webgunean bertan badira talde honek eginiko lan gehiago.

Yahoo's new [Buzz Index](#) promises to redefine the way we define currents and fads...

Every day, we determine which subjects hold the most interest for Yahoo! visitors by ranking subjects by their buzz score. A subject's buzz score is the percentage of users searching for that subject on a given day, multiplied by a constant to make the number easier to read. Movers are the subjects that have increased their buzz score over the previous day's score by the greatest percentage. Leaders are the subjects with the greatest buzz

[Homeless](#)

The correct buzzwordy techno-term for the business I toured is: "a server co-location facility." I couldn't help but think as I left the building, past a woman huddled under the shelter of the ATM machine, past the homeless-made tent, past the garbage-filled cylinders dutifully keeping the homeless cold, that maybe some of those millions would have been better spent on a "homeless co-location facility." Maybe some of that expensive real-estate filled with empty black lockers ought to be filled with apartments. Maybe there's paradoxically such a thing as too much capital and not enough cash. Maybe there's something sick about a society that chooses brushed stainless steel logos and \$3000 LCD monitors over keeping everyone warm and healthy.

[AOL's Ad Crunch Quarter](#)

Thing is, in this season of the online ad crunch, what has been seen as an indication of a diversifying and stabilizing business model and good for the long term, can be seen as a sign of vulnerability. With industrywide concern over the state of online advertising at an all-time high -- and enthusiasm for Internet investing nearing all-time lows -- it's not surprising that the ad/commerce part of AOL's business was the most anticipated and scrutinized aspect of Wednesday's announcement.

Canadian activists gear up to protest the [G20 meeting on October 24 and 25...](#)

'Meetings such as these have been coming under increasing criticism for their closed-door policy, for inviting non-elected bodies (the IMF and the World Bank) to the table and for putting the economy ahead of social benefits in their decision-

quarter," COO Ed Zander said, adding that "we're firing on all fronts... Demand is strong, we're setting the agenda for the industry."

Submitted on Oct 19 2000 - 16.13 by hack

[Are the days of Disco Economics returning?](#)

Most of the economists we talked to scoffed at the prospect. The stagflation of the late 1970s and early 1980s was the result of "inappropriate monetary policy," says First Union Capital Markets economist Mark Vitner. Back then, the Federal Reserve raised interest rates as it sought to dampen the inflation that had been ignited by higher oil prices. But it succeeded only in pitching the economy into a slowdown. Today's Fed, he says, is unlikely to make the same mistake. "To say we're entering a stagflationary environment is pure baloney," agrees Lehman Brothers chief economist Stephen Slifer. "My guess is that the fear is far in excess of what the reality is going to be."

[Megabits Among the Homeless](#)

The correct buzzwordy techno-term for the business I toured is: "a server co-location facility." I couldn't help but think as I left the building, past a woman huddled under the shelter of the ATM machine, past the homeless-made tent, past the garbage-filled cylinders dutifully keeping the homeless cold, that maybe some of those millions would have been better spent on a "homeless co-location facility." Maybe some of that expensive real-estate filled with empty black lockers ought to be filled with apartments. Maybe there's paradoxically such a thing as too much capital and not enough cash. Maybe there's something sick about

administered by the Communist Party and state.'

Yahoo's new [Buzz Index](#) promises to redefine the way we define currents and fads...

Every day, we determine which subjects hold the most interest for Yahoo! visitors by ranking subjects by their buzz score. A subject's buzz score is the percentage of users searching for that subject on a given day, multiplied by a constant to make the number easier to read. Movers are the subjects that have increased their buzz score over the previous day's score by the greatest percentage. Leaders are the subjects with the greatest buzz score for a given day. All the rankings on the Buzz Index -- both movers and leaders -- are updated each weekday and reflect the traffic from two days earlier.

Die Ästhetik der Lüge

Wie die WTO einmal die Abschaffung der Demokratie propagierte. Über das interventionistische Cybertheater der Yes Men. von roberto simanowski

Während im Literaturbetrieb das Ende der genauso apolitischen wie selbstinszenatorischen Popkultur ausgerufen wird, gibt es im Internet einen Polit-Pop, der mit bösen Mitteln gute Werke tut. Da werden Websites gefälscht, da werden Falschmeldungen in Umlauf gebracht, da geben sich Künstler als Politiker aus. Aber die Inszenierung ist nicht Selbstzweck. Die Hochstapelei erfolgt im Dienst der Aufklärung und dient der Vermittlung von Medienkompetenz. Es geht um die Erziehung zum Misstrauen.

Der gefälschte WTO-Vertreter

Eine der berühmtesten und erfolgreichsten Gegengeschichten ist die der gefälschten Website der World Trade Organization. Folgendes war passiert. Die Aktionsgruppe RTMark, die auch im E-Toy-War mitmischte und dem Präsidentschaftskandidaten George W. Bush zu einer zweiten, ungewollten Website verhalf, produzierte die Website Gatt.org und übergab diese im März 2000 der Hochstaplergruppe. Die erhielt kurz darauf die E-Mail-Anfrage des Center for International Legal Studies in Salzburg, ob Mike Moore, Direktor der WTO, auf einer Konferenz zur internationalen Rechtsprechung die Perspektive der WTO vorbringen würde. The Yes Men mailten im Namen Moores, dass dieser verhindert sei, gern aber Dr. Andreas Bichlbauer aus Wien vorbeikommen könnte. Und so fuhr Mr. Bichlbauer nach Salzburg, mit zwei security assistants, die eine security camera bei sich trugen, deren Notwendigkeit man den Herren leicht plausibel machen konnte. Und so liegt heute neben den Dokumenten auch ein Video Stream vor.

Bichlbauers Vortrag, so The Yes Men, described the WTO's ideas and ultimate aims in terms that were horrifyingly stark-suggesting, for example, the replacement of inefficient democratic institutions like elections with private-sector solutions like an Internet startup selling votes to the highest corporate bidder. None of the lawyers in attendance expressed dismay at Dr. Bichlbauer's proposals.

Der Vorschlag des direkten Stimmenkaufs ist in der Tat starker Tobak, aber die Beschreibung des bisher üblichen, über Wahlkampagnen und

TV vermittelten Stimmenkaufs ist es nicht minder (zur späteren Umsetzung auch dieser Aktion in Zusammenarbeit mit Voteauction.com siehe den Aufruf zum Umlenken der Besucher der Website eines US-Präsidentschaftskandidaten). Am schärfsten aber sind die Herzchen in der Power-Point-Grafik, mit der Bichlbauer seinen Vorschlag illustrierte. Was, um alles in der Welt, dachten die Konferenzteilnehmer, als sie die Herzchen sahen!

So ganz ohne Verdacht blieb man in Salzburg nicht. Der Konferenzorganisator schrieb am nächsten Tag an »Moore's Sekretär«, dass man etwas verwirrt über Bichlbauers Rede gewesen sei, vor allem was seine Position betrifft, dass die Italiener keine Arbeitsmoral hätten, dass man die Wahlstimmen dem Meistbietenden verkaufen solle und dass es Aufgabe des WTO sei, eine One World Culture zu schaffen. Man sieht, die Nachfragen kommen an der richtigen Stelle, man könnte also beruhigt sein. Aber die Geschichte ist noch nicht zu Ende.

The Yes Man legten noch eins drauf, indem sie einen Zwischenfall erfanden: Am Rande der Veranstaltung wurde Bichlbauer eine Cremetorte ins Gesicht geschlagen. Die falschen Vertreter der WTO nutzten diese Erfindung, um den Konferenzteilnehmern weitere Aussagen für die Website abzuluchsen. In ihrer E-Mail an die Delegierten hieß es:

A few hours after that lecture, someone anonymously hurled a pie in Dr. Bichlbauer's face. This would have remained merely another irritating illustration of the WTO's unpopularity in today's world of snap judgements, had Dr. Bichlbauer not contracted a rather severe infection from the pie, which was somewhat spoiled. // We are treating this matter with the utmost gravity, as you can surely understand, and so we are asking everyone who was present at the conference, whether or not you saw Dr. Bichlbauer's lecture, to provide us with the following: // 1. If you attended the lecture, we would love to hear your personal reactions to it, as part of our efforts at quality control, and to avoid situations like this in the future. Was the lecture offensive in any way? What struck you the most about it? ...

Da die Resonanz gering war, ließ die WTO Mr. Bichlbauer an den Folgen einer Infektion sterben, die durch den Kontakt mit der verdorbenen Torte ausgelöst wurde.

Dr. Andreas Bichlbauer, who spoke on behalf of the WTO at the CILS conference in Salzburg on Oct. 27, and with whom many of you shared a pleasurable moment or two, has passed on. He succumbed yesterday, at 16:50 CET, to an infection thought to have been caught from the rotten pie which was hurled in his face after his Oct. 27 lecture. // We feel sure that you understand the urgency now with which we ask you all to furnish us with any and all information you may have regarding this crime, which to this day remains wholly unsolved. Our only current lead is the »voter fraud« angle.

Apparently Dr. Bichlbauer said something in his talk that enraged one of

the delegates, so much so that said delegate has refused to speak with us, and has accused the WTO of »encouraging voter fraud« ... (27. November)

Die Geschichte nimmt Züge der Trivialdramatik an und prüft deren Brauchbarkeit unter höher Gebildeten. Die - schockiert durch den unerwarteten Tod von Dr. Bichlbauer - sandten entsprechende Kondolenzbekundungen und Kommentare wie:

This is a tragic situation for all of us involved in these international trade matters. I trust that after the investigation has been carried out and the criminal caught, WTO will make the entire incident public so that the effects of this sort of outrageous behavior can be more widely known and condemned.

Although I believe that I was sitting at the seminar group where Mr. Bichlbauer was making his presentation I did not pay attention to his speech whilst I was preparing my presentation for the afternoon session.

Rechtzeitig vor dem angesetzten Beerdigungstermin wurde die Lügengeschichte am 30. November mit einer Aufdeckung abgeschlossen, die selbst wieder eine Lüge war. Mr. Bichlbauer wurde enttarnt, aber die Enttarner blieben undercover:

Dear Delegates, (...) Dr. Bichlbauer, his »security guard,« and his »cameraman« ... belong, it turns out, to an anti-trade cabal called »The Yes Men,« whose interests run exactly counter to our own, and who will stoop to any level whatsoever to make points. // (The point they were attempting to make with this trickery, according to the handwritten letter which we received by this morning's post, had something to do with »corporate power« and »democracy,« though the syntax and handwriting of the letter are, truth be told, too execrable to make much of. (We will be happy to provide a copy of the letter if anyone wishes to see it.))

Man bietet Kopien des handschriftlichen Briefes an - als wäre damit irgendwas bewiesen. Und damit endet die Story. Der Leser aber steht nun der Frage gegenüber, was von alledem eigentlich der Wahrheit entspricht.

Ist es möglich, dass die Herren in Salzburg diesen Schmarren geglaubt haben? Die Herzchen? Und das Bild vom schlafenden Italiener als Faulheitsbeweis? Ist es möglich, dass jemand zugibt, der ganzen Rede nicht zugehört zu haben, weil er die eigene noch vorbereiten musste? Oder sind wir selbst die Ausgelachten, wenn wir glauben, die anderen hätten einen so offensichtlichen Unsinn geglaubt.

Hermeneutik des Verdachts

Auf die Frage gibt es kaum eine Antwort von außen. Will man etwa eine

E-Mail an The Yes Man senden? Oder an die Herren in Salzburg? Nein, hier steht man plötzlich allein, und keiner sagt einem, was man glauben soll. In dieser Heimatlosigkeit liegt die Hoffnung der Zukunft. Man muss selbst urteilen, muss abwägen, seinen gesunden Menschenverstand zusammennehmen und die innere Logik des Präsentierten prüfen.

Man muss genau das Verhalten entwickeln, das es braucht, um heute und in Zukunft als Leser zu bestehen. Denn wir leben in einem Zeitalter der Übertreibungen, der mangelhaft geprüften Tatsachen und regelrechten Fälschungen.

Der Drang (und Zwang), über eine Sache zu berichten, möglichst noch ehe sie überhaupt passiert ist, bringt eine Vernachlässigung der Recherche mit sich, die in den neuen Medien zum Prinzip des »publish now, edit later« führt. Denn online lassen sich Fehler ja auch im Nachhinein und vom Leser unbemerkt beseitigen - was zum sonderbaren Umstand einer »umgekehrten Halbwertszeit« führt, wonach die Relevanz eines Online-Beitrages mit dem zeitlichen Abstand von seiner Erstveröffentlichung wächst.

Und die Bilder? Ach, die meisten glauben ja noch immer, was sie sehen. Dabei ist doch seit Spielbergs »Jurassic Park« klar, wie Bilder manipuliert werden können. Das wussten einige zwar schon bei Einführung der Fotografie - sie verwiesen auf die im Foto wirksame Subjektivität des Kameramanns, angefangen bei der Auswahl des Objekts, über den eingenommenen Blickwinkel bis hin zur Belichtung. Da dieses Medium von den meisten Rezipienten jedoch selbst als dokumentarisches benutzt wird - der Nachweis des wirklich Geschehenen auf Familienfesten und Urlaubsreisen -, hält sich hartnäckig der Verdacht, es zeige die Dinge so, wie sie geschehen sind. Das wird sich ändern; spätestens mit dem Siegeszug der digitalen Kameras, wenn jeder Tourist zu einem Lügner wird, der sich seine Urlaubsbilder zurecht retuschiert.

Bei solchen Voraussetzungen und Aussichten muss der Leser schließlich zum Detektiv werden, muss seinen Blick für das Unglaubliche schärfen. Er mag an Romanen und Filmen gesehen haben, wie das geht, nun hat er es anzuwenden, wenn er die Zeitung oder eine Website liest. Die moderne Lektüre muss auf einer Hermeneutik des Verdachts gründen. Im vorliegenden Fall wäre ein Indiz, das Zweifel am dokumentarischen Charakter des Materials aufkommen lässt (neben den erwähnten Übertreibungs-Images und der Tortenschlacht) z.B. der Brief eines Michael Johnson, der auf das Auskunftsersuchen der falschen WTO auf Deutsch geantwortet haben soll:

Wegen unerwarteten Gerichtspflichten hier in Amerika habe ich die Sitzung in Salzburg ganz verpasst. Kann deswegen nichts zur Erforschung dieser Schande vermitteln. Mir scheint's aber, man solle nicht vermuten, es hänge irgendwie mit Dr. Bichlbauers Rede zusammen. Leute, die zu solchen Gewalttaten zurueckgreifen, sind meines Erachtens meistens unfähig sich muendlich auszudruecken oder die Ausdruecke der Anderen weder zu verstehen noch zu bewerten. Ich wuensche dem Herrn Dr. Bichlbauer eine moeglichst

schnelle Erholung. Mit besten Gruessen, Michael Johnson

Dass gerade der, der bei anderen mangelndes Ausdrucksvermögen moniert, die Sprache selbst nicht sicher beherrschen soll, ist schon merkwürdig genug. Nun könnte Michael Johnson Amerikaner sein. Aber wieso sollte er dann auf Deutsch antworten? Die »unerwarteten Gerichtspflichten« könnten noch als Flüchtigkeitsfehler durchgehen, nicht aber die falsche Präposition »zu solchen Gewalttaten zurueckgreifen« oder die doppelte Verneinung in: »Leute sind unfähig sich muendlich auszudruecken oder die Ausdruecke der Anderen weder zu verstehen noch zu bewerten«. Michael Johnson könnte aber auch ein E-Mail-Schreiber sein, der den Fake durchschaut hat und das Spiel mitspielt.

Sollte Michael Johnson jedoch eine Erfindung der Yes Men sein, so könnte das Sprachproblem ein ganz reales sein, schließlich sind die Yes Men Amerikaner, oder es von ihnen ist als Figurensprache intendiert und damit trivialästhetisch. Wie auch immer, es lässt an der Echtheit des Dokuments zweifeln. Und vielleicht ist es ja auch so gewollt. Vielleicht ist das die absichtlich gelegte Fährte, die Schlüsselstelle, die uns sagt: Na, spätestens hier wirst du uns doch wohl die Gefolgschaft aufkündigen.

Aufklärung als Lüge

Der Präsident von CNN, mit dem der Netzkünstler Mark Amerika an einer TV-Diskussion teilnahm, sagte nach der Sendung zu ihm, dass er diese Strategie voll und ganz verstehen kann: »We essentially are delivering to our audience our version of the Truth, our version of history-in-the-making, the one we as Internet artists are making up as we go along.«

Natürlich sind auch die Gegengeschichten nicht die Wahrheit, sondern geben nur eine andere Perspektive auf die Dinge wieder. Genau darauf kommt es letztlich an. Will man nicht die Fehler einer Ideologiekritik wiederholen, die unfähig ist, ihre eigenen ideologischen Voraussetzungen reflexiv einzuholen, dann darf auch die Gegengeschichte nicht als Wahrheit stehen bleiben. Es geht nicht darum, der WTO nicht mehr zu glauben, aber dafür dem, was The Yes Man uns auf amüsante Weise über die WTO enthüllt. Es geht darum, nicht mehr zu glauben.

Und nun raten Sie mal, wer hinter der WTO-Sache auch noch steckt. Am Ende der Präsentation des Vorgangs heißt es: »And the Yes Men wish to thank Übermorgen.com for their sponsorship, without which this episode could not have happened.« Womit sich der Kreis wieder schließt zu Schlingensiefel und Schily und Hamlet in Zürich.

Wie soll man die vorliegenden Geschichten nennen? Realfiction? Politische Lügengeschichten? Oder »interventionistisches Cybertheater«, wie es Mark Amerika in Anlehnung an das politische Straßentheater tut.

Auf jeden Fall handelt es sich um eine hoch politische Spielart der Aktionskunst, und dies mag man erstaunt und vielleicht auch erfreut zur Kenntnis nehmen angesichts des Abgangs der Popkultur und speziell der Popliteraten auf das Politische, das in den Büchern der älteren Generation mitunter so bieder-aufklärerisch und moralinsauer daherkommt. Wie schön, dass nicht alle sich nun nur um sich selbst drehen. Und immerhin: Aufklärung im Gewand der Lüge, und dann noch im Internet, das hat was, das ist beinahe cool genug, um selbst Pop zu sein, Polit-Pop gewissermaßen, oder, mit Mark Amerika, Avant-Pop.

The aesthetics of the lie

As the World Trade Organization once the abolishment of the democracy publicised. Over the interventionist Cybertheater of the Yes Men. of roberto simanowski

While in the literature enterprise the end of just as apolitischen is proclaimed as selbstinszenatorischen Popkultur, there is a Polit Pop, which does good works with bad means in the InterNet. There Websites will become falsified, there false alarms brought in circulation, there spend themselves artists as politicians. But the production is not self purpose. The Hochstapelei effected in the service of the clearing-up and serves the switching of medium authority. It concerns the education to the distrust.

The falsified World Trade Organization representative

One the most famous and most successful Gegengeschichten is those the falsified Website of the World trade Organization. The following had happened. The group of actions of blank Marks, which mixed together also in e-Toy-being and which George W. Bush help presidency candidates to a second, inadvertent Website, produced the Website Gatt.org and handed over these in March 2000 of the group of high stackers. Those kept briefly on it the E-Mail inquiry centers for internationally legal of the Studies in Salzburg whether Mike of moorlands, director the World Trade Organization would state, to a conference for international iurisdiction the perspective the World Trade Organization. The Yes Men mailten in the name of moorland that this was prevented, gladly however Dr. Andreas Bichlbauer from Vienna to go past could. And in such a way Mr. Bichlbauer drove to Salzburg, with two security assistants, which carried one security camera with itself, whose necessity one could make easily plausible for the gentlemen. And in such a way today also a video Stream is present beside the documents.

Web master

Bichlbauers lecture, thus The Yes Men, described the WTO's ideas and ultimate aims in terms that were horrifyingly strong suggesting, for example, the replacement OF inefficient democratic institutions like elections with private sector solutions like at InterNet startup selling votes to the highest bidder. None OF the lawyers in attendance expressed dismay. RK Dr. Bichlbauer's per se as.

The suggestion of the direct buying of votes is indeed strong Tobak, but the description of the usual, over election campaigns and TV of mediated buying of votes is not it less (to the later conversion also to this action in cooperation with Voteauction.com see the call for returning the visitors of the Website of a US presidency candidate). Most sharply however the sweet hearts are in the power POINT diagram, with which Bichlbauer illustrated its suggestion. Which, around everything in the world, the conference participants thought, when they saw the sweet hearts!

Without suspicion one did not remain so whole in Salzburg. The conference supervisor wrote on the next day on "moorland secretary" that one had been confused something over Bichlbauers speech, above all which its position concerns that the Italians would not have work moral that one was to sell the votes to the highest bidder and that it is task World Trade Organization to create a One World Culture. One sees, the demands comes in the correct place, one could be thus calmed down. But history is not yet to end.

The Yes one put still one drauf, by inventing an incident: At the edge of the meeting Bichlbauer a cream cake was struck in the face. The wrong representatives the World Trade Organization used this invention, around whom conference participants further statements for the Website abzuluchsen. In its E-Mail to the delegated ones it meant:

A few hours after that lecture, someone anonymously hurled A pie in Dr. Bichlbauer's face. This would have remained merely more another irritating illustration OF the WTO's unpopularity in today's world OF snap judgements, had Dr. Bichlbauer emergency contracted A severe infection from the pie, which which somewhat spoiled.// for incoming goods of acres treating this more matt with the UTM east gravity, as you CAN surely and-purchased, and so incoming goods of acres asking everyone who which present RK the conference, more whether or emergency you saw Dr. Bichlbauer's lecture, ton provide US with the following: 1. If you attended the lecture, incoming goods would love tons hear your personal reactions tons it, as part OF our EFF place RK quality

control, and to avoid situations like this in the future. Which part of the lecture was offensive in any way? What struck you the most about it? ...

Since the resonance was small, the World Trade Organization Mr. Bichlbauer at the consequences of an infection let die, which was released by the contact with the spoiled cake.

Dr. Andreas Bichlbauer, who spoke on managed the World Trade Organization at the CILS conference in Salzburg on Oct. 27, and to OF with whom many OF you shared a pleasurable moment or two, has passed on. He succumbed yesterday, RK 16:50 CET, to an infection thought to have been caught from the rot pie which which hurled into his face after his Oct. 27 lecture.// incoming goods feel sure that you and-arose the urgency now with which incoming goods ask you all tons furnish US with any and all information you may have regarding this crime, which to this day remains wholly unsolved. Our only current lead is the "more voter fraud" fishes.

Apparently Dr. Bichlbauer said something in his talk that enraged one OF the delegates, thus much that in such a way said delegate has refused to speak with US, and has accused the World Trade Organization OF "encouraging more voter fraud"... (27 November)

History accepts courses of the Trivialdramatik and examines their usefulness under more highly education. - shocks by the unexpected death of Dr. Bichlbauer - appropriate Kondolenzbekundungen and comments sent how:

This is a tragic situation for all OF US involved in these internationally trade matters. I trust that after the investigation has been carried out and the criminal caught, World Trade Organization want make the entire incident public in such a way that the effects OF this sort OF outrageous behavior CAN more widely known and condemned.

Although I believe that I which sitting RK the seminar group where Mr. Bichlbauer which making his presentation I did emergency pay attention to his speech whilst I which preparing my presentation for the afternoon session.

In time before the set funeral date lie history was locked on 30 November with an uncovering, which was even again a lie. Mr. Bichlbauer was unmasked, but the Enttarnen remained more undercover:

Dear Delegates, (...) Dr. Bichlbauer, his "security guard," and his "cameraman"... belong, it turns out, tons at anti-trade cabal called "The Yes Men," whose interests run exactly counter tons our own, and who wants stoop tons any level of whatsoever ton make POINTS// (The POINT they were attempting ton make with this trickery, according ton the handwritten type character which incoming goods received by this morning's post office, had something tons of DO with "corporate power" and "democracy," though the syntax and handwriting OF the type character of acres, truth told, too execrable ton make much OF. (incoming goods want happy ton provide A CoPy OF the type character if anyone wishes ton lake it.))

One offers copies of the handwritten letter - as if would be proven to something thereby. And thus the Story ends. The reader however faces now the question, which all that actually corresponds from the truth.

Is it possible that the gentlemen in Salzburg believed this Schmarren? The sweet hearts? And the picture of the sleeping Italian as Faulheitsbeweis? Is it possible that someone admits, for the whole speech to have listened because he had to still prepare the own? Or are we ourselves the laughing at, if we believe, the others a so obvious nonsense would have believed.

Hermeneutik of the suspicion

On the question there is hardly an answer from the outside. Does one want to send a E-Mail at The Yes one? Or to the gentlemen in Salzburg? No, here one stands suddenly alone, and none says to one that one is to believe. In this homelessness the hope of the future lies. One must weigh even judge, must, collect its healthy human understanding and examine the internal logic of the presented one.

One must develop exactly the behavior, which needs it, in order to exist today and in the future as readers. Because we live in one age of the exaggerations, the unsatisfactorily examined facts and proper falsifications.

The urge (and obligation), to report on a thing as still as possible before at all passed, brings it a neglect of the search with itself, which edit in the new media to the principle "publish now, more later" leads. Because on-line can be eliminated error also afterwards and unnoticed by the reader - which leads to the strange circumstance of a "reverse radioactive half-life", according to which the relevance of an on-line contribution with the temporal distance of its Erstveroeffentlichung grows.

And the pictures? Oh, most believe still, what they see. "Jurassic is nevertheless clear park" since play mountain, how pictures can be manipulated. That knew some of course during introduction of the photography - they referred to the subjectivity of the cameraman, begun with the selection of the object, effective in the photo, over the taken point of view up to the exposure. Since this medium is used by most recipients however as documentary - the proof really of the event on family celebrations and vacation trips -, holds themselves persistent the suspicion, it shows the things so, as they happened. That will change; at the latest with the triumphant advance of the digital cameras, if each tourist becomes a liar, who retouches himself its vacation pictures by right.

With such conditions and prospects the reader must its view for the unbelievable the detective finally become, must sharpen. He may have seen at novels and films, how goes using now has he it if he reads the newspaper or a Website. The modern reading must base on a Hermeneutik of the suspicion. In the available case an indication would be, doubt about the documentary character of the material to arise leaves (apart from the mentioned exaggeration images and the cake battle) e.g. the letter of a Michael Johnson, which was to have answered the wrong World Trade Organization to the information request to German:

Wegen unerwarteten Gerichtspflichte hier in Amerika habe ich die Sitzung in Salzburg ganz verpasst. Kann deswegen nichts zur Erforschung dieser Schande vermitteln. Mir scheint's aber, man solle nicht vermuten, es haenge irgendwie mit Dr. Bichlbauers Rede zusammen. Leute, die zu solchen Gewalttaten zurueckgreifen, sind meines Erachtens meistens unfaeig sich muendlich auszudruecken oder die Ausdruecke der Anderen weder zu verstehen noch zu bewerten. Ich wuensche dem Herrn Dr. Bichlbauer eine moeglichst schnelle Erholung. Mit besten Gruessen, Michael Johnson

Dass gerade der, der bei anderen mangelndes Ausdrucksvermögen moniert, die Sprache selbst nicht sicher beherrschen soll, ist schon merkwürdig genug. Nun könnte Michael Johnson Amerikaner sein. Aber wieso sollte er dann auf Deutsch antworten? Die »unerwarteten Gerichtspflichte« könnten noch als Flüchtigkeitsfehler durchgehen, nicht aber die falsche Präposition »zu solchen Gewalttaten zurueckgreifen« oder die doppelte Verneinung in: »Leute sind unfaeig sich muendlich auszudruecken oder die Ausdruecke der Anderen weder zu verstehen noch zu bewerten«. Michael Johnson könnte aber auch ein E-Mail-Schreiber sein, der den Fake durchschaut hat und das Spiel mitspielt.

Sollte Michael Johnson jedoch eine Erfindung der Yes Men sein, so könnte das Sprachproblem ein ganz reales sein, schließlich sind die Yes Men Amerikaner, oder es von ihnen ist als Figurensprache intendiert und damit trivialästhetisch. Wie auch immer, es lässt an der Echtheit des Dokuments zweifeln. Und vielleicht ist es ja auch so gewollt. Vielleicht ist das die absichtlich gelegte Fährte, die Schlüsselstelle, die uns sagt: Na, spätestens hier wirst du uns doch wohl die Gefolgschaft aufkündigen.

Aufklärung als Lüge

Der Präsident von CNN, mit dem der Netzkünstler Mark Amerika an einer TV-Diskussion teilnahm, sagte nach der Sendung zu ihm, dass er diese Strategie voll und ganz verstehen kann: »We essentially are delivering to our audience our version of the Truth, our version of history-in-the-making, the one we as Internet artists are making up as we go along.«

Natürlich sind auch die Gegengeschichten nicht die Wahrheit, sondern geben nur eine andere Perspektive auf die Dinge wieder. Genau darauf kommt es letztlich an. Will man nicht die Fehler einer Ideologiekritik wiederholen, die unfähig ist, ihre eigenen ideologischen Voraussetzungen reflexiv einzuholen, dann darf auch die Gegengeschichte nicht als Wahrheit stehen bleiben. Es geht nicht darum, der WTO nicht mehr zu glauben, aber dafür dem, was The Yes Man uns auf amüsante Weise über die WTO enthüllt. Es geht darum, nicht mehr zu glauben.

Und nun raten Sie mal, wer hinter der WTO-Sache auch noch steckt. Die Ästhetik der Lüge

Wie die WTO einmal die Abschaffung der Demokratie propagierte. Über das interventionistische Cybertheater der Yes Men. von roberto simanowski

Während im Literaturbetrieb das Ende der genauso apolitischen wie selbstinszenatorischen Popkultur ausgerufen wird, gibt es im Internet einen Polit-Pop, der mit bösen Mitteln gute Werke tut. Da werden Websites gefälscht, da werden Falschmeldungen in Umlauf gebracht, da geben sich Künstler als Politiker aus. Aber die Inszenierung ist nicht Selbstzweck. Die Hochstapelei erfolgt im Dienst der Aufklärung und dient der Vermittlung von Medienkompetenz. Es geht um die Erziehung zum Misstrauen.

Der gefälschte WTO-Vertreter

Eine der berühmtesten und erfolgreichsten Gegengeschichten ist die der gefälschten Website der World Trade Organization. Folgendes war passiert. Die Aktionsgruppe RTMark, die auch im E-Toy-War mitmischte und dem Präsidentschaftskandidaten George W. Bush zu einer zweiten, ungewollten Website verhalf, produzierte die Website Gatt.org und übergab diese im März 2000 der Hochstaplergruppe. Die erhielt kurz darauf die E-Mail-Anfrage des Center for International Legal Studies in Salzburg, ob Mike Moore, Direktor der WTO, auf einer Konferenz zur internationalen Rechtsprechung die Perspektive der WTO vorbringen

würde. The Yes Men mailten im Namen Moores, dass dieser verhindert sei, gern aber Dr. Andreas Bichlbauer aus Wien vorbeikommen könnte. Und so fuhr Mr. Bichlbauer nach Salzburg, mit zwei security assistants, die eine security camera bei sich trugen, deren Notwendigkeit man den Herren leicht plausibel machen konnte. Und so liegt heute neben den Dokumenten auch ein Video Stream vor.

Bichlbauers Vortrag, so The Yes Men, described the WTO's ideas and ultimate aims in terms that were horrifyingly stark-suggesting, for example, the replacement of inefficient democratic institutions like elections with private-sector solutions like an Internet startup selling votes to the highest corporate bidder. None of the lawyers in attendance expressed dismay at Dr. Bichlbauer's proposals.

Der Vorschlag des direkten Stimmenkaufs ist in der Tat starker Tobak, aber die Beschreibung des bisher üblichen, über Wahlkampagnen und TV vermittelten Stimmenkaufs ist es nicht minder (zur späteren Umsetzung auch dieser Aktion in Zusammenarbeit mit **Voteauction**. com siehe den Aufruf zum Umlenken der Besucher der Website eines US-Präsidentschaftskandidaten). Am schärfsten aber sind die Herzchen in der Power-Point-Grafik, mit der Bichlbauer seinen Vorschlag illustrierte. Was, um alles in der Welt, dachten die Konferenzteilnehmer, als sie die Herzchen sahen!

So ganz ohne Verdacht blieb man in Salzburg nicht. Der Konferenzorganisator schrieb am nächsten Tag an »Moores Sekretär«, dass man etwas verwirrt über Bichlbauers Rede gewesen sei, vor allem was seine Position betrifft, dass die Italiener keine Arbeitsmoral hätten, dass man die Wahlstimmen dem Meistbietenden verkaufen solle und dass es Aufgabe des WTO sei, eine One World Culture zu schaffen. Man sieht, die Nachfragen kommen an der richtigen Stelle, man könnte also beruhigt sein. Aber die Geschichte ist noch nicht zu Ende.

The Yes Man legten noch eins drauf, indem sie einen Zwischenfall erfanden: Am Rande der Veranstaltung wurde Bichlbauer eine Cremetorte ins Gesicht geschlagen. Die falschen Vertreter der WTO nutzten diese Erfindung, um den Konferenzteilnehmern weitere Aussagen für die Website abzuluchsen. In ihrer E-Mail an die Delegierten hieß es:

A few hours after that lecture, someone anonymously hurled a pie in Dr. Bichlbauer's face. This would have remained merely another irritating illustration of the WTO's unpopularity in today's world of snap judgements, had Dr. Bichlbauer not contracted a rather severe infection from the pie, which was somewhat spoiled. // We are treating this matter with the utmost gravity, as you can surely understand, and so we are asking everyone who was present at the conference, whether or not you saw Dr. Bichlbauer's lecture, to provide us with the following: // 1. If you attended the lecture, we would love to hear your personal reactions to it, as part of our efforts at quality control, and to avoid situations like this in the future. Was the lecture offensive in any way? What struck you the most about it? ...

Da die Resonanz gering war, ließ die WTO Mr. Bichlbauer an den Folgen einer Infektion sterben, die durch den Kontakt mit der verdorbenen Torte ausgelöst wurde.

Dr. Andreas Bichlbauer, who spoke on behalf of the WTO at the CILS conference in Salzburg on Oct. 27, and with whom many of you shared a pleasurable moment or two, has passed on. He succumbed yesterday, at 16:50 CET, to an infection thought to have been caught from the rotten pie which was hurled in his face after his Oct. 27 lecture. // We feel sure that you understand the urgency now with which we ask you all to furnish us with any and all information you may have regarding this crime, which to this day remains wholly unsolved. Our only current lead is the »voter fraud« angle.

Apparently Dr. Bichlbauer said something in his talk that enraged one of the delegates, so much so that said delegate has refused to speak with us, and has accused the WTO of »encouraging voter fraud« ... (27. November)

Die Geschichte nimmt Züge der Trivialdramatik an und prüft deren Brauchbarkeit unter höher Gebildeten. Die - schockiert durch den unerwarteten Tod von Dr. Bichlbauer - sandten entsprechende Kondolenzbekundungen und Kommentare wie:

This is a tragic situation for all of us involved in these international trade matters. I trust that after the investigation has been carried out and the criminal caught, WTO will make the entire incident public so that the effects of this sort of outrageous behavior can be more widely known and condemned.

Although I believe that I was sitting at the seminar group where Mr. Bichlbauer was making his presentation I did not pay attention to his speech whilst I was preparing my presentation for the afternoon session.

Rechtzeitig vor dem angesetzten Beerdigungstermin wurde die Lügengeschichte am 30. November mit einer Aufdeckung abgeschlossen, die selbst wieder eine Lüge war. Mr. Bichlbauer wurde enttarnt, aber die Enttarner blieben undercover:

Dear Delegates, (...) Dr. Bichlbauer, his »security guard,« and his »cameraman« ... belong, it turns out, to an anti-trade cabal called »The Yes Men,« whose interests run exactly counter to our own, and who will stoop to any level whatsoever to make points. // (The point they were attempting to make with this trickery, according to the handwritten letter which we received by this morning's post, had something to do with »corporate power« and »democracy,« though the syntax and handwriting of the letter are, truth be told, too execrable to make much of. (We will be happy to provide a copy of the letter if anyone wishes to see it.))

Man bietet Kopien des handschriftlichen Briefes an - als wäre damit

irgendwas bewiesen. Und damit endet die Story. Der Leser aber steht nun der Frage gegenüber, was von alledem eigentlich der Wahrheit entspricht.

Ist es möglich, dass die Herren in Salzburg diesen Schmarren geglaubt haben? Die Herzchen? Und das Bild vom schlafenden Italiener als Faulheitsbeweis? Ist es möglich, dass jemand zugibt, der ganzen Rede nicht zugehört zu haben, weil er die eigene noch vorbereiten musste? Oder sind wir selbst die Ausgelachten, wenn wir glauben, die anderen hätten einen so offensichtlichen Unsinn geglaubt.

Hermeneutik des Verdachts

Auf die Frage gibt es kaum eine Antwort von außen. Will man etwa eine E-Mail an The Yes Man senden? Oder an die Herren in Salzburg? Nein, hier steht man plötzlich allein, und keiner sagt einem, was man glauben soll. In dieser Heimatlosigkeit liegt die Hoffnung der Zukunft. Man muss selbst urteilen, muss abwägen, seinen gesunden Menschenverstand zusammennehmen und die innere Logik des Präsentierten prüfen.

Man muss genau das Verhalten entwickeln, das es braucht, um heute und in Zukunft als Leser zu bestehen. Denn wir leben in einem Zeitalter der Übertreibungen, der mangelhaft geprüften Tatsachen und regelrechten Fälschungen.

Der Drang (und Zwang), über eine Sache zu berichten, möglichst noch ehe sie überhaupt passiert ist, bringt eine Vernachlässigung der Recherche mit sich, die in den neuen Medien zum Prinzip des »publish now, edit later« führt. Denn online lassen sich Fehler ja auch im Nachhinein und vom Leser unbemerkt beseitigen - was zum sonderbaren Umstand einer »umgekehrten Halbwertszeit« führt, wonach die Relevanz eines Online-Beitrages mit dem zeitlichen Abstand von seiner Erstveröffentlichung wächst.

Und die Bilder? Ach, die meisten glauben ja noch immer, was sie sehen. Dabei ist doch seit Spielbergs »Jurassic Park« klar, wie Bilder manipuliert werden können. Das wussten einige zwar schon bei Einführung der Fotografie - sie verwiesen auf die im Foto wirksame Subjektivität des Kameramanns, angefangen bei der Auswahl des Objekts, über den eingenommenen Blickwinkel bis hin zur Belichtung. Da dieses Medium von den meisten Rezipienten jedoch selbst als dokumentarisches benutzt wird - der Nachweis des wirklich Geschehenen auf Familienfesten und Urlaubsreisen -, hält sich hartnäckig der Verdacht, es zeige die Dinge so, wie sie geschehen sind. Das wird sich ändern; spätestens mit dem Siegeszug der digitalen Kameras, wenn jeder Tourist zu einem Lügner wird, der sich seine Urlaubsbilder zurecht retuschiert.

Bei solchen Voraussetzungen und Aussichten muss der Leser schließlich zum Detektiv werden, muss seinen Blick für das Unglaubliche schärfen. Er mag an Romanen und Filmen gesehen haben, wie das geht, nun hat

er es anzuwenden, wenn er die Zeitung oder eine Website liest. Die moderne Lektüre muss auf einer Hermeneutik des Verdachts gründen. Im vorliegenden Fall wäre ein Indiz, das Zweifel am dokumentarischen Charakter des Materials aufkommen lässt (neben den erwähnten Übertreibungs-Images und der Tortenschlacht) z.B. der Brief eines Michael Johnson, der auf das Auskunftsersuchen der falschen WTO auf Deutsch geantwortet haben soll:

Wegen unerwarteten Gerichtspflichte hier in Amerika habe ich die Sitzung in Salzburg ganz verpasst. Kann deswegen nichts zur Erforschung dieser Schande vermitteln. Mir scheint's aber, man solle nicht vermuten, es haenge irgendwie mit Dr. Bichlbauers Rede zusammen. Leute, die zu solchen Gewalttaten zurueckgreifen, sind meines Erachtens meistens unfaeig sich muendlich auszudruecken oder die Ausdruecke der Anderen weder zu verstehen noch zu bewerten. Ich wuensche dem Herrn Dr. Bichlbauer eine moeglichst schnelle Erholung. Mit besten Gruessen, Michael Johnson

Dass gerade der, der bei anderen mangelndes Ausdrucksvermögen moniert, die Sprache selbst nicht sicher beherrschen soll, ist schon merkwürdig genug. Nun könnte Michael Johnson Amerikaner sein. Aber wieso sollte er dann auf Deutsch antworten? Die »unerwarteten Gerichtspflichte« könnten noch als Flüchtigkeitsfehler durchgehen, nicht aber die falsche Präposition »zu solchen Gewalttaten zurueckgreifen« oder die doppelte Verneinung in: »Leute sind unfaeig sich muendlich auszudruecken oder die Ausdruecke der Anderen weder zu verstehen noch zu bewerten«. Michael Johnson könnte aber auch ein E-Mail-Schreiber sein, der den Fake durchschaut hat und das Spiel mitspielt.

Sollte Michael Johnson jedoch eine Erfindung der Yes Men sein, so könnte das Sprachproblem ein ganz reales sein, schließlich sind die Yes Men Amerikaner, oder es von ihnen ist als Figurensprache intendiert und damit trivialästhetisch. Wie auch immer, es lässt an der Echtheit des Dokuments zweifeln. Und vielleicht ist es ja auch so gewollt. Vielleicht ist das die absichtlich gelegte Fährte, die Schlüsselstelle, die uns sagt: Na, spätestens hier wirst du uns doch wohl die Gefolgschaft aufkündigen.

Aufklärung als Lüge

Der Präsident von CNN, mit dem der Netzkünstler Mark Amerika an einer TV-Diskussion teilnahm, sagte nach der Sendung zu ihm, dass er diese Strategie voll und ganz verstehen kann: »We essentially are delivering to our audience our version of the Truth, our version of history-in-the-making, the one we as Internet artists are making up as we go along.«

Natürlich sind auch die Gegengeschichten nicht die Wahrheit, sondern geben nur eine andere Perspektive auf die Dinge wieder. Genau darauf kommt es letztlich an. Will man nicht die Fehler einer Ideologiekritik wiederholen, die unfähig ist, ihre eigenen ideologischen Voraussetzungen reflexiv einzuholen, dann darf auch die

Gegengeschichte nicht als Wahrheit stehen bleiben. Es geht nicht darum, der WTO nicht mehr zu glauben, aber dafür dem, was The Yes Man uns auf amüsante Weise über die WTO enthüllt. Es geht darum, nicht mehr zu glauben.

Und nun raten Sie mal, wer hinter der WTO-Sache auch noch steckt. Am Ende der Präsentation des Vorgangs heißt es: »And the Yes Men wish to thank Übermorgen.com for their sponsorship, without which this episode could not have happened.« Womit sich der Kreis wieder schließt zu Schlingensiefel und Schily und Hamlet in Zürich.

Wie soll man die vorliegenden Geschichten nennen? Realfiction? Politische Lügengeschichten? Oder »interventionistisches Cybertheater«, wie es Mark Amerika in Anlehnung an das politische Straßentheater tut.

Auf jeden Fall handelt es sich um eine hoch politische Spielart der Aktionskunst, und dies mag man erstaunt und vielleicht auch erfreut zur Kenntnis nehmen angesichts des Abgangs der Popkultur und speziell der Popliteraten auf das Politische, das in den Büchern der älteren Generation mitunter so bieder-aufklärerisch und moralinsauer daherkommt. Wie schön, dass nicht alle sich nun nur um sich selbst drehen. Und immerhin: Aufklärung im Gewand der Lüge, und dann noch im Internet, das hat was, das ist beinahe cool genug, um selbst Pop zu sein, Polit-Pop gewissermaßen, oder, mit Mark Amerika, Avant-Pop.

Yesmeni

Po Mooreovì Fahrenheit 9/11 pøichází další útoèný dokument snažící se odhalit temnou tvář amerického snu. Netlaèí tolik na pilu, ménì dojímá a více rozesmívá. Yes pøemýšlení a vlastnímu názoru!

Souèasný manažer se potýká pøedevším se tímto problémy:

- 1.) Jak kontrolovat zamìstnance, kteøí se nacházejí na druhém konci zemìkoule, a jak zajistit, aby tento dohled byl neustálý.
- 2.) Jak tuto èinnost efektivnì spojit s odpoèinkem a volnoèasovými aktivitami.

Odborníci ze Svìtové obchodní organizace (WTO) dali hlavy dohromady a výsledkem jejich snahy tyto obtíže vyøešit je tzv. "manažerský vycházkový odív". Je mnohem pohodlnější než sako a kravata a jeho elastická pružnost umožòuje vìnovat se všemožným sportovním aktivitám. Golf, tenis, jogging, nic není problém. Zároveò dovoluje kdykoli se vrátit do pracovního procesu díky obrazovce a satelitnímu spojení, skrze které můžeme sledovat kteroukoli továrnu a její dílníky online. Okamžitì tak zjistíme, kdo se fláká a jak by se dala výroba zefektivnit. Technickou inovací jsou i èipy zapojené jak do dílníka, tak do manažera. Manažer tedy nejenže vidí, co dílník dílá, on i ví, jak se dílník cítí. Motivaèním doplòkem je i možnost dílníky pøímò kontrolovat, a to skrze elektrické impulzy.

Pøednášku na toto téma pøednesl Hank Hurdy Unruh, zástupce vnìjších stykù WTO, ve finském Tampere na konferenci "Textílie budoucnosti". Vyslanci textilních spoleèností sedící v publiku nemìli žádné otázky, a to pøestože zamìstnanci pracující v rozvojových zemích byli v referátu opakovanì nazýváni "otroky" a obrazovka manažerského vycházkového odívu byla upevnìna na

obrovském zlatém falu, který vyrůstal z místa, ze kterého faly obvykle vyrůstají.

I v českých novinách jste na začátku prosince loňského roku mohli zaregistrovat zprávu, že americká chemická společnost Dow Chemical zodpovídá za jednu z největších neválečných katastrof způsobených ělovíkem - počty obětí havárie v Bhopálu se tradičně liší dle toho, kdo o katastrofi mluví, každopádně jde o desetitisíce lidí - se postiženým omluvila, přiznala vinu i přislíbila odškodné v požadované výši. Poté, co akcie společnosti začaly padat, provalilo se, že celá záležitost byla kachna a reportér BBC našel "jakémusi vtipálkovi", který se za

mluvěho Dow Chemicals pouze vydával.

Duo, které si říká Yesmen se potkalo na webu v roce 1996. Místo ježdění na dovolenou se tito dva pánové rozhodli vnovat svůj volný čas upozorďováním na protichůdnost různých poselství, která jsou nám adresována médii, politiky a korporacemi a na odhalování skrytých identit, které by dle elit měly zůstat skryté i nadále. A dělají to skrze akce, které přitahují mediální pozornost jako bylo např. extempore v Tampere ěi živé interview na BBC.

Pikným nápadem byla i dekonstrukce dvou emblematických hraček naplňujících dokonalou ideu amerického snu pro dívky a hochy. Barbíni a G. I. Joeovi (figurka amerického vojáka) tajně v obchodech vyměnili jejich zvukové aparáty a G.I. Joe tedy mluví sladkým hláskem, zatímco Barbie ze se chraplákem vypouští vity jako "Mrtví nelžou". Komický efekt - který pochopily i nadšené děti, které tyto hračky dostaly pod stromeček - je důsledkem těžko směřitelných opozic domácího a ženského aspektu s mužským a veřejným. A Yesmeni chtějí zjistit, kdo jsou ti, o kterých americký voják říká, že jsou mrtví a proč by kruci vlastně měli být mrtví.

První známou ryze politickou akcí Yesmenů bylo vytvoření domény www.gwbush.com, na které se snažili "vylepšit" image tehdejšího kandidáta na amerického prezidenta a poopravit některé "omyly", které vypouštěl například o svém ekologickém programu. Bohužel ale docházelo k případům, kdy se nikteď nedůvtipní ětenáři domnívali, že si prohlížejí oficiální stránku texaského guvernéra - www.georgewbush.com - z ěehož nebyl dotyěný zrovna dvakrát nadšený. Kromě Bushových prohlášení o "špinavosti" a mediální pozornosti přinesla akce s gwbush.com i nápad zkusit něco podobného s WTO.

Díky dokumentu Chrise Smithe, Dana Ollmana a Sarah Prince - které v roce 2000 proslavil jejich podobně laděný dokument American Movie - tak máme možnost sledovat kaleidoskop šílených (??? - jiný aktivista přijel na konferenci o zbraních s podobným žertíkem o pušce stělejší ěipy, o kterou se posléze začaly zbrojní firmy skutečně zajímat) a legračních nápadů a docházíme k přesvědčení, že když jste považován za autoritu a zabalíte to do složitě znějících pseudovědeckých keců, může vám

projít jakákoli hovadina. Vysokoškoláci to sami znají, že?

A Yesmeni nám servírují kousky jako:

Re-burgery. Ěili recyklované hamburgery vycházející z nápadu, že lidské tělo spotřebuje pouze 20 procent z živin, které naším tělem projdou. Celý cyklus vypadá asi takto. Lidé prvního světa ("Rozdíl je v tom, že my jsme bohatí a oni jsou chudí") si - u nejmenované společnosti McDonald's - zakoupí hamburger. Když se vydají na toaletu, zapnou speciální filtrovací zařízení, které uěiní zbytky znovu požitelným a vše se potrubím odvede do třetího světa ke spokojeným zákazníkům, kteří si sami mohou zvolit počet recyklací vybraného jídla. Příspěvek

vypískán na univerzitě v Plattsburgu, New York.

Aukci volebních hlasů. Na www.voteauction.com můžete jak hlasy prodávat, tak i nakupovat. Proč by tržní pravidla neměla platit i v této oblasti? Příspěvek měl úspěch na konferenci v Salcburku.

Zrušení WTO a její nahrazení humánnější organizací. Příspěvek měl úspěch na konferenci v Austrálii.

Pikná jsou rovněž hesla "Finanění úspěch pochází od Boha", "Liberalizace trhu je křížáckým tažením víry" nebo "Naštítí můžeme řídit obchod teoretičtější způsobem" (na otázku, zda-li znají praktické důsledky politiky WTO).

Nehodlám tu propagovat antiglobalizační postoj. Za prvé: pojem globalizace nemá žádné ostré kontury a zahrnuje celou škálu - jak pozitivních, tak negativních - jevů. Za druhé: s přesnou argumentací nepracují ani autoři snímku. Nepřinášejí důkazy pro a proti.

Politika WTO je kritizována pouze paušálně. Jako něco, co jednak pomáhá korporacím proti "zlému" státu a jednak vytváří celní bariéry mezi státy bohatými a chudými. Důležitá otázka zní: za dobu existence WTO se rozdíl mezi bohatými a chudými státy zmenšil, nebo zvětšil? A Yesmeni si všímají rozdílů mezi proklamovanými cíli a skutečnými výsledky. Mezi propagací a reálným stavem věcí. A dělají to vtipně a nãpaditě. A myslí to - doufejme - upřímně.

Vtipný dokument o lidech, kteří si dělají legraci z politiků a praktik korporací a mezinárodních finančních skupin.

politik-digital - www.politik-digital.de

politik-digital ist eine parteienunabhängige Informations- und Kommunikationsplattform zum Themenfeld Internet und Politik, getragen von der Idee, dass das Internet der Politik neue Impulse verleihen kann. politik-digital dokumentiert und analysiert mit Hilfe zahlreicher Experten aus Politik, Wissenschaft und Multimedia den fortschreitenden Einfluss von New Media und digitaler Vernetzung auf die Politik.

Von Christoph Bieber

bieber@politik-digital.de

Rollende Debatten und digitale Boxkämpfe

Der Countdown im US-Wahlkampf ist in vollem Gange

November. Halloween ist gerade erst vorbei, und schon wieder gehen in den USA die Menschen von Haus zu Haus. Diesmal sind es jedoch nicht kleine, verkleidete Gestalten, die mit dem Spruch "trick or treat" ihren kalorienreichen Wegezoll einfordern, sondern jetzt fordern die unermüdlichen Wahlhelferinnen und -helfer ihre wahlmüden Mitbürger zur Stimmabgabe auf. Traditionell am zweiten Dienstag des tristen Monats werden die insgesamt 538 Mitglieder des "electoral college" verteilt, die dann im Januar den Präsidenten der Vereinigten Staaten ermitteln.

Rückblende. Der Oktober war von den drei großen Fernsehdebatten zwischen George W. Bush und Al Gore dominiert, nur gelegentlich mischten sich die Zwischentöne von den wenig aussichtsreichen Rändern um Ralph Nader oder Patrick J. Buchanan in das Duett der Durchschnittskandidaten. Auch im Netz wird in diesen Tagen der digitale Soundtrack wieder etwas lauter. Ein letztes Mal werfen die zahlreichen Online-Kandidaten ihre Avatar-Körper in die Waagschale, neben Jackie Strike, Barbie und ... hatte sich auch der beliebte Bürgermeister [Joe "Diamond" Quimby](#) in das Rennen um das Weiße Haus eingemischt. Mit markigen Sprüchen und harten Bandagen (dem Vernehmen nach wurde ein Kontrahent tot auf einer Müllkippe gefunden) führt Quimby seine Online-Kampagne. Auch in Deutschland ist der wendige und korrupte Scheitelträger kein Unbekannter, führt er doch die Amtsgeschäfte in Springfield, der Heimatstadt der Simpsons.

Waren die Avancen der Avatare und "Fake Candidates" über weite Strecken belebende Elemente in einer wenig prickelnden Auseinandersetzung der "presidential twins" Bush und Gore, so findet der letzte Abschnitt des "Horse Race" um den prestigeträchtigen Büroraum in Washington, D.C. quasi ohne virtuelle Beteiligung statt. Während sich in den alten Medien die Journalisten an mehr oder minder versteckten Wahlempfehlungen die Zähne ausbeißen, werden im Netz die Surfer an die Zählautomaten gebeten. Mehr denn je haben nun die unterschiedlichen Methoden der Online-Auguren Hochkonjunktur - und buhlen mit aufwändigem „Edutainment“ um die Gunst der Spätentscheider.

Ein Musterbeispiel für den Trend zum Spiel mit den zögerlichen Wählerinnen und Wählern ist der „[Candidator](#)“, ein Online-Spiel, das von der österreichischen Firma [sysis](#) entwickelt wurde und vor kurzem auf der Website des [Time Magazine](#) platziert wurde. Dieses interaktive Empfehlungstool besteht im Kern aus einem Fragebogen, der aus den Wahlprogrammen und Aussagen der Kontrahenten Bush und Gore entwickelt wurde. In knappe Aussagen gepackt, wird den Online-Nutzern ein Panorama der wichtigsten Wahlkampfthemen (natürlich: Waffengebrauch, Abtreibung,

Gesundheitswesen...) ausgebreitet. Jeweils zwei Statements stehen zur Auswahl, sie enthalten stets eine grundsätzliche Präferenz für einen der beiden Anwärter. In insgesamt zwölf Frage-Antwort-Runden können die „undecided voters“ Übereinstimmungen mit den Aussagen der Kandidaten herausfinden. Unter die Sachfragen hat das „interdisziplinäre Team von österreichischen und amerikanischen Wissenschaftlern“ (sysis-Eigenwerbung) auch drei Vertrauensfragen gemischt – so müssen sich die Surfer auch entscheiden, wessen schmutzige Wäsche sie waschen wollen oder wem sie einen gewissen Geldbetrag anvertrauen würden. Auf diese Weise soll der „Vertrauensfaktor“ der Kandidaten ermittelt werden. Nun ja. Scheinbar ist der Candidator ein großer Erfolg, denn in den ersten Wochen erfreute sich das Online-Spiel recht großer Beliebtheit. Das könnte allerdings auch an der gelungenen grafischen Umsetzung liegen: Bush und Gore werden nämlich von farbenfrohen Comicfiguren repräsentiert, die je nach Abstimmungs-Entscheid albern-unterhaltsam animiert werden.

Doch es gibt auch Orte im Online-Wahlkampf, in denen bis zuletzt der sachorientierte Austausch zwischen den Aspiranten auf den Amtssitz an der Pennsylvania Avenue gefördert wird. Die unabhängige Site [Webwhiteblue](#) organisiert seit Anfang Oktober die erste "Rolling Cyber Debate" - und unternimmt damit einen Versuch, den Show-Veranstaltungen aus dem Fernsehen ein digitales Gegengewicht zu bieten. Hier haben alle Kandidaten die Gelegenheit, sich in einer „Nachricht des Tages“ zu den wesentlichen Wahlkampfthemen zu äußern – demgegenüber gibt die von den Online-Nutzern gestellte "Frage des Tages" der Diskussion einen partizipativen Spin.

Unter Federführung der [Markle Foundation](#) ist hier ein ambitioniertes Online-Projekt entstanden, das dem lustig-lauten Wahlkampf-„Edutainment“ diametral gegenübersteht. Auf 17 großen US-Websites (darunter [yahoo!](#), [AOL](#) oder die [New York Times](#)) werden täglich neue Fragen gestellt, die persönlich oder über Stellvertreter beantwortet werden können. Erlaubt ist zur Beantwortung nicht nur die Einsendung von Texten, auch Audio- und Video-Beiträge sind erlaubt. Auf diese Weise entsteht ein täglich wachsendes [Debatten-Archiv](#), das sich grundsätzlich von den zunehmend künstlichen und schnelllebigen TV-Debatten absetzt. Allerdings: durch die Fülle der Frage- und Antwortmöglichkeiten ist die „Cyber Debate“ ein beinahe schon zu anspruchsvolles Angebot geworden. Denn die Kandidaten können nicht nur auf die Tagesfrage antworten, sondern jeweils auch direkte Antworten auf die Statements ihrer Konkurrenten geben.

Der komplizierten Handhabung zum Trotz: an solchen Initiativen mangelt es in diesem Online-Wahlkampf. Hatten in der Frühphase und während der Vorwahlen noch die massiven Erfolge der digitalen Spendenerhebung für Furore gesorgt, so fehlen auf den letzten Metern ähnlich erfolgreiche Gegenstücke zum "Online-Fundraising". Spannende Episoden lieferten allerdings unterschiedliche Plattformen zum Handel mit Wählerstimmen. Neben der vergleichsweise plumpen Version von [votauction.com](#), einer inzwischen geschlossenen Website zum Stimmenverkauf, unterbreitete [voteswap2000.com](#) ein subtileres Angebot. Dieser digitale Stimmenumschlagplatz richtete sich vornehmlich an potenzielle Wähler des Drittkandidaten Nader und Gore-Unterstützer: im Gegenzug für Gore-Unterstützung in hart umkämpften Bundesstaaten sollten die Anhänger des demokratischen Kandidaten in "sicheren Gore-Staaten" Naders Grünen zum Sprung über die für die Wahlkampffinanzierung so wichtige 5%-Hürde helfen.

Letztlich zeigen aber auch solche Projekte, unter welchem Stern die 2000er Kampagne im Internet stattfand. Vornehmlich ging es darum, neue Mittel und Methoden des e-Commerce auf die politische Arena zu übertragen. Kurzfristig konnten dabei vor allem von der Anbieterseite Erfolge verbucht werden, doch für den langersehten Anstieg der Wahlbeteiligung dürfte dieser

marketinglastige und diskursarme Online-Wahlkampf nicht gesorgt haben. Die Stimmenbörsen wie voteswap2000.com zeigen jedoch möglicherweise eine neue Richtung auf - selbst wenn dieses ["verteilte Wählen"](#) (Florian Rötzer) letztlich keine allzu großen Auswirkungen auf den Wahlausgang haben dürfte. Das Netz bietet offenbar immer wieder die Chance zur Entstehung polit-ökologischer Nischen, die langfristig durchaus neue Beteiligungsformen hervorbringen könnten. Michael Cornfield, Leiter des [Democracy Online Project](#), formuliert es so: "Dies ist das erste Mal, dass ich die Wähler in einer anspruchsvollen Art und Weise miteinander reden sehe, ohne dass sie dazu die Medien oder die Parteien benötigen."

So bleibt abschließend nach einiger Ernüchterung und manchen Hoffnungen noch der Verweis auf die Wahlnacht - immerhin dürfte es hier wieder einige Premieren bei der digitalen Berichterstattung geben. Die üblichen Verdächtigen haben seit dem letzten "election day" ihren Maschinenpark erheblich aufgefrischt, so dass in der Nacht vom 7. zum 8. November wieder das "Wahlstudio im Wohnzimmer" eingerichtet werden kann. Die "Dossierisierung" reicht dabei bis auf die andere Seite des Atlantik: so hat auch der [Spiegel](#) ein reichhaltiges Datenpaket geschnürt, um digital gerüstet in die Wahlnacht zu gehen. Neben statistischem Material bis zum Plattencrash werden die Live-Reaktionen im Gegensatz zu 1996 diesmal auch in Bild und Ton den Weg ins Netz finden. So verliert der Cyberspace ein weiteres Stückchen vom Mythos des Abenteuerspielplatzes für Unentwegte - Datenfernsehen wir kommen.

PS: Ein Hinweis für Liebhaber - zur ordentlichen Vorbereitung auf die Millenniums-Wahlnacht gehört auch ein Rückblick in die digitale Vergangenheit des E-Campaigning. Das [Internet Archive](#) bietet passend zur Entscheidung zwischen Gore und Bush eine Kollektion [alter Wahlkampfseiten](#) aus dem Jahr 1996.

Rolling debates and digital boxkaempfe

COUNT down in the US election campaign is in full course

November. Halloween is straight only past, and already again humans go from house to house in the USA. This time there is however not small, disguised shapes, which call their calorie-rich toll in with the saying "trick or treat", but requests the untiring choice aids and aid their choice-tired fellow citizens now to the casting of votes. Traditionally on the second Tuesday of the tristen monthly those are distributed altogether 538 members "electoral college", that determine the president of the United States then in January.

Flash back. October was of the three large television debates between George W. Bush and Al Gore dominated, only occasionally mixed the intermediate tones of the little promising edges around Ralph Nader or Patrick J. Buchanan into the Duett of the average candidates. Also in the net the digital sound TRACK becomes again somewhat louder in these days. A last mark the numerous on-line candidates their Avatar bodies throw into the scale pan, beside Jackie Strike, Barbie and... also the popular mayors [Joe "dia. moon" Quimby](#) into running around the white house had interfered. With markigen sayings and hard bandages (after hearing a contractor was found dead on a garbage dump) Quimby leads its on-line campaign. Also in Germany the agile and corrupt vertex carrier is not an unknown quantity, leads it nevertheless the office business in Springfield, the hometown of the Simpsons.

If the rises of the Avatare and "Fake Candidates" were over far distances animating elements in a little tingling argument "presidential twins" of the Bush and Gore, then the last section of the "Horse Race" takes place around the prestigious office space in Washington, D. C. quasi without virtual participation. While in the old media the journalists break off themselves less hidden choice recommendations the teeth to more or, in the net the surfer are asked to the counting automats. More than ever now the different methods of the on-line Auguren have boom - and buhlen with aufwaendigem "Edutainment" around the favour of the Spaetentscheider.

An example for the trend to the play with the zoegerlichen waehlerinnen and voters is [the "Candidator"](#), an on-line play, which was developed by the Austrian [company](#) sysis and recently on the Website [of the time of magazines](#) was platziert. This interactive Empfehlungstool consists in the core of a questionnaire, which was developed from the electioneering programs and statements of the contractors Bush and Gore. Packed in knappe statements, the on-line users a panorama of the most important election campaign topics becomes (natural: Weapon use, abortion, health service...) spread. In each case two statements contained always stand to the selection, it a fundamental preference for one of

the two candidates. In altogether twelve question answer rounds "undecided voters" the agreements with the statements of the candidates can find out. Under the questions of substance the "interdisciplinary team of Austrian and American scientists" (sysis Eigenwerbung) mixed also three questions of confidence - so the surfer must decide also, want to whose dirty laundry them to wash or whom they would entrust a certain money. In this way the "confidence factor" of the candidates is to be determined. Now. The Candidator a large success is apparent, because in the first weeks the on-line play enjoyed of quite large popularity. That could be however also because of the successful graphic conversion: Bush and Gore are represented by color-glad Comicfiguren, which are animated depending upon tuning decision ridiculous maintenance SAM.

But there are also places in the on-line election campaign, in which to last the specialoriented exchange is promoted between the Aspiranten on the seat to the Pennsylvania Avenue. The independent Site [Webwhiteblue](#) organized since at the beginning of of October the first "Rolling Cyber Debate" - and undertakes an attempt to offer to the Show meetings from the television a digital counterweight. Here all candidates have the opportunity to express itself in a "message of the daily" to the substantial election campaign topics - in contrast to this the "question of the daily" asked by the on-line users gives a partizipativen spin to the discussion.

Under leadership [of the Markle Foundation](#) a ambitioniertes on-line project developed here, which election campaign "Edutainment the merry-loud "diametrically faces. On 17 large US Websites (under it [yahoo!](#), [AOL](#) or [the New York Times](#)) is placed daily new questions, which can be answered personally or over deputies. Are permitted for answer not only the entry of texts, also audio and video contributions are permitted. In this way develop daily growing [debate archives](#), which set off in principle from that increasingly artificial and schnelllebigen TV debates. However: by the abundance of the asking and response possibilities the "Cyber Debate" became almost already fastidious offer. Because the candidates can answer not only to the issues of the day, but give also in each case direct answers to the statements of their competitors.

The complicated handling to the defiance: such initiatives it lacks in this on-line election campaign. In the early phase and during the preselections still if substantial successes of the digital donation collection had provided for sensation, then similarly successful counterparts are missing to the "on-line Fundraising" on the last meters. Exciting episodes supplied however different platforms to the trade with votes. Apart from the comparatively awkward version of [votauction.com](#), [voteswap2000.com](#) made a subtler offer to a in the meantime [closed](#) Website to the voice sales. This digital voice place of transshipment addressed itself primarily to potenzielle voters of the third candidate Nader and Gore supporter: in response for Gore support in hard contested Federal States should the trailers of the democratic candidate in "safe Gore states" Naders the Green for jump over the 5%-Huerde so important for the campaign financing help.

In addition, in the long run such projects show, under which star the 2000er campaign in the InterNet took place. Primarily it concerned to transfer new means and methods of the e-Commerce to the political arena. At short notice thereby particularly successes could be achieved by the offerer side, but for the long-longed rise of the election turnout this marketinglastige and discourse-poor on-line election campaign might not have ensured. The

voice stock exchanges such as voteswap2000.com however possibly point a new direction out - even if this ["selecting"](#) (Florian Roetzer) distributed in the long run no all too large effects on the wahlengang have could. The net offers obviously again and again the chance for the emergence of polit ecological niches, which could bring on a long-term basis quite new participation forms out. Michael Cornfield, director/conductor [of the Democracy on-line Project](#) , formulates it in such a way: "this is the first time that I see the voters in a fastidious way talking with one another, without they need for it the media or the parties."

Thus finally still the reference remains on the choice night after some disillusionment and some hopes - nevertheless there might be again some premieres here during the digital reporting. Usual suspecting since last "election day" their machinery substantially refurbished, so that at the night from 7. to 8 November again the "Wahlstudio in the living room" can be furnished. The "Dossierisierung" is enough thereby up to the other side of the Atlantic: thus also [the mirror](#) tied a rich packet, in order to go digitally prepared into the choice night. Beside statistic material up to the Plattencrash the Live reactions will find the way contrary to 1996 this time also in picture and clay/tone in the net. Thus the Cyberspace loses a further bit of the myth of the adventure playground for incessant ones - data television we come.

HP: A note for lovers - to the tidy preparation for the Millenniums Wahlnacht also a review belongs into the digital past of the e-Campaigning. [The InterNet of archives](#) offers suitably the decision between Gore and Bush a collection [of old election campaign sides](#) from the year 1996.

Rollende Debatten und digitale Boxkämpfe

Der Countdown im US-Wahlkampf ist in vollem Gange

November. Halloween ist gerade erst vorbei, und schon wieder gehen in den USA die Menschen von Haus zu Haus. Diesmal sind es jedoch nicht kleine, verkleidete Gestalten, die mit dem Spruch "trick or treat" ihren kalorienreichen Wegezoll einfordern, sondern jetzt fordern die unermüdlichen Wahlhelferinnen und -helfer ihre wahlmüden Mitbürger zur Stimmabgabe auf. Traditionell am zweiten Dienstag des tristen Monats werden die insgesamt 538 Mitglieder des "electoral college" verteilt, die dann im Januar den Präsidenten der Vereinigten Staaten ermitteln.

Rückblende. Der Oktober war von den drei großen Fernsehdebatten zwischen George W. Bush und Al Gore dominiert, nur gelegentlich mischten sich die Zwischentöne von den wenig aussichtsreichen Rändern um Ralph Nader oder Patrick J. Buchanan in das Duett der Durchschnittskandidaten. Auch im Netz wird in diesen Tagen der digitale Soundtrack wieder etwas lauter. Ein letztes Mal werfen die zahlreichen Online-Kandidaten ihre Avatar-Körper in die Waagschale, neben Jackie Strike, Barbie und ... hatte sich auch der beliebte Bürgermeister [Joe "Diamond" Quimby](#) in das Rennen um das Weiße Haus eingemischt. Mit markigen Sprüchen und harten Bandagen (dem Vernehmen nach wurde ein Kontrahent tot auf einer Müllkippe gefunden) führt Quimby seine Online-Kampagne. Auch in Deutschland ist der wendige und korrupte

Scheitelträger kein Unbekannter, führt er doch die Amtsgeschäfte in Springfield, der Heimatstadt der Simpsons.

Waren die Avancen der Avatare und "Fake Candidates" über weite Strecken belebende Elemente in einer wenig prickelnden Auseinandersetzung der "presidential twins" Bush und Gore, so findet der letzte Abschnitt des "Horse Race" um den prestigeträchtigen Büroraum in Washington, D.C. quasi ohne virtuelle Beteiligung statt. Während sich in den alten Medien die Journalisten an mehr oder minder versteckten Wahlempfehlungen die Zähne ausbeißen, werden im Netz die Surfer an die Zählautomaten gebeten. Mehr denn je haben nun die unterschiedlichen Methoden der Online-Auguren Hochkonjunktur - und buhlen mit aufwändigem „Edutainment“ um die Gunst der Spätentscheider.

Ein Musterbeispiel für den Trend zum Spiel mit den zögerlichen Wählerinnen und Wählern ist der „[Candidator](#)“, ein Online-Spiel, das von der österreichischen Firma [sysis](#) entwickelt wurde und vor kurzem auf der Website des [Time Magazine](#) platziert wurde. Dieses interaktive Empfehlungstool besteht im Kern aus einem Fragebogen, der aus den Wahlprogrammen und Aussagen der Kontrahenten Bush und Gore entwickelt wurde. In knappe Aussagen gepackt, wird den Online-Nutzern ein Panorama der wichtigsten Wahlkampfthemen (natürlich: Waffengebrauch, Abtreibung, Gesundheitswesen...) ausgebreitet. Jeweils zwei Statements stehen zur Auswahl, sie enthalten stets eine grundsätzliche Präferenz für einen der beiden Anwärter. In insgesamt zwölf Frage-Antwort-Runden können die „undecided voters“ Übereinstimmungen mit den Aussagen der Kandidaten herausfinden. Unter die Sachfragen hat das „interdisziplinäre Team von österreichischen und amerikanischen Wissenschaftlern“ (sysis-Eigenwerbung) auch drei Vertrauensfragen gemischt – so müssen sich die Surfer auch entscheiden, wessen schmutzige Wäsche sie waschen wollen oder wem sie einen gewissen Geldbetrag anvertrauen würden. Auf diese Weise soll der „Vertrauensfaktor“ der Kandidaten ermittelt werden. Nun ja. Scheinbar ist der Candidator ein großer Erfolg, denn in den ersten Wochen erfreute sich das Online-Spiel recht großer Beliebtheit. Das könnte allerdings auch an der gelungenen grafischen Umsetzung liegen: Bush und Gore werden nämlich von farbenfrohen Comicfiguren repräsentiert, die je nach Abstimmungs-Entscheid albern-unterhaltsam animiert werden.

Doch es gibt auch Orte im Online-Wahlkampf, in denen bis zuletzt der sachorientierte Austausch zwischen den Aspiranten auf den Amtssitz an der Pennsylvania Avenue gefördert wird. Die unabhängige Site [Webwhiteblue](#) organisiert seit Anfang Oktober die erste "Rolling Cyber Debate" - und unternimmt damit einen Versuch, den Show-Veranstaltungen aus dem Fernsehen ein digitales Gegengewicht zu bieten. Hier haben alle Kandidaten die Gelegenheit, sich in einer „Nachricht des Tages“ zu den wesentlichen Wahlkampfthemen zu äußern – demgegenüber gibt die von den Online-Nutzern gestellte "Frage des Tages" der Diskussion einen partizipativen Spin.

Unter Federführung der [Markle Foundation](#) ist hier ein ambitioniertes Online-Projekt entstanden, das dem lustig-lauten Wahlkampf-„Edutainment“ diametral gegenübersteht. Auf 17 großen US-Websites (darunter [yahoo!](#), [AOL](#) oder die [New York Times](#)) werden täglich neue Fragen gestellt, die persönlich oder über Stellvertreter beantwortet werden können. Erlaubt ist zur Beantwortung nicht nur die Einsendung von Texten, auch Audio- und Video-Beiträge sind erlaubt. Auf diese Weise entsteht ein täglich wachsendes [Debatten-Archiv](#), das sich grundsätzlich von den zunehmend künstlichen und schnelllebigen TV-Debatten absetzt. Allerdings: durch die Fülle der Frage- und Antwortmöglichkeiten ist die „Cyber Debate“ ein beinahe schon zu anspruchsvolles Angebot geworden. Denn die Kandidaten können nicht nur auf die Tagesfrage antworten, sondern jeweils

auch direkte Antworten auf die Statements ihrer Konkurrenten geben.

Der komplizierten Handhabung zum Trotz: an solchen Initiativen mangelt es in diesem Online-Wahlkampf. Hatten in der Frühphase und während der Vorwahlen noch die massiven Erfolge der digitalen Spendenerhebung für Furore gesorgt, so fehlen auf den letzten Metern ähnlich erfolgreiche Gegenstücke zum "Online-Fundraising". Spannende Episoden lieferten allerdings unterschiedliche Plattformen zum Handel mit Wählerstimmen. Neben der vergleichsweise plumpen Version von [voteauction.com](#), einer inzwischen geschlossenen Website zum Stimmenverkauf, unterbreitete [voteswap2000.com](#) ein subtileres Angebot. Dieser digitale Stimmenumschlagplatz richtete sich vornehmlich an potenzielle Wähler des Drittkandidaten Nader und Gore-Unterstützer: im Gegenzug für Gore-Unterstützung in hart umkämpften Bundesstaaten sollten die Anhänger des demokratischen Kandidaten in "sicheren Gore-Staaten" Naders Grünen zum Sprung über die für die Wahlkampffinanzierung so wichtige 5%-Hürde helfen.

Letztlich zeigen aber auch solche Projekte, unter welchem Stern die 2000er Kampagne im Internet stattfand. Vornehmlich ging es darum, neue Mittel und Methoden des e-Commerce auf die politische Arena zu übertragen. Su Cybermesa.com, i testi di Bernardo Parrella da San Francisco sulle elezioni negli Stati Uniti, con annessi e connessi, Internet inclusa (18 ottobre-15 novembre 2000)

- Presidenziali e Internet
 Panoramica sulla campagna elettorale tra reale e virtuale. Ma nulla di esaltante sotto il sole.
<http://www.cybermesa.com/~berny/election1.html>
- Morire di noia
 Era tutto scherzo l'iniziativa di voti all'asta di Voteauction.com, ma oltre la parodia dell'industria elettorale la campagna (cyber)elettorale si dimostra di scarso interesse.
<http://www.cybermesa.com/~berny/election2.html>
- Anche Silicon Valley al voto
 Tra high-tech e Internet per provare a risvegliare gli ultimi spasimi delle presidenziali USA.
<http://www.cybermesa.com/~berny/election3.html>
- Elezioni super-deludenti
 False indiscrezioni e intasamenti delle testate web, eterni riconteggi e possibili rifacimenti...
<http://www.cybermesa.com/~berny/election4.html>
- Il re e' nudo, ma a chi gliene importa?
 Quello che conta non è avere puntati addosso gli occhi del mondo, ma assicurare l'American people che la "democrazia" trionferà, presto e bene. In modo che i cittadini tornino a essere sudditi e consumatori.
<http://www.cybermesa.com/~berny/election5.html>

inserted in [Diritto&Diritti](#) in November 2000

On Cybermesa.com, the witnesses of Bernardo Parrella from Saint Francisco on elections in the United States, with annexed and connected, enclosed Internet (18 October-15 November 2000)

- Presidenziali and Internet
 Panoramic on the real and virtual electoral campaign between. But null of thrilling under the sun.
<http://www.cybermesa.com/~berny/election1.html>
- To die of trouble
 The initiative of ballots to the auction of Voteauction.com was all joke, but beyond the parody of the electoral industry the campaign (cyber) elettorale
 it demonstrates of insufficient interest.
<http://www.cybermesa.com/~berny/election2.html>
- Also Silicon Valley to the ballot
 Between high-tech and Internet in order to try to risvegliare the last ones spasimi of presidential USA.
<http://www.cybermesa.com/~berny/election3.html>
- super-disappointing Elections
 False indiscretions and intasamenti of the heads web, eternal riconteggi and possible rifacimenti...
<http://www.cybermesa.com/~berny/election4.html>
- the king e' knot, but to who gliene imports?
 What it counts is not possession tip to you I lean the eyes of the world, but to reassure the American people that the "democracy" will prevail, soon and well.
 So that the citizens return to be sudditi and consumers.

21 dicembre 2000
Carte di credito ed Internet
CNET News

Secondo la FBI il furto di più di 55.000 numeri di carte di credito è collegato ad una compagnia locata a Mosca, la Global Telecom. Sembra, infatti, che prelevamenti di modico valore (10-18 dollari) non autorizzati siano stati effettuati anche attraverso la compagnia moscovita.

19 dicembre 2000
Giurisdizione virtuale
Wired News

Una corte tedesca (Bundesgerichtshof), non come la corte gerarchicamente ad essa sottordinata, ha stabilito che il diritto tedesco si applica anche a cittadini stranieri che abbiano reso disponibile su Internet materiale di qualsiasi genere purchè il materiale stesso sia accessibile dalla Germania.

14 dicembre 2000
Hong Kong severa contro gli hackers
Reuters

Ad Hong Kong sono state proposte nuove misure di legge per combattere il cyber-crimine.
La pena massima per gli hackers potrebbe prevedere 14 anni di reclusione. Un bel po' se si considera che fino ad oggi la legge prevedeva solo cinque anni.

Trasmissioni su Internet alle prese con il copyright
Reuters

L'industria discografica ha fatto un bel colpo! L'ufficio addetto alla tutela del copyright negli US ha infatti deciso che anche le trasmissioni programmate su Internet devono pagare i diritti di autore....staremo a vedere.

La notizia completa su:
<http://news.findlaw.com/legalnews/s/20001208/n08589016.html>

Vaffan.....com?
Associated Press

Il giudice Steven McAuliffe ha emesso un provvedimento secondo cui non sarebbe ammissibile utilizzare parolacce per denominare i domini. Secondo il giudice i domini servono per navigare...e non per comunicare.

La notizia completa su:
<http://abcnews.go.com/sections/tech/DailyNews/domainnames001211.html>

12 dicembre 2000
Aspirante attore....accusato di hackeraggio
APB NEWS

Un aspirante attore di 21 anni è stato accusato di furto e truffa per essere penetrato nella Web site della Hollliwood Talent Agency ed essersi appropriato delle liste per le audizioni. Il giovanotto ha poi venduto le notizie riservate a due sue colleghi. Gli incauti acquirenti, invece, sono stati accusati di ricettazione.

Genitori responsabili?

New York Times (Free registration required)

E' sempre bene dare un'occhiata a quello che i propri figli fanno su Internet, su questo non c'è dubbio. Ma come la mettiamo se madri o padri non riescono a sorvegliare l'intero operato dei loro pargoletti? Secondo un giudice di una corte dello Stato dell'Illinois, in caso di mancata sorveglianza, i genitori possono essere processati. Il caso riguardava un giovane studente di liceo che si è divertito a sovrapporre la foto del viso di una sua compagna di classe su un'immagine hard-core....il tutto on line. Lo scorso novembre il giudice Ward S. ArnoldII., ha stabilito che anche il padre del ragazzo può essere citato per danni.

7 dicembre 2000

A passo troppo lento
Reuters

La maggior parte delle legislazioni nazionali non si interessa del cyber-crimine.

Lo hanno affermato gli addetti ai lavori della McConnel International, una società che si è occupata di esaminare le leggi di 52 Stati. Secondo il loro report, ben 32 nazioni non hanno ancora aggiornato i loro codici in vista della rivoluzione telematica.

Il Digital Millennium Copyright Act
Wired News

La così detta dottrina della "prima vendita" (secondo cui la prima cessione del diritto di copyright sarebbe semplificata rispetto alle seguenti) si è fatta strada per la nuova legge sul copyright digitale. Gli attuali titolari di diritti di copyright sono ben lieti della legge, non così i giurisperiti che non condividono le difficoltà legali poste per le successive cessioni.

Mi congratulerei con lui, se sapessi chi è
New Jersey Star-Ledger

In una causa sul diritto alla privacy, un giudice ha stabilito che la società Morris County, produttrice di software, non ha il diritto di conoscere l'identità di due persone che hanno spedito su una message board di Yahoo per posta telematica ed in anonimato, le loro critiche sulla compagnia. Con una sentenza di ben 22 pagine il giudice della Corte Superiore, Kenneth MacKenzie, ha stabilito che l'anonimato della parte dovesse rimanere tale.

I Want Your Sex.com
Reuters

Un giudice ha sì è pronunciato sul più importante "cambiamento di sesso" su Internet. E' così terminata una importante battaglia legale per il diritto ad utilizzare il dominio sex.com. Fino ad ora Stephen Cohen aveva utilizzato il dominio per un business pornografico miliardario, ma adesso dovrà cedere l'utilizzazione di sex.com a Gary Kremen che, con grande lungimiranza, aveva registrato il dominio già nel 1994.

4 Decembers 2000 One principle issue
Reuters

Beautiful history between China and the United States. Now contende the control of the dominions in Chinese language. According to Mao Wei, director of the center of computer science for Internet, has supported that the Chinese people must have a pre-emption on the use of its language and therefore on all the dominions written in its lingua.Gli United States instead support the principle of the freedom and the free competition. The news leaves me perplexed, but the source is also always American. I will try on web the greater information... but unfortunately it will not be easy to spulciare Chinese reviews. We will see. Legalizziamo gli mp3?

CNET News

Molti parlamentari americani hanno proposto una legge che potrebbe una volta e per tutte legalizzare il servizio che la MP3.com da tempo ha fornito ai navigatori appassionati di musica. La proposta ha un titolo invitante ("Music Owners' Listening Rights Act of 2000") e vorrebbe consentire agli addetti ai lavori di copiare CD, conservarli on-line, e poi concederli a potenziali ascoltatori capaci di provare di aver già comperato il cd richiesto. Si vedrà.

How Much for Webcasting? Don't Know Yet

Webcasters Caught in RIAA Web

Wired News

All is not equal in the land of webcast licensing. Before webcasters can stream major-label music on the Internet, they must first sign a licensing agreement with the Recording Industry Association of America promising to pay back royalties based on a rate the U.S. Copyright Office is expected to set. What that fee will be has not yet been determined, according to a spokeswoman at the agency who said a number of details have to be hashed out.

La giurisdizione su Internet

Forse non tutti sanno che il Consiglio Nazionale Forense degli Stati Uniti (American Bar Association; ABA) da più di due anni è attivissimo sul fronte del commercio elettronico.

Da tempo esiste un progetto sulla giurisdizione per il commercio elettronico (Jurisdiction Project) portato avanti da una Commissione ad hoc. Ma solo adesso però il loro lavoro ha un'eco internazionale, quando cioè la Commissione ha voluto coinvolgere i Governi per creare una regolamentazione internazionale per dirimere le dispute create nell'ambito di Internet.

L'incontro annuale del Consiglio a New York è stata l'occasione per farsi sentire oltre-frontiera.

Finalmente un voce nel silenzio si è alzata con una proposta seria e ragionevole.

Genitori responsabili?
New York Times (Free registration required)

E' sempre bene dare un un'occhiata a quello che i propri figli fanno su Internet, su questo non c'e' dubbio. Ma come la mettiamo se madri o padri non riescono a sorvegliare l'intero operato dei loro pargoletti? Secondo un giudice di una corte dello Stato dell'Illinois, in caso di mancata sorveglianza, i genitori possono essere processati. Il caso riguardava un giovane studente di liceo che si è divertito a sovrapporre la foto del viso di una sua compagna di classe su un' immagine hard-core... il tutto on line. Lo scorso novembre il giudice Ward S. Arnold II., ha stabilito che anche il padre del ragazzo può essere citato per danni.

Carnivore: un portento!
Associated Press

Lo strumento del FBI per controllare il traffico di email su Internet è ancora una volta nell'occhio del ciclone. Questa volta, il controverso "Carnivore" è stato testato da una commissione ad hoc la quale ha appurato che le sue capacità di espandersi e controllare è di gran lunga superiore a quanto avevano affermato gli stessi dirigenti del FBI.

Ancora eBay
Bloomberg/CNET News

La azione contro la eBay è diventata una class-action e, cioè, una azione di categoria. La compagnia è accusata di aver facilitato la vendita di gadget sportivi accusati di essere falsamente autografati da divi dello sport. Il giudice Linda B. Quinn ha così trasformato la causa in un affare multimiliardario. Chiunque abbia acquistato i gadget "falsi" potrà prendere parte alla causa e richiedere il risarcimento dei danni.

How Much for Webcasting? Don't Know Yet
Webcasters Caught in RIAA Web
Wired News

All is not equal in the land of webcast licensing. Before webcasters can stream major-label music on the Internet, they must first sign a licensing agreement with the Recording Industry Association of America promising to pay back royalties based on a rate the U.S. Copyright Office is expected to set. What that fee will be has not yet been determined, according to a spokeswoman at the agency who said a number of details have to be hashed out.

La giurisdizione su Internet

Forse non tutti sanno che il Consiglio Nazionale Forense degli Stati Uniti (American Bar Association; ABA) da più di due anni è attivissimo sul fronte del commercio elettronico.

Da tempo esiste un progetto sulla giurisdizione per il commercio elettronico (Jurisdiction Project) portato avanti da una Commissione ad hoc. Ma solo adesso però il loro lavoro ha un'eco internazionale, quando cioè la Commissione ha voluto coinvolgere i Governi per creare una regolamentazione internazionale per dirimere le dispute create nell'ambito di Internet.

L'incontro annuale del Consiglio a New York è stata l'occasione per farsi sentire oltre-frontiera.

Finalmente un voce nel silenzio si è alzata con una proposta seria e ragionevole.

Wer wählt, gewinnt

Versuche, im Internet Wahlstimmen zu versteigern sind in den USA vorerst am Behördenwiderstand gescheitert.

SPIEGEL online, 24.08.2000

146 Millionen Dollar werden George W. Bush und Al Gore beim Präsidentschaftswahlkampf ausgeben, schätzt die Washington Post. Etwa ein halber Dollar pro US-Bürger. Oder anderthalb Dollar für jeden der vermuteten 100 Millionen Nicht-Wähler. Wäre es nicht sinnvoller jedem seinen Betrag auszuzahlen, statt in Luftballons und Fernsehspots zu investieren?

George Washington sah das 1757 beim Kampf um einen Sitz im Abgeordnetenhaus Virginias ganz pragmatisch. 391 Wähler gab es in seinem Bezirk. Und so soll Washington jedem von ihnen gut anderthalb Liter Rum, Wein, Bier und Apfelwein spendiert haben.

Wesentlich effizienter geht das im Internet. Am 16. August bemerkte ein Kunde des online- Auktionshauses eBay das Angebot „Vote of one US-Citizen“. 20 Gebote gab es schon, das höchste laut eBay bei 10000 Dollar. Insgesamt gab es bei eBay sechs Stimmen für zusammen 10100 Dollar. Von ihnen kam ein Anbieter nur auf einen Dollar, ein Dritter auf 99 Cents. Diese Preise könnten sich Bush und Gore mit ihrem Budget sogar leisten, sie würde sich sogar ein Drittel der Ausgaben sparen.

So einfach ist es aber nicht. Stimmenverkauf verstößt in den USA sowohl gegen Bundesgesetze als auch gegen die der einzelnen Staaten. Deswegen sperrte eBay nach einer Intervention des US-Justizministeriums die Auktionen am 18. August. Ebenso Yahoo, auf dessen US-Seiten ebenfalls Stimmen gehandelt wurden.

Anfang dieser Woche löschte dann die Seite votauction.com ihre Inhalte. Die Behörden hatten mit rechtlichen Schritten gedroht. Seit Anfang August hatte hier der New Yorker Student James Baumgarten seine Geschäftsidee präsentiert: Unentschlossene Wähler sollen sich nach Bundesstaaten zusammenschließen und ihre Stimmen als Gruppe versteigern. Bevor die Seite geschlossen wurde, lagen die Gebote für New York und Kalifornien schon bei 100 Dollar, 200 Wähler hatten Baumgarten per eMail ihre Stimmen angeboten. Da Geld sollte am Ende unter den Beteiligten aufgeteilt werden.

„Schwerwiegende Konsequenzen“ könne dies haben, drohte Doug Kellner vom zuständigen New Yorker Wahlausschuss. „Es sollte bekannt werden, dass das öffentliche Anbieten seiner Stimme selbst aus Spaß eine ernste Angelegenheit ist.“

Baumgarten hingegen glaubt, dass hier eine Schimäre verteidigt wird: „Die Wahlkampfindustrie zahlt Hunderte von Millionen für den Versuch, die Präsidentschaftswahlen zu beeinflussen. Das ist doch ineffiziente Geldverschwendung. Wir verbessern das System, indem wir das Geld direkt zu den Wählern bringen.“

Sheila Krumholz von der Initiativgruppe „Center for Responsive Politics“ sieht die Aktion als Ausdruck der Frustration: „Sachentscheidungen und Wahlen werden durch Geld bestimmt oder zumindest beeinflusst. Jeder weiß, dass Geld einen unleugbaren Einfluss auf das heutige System hat.“ Der darf aber nicht zu offensichtlich sein.

Vielleicht sträubt sich Amerika aber auch aus ganz ökonomischen Gründen gegen den Direktkauf: Die letzten bekannten Preise lagen 1838 bei einer Bürgermeisterwahl um die 22 Dollar - weit mehr als Gore und Bush sich leisten könnten. ■

Who selects, wins

Attempts, in the InterNet votes to auctions failed for the time being in the USA because of the authority resistance.

MIRROR on-line, 24.08.2000

146 million dollar George W. Bush and Al Gore with the presidency election fight will spend, estimate the Washington post office. About a half dollar per US citizen. Or one and a half one Dollar for everyone of the assumed 100 million non-voter. Would it be to be disbursed not more meaningfully everyone its amount, instead of investing in ballons and TV commercials?

George Washington saw that completely pragmatic 1757 with the fight for a seat in the Lower House Virginias. there were 391 voters in its district. And so Washington everyone of them is to have spendiert well one and a half one litres rum, wine, beer and apple wine.

Substantially more efficiently goes in the InterNet. On 16 August a customer of the on-line of auction house noticed eBay the offer "Vote OF one US Citizen". there were 20 requirements, highest already loud eBay with 10000 dollar. Altogether it gave with eBay six voices for together 10100 dollar. From them an offerer came only on a dollar, third on 99 cents. These prices could even afford Bush and Gote with their budget, them even a third of the expenditures would save.

So it is however not simple. Voice sales offends in the USA both against Federals law and against those of the individual states. Therefore closed eBay after an intervention of the US Ministry of Justice the auctions on 18 August. Likewise Yahoo, on whose US sides voices were likewise acted.

Beginning of this week deleted then the side voteauction.com their contents. The authorities had threatened with legal steps. Since at the beginning of August had presented the New Yorker student James tree garden its business idea here: Undetermined voters are to unite after Federal States and their voices as group of auctions. Before the side was closed, the requirements for New York lay and tree garden had already offered California with 100 dollar, 200 voters by email their voices. There money should be divided at the end under the involved ones.

"this can have serious consequences", threatened Doug waiter of the responsible person New Yorker election committee. "it should admits to become that public offering of its voice is from fun a serious affair."

Tree garden however believes that a Schimaere is defended here: "the election campaign industry pays hundreds of millions for the attempt to affect the presidency elections. That is nevertheless inefficient geldverschwendung. We improve the system, by bringing the money directly to the voters."

Sheila Krumholz of the initiative group "center for Responsive Politics" sees the action as a sign of frustration: "judgements on the main issue and elections are determined by money or affected at least. Everyone knows that money has an undeniable influence on the today's system." That may not be to obvious however.

Perhaps America straeubt itself in addition, from completely economic bases against the direct purchase: The last well-known prices were 1838 with a mayor choice around the 22 dollar - far more than Gore and Bush to afford could.

大統領選挙とインターネット

誰もが予想していな事態になった、米国の次期大統領選挙。

国民のほとんどががフロリダ州の投票の再集計に注目していますが、そのフロリダ州で、海外在住者が初めて、ウェブを使っての不在者投票を行ないました。

オンラインによる投票数は少数で、しかも、その多くが海外に駐在する軍人で一般の利用とまではいかないが、インターネットが初めて大統領選に利用されました。

Webによる投票はまだまだ実験段階で、テストが行なわれた他の地域としては、アリゾナ州、ユタ州のウィーバー郡、テキサス州のダラス郡、サウスカロライナ州のいくつかの郡があります。

限定的では、テストは成功したといわれていますが、一般市民が利用できるようになるまでには、解決しなければならない問題が数多く存在しています。

まず第一にセキュリティ強化と暗号化の問題です。

今回の実験は成功とされていますが、一部のオンライン投票のコンピュータがハッカーによって侵入された例があり、どの辺りまでこの問題が解決されるのかが、今後の課題になるでしょうが、現時点ではハッカーと警察のいたちごっこが続いており、まだまだ時間がかかるでしょう。

第二にコンピュータの有無で、得られる情報やサービスに差が出てしまう問題です。

すでにアメリカでは、コンピュータを持たない貧困層やマイノリティーに対する差別だとして、市民団体がオンライン投票の中止を求めて提訴する騒ぎもありました。

第三に高齢者への対応です。

オンライン投票が一般化してしまうと、コンピュータになじみのないお年寄りが、マウスをらくらく使って投票できるとは考えにくく、結局、選員が1つ1つの手順を説明し、画面をスクロールするのも手を貸さなければならないのでは、余計に手間がかかってしまいます。

第四に、票の売買が簡単に行われるのではないかと言う指摘です。

すでに米国の大学院生が、ボート・オークションと言うサイトを立ち上げ、マスコミの目にとまり反響を得ました。 <http://www.voteauction.com>
このサイトは、その後売り渡されましたが、現在は閉鎖されています。

以上の問題をどのように解決していくか、今後の行方が非常に気になるところです。

さて、今回の大統領選、ネットを駆使した争いとも言われております。その一例として、共和党全国委員会(RNC)幹部のラリー・パープロ氏は、1年がかりで共和党員の電子メールアドレスのリストをデータベース化し、事細かな分類をしたそうです。

またそのデータベースを利用し、共和党支持者米CNN社のサイトや米マイクロソフト社関連の『MSNBC』サイトなど、インターネット・ニュースサイトにアクセスして、ブッシュ氏の支持をアピールしようと言うメールを発信しました。

実はこのような試みは、方法は違うもの日本でも行われておりました。

民主党代表の鳩山由紀夫氏です。

鳩山氏は無料ホームページを提供するジオシティーズの宣伝メールを利用したものでした。

そのメールの内容は、以下のようなものです。

----- Original Message -----

Thu, 22 Jun 2000 17:27:34 +0900

“ IT革命 ” を具体的に推し進めているのは民主党です。（ *注1 ）

与党の数合わせ、枠組みの安定=停滞ではなく、具体的な政策 / 暮らしの安定を！ （ *注2 ）

今度こそ！あなたが動けば、必ず日本は変わります。

このメールが、皆さんの話題の一つにでもなれば幸いです。

Let's Change Now !

民主党代表 鳩山由紀夫

----- Original Message Ends -----

ITに関心のあるコンピュータユーザーを意識して、ホームページ保持者に送信したのは、いいアイデアかと思われませんが、この手のメールが、転送を繰り返す可能性があることや、改竄（かいざん）されチェーンメール化する事は意識のうちにはなかったようですね。

ラリー・パープロ氏や、鳩山氏のアイデアは非常にいいと思いますが、現在の電子メールの特性を考えると、単なるspamメールと化してしまう可能性もあるため、せっかくいいアイデアも、迷惑メールの仲間に入ってしまったら、大無しですからね

選挙活動とインターネット。 今後切っても切れない関係になるかもしれませんが、問題は山積です。

今週のコラム 『バーチャルな世界、その3』
=====

ネット空間とはどのようなものか？ まずこの空間を考える上で、主な特徴を挙げてみます。

1. 国境を越えたグローバルな空間であり、各国の文化風習、法律のボーダーがあいまいである。
2. 技術的な視点、観点が必要不可欠である。
3. 双方向を持ったメディアである。

4. 伝達スピードの早さと、広範囲性。
5. メディアがデジタルであり、目に見えないものである。

つまり私たちが経験してきた世界とは、似て非なるもので、アニメなどの空想空間ともまた違う、実にやっかいな世界なのである。

まず1.であるが、インターネットには国境が存在しないので、各国の文化、風習、マナー、などが混ざり合い、独特の世界を築きつつある。

また、法律もこの世界を取り締まるには、限界が来ている国もあり、また各国の連携プレイも足並みがそろわない。

法律家、政治家はそれまで経験してきた世界とは異なるもので、通信法や情報法として論じられてきた旧来の法的アプローチでは、もはや過去の遺物のほか何もでもない。

つまり2.で挙げたように、技術者の助言無くして法律の制定すら出来ない状態である。

3.と4.は、一般人に大きなパワーを与えた。今まで、テレビや新聞の独壇場であった、一对多の情報発信が可能になり、また伝達スピードも今までとは比べ物にならないスピードである。

さて、一番理解に苦しむのが、4.であろう。以前ネット上におけるポルノ画像の裁判で、押収したフロッピーに入った画像ファイルが、今までのものと同じ写真として扱えるか、と言う判例があったが、黒いフロッピーを目の前にして、これがポルノ画像ですと言う姿は、さぞかし滑稽(こっけい)な風景であったでしょうね (^_^)

* Presidential election and Internet *

Everyone expected and became situation, the American next term Presidential election.

The majority of the citizens has observed to re-totalling the poll of Florida state, but the flow
 In リダ state, the overseas resident person for the first time, using the web, absentee poll was done.

As for the number of polls by the online at small amount, furthermore, with the soldier where the
 many of them reside in the foreign country
 It does not go with to general utilization, but Internet is utilized for the first time in Presidential
 election,
 It increased.

The poll with the Web still at experimental stage, as the other area where the test was done,
 ウィーバー Gun of Arizonan state and Utah state and the Dallas Gun of Texas state, サウスカロライ
 There are several Gun of ナ state.

With limitation, as for the test it is said it succeeded, but it can utilize the citizen
It becomes the sea urchin until, you must solve, the problem exists to be many.

First it is of security strengthening and encoding problem.

The latest experiment is made succeeding, but the computer of online poll of part
There is an example which was invaded by the hacker, this problem is solved to the around which
Whether, it becomes future theme being, the ginger, at present time your weasel ☞ of the hacker
and
the police It is dense, continuously the time, still time is required, probably will be.

With presence difference appears in information and the service which of the second computer,
are obtained the question
where It is subject.

Already in America, in poor layer and the minority which do not have the computer opposite
Assuming it is the discrimination which it does the citizen group seeking the discontinuance of
online poll, the noise which it sues
It was.

It is senior citizen correspondence to the third.

Online poll generalizing, the stripe it is uninformed, does not have familiarity in the computer the
aged person
who Using the mouse very easily, you can vote to be difficult to think, after all, the selection
member one one
Procedure is explained and the hand must be lent to either the scroll doing the picture, being
Time is required excessively.

It is the indication whether it does not mean that buying and selling the fourth, vote is done simply.

Already, the American graduate student, to start the sight, boat * auction, ㄉ
It stopped in the eye of the ㄆㄋㄨ and obtained echo. [Http: //www.voteauction.com](http://www.voteauction.com)
This sight was sold after that, but presently it is closed.

How it keeps solving the problem above, at the point where the future whereabouts become very
matter of concern
Is.

Well, the latest Presidential election, even the dispute which freely used the net it is said.
As the one example, the Republican Party nationwide commission (the RNC) as for the rally * per
professional person of staff, 1 year
Being temporary, to convert to a data base the list of email address of the Republican Party
member, minute
It classified, so is.

In addition making use of the data base, the sight and the United States micro of the Republican Party support person American CNN corporation In Internet such as software corporation-related ' MSNBC ' sight * news sight ア The クセス doing, it dispatched the mail that it will appeal the support of the bush person.

To tell the truth as for this kind of attempt, as for method it was done even in thing Japan which is different.

It is the Hatoyama reason period husband person of the Democratic party representation.

Hatoyama utilized the advertisement mail of the ジオシティー which offers the free home page Being, it did.

Like below it does the contents of the mail, with the thing.

----- Original Message -----

Thu and 22 Jun 2000 17:27:34 +0900

* * The fact that " IT revolution " is implemented concretely is the Democratic party. (* Note 1) * *

They are not several adjusting and framework straw raincoat stability = stagnation of the ruling party, concrete policy / the saddle it does and is cheap Fixed! (* Note 2)

Very this time! If you move, Japan changes by all means.

If this mail, becomes at even one of topic of everyone, it is fortunate.

Let's Change Now!

The Democratic party typical Hatoyama reason period husband

----- Original Message Ends -----

Being conscious of the computer user which has interest in the IT, in the home page retention person transmission

What it does is thought, whether good idea, but the mail of this hand, reels transfer, returning Being the possibility and, of altering whether (now then it is) to be done, the to chain mail as for converting consciousness

Don't you think? it seems that is not inside.

The rally * per professional person and Hatoyama idea think it is very good, but present When of quality of the email is thought, the mere spam mail the possibility of converting あ Because of the ん, with special care good idea, entering to the companion of the annoyance mail, large Because it is not is, don't you think?

Election activity and Internet. In the future cutting, the causing ん which becomes the relationship

which is not cut off increase
Is, as for problem is accumulation.

Net space some kind of ones? First when thinking of this space, main feature
You try listing.

1. Global it exceeds the border to be the space, cultural custom of each country, border of law Is ambiguous.
2. Technical point of view, viewpoint is indispensable.
3. It is the media which had bidirectional.
4. Speed and wide-ranging characteristic of transmission speed.
5. The media is digital, is something discernibly.

In other words the world where we experience, being similar, being something which becomes
fault, fantasy of animation
and the like Also the space is different and, it is the truly troublesome world.

First 1. So it is, but because the border does not exist in Internet, culture of each country, wind
Learning and the manner, and so on to blend, it is building the unique world.

In addition, a law and to manage this world, a country where the limit has come there to be, in
addition each country
Cooperation play the pace is not even.

The legal house, as for the politician the world where you experience being something which
differs to that, communication procedure and information
With the conventional legal approach which is discussed as law, already other than the past relic
Is nothing.

In other words 2. As so listed, advice of the technician losing, even enactment of law it is not
achieved a state
where So it is.

3. With 4. Big power was given to the general people. Until now, monopoly of the television and
the newspaper So it was, pair multi information dispatching to become possible, in addition also
transmission speed until now ratio
It is the speed which does not become へ ones.

Well, most having hard time understanding, 4. So it probably will be. On the in the past net the pornographic picture
 With judgment of the image, is confiscated enters into the floppy which the graphics file which, as present ones same
 As the ㄥ photograph there was a judicial precedent whether it can handle, but the black floppy is designated as before the eye,
 The ㄗ, this is the pornographic picture and the form which is said surely humor (humor) with the scenery oh
 Don't you think? it is probably will be, (the ^^ HKDRT

今週のネットニュース

大統領選挙とインターネット

誰もが予想していな事態になった、米国の次期大統領選挙。

国民のほとんどががフロリダ州の投票の再集計に注目していますが、そのフロリダ州で、海外在住者が初めて、ウェブを使っての不在者投票を行ないました。

オンラインによる投票数は少数で、しかも、その多くが海外に駐在する軍人で一般の利用とまではいかないが、インターネットが初めて大統領選に利用されました。

Webによる投票はまだまだ実験段階で、テストが行なわれた他の地域としては、アリゾナ州、ユタ州のウィーバー郡、テキサス州のダラス郡、サウスカロライナ州のいくつかの郡があります。

限定的では、テストは成功したといわれていますが、一般市民が利用できるようになるまでには、解決しなければならない問題が数多く存在しています。

まず第一にセキュリティ強化と暗号化の問題です。

今回の実験は成功とされていますが、一部のオンライン投票のコンピュータがハッカーによって侵入された例があり、どの辺りまでこの問題が解決されるのかが、今後の課題になるでしょうが、現時点ではハッカーと警察のいたちごっこが続いており、まだまだ時間がかかるでしょう。

第二にコンピューターの有無で、得られる情報やサービスに差が出てしまう問題です。

すでにアメリカでは、コンピューターを持たない貧困層やマイノリティーに対する差別だとして、市民団体がオンライン投票の中止を求めて提訴する騒ぎもありました。

第三に高齢者への対応です。

オンライン投票が一般化してしまうと、コンピュータになじみのないお年寄りが、マウスをらくらく使って投票できるとは考えにくく、結局、選員が1つ1つの手順を説明し、画面をスクロールするのも手を貸さなければならないのでは、余計に手間がかかってしまいます。

第四に、票の売買が簡単に行われるのではないかという指摘です。

すでに米国の大学院生が、ポート・オークションと言うサイトを立ち上げ、マスコミの目にとまり反響を得ました。 <http://www.voteauction.com> このサイトは、その後売り渡されましたが、現在は閉鎖されています。

以上の問題をどのように解決していくか、今後の行方が非常に気になるところです。

さて、今回の大統領選、ネットを駆使した争いとも言われております。その一例として、共和党全国委員会(RNC)幹部のラリー・パープロ氏は、1年がかりで共和党員の電子メールアドレスのリストをデータベース化し、事細かな分類をしたそうです。

またそのデータベースを利用し、共和党支持者米CNN社のサイトや米マイクロソフト社関連の『MSNBC』サイトなど、インターネット・ニュースサイトにアクセスして、ブッシュ氏の支持をアピールしようと言うメールを発信しました。

実はこのような試みは、方法は違うもの日本でも行われておりました。

民主党代表の鳩山由紀夫氏です。

鳩山氏は無料ホームページを提供するジオシティーズの宣伝メールを利用したものでした。

そのメールの内容は、以下のようなものです。

----- Original Message -----

Thu, 22 Jun 2000 17:27:34 +0900

“IT革命”を具体的に推し進めているのは民主党です。（*注1）

与党の数合わせ、枠組みの安定=停滞ではなく、具体的な政策/くらしの安定を！（*注2）

今度こそ！あなたが動けば、必ず日本は変わります。

このメールが、皆さんの話題の一つにでもなれば幸いです。

Let's Change Now !

民主党代表 鳩山由紀夫

----- Original Message Ends -----

ITに関心のあるコンピュータユーザーを意識して、ホームページ保持者に送信したのは、いいアイデアかと思われませんが、この手のメールが、転送を繰り返す可能性があることや、改竄（かいざん）されチェーンメール化する事は意識のうちにはなかったようですね。

ラリー・パープロ氏や、鳩山氏のアイデアは非常にいいと思いますが、現在の電子メールの特性を考えると、単なるspamメールと化してしまう可能性もあるため、せっかくいいアイデアも、迷惑メールの仲間に入ってしまったら、大無しですからね

選挙活動とインターネット。 今後切っても切れない関係になるかもしれませんが、問題は山積です。

=====
今週のコラム 『バーチャルな世界、その3』
=====

ネット空間とはどのようなものか？ まずこの空間を考える上で、主な特徴を挙げてみます。

1. 国境を越えたグローバルな空間であり、各国の文化風習、法律のボーダーがあいまいである。
2. 技術的な視点、観点が必要不可欠である。
3. 双方向を持ったメディアである。
4. 伝達スピードの早さと、広範囲性。
5. メディアがデジタルであり、目に見えないものである。

つまり私たちが経験してきた世界とは、似て非なるもので、アニメなどの空想空間ともまた違う、実にやっかいな世界なのである。

まず1.であるが、インターネットには国境が存在しないので、各国の文化、風習、マナー、などが混ざり合い、独特の世界を築きつつある。

また、法律もこの世界を取り締まるには、限界が来ている国もあり、また各国の連携プレイも足並みがそろわない。

法律家、政治家はそれまで経験してきた世界とは異なるもので、通信法や情報法として論じられてきた旧来の法的アプローチでは、もはや過去の遺物のほか何もでもない。

つまり2.で挙げたように、技術者の助言無くして法律の制定すら出来ない状態である。

3.と4.は、一般人に大きなパワーを与えた。 今まで、テレビや新聞の独壇場であった、一对多の情報発信が可能になり、また伝達スピードも今までとは比べ物にならないスピードである。

さて、一番理解に苦しむのが、4.であろう。 以前ネット上におけるポルノ画像の裁判で、押収したフロッピーに入った画像ファイルが、今までのものと同じ写真として扱えるか、と言う判例があったが、黒いフロッピーを目の前にして、これがポルノ画像ですよという姿は、さぞかし滑稽(こっけい)な風景であったでしょうね (^_^)

ENEWS APRIL 2001

You're probably already aware of the numerous innovations and leadership roles that BAVC is recognized for: setting a new standard in videotape preservation, establishing a national model for digital workforce development, just to name a few. But did you know that BAVC also founded April Fools Day? No kidding. Executive Director, Sally Jo Fifer, recounts the story:

“Gosh, I remember it was the spring of 1987, and our cash flow was unusually low. As a media arts organization, we're fortunate not to have to worry about those things too often, but I didn't want to overlook this financial anomaly. I thought, why not offer a funhouse-theme event on the first of April to bring those new users in our door. Oh, it was hysterical; we had slide-whistles and monkeys and those funny mirrors that make you all distorted. You know, to put the firepower of tomfoolery into the hands of independent producers. And here I was, in my suit, greeting everyone at the door with a buzzer in my hand. [*She pauses to chuckle*] Well, anyway, the Mayor's Office loved it. They must have started funding that sort of thing, because all of a sudden, everybody was doin' it.”

True story.

This month at BAVC, if you can believe it:

This is the monthly on-line newsletter of the Bay Area Video Coalition (BAVC). BAVC is the nation's largest noncommercial media arts center, providing access to media, training and technology for artists, nonprofit organizations and low-income populations. To this end, BAVC is comprised of three core departments: Creative and Media Services, Education, and JobLink.

1. THE INDUSTRY SLANDERED

--BAVC's Workforce Development Program Responds to the Dot-Com Downturn

The primary objective of our **MediaLink** program has always been to advance low-income communities in new media careers. Despite a much-publicized industry downturn, that goal hasn't changed and neither has the need. Training in new media is still critical to low-income communities who need to remain vital in a continually morphing workplace. Some of our grads may now face hiring freezes at specific companies; but the majority of our students continue to be placed in positions that allow them a substantial increase in income.

Key to the success of MediaLink is our understanding of the trends in the digital marketplace. When there is a shift, we respond by tailoring our curriculum and placement efforts accordingly. As a result, MediaLink remains focused and effectual. The companies we targeted for job placements in 1998 are not the companies we target in 2001. Our Employment Counseling team has secured partnerships with established corporations offering online components in contrast to new start-up ventures. Our focus is on traditional retailers like the **Gap**, financial institutions like **Bank of America**, and gaming and software companies like **Activision** and **Adobe**. Other auspicious partnerships have yielded both participants and grads opportunities for significant skill upgrades, like animation and back-end expertise. Both Digital Think and Shout Interactive have provided extra-curricular training in these skills still in demand. All this, an increase in our staff resources, and collaborations with community organizations like Goodwill, enable us to serve more people than ever before. We currently run 6 concurrent MediaLink classes, placing 60 grads at one time, in addition to any alumni who return for assistance in seeking new positions. You can track the continued success of our graduates in the "Beyond MediaLink" section of our site at www.medialinksf.org.

2. YOUTHZINE: A MEDIA ALL THEIR OWN

--BAVC's YouthLink Program Allows Young People to Produce Media for Themselves

YouthLink is an after-school and summertime digital media program for high school teens who want to learn how to create web sites, animation and digital video. YouthLink teens work together as a team to critique the media world they're immersed in, and in turn,

produce their own media. Participants learn how to shoot and edit digital video for the web, use digital imaging and animation software applications, and build and maintain their own individual web sites. Throughout the use of these powerful production tools, students examine and discuss the messages they receive from popular media, and what impact it has on their lives and those of their peers. Both in response and as an alternative to commercial media, YouthLink classes further develop digital media skills through the production of **YouthZine**, a dynamic youth-focused online magazine. You can check out their latest efforts at <http://www.youthzine.org>.

3. HAVE YOU HUGGED YOUR ACCESS TODAY?

--Artists Equipment Access Awards Call for Entries

BAVC's AEA Award allows honorees \$2500 worth of access to our post-production facility, \$1000 towards our vast array of workshops, and publicity for their project. This has proved an amazing opportunity for our members who were in the post-production phase of a non-commercial program. Past recipients have gone on to great success at various film fests including **Sundance** and broadcasts on **PBS** (see [following item](#)). Special interest is granted to new media artists who are working on projects in association with community groups or about community issues. Nonmembers interested in applying for the AEA Awards must join BAVC for eligibility. Applications are available now at www.bavc.org and are due by May 18. Visit the BAVC web site for more details, or email michella@bavc.org.

4. LONG-AWAITED BAVC SCREENING SERIES

--You're Invited!

We're presenting four screenings of the completed works of the **Artist Equipment Access Award** recipients for 2000. Their work has been well received by initial audiences at film festivals. Come see why! All screenings are at 7:00 PM at BAVC.

- **"Grrlyshow" by Kara Herold - Thursday, April 19th**
Grrlyshow, which showcased at Sundance 2001, is a film about the wealth of alternative magazines (zines) being created by girls/ women and its relation to contemporary feminism.
- **"Mama Wahunzi" by Lawan Jirasuradej - Thursday, April 26th**
This documentary, filmed in Kenya and Uganda, takes a cross-cultural look at women and the disabled community. It is a story of how a basic tool for mobility affects change in personal and community life and opens up possibilities for the empowerment and liberation of physically disabled people worldwide.
- **"The Hotel Upstairs" by Daniel Baer - Friday, May 4th**
The Hotel Upstairs brings to life the world of San Francisco's Columbus Hotel and asks its viewers to reconsider their ideas of home and urban space, and the nameless faces on the street.
- **American Socrates: The Life of Bayard Rustin by Nancy Kates - Thursday, May 10th**
This biographical documentary examines the late civil rights, peace, and human rights activist Bayard Rustin, the chief strategist for Dr. Martin Luther King, Jr. and organizer of the 1963 March on Washington.

5. AVID BOOTCAMPS: NO MORE YELLING

--Check Out Our Two Featured Classes This Month

Advanced Avid Media Composer Effects Bootcamp

This class is not for the faint of heart! This bootcamp will teach you everything you need to know about Avid Media Composer Effects in five rigorous days. The first two days of this course focus on designing multi-layered and multi-nested effects on Avid Media Composer for maximum quality and optimal render time. The next three days demonstrate how to prepare still and moving graphics and alpha mattes for import into Avid Media Composer. Students will also learn how to use Intraframe Editing to create paint effects and animated mattes. Class time is divided between demonstration and hands-on-practice. Third party packages used in the class include Adobe Photoshop 6.0 and Cleaner 5.

[Click here for dates, times, and fees.](#)

Film Editing on Avid Media Composer

This practical three-day course prepares editors and assistant editors

for film editing on Avid Media and Film Composer. Each day combines instructor-led lecture, demonstration, and hands-on practice. Topics include: Understanding the telecine process, organizing a session, logging, digitizing, editing sequences, and managing system storage. In addition, participants will learn how to create EDLs, cut lists, change lists, and digital cuts.

[Click here for dates, times, and fees.](#)

[\(return to top\)](#)

6. SOCIETY PAGE

--See Who's Been Spotted at BAVC Lately

- KOED's **Independent View** will use BAVC's Avid to complete post production for upcoming shows featuring **Julian Schnabel** ("Before Night Falls"), **John Waters**, and **Colleen Smith** ("A Dry Long So").
- **Loni Ding** recently completed her epic documentary on the origins of Asian immigration to the Americas here at BAVC. "**Ancestors In The Americas**" is the first major television series to offer an in-depth historical understanding of one of the fastest-growing and least known groups of immigrants in the United States: Asian Americans. It recently enjoyed a national PBS broadcast in late March. There's a great companion web site to the film at www.pbs.org/ancestorsintheamericas

Here's a quick update on some new equipment heading our way:

- We are purchasing a DSR 2000 DV deck, which means that you can now master to DV.
- You'll soon have another affordable option for offlining your video projects: an AVID 400 suite will soon be up and running.

[\(return to top\)](#)

7. SOME OF OUR BEST FRIENDS ARE INTERNS

--Join the BAVC Team Through a Spring Internship

BAVC's internship program is known throughout the country as one of the few places to get a foot in the door of a competitive industry. It's also regarded by the local media industry as a training ground for new talent. BAVC interns receive training in the

fundamentals of video and computer technologies and learn the workings of the organization from multiple perspectives. Interns are exposed to the people, events, and technology of the Bay Area video and multimedia community. The internship is intended for Bay Area residents with a low-to-moderate income. Application and requirements for the internship are available on our website, or you may call BAVC at (415) 861-3282 to receive an application in the mail. The next deadline is April 6, 2001.

[\(return to top\)](#)

8. FORGET IT, JAKE. IT'S RESFEST. --RESFEST Now Accepting Submissions

RESFEST Digital Film Festival is now accepting submissions for the 2001 tour. RESFEST promotes innovative films from independent filmmakers, empowered by the use of digital production tools. Through screenings, panel discussions, and hands-on demos of digital filmmaking tools, RESFEST presents a film festival unlike any other. Cities slated for 2001 include San Francisco, Seattle, Chicago, New York, Los Angeles, London, Montreal and Tokyo. Categories include shorts, features, music videos, DVD and CD-ROM projects, and Internet animation. Early deadline for this year's event is May 4th and the late deadline is June 1st. Entry forms and guidelines can be found at www.resfest.com or contact submit@resfest.com.

9. EDGY ART AT SFSU --San Francisco State Offers New Summer Arts Workshops

The **Edge City Experimental Arts Summer Institute** is an opportunity to work and study with internationally acclaimed artists who are working at the cross-section of art and technology (hey, that sounds familiar). Each summer, Edge City will offer three sequential workshops that explore topical areas such as robotics, culture jamming, interactive media, biology and art, among others. Here's this summer's line-up:

June 11-15 - The Seemen - Experimental Robotic Performance

- Learn industrial, kinetic, machine, performance and robotic art. Workshop will cover its history, theories, concepts, aesthetic principles, and an introduction to hands-in techniques. Students will explore some of the potential applications in the medium, and then develop a project using materials developed by the SEEMEN.

June 18-22 - RTMark - Culture Jamming: Using Internet Technologies to Question Corporate Structures

- RTMark internationally renown for cultural interventions such as SimCopterhack, the Barbie Liberation Organization, Voteauction.com, GWBush.com, the etoy Fund ("Toywar"), etc. RTMark member Cliff Coney will help students design and strategize new or ongoing subversive projects

June 25-29 - Pamela Z - Experimental Sound Performance and Installation

- Experiment in sound from the physics of sound to performance. Work with digital sound recording and editing, create sound works and listen to work by sound artists and experimental composers. Sound will never be the same.

Details about workshops at <http://userwww.sfsu.edu/~infoarts/>.

Details about enrollment at Multimedia Studies Program website at <http://www.msp.sfsu.edu> or (415) 405-7700. Contact Information about Edge City at edgecityinfo@yahoo.com

ENEWS APRIL 2001

You're probably already aware of the numerous innovations and leadership roles that BAVC is recognized for: setting a new standard in videotape preservation, establishing a national model for digital workforce development, just to name a few. But did you know that BAVC also founded April Fools Day? No kidding. Executive Director, Sally Jo Fifer, recounts the story:

“Gosh, I remember it was the spring of 1987, and our cash flow was unusually low. As a media arts organization, we're fortunate not to have to worry about those things too often, but I didn't want to overlook this financial anomaly. I thought, why not offer a funhouse-theme event on the first of April to bring those new users in our door. Oh, it was hysterical; we had slide-whistles and monkeys and those funny mirrors that make you all distorted. You know, to put the firepower of tomfoolery into the hands of independent producers. And here I was, in my suit, greeting everyone at the door with a

17C3: CCC plant Aufbau eines alternativen DNS-Root-Servers

Andy Müller-Maguhn, Sprecher des [Chaos Computer Clubs](#) und seit Mitte November [Vertreter der allgemeinen User](#) in Europa bei der Internet-Verwaltung [ICANN](#), hat in seiner kurzen Dienstzeit als Vorstand der kalifornischen Unternehmung bereits genug mitbekommen, um seine Vorbehalte gegen das Regime der Netzressourcen-Verteiler bestätigt zu sehen. Es ist nicht nur der mysteriöse [Regierungsbeirat](#) bei der ICANN oder die Vormacht von Konzernen aus der Telekommunikations- und Elektronikbranche in der [Protocol](#) beziehungsweise [Domain Name Supporting Organisation](#), zwei der drei Standbeine der Adressverwaltungsstelle, die dem Hacker Kopfschmerzen bereiten. Vielmehr glaubt Müller-Maguhn, dass das Design des von der ICANN überwachten Namensraumes grundsätzlich falsch angelegt ist.

Den ICANN-Direktor stört vor allem, dass das Domain-Namen-System (DNS) nach wie vor der letzte zentralistische Punkt ist, an dem relativ einfach Kontrolle ausgeübt werden kann. Der wunde Punkt des Systems ist vor allem der so genannte A-Root-Server, das zentrale Verzeichnis aller Webadressen, das nach wie vor mit dem Segen der US-Regierung von der inzwischen zu Verisign gehörenden Firma [Network Solutions](#) überwacht wird. Drum herum gibt es zwar inzwischen 12 weitere Root-Server – sie spiegeln allerdings nur das Verzeichnis des Basis-Servers.

Wie einfach sich dieses System missbrauchen lässt, zeigt für Müller-Maguhn vor allem das Beispiel [Vote-auction.com](#): Die österreichische [Schock-Marketing-Agentur Übermorgen.com](#) hatte auf dieser Domain im Oktober die Versteigerung von Stimmen für die amerikanische Präsidentschaftswahl ermöglicht, nachdem der Betrieb der ursprünglich von einem Kunststudenten im Staate New York konzipierte Plattform unter der Domain [Voteauction.com](#) von einem Landgericht in Illinois per einstweiliger Verfügung gestoppt worden war.

Um sich dem Einfluss amerikanischer Gesetze bei der Ausweichadresse [Vote-auction.com](#) zu entziehen, hatten die Macher von [Übermorgen.com](#) sie nach dem Verbot der Stammdomain bei einem deutschen Provider registrieren lassen, der seine .com-Adressen über das in der Schweiz beheimatete [CORE](#) verwaltet. Doch die Österreicher hatten nicht mit dem weiten Arm der amerikanischen Politiker gerechnet: Am 2. November teilte CORE ihnen mit, dass man über den Ablauf illegaler Machenschaften auf der Domain [Vote-auction.com](#) per E-Mail informiert worden sei und daher der Austragung der Adresse aus den Root-Servern [zugestimmt habe](#).

In eine ähnliche Richtung, so Müller-Maguhn, weise der Fall der Manipulation von Webseiten der jugoslawischen Opposition während der Präsidentschaftswahl Ende September. Milosevics Ministerium für Wissenschaft und Information hatte damals den Verwalter der Domain [.org.yu](#) derart unter Druck gesetzt, dass er die Besucher der Site der Demokratischen Partei auf andere, meist pornografische Webangebote [umleitete](#).

Die Beispiele sind für den Hackerclub Grund genug, mit einem alternativen Domain-Namen-System zu experimentieren. Nachdem Müller-Maguhn bereits Anfang November [mit dem Gedanken gespielt](#) hatte, "etwas Eigenes aufzumachen", bestätigte er gestern auf dem 17. [Chaos Communication Congress](#) in Berlin den Plan, einen alternativen Namensraum ohne hierarchisches Konzept innerhalb

der Hackerszene aufzubauen. "Wir haben genügend Rechner am Netz, das Ganze ist technisch machbar", sagte der Sprecher des Clubs unter dem Beifall der versammelten Community.

"Wir werden den Planeten in ein heilloses Chaos stürzen", fügte er scherzend hinzu, "um auf die Fehler im System hinzuweisen." Schließlich hätten die Politiker und die "Markenrechts-Mafia" vor nichts mehr Angst, als vor Webräumen, wo sich keiner um Namensrechte oder Urhebergesetze kümmere.

Der CCC wäre mit der Umsetzung des Plans nicht der einzige Betreiber virtueller Nebenwelten im Internet. Bekannte Betreiber alternativer Root-Server sind beispielsweise der ehemalige Netzkünstler Paul Garrin aus New York, der über [Name.Space](#) bereits über hundert Top-Level-Domains anbietet, die nicht im Root-Server von Network Solutions geführt werden, oder die US-Firma [Image Online Design](#), die sich vor allem auf Dot.web eingeschossen hat. Das Problem aller alternativen Adressverzeichnisse ist, dass sie bei den meisten Providern nicht in der DNS-Software eingetragen sind, die Domain-Abfragen weiterleitet und beantwortet.

Der CCC will trotzdem mit dem Projekt beginnen, "auch wenn wir das alles erst einmal nur unter uns nutzen", bekräftigte Müller-Maguhn den Entschluss. Es gehe letztlich darum, die weltweite Verbreitung "amerikanischer Zustände" zu verhindern. (*Stefan Krempf*) / ([jk/c't](#))

17C3: CCC plans structure of an alternative DNS root server

Andy Mueller Maguhn, speaker [of the chaos computer club](#) and since in the middle of November [representative the general user](#) in Europe during the InterNet administration [ICANN](#), received in its short service as an executive committee of the California enterprise already enough, in order to see confirmed its reservations against the regime of the net resources distributors. It is not only the mysterioese [government adviser](#) with the ICANN or the Vormacht of companies from telecommunications and electronics industry in [the Protocol](#) and/or [Domain Name Supporting organization](#), two of the three support legs of the address administration office, which for the hacker headache prepares. Rather Mueller Maguhn believes that the Design is in principle wrongly put on by the ICANN of supervised name area.

The ICANN director disturbs above all still that the Domain name system (DNS) is the last centralistic point, at whom relatively simply control be exercised can. The wound point of the system above all the A-root-server in such a way specified, the central listing of all Web addresses, is which is still supervised with the benediction of the US government of that in the meantime to Verisign belonging [company Network Solutions](#). Drum around gives it in the meantime 12 further root servers - they reflect however only the listing of the basis server.

How simply this system can be abused, above all the example shows [Vote auction.com](#) for [Mueller Maguhn](#): The Austrian [shock marketing agency Ubermorgen.com](#) had made possible on these Domain in October the auction of voices for the American presidency election, after the enterprise originally by an art student in the State of New York conceived of the platform under the Domain [Voteauction.com](#) by a regional court in Illinois by provisional order had been stopped.

In order to extract themselves from the influence of American laws with the alternative address [Vote auction.com](#), the Macher from [Ubermorgen.com](#) it after the prohibition of the Stammdomain with a German Provider register let, its com Addresses over the CORE resident in [Switzerland](#) had administered. But the Austrians had not counted on the far arm of the American politicians: On 2 November CORE communicated to them the fact that one had been informed about the expiration of illegal machinations on the Domain [Vote auction.com](#) by E-Mail and therefore delivering the address from the root servers [agreed](#).

Into a similar direction, so Mueller Maguhn, points the case of the manipulation from web pages of the Yugoslav opposition during the presidency election at the end of Septembers. Milosevics Ministry for science and information had pressurized the manager of the Domain [org.yu](#) in such a manner at that time that he rerouted the visitors of the Site of the democratic party on other, usually pornografische [Web offers](#).

The examples are for the hacker club reason of enough to experiment with an alternative Domain name system. After Mueller Maguhn had already played at the beginning of [November with the thought](#), "something own to open", he confirmed 17 yesterday on that. [Chaos Communication Congress](#) in Berlin the plan to develop an alternative name area without hierarchical concept within the hacker scene. "we have sufficient computers at the net, the whole are technically feasible", said

the speaker of the club under the applause of the met Community.

"we will fall, added the planet into a welfareless chaos" it joking to refer "over to the errors in the system." Finally the politicians and the "trademark law Mafia" would have before nothing more fear, than before Web areas, where none worries about rights of the use of a name or copyright laws.

The CCC would not be with the conversion of the plan the only operator of virtual Nebenwelten in the InterNet. Well-known operators of alternative root servers are for example the former net artist Paul Garrin from New York, who already [offers](#) over name space over one hundred Top level Domains, which are not led in the root server by network Solutions, or which US company [image on-line Design](#), which zeroed in itself particularly on DOT Web. The problem all the alternative address listings is that they are registered to Domain inquiries in the DNS software with most Providern not, pass on those and answered.

The CCC wants nevertheless with the project to begin, "even if we all this only only among us uses", affirms Mueller Maguhn the resolution. It concerns in the long run to prevent the world-wide spreading of "American conditions" (*Stefan Krempel*)/([jk](#)/c't)

17C3: CCC plant Aufbau eines alternativen DNS-Root-Servers

Andy Müller-Maguhn, Sprecher des [Chaos Computer Clubs](#) und seit Mitte November [Vertreter der allgemeinen User](#) in Europa bei der Internet-Verwaltung [ICANN](#), hat in seiner kurzen Dienstzeit als Vorstand der kalifornischen Unternehmung bereits genug mitbekommen, um seine Vorbehalte gegen das Regime der Netzressourcen-Verteiler bestätigt zu sehen. Es ist nicht nur der mysteriöse [Regierungsbeirat](#) bei der ICANN oder die Vormacht von Konzernen aus der Telekommunikations- und Elektronikbranche in der [Protocol](#) beziehungsweise [Domain Name Supporting Organisation](#), zwei der drei Standbeine der Adressverwaltungsstelle, die dem Hacker Kopfschmerzen bereiten. Vielmehr glaubt Müller-Maguhn, dass das Design des von der ICANN überwachten Namensraumes grundsätzlich falsch angelegt ist.

Den ICANN-Direktor stört vor allem, dass das Domain-Namen-System (DNS) nach wie vor der letzte zentralistische Punkt ist, an dem relativ einfach Kontrolle ausgeübt werden kann. Der wunde Punkt des Systems ist vor allem der so genannte A-Root-Server, das zentrale Verzeichnis aller Webadressen, das nach wie vor mit dem Segen der US-Regierung von der inzwischen zu Verisign gehörenden Firma [Network Solutions](#) überwacht wird. Drum herum gibt es zwar inzwischen 12 weitere Root-Server – sie spiegeln allerdings nur das Verzeichnis des Basis-Servers.

Wie einfach sich dieses System missbrauchen lässt, zeigt für Müller-Maguhn vor allem das Beispiel [Vote-auction.com](#): Die österreichische [Schock-Marketing-Agentur Übermorgen.com](#) hatte auf dieser Domain im Oktober die Versteigerung von Stimmen für die amerikanische Präsidentschaftswahl ermöglicht, nachdem der Betrieb der ursprünglich von einem Kunststudenten im Staate New York konzipierte Plattform unter der Domain **Voteauction**.com von einem Landgericht in Illinois per einstweiliger Verfügung gestoppt worden war.

Um sich dem Einfluss amerikanischer Gesetze bei der Ausweichadresse Vote-auction.com zu entziehen, hatten die Macher von Übermorgen.com sie nach dem Verbot der Stammdomain bei

einem deutschen Provider registrieren lassen, der seine .com-Adressen über das in der Schweiz beheimatete [CORE](#) verwaltet. Doch die Österreicher hatten nicht mit dem weiten Arm der amerikanischen Politiker gerechnet: Am 2. November teilte CORE ihnen mit, dass man über den Ablauf illegaler Machenschaften auf der Domain Vote-auction.com per E-Mail informiert worden sei und daher der Austragung der Adresse aus den Root-Servern [zugestimmt habe](#).

In eine ähnliche Richtung, so Müller-Maguhn, weise der Fall der Manipulation von Webseiten der jugoslawischen Opposition während der Präsidentschaftswahl Ende September. Milosevics Ministerium für Wissenschaft und Information hatte damals den Verwalter der Domain .org.yu derart unter Druck gesetzt, dass er die Besucher der Site der Demokratischen Partei auf andere, meist pornografische Webangebote [umleitete](#).

Die Beispiele sind für den Hackerclub Grund genug, mit einem alternativen Domain-Namen-System zu experimentieren. Nachdem Müller-Maguhn bereits Anfang November [mit dem Gedanken gespielt](#) hatte, "etwas Eigenes aufzumachen", bestätigte er gestern auf dem 17. [Chaos Communication Congress](#) in Berlin den Plan, einen alternativen Namensraum ohne hierarchisches Konzept innerhalb der Hackerszene aufzubauen. "Wir haben genügend Rechner am Netz, das Ganze ist technisch machbar", sagte der Sprecher des Clubs unter dem Beifall der versammelten Community.

"Wir werden den Planeten in ein heilloses Chaos stürzen", fügte er scherzend hinzu, "um auf die Fehler im System hinzuweisen." Schließlich hätten die Politiker und die "Markenrechts-Mafia" vor nichts mehr Angst, als vor Webräumen, wo sich keiner um Namensrechte oder Urhebergesetze kümmere.

Der CCC wäre mit der Umsetzung des Plans nicht der einzige Betreiber virtueller Nebenwelten im Internet. Katrin Kivimaa KUNST ja INTERNET

Üheks esimeseks internetikunsti näiteks peetakse ameerika meediakunstniku Davis Douglase teost "["Maailma pikim lause"](#)" ("The World's Longest Sentence"). 1994. aastal valminud teose eesmärgiks on kaasata internetti kasutavad inimesed üle terve maailma kirjutama lõputut ja üha muutuvat lauset. Douglas ise on kirjeldanud projekti igavesti jätkuva kommunikatsiooni aktina: "...niipea, kui keegi "Lause" loeb või kirjutab, saab ta aru, et on osa jätkuvast arvamusalaldusest, mis ei lõppe ial. "Lause" muutub iga päev, iga kuu, iga aasta. Praegused kaastööd on graafiliselt komplekssemad kui kunagi varem. "Lause" on nüüd ereroosa, täis pulseeruvat Java-scripti, videot, heli, värvi, ükskõik mida. Alguses oli see mustvalge, kuid individuaalne ja erakordse hingeeluga. Algne kiring on endiselt alles, aga liiga hea disain kipub tähelepanu "maailma sõnumilt" endale tõmbama. "Lause" puhul on kõige tähtsam siiski sisu."

[Kunstiõpetuse
10 KÄSKU](#)

KULTUURIMINISTEERIUM

[TAGASI AVALEHELE](#)

Internetikunst ehk võrgukunst ehk netikunst on väga lühikese ajalooga: selle tekkest saab rääkida alles 1990ndate keskpaigas või parimal juhul 1990ndate alguses, mil internet hakkas pisitasa laiale publikule ja kasutajateringile kättesaadavaks muutuma. Et esimeste internetikasutajate seas olid professionaalid ja akadeemilised ringkonnad, siis loomulikult sattus nende hulka ka kunstnikke, kes hakkasid kohe huvi tundma interneti spetsiifika, selle kasutusprintsipi ja ülesehituse vastu ning esitasid endale küsimuse, kuidas seda uut meediumi kunsti tegemiseks ja levitamiseks kasutada.

Iseenesestmõista on interneti üheks olulisemaks printsipiiks kommunikatsioon ja infovahetus ning selles mõttes võib seda vaadelda kui veel ühte, aga uut ja suhteliselt demokraatlikku kanalit, mille kaudu kunstnikud oma töid levitada saavad. Internetigaleriid ja muuseumide koduleheküljed on ilmselt kõige levinum arusaam sellest, kuidas kunsti interneti kaudu levitada, tutvustada ja müüa saab. Kuid traditsiooniliste vahenditega loodud kunsti eksponeerimine internetis ja internetikunst ei ole loomulikult üks ja seesama asi ning kõigepealt tuleks mul lugejale selgitada, et antud kirjatükk keskendub kunstile, mille loomisel ja eksponeerimisel on uuel meedial ehk arvutitehnoloogial otsustav roll. Klassikaliste kunstiteoste reprodutatsioon internetti kuulub interneti kommunikatiivsete ja hariduslike aspektide hulka. Võrgukunst ehk netikunst, nagu seda samuti nimetatakse, on aga kunst, mis on loodud näitamiseks ainult internetis endas.

Võrgukunsti puhul võib täheldada kahte peamist suunitlust: esiteks võrgu ehk siis interneti tehnoloogilise poole ja internetipõhise suhtluse omapäraga tegelevad teosed ning teiseks nõ. võrguaktivism. Suur osa võrgukunsti teostest põhineb arvutiprogrammide, World Wide Webi, võrgusuhtluse jne. eripärastel joontel. Üks esimesi eesti võrgukunstnikke Nelli Rohtvee, kelle teoseid võib kõige kergemini leida Kunstiakadeemia kodulehekülje kaudu, hakkas kirjutama hüpertextuaalset [võrguluulet](#), mis laenas tekstikatkeid nii jututubadest kui digitaalsetest infokanalitest. Tema teoste tehniline teostus ja sisuline sõnum on otseselt sõltuv internetisuhtluse ja infoedastamise loogikast. Samal ajal sisaldub tema teostes tihti ka kriitiline aspekt, mis võib olla suunatud nii ühiskondlike stereotüüpide kui ka interneti liigse romantiseerimise vastu. Tõsi, paljud internetikunstnikud ja aktivistid läksid alguses kaasa uskumusega, mis pidas internetti uueks demokraatlikuks suhtluskanaliks. Kahjuks võttis aga ka selles "virtuaalses maailmas" peagi võimust tarbimismentaliteet ja kapitalismi loogika ning paljudes riikides, sh. ka Eestis kujutati ette, et kiire majanduslik edu on saavutatav just internetimajanduse edendamise kaudu.

Seega on loogiline, et paljud netikunstnike teosed hakkasid üha enam suunama oma kriitikat interneti (ja kogu maailma) kommertsialiseerimise vastu. Ameerika poliitiline kunstirühmitus [®™ark](#) pakub võimaluse kõigile, kes soovivad suurärde või korporatsioonide aadressil kriitikat teha, kasutades selleks mängulis-kunstilisi vahendeid. Mitmed nende teosed parodeerivad seda, kuidas tänapäeval poliitikat tehakse. Rühmitus sponsoreeris veebilehekülge [voteauction.com](#), mis pakkus ameerika poliitikutele 2000. aasta presidendivalimiste ajal võimaluse endale hääli juurde osta. [®™ark](#) ärritab internetikasutajaid "vale"-lehekülgedega, mis on hämmastavalt sarnased poliitikute ja firmade ametlike kodulehekülgedega. Ühe sellise võrgusabotaazi ohvriks langes George W. Bush, kelle oletatav kokaiinitarbimine oli kesksel kohal veebileheküljel [GWBush.com](#). Bush teatas selle peale pressikonverentsil, et "vabadusel on omad piirid".

Ilmselt kõige kurikuulsam [®™ark](#) teos on Barbie Vabastusorganisatsiooni jaoks teostatud projekt (loe: [vastukajad meedias](#)), mille käigus vahetati ära paarisaja Barbie ja militaarse nuku G. J. Joe häälekiibid. Pärast seda küsisid

G. J. Joe-nukud "Wanna go shopping?" ja Barbie-nukud teatasid: "Dead Men tell no lies." Antud juhul väljus teos interneti raamest, kuid rühmituse tegevus ja suhtlemine teiste organisatsioonidega toimub ainult internetis.

Nagu viimaste näidete puhul nägime, on paljudele netikunsti teostele omane mänguline huumor. See iseloomustab mitmeid ühiskonnakriitilisi võrguteoseid, mis erinevalt varasemast poliitilisest kunstist on (enese) iroonilised, grotesksed ja humoorikad. Siinkohal tuleks kindlasti nimetada küberfeministlikku liikumist, mis ühendab feministliku suunitlusega meedia- ja võrgukunstnikke. Sellesse rahvusvahelisse koostöövõrku on oma panuse andnud ka eesti kunstnik Mare Tralla, kelle [võrgupõhised tööd](#) on suurepärase näide naeru ja iroonia kasutamisest küberfeministlikus esteetikas.

Loomulikult ei piirdu võrguteoste temaatika nimetatuga ning ilmselt on sedasorti kunsti raskem kategoriseerida kui ükskõik millist muud. Lõppkokkuvõttes võib võrgust leida ju kõike - nii head kui halba. Ja sama kehtib ka seal eksponeeritava ja tehtava kunsti kohta. Kuid samas on sellest veel hiljuti peaaegu tunnustamata kunstilligist - arvutitehnoloogia või internetipõhisest kunstist - saanud kaasaegse kunstipildi loomulik osa. Eesti kunst on selles valdkonnas üsna kodus, millest annavad tunnistust ka rahvusvahelised meediakunsti festivalid [Interstanding](#), mis Tallinnas alates 1995. aastast aset leidnud on. Ning aastal 2004 jõuab Tallinnasse meediakunsti suurüritus - ISEA (International Symposium of Electronic Arts), mis kannab Eesti üha kindlamini rahvusvahelisele meediakunsti maastikule.

repro: screenshot

Internetikunst ehk võrgukunst ehk netikunst on väga lühikese ajalooga: selle tekkest saab rääkida alles 1990ndate keskpaigas või parimal juhul 1990ndate alguses, mil internet hakkas pisitasa laiale publikule ja kasutajateringile kättesaadavaks muutuma. Et esimeste internetikasutajate seas olid professionaalid ja akadeemilised ringkonnad, siis loomulikult sattus nende hulka ka kunstnikke, kes hakkasid kohe huvi tundma interneti spetsiifika, selle kasutusprintsipi ja ülesehituse vastu ning esitasid endale küsimuse, kuidas seda uut meediumi kunsti tegemiseks ja levitamiseks kasutada.

Iseenesestmõista on interneti üheks olulisemaks printsipiiks kommunikatsioon ja infovahetus ning selles mõttes võib seda vaadelda kui veel ühte, aga uut ja suhteliselt demokraatlikku kanalit, mille kaudu kunstnikud oma töid levitada saavad. Internetigaleriid ja muuseumide koduleheküljed on ilmselt kõige levinum arusaam sellest, kuidas kunsti interneti kaudu levitada, tutvustada ja müüa saab. Kuid traditsiooniliste vahenditega loodud kunsti eksponeerimine internetis ja internetikunst ei ole loomulikult üks ja seesama asi ning kõigepealt tuleks mul lugejale selgitada, et antud kirjatükk keskendub kunstile, mille loomisel ja eksponeerimisel on

uuel meedial ehk arvutitehnoloogial otsustav roll. Klassikaliste kunstiteoste reprodere riputamine interneti kuulub interneti kommunikatiivsete ja hariduslike aspektide hulka. Võrgukunst ehk netikunst, nagu seda samuti nimetatakse, on aga kunst, mis on loodud näitamiseks ainult internetis endas.

Võrgukunsti puhul võib täheldada kahte peamist suunitlust: esiteks võrgu ehk siis interneti tehnoloogilise poole ja internetipõhise suhtluse omapäraga tegelevad teosed ning teiseks nõ. võrguaktivism. Suur osa võrgukunsti teostest põhineb arvutiprogrammide, World Wide Webi, võrgusuhtluse jne. eripärastel joontel. Üks esimesi eesti võrgukunstnikke Nelli Rohtvee, kelle teoseid võib kõige kergemini leida Kunstiakadeemia kodulehekülje kaudu, hakkas kirjutama hüpertekstuaalset [võrguluulet](#), mis laenas tekstikatkeid nii jututubadest kui digitaalsetest infokanalitest. Tema teoste tehniline teostus ja sisuline sõnum on otseselt sõltuv internetisuhtluse ja infoedastamise loogikast. Samal ajal sisaldub tema teostes tihti ka kriitiline aspekt, mis võib olla suunatud nii ühiskondlike stereotüüpide kui ka interneti liigse romantiseerimise vastu. Tõsi, paljud internetikunstnikud ja aktivistid läksid alguses kaasa uskumusega, mis pidas interneti uueks demokraatlikuks suhtluskanaliks. Kahjuks võttis aga ka selles "virtuaalses maailmas" peagi võimust tarbimismentaliteet ja kapitalismi loogika ning paljudes riikides, sh. ka Eestis kujutati ette, et kiire majanduslik edu on saavutatav just internetimajanduse edendamise kaudu.

Seega on loogiline, et paljud netikunstnike teosed hakkasid üha enam suunama oma kriitikat interneti (ja kogu maailma) kommertsialiseerimise vastu. Ameerika poliitiline kunstirühmitus [®™ark](#) pakub võimaluse kõigile, kes soovivad suurärde või korporatsioonide aadressil kriitikat teha, kasutades selleks mängulis-kunstilisi vahendeid. Mitmed nende teosed parodeerivad seda, kuidas tänapäeval poliitikat tehakse. Rühmitus sponsoreeris veebilehekülge [voteauction.com](#), mis pakkus ameerika poliitikutele 2000. aasta presidendivalimiste ajal võimaluse endale hääli juurde osta. [®™ark](#) ärritab internetikasutajaid "vale"-lehekülgedega, mis on hämmastavalt sarnased poliitikute ja firmade ametlike kodulehekülgedega. Ühe sellise võrgusabotaazi ohvriks langes George W. Bush, kelle oletatav kokaiinitarbimine oli kesksel kohal veebileheküljel [GWBush.com](#). Bush teatas selle peale pressikonverentsil, et "vabadusel on omad piirid".

Ilmselt kõige kurikuulsam [®™ark](#) teos on Barbie Vabastusorganisatsiooni jaoks teostatud projekt (loe: [vastukajad meedias](#)), mille käigus vahetati ära paarisaja Barbie ja militaarse nuku G. J. Joe häälekiibid. Pärast seda küsisid G. J. Joe-nukud "Wanna go shopping?" ja Barbie-nukud teatasid: "Dead Men tell no lies." Antud juhul väljus teos interneti raamest, kuid rühmituse tegevus ja suhtlemine teiste organisatsioonidega toimub ainult internetis.

Nagu viimaste näidete puhul nägime, on paljudele netikunsti teostele omane mänguline huumor. See iseloomustab mitmeid ühiskonnakriitilisi võrguteoseid, mis erinevalt varasemast poliitilisest kunstist on (enese) iroonilised, grotesksed ja humoorikad. Siinkohal tuleks kindlasti nimetada küberfeministlikku liikumist, mis ühendab feministliku suunitlusega meedia- ja võrgukunstnikke. Sellesse rahvusvahelisse koostöövõrku on oma panuse andnud ka eesti kunstnik Mare Tralla, kelle [võrgupõhised tööd](#) on suurepärase näide naeru ja iroonia kasutamisest küberfeministlikus esteetikas.

Loomulikult ei piirdu võrguteoste temaatika nimetatuga ning ilmselt on sedasorti kunsti raskem kategoriseerida kui ükskõik millist muud. Lõppkokkuvõttes võib võrgust leida ju kõike - nii head kui halba. Ja sama kehtib ka seal eksponeeritava ja tehtava kunsti kohta. Kuid samas on sellest veel hiljuti peaaegu tunnustamata kunstiliigist - arvutitehnoloogia või

internetipõhisest kunstist - saanud kaasaegse kunstipildi loomulik osa. Eesti kunst on selles valdkonnas üsna kodus, millest annavad tunnistust ka rahvusvahelised meediakunsti festivalid [Interstanding](#), mis Tallinnas alates 1995. aastast aset leidnud on. Ning aastal 2004 jõuab Tallinnasse meediakunsti suurüritus - ISEA (International Symposium of Electronic Arts), mis kannab Eesti üha kindlamini rahvusvahelisele meediakunsti maastikule.

[Vote-auction](#)

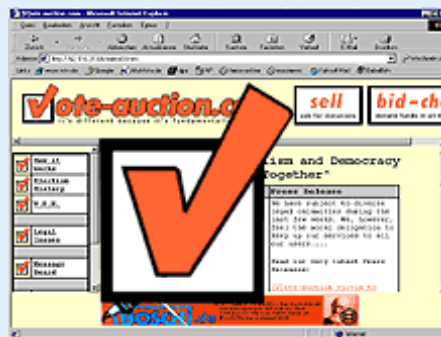

Internet-Auktion von US-Wahlstimmen geschlossen

Vote-auction ist erneut geschlossen worden. Die Website bietet eine Plattform, auf der US-Bürger ihre Stimmen für die anstehende Präsidentschaftswahl versteigern können. Die Zentrale Domainvergabestelle in den USA (InterNIC) hat die in Deutschland angemeldete Adresse [Vote-auction.com](#) aufgrund einer einstweiligen Verfügung gelöscht.

Bereits im Oktober war die damalige Internet-Adresse der Website, [votauction.com](#), vom Netz genommen worden. Die Domain war in den USA angemeldet, weshalb rechtliche Schritte von dort aus möglich waren. Im Fall der zweiten, in Deutschland angemeldeten Adresse hingegen ist der Schritt der US-Behörden, den Domain-Namen von der InterNIC löschen zu lassen, unter Experten stark umstritten.

Andy Müller-Maguhn, der vor kurzem von Internet-Nutzern zu einem der 19 Direktoren der ICANN gewählt wurde, kommentierte die erneute Schließung der Website mit "Ich denke, wir sollten etwas dagegen tun". Die Politologin Jeanette Hofmann bestritt zwar die Zuständigkeit der Internet Corporation for Assigned Names and Numbers (ICANN), sagte jedoch: "Ohne Zweifel stinkt diese Sache zum Himmel."

Das Prinzip von Vote-auction ist einfach: 50 Prozent der

amerikanischen Bevölkerung beteilige sich nicht an den Wahlen, so die Betreiber der Website. Diese Wahlberechtigten hätten nun die Möglichkeit, aus ihrer Stimme Kapital zu schlagen. Angesichts der riesigen Summen, die der US-Wahlkampf verschlingt, scheint das eine profitable Angelegenheit zu sein. Vote-auction bringe "Kapitalismus und Demokratie" näher zueinander, heißt es auf der Website.

Die zur Versteigerung stehenden Stimmen sind nach US-Bundesstaaten geordnet. Die Bieter können die Stimmen eines Bundesstaates ersteigern, wobei das Mindestangebot 100 US-Dollar beträgt. Dann geht es in 50-Dollar-Schritten weiter. Am Ende soll der jeweils Meistbietende die Adressen der Wahlberechtigten erhalten und sich mit ihnen in Verbindung setzen.

Die Betreiber verdienen nach eigenen Angaben kein Geld damit. Das war offenbar auch nicht ihre Intention, steht doch die Agentur Übermorgen.com hinter dem Angebot. Diese ist für ihr provokantes und Aufsehen erregendes "Schock-Marketing" bereits bekannt. Die Idee zu vote-auction.com stammt nach Angaben der Agentur von einem New Yorker Studenten, der jedoch aufgrund juristischer Verfahren gegen ihn die Website nicht selbst weiterbetreiben wollte.

Traducción del primer párrafo de Liquid... (Puntos:2, Informativo)

por [Noradrex \(noradrex*at*gmail\(punto\)com\)](#) el Sábado, 19 de Julio 2003, a las 15:01h ([nº198444](#))

[Info del Usuario nº3519](#) | http://es.geocities.com/f_nekar/index.html | Última Bitácora: [Martes, 08 de Marzo 2005, a las 00:41h](#)

The LiquidDemocracyVotingSystem attempts to solve several problems with currently-popular voting systems, but it tries especially hard to solve one problem in particular: Speed. It displays quite a few other interesting properties, but it was originally created from an answer to the following question: What would society be like if voting was so easy as to be nearly automatic?

El Sistema de Voto de Democracia Líquida pretende resolver muchos de los problemas de los actuales sistemas de voto popular, pero intenta resolver en especial un problema en particular: La velocidad. También muestra otras pocas características interesantes, pero fue creado originalmente como respuesta a la siguiente pregunta: ¿Como sería la sociedad si votar fuera tan fácil que casi fuese automático?.

Lo sé porque Tyler lo sabe...

Quiero que me tengan en cuenta (Puntos:5, Inspirado)por [dimethyl \(dimethyl@yahoo.es\)](#) el Sábado, 19 de Julio 2003, a las 16:48h ([nº198462](#))[Info del Usuario nº8402](#) | <http://barrapunto.com/>

El escritor del artículo tiene una especial fobia contra los políticos y contra los trolls, lo que me parece razonable, aunque no se si las soluciones que aporta cambian el panorama.

Observaciones:

1-Considera a los políticos como algo obsoleto y fuente de corrupción pero el "proxy" suena mucho a representante político y como el dice, su esquema no es inmune a dicha corrupción(compensation).

Recuerdo una iniciativa,(Voteauction.com = subasta de votos) que como protesta pretendía instaurar una democracia virtual de corrupción.Es decir ofrecía un sistema de compra de votos por internet.La idea era decir a los políticos:Sois corruptos y sabemos como os financias.Nosotros no queremos acabar con eso solo ofrecerlo mas barato.Evidentemente fue un escándalo.

2-Luego se queja de las masas desinformadas.Esto es un problema en toda democracia y su sistema ,como el reconoce cuando habla de los troll, tampoco lo mejora (individual bigotry).

¿Que se esta haciendo aqui?

Un Parlamentario del PP, Daniel Sirera,se entero de la pagina de "Democracia web" de la Fundacion Jaume Bofill en la que la gente "normal" puede hacer enmiendas a las leyes.LLevo la iniciativa a la camara catalana y todos la apoyaron menos CIU (Que luego votaria tambien a favor).Ahora la idea se sigue desarrollando en la pagina web de la Generalitat, pero no es una idea que CIU impulse ,solo la usan alrededor de 2000 catalanes aproximadamente.

¿Es necesario?

Hay que tener en cuenta la apatia del ciudadano.El sistema democratico peligra mas por estas apatias(desinteres) que por las antipatias(los trolls que denuncia Kragg en el artículo).Mirad si no, lo que ocurre con ser Jurado o asistir en una Mesa electoral.Poca gente quiere hacerlo.

Seria bueno que la abstencion se representase en el Parlamento con sillones vacios o que el referendum fuese vinculante.De momento la demoracia electronica tiene mucho trabajo por delante con las iniciativas legislativas y las proposiciones de ley.La relacion politico-ciudadano puede hacerse muy barata con la tecnologia.¿Pero prefieren los politicos depender realmente de Iso ciudadanos?¿No les va bien depender de su partido o de sus "financiadores"?

En cualquier caso, en la politica no son tan claras las relaciones causa-efecto.Desaprobacion o contestacion no implica necesariamente perder las elecciones.Los medios de comunicacion tradicionales tienen cada vez menos influencia, las encuestas y los sondeos de opinion fallan estrepitosamente.¿Recordamos la guerra de iraq y el prestige y las ultimas elecciones?

Aunque Asimov anunciaba que en el futuro las elecciones no serian necesarias porque bastaria con hacer una pregunta aleatoria, a un ciudadano aleatorio, para deducir matematicamente el resultado electoral que ocurriria de haber elecciones, creo que la tecnologia, sobre todo la firma electronica, puede permitirnos un mayor control de nuestros gobiernos(como ciudadanos) o de las multinacionales(como accionistas).

El Vacío es Todo.

[[Padre](#)]**Re:En EEUU la democracia hace aguas (Puntos:4, Interesante)**por pobrecito hablador el Sábado, 19 de Julio 2003, a las 22:50h ([nº198511](#))

Y porque criticar la democracia americana, y no comienzas primero a criticar la nuestra? comienzo?

1º.- Las listas de los partidos políticos son cerradas. ¿Porque si quiero votar al PSOE tengo que hacerlo por cojones al que eligen los de la cuspide piramidal de ese partido politico? yo prefiero el modelo americano o ingles, en el que tu al votar, no solo eliges a que partido, sino tambien al candidato.

Yo que quieres que te diga, pero porque me tengo que fiar de que el candidato elegido en Madrid para representar al PP o PSOE a nivel nacional es de fiar? yo quiero votar a gente de mi ciudad que sepa que esta preparada y es de fiar.

Además, esto de las listas cerradas es nicho de todo tipo de corrupciones, como se esta comenzando a poner en evidencia en la comunidad de Madrid.

2º.- Sistema educativo y judicial. En Inglaterra por ejemplo (tb en EEUU), ambos son independientes (que no quiere decir que no esté arbitrado por el estado), de tal manera que no es el bochorno que ocurre hoy día, en el que el presidente del sistema judicial es puesto a dedo por el partido que gane, o el director de la televisión pública española también es colocado a dedo, con los consiguientes problemas que ello estamos sufriendo.

3º.- ¿democracia total? hahaha .. tener que depender del voto de los garrulos ignorantes y facilmente manipulables? juas! en la democracia total, cualquiera puede pulsar el boton de SI o NO de, por ejemplo, una enmienda sobre sanidad que ni los propios técnicos implicados en el problema pueden resolver.

Yo preferiría una democracia participativa de la siguiente manera:

- En temas globales importantes, por ejemplo, ir a una guerra, o calificar las aptitudes del gobierno ante las decisiones, me parece correcto.

- Para todo lo demás, es decir, decisiones técnicas, que puedan votar personas que tengan unos conocimientos mínimos en el tema. Es decir, o bien licenciados e ingenieros, o bien ciudadanos normales que hayan probado unos conocimientos mínimos para poder dar una opinion fundada.

bueno, que se me está yendo la pinza :) .. ya son casi la 1:00 am, y paso de seguir escribiendo.

PD: pero a ver, si en Barrapunto ya no se puede ni discutir normalmente sin que salten los trolls .. ¿y quereis un sistema asi a nivel estatal? ni loco. Prefiero lo de ahora.

En Inglaterra por ejemplo (tb en EEUU), ambos son independientes (que no quiere decir que no esté arbitrado por el estado), de tal manera que no es el bochorno que ocurre hoy día, en el que el presidente del sistema judicial es puesto a dedo por el partido que gane, o el director de la televisión pública española también es colocado a dedo, con los consiguientes problemas que ello estamos sufriendo.

3º.- ¿democracia total? hahaha .. tener que depender del voto de los garrulos ignorantes y facilmente manipulables? juas! en la democracia total, cualquiera puede pulsar el boton de SI o NO de, por ejemplo,

una enmienda sobre sanidad que ni los propios técnicos implicados en el problema pueden resolver. Yo preferiría una democracia participativa de la siguiente manera:

- En temas globales importantes, por ejemplo, ir a una guerra, o calificar las aptitudes del gobierno ante las decisiones, me parece correcto.
- Para todo lo demás, es decir, decisiones técnicas, que puedan votar personas que tengan unos conocimientos mínimos en el tema. Es decir, o bien licenciados e ingenieros, o bien ciudadanos normales que hayan probado unos conocimientos mínimos para poder dar una opinión fundada.

bueno, que se me está yendo la pinza :) .. ya son casi la 1:00 am, y paso de seguir escribiendo.

PD: pero a ver, si en Barrapunto ya no se puede ni discutir normalmente sin que salten los trolls .. ¿y quereis un sistema asi a nivel estatal? ni loco. Prefiero lo de ahora.

U-Haul International, Inc. v. WhenU.com, 279 F. Supp. 2d 723 (E.D.V.A 2003); No. 02-1469-A (E.D.Va. 2003). A federal court has ruled on the legality of pop-up ads. WhenU.com develops an application that comes bundled with popular free software such as peer to peer applications. When downloaded the application delivers pop-up ads to people when they surf specific websites. Visitors to UHaul's website were served pop-up ads for other rental companies such as Budget Rent A Car. U-Haul sued WhenU.com to prevent the software maker from delivering competitor's advertisements to visitors to U-Haul's website. The court granted WhenU.com's motion to dismiss charges of trademark infringement, unfair competition and copyright infringement. A full opinion is expected in the near future. **Update September 5, 2003:**

In re Aimster Copyright Litigation, 334 F.3d 643 (7th Cir. 2003). The Seventh Circuit has upheld a district court's injunction against the Madster file-swapping network. Aimster had argued that it had no obligation to block illegal file swapping because it was unaware of the specific copyright violations. The court disagreed, and in upholding the injunction referred to Madster's tactics as "willful blindness." The court also stated that it is not enough that the software could be used for legal purposes, where the defendant could not show that the software had ever been so used. Article at zdnet.com.com

United States v. Racine, charged (2003). A California man has been charged by federal authorities for hijacking Al Jazeera's website during the Iraq war and directing it to a web page that displayed an American flag. Racine also intercepted approximately 300 email messages intended for Al Jazeera. Racine has agreed to plead guilty to wire fraud and unlawful interception of an electronic communication.

United States v. Rocci, (Dist. Va. 2003). A federal court has sentenced a man to five months imprisonment for violating the Digital Millennium Copyright Act (DMCA). David Rocci used his website to sell modification chips that allowed users to play pirated games on Microsoft's Xbox game console. The DMCA prohibits circumvention of technological devices designed to control access to copyrighted works. The sentence is believed to be one of the first that has led to imprisonment.

United States v. Councilman, No. 01-CR-10245-MAP (D. Mass 2003). A federal court ruled on the scope of the Wiretap Act. The government prosecuted Councilman under the Wiretap Act of 1968 for intercepting certain electronic communications traveling through the electronic email service he operated. The court reversed itself upon reviewing the 9th Circuit decision in *Konop v. Hawaiian Airlines*, which held that communications "in storage" are not covered by the Wiretap Act. Reviewing the facts of the case, the court held that the communications intercepted by Councilman were "in storage" on his email service and not subject to the Wiretap Act. Accordingly, the court reversed its decision at oral arguments and dismissed the charges under the Wiretap Act.

State of Washington v. Townsend, No. 71070-8 (Wash. 2002). The Washington Supreme Court upheld a conviction for second degree rape based on email messages between the defendant and a police officer. The defendant appealed a lower court ruling and argued that the email messages were copied in violation of the Washington Privacy Act, which prohibits the "copying of private communications transmitted by telephone, telegraph, radio, or other device...." The court agreed that the emails were subject to the privacy act; however, the court held that Townsend had impliedly consented to the recording of his emails because senders of email know their messages will be recorded.

United States v. Sofsky, No. 01-1097 (2nd Cir. 2002). The Second Circuit overturned a complete ban on the use of the Internet imposed upon a defendant convicted of possessing child pornography. Gregory Sofsky plead guilty to knowingly possessing child pornography. As a part of his sentencing, Sofsky was banned from using a computer or the Internet without the approval of his probation officer. The Second Circuit overturned the ban, holding that although the ban was reasonably related to the purpose of his sentencing, the ban inflicted a greater deprivation of Sofsky's liberty than was reasonably necessary.

State of Washington v. Townsend, No. 19304-7-III (Wash. Ct. App. 2001). A Washington Appellate Court affirmed a conviction for second degree rape of a child. The defendant appealed the lower court's decision to admit into evidence copies of email messages between himself and a police officer posing as a 13 year old girl. The defendant argued that the email messages were copied in violation of the Washington Privacy Act, which prohibits the "copying of private communications transmitted by telephone, telegraph, radio, or other device...." The court held that email by its nature must be recorded, and an email user impliedly consents to the copying by the act of using email. Accordingly, the court affirmed the lower court's decision to admit the email messages. **Update November 27, 2002:** Conviction upheld by Washington State Supreme Court. See separate entry.

United States v. Pirello, 255 F.3d 728 (9th Cir. 2001). The Ninth Circuit ruled on the application of the US Sentencing Commission Guidelines (USSG) to a defendant fraudulently selling computers online. The defendant Pirello placed four advertisements on Internet classified-ads websites, soliciting buyers for computers. Pirello received three orders, deposited the money in his personal bank account, and never delivered computers. The court determined that USSG 2F1.1(b)(3), which instructs courts to enhance a sentence by two levels if the offense was committed through "mass-marketing," applied to Pirello's fraudulent Internet advertisements. The court held that the use of the Internet website to solicit orders for non-existent computers violated the USSG and affirmed the lower court's enhancement of Pirello's sentence.

United States v. Cohen, 260 F.3d 68 (2d Cir. 2001). The Court of Appeals affirmed a decision by a lower court convicting Jay Cohen of operating an illegal offshore Internet sports gambling operation. Cohen operated a bookmaking organization located in Antigua. Customers were required to maintain accounts with the business, and would contact the organization by telephone or Internet to request particular bets. The organization would issue an acceptance and confirmation of each bet. The Court of Appeals held that the safe harbor provision of 18 U.S.C.S. § 1084(b), which shield an individual from criminal liability under certain circumstances, did not apply. The court noted that betting is illegal in New York, and that Cohen's customers were placing bets by requesting the bets and having them accepted. In addition, the court found that Cohen had the requisite mens rea, as it was not necessary that he intended to violate the statute so long as he knowingly committed the criminal acts.

State of Washington v. Townsend, Spokane Cty. Sup. Ct., Dec., 1999.

Washington's all-party consent rule to record communications does not apply to the Internet. Defendant was accused of attempting to meet a minor in order to have sex. Minor was police officer posing as 13 year-old girl communicating with defendant via email and online chat services. Police officer saved and printed copies of communications for use as evidence. Defendant moved to exclude on grounds that he had not consented to recording of the communications, based on Washington law requiring consent of all parties to recordings. Judge ruled (a) statute did not explicitly apply to computer communications, and (b) defendant implicitly consented to recording because computer by its nature is a transmission and recording device.

Update April 5, 2001: Affirmed by the Washington Court of Appeals, Division III. See separate entry.

Board of Election Comm'r v. Bernhard, 00 CE 031 (Cook Cty., Ill., filed Oct. 16, 2000). The Chicago Board of Elections seeks a permanent injunction in Cook County Court against the operator of www.voteauction.com. The site claims to "buy" votes in the U.S. presidential election by soliciting votes for prices based on the demand in each state. The site also claims that votes will then be offered as a package from each state, with the winning bidder directing who the group in each state will vote for. The process allegedly requires the winning bidder to pay each voter and tell them how to vote, with each vote verified through the use of absentee ballots. The Chicago Board of Election maintains that the site's existence is a crime as it is a felony to offer to buy or sell votes. The Board also seeks disclosure of the names of Illinois residents who have offered to sell their votes through the site and those that have offered to pay for the votes of Illinois residents through the site. The New York Board of Elections successfully challenged the site's previous operator in August.

Fedeemer v. Haun, 35 F. Supp. 852 (D. Utah 1999). Plaintiff challenged Utah's sex offender notification statute, which would make sex offender registry information available to the general public without restriction on the Internet. The court held that the registry information posted on the Web site and available to a global audience that will have no risk of encountering the offender was not reasonably related to the non-punitive goal of preventing additional sex offences and therefore violated the Double Jeopardy and Ex Post Facto Clauses. The statute did not violate the Equal Protection Clause in that it was rationally related to the goal of guarding against sexual offenses. Finally the Due Process Clause was not violated because the information to be posted is considered "non private" and therefore there is no cognizable injury to the plaintiff's reputation. The defendant, the Utah Department of Corrections, stipulated it would administer the statute in accordance with the court's decision, and therefore no order was issued.

ICD Keywords: Criminal Actions

United States v. Middleton, 35 F. Supp. 2d 1189 (N.D. Cal. 1999). Defendant, charged with violation of the Computer Fraud and Abuse Act, 18 U.S.C. § 1030, challenged the application of the statute to his case. The court held that the term "individual" is not confined to natural persons, but extends to business entities, and hence damage to the ISP-victim was encompassed under the statute.

ICD Keywords: Criminal Actions

United States v. Whiting, 165 F.3d 631 (8th Cir. 1999). Appeals court held that change of definition of "visual depiction" in law banning child pornography did not violate ex post facto clause because previous definition already included data stored on computer disks, although not explicitly. Amendment to include electronic data was clarification rather than substantive change.

ICD Keywords: Criminal Actions, Employment

United States v. Kufrovich, 997 F. Supp. 246 (D. Conn. 1997). Defendant, charged under 18 U.S.C. § 2422(b) and § 2423(b) with using a means of Interstate Commerce to knowingly persuade a minor to engage in sexual activity moved to dismiss, alleging that the Supreme Court's finding that portions of the Communications Decency Act were unconstitutional made Internet speech presumptively protected under the First Amendment. Because Defendant's contact with the victim had been by Internet, it was constitutionally protected and could not be used in evidence against him, he maintained. The court rejected the argument, holding that the statutes under which the charges were brought do not impermissibly limit speech, they criminalize the use of means of interstate commerce (such as Internet and telephone lines) for the purpose of luring a minor into sexual activity.

ICD Keywords: Free Speech, Criminal Actions, Media

M.G. v. Brian D. Travis, 667 N.Y.S.2d 11 (1st Dep't 1997). Upholding restriction on paroled sex offender's use of computers as within "the spirit and intent of the Legislature in enacting Megan's Law and ... within the responsibility of the Division of Parole." The imposition of these conditions did not violate the parolee's Double Jeopardy rights and was not arbitrary or capricious. The court held that "this condition is narrowly tailored solely to prevent petitioner from exchanging pornographic messages. Certainly, no lengthy explication is needed, in this age of 'Internet pedophilia,' to show the wisdom of this condition in preventing recidivism."

United States v. Thomas, 74 F.3d 701 (6th Cir. 1996), . California BBS operators arrested and convicted when pornographic materials from their site were downloaded by a federal postal inspector in Tennessee, and materials ordered from them were delivered, violating federal obscenity laws. Conviction and sentence affirmed. Held: GIF files are not "intangible" for purpose of federal obscenity laws; distribution of

obscene materials was "knowing" even without defendants having specific knowledge of each individual transmission; obscenity may be measured by "community standard" in place where materials are received; defendants' ability to control subscriptions and access to their BBS made them liable for downloading that occurred in Tennessee, and thus amenable to jurisdiction there. The court distinguished the subscriber-BBS from an "Internet-type" situation, in which the person posting the materials has no control over where they will be downloaded. (See also U.S. v. Thomas (10th Cir. 1997))

Update December 31, 1996: Cert. denied by US Supreme Court. See 117 S. Ct. 74 (1996).

Davis v. Gracey, 111 F.3d 1472 (10th Cir. 1997). Affirming district court grant of summary judgment against computer bulletin board system operator Davis in a constitutional challenge to the seizure of his equipment. After Davis sold obscene CD-ROMs to an undercover officer, a warrant was obtained to search his business premises; police officers determined pornographic CD-ROM files could be accessed through the bulletin board and seized the computer equipment used to operate it. Following his criminal conviction and civil forfeiture of the computer equipment in state court proceedings, Davis, his related businesses, and several users of email on his bulletin board brought action against the officers who executed the search, alleging that the seizure of the computer equipment and email and software stored on the system violated constitutional and statutory provisions. Affirming, the 10th Circuit held that the original warrant was not unconstitutionally overbroad, and that the incidental temporary seizure of bulletin board email users' files did not invalidate the seizure of the computer within which they were stored. "[T]he computer equipment was more than merely a 'container' for the files; it was an instrumentality of the crime."

United States v. Pirello, 255 F.3d 728 (9th Cir. 2001). The Ninth Circuit ruled on the application of the US Sentencing Commission Guidelines (USSG) to a defendant fraudulently selling computers online. The defendant Pirello placed four advertisements on Internet classified-ads websites, soliciting buyers for computers. Pirello received three orders, deposited the money in his personal bank account, and never delivered computers. The court determined that USSG 2F1.1(b)(3), which instructs courts to enhance a sentence by two levels if the offense was committed through "mass-marketing," applied to Pirello's fraudulent Internet advertisements. The court held that the use of the Internet website to solicit orders for non-existent computers violated the USSG and affirmed the lower court's enhancement of Pirello's sentence.

United States v. Cohen, 260 F.3d 68 (2d Cir. 2001). The Court of Appeals affirmed a decision by a lower court convicting Jay Cohen of operating an illegal offshore Internet sports gambling operation. Cohen operated a bookmaking organization located in Antigua. Customers were required to maintain accounts with the business, and would contact the organization by telephone or Internet to request particular bets. The organization would issue an acceptance and confirmation of each bet. The Court of Appeals held that the safe harbor provision of 18 U.S.C.S. § 1084(b), which shield an individual from criminal liability under certain circumstances, did not apply. The court noted that betting is illegal in New York, and that Cohen's customers were placing bets by requesting the bets and having them accepted. In addition, the court found that Cohen had the requisite mens rea, as it was not necessary that he intended to violate the statute so long as he knowingly committed the criminal acts.

State of New York v. BuffNet, NY Appellate Division, Fourth Judicial Department (2001). Internet service provider (ISP) pled guilty to the misdemeanor charge of knowingly providing access to child pornography. A two-year investigation found that ISP, BuffNet, knowingly hosted a child pornography newsgroup called "Pedo University." BuffNet was notified by police that they were hosting illegal content, yet failed to remove the newsgroup from its servers. Police then seized the ISP's servers.

BuffNet has been levied a \$5000.00 fine, and has removed the obscene content.

John Robin Sharpe v. B.C.*, 2001 SCC 2. File No.: 27376. (Canada, 2001). The Supreme Court of Canada has upheld a law that makes it a crime to possess child pornography. In 1999 a trial court had struck down the law and dismissed charges against John Robin Sharpe who had been charged under the law. In a 9-0 decision the court upheld the law, but created two exceptions. One to protect private works of the imagination or photographic depictions of oneself, and another and another for those that create sexually explicit depictions of children for their own personal pleasure. Sharpe must now establish that his conduct fall into one of these two exceptions. Supreme Court Opinion at www.bccla.org

State of Washington v. Townsend, Spokane Cty. Sup. Ct., Dec., 1999.

Washington's all-party consent rule to record communications does not apply to the Internet. Defendant was accused of attempting to meet a minor in order to have sex. Minor was police officer posing as 13 year-old girl communicating with defendant via email and online chat services. Police officer saved and printed copies of communications for use as evidence. Defendant moved to exclude on grounds that he had not consented to recording of the communications, based on Washington law requiring consent of all parties to recordings. Judge ruled (a) statute did not explicitly apply to computer communications, and (b) defendant implicitly consented to recording because computer by its nature is a transmission and recording device.

Board of Election Comm'r v. Bernhard, 00 CE 031 (Cook Cty., Ill., filed Oct. 16, 2000). The Chicago Board of Elections seeks a permanent injunction in Cook County Court against the operator of www.voteauction.com. The site claims to "buy" votes in the U.S. presidential election by soliciting votes for prices based on the demand in each state. The site also claims that votes will then be offered as a package from each state, with the winning bidder directing who the group in each state will vote for. The process allegedly requires the winning bidder to pay each voter and tell them how to vote, with each vote verified through the use of absentee ballots. The Chicago Board of Election maintains that the site's existence is a crime as it is a felony to offer to buy or sell votes. The Board also seeks disclosure of the names of Illinois residents who have offered to sell their votes through the site and those that have offered to pay for the votes of Illinois residents through the site. The New York Board of Elections successfully challenged the site's previous operator in August.

State of Pennsylvania v. Murgalis, No. 189 MDA 1999 (Pa. Super. Ct., June 2, 2000). The Pennsylvania Superior Court held that the Internet falls under the definition of a "computer system" and the use of e-mail is "accessing a computer" under a Pennsylvania criminal statute. The defendant was convicted of unlawful use of a computer arising from his failure to deliver items purchased on-line by customers and his passing of bad checks to suppliers. The Pennsylvania statute prohibits the use of a computer system with the intent to defraud. The court rejected the defendant's argument that the Internet is not a "computer system."

Free Speech Coalition v. Reno, 198 F.3d 1083 (9th Cir. 1999). Action challenging constitutionality of certain provisions of the Child Pornography Prevention Act of 1996 (CPPA), which make it illegal to post on the Internet or to show in movies pornographic images of adults portrayed as minors. Court held that CPPA was unconstitutional insofar as it describes as child pornography computer images that do not involve the use of real children in their production or dissemination. Language in statute prohibiting images that "appear[] to be a minor" and "convey the impression" of being a minor were held to be unconstitutionally vague. The court also noted that Congress has not articulated a compelling interest sufficient to withstand strict scrutiny. These specific provisions are struck down, but the remainder of CPPA is allowed to stand. **Update January 29, 2001:** Certiorari granted by US Supreme Court.

Fedeemer v. Haun, 35 F. Supp. 852 (D. Utah 1999). Plaintiff challenged Utah's sex offender notification statute, which would make sex offender registry information available to the general public without restriction on the Internet. The court held that the registry information posted on the Web site and available to a global audience that will have no risk of encountering the offender was not reasonably related to the non-punitive goal of preventing additional sex offences and therefore violated the Double Jeopardy and Ex Post Facto Clauses. The statute did not violate the Equal Protection Clause in that it was rationally related to the goal of guarding against sexual offenses. Finally the Due Process Clause was not violated because the information to be posted is considered "non private" and therefore there is no cognizable injury to the plaintiff's reputation. The defendant, the Utah Department of Corrections, stipulated it would administer the statute in accordance with the court's decision, and therefore no order was issued.

ICD Keywords: Criminal Actions

United States v. Middleton, 35 F. Supp. 2d 1189 (N.D. Cal. 1999). Defendant, charged with violation of the Computer Fraud and Abuse Act, 18 U.S.C. § 1030, challenged the application of the statute to his case. The court held that the term "individual" is not confined to natural persons, but extends to business entities, and hence damage to the ISP-victim was encompassed under the statute.

ICD Keywords: Criminal Actions

United States v. Whiting, 165 F.3d 631 (8th Cir. 1999). Appeals court held that change of definition of "visual depiction" in law banning child pornography did not violate ex post facto clause because previous definition already included data stored on computer disks, although not explicitly. Amendment to include electronic data was clarification rather than substantive change.

Hieroglyphs of the Future

Jacques Rancière and the Aesthetics of Equality

Brian Holmes

"We're not surplus, we're a plus." The slogan appeared at the demonstrations of the French jobless movement in the mid-nineties, in journals, on banners, on tracts printed by the political art group *Ne pas plier*. It knitted the critical force and the subjective claims of the movement into a single phrase. To be "surplus" (laid off, redundant) was to be reduced to silence in a society that effectively subtracted the jobless from the public accounts, that made them into a kind of residue – invisible, inconceivable except as a statistic under a negative sign. Excluded, in short: cut out of a system based on the status of the salaried employee. Until they finally came together to turn the tables, reverse the signs, and claim a new name on a stage they had created, by occupying unemployment offices in a nation-wide protest during the winter of 1997-98. The people with nothing erupted onto the public scene. "We're a plus," they said, intruding through the TV cameras into the country's living rooms. Which also meant, "We'll drink champagne on Christmas eve."

One way to grasp the aesthetic language of the French social movements in the nineties – and of the transnational movements now emerging – is to read Jacques Rancière's work on equality. In *La Méésentente* (*The Disagreement*, 1995), he confronted the philosophy of government with the scandal of the political.⁽¹⁾ Government fulfills an ideal of order when it administers, manages, and tries to totally account for a population; but its reality is the police. The police keeps everyone in their place, imposes the calculations of value, apportions out the shares in society. The political is an opposite process, and it's rare. It happens when outcasts stand up to say that the calculations are wrong, when they refuse the names and the places they've been given ("we're not surplus"), to claim both a share in society and another name, which will signify their particular addition to universal equality ("we're a plus"). Because the equality of one speaking being with any other – the fundamental presupposition of democracy – does not exist in the abstract. It only becomes universal each time it's proven, in a new language and on a newly visible stage. Equality is the groundless claim of a minority to have the rights of any other group, to be the demos, the people. But it's a claim whose naked truth does not suffice, it has to be put to the test, publicly verified. Which is why the political always takes the form of a demonstration: a logical proof, against all prevailing logic, and the mobile presence of a crowd, against the fixed frames of an institution.

Rancière's description was in synch with its time. It anticipated the general strike of French state workers in December 1995, massively supported by the public, and it accompanied the later revolts of the homeless, the jobless, the paperless – the "*mouvement des sans*" – who rose up to demand a new division and sharing of the social whole, beyond the accounting systems of the industrial state. But it also offered a key that could reopen the airlocks between the aesthetic and the political.

In an essay written just after *La Méésentente*, Rancière explained that the political always involves a disidentification with some aspect of the existing community – for example, with the police state that expels the jobless or the paperless. At the same time, it requires an impossible identification with "the cause of the other."⁽²⁾ This impossible identification suggests a new, subjective figure of political commitment. Its paradigm in France is the identification of an entire generation on the left with the Algerian demonstrators thrown brutally into the Seine by the police in 1961. To identify with the murdered Algerians was not to speak

for them – an absurd idea, while their fellows were completing a revolution in Algeria – but to live on in their place, in opposition to a national institution that excluded certain citizens (those of the former colonies) and included others (those of the metropole). That impossible identification would return in the transnational, transhistorical assertion of the students in May '68, "We are all German Jews." And then again in the specific legal and political context of the late nineties, with the public act, often performed in theaters, of parrainage or "god-parenting," which meant taking a quasi-familial, quasi-legal responsibility for an undocumented individual.

This theatrical fiction, like the poetics of the '68 slogan, points to the specifically artistic aspect of political engagement, sketched out in a few pages of *La Méésentente*. Rancière begins by opposing Habermas's view that the surprise of aesthetic experience, the opening to the world effected by metaphor, must be distinguished from the norms of communicative action. He claims instead that the uncertain reality of art, the shift or transport of meaning that defines metaphor, is an inherent part of every political dispute, where the argument itself bears first of all on the legitimacy or even the reality of one of the fundamental elements that configure the disagreement (its place, its object, its subjects). The place-changing action of metaphor – one thing or person for another – is what allows the creation or extension of a community of speaking subjects; and this potential extension of a community is needed for any argument about equality. This is why the modern forms of political group-formation, or subjectivization, are historically linked to the emergence of an autonomous aesthetic dimension split from any practical manipulation of usable objects: an unpredictable, infinitely extensible realm defining "a world of virtual community – a demand for community – superimposed upon the world of orders and parts that lends everything its use."⁽³⁾

Metaphors are the hieroglyphs of an unknown language, the demand for an unheard-of community. When the group *Ne pas plier*, in collaboration with the jobless association *l'APEIS* (*l'Association pour l'emploi, l'information et la solidarité*), raised Marc Pataut's anonymous portraits above the crowd in 1994 – singular faces above a sea of demonstrating humanity – the question was not whether these meter-high photographs, carried on a wooden picket, really represented identifiable jobless people. The question was whether a social issue could be extended beyond individual cases, to call for a general reconfiguration of society; whether each anonymous face was potentially the face of the unemployed people reclaiming its right to speak; and whether the gesticulating debates on Republic Square could compare to the ones in the National Assembly. A visual uncertainty, a metaphoric possibility of "one-for-another," intertwined with a political argument bearing on proper or improper names, on the proper or improper division and sharing of resources, of roles, of sensuous reality. In lieu of an answer, the question itself gestured toward a possible future that could only be opened up, among the existing divisions of the world, by an argumentative logic knit together with an artistic metaphor.

A Change of Regime

Rancière's thinking of the political was formulated in the early 1990s, during the long French slide into recession and racism, when the status of salaried labor was falling into tatters along with welfare-state guarantees, when immigrants were being outlawed in the name of union jobs and the unemployed were being proclaimed the impossible political subject. Yet the threat of the flexible, transnational, networked regime – the so-called "economic horror" – sparked original forms of protest and debate. A breach was reopened, marked in political economy by the work of André Gorz, *Misère du présent, richesses du possible* (*Poverty of the Present, Wealth of the Possible*), which turned the questions of flexible work and unemployment back on an entire system, to explore the reasons for maintaining a politics of scarcity in a society of automated production.

That breach seems to have closed today. La Méésentente had already shown how certain forms of political consensus act to freeze social identities, eliminating the disruptive claims of equality. There is the welfare-state conception of society as an interplay of "partners" (unions, businesses, public services); the neoliberal idea that society does not exist, only desiring, enterprising individuals; the multicultural vision of separate, Balkanized communities, each bound by their own beliefs. All exclude the political conflict formerly brought by the subject called "proletariat" – the most recent name of the antique demos or the revolutionary people. After integrating much of the National Front's racism, the French socialist party has now found an original mix of the first two forms of consensus: they intensify the neoliberal program of flexible transnational labor relations, in hopes of returning to the salaried employment on which the postwar social contract of the nation-state was based! As though the challenges raised by the "mouvement des sans" never even existed.

But what is happening now, far beyond France, is that similar movements are expanding, proliferating, in an attempt to meet their adversaries on another stage: the stage set by the transnational corporations. This proliferation involves an identification with the cause of an impossibly distant other, Mayan peasant, Brazilian autoworker, Nigerian tribesman, Indian farmer... What are the metaphors that can speak on a world stage? To explore the role of art in these movements, I think we had better start with something much closer to home: the language machine that knits the transnational system together, and the kind of labor that is done with it.

The Internet has widely (and rightly) been seen on the left as providing the infrastructure for what is called "digital capitalism."⁽⁴⁾ But what the leftist commentators forget – one wonders why? – is that the simplest net application of them all, email, has offered an extraordinary chance to what Rancière calls "the literary animal." As large parts of the former working classes gained education, refused industrial discipline, and split away from their former position in the social hierarchy, they became "immaterial laborers" facing the new predicament of flexibilized conditions⁽⁵⁾ – but they also found themselves in possession of a new writing tool. And as they taught themselves to use it and invented more applications every day, what did they claim, against all prevailing logic? That here, everyone is equal. The virtual realities of the 1990s saw the return of a utopia whose emergence Rancière has chronicled in his accounts of the self-education of the artisan classes in the early nineteenth century: "Thus one can dream of a society of emancipated individuals that would be a society of artists. Such a society would repudiate the divide between those who know and those who do not know, between those who possess or who do not possess the property of intelligence. It would recognize only active minds: humans who act, who speak of their actions and thereby transform all their works into ways of signaling the humanity within themselves and everyone."⁽⁶⁾

That dream was bound to run up against what Rancière has called "the society of disdain." In the late twentieth century it took the usual form of the expropriation of a popular language, and its replacement by manipulated simulacra. Yet even as the dominance of the Internet by the commercial and financial spheres became clear, even as the figure of the shareholder emerged as the only one with a right to participate politically in the new economy, political activism took a new twist, and disruptions began appearing in the fabric of corporate and governmental speech.

Since 1993, the anonymously run [@TMark](#) group has been launching parodies into the ideological mix: consultancy and funding for consumer-product sabotage, following the actions of the infamous Barbie Liberation Organization; direct email campaigns promoting subversion, like the Call-in Sick Day to celebrate the non-holiday (in Anglo-Saxon lands) of May 1st; pseudo-official sites like [gwbush.com](#), [voteauction.com](#), or

gatt.org.(7) Masquerading beneath a corporate-bureaucratic veneer – lackluster logos, deadpan graphics, pompous speech – the @TMark websites start off believable, waver in midflight, then tailspin into scandalous denunciation by an excess of liberal truth. Another movement, Kein Mensch ist Illegal, more recently took up the same kind of strategy with its Deportation-Class campaign: websites, a poster contest, information kits, super-activist mileage programs... all opportunities for Lufthansa's stockholders to find out just how much it could cost them to go on deporting illegal immigrants for the police. Then, in a parody of the "Oneworld" airline alliance, the Deportation-Alliance emerged, with collaboration from @TMark and many others. Meanwhile, a group of slow-thinking Austrian lawyers stumbled on the gatt.org site and wanted Mike Moore of the WTO to come pep up their meeting in Salzburg. "Mike Moore" declined, but sent two substitutes – later revealed to be the "Yes Men" – who stood before the unwitting lawyers to explain a vast but rather shocking program for the extension of free trade... The whole incident was documented on video ("tactical embarrassment," as the activist Jordi Claramonte likes to say).

Through mimicry and imagination, groups like @TMark create a short-circuit between the anonymous, abstract equality of immaterial labor and the subjective exceptionalism of art. "The mimic gives the 'private' principle of work a public stage. He constitutes a common stage with what ought to determine the confinement of each to his place," writes Rancière in *Le partage du sensible*. But this "common stage" is a scene, not of stifling unity, but of dissensus: the mimic transmits "blocks of speech circulating without a legitimate father," literary and political statements that "grab hold of bodies and divert them from their destination," that "contribute to the formation of collective speakers who throw into question the distribution of roles, of territories, of languages – in short, political subjects who upset an established sharing and division of the sensible."(8)

@TMark or Deportation-Class are ways for immaterial laborers to claim a voice, a non-economic share, against the stock-market rules of a shareholder's society. They are also vectors of a new kind of transnational collaboration or reciprocity. They offer a way to rejoin the direct action movements, Art and Revolution, Attac, and hundreds of other organizations – the newest way into a much older configuration of the aesthetic and the political, which is also called democracy.

Because the duplicity of art/work hardly began with Internet. It reaches back to what Rancière calls the aesthetic regime of the arts, which emerged, not coincidentally, at the end of the Ancien Regime. Aesthetics is the name of an indistinction, where fact is inseparable from fiction, where the lowest can become the highest and vice-versa. The aesthetic regime of the arts ruins the historically prior regime of representation, with its hierarchies, decorum, and strict separation of genres, but also its Aristotelian distinction between chaotic, accidental history, and well-constructed, plausible fiction. Working initially through mimetic or testimonial techniques – realist literature or painting, photography or cinema – the new regime determines the paradoxical beauty of the anonymous subject, of whoever or whatever: "The ordinary becomes beautiful as a trace of the true... when it is torn away from the obvious and made into a mythological or phantasmagorical hieroglyph." (9) Before and beyond any "modernist" or "postmodernist" program, the aesthetic regime "makes art into an autonomous form of life, thus simultaneously positing both the autonomy of art and its identification with a moment in a process of life's self-formation."(10) The understanding of activist art begins right here, with the notion of life's self-formation.

Fictionable Futures

The originality of Rancière's work on the aesthetic regime is to clearly show how art can be historically effective, directly political. Art achieves this by means of fictions: arrangements of signs that inhere to reality,

yet at the same time make it legible to the person moving through it – as though history were an unfinished film, a documentary fiction, of which we are both cameramen and actors.

That would be one way to describe an event like the "Carnival against Capital," staged by the ten thousand actors of Reclaim the Streets in the City of London on June 18th, 1999. Wearing masks of four different colors, the crowd wove converging paths through the City, displaying signs, creating images, knitting its mobile music and language into urban reality – weaving another world in order to tangle with the one managed by finance capital (and to tangle directly with the police). June 18th taught us to read a new story at the center of finance capitalism. But no privileged viewpoint could wrap up the film, gather the whole of this "artwork" into a totality and reduce its contradictions – because the idea had already crisscrossed not just Britain but the earth, spreading and dividing like the wildfire of equality. By tracts, images, Internet, and word of mouth, by collaboration and spontaneous reinvention, the "disorganization" of Reclaim the Streets and the Peoples' Global Action network had mapped out a new kind of world, in which collectives in over 70 different countries could protest against the same abstract processes of neoliberal capitalism, under vastly different local conditions but on the same day. Did the "film" of Seattle, Prague and so on begin right here, with this "artistic" event? But where was "here"? And what did the "event" really consist of?

If anarchic, artistic demonstrations like June 18th are political, it is because they involve a disagreement, a direct confrontation with the existing divisions or shares of sensuous reality. They make visible the "invisible government" of the international financial institutions (i.e. the new world police). But if they are aesthetic, it is because they bring a blur of indistinction to the proper subjects, objects, and places of the debate. They create another stage for politics: like the protesters in London opening a fire hydrant to symbolically return a long-buried river to the surface of the street, to reclaim that stream from the layered abstractions of capital. Or like the social forces in Porto Alegre displacing the wintry Davos economic forum to the summer weather of the South, turning the agenda and the very seasons of capitalist globalization upside down.

It is certain that such confrontations must become more precise, more reasoned, more explicit, if the new claim to equality is to have any effect on the existing divisions of the world. The aesthetic "plus" of the demonstrations must find a way to return to each local environment, to the specific frameworks that govern the homeless, the paperless, the unemployed. This is the risky gambit that the far left is now making, on a world scale. But to be explicit is not to speak the opponent's language (neoclassical economics) – which would always be to play an unequal hand in a losing game. Instead, it is to engage in an unstable mimicry that seeks to prove its claim to equality on a public stage, while inventing new signs, new pathways through the world, new political subjectivities.

Hieroglyphs of the Future

Jacques Rancière and the Aesthetics of Equality

Brian Holmes

"We're not surplus, we're a plus." The slogan appeared at the demonstrations of the French jobless movement in the mid-nineties, in journals, on banners, on tracts printed by the political art group Ne pas plier. It knitted the critical force and the subjective claims of the movement into a single phrase. To be "surplus" (laid off, redundant) was to be reduced to silence in a society that effectively subtracted the jobless from the public accounts, that made them into a kind of residue – invisible, inconceivable except as a statistic under a negative sign. Excluded, in short: cut out of a system based on the status of the salaried employee. Until they finally came together to turn the tables, reverse the signs, and claim a new name on a stage they had created, by occupying unemployment offices in a nation-wide protest during the winter of 1997-98. The people with nothing erupted onto the public scene. "We're a plus," they said, intruding through the TV cameras into the country's living rooms. Which also meant, "We'll drink champagne on Christmas eve."

One way to grasp the aesthetic language of the French social movements in the nineties – and of the transnational movements now emerging – is to read Jacques Rancière's work on equality. In *La Méésentente* (The Disagreement, 1995), he confronted the philosophy of government with the scandal of the political.(1) Government fulfills an ideal of order when it administers, manages, and tries to totally account for a population; but its reality is the police. The police keeps everyone in their place, imposes the calculations of value, apportions out the shares in society. The political is an opposite process, and it's rare. It happens when outcasts stand up to say that the calculations are wrong, when they refuse the names and the places they've been given ("we're not surplus"), to claim both a share in society and another name, which will signify their particular addition to universal equality ("we're a plus"). Because the equality of one speaking being with any other – the fundamental presupposition of democracy – does not exist in the abstract. It only becomes universal each time it's proven, in a new language and on a newly visible stage. Equality is the groundless claim of a minority to have the rights of any other group, to be the demos, the people. But it's a claim whose naked truth

does not suffice, it has to be put to the test, publicly verified. Which is why the political always takes the form of a demonstration: a logical proof, against all prevailing logic, and the mobile presence of a crowd, against the fixed frames of an institution.

Rancière's description was in synch with its time. It anticipated the general strike of French state workers in December 1995, massively supported by the public, and it accompanied the later revolts of the homeless, the jobless, the paperless – the "mouvement des sans" – who rose up to demand a new division and sharing of the social whole, beyond the accounting systems of the industrial state. But it also offered a key that could reopen the airlocks between the aesthetic and the political.

In an essay written just after *La Méésentente*, Rancière explained that the political always involves a disidentification with some aspect of the existing community – for example, with the police state that expels the jobless or the paperless. At the same time, it requires an impossible identification with "the cause of the other."⁽²⁾ This impossible identification suggests a new, subjective figure of political commitment. Its paradigm in France is the identification of an entire generation on the left with the Algerian demonstrators thrown brutally into the Seine by the police in 1961. To identify with the murdered Algerians was not to speak for them – an absurd idea, while their fellows were completing a revolution in Algeria – but to live on in their place, in opposition to a national institution that excluded certain citizens (those of the former colonies) and included others (those of the metropole). That impossible identification would return in the transnational, transhistorical assertion of the students in May '68, "We are all German Jews." And then again in the specific legal and political context of the late nineties, with the public act, often performed in theaters, of parrainage or "god-parenting," which meant taking a quasi-familial, quasi-legal responsibility for an undocumented individual.

This theatrical fiction, like the poetics of the '68 slogan, points to the specifically artistic aspect of political engagement, sketched out in a few pages of *La Méésentente*. Rancière begins by opposing Habermas's view that the surprise of aesthetic experience, the opening to the world effected by metaphor, must be distinguished from the norms of communicative action. He claims instead that the uncertain reality of art, the shift or transport of meaning that defines metaphor, is an inherent part of every political dispute, where the argument itself bears first of all on the legitimacy or even the reality of one of the fundamental elements that configure the disagreement (its place, its object, its subjects). The place-changing action of metaphor – one thing or person for another – is what allows the creation or extension of a community of speaking subjects; and this potential extension of a community is needed for any argument about equality. This is why the modern forms of political group-formation, or subjectivization, are historically linked to the emergence of an autonomous aesthetic dimension split from any practical manipulation of usable objects: an unpredictable, infinitely extensible realm defining "a world of virtual community – a demand for community – superimposed upon the world of orders and parts that lends everything its use."⁽³⁾

Metaphors are the hieroglyphs of an unknown language, the demand for an unheard-of community. When the group *Ne pas plier*, in collaboration with the jobless association *l'APEIS* (*l'Association pour l'emploi, l'information et la solidarité*), raised Marc Pataut's anonymous portraits above the crowd in 1994 – singular faces above a sea of demonstrating humanity – the question was not whether these meter-high photographs, carried on a wooden picket, really represented identifiable jobless people. The question was whether a social issue could be extended beyond individual cases, to call for a general reconfiguration of society; whether each anonymous face was potentially the face of the unemployed people reclaiming its right to speak; and whether

the gesticulating debates on Republic Square could compare to the ones in the National Assembly. A visual uncertainty, a metaphoric possibility of "one-for-another," intertwined with a political argument bearing on proper or improper names, on the proper or improper division and sharing of resources, of roles, of sensuous reality. In lieu of an answer, the question itself gestured toward a possible future that could only be opened up, among the existing divisions of the world, by an argumentative logic knit together with an artistic metaphor.

A Change of Regime

Rancière's thinking of the political was formulated in the early 1990s, during the long French slide into recession and racism, when the status of salaried labor was falling into tatters along with welfare-state guarantees, when immigrants were being outlawed in the name of union jobs and the unemployed were being proclaimed the impossible political subject. Yet the threat of the flexible, transnational, networked regime – the so-called "economic horror" – sparked original forms of protest and debate. A breach was reopened, marked in political economy by the work of André Gorz, *Misère du présent, richesses du possible* (Poverty of the Present, Wealth of the Possible), which turned the questions of flexible work and unemployment back on an entire system, to explore the reasons for maintaining a politics of scarcity in a society of automated production.

That breach seems to have closed today. La Méésentente had already shown how certain forms of political consensus act to freeze social identities, eliminating the disruptive claims of equality. There is the welfare-state conception of society as an interplay of "partners" (unions, businesses, public services); the neoliberal idea that society does not exist, only desiring, enterprising individuals; the multicultural vision of separate, Balkanized communities, each bound by their own beliefs. All exclude the political conflict formerly brought by the subject called "proletariat" – the most recent name of the antique demos or the revolutionary people. After integrating much of the National Front's racism, the French socialist party has now found an original mix of the first two forms of consensus: they intensify the neoliberal program of flexible transnational labor relations, in hopes of returning to the salaried employment on which the postwar social contract of the nation-state was based! As though the challenges raised by the "mouvement des sans" never even existed.

But what is happening now, far beyond France, is that similar movements are expanding, proliferating, in an attempt to meet their adversaries on another stage: the stage set by the transnational corporations. This proliferation involves an identification with the cause of an impossibly distant other, Mayan peasant, Brazilian autoworker, Nigerian tribesman, Indian farmer... What are the metaphors that can speak on a world stage? To explore the role of art in these movements, I think we had better start with something much closer to home: the language machine that knits the transnational system together, and the kind of labor that is done with it.

The Internet has widely (and rightly) been seen on the left as providing the infrastructure for what is called "digital capitalism."⁽⁴⁾ But what the leftist commentators forget – one wonders why? – is that the simplest net application of them all, email, has offered an extraordinary chance to what Rancière calls "the literary animal." As large parts of the former working classes gained education, refused industrial discipline, and split away from their former position in the social hierarchy, they became "immaterial laborers" facing the new predicament of flexibilized conditions⁽⁵⁾ – but they also found themselves in possession of a new writing tool. And as they taught themselves to use it and invented more applications every day, what did they claim, against all prevailing logic? That here, everyone is equal. The virtual realities of the 1990s saw the return of a utopia whose emergence Rancière has chronicled in his accounts of the self-education of the artisan classes in the early nineteenth century: "Thus one can dream of a society of emancipated individuals that would be a society

of artists. Such a society would repudiate the divide between those who know and those who do not know, between those who possess or who do not possess the property of intelligence. It would recognize only active minds: humans who act, who speak of their actions and thereby transform all their works into ways of signaling the humanity within themselves and everyone."(6)

That dream was bound to run up against what Rancière has called "the society of disdain." In the late twentieth century it took the usual form of the expropriation of a popular language, and its replacement by manipulated simulacra. Yet even as the dominance of the Internet by the commercial and financial spheres became clear, even as the figure of the shareholder emerged as the only one with a right to participate politically in the new economy, political activism took a new twist, and disruptions began appearing in the fabric of corporate and governmental speech.

Since 1993, the anonymously run [@TMark](#) group has been launching parodies into the ideological mix: consultancy and funding for consumer-product sabotage, following the actions of the infamous Barbie Liberation Organization; direct email campaigns promoting subversion, like the Call-in Sick Day to celebrate the non-holiday (in Anglo-Saxon lands) of May 1st; pseudo-official sites like [gwbush.com](#), [votauction.com](#), or [gatt.org](#).(7) Masquerading beneath a corporate-bureaucratic veneer – lackluster logos, deadpan graphics, pompous speech – the @TMark websites start off believable, waver in midflight, then tailspin into scandalous denunciation by an excess of liberal truth. Another movement, Kein Mensch ist Illegal, more recently took up the same kind of strategy with its Deportation-Class campaign: websites, a poster contest, information kits, super-activist mileage programs... all opportunities for Lufthansa's stockholders to find out just how much it could cost them to go on deporting illegal immigrants for the police. Then, in a parody of the "Oneworld" airline alliance, the Deportation-Alliance emerged, with collaboration from @TMark and many others. Meanwhile, a group of slow-thinking Austrian lawyers stumbled on the gatt.org site and wanted Mike Moore of the WTO to come pep up their meeting in Salzburg. "Mike Moore" declined, but sent two substitutes – later revealed to be the "Yes Men" – who stood before the unwitting lawyers to explain a vast but rather shocking program for the extension of free trade... The whole incident was documented on video ("tactical embarrassment," as the activist Jordi Claramonte likes to say).

Through mimicry and imagination, groups like @TMark create a short-circuit between the anonymous, abstract equality of immaterial labor and the subjective exceptionalism of art. "The mimic gives the 'private' principle of work a public stage. He constitutes a common stage with what ought to determine the confinement of each to his place," writes Rancière in *Le partage du sensible*. But this "common stage" is a scene, not of stifling unity, but of dissensus: the mimic transmits "blocks of speech circulating without a legitimate father," literary and political statements that "grab hold of bodies and divert them from their destination," that "contribute to the formation of collective speakers who throw into question the distribution of roles, of territories, of languages – in short, political subjects who upset an established sharing and division of the sensible."(8)

@TMark or Deportation-Class are ways for immaterial laborers to claim a voice, a non-economic share, against the stock-market rules of a shareholder's society. They are also vectors of a new kind of transnational collaboration or reciprocity. They offer a way to rejoin the direct action movements, Art and Revolution, Attac, and hundreds of other organizations – the newest way into a much older configuration of the aesthetic and the political, which is also called democracy.

Because the duplicity of art/work hardly began with Internet. It reaches back to what Rancière calls the

aesthetic regime of the arts, which emerged, not coincidentally, at the end of the Ancien Regime. Aesthetics is the name of an indistinction, where fact is inseparable from fiction, where the lowest can become the highest and vice-versa. The aesthetic regime of the arts ruins the historically prior regime of representation, with its hierarchies, decorum, and strict separation of genres, but also its Aristotelian distinction between chaotic, accidental history, and well-constructed, plausible fiction. Working initially through mimetic or testimonial techniques – realist literature or painting, photography or cinema – the new regime determines the paradoxical beauty of the anonymous subject, of whoever or whatever: "The ordinary becomes beautiful as a trace of the true... when it is torn away from the obvious and made into a mythological or phantasmagorical hieroglyph." (9) Before and beyond any "modernist" or "postmodernist" program, the aesthetic regime "makes art into an autonomous form of life, thus simultaneously positing both the autonomy of art and its identification with a moment in a process of life's self-formation." (10) The understanding of activist art begins right here, with the notion of life's self-formation.

Fictionable Futures

The originality of Rancière's work on the aesthetic regime is to clearly show how art can be historically effective, directly political. Art achieves this by means of fictions: arrangements of signs that inhere to reality, yet at the same time make it legible to the person moving through it – as though history were an unfinished film, a documentary fiction, of which we are both cameramen and actors.

That would be one way to describe an event like the "Carnival against Capital," staged by the ten thousand actors of Reclaim the Streets in the City of London on June 18th, 1999. Wearing masks of four different colors, the crowd wove converging paths through the City, displaying signs, creating images, knitting its mobile music and language into urban reality – weaving another world in order to tangle with the one managed by finance capital (and to tangle directly with the police). June 18th taught us to read a new story at the center of finance capitalism. But no privileged viewpoint could wrap up the film, gather the whole of this "artwork" into a totality and reduce its contradictions – because the idea had already crisscrossed not just Britain but the earth, spreading and dividing like the wildfire of equality. By tracts, images, Internet, and word of mouth, by collaboration and spontaneous reinvention, the "disorganization" of Reclaim the Streets and the Peoples' Global Action network had mapped out a new kind of world, in which collectives in over 70 different countries could protest against the same abstract processes of neoliberal capitalism, under vastly different local conditions but on the same day. Did the "film" of Seattle, Prague and so on begin right here, with this "artistic" event? But where was "here"? And what did the "event" really consist of?

If anarchic, artistic demonstrations like June 18th are political, it is because they involve a disagreement, a direct confrontation with the existing divisions or shares of sensuous reality. They make visible the "invisible government" of the international financial institutions (i.e. the new world police). But if they are aesthetic, it is because they bring a blur of indistinction to the proper subjects, objects, and places of the debate. They create another stage for politics: like the protesters in London opening a fire hydrant to symbolically return a long-buried river to the surface of the street, to reclaim that stream from the layered abstractions of capital. Or like the social forces in Porto Alegre displacing the wintry Davos economic forum to the summer weather of the South, turning the agenda and the very seasons of capitalist globalization upside down.

It is certain that such confrontations must become more precise, more reasoned, more explicit, if the new claim to equality is to have any effect on the existing divisions of the world. The aesthetic "plus" of the demonstrations must find a way to return to each local environment, to the specific frameworks that govern the

homeless, the paperless, the unemployed. This is the risky gambit that the far left is now making, on a world scale. But to be explicit is not to speak the opponent's language (neoclassical economics) – which would always be to play an unequal hand in a losing game. Instead, it is to engage in an unstable mimicry that seeks to prove its claim to equality on a public stage, while inventing new signs, new pathways through the world, new political subjectivities.

Chiesa di San Bartolomeo (Salita san Bartolomeo - Campobasso)

digital-is-not-analog.2002

Festival di net.art, virus, media jamming, videogiochi modificati, hacking, errori

Dal 24 al 26 ottobre 2002 la città di Campobasso, nell'insolita cornice della Chiesa sconsacrata di San Bartolomeo (Salita San Bartolomeo), ospita Digital-is-not-analog.2002, incontro internazionale dedicato alla net art e alla cultura di rete, a cui partecipano importanti artisti del settore, provenienti da tutto il mondo, che si danno appuntamento nel capoluogo molisano per presentare al pubblico italiano alcune significative esperienze di ricerca artistica, culturale e scientifica attraverso l'informatica e le nuove tecnologie di comunicazione di rete.

San Bartolomeo - Interno

Dopo il successo delle precedenti edizioni (svoltesi nel 2000 e nel 2001 a Bologna), il festival Digital-is-not-analog giunge quest'anno alla sua terza edizione, ideato e curato da d-i-n-a.net, organizzato dalla cooperativa GEA di Campobasso e da Eventi Progetti Speciali di Bologna e promosso dalla Regione Molise.

Seguendo la formula già sperimentata nella precedenti edizioni, Digital-is-not-analog è una tre giorni di presentazioni, performance e discussione, il cui tema principale è la rielaborazione creativa di tecnologie e stili della comunicazione elettronica. Gli ospiti invitati rappresentano una selezione di alcuni dei progetti di maggior rilievo degli ultimi anni nel panorama internazionale della net art e dei media digitali. Si tratta di una scena composta da artisti, che conoscono allo stesso tempo la tecnologia e le strategie di comunicazione, e che riformulano entrambe in modo provocatorio e creativo. La scelta degli ospiti rispecchia il desiderio di mostrare un'alternativa culturalmente / economicamente sostenibile alla tecnologia meramente spettacolare e ai budget stratosferici dell'industria dell'intrattenimento globale.

In gruppo o singolarmente, con progetti emergenti o ampiamente avviati, gli artisti invitati lavorano sulle forme di controllo e di diffusione delle informazioni attraverso Internet, sulla cultura dei videogiochi modificati, sul virus informatico, sul software libero come strumento di dominio pubblico. Tutti ambiti di intervento, che dimostrano come la tecnologia digitale può diventare un mezzo per agire in modo originale, influenzando il panorama mediatico.

Church of Saint Bartolomeo (Gone up saint Bartolomeo - Campobasso)

digital-is-not-analog.2002

Festival of net.art, virus, average jamming, videogiochi modified, hacking, errors

From the 24 to 26 October 2002 the city of Campobasso, in the unusual frame of the Church consacrated of Saint Bartolomeo (Gone up Saint Bartolomeo), accommodates Digital-is-not-analog.2002, international encounter dedicated to the net.art and the culture of net, to which important artists of the field participate, coming from from all the world, than appointment in the capoluogo is given molisano in order to introduce to the public Italian some meaningful experiences of artistic, cultural and scientific search through computer science and the new technologies of net communication.

Saint Bartolomeo - Inner

After the happened one of previous editions (svoltesi in 2000 and 2001 to Bologna), festival the Digital-is-not-analog reaches this year its third edition, devised and cured from dyne, organized from cooperative GEA of Campobasso and Events Special Plans of Bologna and promoted from the Molise Region.

Following the experienced formula already in previous editions, Digital-is-not-analog is three days of presentations, performance and argument, whose main topic is the creative rework of technologies and styles of the communication electronic.

The hosts selection of some of the plans of greater relief of the last years in digital the international panorama of net art and the average invites to you represents one them. Draft of a composed scene from artists, that they at the same time know the technology and the strategies of communication, and that they reformulate both in provocative and creative way.

The choice of the hosts rispecchia desire to show a culturally/economically sostenibile alternative to the merely spectacular technology and the stratospheric budgets of the industry of the total entertainment.

In group or singularly, with emergent plans or wide it starts to you, the artists invites to you work on the shapes of control and information dissipation through Internet, on the culture of the videogiochi modified, on the virus computer science, the free software like instrument of public domain. All amble you of participation, that they demonstrate as the digital technology them can become means in order to act in way originates them, influencing the mediatico panorama.

Artists invite to you:

arte crítico

obras

última actualización: enero de 2005

"El arte preocupado por cuestiones sociales y políticas cumple su función primordial: plantear preguntas a la caza de respuestas que iluminen la obligación moral que todos tenemos de no aceptar como el mejor de los mundos posibles el que hemos heredado de la historia". Francesc Torres.

* 0100101110101101.org

Eludiendo etiquetas, o la capacidad de crítica y evolución. Todas las propuestas de 0 y de 1 cuestionan la simulación mediática extendida en nuestra sociedad, la capacidad de la red para adaptarse al tradicional mercado del arte y el mito de la accesibilidad y la privacidad de la información. Su página muestra una coherente trayectoria que evoluciona a partir de tres tipos de proyectos. **SIMULACION** contiene la página de Danko Manver, el artista inexistente, y una peculiar versión de la web del Vaticano. **DUPLICACION** da acceso a [una copia de Art. Teleportacia](#), la galería comercial de net.art de la rusa Olia Lialina, cuya primera exposición titulada Miniaturas del Período Heroico acogía obras de Alexei Shulgin, Heath Bunting, JODI y de la propia Olia Lialina, esta última vendida a un coleccionista privado (!). Desde sus páginas podéis acceder a las obras sin pagar un duro. También contiene una copia de **JODI** y de la elitista y misteriosa **HELL.COM**. Su siguiente iniciativa se basó en el **ACCESO**: life_sharing (anagrama de "file sharing") permire al usuario entrar en su ordenador y copiar todo lo que desee. Información detallada (bio, artículos y enlaces en la web del [Walker Art Center](#). **VIRUS**: En la Bienal de Venecia 2001 se presentaron bajo el Pavellón de Eslovenia: en el proyecto [Absolute One](#), 01.org se asoció con el grupo [epidemic](#) para exponer un nuevo virus denominado [biennale.py](#), concebido especialmente para este acontecimiento. El día de la inauguración se introdujo el virus, pero también se hizo público su código fuente mientras se proporcionaba a los afectados el anti-virus y las instrucciones de su desinstalación. Reena Jana escribe sobre ello en un completo

artículo de Wired titulado [Want to See Some Really Sick Art?](#). **PROPIEDAD:** El día de la inauguración del [Korea Web Art Festival 2001](#) 01.org aprovechó para desarrollar el proyecto [FTPermutations](#), que consistió en hackear temporalmente la web oficial del Festival intercambiando los nombres y obras de los artistas que intervenían en la muestra y provocando un desbarajuste que no entusiasmó a sus organizadores. **VIGILANCIA:** [VOPOS](#) es un proyecto que utilizaba y mezclaba los tres tipos de redes: teléfono, satélites e Internet. Durante casi un año, los dos miembros de 01.org estuvieron siempre controlados, pues ambos llevaban un transmisor GPS que enviaba sus datos a los satélites con el objetivo de transmitir constantemente a su website su posición exacta en el entorno urbano. Un software dibujaba en un mapa geográfico digital el lugar preciso donde viven, estableciendo la trayectoria que describen todos sus movimientos. En [The World in One's Pocket?](#) de la revista Springerin, Vera Tollm analiza el proyecto.

[NikeGround](#) Su última acción en el 2003 fue este proyecto, realizado junto al grupo cultural Public Netbase de Viena. Y se inauguró mediáticamente con un sorprendente titular que lanzaron los periódicos austriacos en el mes de octubre: [Nike compra calles y plazas](#). La noticia se produjo en una esquina de la principal plaza de Viena donde había aparecido un puesto de información patrocinado por Nike que anunciaba el cambio de nombre a los ciudadanos: "La Karlsplatz pasará a llamarse Nikeplatz". La propuesta se completaba con el anuncio de la inminente colocación de un monumento que reproduciría el famoso logo de la marca (Swoosh) y con esta web. Inglés.

[Amy Alexander](#)

Artista interesada por el net.art, la videoinstalación y la animación por ordenador. Esta página da acceso al proyecto [Multi-Cultural Recycler](#), basado en el reciclaje de las tomas de diferentes *webcams* de vigilancia alrededor del planeta. Una de sus opciones escoge tres de manera aleatoria, y otra -"Make your own Cultural Compost"- permite elegir al usuario tres vistas particulares o utilizar las imágenes recicladas por visitantes anteriores. En la [Galería de Reciclajes](#) se exponen los trabajos artísticos de todos los usuarios. Una *página con vistas* que trata de la ubicuidad, la reapropiación y el placer mismo de la mirada,... o un juego de collage creativo para mirones. Su último proyecto es [plagiarist.org](#) (1998-2000), un espacio artístico con proyectos realizados a partir de "materiales plagiados" de Internet, y cuyas piezas, a menudo satíricas, tratan sobre la propiedad, la apropiación y los infinitos recursos de la web. Los proyectos de Plagiarist.org también se han presentado en las colecciones de [The Somniloquy Institut](#) y [Detritus](#), entre otros. Especialmente recomendable su Manifiesto. Inglés.

[Luis André. E-JUDO](#)

Esta peculiar propuesta es en realidad una herramienta al servicio de recorridos críticos por la red que compagina la creación artística con la utilidad de un nuevo recurso tecnológico. Su funcionamiento depende de un EMISOR, que navega según su propio criterio, y un RECEPTOR, que se dedica a observar como navegan los otros usuarios (o emisores). El objetivo básico de este proyecto es eludir intencionadamente los buscadores tradicionales para que sean los propios usuarios quienes nos muestren sus recorridos personales; algo así como intentar saber qué es lo que buscan "los demás", pero sin intermediarios. Español.

[Lucas Bambozzi. meta4walls](#)

Este es el primero de una serie de proyectos on line -[4 WALLS PROJECT](#)- sobre sistemas interactivos que tratan de la vigilancia, la apropiación, la subversión, la privacidad, el poder y la resistencia. [meta4walls](#) simula una especie de meta-vigilancia en la red a través de los mecanismos habituales que se utilizan para recoger información personal y otro tipo de datos (formularios, cookies y cuestionarios). Bambozzi nos invita a visitar unos cuantos enlaces ilícitos y a acceder a información "secreta", con la intención de evidenciar la fragilidad de algunos sistemas, pero también sugiriendo que estamos siendo observados y poniendo en peligro nuestra privacidad. Inglés.

[Rachel Baker. Trina Mould. TM](#)

Además de significar 'trade mark', **TM** son las iniciales de Trina Mould, miembro hipotético de [irational.org](#). Sus trabajos cuestionan las estrategias comerciales, las cuestiones de copyright, derechos de autor, apropiación de datos y la noción de original y de copia. Las obras de Trina Mould no están documentadas; es decir, que no se puede acceder a ellas directamente desde un enlace indicado en la página principal, ya que concibe este tipo de navegación como algo especialmente caduco. La forma más directa de llegar es a través de caminos desviados, hojeando y explorando los sites afiliados a su espacio. Inglés.

[James Baumgartner. Voteauction.com](#)

Página ideada por el joven James Baumgartner y posteriormente absorbida por el colectivo [rtmark](#). Su propuesta plantea subastar los votos presidenciales de los ciudadanos al mejor postor corporativo. En marzo de 2000 apareció esta web que proponía a los desencantados y/o dubitativos electores norteamericanos vender sus votos de cara a las siguientes elecciones presidenciales (7/11/2000) capitaneadas por Gore y Bush. La operación se completaba con la compra de estos mismos votos por compañías privadas que debían pujar entre sí para conseguirlos; así, semana a semana, los usuarios pudieron comprobar a través de un simplificado panel informativo la cotización de estos votos en función del estado al que pertenecían. Por supuesto, se trataba de un simple proyecto de simulación que Baumgartner se encargaba de actualizar periódicamente con datos inventados, pero la repercusión mediática no se

hizo esperar: fueron numerosos los artículos de prensa y las entrevistas televisadas. Los periodistas que cubrieron la historia no pudieron evitar mencionar aquello que su autor estaba esperando: que las empresas privadas siempre han comprado votos durante las elecciones norteamericanas.

[Hans Bernhard.com](#)

Esta es la página madre que contiene todos los productos, proyectos, publicaciones, fotografías, películas y textos sobre el pop-star de Internet, artista hardcore, maníaco radical y disidente hombre de negocios Hans Bernhard (alias e01, etoy.BRAINHARD, hans_extrem, o Dr. Andreas Bichlbauer, entre otros...). Su estilo se ha descrito como una mezcla entre Andy Kauffman y Jeff Koons, sus acciones se encuentran a medio camino entre las de Matthey Barneys y John Lidon, y su arte se ha catalogado entre duchampiano y beuysta, aunque lo que mejor define su filosofía de vida es su lema: "**¡es diferente porque es fundamentalmente diferente!**". Hans Bernhard es miembro fundador de [etoy.com](#) -cuya iniciativa [digital hijack](#) le llevó a ganar un Golden Nica en 1996- y también es el principal impulsor de [ubermorgen](#), que se encuentra detrás de los excelentes proyectos subversivos [\[V\]ote-auction](#), [NAZI~LINE](#) e [IPNIC](#).

[Joseph Beuys](#)

El propósito del arte es hacer libre a la gente, por lo tanto, para mi el arte es la ciencia de la libertad. Artista-pensador (1921-1985) que cuestionó los tradicionales parámetros académicos y trabajó en su propia concepción de la escultura utilizando materiales no tradicionales y cuestionando la idea de mito. Desarrolló una teoría del arte sistemática, holística e interdisciplinar a partir de sus propios filosóficos y científicos. La Teoría de la Escultura Social presentaba el principio de creatividad de la práctica artística como modelo de los aspectos creativos inherentes a todo proceso social. En 1961, fue nombrado Profesor de Escultura Monumental de la Academia de Arte de Düsseldorf, convirtiéndose en el artista-educador más carismático de nuestro siglo. Estas tres páginas documentan su vida y su obra a través de una exposición, una selección de textos y una obra:

[Joseph Beuys. Múltiples](#). Excelente exposición organizada en el Walker Art Center de Nueva York que contenía, además de las obras, un hiperensayo de Julie Luckenbach: [BEUYS/LOGOS](#) y un trabajo de Piotr Szyhalski: HARVEST. También contiene los debates que se llevaron a cabo en La Oficina de Información preparada al efecto durante los días de la exposición, un espacio-galería creado según el concepto de Beuys de oficina-estudio-galería abiertos como forums de debate. Inglés.

[Athena - Joseph Beuys Online Index](#). Directorio de temas y conceptos relacionados con el trabajo artístico de Joseph Beuys y sus teorías sobre el arte social. Artículos, ensayos, entrevistas de y sobre Beuys. Inglés.

[7000 Oaks](#). Esta página del Dia Center de Nueva York documenta el proyecto de Beuys **7000 Robles** que se inició en la Documenta 7 de Kassel en 1982 y consiguió completarse en la Documenta 8 de 1987. La idea consistía en plantar siete mil árboles emparejados con columnas de piedra de basalto y Beuys la concibió como la primera parte de un plan de plantación que debía extenderse por todo el mundo, en una misión global destinada a modificar los efectos ambientales y a provocar el cambio social. Ensayos, fotografías y un vídeo. Inglés.

[The Social Sculpture Research Unit](#). Esta idea desarrollada por Beuys en los años 70 se refiere a una concepción del arte como un proceso interdisciplinar y participativo donde el pensamiento, el discurso y el debate son considerados "materiales". A partir de esta percepción, todos los seres humanos pueden ser "artistas" responsables de la configuración de un orden social democráticamente sostenible. Esta Unidad de Investigación sobre la Escultura Social, con sede en la School of Art, Publishing and Music de la Universidad de Oxford, se basa en el concepto propuesto por Beuys para promover la colaboración entre artistas y teóricos de cualquier disciplina creativa con el objetivo de promover la reflexión crítica acerca de la escultura social.

[Natalie Bookchin](#)

Artista y teórica de la Red que ha ofrecido siempre una visión crítica de los aspectos éticos y políticos de nuestra sociedad y de la cibercultura. A lo largo de su trayectoria, ha formado parte del colectivo activista RTMark y ha colaborado con el artista ruso Alexei Shulgin en proyectos artísticos, como [The Universal Page](#), y en proyectos teóricos, como [Introducción al net.art 1994-1999](#).

[Metapet](#). El primer juego de mascotas virtuales y transgénicas del mundo. Juego on line sobre animales domésticos que sitúa su acción en una empresa especializada en biotecnología. El usuario actúa como jugador-empresario que deberá adoptar un metapet, o humano modificado genéticamente, y ganar puntos para dar de comer, reponer y manipular a su animal. Una mala decisión del usuario/empresario puede conducirle a un descenso en los resultados que se traducirá en ineficiencia, en la degradación del trabajo, en la pérdida del seguro o del puesto, en hambre y, en último extremo, en la muerte de su animal/trabajador. Si, finalmente, el jugador no consigue los puntos necesarios puede optar por otro juego; sólo entonces podrá participar en el "juego del conocimiento", donde puede experimentar sensaciones y retos de la vida real y participar en otros juegos on y off line que conseguirán megapuntos para su animal. Como en todos los juegos de Bookchin, en éste, tampoco lo más importante es ganar. Inglés.

[Kendall Bruns. AfterMichaelMandiberg](#)

Del arte al Comercio. Las obras de arte digitales pueden no ser únicas.

1) A finales de los años 70, el artista conceptual Sherrie Levine re-fotografiaba las fotografías documentales que en 1936 hiciera el famoso fotógrafo Walker Evans y las presentaba como nuevos originales.

2) [Michael Mandiberg](#) es un artista que se ha dedicado a escanear tanto las fotografías de Sherrie Levine, como las de

Walker Evans para colocarlas en dos webs: AfterSherrieLevine.com y AfterWalkerEvans.com. Los usuarios pueden descargarlas e imprimirlas con una resolución muy similar a las originales (las de Evans y las de Levine); es más, también puede conseguir un "certificado de autenticidad" -como auténticas obras de Mandiberg.

3) Kendal Bruns ha ido un poco más lejos todavía. Ha creado la página AfterMichaelMandiberg.com con un look, unos textos y unas imágenes idénticas a las páginas originales que creó Michael Mandiberg (AfterSherrieLevine.com y AfterWalkerEvans.com).

4) El diálogo que examina las relaciones entre las auténticas obras originales y las reproducciones de esos originales continúa con esta web del propio [Kendall Bruns](http://KendallBruns.com) denominada [AfterKendallBruns](http://AfterKendallBruns.com). AfterEnglish.

* [Heath Bunting](#)

"Diseñador, delineante, fotógrafo y net.artista inglés. Tras una brillante carrera como estudiante, Bunting ha conseguido un éxito internacional a sus veintipocos años y ha consolidado su posición como mejor artista británico de su generación. Este increíble éxito, no sólo se ha basado en el instinto, talento y versatilidad de su trabajo, sino también en su carismática personalidad, la cual le ha convertido en una figura popular incluso para aquéllos que no están particularmente interesados en el arte". Esto es lo que asegura su página, aunque... **yo no me lo acabaría de creer del todo**. Entre los proyectos de este **artista** británico destacamos algunos:

En [readme](#), Bunting se describe a sí mismo sólo a través de numerosos enlaces diseminados por la red. Se trata de un artículo de periódico titulado "Posee, sé poseído o permanece invisible" que contiene todas sus palabras subrayadas como hipertextos que enlazan dominios corporativos (absolutamente a todas les sigue el consabido .com). De hecho, el texto satiriza la comercialización a la vez que se resiste a ella.

En [CCTV. World Wide Watch](#) Bunting propone al espectador-voyeur vigilar desde su ordenador las actividades criminales que puedan presentársele, a través de cámaras que filman permanentemente, y en plano fijo, desde las calles de diferentes ciudades del mundo. Bajo cada plano tomado por la cámara, hay un espacio en blanco que propone describir el crimen o la actividad sospechosa que está sucediendo para faxearla directamente a la policía local. Una vez se ha validado el fax, el espectador ve como se añaden a su pantalla el conjunto de contribuciones precedentes de todas las ciudades vigiladas. Consecuencias de la responsabilidad cívica en la era del Gran Hermano. [Net.art Consultants](#) es un espacio que permite a los artistas donar sus obras de net art a los mayores coleccionistas (instituciones, museos, festivales...) con el fin de impulsar la economía del net.art. Coleccionistas: Walker Art Center, art.teleportacia, ICC - Tokyo, Museum of Modern Art - New York, Ars Electronica Center -Linz, Zentrum for Kunst and Media, DIA Centre, Institute of Contemporary Arts - London. Si se accede al listado de todas las donaciones se pueden ver algunas paradojas, como la donación de una misma obra a TODAS las instituciones, la donación del ICA (Institute of Contemporary Arts) al Ars Electronica Center de Linz, o la donación del MOMA al propio MOMA de Nueva York.

Bunting también ha trabajado junto a [Olia Lialina](#), en la obra [Identity Swap Database](#), una base de datos destinada al intercambio de identidades. Previa cumplimentación de un formulario con sus datos básicos, el usuario puede adquirir una nueva identidad -temporal o permanente- e incluso puede donar la suya para que otros la utilicen. Inglés, ruso, español y alemán.

[BorderXing Guide](#) es un espacio que contiene documentación sobre una serie de recorridos que atraviesan los límites nacionales, sin impedimentos de aduanas, inmigración o policía fronteriza. Paradójicamente, el website no es accesible a cualquiera que tenga una conexión a Internet: quien quiera visitarlo debe desplazarse físicamente hasta uno de los lugares designados por el autor, o bien conseguir una autorización de éste a través de la red (se puede consultar la lista completa en <http://irational.org/borderxing/>). Como podemos suponer, el proyecto se dedica a invertir los papeles entre dos ideas preconcebidas: una, que las fronteras restringen el movimiento; y dos: la idea de supuesta libertad relacionada con el concepto de Internet como un espacio sin fronteras.

[Vuk Cosic](#)

En esta página referenciada con su nombre se encuentran la mayoría de sus trabajos, inclusive el mirror de la Documenta X que fusiló para evitar que desapareciese toda esa información cuando acabó la muestra. Esta particular obsesión por la conservación de datos, ha llevado a Cosic a generar [La Historia Oficial del Net.art](#), que encontraréis en el volumen I [History of art for airports](#) y en el volumen II, [Classics of net.art](#). En esta última obra, el misterioso editor Keiko Suzuki nos presenta un libro que valora las ideas de una joven generación de artistas, pensadores, visionarios, críticos, periodistas, científicos, y narradores de la Revolución Digital. Un catálogo presenta las cubiertas de los libros de la colección, así como una biografía-sumario de los artistas implicados; a saber: Heath Bunting, Jodi, Alexei Shulgín y el propio Vuk Cosic. Después, el visitante que desee adquirir los libros puede contactar con Keiko Suzuki para conocer el precio de las obras,...que pueden ser editadas en diferentes calidades de papel. [La Historia 5 años del net.art ordenador como soporte publicada en forma de catálogo proceso tradicional de publicación industrial para la posteridad legitimando las pruebas por encima de las propias obras](#). Inglés.

* [Critical Art Ensemble](#)

Colectivo de cinco artistas y activistas (Steve Barnes, Dorian Burr, Steve Kurtz, Hope Kurtz y Beverly Schlee) dedicados a explorar las intersecciones entre arte, tecnología política radical y teoría crítica. Ellos han desarrollado el concepto de [Desobediencia Civil Electrónica](#) a partir del modelo de desobediencia civil callejera. Desde su página

principal se puede acceder a sus [Proyectos Tácticos](#) y a sus [Proyectos de Bio-tecnología](#), así como a sus excelentes publicaciones online en formato PDF (que también ha publicado Autonomedia). Sus textos representan una importante contribución crítica que argumenta el ataque contra el autoritarismo del orden social y la ideología del poder. **EBooks:** The Electronic Disturbance, Electronic Civil Disobedience, Flesh Machine y Digital Resistance. Desde la lista de Nettime se publicaron estas dos entrevistas [CAE interview I](#) y [CAE interview II](#) que nos aclaran su trayectoria y sus métodos de trabajo. Inglés.

[Minerva Cuevas. Mejor Vida Corporation](#)

Yes, It's FREE! Minerva Cuevas nos recibe en su página con un eslogan que desafía el sistema económico de las corporaciones a la vez que subvierte la concepción mercantilista del arte. Ella misma define su web como: "el resultado de la desconfianza en las utopías capitalistas, siendo la subversión una constante dentro de sus procedimientos". Desde aquí distribuye gratuitamente una serie de productos -billetes del metro de la Ciudad de México, tarjetas de lotería, credenciales de estudiante, etiquetas de código de barras...- y oferta servicios -encuestas, cartas de recomendación, servicios de limpieza, donaciones públicas...-; su objetivo: parodiar las estrategias de difusión y consumo a través, precisamente, de una corporación. Español e inglés.

[DigiCrime Inc.](#)

Organización de hackers que ha formado una empresa especializada en acciones criminales y que ofrece todo tipo de servicios y productos desde la red. Su peculiar [equipo de especialistas](#) es capaz de realizar cualquier acción ilegal que se pueda hacer utilizando un ordenador: pornografía, teléfonos, falsificación de tarjetas de crédito, venta de passwords, suplantación de identidades,... incluso han inventado un triturador de documentos que guarda una copia en su memoria mientras destruye el documento. La conciencia social y la ironía del científico y matemático [Kevin McCurley](#) tiene mucho que ver en todo esto... "DigiCrime es una broma. Es mi perversa manera de ridiculizar la vulnerabilidad que padece nuestra sociedad desde que entró en la era de la información. O mejor dicho: no es una broma, puesto que el futuro de nuestra sociedad depende de nuestra habilidad para proteger la información. Así es que se trabajo con la realidad de la vida. Inglés.

[Ricardo Domínguez](#)

Ricardo Dominguez es un [activista de la red](#) en cuyo currículum figura ser co-editor de [The Thing](#), fundador de [The Electronic Disturbance Theater](#), miembro de [Critical Art Ensemble](#) (1987-1994) y enlace de la [Guerrilla Zapatista](#) en el ciberespacio. Su página funciona como un portal a los numerosos proyectos críticos individuales y colectivos que ha realizado, tanto en el terreno artístico como en el entorno más teórico de la red. Su intervención más conocida -y más interesante- fue la que tuvo lugar en el Festival de Ars Electrónica del 98 (INFOWAR) donde su grupo Electronic Disturbance Theater presentó [SWARM](#), un proyecto basado en la Desobediencia Civil Electrónica al que se sumaron 20.000 personas de todo el mundo para conseguir bloquear la web de la presidencia mexicana (en apoyo al zapatismo) el Pentágono (contra el ejército de los EEUU) y la bolsa de Frankfurt (símbolo del capitalismo internacional). Inglés.

[ETOY. La primera pandilla de gamberros de la autopista de la información.](#)

[Etoy](#) es un grupo de artistas que actúa en Internet con proyectos críticos que cuestionan el poderío de las grandes corporaciones de la red. En 1996 consiguieron el premio Golden Nica de Ars Electronica (Linz) con [\["the digital hijack"\]](#) -el pirateo digital- un proyecto basado en la utilización de los buscadores de Internet y cuyo objetivo era demostrar cómo un puñado de compañías controlaban el destino de millones de internautas. La acción comenzó el 31 de marzo y finalizó el 1 de agosto de 1996. Durante este período, los software-agents de etoy generaron cientos de páginas trampa que contenían una de las 2400 palabras clave mas populares (como porsche, penthouse, madonna, fassbinder, etc...), las cuales se incluían automáticamente en los principales buscadores internacionales. Muchas de estas páginas trampa -de las cuales todavía podéis encontrar algunos ejemplos en su web- fueron anuladas, pero otras todavía no han sido localizadas hoy en día, y aunque la acción ya finalizó, ellos aseguran que el proyecto continuará o bien hasta que pirateen un millón de páginas o hasta que etoy sea eliminado de las principales compañías de buscadores. Terrorismo digital y entretenimiento inteligente para la nueva generación. Desbaratar la palabra clave: un nuevo estilo de vida en Internet.

ETOY: LA GUERRA. En 1995, un grupo de artistas suizos compró el dominio web [etoy.com](#). Dos años más tarde, en 1997, una tienda online de juguetes compró el dominio [eToys.com](#). A finales de 1999 estos últimos optaron por litigar contra [etoy.com](#) por su empleo del dominio web. Un juez de Los Angeles falló favorablemente a [eToys.com](#) y forzó a [etoy.com](#) a cerrar su website y a dejar de utilizar el nombre [etoy.com](#); es más, prohibió a los artistas vender su obra en los USA. [Contraataque:](#) Tras ser vapuleada en newsgroups, mailing lists y ruedas de prensa en el MOMA de Nueva York, [eToys](#) anunció que no iba a seguir con el juicio. Ello fue debido, sobre todo, a los "sit ins" virtuales del 15 y 25 de diciembre que contaron con el apoyo de miles de simpatizantes, intelectuales y defensores del discurso libre y la expresión artística en Internet, y que acabaron generando problemas operativos a la compañía (disminución de sus ventas electrónicas y descenso de su cotización en bolsa). [etoy](#) desarrolló la [Toywar](#), un espacio donde figuran todas las medidas concertadas de ataque y donde se seguía la guerra paso a paso (historia y acceso a los artículos publicados, no sólo en espacios alternativos, sino en los principales media: New York Times, Wall Street Journal, Le Monde, CNN). **Finalmente**, y tras años de pleitos, [eToys](#) cayó en la bancarrota y desapareció dejando al grupo de

artistas suizos con la victoria definitiva ¡eToys está muerto y [RTMark](#) lo festeja! Inglés.

N [Rafael Fajardo. Crosser y La Migra](#)

Estos trabajos exploran la complejidad de la situación real en la frontera EEUU/México. A través de ambos juegos, su autor nos propone una doble reubicación invitándonos a colocarnos en el punto de vista de un inmigrante ilegal y de un policía de frontera que intenta evitar la entrada en su territorio. La página también enlaza con un ensayo de Fajardo titulado [pixels, politics, and play](#) y publicado en intelligent agent vol. 3 no. 2. Inglés.

[First Floor](#)

Proyecto indefinible, lleno de recovecos y desvíos,... pero **muy recomendable**. Excelente. Inglés.

[Fred Forest](#)

Página central de este artista francés que enlaza con numerosos textos teóricos y con proyectos comprometidos. Entre ellos destacan, un mercado de obras de arte virtuales y una revista concebida como medio de información alternativo a la prensa oficial, institucional y comercial. También acceso directo a [Forest vs Beaubourg](#), donde el artista documenta el proceso que está llevando a cabo contra el Centro George Pompidou de París por su falta de transparencia: Forest denuncia que no se respeta el espíritu de la ley de 1978 sobre la transparencia de la contabilidad pública. Francés e inglés.

[Guillermo Gómez-Peña y Roberto Sifuentes. The Temple of Confessions](#)

El artista mexicano afincado en Estados Unidos, Guillermo Gómez-Peña y el hispano nacido en Los Angeles, Roberto Sifuentes se dedican a explorar el mestizaje cultural y las relaciones Norte/Sur, de manera que todos sus trabajos artísticos y teóricos intentan desvelar los laberintos de la identidad y los principios de la nacionalidad. Ambos han concebido este **Templo de Confesiones** como un documento que recopila las tecno-confesiones de miles de usuarios para descubrir los tópicos y prejuicios existentes acerca de las minorías étnicas. El visitante puede optar por varios cuestionarios organizados temáticamente bajo las palabras clave de utopía, rumor, raza, identidad, género y deseo. Gómez-Peña ha utilizado este material para crear unos etnocyborgs, a los que da vida durante performances (la última en el festival [Sonar](#) 2000, de Barcelona). Inglés.

[Eva Grubinger. Netzbikini](#)

¿Quieres diseñar tu propio bikini? El usuario que puede elegir hasta la talla; da igual que sea hombre o mujer, ahora cualquiera puede ser artista y obtener, incluso, el certificado de calidad del producto, su sello de autenticidad. No se puede esperar menos de quien busca el significado REAL del ARTE como actividad y se plantea cuál debe ser su último fin. Contra la definición del ARTISTA por naturaleza. Inglés.

[Ingo Günther](#)

Artista alemán que trabaja con el vídeo y las nuevas tecnologías, demostrando una voluntad crítica en todas sus obras. Actualmente simultanea sus instalaciones con proyectos on line como [World Processor](#) (1988-2000) o como [Refugee Republic](#) (1996-2003), un espacio online dedicado a los refugiados de todo el mundo que se mueve entre la ficción (pasaportes para los refugiados) y la realidad (acceso a informaciones exhaustivas acerca de los refugiados). Los usuarios pueden solidarizarse con ellos creando su propio Pasaporte de Refugiado. La web proporciona información real sobre los movimientos de las grandes migraciones a través de mapas y también posee un enlace con el UNHCR, Alto Comisariado de las Naciones Unidas para los Refugiados.

[Mario Hergueta. Cybordelics](#)

Cybordelics es la primera red personal de ordenadores on line que nos incita a participar en ella con estas sugerentes propuestas: "¿estás cansado del mismo PC viejo y aburrido mirándote fijamente a la cara? ¿estás cansado del mismo sistema operativo viejo y disfuncional? Quizás sea el momento de evadirse definitivamente del diabólico imperio de Microsoft y de todos sus miserables clones y productos basura construidos mediante un bajísimo denominador común. Si, tu necesitas un PNC PX-2000 (Personal Network Computer), un sistema creado por los genios más geniales, que verdaderamente puede hacer posibles cualquiera de tus sueños. ¡Conéctate y participa!". Encontraréis muchas colaboraciones de los principales autores referenciados en este directorio. Inglés.

[Ricardo Iglesias](#)

[DIY Do it yourself](#). Tomando como excusa el texto "[Manual de referencia para el artista de Internet](#)" de Lourdes Cilleruelo, Ricardo Iglesias se propone "ofrecer una orientación desorientada siguiendo las diferentes secciones en que esta dividido el texto, que funcionará como un gran menú, como una estructura hipertextual con múltiples links, como una interfaz de acceso a las diferentes piezas que se crearán para cada uno de estos enunciados y para los

enunciados internos, planteando de una manera abierta los diferentes problemas a los que se enfrenta una pieza de Internet, como la autoría, la accesibilidad, el nombre de los dominios, la incidencia real de las propuestas planteadas, la virtualidad, la presentación formal en un mundo físico, las diferentes formas de interacción, la inexistencia del objeto único, los soportes secundarios, la programación utilizada, la visualización sobre eventos externos, la traducción a otros idiomas (inglés, francés, alemán) o a otros lenguajes (ASCII), la visibilidad de la pieza en la maraña de las redes, la participación por parte de los usuarios, la creación de bases de datos, la utilización de bots y otros miniprogramas, para terminar con la conclusión y dentro del caos correspondiente: **prescinde de cualquier intermediario y erígete como comisario de tu propia obra!!!!**

Dangerous liasons: Arte = Dinero + Política. Este trabajo se centra en la realización de fotografías en el marco de grandes inauguraciones museísticas, bienales, trienales y todo tipo de evento artístico de carácter internacional. La participación de los usuarios es fundamental, ya que son ellos quienes aportan la documentación de las diferentes exposiciones a través de sus imágenes y comentarios. La página web consiste en una base de datos que muestra de manera individualizada y por bloques cada una de las aportaciones. Actualmente están en marcha los bloques que corresponden a las inauguraciones de la Colección del MACBA de Barcelona (2002) y a la exposición "On Translation" de Muntadas (2003). La idea que reside en la base de este proyecto no es la construcción de un ingenuo archivo documental fotográfico, sino algo más crítico y complejo pues la pieza "indaga las relaciones creadas entre estas tres esferas que aparentemente funcionan de una manera independiente, pero que mantienen entre sí profundos vínculos de subsistencia".

Institute for Applied Autonomy

El IAA fue fundado en 1998 por un colectivo de artistas, ingenieros, escritores y activistas que decidieron dedicarse a la investigación de temas relacionados con el espacio público, la libre expresión y la vigilancia electrónica. Asimismo este grupo se interesa por el desarrollo de soluciones tecnológicas que ayuden a los intereses activistas a través de actuaciones públicas subversivas: para el proyecto **Contestational Robotics**, por ejemplo, han diseñado "robots objetores" que responden a las necesidades y al presupuesto de las fuerzas culturales de resistencia. Entre sus trabajos en la red destaca **iSee** una aplicación de Internet que explora los lugares donde se han colocado cámaras de vigilancia en circuito cerrado de televisión (CCTV) en el entorno urbano. .

JODI

UNO - DOS - TRES - CUATRO - CINCO y SEIS increíbles proyectos + **MAP (2000)**

Cuando en 1995, JOan Heemskerk y Dirk Paesmans decidieron crear una página web para mostrar su trabajo fotográfico, cometieron un error fatal que desencajó la página convirtiéndola en un caos de colores y signos. Pero el resultado plástico les pareció tan interesante, tan sorprendente, que dejaron de lado su pretensión inicial para concentrarse en este nuevo descubrimiento. Desde entonces no hacen otra cosa que dar órdenes contradictorias a la máquina con la intención de generar errores premeditados. La característica común a todos sus proyectos es que el usuario se enfrenta siempre a una serie de caracteres parpadeantes, a menudo sin ningún sentido: clicar no hace más que generar una nueva pantalla, distinta, pero siempre parpadeante e ilegible. En alguna de sus propuestas sólo la lectura del código fuente del documento nos permitirá obtener caracteres legibles: se trata de dibujos en ASCII, acumulados sobre las páginas de tal manera que el ordenador los ha re combinado según su propia lógica no visual. Es entonces cuando comprendemos que JODI nos está mostrando la cara oculta del ordenador, lo que está tras la pantalla, el interior de la máquina: paradójicamente, su lenguaje lógico, racional, genera un sin-sentido a partir de imágenes que sí son significantes para nosotros, los seres humanos.

SOD (2001). PROJECT WL_GAME.C Modification. La peculiar concepción de la Red que defiende JODI en todos sus trabajos —basada en la manipulación, la subversión y los errores de programación— se extiende también a este irracional y extraño juego. Aunque **SOD** parte de modificaciones en el código fuente del **Quake** y de **Castle Wolfenstein**, no esperéis encontrar aquí referente alguno; ambos han sido desposeídos de su estética y contenido guerrero para convertirse en un desconcertante entorno minimalista de planos geométricos blancos, negros y grises con los que el jugador interactúa sin ningún sentido, objetivo ni intención. Caos absoluto. Desaparece el condicionante de competitividad, pero arrastra consigo la noción de juego.

untitled game (2002) es un CD y también una web de JODI con doce modificaciones del juego **Quake**. La primera modificación, "Arena", es de un blanco deslumbrante porque toda su arquitectura visible ha sido eliminada, quedando tan sólo los componentes del interfaz y el sonido. En el resto de modificaciones, el sonido también queda intacto de manera que el ataque de los monstruos y sus gruñidos se pueden oír en medio de extrañas composiciones formalistas. Todas estas variaciones presentan una exploración lúdica y descontrolada del sistema **Quake**, un diálogo sobre los entornos en 3D y sobre sus posibilidades.... de volvernos locos.

John Klima. The Great Game

John Klima ha desarrollado numerosos proyectos de software creativo, entre los que destaca este peculiar juego en 3D que se desarrolla en el territorio de Afganistán durante la **Operación Libertad Duradera**. Este representa un mapa en relieve de Afganistán donde se traza el avance de las fuerzas militares norteamericanas en las fortalezas talibanas. La evolución del recorrido se inicia el 7 de octubre de 2001 y cada minuto nos avanza la información de un día; una progresión que se basa en las estadísticas desclasificadas de la web del Departamento de Defensa de EEUU. Desafortunadamente, el proyecto se acaba de ampliar con la sección **Iraq Expansion Pack & Campaign Maker v1.0!** Inglés.

Knowbotic Research

El genérico **IO_Dencies** ("tendencias") es el proyecto matriz del grupo Knowbotic Research básicamente interesado en explorar las posibilidades de intervención y actuación en los complejos procesos urbanos. Esta serie de proyectos muestra diferentes cortes topológicos a través de un montaje heterogéneo de espacios físicos, imaginaciones urbanas, organismos conectores y experiencias individuales, pero son presentados como espacios urbanos de acción y reflexión públicamente accesibles y modificables. En cualquier caso, el objetivo de Knowbotic Research no es desarrollar avanzadas herramientas para la arquitectura y el diseño urbano, sino crear situaciones que nos permitan repensar la planificación urbana y la construcción. Inglés.

Aleph ha colocado un mirror en castellano de **IO_LAVORO IMMATERIALE**, una base de datos colectiva en Internet, generada por Maurizio Lazzarato (teórico político), Luther Blisset (colectivo de activistas media), Michael Hardt (filósofo), Hans Ulrich Reck (teórico de los media), Enzo Rullani (economista) y Laia Vantaggiato (periodista). "Esta base de datos funciona como una máquina de discurso abierto que cuestiona las actuales condiciones de acción y producción creativas en el campo social. Cada uno de los participantes desarrolla un mapa individual con información textual (en italiano y en inglés), que evoluciona hacia una topología discursiva en continua transformación. La información de cada uno de los mapas de los distintos participantes se auto-organiza en un nuevo mapa. En éste, las relaciones entre la información añadida y manipulada por los diferentes participantes será visualizada como movimientos y campos de fuerza". Esta página incluye 4 textos principales traducidos.

Minds of Concern: Breaking News Esta instalación interactiva plantea una revisión crítica de los conceptos de libertad, seguridad y vulnerabilidad del metabolismo global de las comunicaciones telemáticas. Por medio de una interfaz llamada Public Domain Scanner, el usuario puede analizar las principales páginas de grupos, asociaciones y ONGs relacionadas con los distintos movimientos civiles en Internet, y detectar su grado de vulnerabilidad en la red. Los resultados del análisis se visualizan a través de señales de luz, sonido y flujos de datos proyectados en el espacio expositivo sobre un tapiz de largas tiras de plástico entrelazadas. Con ello se genera una zona de alerta transitable que conecta las redes virtuales con el espacio real. Inaugurada en la exposición Open Source Art Hack del New Museum de Nueva York e inmediatamente censurada, esta obra fue presentada con éxito en la muestra **el banquete** que tuvo lugar en España y Alemania.

Andreja Kuluncic. Closed Reality: Embryo

Proyecto que Andreja Kuluncic desarrolla junto a Gabrijela Radek, Matija Puzar e Ivo Martinovic. **Embryo** es un experimento basado en la interacción entre una serie de usuarios que escogen diferentes opciones para **crear un nuevo ser humano** que, tras la primera fase, entra en una embrión-galería, junto con los datos asignados por su creador. La segunda parte del proyecto consiste en una comparación entre la sociedad de humanos creados por los usuarios de Internet y la sociedad real. "Si podemos conocer el ADN y manipular el código genético, las generaciones futuras pueden encontrarse a nuestra merced... Este proyecto no es un juego ficticio y tampoco pretende popularizar descubrimientos científicos. Se trata más bien de una observación experimental sobre el desarrollo de la consciencia y de la ciencia. Propone una simple cuestión: ¿Hasta que punto estamos preparados para participar en todo lo que hemos hecho posible y en aquello que ansiamos hacer posible por nosotros mismos?" Inglés.

La Sociéte Anonyme

Grupo de artistas y teóricos de composición variable, fundado en 1990 y dedicado específicamente a investigar y desarrollar experimentalmente las relaciones entre las prácticas artísticas y el pensamiento crítico. Ha producido numerosas obras, incluyendo textos, videos, instalaciones, piezas para catálogo y obras para la red. Actualmente trabaja exclusivamente en la problemática de la red, en cuanto relacionada con la extinción crítica del existir separado de lo artístico en las sociedades contemporáneas. Inglés y castellano.

Latenta. ¿Quién es tu artista favorito?

Latenta te ofrece la oportunidad única de descubrir como es tu artista favorito: su perfil psicológico, el tipo de trabajo produce, su actitud hacia su obra, su público. Aquí tienes un peculiar cuestionario cuya finalidad es detectar tus gustos y preferencias en cuestión de arte... y también tus trazos psicológicos más ocultos. Excelente proyecto de **The Somnology Institute**. Inglés y francés.

Tina Laporta. SHIFTING

¿Donde estará el cuerpo en el futuro? Todos los proyectos de net.art de Tina Laporta están incluidos en esta página que pretende explorar la potencialidad y el significado del cuerpo en el nuevo entorno de las comunicaciones tecnológicas. Un intento de reafirmación de la identidad femenina y la individualidad en una era de intensa transformación tecnológica. La tendencia de general de todas sus obras es claramente feminista y queda reflejada en títulos como **Women and Performance** y **The World's Women Online**. Entre sus obras más recientes, **Future body version 1.0**, **Alterities** y **Unveiled Imprints**, una web de pantalla única que muestra el deseo femenino mediante imágenes pornográficas. Inglés.

Peter Luining. FF00FF Remixes

Remezclas de las piezas clásicas del net.art: obras de JODI, antirom, turux, lfoundation, kalx, antiorp, etc. Peter Luining estudió filosofía contemporánea y estuvo dirigiendo video-clips y haciendo trabajos comerciales con animaciones en 3D hasta que, en 1996, se dedicó por completo al net.art. Sus proyectos han sido bastante minimalistas y siempre ha mantenido un carácter experimental en todas sus propuestas. Inglés.

Conor McGarrigle. Spook

El irlandés Conor McGarrigle, net.artista y fundador de [Stunned.org](#), ha creado este proyecto artístico que aborda las cuestiones sobre vigilancia y rastreo en la red a través de una web interactiva basada en las convenciones de los videojuegos. Spook rastrea los movimientos de un servidor militar descubriendo su identidad, su ubicación geográfica, sus webs y también sus hits y sus condiciones de accesibilidad. El resultado es un verdadero mapa del servidor representado e interpretado gráficamente mediante animación y datos en bruto. Según Conor McGarrigle se trata de “una fascinante oportunidad de adquirir una nueva percepción de la estructura y de las actividades online de este particular sector del complejo industrial militar, y también de preguntarnos a nosotros mismos sobre la propia naturaleza de la red”

Jenny Marketou. Smell.bytes (TM) (1998-1999).

Smell.bytes es el entorno online de [Chris.053](#), un *bot* que trabaja las 24 horas del día en Internet viajando por nodos y direcciones y que se dedica a capturar los olores corporales de los habitantes de ciber-cafés y de chats a través de sus perfiles fotográficos. Esta especie invisible de la red cuenta con una base de datos de 7.000 olores y una colección de perfiles humanos que evalúa según su simetría, belleza y olor corporal para determinar qué clase de personas son y cuál es su valor en esta sociedad. Jenny Marketou lo ha creado como “un *serial sniffer*, un hacker, un intervencionista que trabaja desde una posición simbólico-política y un artista”. Este proyecto contiene dosis de tecnología de la información, de espionaje, de inteligencia artificial y de arte contemporáneo, pero sobre todo cuestiona el valor de la privacidad, la autonomía individual y el cuerpo. También hemos seleccionado este texto de Sonia Papa titulado [Smell bytes: an outline for a cannibalistic serial murder of beauty mystery](#). Inglés.

[Taystes \(2001\)](#). Influenciada por Smell.bytes, esta reciente obra de Jenny Marketou está concebida como una herramienta online que permite al usuario un acceso ilimitado al mundo de las redes e infraestructuras de la comunicación tales como webcams, chat rooms y flujos de información que circulan en los espacios de vigilancia de la red.. Inglés.

*** Antonio Mendoza. Subculture**

Las obras de Antonio Mendoza son una especie de metacollages realizados a partir de imágenes, sonidos y scripts pirateados de revistas, libros, CDs, y webs corporativas y pornográficas (una acertada combinación). El propio autor define Subculture como “un paraíso autista repleto de información pero salteado de fastidiosos motivos repetitivos” donde la navegación randomizada puede conducirnos a curiosas interferencias entre las imágenes. Quizás la forma más precisa de definir su trabajo sea a partir de sus propias palabras clave: war, underground, posthuman, ironic, interface, corporate, commercialization, browser abuse, audio, animation, robot, machine, desire, artificial life, sex, japanese comic, chaos, appropriation, collage, piracy, virus worship, anti-copyright, corporate logo sabotage, disinformation, spam art,... en cualquier caso, un cóctel epiléptico que aborda de la manera más ácida posible todas esas referencias y acontecimientos globales que inevitablemente afectan a nuestras vidas. Este proyecto principal, junto con todas las derivaciones posteriores, enlaza con otros de sus espacios más emblemáticos: [Mayhem](#). Inglés.

Sally Minker y Jennifer Sloan. Artist Protection & Benefit Program

¿Que sucede cuando muere un artista? Pues que la cotización de su obra sube como la espuma. Pero claro, el ya no puede disfrutar esta nueva situación. Sally Minker y Jennifer Sloan han encontrado la solución a este problema creando un “Programa de Protección a Artistas”, similar a los “programas de protección de delatores” que conocemos por las películas americanas, y que consta de tres pasos: En primer lugar se trata de eliminar al artista que lo solicite del mundo del arte, después se le proporciona una nueva identidad en algún lugar paradisíaco donde pueda seguir creando lo que verdaderamente le apetezca y, finalmente, sólo queda cobrar los dividendos que le proporcionen la venta de sus obras “en vida”. Todo está controlado, con total garantía.

MONGREL

Mongrel es el nombre de un colectivo inglés de artistas Matsuko Yokokoji, Richard Pierre-Davis, Harwood y Mervin Jarman que, según sus palabras “trabajan juntos para celebrar los métodos de la ignorante e inmundia cultura urbana londinense”. En todos sus proyectos poseen una fuerte implicación social, ya sean artísticos, creación de softwares o puesta en marcha de talleres. En ellos obligan al usuario a enfrentarse a sus propios prejuicios raciales culturales, biológicos y tecnológicos: de hecho todos sus trabajos investigan el arraigo del determinismo biológico racial en la cultura y en la vida diaria. Natural Selection, por ejemplo, simula la apariencia de un motor de búsqueda que “funciona a plena potencia” cuando el usuario introduce un término racista o pornográfico, enviándole precisamente a sitios web que se dedican a desenmascarar el racismo, el clasismo y la xenofobia en la red. Y Heritage Gold es un software gratuito con vocación activista que sustituye las herramientas y comandos convencionales del Adobe Photoshop por términos racistas y clasistas. Los menús del programa permiten al usuario añadir, modificar, o reducir los niveles de las características de cada raza, ya sean chinos, africanos, indios o caucasianos. Desde su página se

puede acceder a otros proyectos: [Rehearsal of Memory](#), [National Heritage](#), [Linker](#), and [Uncomfortable Proximity](#). Inglés.

MTAA. MT Enterprises World Wide

MTAA es una iniciativa de colaboración artística y empresarial entre los artistas neoyorkinos [Mark River](#) y [Thomas Whid](#). Su trabajo crítico explora la reconciliación entre las prácticas y estrategias artísticas contemporáneas e Internet. Este es el caso de [TIME!®: the Nostalgia-Free History Sale](#), donde venden ediciones limitadas de dibujos; [The Visual-Text Art Venue \(V-TAV\)](#), una galería de información contemporánea; o [Direct-to-Your-Home Art Projects \(DYHAP\)](#), un proyecto que utiliza la comunicación por e-mail en las principales listas de correo artísticas para enviar las instrucciones de montaje y colocación de obras de arte en nuestros propios salones; ...aunque quizás uno de sus mejores y más populares trabajos sea el [Simple Net Art Diagram](#). Inglés.

Muntadas

[The File Room](#) es un proyecto pionero en la web sobre [la censura en el arte y la cultura](#). Consta de dos partes: una instalación, destinada a exhibirse en espacios físicos, y un archivo en la red que permite aportar información relacionada con el tema. Cualquier usuario que sepa de alguna obra censurada, esta invitado a aportar todos los datos que considere necesarios; después esa información estará al alcance de todos aquéllos que deseen consultarla en la web. Proyecto desarrollado por la Randolph Street Gallery de Chicago en colaboración con el Electronics Visualization Laboratory de la Universidad de Illinois (Chicago). Existen numerosos artículos sobre este importante artista mediático, pero desde aquí hemos seleccionado los siguientes textos online: [A De-cafinated Experience \(of Net.Art\)](#), una entrevista realizada por Josephine Bosma y publicada en inglés en Telépolis y un artículo-entrevista de Robert Atkins titulado [Censor Sensibility: Antoni Muntadas on the "Media Landscape"](#). Inglés. En [On Traslation](#), un proyecto concebido para la Documenta X de Kassel, Muntadas parte de una breve frase formulada en inglés -[Communication in systems provide the possibility of developing better understanding between people: in which language?](#)- y posteriormente sometida a sucesivas traducciones de una lengua a otra, hasta un total de 23, pero sin volver a remitirse al enunciado original. "Como en el juego infantil del *teléfono* –metáfora de los propios juegos interactivos y de la conexión en la red-, el sentido literal de la frase original va transformándose y adquiriendo giros imprevistos en los sucesivos rizos de una espiral". Muntadas lanza la frase original y después sólo tiene que esperar sus incontrolables y, no obstante, previsibles efectos. Este proyecto forma parte de una serie de trabajos que exploran los conceptos de transcripción, interpretación y traducción: del lenguaje a los códigos, de la ciencia a la tecnología, de la subjetividad hasta la objetividad, de lo privado a lo público, de la semiología a la criptología: Español, coreano, alemán, árabe, inglés, japonés, portugués, hebreo, noruego, italiano, indonesio, finés, polaco, francés, chino, griego, ruso, hindi, holandés, urdu, rumano, checo y suahili.... ¡Por Dios!

*Mark Napier. POTATOLAND

En este espacio se mezclan los proyectos artísticos de excelente factura con espacios tremendamente críticos e incisivos, como es el caso de [Digital Landfill](#), un vertedero on line, donde el visitante puede deshacerse de todos los desperdicios digitales que ya no necesita (e-mails, datos obsoletos, spam, viejas webs), contribuyendo a ["la creación del abono virtual para fertilizar el terreno de las ideas de diseñadores y artistas"](#). Luego puede visualizar los desechos por bloques, inspirarse en ellos y utilizar los que necesita para realizar sus obras. La web también da acceso a dos creativos navegadores, ambos ideados por [Mark Napier](#): [RIOT](#), un browser que realiza un collage automático de la página que el usuario desea visualizar,... junto a las tres últimas que éste ha visitado: "Riot es un navegador multiusuario y antisocial al mismo tiempo; es un entorno darwiniano donde los contenidos luchan por sobrevivir"; y [The Shredder](#), un navegador que presenta la estructura global de la página como un collage caótico e irracional: The Shredder se apropia de los datos de la página, destruyendo su estructura para luego reconstruir con sus contenidos otra web paralela a la original. [Una web magnífica](#). Inglés.

Netochka Nezvanova. NATO.0+55

[Software Art](#). Netochka Nezvanova -"Nameless Nobody"- es un misterioso colectivo que ha asumido el nombre de una de las primeras novelas de Dostoievski (1849) para darse a conocer en el mundo del net.art a través de conferencias y performances. Aparece por primera vez en la primavera del 2000 en Montreal presentando su producto estrella, [NATO.0+55](#), un software para el tratamiento de la imagen y el sonido en tiempo real concebido como un conjunto de objetos externos QuickTime para MAX. Este programa permite la entrada de datos, su análisis, manipulación, transformación y su descomposición/recomposición en un producto modificado a partir de la mezcla de esos datos iniciales. Sus textos están repletos de citas y reflexiones biológico-socio-económico-políticas donde predomina cierta ideología feminista y anticorporativista. La versión original de [NATO.0+55](#), y su versión mejorada [NATO.0+55.3d](#) modular, han sido presentadas en los principales eventos internacionales de arte digital, pero siempre por diferentes artistas de nacionalidades diversas: Bruce Gremo, Johnny DeKam, Kurt Ralske y Jeremy Bernstein (EEUU), Rene Beekman (Holanda), Anne Laforet (Francia) y Domiziana Giordano (Italia). Anteriormente, algunos miembros de este colectivo utilizaron los nombres de [m9ndfukc](#) o [membank](#) para comunicarse en listas de correo como Nettime o Rhizome mediante un lenguaje inventado que mezclaba cifras e imágenes en caracteres ASCII con inglés, francés y alemán. Más información en: [Nato 0 + 55 + 3d modular](#), en [boot squad research](#), en [fiftyfifty.org](#) y en [miau-miau](#). Y también podéis ver algunas de sus piezas en: [0f0003.MACHIN3NKUNST](#), en [Membank](#) y en [Dadata](#)

[Fyftyfifty](#), pero cuidado con "los cuelgues" de ordenador. Inglés.

* [Josh On, Futurefarmers. They Rule](#)

Ellos mandan... En 1956, C. Wright Mills escribía **The Power Elite** documentando las interconexiones entre la gente más poderosa de los EEUU. Desde entonces, la situación se ha vuelto todavía más extrema: unas pocas compañías controlan los grandes monopolios del sector económico y sus directores no sólo están relacionados comercialmente, sino que ocupan cargos relevantes en el gobierno. Por supuesto, sus conexiones permanecen ocultas al común de los mortales. **They Rule** intenta hacer visible estas conexiones de la élite a través de mapas y directorios interrelacionados que los usuarios pueden modificar y ampliar según sus propias informaciones. Impresionante diseño y contenidos. Este proyecto ganó el Premio Golden Nica en la categoría Net Excellence en el último certamen de Ars Electrónica celebrado del 7 al 12 de septiembre de 2002 en Linz (Austria) bajo el lema **UNPLUGGED. Art as The Scene of Global Conflicts**.

[PaperVeins. Genochoice©](#)

"Gracias por tener en cuenta a GenoChoice© en el plan de futuro de su familia. Mi nombre es Dra. Elizabeth Preatnet, especializada en genética prenatal y embriología. Utilizando nuestros medios tecnológicos-artísticos usted puede estar seguro de que la vida de su hijo quedará libre de enfermedades como el cáncer, el Alzheimer y los ataques al corazón - y también de problemas como la obesidad, la agresión y la dislexia-. Con la ayuda especial de GenoChoice© usted podrá elegir los genes específicos que determinen las características favorables de su hijo". Evidentemente, el proyecto trata de la identidad y de la selección genética. El usuario puede crear un clon de sí mismo o elegir las características psico-físicas de su niño y, tras la lectura del posible código genético, Genochoice© le propondrá varios cambios y mejoras, acompañados de sus respectivas tasas. Si el visitante acepta las condiciones, recibe un correo informándole de que ha empezado el desarrollo de su criatura. Inglés.

[Pornolize](#)

Espacio de difícil catalogación y descripción; quizás podríamos decir que se trata de un "juego políticamente incorrecto". Introduce un texto, preferiblemente que haga alusión a la Iglesia, la teoría del arte, la literatura infantil, o simplemente tu curriculum y mira a ver que pasa. Inglés, sueco, danés, noruego y húngaro.

[Francesca da Rimini](#)

Esta artista australiana inició su trayectoria artística en el vídeo durante los 80 y fue co-fundadora del colectivo ciberfeminista **VNS Matrix** junto a Julianne Pierce, Josephine Starrs y Virginia Barratt. En esta página se encuentran recopilados todos sus proyectos artivistas, entre los que destacan **Dollspace**, una obra en colaboración con Ricardo Dominguez y Michael Grimm que presenta la historia de una mujer asesinada, Dollyoko, cuyo nombre coincide con uno de sus "alias". También **Los días y las noches de los muertos** es un proyecto realizado también junto a Michael Grimm y el colectivo Los Fantasmas que está dedicado al movimiento zapatista y que posteriormente amplió su radio de acción con un dossier de violaciones de derechos humanos que se cometieron en el encuentro G8 de Génova. Asimismo, Francesca da Rimini lleva a cabo una serie de iniciativas de carácter crítico a través de su reciente alias GashGirl -**GashGirl's Favourite US Defense Contracts for April 2002**-. La web también da acceso a sus propios textos y a las principales entrevistas. Inglés.

[Alex Rivera. Remote Labor Systems \(RLS\)](#)

El artista Alex Ribera ha creado esta satírica página que propone la sustitución de los tradicionales braceros por prototipos robóticos cuyo objetivo es reemplazar a los inmigrantes en la industria agrícola de EEUU. Según su autor, "Cybracero es el programa que usa la tecnología robótica para reemplazar al bracero que tiene que viajar desde otros países para venir a trabajar a los campos de este país. Los robots se hacen cargo del trabajo de campo al sembrar y recoger las cosechas mientras son operados a control remoto por campesinos desde sus países de origen. Los trabajadores se quedan en sus países de origen y no tienen que separarse de sus familias, pero todavía pueden trabajar al operar electrónicamente los robots". Inglés.

[Gustavo Romano. Cyberzoo](#)

Este proyecto nos permite, en la seguridad de nuestro PC, experimentar los más salvajes virus informáticos enjaulados en su servidor. Del mismo modo que los zoológicos tienen por objetivo la investigación, reproducción y conservación de especies amenazadas en peligro de extinción, CyberZoo está involucrado en programas internacionales de cría en cautividad de especies amenazadas de virus y participa en diferentes proyectos de recuperación y reintroducción de vida artificial. La web nos propone un tour por diferentes tipos de virus en cautividad, que en este entorno podemos observar en acción, tal y como se muestran en las pantallas de los ordenadores cuando viven en libertad. Para ayudar al crecimiento de la fauna salvaje en la red, la web también contiene una sección desde la cual los usuarios pueden enviar postales con virus y otra donde es posible hacer donaciones. Español.

RSG Radical Software Group. CARNIVORE

El DCS1000, o CARNIVORE, es un programa de interceptación, desarrollado y utilizado por el **FBI**, que captura los datos de tráfico y los contenidos de un mensaje electrónico (en las dos direcciones). Inspirado en este programa, el colectivo internacional de net.artistas RSG ha creado su propio proyecto "Carnivore", de idéntico nombre y similares características. Este consta de dos partes: un servidor que actúa en un área concreta del tráfico de datos convirtiéndolos en imágenes y sonidos; por ejemplo, si instalamos la aplicación en nuestro ordenador, Carnivore podría ver todos los e-mails, páginas web recibidas o transmitidas y documentos añadidos de todos aquellos con quienes nos conectamos en la red. Pero también ofrece una serie de aplicaciones que ponen a disposición de los artistas y activistas de la red, para que los reinterpreten de diferentes maneras creativas. Entre sus clientes se encuentran Entropy8Zuper, Joshua Davis (Praystation) Mark Daggett y Mark Napier. Este proyecto ganó el Premio Golden Nica en la categoría Net Vision en el último certamen de Ars Electrónica celebrado en septiembre de 2002 en Linz (Austria) bajo el lema **UNPLUGGED. Art as The Scene of Global Conflicts**. Inglés.

Julia Scher. Securityland

Proyecto que que explora de manera lúdica todo tipo de sistemas de control, desde las cámaras de vigilancia en circuito cerrado a los cuestionarios que ceden información privada en Internet. La artista ironiza sobre estos últimos y somete al usuario a un disparatado interrogatorio. *"El control no es sólo parte de un profundo deseo de seguridad, sino también de una forma de orden. Debes entender el orden del mundo. Con mi trabajo, yo también contribuyo a buscar un orden del mundo"*. (Declaraciones de Julia Scher en una entrevista de Noemi Smolik publicada en Kuntsforum). El trabajo de Scher consigue desarrollar los temas de intimidad y control, con los que ya está suficientemente familiarizado el usuario de la red, de una manera lúdica y autoreferencial. Inglés.

SERO.ORG. Blank & Jeron

Página que da acceso a varios proyectos artísticos de Joachim Blank y Karl Heinz Jeron. (Uno de ellos, **without_addresses**, se presentó en la Documenta X del 98). "Fundada en 1949, en la RDA, como una empresa de reciclaje de papel, SERO sobrevive a la caída del muro de Berlín y actualmente funciona reciclando basura electrónica" Blank & Jeron *dixit*. Sus proyectos son instalaciones híbridas basadas en el "reciclaje de sistemas de información" y en general, todo su trabajo cuestiona el paradigma de una sociedad donde la abundancia de información sólo es equiparable a la ausencia de contenido. En **Dump your trash**, por ejemplo, se brinda al usuario la posibilidad de reciclar su vieja página, convirtiéndola en una obra de arte. Tan sólo tiene que enviar la URL y pagar 1.500 dólares y entonces recibirá en su domicilio un bajorrelieve en mármol grabado con un trozo de texto, una imagen y la dirección de su web. **¡Un diploma en mármol! ¡Por fin la evanescencia de la red se consolida en materia!** Inglés.

Alexei Shulgin. FuckU-FuckMe

En este proyecto, Alexei Shulgin pone a la venta por 500 dólares cada uno, "unos aparatos que proporcionan la más completa solución al sexo por control remoto en Internet; un sistema con un interfaz intuitivo que permite al usuario concentrarse completamente en la comunicación sexual". La página se carga rápidamente y las imágenes son muy explicativas... Desde **su página personal** se puede acceder también al magnífico - e irónico- texto **Introduction to net.art (1994-1999)**, escrito en colaboración con **Nathalie Bookchin** y Blank&Jeron, del grupo **SERO**. Inglés.

N Yoshi Sodeoka. ASCII Bush

El artista Yoshi Sodeoka, del grupo C505, ha realizado este trabajo en ASCII que recoge dos videos de Bush y Junior: A la izquierda y en azul, un discurso de George W. Bush que tuvo lugar el 12 de Enero de 2003, sobre la Guerra de Irak; y a su derecha, en rojo, el discurso de su padre George H.W. Bush, sobre la Operación Tormenta del Desierto, el 6 de marzo de 1991. El artista nos recuerda que a pesar de las increíbles similitudes en sus ideas y en protocolo gubernamental los discursos no están editados, sólo se han filtrado con medios digitales.

The Missing Gene Project

¿Por qué nosotros podemos hablar y los (otros) animales no? Tras la muerte, en 1994, del biólogo británico Sir Richard Thomas Bacon, se publicaron sus cuadernos privados. En ellos, describía una "mutación evolutiva" que se produjo en nuestros genes. En su investigación -test de DNA realizado a humanos, primates y loros, donde se estudiaban más de 1000 genes- Beacon descubrió que algunas personas carecen del "gen del habla" D2433, aunque no parecían tener problemas a la hora de expresarse. The Missing Gene Project es un homenaje a Richard Beacon y a su importante contribución al conocimiento humano. La web presenta varias secciones: Información sobre Richard Beacon y su descubrimiento del gen D2433; su relación con la teoría del lenguaje propuesta por el escritor americano William S. Burroughs ("Language is a virus"); - por qué la gente habla, por qué no lo hacen los primates y cómo lo hacen los loros (con 13 archivos de audio!); información científica sobre el gen D2433, y un increíble test online de nuestro propio DNA. Otro excelente proyecto de **The Somniloquy Institute**. Inglés.

[The Pinocchio Files](#)

Bienvenidos al universo donde las verdades son verdades y las mentiras, mentiras. Base de datos y recopilación de artículos sobre Mentiras y Fraudes, Aplicación Jurídica y Contribuciones Científicas. Para todos aquéllos que les gustaría saber mucho más sobre verdades y mentiras, y cómo reconocerlas. Según sus autores, el objetivo de este espacio holandés es crear un entorno educacional y de entretenimiento donde no se toleren conductas que puedan ser perjudiciales para los demás. Alojada en el excelente [The Somniloquy Institute](#). Inglés. *Aprovecho aquí para recomendaros una lectura relacionada que provocará algunas desmitificaciones (necesarias): [Imposturas intelectuales](#), Alan Sokal y Jean Bricmont, Paidós Transiciones, Barcelona, 1999. Repasito a Jacques Lacan, Julia Kristeva, Luce Irigaray, Jean Braudillard, Paul Virilio, Gilles Deleuze y Felix Guattari. Vamos, que no deja títere con cabeza.

[The Surveillance Camera Players](#)

Activistas políticos (se definen como anarquistas) que consideran que el uso de cámaras de vigilancia por parte de la policía es una flagrante violación de la cuarta enmienda de la Constitución Americana y se manifiestan en contra de su utilización. Los componentes del SCP realizan sus actuaciones frente a las cámaras de vigilancia aupándose para hacer sus pantomimas y alzando sus carteles hasta ellas (las cámaras no graban el sonido). Su repertorio es muy amplio e incluso tienen "números especiales" para lugares concretos, como por ejemplo iglesias. En su web se pueden consultar todo tipo de documentos legales y artículos sobre el uso y abuso de las cámaras de vigilancia, una situación que se ha agravado especialmente tras los hechos del 11 de septiembre de 2001. También encontrareis una detallada descripción de sus ideas y actividades en [NOT BORED](#).

[The Technologies To The People®](#)

Daniel García Andujar es artista, miembro de [irational.org](#) y fundador de Technologies To The People. Inició su actividad artística a finales de los 80, interesándose especialmente en proyectos de intervención pública relacionados con el abuso de la tecnología en los sistemas de vigilancia y con el racismo y la xenofobia. A partir de 1996, comenzó a desarrollar el proyecto Technologies To The People que consta de un espacio en la web y de diferentes extensiones bajo la forma de instalaciones y presentaciones en espacios físicos. En todas ellas, el autor cuestiona siempre los límites de la información legal, el acceso a la tecnología y la supuesta interactividad de la red, así como su credibilidad. La labor que desarrolla Daniel García Andujar mantiene su base de operaciones en Internet, mientras cuestiona sus supuestas ventajas, sus usos y abusos.

[Phoney](#) es un proyecto informativo que tiene lugar en la red y que ha sido concebido como una base de datos de armas informáticas (programas y virus) al servicio de cualquier persona que decida hacer uso de ellas,... y que conozca sus códigos. No obstante, la obra posee dos niveles: uno más especializado, para hackers capaces de provocar verdaderas catástrofes informáticas como introducirse en los ordenadores de potentes empresas o infectar servidores; y otro mucho más sencillo: resguardado en el anonimato, un usuario neófito puede seguir las sencillas instrucciones de Phoney para realizar pequeñas transferencias bancarias o para escuchar conversaciones telefónicas. Cualquiera de estas operaciones es absolutamente ilegal, y así lo advierten repetidos anuncios en la pantalla de nuestro ordenador, pero el artista ha decidido confiar en el buen juicio y en el sentido de la responsabilidad del usuario. Que se pueda acceder libremente a la información no significa forzosamente que se deba hacer (mal)uso de ella ...¿o sí?. Inglés.

[The Yes Men The Yes Men y World Trade Organization.](#)

The Yes Men crearon en 2000 una página denominada [GATT.org](#) que parodiaba la estética y los contenidos de la WTO (Organización Mundial del Comercio, en español). En mayo de 2000 recibieron un e-mail invitando a su director general Mike Moore, a hablar de la WTO en una conferencia acerca de materias relacionadas con el comercio internacional. The Yes Men decidió enviar a un representante que pronunció una demencial conferencia sin que el público llegase a sospechar nada. Desde entonces han realizado varias intervenciones similares ante audiencias predispuestas a aceptar cualquier cosa que provenga de la WTO. Posteriormente han parodiado también la página de la poderosa industria estadounidense [The Dow-Chemical](#), evidenciando su responsabilidad sobre la catástrofe de Bhopal (India) donde han muerto más de 20.000 personas. Desde estas páginas se puede acceder a toda la información.

[Andrej Tisma](#)

Página personal de este artista, crítico y comisario yugoslavo que atenta contra MacDonals y contra la Coca-cola, contra los regalos de Navidad y contra los *christmas*, contra los cuestionarios, contra los daños colaterales, contra... En fin, contra [ese estilo de vida típicamente norteamericano](#).

[Transnational Temps. Novus Extinctus](#)

El grupo Transnational Temps, formado por los artistas Andy Deck (EEUU), Fred Adam (Francia), Verónica Perales (España), ganó con esta obra el tercer premio del certamen [VIDA 4](#) correspondiente a la edición de 2001. "Los artistas han realizado una extensa obra basada en Internet compuesta por una taxonomía de nombres de dominio de la Web, un buscador que rastrea por estos datos extraños, eslóganes de marketing, datos insertados por usuarios en

el sitio y misteriosos gráficos. La idea y el mensaje clave de Novus Extinctus es que la expansión de la presencia humana en la World Wide Web corre paralela a la escalofriante pérdida de la biodiversidad en los hábitats del mundo real: el número de nombres de dominio de la Web registrados aumenta cada día, al mismo tiempo que crece el número de especies extinguidas. Por eso, para construir la metáfora, los nombres de dominios que aparecen en el sitio están asociados a nombres de especies en latín. Cuando alguien selecciona un nombre de dominio y lo procesa, aparece esta asociación con un enlace a sitios reales de animales, como TigerDirect.com. La sagacidad sociopolítica de esta obra se resume en la afirmación que hacen los artistas de que nuestro creciente banco de datos de códigos genéticos, como es el caso del Proyecto del Genoma Humano, no puede de ninguna manera compensar la pérdida de especies". Inglés.

VNS Matrix

VNS Matrix está compuesto por **Josephine Starrs, Julianne Pierce, Virginia Barrat y Francesca da Rimini**. Se trata de un proyecto conjunto que surgió en Australia, durante el verano de 1991 y que pretende investigar y descifrar las narrativas de dominación y control que rodean la cultura de alta tecnología, explorando la construcción del espacio social, la identidad y la sexualidad en el ciberespacio. Sus componentes, que se consideran a sí mismas como ciberfemistas, persiguen la idea de hacer trizas el mito masculino que pretende alienar a la mujer de los aparatos tecnológicos y sus productos culturales. Proyectos: theme parks, corpus fantastica MOO, manifiesto, all.new.gen, spiral.space, y bad.code. Inglés.

critical art

works

last update: January of 2005

"the art worried about social and political questions acts its as fundamental: to raise questions to the hunting of answers that illuminate the moral obligation that all we have of not accepting like best of the possible worlds the one that we have inherited of history ". Francesc Towers.

Eluding labels, or the capacity of critic and evolution. All the proposals of 0 and of 1 they question the extended mediatic simulation in our society, the capacity of the network to adapt to the traditional market of the art and the myth of the accessibility and the privacy of the information. Its page shows a coherent trajectory that evolves from three types of projects. **SIMULATION** it contains the page of Danko Manver, the nonexistent artist, and a peculiar version of the Web of the Vatican. **DUPLICATION** it gives access [to a copy of Art. Teleportacia](#), the commercial gallery of net.art of the Russian Olia Lialina, whose first titled exhibition Miniatures of the Heroic Period it welcomed works of Alexei Shulgin, Heath Bunting, JODI and of the own Olia Lialina, this last one sold a private collector (). From its pages you can accede to works without paying a duro. Also it contains a copy of **JODI** and of the elitist and mysterious HELL.COM. Its following initiative was based on **ACCESS** : life_sharing (anagram de"file sharing") permire to the user to enter its computer and to copy everything what wishes. Detailed information (bio, articles and connections in the Web of [the Walker Art Center](#) . **VIRUS**: In the Biennial of Venice 2001 they appeared under the Pavellón of Slovenia: in the project [Absolute One](#) , 01.org epidemiC was associated with [the group](#) to expose a new denominated virus [biennale.py](#) , conceived specially for this event. The day of the inauguration the virus introduced itself, but also public was made his source code while he provided to affected the anti-virus and the instructions of

his desinstalación. Reena Jana writes on it in a complete article of titled Wired [Want to See Some Really Sick Art?](#). **PROPERTY:** The day of the inauguration of [the Korea Web Art Festival 2001 01.org](#) it took advantage of to develop the FTPermutations [project](#), that consisted of hackear temporarily the official Web of the Festival interchanging the names and works of the artists who took part in the sample and causing a confusion that did not excite its organizers. **MONITORING:** [VOPOS](#) is a project that used and mixed the three types of networks: telephone, satellites and Internet. During almost a year, both members of [01.org](#) always they were controlled, because both took transmitter GPS that its exact position in the urban surroundings sent its data to the satellites with the objective to constantly transmit to his website. A software drew in a digital geographic map the precise place where they live, establishing the trajectory that describes all their movements. In [The World in Onés Pocket?](#) of the Springerin magazine, Tollm Side analyzes the project.

[NikeGround](#) Its last action in the 2003 was east project, made next to the cultural group Public Netbase of Vienna. And it was inaugurated very mediatically with a surprising holder that sent Austrian newspapers in the month of October: [Nike buys streets and seats](#). The news took place in a corner of the main seat of Vienna where it had appeared an intelligence-gathering post sponsored by Nike that announced the name change to the citizens: "the Karlsplatz will happen to be called Nikeplatz". The proposal was completed with the announcement of the imminent positioning of a monument that would reproduce the famous logo of the mark (Swoosh) and with this Web. English.

[Amy Alexander](#)

Artist interested in net.art, the videoinstalación and the animation by computer. This page gives access to the project [Multi-Cultural Recycler](#), based on the recycling of the takings of different *webcams* from monitoring around the planet. One of its options chooses three of random way, and another one -"Make your own Cultural Compost" - it allows to choose to the user three particular views or to use the recycled images by previous visitors. In [Gallery of Recyclings](#) the artistic works of all the users are exposed. *A page with views* that deals with the ubicuidad, the reapropiación and the same pleasure of the glance... or a creative game of collage for onlookers.

Its last project is [plagiarist.org](#) (1998-2000), an artistic space with projects made from "plagiarized materials" of Internet, and whose pieces, often satirical, treat on the property, the appropriation and the infinite resources of the Web. The projects of [Plagiarist.org](#) also have appeared in the collections of [The Somnoliquy Institut](#) and [Detritus](#), among others. Specially recommendable its Manifesto. English.

[Luis André. E-judo](#)

This peculiar proposal is in fact one tool to the service of critical routes by the network that arranges the artistic creation with the utility of a new technological resource. Its operation depends on an EMITTER, that sail according to its own criterion, and a RECEIVER, that is dedicated to observe as the other users sail (or emitters). The basic objective of this project is to elude the traditional finders deliberately so that they are the own users who show their personal routes to us; something as well as to try to know what is what the others look for "", but without intermediaries. Spanish.

[Lucas Bambozzi. meta4walls](#)

This line is first of a series of projects on - **4 WALLS PROJECT** - on interactive systems that deal with the monitoring, the appropriation, the subversion, the privacy, the power and the resistance. [meta4walls](#) it simulates a species of put-monitoring in the network through the habitual mechanisms that are used to collect personal and another data type (forms, cookies and questionnaires). Bambozzi invites to us to visit a few illicit connections and to accede to "secret" information, with the intention to demonstrate the fragility of some systems, but also sugeriendo that we are being observed and putting in danger our privacy. English.

[Rachel Baker. Trina Mould. METRIC TON](#)

Besides to mean 'trade mark', **METRIC TON** they are the initials of Trina Mould, hypothetical member of [irational.org](#). Their works question the commercial strategies, the questions of copyright, rights of author, appropriation of data and the notion of original and copy. The works of Trina Mould are not documented; that is to say, which it is not possible to be acceded directly to them from a connection indicated in the main page, since it conceives east type of navigation as something specially I expire. The most direct form to arrive is through byways, leafing through and exploring sites affiliated with its space. English.

[James Baumgartner. Voteauction.com](#)

Page devised by the young person James Baumgartner and later absorbed by the group [rtmark](#). Its proposal raises to auction the presidential votes of the citizens to the best corporative postor. In March of 2000 it appeared this Web that proposed to the disillusioned ones and/or doubtful North American voters to sell his votes facing the following presidential elections (7/11/2000) commanded by Gore and Bush. The operation was completed with the purchase of these same votes by private companies that had to bid up to each other to obtain them; thus, week to week, the users could verify through a simplified informative panel the quotation of these votes based on the state to which they

belonged. Of course, one was a simple project of simulation that Baumgartner was in charge to update periodically with invented data, but the mediatic repercussion was not made hope: the articles of press and the televised interviews were numerous. The journalists who covered history could not avoid to mention what his author was hoping: that the private companies always have bought votes during the North American elections.

[Hans Bernhard.com](#)

This is the page mother who contains all products, projects, publications, photographs, films and texts on the pop-star of Internet, artist hardcore, radical maníaco and dissident businessman Hans Bernhard (alias e01, etoy. BRAINHARD, hans_extrem, or Dr Andreas Bichlbauer, among others...). Its style has been described as a mixture between Andy Kauffman and Jeff Koons, their actions halfway are between those of Matthey Barneys and John Lidon, and its art has catalogued between duchampiano and beuysta, although what better it defines its philosophy of life is its motto: "it is different because it is fundamentally different" . Hans Bernhard is charter member of [etoy.com](#) - whose digital [initiative hijack](#) took to him to gain a Golden Nica in 1996- and also it is the main impeller of [ubermorgen](#) , which [V]ote-auction is behind the excellent [subversive projects](#) , [NAZI-LINE](#) and [IPNIC](#) .

Joseph Beuys

The intention of the art is to make people free, therefore, for my the art is the science of the freedom. Artist-thinker (1921-1985) who questioned the traditional academic parameters and worked in his own material conception of the sculpture using nontraditional and questioning the myth idea. It developed a theory of the systematic, holística art and to interdiscipline from its own philosophical and scientific ones. Theory of the Social Sculpture it presented/ displayed the principle of creativity of the artistic practice like model of inherent the creative aspects to all social process. In 1961, Professor of Monumental Sculpture of the Academy of Art of Düsseldorf was named, becoming the most charismatic artist-educator of our century. These three pages document to their life and its work through a exhibition, a selection of texts and a work:

[Joseph Beuys. Multiples](#). Excelente exposición organizada en el Walker Art Center de Nueva York que contenía, además de las obras, un hiperensayo de Julie Luckenbach: [BEUYS/LOGOS](#) y un trabajo de Piotr Szyhalski: HARVEST. También contiene los debates que se llevaron a cabo en La Oficina de Información preparada al efecto durante los días de la exposición, un espacio-galería creado según el concepto de Beuys de oficina-estudio-galería abiertos como forums de debate. Inglés.

[Athena - Joseph Beuys Online Index](#). Directorio de temas y conceptos relacionados con el trabajo artístico de Joseph Beuys y sus teorías sobre el arte social. Artículos, ensayos, entrevistas de y sobre Beuys. Inglés.

[7000 Oaks](#). Esta página del Dia Center de Nueva York documenta el proyecto de Beuys [7000 Robles](#) que se inició en la Documenta 7 de Kassel en 1982 y consiguió completarse en la Documenta 8 de 1987. La idea consistía en plantar siete mil árboles emparejados con columnas de piedra de basalto y Beuys la concibió como la primera parte de un plan de plantación que debía extenderse por todo el mundo, en una misión global destinada a moficicar los efectos ambientales y a provocar el cambio social. Ensayos, fotografías y un vídeo. Inglés.

[The Social Sculpture Research Unit](#). Esta idea desarrollada por Beuys en los años 70 se refiere a una concepción del arte como un proceso interdisciplinar y participativo donde el pensamiento, el discurso y el debate son considerados "materiales". A partir de esta percepción, todos los seres humanos pueden ser "artistas" responsables de la configuración de un orden social democráticamente sostenible. Esta Unidad de Investigación sobre la Escultura Social, con sede en la School of Art, Publishing and Music de la Universidad de Oxford, se basa en el concepto propuesto por Beuys para promover la colaboración entre artistas y teóricos de cualquier disciplina creativa con el objetivo de promover la reflexión crítica acerca de la escultura social.

Natalie Bookchin

Artista y teórica de la Red que ha ofrecido siempre una visión crítica de los aspectos éticos y políticos de nuestra sociedad y de la cibercultura. A lo largo de su trayectoria, ha formado parte del colectivo activista RTMark y ha colaborado con el artista ruso Alexei Shulgin en proyectos artísticos, como [The Universal Page](#), y en proyectos teóricos, como [Introducción al net.art 1994-1999](#).

[Metapet](#). El primer juego de mascotas virtuales y transgénicas del mundo. Juego on line sobre animales domésticos que sitúa su acción en una empresa especializada en biotecnología. El usuario actúa como jugador-empresario que deberá adoptar un metapet, o humano modificado genéticamente, y ganar puntos para dar de comer, reponer y manipular a su animal. Una mala decisión del usuario/empresario puede conducirle a un descenso en los resultados que se traducirá en ineficiencia, en la degradación del trabajo, en la pérdida del seguro o del puesto, en hambre y, en último extremo, en la muerte de su animal/trabajador. Si, finalmente, el jugador no consigue los puntos necesarios puede optar por otro juego; sólo entonces podrá participar en el "juego del conocimiento", donde puede experimentar sensaciones y retos de la vida real y participar en otros juegos on y off line que conseguirán megapuntos para su animal. Como en todos los juegos de Bookchin, en éste, tampoco lo más importante es ganar. Inglés.

[Kendall Bruns. AfterMichaelMandiberg](#)

Del arte al Comercio. Las obras de arte digitales pueden no ser únicas.

1) A finales de los años 70, el artista conceptual Sherrie Levine re-fotografiaba las fotografías documentales que en

1936 hiciera el famoso fotógrafo Walker Evans y las presentaba como nuevos originales.

2) [Michael Mandiberg](#) es un artista que se ha dedicado a escanear tanto las fotografías de Sherrie Levine, como las de Walker Evans para colocarlas en dos webs: [AfterSherrieLevine.com](#) y [AfterWalkerEvans.com](#). Los usuarios pueden descargarlas e imprimirlas con una resolución muy similar a las originales (las de Evans y las de Levine); es más, también puede conseguir un "certificado de autenticidad" -como auténticas obras de Mandiberg.

3) Kendal Bruns ha ido un poco más lejos todavía. Ha creado la página [AfterMichaelMandiberg.com](#) con un look, unos textos y unas imágenes idénticas a las páginas originales que creó Michael Mandiberg ([AfterSherrieLevine.com](#) y [AfterWalkerEvans.com](#)).

4) El diálogo que examina las relaciones entre las auténticas obras originales y las reproducciones de esos originales continúa con esta web del propio [Kendall Bruns](#) denominada [AfterKendallBruns](#). AfterEnglish.

* [Heath Bunting](#)

"Diseñador, delineante, fotógrafo y net.artista inglés. Tras una brillante carrera como estudiante, Bunting ha conseguido un éxito internacional a sus veintipocos años y ha consolidado su posición como mejor artista británico de su generación. Este increíble éxito, no sólo se ha basado en el instinto, talento y versatilidad de su trabajo, sino también en su carismática personalidad, la cual le ha convertido en una figura popular incluso para aquéllos que no están particularmente interesados en el arte". Esto es lo que asegura su página, aunque... **yo no me lo acabaría de creer del todo**. Entre los proyectos de este **activista** británico destacamos algunos:

En [readme](#), Bunting se describe a sí mismo sólo a través de numerosos enlaces diseminados por la red. Se trata de un artículo de periódico titulado "Posee, sé poseído o permanece invisible" que contiene todas sus palabras subrayadas como hipertextos que enlazan dominios corporativos (absolutamente a todas les sigue el consabido .com). De hecho, el texto satiriza la comercialización a la vez que se resiste a ella.

En [CCTV. World Wide Watch](#) Bunting propone al espectador-voyeur vigilar desde su ordenador las actividades criminales que puedan presentarse, a través de cámaras que filman permanentemente, y en plano fijo, desde las calles de diferentes ciudades del mundo. Bajo cada plano tomado por la cámara, hay un espacio en blanco que propone describir el crimen o la actividad sospechosa que está sucediendo para faxearla directamente a la policía local. Una vez se ha validado el fax, el espectador ve como se añaden a su pantalla el conjunto de contribuciones precedentes de todas las ciudades vigiladas. Consecuencias de la responsabilidad cívica en la era del Gran Hermano. [Net.art Consultants](#) es un espacio que permite a los artistas donar sus obras de net art a los mayores coleccionistas (instituciones, museos, festivales...) con el fin de impulsar la economía del net.art. Coleccionistas: Walker Art Center, art.teleportacia, ICC - Tokyo, Museum of Modern Art - New York, Ars Electronica Center -Linz, Zentrum for Kunst and Media, DIA Centre, Institute of Contemporary Arts - London. Si se accede al listado de todas las donaciones se pueden ver algunas paradojas, como la donación de una misma obra a TODAS las instituciones, la donación del ICA (Institute of Contemporary Arts) al Ars Electronica Center de Linz, o la donación del MOMA al propio MOMA de Nueva York.

Bunting también ha trabajado junto a [Olia Lialina](#), en la obra [Identity Swap Database](#), una base de datos destinada al intercambio de identidades. Previa cumplimentación de un formulario con sus datos básicos, el usuario puede adquirir una nueva identidad -temporal o permanente- e incluso puede donar la suya para que otros la utilicen. Inglés, ruso, español y alemán.

[BorderXing Guide](#) es un espacio que contiene documentación sobre una serie de recorridos que atraviesan los límites nacionales, sin impedimentos de aduanas, inmigración o policía fronteriza. Paradójicamente, el website no es accesible a cualquiera que tenga una conexión a Internet: quien quiera visitarlo debe desplazarse físicamente hasta uno de los lugares designados por el autor, o bien conseguir una autorización de éste a través de la red (se puede consultar la lista completa en <http://irational.org/borderxing/>). Como podemos suponer, el proyecto se dedica a invertir los papeles entre dos ideas preconcebidas: una, que las fronteras restringen el movimiento; y dos: la idea de supuesta libertad relacionada con el concepto de Internet como un espacio sin fronteras.

[Vuk Cosic](#)

En esta página referenciada con su nombre se encuentran la mayoría de sus trabajos, inclusive el mirror de la Documenta X que fusiló para evitar que desapareciese toda esa información cuando acabó la muestra. Esta particular obsesión por la conservación de datos, ha llevado a Cosic a generar [La Historia Oficial del Net.art](#), que encontraréis en el volumen I [History of art for airports](#) y en el volumen II, [Classics of net.art](#). En esta última obra, el misterioso editor Keiko Suzuki nos presenta un libro que valora las ideas de una joven generación de artistas, pensadores, visionarios, críticos, periodistas, científicos, y narradores de la Revolución Digital. Un catálogo presenta las cubiertas de los libros de la colección, así como una biografía-sumario de los artistas implicados; a saber: Heath Bunting, Jodi, Alexei Shulgín y el propio Vuk Cosic. Después, el visitante que desee adquirir los libros puede contactar con Keiko Suzuki para conocer el precio de las obras,...que pueden ser editadas en diferentes calidades de papel. **La Historia 5 años del net.art ordenador como soporte publicada en forma de catálogo proceso tradicional de publicación industrial para la posteridad legitimando las pruebas por encima de las propias obras**. Inglés.

* [Critical Art Ensemble](#)

Colectivo de cinco artistas y activistas (Steve Barnes, Dorian Burr, Steve Kurtz, Hope Kurtz y Beverly Schlee)

dedicados a explorar las intersecciones entre arte, tecnología política radical y teoría crítica. Ellos han desarrollado el concepto de **Desobediencia Civil Electrónica** a partir del modelo de desobediencia civil callejera. Desde su página principal se puede acceder a sus **Proyectos Tácticos** y a sus **Proyectos de Bio-tecnología**, así como a sus excelentes publicaciones online en formato PDF (que también ha publicado Autonomedia). Sus textos representan una importante contribución crítica que argumenta el ataque contra el autoritarismo del orden social y la ideología del poder. **EBooks**: *The Electronic Disturbance*, *Electronic Civil Disobedience*, *Flesh Machine* y *Digital Resistance*. Desde la lista de Nettime se publicaron estas dos entrevistas **CAE interview I** y **CAE interview II** que nos aclaran su trayectoria y sus métodos de trabajo. Inglés.

Minerva Cuevas. Mejor Vida Corporation

Yes, It's FREE! Minerva Cuevas nos recibe en su página con un eslogan que desafía el sistema económico de las corporaciones a la vez que subvierte la concepción mercantilista del arte. Ella misma define su web como: "el resultado de la desconfianza en las utopías capitalistas, siendo la subversión una constante dentro de sus procedimientos". Desde aquí distribuye gratuitamente una serie de productos -billetes del metro de la Ciudad de México, tarjetas de lotería, credenciales de estudiante, etiquetas de código de barras...- y oferta servicios –encuestas, cartas de recomendación, servicios de limpieza, donaciones públicas...-; su objetivo: parodiar las estrategias de difusión y consumo a través, precisamente, de una corporación. Español e inglés.

DigiCrime Inc.

Organización de hackers que ha formado una empresa especializada en acciones criminales y que ofrece todo tipo de servicios y productos desde la red. Su peculiar **equipo de especialistas** es capaz de realizar cualquier acción ilegal que se pueda hacer utilizando un ordenador: pornografía, teléfonos, falsificación de tarjetas de crédito, venta de passwords, suplantación de identidades,... incluso han inventado un triturador de documentos que guarda una copia en su memoria mientras destruye el documento. La conciencia social y la ironía del científico y matemático **Kevin McCurley** tiene mucho que ver en todo esto... "DigiCrime es una broma. Es mi perversa manera de ridiculizar la vulnerabilidad que padece nuestra sociedad desde que entró en la era de la información. O mejor dicho: no es una broma, puesto que el futuro de nuestra sociedad depende de nuestra habilidad para proteger la información. Así es que se trabaja con la realidad de la vida. Inglés.

Ricardo Domínguez

Ricardo Domínguez es un **activista de la red** en cuyo currículum figura ser co-editor de **The Thing**, fundador de **The Electronic Disturbance Theater**, miembro de **Critical Art Ensemble** (1987-1994) y enlace de la **Guerrilla Zapatista** en el ciberespacio. Su página funciona como un portal a los numerosos proyectos críticos individuales y colectivos que ha realizado, tanto en el terreno artístico como en el entorno más teórico de la red. Su intervención más conocida -y más interesante- fue la que tuvo lugar en el Festival de Ars Electrónica del 98 (INFOWAR) donde su grupo Electronic Disturbance Theater presentó **SWARM**, un proyecto basado en la Desobediencia Civil Electrónica al que se sumaron 20.000 personas de todo el mundo para conseguir bloquear la web de la presidencia mexicana (en apoyo al zapatismo) el Pentágono (contra el ejército de los EEUU) y la bolsa de Frankfurt (símbolo del capitalismo internacional). Inglés.

ETOY. La primera pandilla de gamberros de la autopista de la información.

Etoy es un grupo de artistas que actúa en Internet con proyectos críticos que cuestionan el poderío de las grandes corporaciones de la red. En 1996 consiguieron el premio Golden Nica de Ars Electronica (Linz) con **["the digital hijack"]** -el pirateo digital- un proyecto basado en la utilización de los buscadores de Internet y cuyo objetivo era demostrar cómo un puñado de compañías controlaban el destino de millones de internautas. La acción comenzó el 31 de marzo y finalizó el 1 de agosto de 1996. Durante este período, los software-agents de etoy generaron cientos de páginas trampa que contenían una de las 2400 palabras clave más populares (como porsche, penthouse, madonna, fassbinder, etc...), las cuales se incluían automáticamente en los principales buscadores internacionales. Muchas de estas páginas trampa -de las cuales todavía podéis encontrar algunos ejemplos en su web- fueron anuladas, pero otras todavía no han sido localizadas hoy en día, y aunque la acción ya finalizó, ellos aseguran que el proyecto continuará o bien hasta que pirateen un millón de páginas o hasta que etoy sea eliminado de las principales compañías de buscadores. Terrorismo digital y entretenimiento inteligente para la nueva generación. Desbaratar la palabra clave: un nuevo estilo de vida en Internet.

ETOY: LA GUERRA. En 1995, un grupo de artistas suizos compró el dominio web **etoy.com**. Dos años más tarde, en 1997, una tienda online de juguetes compró el dominio **eToys.com**. A finales de 1999 estos últimos optaron por litigar contra **etoy.com** por su empleo del dominio web. Un juez de Los Angeles falló favorablemente a **eToys.com** y forzó a **etoy.com** a cerrar su website y a dejar de utilizar el nombre **etoy.com**; es más, prohibió a los artistas vender su obra en los USA. **Contraataque:** Tras ser vapuleada en newsgroups, mailing lists y ruedas de prensa en el MOMA de Nueva York, **eToys** anunció que no iba a seguir con el juicio. Ello fue debido, sobre todo, a los "sit ins" virtuales del 15 y 25 de diciembre que contaron con el apoyo de miles de simpatizantes, intelectuales y defensores del discurso libre y la expresión artística en Internet, y que acabaron generando problemas operativos a la compañía (disminución de sus ventas electrónicas y descenso de su cotización en bolsa). **etoy** desarrolló la **Toywar**, un espacio donde figuran todas las medidas concertadas de ataque y donde se seguía la guerra paso a paso (historia y acceso a los artículos publicados, no sólo en espacios alternativos, sino en los principales media: New York Times, Wall Street Journal, Le

Monde, CNN). **Finalmente**, y tras años de pleitos, eToys cayó en la bancarrota y desapareció dejando al grupo de artistas suizos con la victoria definitiva ¡eToys está muerto y **RTMark** lo festeja! Inglés.

N Rafael Fajardo. Crosser y La Migra

Estos trabajos exploran la complejidad de la situación real en la frontera EEUU/México. A través de ambos juegos, su autor nos propone una doble reubicación invitándonos a colocarnos en el punto de vista de un inmigrante ilegal y de un policía de frontera que intenta evitar la entrada en su territorio. La página también enlaza con un ensayo de Fajardo titulado **pixels, politics, and play** y publicado en intelligent agent vol. 3 no. 2. Inglés.

First Floor

Proyecto indefinible, lleno de recovecos y desvíos,... pero **muy recomendable**. Excelente. Inglés.

Fred Forest

Página central de este artista francés que enlaza con numerosos textos teóricos y con proyectos comprometidos. Entre ellos destacan, un mercado de obras de arte virtuales y una revista concebida como medio de información alternativo a la prensa oficial, institucional y comercial. También acceso directo a **Forest vs Beaubourg**, donde el artista documenta el proceso que está llevando a cabo contra el Centro George Pompidou de París por su falta de transparencia: Forest denuncia que no se respeta el espíritu de la ley de 1978 sobre la transparencia de la contabilidad pública. Francés e inglés.

Guillermo Gómez-Peña y Roberto Sifuentes. The Temple of Confessions

El artista mexicano afincado en Estados Unidos, Guillermo Gómez-Peña y el hispano nacido en Los Angeles, Roberto Sifuentes se dedican a explorar el mestizaje cultural y las relaciones Norte/Sur, de manera que todos sus trabajos artísticos y teóricos intentan desvelar los laberintos de la identidad y los principios de la nacionalidad. Ambos han concebido este **Templo de Confesiones** como un documento que recopila las tecno-confesiones de miles de usuarios para descubrir los tópicos y prejuicios existentes acerca de las minorías étnicas. El visitante puede optar por varios cuestionarios organizados temáticamente bajo las palabras clave de utopía, rumor, raza, identidad, género y deseo. Gómez-Peña ha utilizado este material para crear unos **etnocyborgs**, a los que da vida durante performances (la última en el festival **Sonar** 2000, de Barcelona). Inglés.

Eva Grubinger. Netzbikini

¿Quieres diseñar tu propio bikini? El usuario que puede elegir hasta la talla; da igual que sea hombre o mujer, ahora cualquiera puede ser artista y obtener, incluso, el certificado de calidad del producto, su sello de autenticidad. No se puede esperar menos de quien busca el significado REAL del ARTE como actividad y se plantea cuál debe ser su último fin. Contra la definición del ARTISTA por naturaleza. Inglés.

Ingo Günther

Artista alemán que trabaja con el vídeo y las nuevas tecnologías, demostrando una voluntad crítica en todas sus obras. Actualmente simultanea sus instalaciones con proyectos on line como **World Processor** (1988-2000) o como **Refugee Republic** (1996-2003), un espacio online dedicado a los refugiados de todo el mundo que se mueve entre la ficción (pasaportes para los refugiados) y la realidad (acceso a informaciones exhaustivas acerca de los refugiados). Los usuarios pueden solidarizarse con ellos creando su propio Pasaporte de Refugiado. La web proporciona información real sobre los movimientos de las grandes migraciones a través de mapas y también posee un enlace con el UNHCR, Alto Comisariado de las Naciones Unidas para los Refugiados.

Mario Hergueta. Cybordelics

Cybordelics es la primera red personal de ordenadores on line que nos incita a participar en ella con estas sugerentes propuestas: "¿estás cansado del mismo PC viejo y aburrido mirándote fijamente a la cara? ¿estás cansado del mismo sistema operativo viejo y disfuncional? Quizás sea el momento de evadirse definitivamente del diabólico imperio de Microsoft y de todos sus miserables clones y productos basura construidos mediante un bajísimo denominador común. Si, tu necesitas un PNC PX-2000 (Personal Network Computer), un sistema creado por los genios más geniales, que verdaderamente puede hacer posibles cualquiera de tus sueños. ¡Conéctate y participa!". Encontraréis muchas colaboraciones de los principales autores referenciados en este directorio. Inglés.

Ricardo Iglesias

DIY Do it yourself. Tomando como excusa el texto "**Manual de referencia para el artista de Internet**" de Lourdes Cilleruelo, Ricardo Iglesias se propone "ofrecer una orientación desorientada siguiendo las diferentes secciones en que está dividido el texto, que funcionará como un gran menú, como una estructura hipertextual con múltiples links,

como una interfaz de acceso a las diferentes piezas que se crearán para cada uno de estos enunciados y para los enunciados internos, planteando de una manera abierta los diferentes problemas a los que se enfrenta una pieza de Internet, como la autoría, la accesibilidad, el nombre de los dominios, la incidencia real de las propuestas planteadas, la virtualidad, la presentación formal en un mundo físico, las diferentes formas de interacción, la inexistencia del objeto único, los soportes secundarios, la programación utilizada, la visualización sobre eventos externos, la traducción a otros idiomas (inglés, francés, alemán) o a otros lenguajes (ASCII), la visibilidad de la pieza en la maraña de las redes, la participación por parte de los usuarios, la creación de bases de datos, la utilización de bots y otros miniprogramas, para terminar con la conclusión y dentro del caos correspondiente: **prescinde de cualquier intermediario y erígete como comisario de tu propia obra!!!!**

Dangerous liasons: Arte = Dinero + Política. Este trabajo se centra en la realización de fotografías en el marco de grandes inauguraciones museísticas, bienales, trienales y todo tipo de evento artístico de carácter internacional. La participación de los usuarios es fundamental, ya que son ellos quienes aportan la documentación de las diferentes exposiciones a través de sus imágenes y comentarios. La página web consiste en una base de datos que muestra de manera individualizada y por bloques cada una de las aportaciones. Actualmente están en marcha los bloques que corresponden a las inauguraciones de la Colección del MACBA de Barcelona (2002) y a la exposición "On Translation" de Muntadas (2003). La idea que reside en la base de este proyecto no es la construcción de un ingenuo archivo documental fotográfico, sino algo más crítico y complejo pues la pieza "indaga las relaciones creadas entre estas tres esferas que aparentemente funcionan de una manera independiente, pero que mantienen entre sí profundos vínculos de subsistencia".

Institute for Applied Autonomy

El IAA fue fundado en 1998 por un colectivo de artistas, ingenieros, escritores y activistas que decidieron dedicarse a la investigación de temas relacionados con el espacio público, la libre expresión y la vigilancia electrónica. Asimismo este grupo se interesa por el desarrollo de soluciones tecnológicas que ayuden a los intereses activistas a través de actuaciones públicas subversivas: para el proyecto **Contestational Robotics**, por ejemplo, han diseñado "robots objetores" que responden a las necesidades y al presupuesto de las fuerzas culturales de resistencia. Entre sus trabajos en la red destaca **iSee** una aplicación de Internet que explora los lugares donde se han colocado cámaras de vigilancia en circuito cerrado de televisión (CCTV) en el entorno urbano. .

JODI

UNO - DOS - TRES - CUATRO - CINCO y SEIS increíbles proyectos + **MAP (2000)**

Cuando en 1995, Joan Heemskerk y Dirk Paesmans decidieron crear una página web para mostrar su trabajo fotográfico, cometieron un error fatal que desencajó la página convirtiéndola en un caos de colores y signos. Pero el resultado plástico les pareció tan interesante, tan sorprendente, que dejaron de lado su pretensión inicial para concentrarse en este nuevo descubrimiento. Desde entonces no hacen otra cosa que dar órdenes contradictorias a la máquina con la intención de generar errores premeditados. La característica común a todos sus proyectos es que el usuario se enfrenta siempre a una serie de caracteres parpadeantes, a menudo sin ningún sentido: clickar no hace más que generar una nueva pantalla, distinta, pero siempre parpadeante e ilegible. En alguna de sus propuestas sólo la lectura del código fuente del documento nos permitirá obtener caracteres legibles: se trata de dibujos en ASCII, acumulados sobre las páginas de tal manera que el ordenador los ha re combinado según su propia lógica no visual. Es entonces cuando comprendemos que JODI nos está mostrando la cara oculta del ordenador, lo que está tras la pantalla, el interior de la máquina: paradójicamente, su lenguaje lógico, racional, genera un sin-sentido a partir de imágenes que sí son significantes para nosotros, los seres humanos.

SOD (2001). PROJECT WL_GAME.C Modification. La peculiar concepción de la Red que defiende JODI en todos sus trabajos —basada en la manipulación, la subversión y los errores de programación— se extiende también a este irracional y extraño juego. Aunque **SOD** parte de modificaciones en el código fuente del **Quake** y de **Castle Wolfenstein**, no esperéis encontrar aquí referente alguno; ambos han sido desposeídos de su estética y contenido guerrero para convertirse en un desconcertante entorno minimalista de planos geométricos blancos, negros y grises con los que el jugador interactúa sin ningún sentido, objetivo ni intención. Caos absoluto. Desaparece el condicionante de competitividad, pero arrastra consigo la noción de juego.

untitled game (2002) es un CD y también una web de JODI con doce modificaciones del juego **Quake**. La primera modificación, "Arena", es de un blanco deslumbrante porque toda su arquitectura visible ha sido eliminada, quedando tan sólo los componentes del interfaz y el sonido. En el resto de modificaciones, el sonido también queda intacto de manera que el ataque de los monstruos y sus gruñidos se pueden oír en medio de extrañas composiciones formalistas. Todas estas variaciones presentan una exploración lúdica y descontrolada del sistema **Quake**, un diálogo sobre los entornos en 3D y sobre sus posibilidades.... de volvernos locos.

John Klima. The Great Game

John Klima ha desarrollado numerosos proyectos de software creativo, entre los que destaca este peculiar juego en 3D que se desarrolla en el territorio de Afganistán durante la **Operación Libertad Duradera**. Este representa un mapa en relieve de Afganistán donde se traza el avance de las fuerzas militares norteamericanas en las fortalezas talibanas. La evolución del recorrido se inicia el 7 de octubre de 2001 y cada minuto nos avanza la información de un día; una progresión que se basa en las estadísticas desclasificadas de la web del Departamento de Defensa de EEUU. Desafortunadamente, el proyecto se acaba de ampliar con la sección **Iraq Expansion Pack & Campaign Maker v1.0!** Inglés.

Knowbotic Research

El genérico **IO_Dencies** ("tendencias") es el proyecto matriz del grupo Knowbotic Research básicamente interesado en explorar las posibilidades de intervención y actuación en los complejos procesos urbanos. Esta serie de proyectos muestra diferentes cortes topológicos a través de un montaje heterogéneo de espacios físicos, imaginaciones urbanas, organismos conectores y experiencias individuales, pero son presentados como espacios urbanos de acción y reflexión públicamente accesibles y modificables. En cualquier caso, el objetivo de Knowbotic Research no es desarrollar avanzadas herramientas para la arquitectura y el diseño urbano, sino crear situaciones que nos permitan repensar la planificación urbana y la construcción. Inglés.

Aleph ha colocado un mirror en castellano de **IO_LAVORO IMMATERIALE**, una base de datos colectiva en Internet, generada por Maurizio Lazzarato (teórico político), Luther Blisset (colectivo de activistas media), Michael Hardt (filósofo), Hans Ulrich Reck (teórico de los media), Enzo Rullani (economista) y Laia Vantaggiato (periodista). "Esta base de datos funciona como una máquina de discurso abierto que cuestiona las actuales condiciones de acción y producción creativas en el campo social. Cada uno de los participantes desarrolla un mapa individual con información textual (en italiano y en inglés), que evoluciona hacia una topología discursiva en continua transformación. La información de cada uno de los mapas de los distintos participantes se auto-organiza en un nuevo mapa. En éste, las relaciones entre la información añadida y manipulada por los diferentes participantes será visualizada como movimientos y campos de fuerza". Esta página incluye 4 textos principales traducidos.

Minds of Concern: Breaking News Esta instalación interactiva plantea una revisión crítica de los conceptos de libertad, seguridad y vulnerabilidad del metabolismo global de las comunicaciones telemáticas. Por medio de una interfaz llamada Public Domain Scanner, el usuario puede analizar las principales páginas de grupos, asociaciones y ONGs relacionadas con los distintos movimientos civiles en Internet, y detectar su grado de vulnerabilidad en la red. Los resultados del análisis se visualizan a través de señales de luz, sonido y flujos de datos proyectados en el espacio expositivo sobre un tapiz de largas tiras de plástico entrelazadas. Con ello se genera una zona de alerta transitable que conecta las redes virtuales con el espacio real. Inaugurada en la exposición Open Source Art Hack del New Museum de Nueva York e inmediatamente censurada, esta obra fue presentada con éxito en la muestra **el banquete** que tuvo lugar en España y Alemania.

Andreja Kuluncic. Closed Reality: Embryo

Proyecto que Andreja Kuluncic desarrolla junto a Gabrijela Radek, Matija Puzar e Ivo Martinovic. **Embryo** es un experimento basado en la interacción entre una serie de usuarios que escogen diferentes opciones para **crear un nuevo ser humano** que, tras la primera fase, entra en una embrión-galería, junto con los datos asignados por su creador. La segunda parte del proyecto consiste en una comparación entre la sociedad de humanos creados por los usuarios de Internet y la sociedad real. "Si podemos conocer el ADN y manipular el código genético, las generaciones futuras pueden encontrarse a nuestra merced... Este proyecto no es un juego ficticio y tampoco pretende popularizar descubrimientos científicos. Se trata más bien de una observación experimental sobre el desarrollo de la consciencia y de la ciencia. Propone una simple cuestión: ¿Hasta que punto estamos preparados para participar en todo lo que hemos hecho posible y en aquello que ansiamos hacer posible por nosotros mismos?" Inglés.

La Sociéte Anonyme

Grupo de artistas y teóricos de composición variable, fundado en 1990 y dedicado específicamente a investigar y desarrollar experimentalmente las relaciones entre las prácticas artísticas y el pensamiento crítico. Ha producido numerosas obras, incluyendo textos, videos, instalaciones, piezas para catálogo y obras para la red. Actualmente trabaja exclusivamente en la problemática de la red, en cuanto relacionada con la extinción crítica del existir separado de lo artístico en las sociedades contemporáneas. Inglés y castellano.

Latenta. ¿Quién es tu artista favorito?

Latenta te ofrece la oportunidad única de descubrir como es tu artista favorito: su perfil psicológico, el tipo de trabajo produce, su actitud hacia su obra, su público. Aquí tienes un peculiar cuestionario cuya finalidad es detectar tus gustos y preferencias en cuestión de arte... y también tus trazos psicológicos más ocultos. Excelente proyecto de **The Somniloquy Institute**. Inglés y francés.

Tina Laporta. SHIFTING

¿Dónde estará el cuerpo en el futuro? Todos los proyectos de net.art de Tina Laporta están incluidos en esta página que pretende explorar la potencialidad y el significado del cuerpo en el nuevo entorno de las comunicaciones tecnológicas. Un intento de reafirmación de la identidad femenina y la individualidad en una era de intensa transformación tecnológica. La tendencia de general de todas sus obras es claramente feminista y queda reflejada en títulos como **Women and Performance** y **The World's Women Online**. Entre sus obras más recientes, **Future body version 1.0**, **Alterities** y **Unveiled Imprints**, una web de pantalla única que muestra el deseo femenino mediante imágenes pornográficas. Inglés.

Peter Luining. FF00FF Remixes

Remezclas de las piezas clásicas del net.art: obras de JODI, antirom, turux, Ifoundation, kalx, antiorp, etc. Peter Luining estudió filosofía contemporánea y estuvo dirigiendo video-clips y haciendo trabajos comerciales con animaciones en 3D hasta que, en 1996, se dedicó por completo al net.art. Sus proyectos han sido bastante minimalistas y siempre ha mantenido un carácter experimental en todas sus propuestas. Inglés.

Conor McGarrigle. Spook

El irlandés Conor McGarrigle, net.artista y fundador de [Stunned.org](#), ha creado este proyecto artístico que aborda las cuestiones sobre vigilancia y rastreo en la red a través de una web interactiva basada en las convenciones de los videojuegos. Spook rastrea los movimientos de un servidor militar descubriendo su identidad, su ubicación geográfica, sus webs y también sus hits y sus condiciones de accesibilidad. El resultado es un verdadero mapa del servidor representado e interpretado gráficamente mediante animación y datos en bruto. Según Conor McGarrigle se trata de “una fascinante oportunidad de adquirir una nueva percepción de la estructura y de las actividades online de este particular sector del complejo industrial militar, y también de preguntarnos a nosotros mismos sobre la propia naturaleza de la red”

Jenny Marketou. Smell.bytes (TM) (1998-1999).

Smell.bytes es el entorno online de [Chris.053](#), un *bot* que trabaja las 24 horas del día en Internet viajando por nodos y direcciones y que se dedica a capturar los olores corporales de los habitantes de ciber-cafés y de chats a través de sus perfiles fotográficos. Esta especie invisible de la red cuenta con una base de datos de 7.000 olores y una colección de perfiles humanos que evalúa según su simetría, belleza y olor corporal para determinar qué clase de personas son y cuál es su valor en esta sociedad. Jenny Marketou lo ha creado como “un *serial sniffer*, un hacker, un intervencionista que trabaja desde una posición simbólico-política y un artista”. Este proyecto contiene dosis de tecnología de la información, de espionaje, de inteligencia artificial y de arte contemporáneo, pero sobre todo cuestiona el valor de la privacidad, la autonomía individual y el cuerpo. También hemos seleccionado este texto de Sonia Papa titulado [Smell bytes: an outline for a cannibalistic serial murder of beauty mystery](#). Inglés.

[Taystes \(2001\)](#). Influenciada por Smell.bytes, esta reciente obra de Jenny Marketou está concebida como una herramienta online que permite al usuario un acceso ilimitado al mundo de las redes e infraestructuras de la comunicación tales como webcams, chat rooms y flujos de información que circulan en los espacios de vigilancia de la red.. Inglés.

* Antonio Mendoza. Subculture

Las obras de Antonio Mendoza son una especie de metacollages realizados a partir de imágenes, sonidos y scripts pirateados de revistas, libros, CDs, y webs corporativas y pornográficas (una acertada combinación). El propio autor define Subculture como “un paraíso autista repleto de información pero salteado de fastidiosos motivos repetitivos” donde la navegación randomizada puede conducirnos a curiosas interferencias entre las imágenes. Quizás la forma más precisa de definir su trabajo sea a partir de sus propias palabras clave: war, underground, posthuman, ironic, interface, corporate, commercialization, browser abuse, audio, animation, robot, machine, desire, artificial life, sex, japanese comic, chaos, appropriation, collage, piracy, virus worship, anti-copyright, corporate logo sabotage, disinformation, spam art,... en cualquier caso, un cóctel epiléptico que aborda de la manera más ácida posible todas esas referencias y acontecimientos globales que inevitablemente afectan a nuestras vidas. Este proyecto principal, junto con todas las derivaciones posteriores, enlaza con otros de sus espacios más emblemáticos: [Mayhem](#). Inglés.

Sally Minker y Jennifer Sloan. Artist Protection & Benefit Program

¿Que sucede cuando muere un artista? Pues que la cotización de su obra sube como la espuma. Pero claro, el ya no puede disfrutar esta nueva situación. Sally Minker y Jennifer Sloan han encontrado la solución a este problema creando un “Programa de Protección a Artistas”, similar a los “programas de protección de delatores” que conocemos por las películas americanas, y que consta de tres pasos: En primer lugar se trata de eliminar al artista que lo solicite del mundo del arte, después se le proporciona una nueva identidad en algún lugar paradisíaco donde pueda seguir creando lo que verdaderamente le apetezca y, finalmente, sólo queda cobrar los dividendos que le proporcionen la venta de sus obras “en vida”. Todo está controlado, con total garantía.

MONGREL

Mongrel es el nombre de un colectivo inglés de artistas Matsuko Yokokoji, Richard Pierre-Davis, Harwood y Mervin Jarman que, según sus palabras "trabajan juntos para celebrar los métodos de la ignorante e inmundia cultura urbana londinense". En todos sus proyectos poseen una fuerte implicación social, ya sean artísticos, creación de softwares o puesta en marcha de talleres. En ellos obligan al usuario a enfrentarse a sus propios prejuicios raciales culturales, biológicos y tecnológicos: de hecho todos sus trabajos investigan el arraigo del determinismo biológico racial en la cultura y en la vida diaria. Natural Selection, por ejemplo, simula la apariencia de un motor de búsqueda que "funciona a plena potencia" cuando el usuario introduce un término racista o pornográfico, enviándole precisamente a sitios web que se dedican a desenmascarar el racismo, el clasismo y la xenofobia en la red. Y Heritage Gold es un software gratuito con vocación activista que sustituye las herramientas y comandos convencionales del Adobe Photoshop por términos racistas y clasistas. Los menús del programa permiten al usuario añadir, modificar, o reducir

los niveles de las características de cada raza, ya sean chinos, africanos, indios o caucasianos. Desde su página se puede acceder a otros proyectos: Rehearsal of Memory, National Heritage, Linker, and Uncomfortable Proximity. Inglés.

MTAA. MT Enterprises World Wide

MTAA es una iniciativa de colaboración artística y empresarial entre los artistas neoyorkinos **Mark River y Thomas Whid**. Su trabajo crítico explora la reconciliación entre las prácticas y estrategias artísticas contemporáneas e Internet. Este es el caso de TIME!®: the Nostalgia-Free History Sale, donde venden ediciones limitadas de dibujos; The Visual-Text Art Venue (V-TAV), una galería de información contemporánea; o Direct-to-Your-Home Art Projects (DYHAP), un proyecto que utiliza la comunicación por e-mail en las principales listas de correo artísticas para enviar las instrucciones de montaje y colocación de obras de arte en nuestros propios salones; ...aunque quizás uno de sus mejores y más populares trabajos sea el **Simple Net Art Diagram**. Inglés.

Muntadas

The File Room es un proyecto pionero en la web sobre **la censura en el arte y la cultura**. Consta de dos partes: una instalación, destinada a exhibirse en espacios físicos, y un archivo en la red que permite aportar información relacionada con el tema. Cualquier usuario que sepa de alguna obra censurada, esta invitado a aportar todos los datos que considere necesarios; después esa información estará al alcance de todos aquéllos que deseen consultarla en la web. Proyecto desarrollado por la Randolph Street Gallery de Chicago en colaboración con el Electronics Visualization Laboratory de la Universidad de Illinois (Chicago). Existen numerosos artículos sobre este importante artista mediático, pero desde aquí hemos seleccionado los siguientes textos online: **A De-cafinated Experience (of Net.Art)**, una entrevista realizada por Josephine Bosma y publicada en inglés en Telépolis y un artículo-entrevista de Robert Atkins titulado **Censor Sensibility: Antoni Muntadas on the "Media Landscape"**. Inglés. En **On Traslation**, un proyecto concebido para la Documenta X de Kassel, Muntadas parte de una breve frase formulada en inglés **-Communication in systems provide the possibility of developing better understanding between people: in which language?-** y posteriormente sometida a sucesivas traducciones de una lengua a otra, hasta un total de 23, pero sin volver a remitirse al enunciado original. "Como en el juego infantil del *teléfono* –metáfora de los propios juegos interactivos y de la conexión en la red-, el sentido literal de la frase original va transformándose y adquiriendo giros imprevistos en los sucesivos rizos de una espiral". Muntadas lanza la frase original y después sólo tiene que esperar sus incontrolables y, no obstante, previsibles efectos. Este proyecto forma parte de una serie de trabajos que exploran los conceptos de transcripción, interpretación y traducción: del lenguaje a los códigos, de la ciencia a la tecnología, de la subjetividad hasta la objetividad, de lo privado a lo público, de la semiología a la criptología: Español, coreano, alemán, árabe, inglés, japonés, portugués, hebreo, noruego, italiano, indonesio, finés, polaco, francés, chino, griego, ruso, hindi, holandés, urdu, rumano, checo y suahili.... ¡Por Dios!

*Mark Napier. POTATOLAND

En este espacio se mezclan los proyectos artísticos de excelente factura con espacios tremendamente críticos e incisivos, como es el caso de **Digital Landfill**, un vertedero on line, donde el visitante puede deshacerse de todos los desperdicios digitales que ya no necesita (e-mails, datos obsoletos, spam, viejas webs), contribuyendo a **"la creación del abono virtual para fertilizar el terreno de las ideas de diseñadores y artistas"**. Luego puede visualizar los desechos por bloques, inspirarse en ellos y utilizar los que necesita para realizar sus obras. La web también da acceso a dos creativos navegadores, ambos ideados por **Mark Napier**: **RIOT**, un browser que realiza un collage automático de la página que el usuario desea visualizar,... junto a las tres últimas que éste ha visitado: "Riot es un navegador multiusuario y antisocial al mismo tiempo; es un entorno darwiniano donde los contenidos luchan por sobrevivir"; y **The Shredder**, un navegador que presenta la estructura global de la página como un collage caótico e irracional: The Shredder se apropia de los datos de la página, destruyendo su estructura para luego reconstruir con sus contenidos otra web paralela a la original. **Una web magnífica**. Inglés.

Netochka Nezvanova. NATO.0+55

Software Art. Netochka Nezvanova -"Nameless Nobody"- es un misterioso colectivo que ha asumido el nombre de una de las primeras novelas de Dostoievski (1849) para darse a conocer en el mundo del net.art a través de conferencias y performances. Aparece por primera vez en la primavera del 2000 en Montreal presentando su producto estrella, **NATO.0+55**, un software para el tratamiento de la imagen y el sonido en tiempo real concebido como un conjunto de objetos externos QuickTime para MAX. Este programa permite la entrada de datos, su análisis, manipulación, transformación y su descomposición/recomposición en un producto modificado a partir de la mezcla de esos datos iniciales. Sus textos están repletos de citas y reflexiones biológico-socio-económico-políticas donde predomina cierta ideología feminista y anticorporativista. La versión original de **NATO.0+55**, y su versión mejorada **NATO.0+55.3d** modular, han sido presentadas en los principales eventos internacionales de arte digital, pero siempre por diferentes artistas de nacionalidades diversas: Bruce Gremo, Johnny DeKam, Kurt Ralske y Jeremy Bernstein (EEUU), Rene Beekman (Holanda), Anne Laforet (Francia) y Domiziana Giordano (Italia). Anteriormente, algunos miembros de este colectivo utilizaron los nombres de **m9ndfukc** o **membank** para comunicarse en listas de correo como Nettime o Rhizome mediante un lenguaje inventado que mezclaba cifras e imágenes en caracteres ASCII con inglés, francés y alemán. Más información en: **Nato 0 + 55 + 3d modular**, en **boot squad research**, en **fiftyfifty.org** y en

[miau-miau](#). Y también podéis ver algunas de sus piezas en: [0f0003.MACHIN3NKUNST](#), en [Membank](#) y en [Dadata Fyftyfifty](#), pero cuidado con "los cuelgues" de ordenador. Inglés.

* [Josh On, Futurefarmers. They Rule](#)

Ellos mandan... En 1956, C. Wright Mills escribía **The Power Elite** documentando las interconexiones entre la gente más poderosa de los EEUU. Desde entonces, la situación se ha vuelto todavía más extrema: unas pocas compañías controlan los grandes monopolios del sector económico y sus directores no sólo están relacionados comercialmente, sino que ocupan cargos relevantes en el gobierno. Por supuesto, sus conexiones permanecen ocultas al común de los mortales. **They Rule** intenta hacer visible estas conexiones de la élite a través de mapas y directorios interrelacionados que los usuarios pueden modificar y ampliar según sus propias informaciones. Impresionante diseño y contenidos. Este proyecto ganó el Premio Golden Nica en la categoría Net Excellence en el último certamen de Ars Electrónica celebrado del 7 al 12 de septiembre de 2002 en Linz (Austria) bajo el lema **UNPLUGGED. Art as The Scene of Global Conflicts**.

[PaperVeins. Genochoice©](#)

"Gracias por tener en cuenta a **GenoChoice©** en el plan de futuro de su familia. Mi nombre es Dra. Elizabeth Preatnet, especializada en genética prenatal y embriología. Utilizando nuestros medios tecnológicos-artísticos usted puede estar seguro de que la vida de su hijo quedará libre de enfermedades como el cáncer, el Alzheimer y los ataques al corazón - y también de problemas como la obesidad, la agresión y la dislexia-. Con la ayuda especial de **GenoChoice©** usted podrá elegir los genes específicos que determinen las características favorables de su hijo". Evidentemente, el proyecto trata de la identidad y de la selección genética. El usuario puede crear un clon de sí mismo o elegir las características psico-físicas de su niño y, tras la lectura del posible código genético, **Genochoice©** le propondrá varios cambios y mejoras, acompañados de sus respectivas tasas. Si el visitante acepta las condiciones, recibe un correo informándole de que ha empezado el desarrollo de su criatura. Inglés.

[Pornolize](#)

Espacio de difícil catalogación y descripción; quizás podríamos decir que se trata de un "juego políticamente incorrecto". Introduce un texto, preferiblemente que haga alusión a la Iglesia, la teoría del arte, la literatura infantil, o simplemente tu curriculum y mira a ver que pasa. Inglés, sueco, danés, noruego y húngaro.

[Francesca da Rimini](#)

Esta artista australiana inició su trayectoria artística en el vídeo durante los 80 y fue co-fundadora del colectivo ciberfeminista **VNS Matrix** junto a Julianne Pierce, Josephine Starrs y Virginia Barratt. En esta página se encuentran recopilados todos sus proyectos artísticos, entre los que destacan **Dollspace**, una obra en colaboración con Ricardo Dominguez y Michael Grimm que presenta la historia de una mujer asesinada, Dollyoko, cuyo nombre coincide con uno de sus "alias". También **Los días y las noches de los muertos** es un proyecto realizado también junto a Michael Grimm y el colectivo Los Fantasmas que está dedicado al movimiento zapatista y que posteriormente amplió su radio de acción con un dossier de violaciones de derechos humanos que se cometieron en el encuentro G8 de Génova. Asimismo, Francesca da Rimini lleva a cabo una serie de iniciativas de carácter crítico a través de su reciente alias **GashGirl** -**GashGirl's Favourite US Defense Contracts for April 2002**-. La web también da acceso a sus propios textos y a las principales entrevistas. Inglés.

[Alex Rivera. Remote Labor Systems \(RLS\)](#)

El artista Alex Rivera ha creado esta satírica página que propone la sustitución de los tradicionales braceros por prototipos robóticos cuyo objetivo es reemplazar a los inmigrantes en la industria agrícola de EEUU. Según su autor, "Cybracero es el programa que usa la tecnología robótica para reemplazar al bracero que tiene que viajar desde otros países para venir a trabajar a los campos de este país. Los robots se hacen cargo del trabajo de campo al sembrar y recoger las cosechas mientras son operados a control remoto por campesinos desde sus países de origen. Los trabajadores se quedan en sus países de origen y no tienen que separarse de sus familias, pero todavía pueden trabajar al operar electrónicamente los robots". Inglés.

[Gustavo Romano. Cyberzoo](#)

Este proyecto nos permite, en la seguridad de nuestro PC, experimentar los más salvajes virus informáticos enjaulados en su servidor. Del mismo modo que los zoológicos tienen por objetivo la investigación, reproducción y conservación de especies amenazadas en peligro de extinción, **CyberZoo** está involucrado en programas internacionales de cría en cautividad de especies amenazadas de virus y participa en diferentes proyectos de recuperación y reintroducción de vida artificial. La web nos propone un tour por diferentes tipos de virus en cautividad, que en este entorno podemos observar en acción, tal y como se muestran en las pantallas de los ordenadores cuando viven en libertad. Para ayudar al crecimiento de la fauna salvaje en la red, la web también contiene una sección desde la cual los usuarios pueden enviar postales con virus y otra donde es posible hacer donaciones. Español.

RSG Radical Software Group. CARNIVORE

El DCS1000, o CARNIVORE, es un programa de interceptación, desarrollado y utilizado por el [FBI](#), que captura los datos de tráfico y los contenidos de un mensaje electrónico (en las dos direcciones). Inspirado en este programa, el colectivo internacional de net.artistas RSG ha creado su propio proyecto "Carnivore", de idéntico nombre y similares características. Este consta de dos partes: un servidor que actúa en un área concreta del tráfico de datos convirtiéndolos en imágenes y sonidos; por ejemplo, si instalamos la aplicación en nuestro ordenador, Carnivore podría ver todos los e-mails, páginas web recibidas o transmitidas y documentos añadidos de todos aquellos con quienes nos conectamos en la red. Pero también ofrece una serie de aplicaciones que ponen a disposición de los artistas y activistas de la red, para que los reinterpreten de diferentes maneras creativas. Entre sus clientes se encuentran Entropy8Zuper, Joshua Davis (Praystation) Mark Daggett y Mark Napier. Este proyecto ganó el Premio Golden Nica en la categoría Net Vision en el último certamen de Ars Electrónica celebrado en septiembre de 2002 en Linz (Austria) bajo el lema [UNPLUGGED. Art as The Scene of Global Conflicts](#). Inglés.

Julia Scher. Securityland

Proyecto que que explora de manera lúdica todo tipo de sistemas de control, desde las cámaras de vigilancia en circuito cerrado a los cuestionarios que ceden información privada en Internet. La artista ironiza sobre estos últimos y somete al usuario a un disparatado interrogatorio. *"El control no es sólo parte de un profundo deseo de seguridad, sino también de una forma de orden. Debes entender el orden del mundo. Con mi trabajo, yo también contribuyo a buscar un orden del mundo"*. (Declaraciones de Julia Scher en una entrevista de Noemi Smolik publicada en Kuntsforum). El trabajo de Scher consigue desarrollar los temas de intimidad y control, con los que ya está suficientemente familiarizado el usuario de la red, de una manera lúdica y autoreferencial. Inglés.

SERO.ORG. Blank & Jeron

Página que da acceso a varios proyectos artísticos de Joachim Blank y Karl Heinz Jeron. (Uno de ellos, [without_addresses](#), se presentó en la Documenta X del 98). "Fundada en 1949, en la RDA, como una empresa de reciclaje de papel, SERO sobrevive a la caída del muro de Berlín y actualmente funciona reciclando basura electrónica" Blank & Jeron *dixit*. Sus proyectos son instalaciones híbridas basadas en el "reciclaje de sistemas de información" y en general, todo su trabajo cuestiona el paradigma de una sociedad donde la abundancia de información sólo es equiparable a la ausencia de contenido. En [Dump your trash](#), por ejemplo, se brinda al usuario la posibilidad de reciclar su vieja página, convirtiéndola en una obra de arte. Tan sólo tiene que enviar la URL y pagar 1.500 dólares y entonces recibirá en su domicilio un bajorrelieve en mármol grabado con un trozo de texto, una imagen y la dirección de su web. [¡Un diploma en mármol! ¡Por fin la evanescencia de la red se consolida en materia!](#) Inglés.

Alexei Shulgin. FuckU-FuckMe

En este proyecto, Alexei Shulgin pone a la venta por 500 dólares cada uno, "unos aparatos que proporcionan la más completa solución al sexo por control remoto en Internet; un sistema con un interfaz intuitivo que permite al usuario concentrarse completamente en la comunicación sexual". La página se carga rápidamente y las imágenes son muy explicativas... Desde [su página personal](#) se puede acceder también al magnífico - e irónico- texto [Introduction to net.art \(1994-1999\)](#), escrito en colaboración con [Nathalie Bookchin](#) y Blank&Jeron, del grupo [SERO](#). Inglés.

N Yoshi Sodeoka. ASCII Bush

El artista Yoshi Sodeoka, del grupo C505, ha realizado este trabajo en ASCII que recoge dos videos de Bush y Junior: A la izquierda y en azul, un discurso de George W. Bush que tuvo lugar el 12 de Enero de 2003, sobre la Guerra de Irak; y a su derecha, en rojo, el discurso de su padre George H.W. Bush, sobre la Operación Tormenta del Desierto, el 6 de marzo de 1991. El artista nos recuerda que a pesar de las increíbles similitudes en sus ideas y en protocolo gubernamental los discursos no están editados, sólo se han filtrado con medios digitales.

The Missing Gene Project

[¿Por qué nosotros podemos hablar y los \(otros\) animales no?](#) Tras la muerte, en 1994, del biólogo británico Sir Richard Thomas Bacon, se publicaron sus cuadernos privados. En ellos, describía una "mutación evolutiva" que se produjo en nuestros genes. En su investigación -test de DNA realizado a humanos, primates y loros, donde se estudiaban más de 1000 genes- Beacon descubrió que algunas personas carecen del "gen del habla" D2433, aunque no parecían tener problemas a la hora de expresarse. The Missing Gene Project es un homenaje a Richard Beacon y a su importante contribución al conocimiento humano. La web presenta varias secciones: Información sobre Richard Beacon y su descubrimiento del gen D2433; su relación con la teoría del lenguaje propuesta por el escritor americano William S. Burroughs ("Language is a virus"); - por qué la gente habla, por qué no lo hacen los primates y cómo lo hacen los loros (con 13 archivos de audio!); información científica sobre el gen D2433, y un increíble test online de nuestro propio DNA. Otro excelente proyecto de [The Somniloquy Institute](#). Inglés.

[The Pinocchio Files](#)

Bienvenidos al universo donde las verdades son verdades y las mentiras, mentiras. Base de datos y recopilación de artículos sobre Mentiras y Fraudes, Aplicación Jurídica y Contribuciones Científicas. Para todos aquéllos que les gustaría saber mucho más sobre verdades y mentiras, y cómo reconocerlas. Según sus autores, el objetivo de este espacio holandés es crear un entorno educacional y de entretenimiento donde no se toleren conductas que puedan ser perjudiciales para los demás. Alojada en el excelente [The Somniloquy Institute](#). Inglés. *Aprovecho aquí para recomendaros una lectura relacionada que provocará algunas desmitificaciones (necesarias): [Imposturas intelectuales](#), Alan Sokal y Jean Bricmont, Paidós Transiciones, Barcelona, 1999. Repasito a Jacques Lacan, Julia Kristeva, Luce Irigaray, Jean Braudillard, Paul Virilio, Gilles Deleuze y Felix Guattari. Vamos, que no deja títere con cabeza.

[The Surveillance Camera Players](#)

Activistas políticos (se definen como anarquistas) que consideran que el uso de cámaras de vigilancia por parte de la policía es una flagrante violación de la cuarta enmienda de la Constitución Americana y se manifiestan en contra de su utilización. Los componentes del SCP realizan sus actuaciones frente a las cámaras de vigilancia aupándose para hacer sus pantomimas y alzando sus carteles hasta ellas (las cámaras no graban el sonido). Su repertorio es muy amplio e incluso tienen "números especiales" para lugares concretos, como por ejemplo iglesias. En su web se pueden consultar todo tipo de documentos legales y artículos sobre el uso y abuso de las cámaras de vigilancia, una situación que se ha agravado especialmente tras los hechos del 11 de septiembre de 2001. También encontrareis una detallada descripción de sus ideas y actividades en [NOT BORED](#).

[The Technologies To The People®](#)

Daniel García Andujar es artista, miembro de [irational.org](#) y fundador de Technologies To The People. Inició su actividad artística a finales de los 80, interesándose especialmente en proyectos de intervención pública relacionados con el abuso de la tecnología en los sistemas de vigilancia y con el racismo y la xenofobia. A partir de 1996, comenzó a desarrollar el proyecto Technologies To The People que consta de un espacio en la web y de diferentes extensiones bajo la forma de instalaciones y presentaciones en espacios físicos. En todas ellas, el autor cuestiona siempre los límites de la información legal, el acceso a la tecnología y la supuesta interactividad de la red, así como su credibilidad. La labor que desarrolla Daniel García Andujar mantiene su base de operaciones en Internet, mientras cuestiona sus supuestas ventajas, sus usos y abusos.

[Phoney](#) es un proyecto informativo que tiene lugar en la red y que ha sido concebido como una base de datos de armas informáticas (programas y virus) al servicio de cualquier persona que decida hacer uso de ellas,... y que conozca sus códigos. No obstante, la obra posee dos niveles: uno más especializado, para hackers capaces de provocar verdaderas catástrofes informáticas como introducirse en los ordenadores de potentes empresas o infectar servidores; y otro mucho más sencillo: resguardado en el anonimato, un usuario neófito puede seguir las sencillas instrucciones de Phoney para realizar pequeñas transferencias bancarias o para escuchar conversaciones telefónicas. Cualquiera de estas operaciones es absolutamente ilegal, y así lo advierten repetidos anuncios en la pantalla de nuestro ordenador, pero el artista ha decidido confiar en el buen juicio y en el sentido de la responsabilidad del usuario. Que se pueda acceder libremente a la información no significa forzosamente que se deba hacer (mal)uso de ella ...¿o sí?. Inglés.

[The Yes Men The Yes Men y World Trade Organization.](#)

The Yes Men crearon en 2000 una página denominada [GATT.org](#) que parodiaba la estética y los contenidos de la WTO (Organización Mundial del Comercio, en español). En mayo de 2000 recibieron un e-mail invitando a su director general Mike Moore, a hablar de la WTO en una conferencia acerca de materias relacionadas con el comercio internacional. The Yes Men decidió enviar a un representante que pronunció una demencial conferencia sin que el público llegase a sospechar nada. Desde entonces han realizado varias intervenciones similares ante audiencias predispuestas a aceptar cualquier cosa que provenga de la WTO. Posteriormente han parodiado también la página de la poderosa industria estadounidense [The Dow-Chemical](#), evidenciando su responsabilidad sobre la catástrofe de Bhopal (India) donde han muerto más de 20.000 personas. Desde estas páginas se puede acceder a toda la información.

[Andrej Tisma](#)

Página personal de este artista, crítico y comisario yugoslavo que atenta contra MacDonals y contra la Coca-cola, contra los regalos de Navidad y contra los *christmas*, contra los cuestionarios, contra los daños colaterales, contra... En fin, contra [ese estilo de vida típicamente norteamericano](#).

[Transnational Temps. Novus Extinctus](#)

El grupo Transnational Temps, formado por los artistas Andy Deck (EEUU), Fred Adam (Francia), Verónica Perales (España), ganó con esta obra el tercer premio del certamen [VIDA 4](#) correspondiente a la edición de 2001. "Los artistas han realizado una extensa obra basada en Internet compuesta por una taxonomía de nombres de dominio de

la Web, un buscador que rastrea por estos datos extraños, eslóganes de marketing, datos insertados por usuarios en el sitio y misteriosos gráficos. La idea y el mensaje clave de Novus Extinctus es que la expansión de la presencia humana en la World Wide Web corre paralela a la escalofriante pérdida de la biodiversidad en los hábitats del mundo real: el número de nombres de dominio de la Web registrados aumenta cada día, al mismo tiempo que crece el número de especies extinguidas. Por eso, para construir la metáfora, los nombres de dominios que aparecen en el sitio están asociados a nombres de especies en latín. Cuando alguien selecciona un nombre de dominio y lo procesa, aparece esta asociación con un enlace a sitios reales de animales, como TigerDirect.com. La sagacidad sociopolítica de esta obra se resume en la afirmación que hacen los artistas de que nuestro creciente banco de datos de códigos genéticos, como es el caso del Proyecto del Genoma Humano, no puede de ninguna manera compensar la pérdida de especies". Inglés.

VNS Matrix

VNS Matrix está compuesto por **Josephine Starrs**, **Julianne Pierce**, **Virginia Barrat** y **Francesca da Rimini**. Se trata de un proyecto conjunto que surgió en Australia, durante el verano de 1991 y que pretende investigar y descifrar las narrativas de dominación y control que rodean la cultura de alta tecnología, explorando la construcción del espacio social, la identidad y la sexualidad en el ciberespacio. Sus componentes, que se consideran a sí mismas como ciberfemistas, persiguen la idea de hacer trizas el mito masculino que pretende alienar a la mujer de los aparatos tecnológicos y sus productos culturales. Proyectos: theme parks, corpus fantastica MOO, manifiesto, all.new.gen, spiral.space, y bad.code. Inglés.

arte crítico

obras

última actualización: enero de 2005

"El arte preocupado por cuestiones sociales y políticas cumple su función primordial: plantear preguntas a la caza de respuestas que iluminen la obligación moral que todos tenemos de no aceptar como el mejor de los mundos posibles el que hemos heredado de la historia". Francesc Torres.

* 0100101110101101.org

Eludiendo etiquetas, o la capacidad de crítica y evolución. Todas las propuestas de 0 y de 1 cuestionan la simulación

mediática extendida en nuestra sociedad, la capacidad de la red para adaptarse al tradicional mercado del arte y el mito de la accesibilidad y la privacidad de la información. Su página muestra una coherente trayectoria que evoluciona a partir de tres tipos de proyectos. **SIMULACION** contiene la página de Danko Manver, el artista inexistente, y una peculiar versión de la web del Vaticano. **DUPLICACION** da acceso a [una copia de Art. Teleportacia](#), la galería comercial de net.art de la rusa OIa Lialina, cuya primera exposición titulada *Miniaturas del Período Heroico* acogía obras de Alexei Shulgin, Heath Bunting, JODI y de la propia OIa Lialina, esta última vendida a un coleccionista privado (!). Desde sus páginas podéis acceder a las obras sin pagar un duro. También contiene una copia de **JODI** y de la elitista y misteriosa **HELL.COM**. Su siguiente iniciativa se basó en el **ACCESO: life_sharing** (anagrama de "file sharing") permire al usuario entrar en su ordenador y copiar todo lo que desee. Información detallada (bio, artículos y enlaces en la web del [Walker Art Center](#). **VIRUS**: En la Bienal de Venecia 2001 se presentaron bajo el Pavellón de Eslovenia: en el proyecto [Absolute One](#), 01.org se asoció con el grupo **epidemiC** para exponer un nuevo virus denominado **biennale.py**, concebido especialmente para este acontecimiento. El día de la inauguración se introdujo el virus, pero también se hizo público su código fuente mientras se proporcionaba a los afectados el anti-virus y las instrucciones de su desinstalación. Reena Jana escribe sobre ello en un completo artículo de Wired titulado [Want to See Some Really Sick Art?](#). **PROPIEDAD**: El día de la inauguración del [Korea Web Art Festival 2001](#) 01.org aprovechó para desarrollar el proyecto [FTPPermutations](#), que consistió en hackear temporalmente la web oficial del Festival intercambiando los nombres y obras de los artistas que intervenían en la muestra y provocando un desbarajuste que no entusiasmó a sus organizadores. **VIGILANCIA: VOPOS** es un proyecto que utilizaba y mezclaba los tres tipos de redes: teléfono, satélites e Internet. Durante casi un año, los dos miembros de 01.org estuvieron siempre controlados, pues ambos llevaban un transmisor GPS que enviaba sus datos a los satélites con el objetivo de transmitir constantemente a su website su posición exacta en el entorno urbano. Un software dibujaba en un mapa geográfico digital el lugar preciso donde viven, estableciendo la trayectoria que describen todos sus movimientos. En [The World in One's Pocket?](#) de la revista Springerin, Vera Tollm analiza el proyecto.

NikeGround Su última acción en el 2003 fue este proyecto, realizado junto al grupo cultural Public Netbase de Viena. Y se inauguró mediáticamente con un sorprendente titular que lanzaron los periódicos austriacos en el mes de octubre: **Nike compra calles y plazas**. La noticia se produjo en una esquina de la principal plaza de Viena donde había aparecido un puesto de información patrocinado por Nike que anunciaba el cambio de nombre a los ciudadanos: "La Karlsplatz pasará a llamarse Nikeplatz". La propuesta se completaba con el anuncio de la inminente colocación de un monumento que reproduciría el famoso logo de la marca (Swoosh) y con esta web. Inglés.

Amy Alexander

Artista interesada por el net.art, la videoinstalación y la animación por ordenador. Esta página da acceso al proyecto [Multi-Cultural Recycler](#), basado en el reciclaje de las tomas de diferentes *webcams* de vigilancia alrededor del planeta. Una de sus opciones escoge tres de manera aleatoria, y otra -"Make your own Cultural Compost"- permite elegir al usuario tres vistas particulares o utilizar las imágenes recicladas por visitantes anteriores. En la *Galería de Reciclajes* se exponen los trabajos artísticos de todos los usuarios. Una *página con vistas* que trata de la ubicuidad, la reapropiación y el placer mismo de la mirada,... o un juego de collage creativo para mirones. Su último proyecto es [plagiarist.org](#) (1998-2000), un espacio artístico con proyectos realizados a partir de "materiales plagiados" de Internet, y cuyas piezas, a menudo satíricas, tratan sobre la propiedad, la apropiación y los infinitos recursos de la web. Los proyectos de Plagiarist.org también se han presentado en las colecciones de [The Somniloquy Institut](#) y [Detritus](#), entre otros. Especialmente recomendable su Manifiesto. Inglés.

Luis André. E-JUDO

Esta peculiar propuesta es en realidad una herramienta al servicio de recorridos críticos por la red que compagina la creación artística con la utilidad de un nuevo recurso tecnológico. Su funcionamiento depende de un EMISOR, que navega según su propio criterio, y un RECEPTOR, que se dedica a observar como navegan los otros usuarios (o emisores). El objetivo básico de este proyecto es eludir intencionadamente los buscadores tradicionales para que sean los propios usuarios quienes nos muestren sus recorridos personales; algo así como intentar saber qué es lo que buscan "los demás", pero sin intermediarios. Español.

Lucas Bambozzi. meta4walls

Este es el primero de una serie de proyectos on line **-4 WALLS PROJECT-** sobre sistemas interactivos que tratan de la vigilancia, la apropiación, la subversión, la privacidad, el poder y la resistencia. **meta4walls** simula una especie de meta-vigilancia en la red a través de los mecanismos habituales que se utilizan para recoger información personal y otro tipo de datos (formularios, cookies y cuestionarios). Bambozzi nos invita a visitar unos cuantos enlaces ilícitos y a acceder a información "secreta", con la intención de evidenciar la fragilidad de algunos sistemas, pero también sugiriendo que estamos siendo observados y poniendo en peligro nuestra privacidad. Inglés.

Rachel Baker. Trina Mould. TM

Además de significar 'trade mark', **TM** son las iniciales de Trina Mould, miembro hipotético de [irational.org](#). Sus trabajos cuestionan las estrategias comerciales, las cuestiones de copyright, derechos de autor, apropiación de datos y la noción de original y de copia. Las obras de Trina Mould no están documentadas; es decir, que no se puede

acceder a ellas directamente desde un enlace indicado en la página principal, ya que concibe este tipo de navegación como algo especialmente caduco. La forma más directa de llegar es a través de caminos desviados, hojeando y explorando los sites afiliados a su espacio. Inglés.

[James Baumgartner. Voteauction.com](#)

Página ideada por el joven James Baumgartner y posteriormente absorbida por el colectivo [rtmark](#). Su propuesta plantea subastar los votos presidenciales de los ciudadanos al mejor postor corporativo. En marzo de 2000 apareció esta web que proponía a los desencantados y/o dubitativos electores norteamericanos vender sus votos de cara a las siguientes elecciones presidenciales (7/11/2000) capitaneadas por Gore y Bush. La operación se completaba con la compra de estos mismos votos por compañías privadas que debían pujar entre sí para conseguirlos; así, semana a semana, los usuarios pudieron comprobar a través de un simplificado panel informativo la cotización de estos votos en función del estado al que pertenecían. Por supuesto, se trataba de un simple proyecto de simulación que Baumgartner se encargaba de actualizar periódicamente con datos inventados, pero la repercusión mediática no se hizo esperar: fueron numerosos los artículos de prensa y las entrevistas televisadas. Los periodistas que cubrieron la historia no pudieron evitar mencionar aquello que su autor estaba esperando: que las empresas privadas siempre han comprado votos durante las elecciones norteamericanas.

[Hans Bernhard.com](#)

Esta es la página madre que contiene todos los productos, proyectos, publicaciones, fotografías, películas y textos sobre el pop-star de Internet, artista hardcore, maníaco radical y disidente hombre de negocios Hans Bernhard (alias e01, etoy.BRAINHARD, hans_extrem, o Dr. Andreas Bichlbauer, entre otros...). Su estilo se ha descrito como una mezcla entre Andy Kauffman y Jeff Koons, sus acciones se encuentran a medio camino entre las de Matthey Barneys y John Lidon, y su arte se ha catalogado entre duchampiano y beuyista, aunque lo que mejor define su filosofía de vida es su lema: "[¡es diferente porque es fundamentalmente diferente!](#)". Hans Bernhard es miembro fundador de [etoy.com](#) -cuya iniciativa [digital hijack](#) le llevó a ganar un Golden Nica en 1996- y también es el principal impulsor de [ubermorgen](#), que se encuentra detrás de los excelentes proyectos subversivos [\[V\]ote-auction](#), [NAZI-LINE](#) e [IPNIC](#).

[Joseph Beuys](#)

[El propósito del arte es hacer libre a la gente, por lo tanto, para mi el arte es la ciencia de la libertad](#). Artista-pensador (1921-1985) que cuestionó los tradicionales parámetros académicos y trabajó en su propia concepción de la escultura utilizando materiales no tradicionales y cuestionando la idea de mito. Desarrolló una teoría del arte sistemática, holística e interdisciplinar a partir de sus propios filosóficos y científicos. La Teoría de la Escultura Social presentaba el principio de creatividad de la práctica artística como modelo de los aspectos creativos inherentes a todo proceso social. En 1961, fue nombrado Profesor de Escultura Monumental de la Academia de Arte de Düsseldorf, convirtiéndose en el artista-educador más carismático de nuestro siglo. Estas tres páginas documentan su vida y su obra a través de una exposición, una selección de textos y una obra:

[Joseph Beuys. Múltiples](#). Excelente exposición organizada en el Walker Art Center de Nueva York que contenía, además de las obras, un hipertexto de Julie Luckenbach: [BEUYS/LOGOS](#) y un trabajo de Piotr Szyhalski: HARVEST. También contiene los debates que se llevaron a cabo en La Oficina de Información preparada al efecto durante los días de la exposición, un espacio-galería creado según el concepto de Beuys de oficina-estudio-galería abiertos como forums de debate. Inglés.

[Athena - Joseph Beuys Online Index](#). Directorio de temas y conceptos relacionados con el trabajo artístico de Joseph Beuys y sus teorías sobre el arte social. Artículos, ensayos, entrevistas de y sobre Beuys. Inglés.

[7000 Oaks](#). Esta página del Dia Center de Nueva York documenta el proyecto de Beuys [7000 Robles](#) que se inició en la Documenta 7 de Kassel en 1982 y consiguió completarse en la Documenta 8 de 1987. La idea consistía en plantar siete mil árboles emparejados con columnas de piedra de basalto y Beuys la concibió como la primera parte de un plan de plantación que debía extenderse por todo el mundo, en una misión global destinada a modificar los efectos ambientales y a provocar el cambio social. Ensayos, fotografías y un vídeo. Inglés.

[The Social Sculpture Research Unit](#). Esta idea desarrollada por Beuys en los años 70 se refiere a una concepción del arte como un proceso interdisciplinar y participativo donde el pensamiento, el discurso y el debate son considerados "materiales". A partir de esta percepción, todos los seres humanos pueden ser "artistas" responsables de la configuración de un orden social democráticamente sostenible. Esta Unidad de Investigación sobre la Escultura Social, con sede en la School of Art, Publishing and Music de la Universidad de Oxford, se basa en el concepto propuesto por Beuys para promover la colaboración entre artistas y teóricos de cualquier disciplina creativa con el objetivo de promover la reflexión crítica acerca de la escultura social.

[Natalie Bookchin](#)

Artista y teórica de la Red que ha ofrecido siempre una visión crítica de los aspectos éticos y políticos de nuestra sociedad y de la cibercultura. A lo largo de su trayectoria, ha formado parte del colectivo activista RTMark y ha colaborado con el artista ruso Alexei Shulgin en proyectos artísticos, como [The Universal Page](#), y en proyectos teóricos, como [Introducción al net.art 1994-1999](#).

[Metapet](#). El primer juego de mascotas virtuales y transgénicas del mundo. Juego on line sobre animales domésticos que sitúa su acción en una empresa especializada en biotecnología. El usuario actúa como jugador-empresario que

deberá adoptar un metapet, o humano modificado genéticamente, y ganar puntos para dar de comer, reponer y manipular a su animal. Una mala decisión del usuario/empresario puede conducirle a un descenso en los resultados que se traducirá en ineficiencia, en la degradación del trabajo, en la pérdida del seguro o del puesto, en hambre y, en último extremo, en la muerte de su animal/trabajador. Si, finalmente, el jugador no consigue los puntos necesarios puede optar por otro juego; sólo entonces podrá participar en el "juego del conocimiento", donde puede experimentar sensaciones y retos de la vida real y participar en otros juegos on y off line que conseguirán megapuntos para su animal. Como en todos los juegos de Bookchin, en éste, tampoco lo más importante es ganar. Inglés.

Kendall Bruns. AfterMichaelMandiberg

Del arte al Comercio. Las obras de arte digitales pueden no ser únicas.

- 1) A finales de los años 70, el artista conceptual Sherrie Levine re-fotografiaba las fotografías documentales que en 1936 hiciera el famoso fotógrafo Walker Evans y las presentaba como nuevos originales.
- 2) **Michael Mandiberg** es un artista que se ha dedicado a escanear tanto las fotografías de Sherrie Levine, como las de Walker Evans para colocarlas en dos webs: AfterSherrieLevine.com y AfterWalkerEvans.com. Los usuarios pueden descargarlas e imprimirlas con una resolución muy similar a las originales (las de Evans y las de Levine); es más, también puede conseguir un "certificado de autenticidad" -como auténticas obras de Mandiberg.
- 3) Kendall Bruns ha ido un poco más lejos todavía. Ha creado la página AfterMichaelMandiberg.com con un look, unos textos y unas imágenes idénticas a las páginas originales que creó Michael Mandiberg (AfterSherrieLevine.com y AfterWalkerEvans.com).
- 4) El diálogo que examina las relaciones entre las auténticas obras originales y las reproducciones de esos originales continúa con esta web del propio **Kendall Bruns** denominada [AfterKendallBruns](http://AfterKendallBruns.com). AfterEnglish.

* **Heath Bunting**

"Diseñador, delineante, fotógrafo y net.artista inglés. Tras una brillante carrera como estudiante, Bunting ha conseguido un éxito internacional a sus veintipocos años y ha consolidado su posición como mejor artista británico de su generación. Este increíble éxito, no sólo se ha basado en el instinto, talento y versatilidad de su trabajo, sino también en su carismática personalidad, la cual le ha convertido en una figura popular incluso para aquéllos que no están particularmente interesados en el arte". Esto es lo que asegura su página, aunque... **yo no me lo acabaría de creer del todo**. Entre los proyectos de este **activista** británico destacamos algunos:

En **readme**, Bunting se describe a sí mismo sólo a través de numerosos enlaces diseminados por la red. Se trata de un artículo de periódico titulado "Posee, sé poseído o permanece invisible" que contiene todas sus palabras subrayadas como hipertextos que enlazan dominios corporativos (absolutamente a todas les sigue el consabido .com). De hecho, el texto satiriza la comercialización a la vez que se resiste a ella.

En **CCTV. World Wide Watch** Bunting propone al espectador-voyeur vigilar desde su ordenador las actividades criminales que puedan presentársele, a través de cámaras que filman permanentemente, y en plano fijo, desde las calles de diferentes ciudades del mundo. Bajo cada plano tomado por la cámara, hay un espacio en blanco que propone describir el crimen o la actividad sospechosa que está sucediendo para faxearla directamente a la policía local. Una vez se ha validado el fax, el espectador ve como se añaden a su pantalla el conjunto de contribuciones precedentes de todas las ciudades vigiladas. Consecuencias de la responsabilidad cívica en la era del Gran Hermano.

Net.art Consultants es un espacio que permite a los artistas donar sus obras de net art a los mayores coleccionistas (instituciones, museos, festivales...) con el fin de impulsar la economía del net.art. Coleccionistas: Walker Art Center, art.teleportacia, ICC - Tokyo, Museum of Modern Art - New York, Ars Electronica Center -Linz, Zentrum for Kunst and Media, DIA Centre, Institute of Contemporary Arts - London. Si se accede al listado de todas las donaciones se pueden ver algunas paradojas, como la donación de una misma obra a TODAS las instituciones, la donación del ICA (Institute of Contemporary Arts) al Ars Electronica Center de Linz, o la donación del MOMA al propio MOMA de Nueva York.

Bunting también ha trabajado junto a **Olia Lialina**, en la obra **Identity Swap Database**, una base de datos destinada al intercambio de identidades. Previa cumplimentación de un formulario con sus datos básicos, el usuario puede adquirir una nueva identidad -temporal o permanente- e incluso puede donar la suya para que otros la utilicen. Inglés, ruso, español y alemán.

BorderXing Guide es un espacio que contiene documentación sobre una serie de recorridos que atraviesan los límites nacionales, sin impedimentos de aduanas, inmigración o policía fronteriza. Paradójicamente, el website no es accesible a cualquiera que tenga una conexión a Internet: quien quiera visitarlo debe desplazarse físicamente hasta uno de los lugares designados por el autor, o bien conseguir una autorización de éste a través de la red (se puede consultar la lista completa en <http://irational.org/borderxing/>). Como podemos suponer, el proyecto se dedica a invertir los papeles entre dos ideas preconcebidas: una, que las fronteras restringen el movimiento; y dos: la idea de supuesta libertad relacionada con el concepto de Internet como un espacio sin fronteras.

Vuk Cosic

En esta página referenciada con su nombre se encuentran la mayoría de sus trabajos, inclusive el mirror de la Documenta X que fusiló para evitar que desapareciese toda esa información cuando acabó la muestra. Esta particular obsesión por la conservación de datos, ha llevado a Cosic a generar La Historia Oficial del Net.art, que encontraréis en el volumen I **History of art for airports** y en el volumen II, **Classics of net.art**. En esta última obra, el misterioso

editor Keiko Suzuki nos presenta un libro que valora las ideas de una joven generación de artistas, pensadores, visionarios, críticos, periodistas, científicos, y narradores de la Revolución Digital. Un catálogo presenta las cubiertas de los libros de la colección, así como una biografía-sumario de los artistas implicados; a saber: Heath Bunting, Jodi, Alexei Shulgin y el propio Vuk Cosic. Después, el visitante que desee adquirir los libros puede contactar con Keiko Suzuki para conocer el precio de las obras,...que pueden ser editadas en diferentes calidades de papel. La Historia 5 años del net.art ordenador como soporte publicada en forma de catálogo proceso tradicional de publicación industrial para la posteridad legitimando las pruebas por encima de las propias obras. Inglés.

* Critical Art Ensemble

Colectivo de cinco artistas y activistas (Steve Barnes, Dorian Burr, Steve Kurtz, Hope Kurtz y Beverly Schlee) dedicados a explorar las intersecciones entre arte, tecnología política radical y teoría crítica. Ellos han desarrollado el concepto de Desobediencia Civil Electrónica a partir del modelo de desobediencia civil callejera. Desde su página principal se puede acceder a sus [Proyectos Tácticos](#) y a sus [Proyectos de Bio-tecnología](#), así como a sus excelentes publicaciones online en formato PDF (que también ha publicado Autonomedia). Sus textos representan una importante contribución crítica que argumenta el ataque contra el autoritarismo del orden social y la ideología del poder. **EBooks:** The Electronic Disturbance, Electronic Civil Disobedience, Flesh Machine y Digital Resistance. Desde la lista de Nettime se publicaron estas dos entrevistas [CAE interview I](#) y [CAE interview II](#) que nos aclaran su trayectoria y sus métodos de trabajo. Inglés.

Minerva Cuevas. Mejor Vida Corporation

Yes, It's FREE! Minerva Cuevas nos recibe en su página con un eslogan que desafía el sistema económico de las corporaciones a la vez que subvierte la concepción mercantilista del arte. Ella misma define su web como: "el resultado de la desconfianza en las utopías capitalistas, siendo la subversión una constante dentro de sus procedimientos". Desde aquí distribuye gratuitamente una serie de productos -billetes del metro de la Ciudad de México, tarjetas de lotería, credenciales de estudiante, etiquetas de código de barras...- y oferta servicios -encuestas, cartas de recomendación, servicios de limpieza, donaciones públicas...-; su objetivo: parodiar las estrategias de difusión y consumo a través, precisamente, de una corporación. Español e inglés.

DigiCrime Inc.

Organización de hackers que ha formado una empresa especializada en acciones criminales y que ofrece todo tipo de servicios y productos desde la red. Su peculiar [equipo de especialistas](#) es capaz de realizar cualquier acción ilegal que se pueda hacer utilizando un ordenador: pornografía, teléfonos, falsificación de tarjetas de crédito, venta de passwords, suplantación de identidades,... incluso han inventado un triturador de documentos que guarda una copia en su memoria mientras destruye el documento. La conciencia social y la ironía del científico y matemático [Kevin McCurley](#) tiene mucho que ver en todo esto... "DigiCrime es una broma. Es mi perversa manera de ridiculizar la vulnerabilidad que padece nuestra sociedad desde que entró en la era de la información. O mejor dicho: no es una broma, puesto que el futuro de nuestra sociedad depende de nuestra habilidad para proteger la información. Así es que se trabajo con la realidad de la vida. Inglés.

Ricardo Domínguez

Ricardo Dominguez es un [activista de la red](#) en cuyo currículum figura ser co-editor de [The Thing](#), fundador de [The Electronic Disturbance Theater](#), miembro de [Critical Art Ensemble](#) (1987-1994) y enlace de la [Guerrilla Zapatista](#) en el ciberespacio. Su página funciona como un portal a los numerosos proyectos críticos individuales y colectivos que ha realizado, tanto en el terreno artístico como en el entorno más teórico de la red. Su intervención más conocida -y más interesante- fue la que tuvo lugar en el Festival de Ars Electrónica del 98 (INFOWAR) donde su grupo Electronic Disturbance Theater presentó [SWARM](#), un proyecto basado en la Desobediencia Civil Electrónica al que se sumaron 20.000 personas de todo el mundo para conseguir bloquear la web de la presidencia mexicana (en apoyo al zapatismo) el Pentágono (contra el ejército de los EEUU) y la bolsa de Frankfurt (símbolo del capitalismo internacional). Inglés.

ETOY. La primera pandilla de gamberros de la autopista de la información.

[Etoy](#) es un grupo de artistas que actúa en Internet con proyectos críticos que cuestionan el poderío de las grandes corporaciones de la red. En 1996 consiguieron el premio Golden Nica de Ars Electronica (Linz) con [\["the digital hijack"\]](#) -el pirateo digital- un proyecto basado en la utilización de los buscadores de Internet y cuyo objetivo era demostrar cómo un puñado de compañías controlaban el destino de millones de internautas. La acción comenzó el 31 de marzo y finalizó el 1 de agosto de 1996. Durante este período, los software-agents de etoy generaron cientos de páginas trampa que contenían una de las 2400 palabras clave mas populares (como porsche, penthouse, madonna, fassbinder, etc...), las cuales se incluían automáticamente en los principales buscadores internacionales. Muchas de estas páginas trampa -de las cuales todavía podéis encontrar algunos ejemplos en su web- fueron anuladas, pero otras todavía no han sido localizadas hoy en día, y aunque la acción ya finalizó, ellos aseguran que el proyecto continuará o bien hasta que pirateen un millón de páginas o hasta que etoy sea eliminado de las principales compañías de buscadores. Terrorismo digital y entretenimiento inteligente para la nueva generación. Desbaratar la

palabra clave: un nuevo estilo de vida en Internet.

ETOY: LA GUERRA. En 1995, un grupo de artistas suizos compró el dominio web etoy.com. Dos años más tarde, en 1997, una tienda online de juguetes compró el dominio eToys.com. A finales de 1999 estos últimos optaron por litigar contra etoy.com por su empleo del dominio web. Un juez de Los Angeles falló favorablemente a eToys.com y forzó a etoy.com a cerrar su website y a dejar de utilizar el nombre etoy.com; es más, prohibió a los artistas vender su obra en los USA. **Contraataque:** Tras ser vapuleada en newsgroups, mailing lists y ruedas de prensa en el MOMA de Nueva York, [eToys](http://eToys.com) anunció que no iba a seguir con el juicio. Ello fue debido, sobre todo, a los "sit ins" virtuales del 15 y 25 de diciembre que contaron con el apoyo de miles de simpatizantes, intelectuales y defensores del discurso libre y la expresión artística en Internet, y que acabaron generando problemas operativos a la compañía (disminución de sus ventas electrónicas y descenso de su cotización en bolsa). [etoy](http://etoy.com) desarrolló la Toywar, un espacio donde figuran todas las medidas concertadas de ataque y donde se seguía la guerra paso a paso (historia y acceso a los artículos publicados, no sólo en espacios alternativos, sino en los principales media: New York Times, Wall Street Journal, Le Monde, CNN). **Finalmente**, y tras años de pleitos, [eToys](http://eToys.com) cayó en la bancarrota y desapareció dejando al grupo de artistas suizos con la victoria definitiva jeToys está muerto y RTMark lo festeja! Inglés.

N [Rafael Fajardo. Crosser y La Migra](#)

Estos trabajos exploran la complejidad de la situación real en la frontera EEUU/México. A través de ambos juegos, su autor nos propone una doble reubicación invitándonos a colocarnos en el punto de vista de un inmigrante ilegal y de un policía de frontera que intenta evitar la entrada en su territorio. La página también enlaza con un ensayo de Fajardo titulado [pixels, politics, and play](#) y publicado en intelligent agent vol. 3 no. 2. Inglés.

[First Floor](#)

Proyecto indefinible, lleno de recovecos y desvíos,... pero **muy recomendable**. Excelente. Inglés.

[Fred Forest](#)

Página central de este artista francés que enlaza con numerosos textos teóricos y con proyectos comprometidos. Entre ellos destacan, un mercado de obras de arte virtuales y una revista concebida como medio de información alternativo a la prensa oficial, institucional y comercial. También acceso directo a [Forest vs Beaubourg](#), donde el artista documenta el proceso que está llevando a cabo contra el Centro George Pompidou de París por su falta de transparencia: Forest denuncia que no se respeta el espíritu de la ley de 1978 sobre la transparencia de la contabilidad pública. Francés e inglés.

[Guillermo Gómez-Peña y Roberto Sifuentes. The Temple of Confessions](#)

El artista mexicano afincado en Estados Unidos, Guillermo Gómez-Peña y el hispano nacido en Los Angeles, Roberto Sifuentes se dedican a explorar el mestizaje cultural y las relaciones Norte/Sur, de manera que todos sus trabajos artísticos y teóricos intentan desvelar los laberintos de la identidad y los principios de la nacionalidad. Ambos han concebido este [Templo de Confesiones](#) como un documento que recopila las techno-confesiones de miles de usuarios para descubrir los tópicos y prejuicios existentes acerca de las minorías étnicas. El visitante puede optar por varios cuestionarios organizados temáticamente bajo las palabras clave de utopía, rumor, raza, identidad, género y deseo. Gómez-Peña ha utilizado este material para crear unos *etnocyborgs*, a los que da vida durante performances (la última en el festival [Sonar 2000](#), de Barcelona). Inglés.

[Eva Grubinger. Netzbikini](#)

¿Quieres diseñar tu propio bikini? El usuario que puede elegir hasta la talla; da igual que sea hombre o mujer, ahora cualquiera puede ser artista y obtener, incluso, el certificado de calidad del producto, su sello de autenticidad. No se puede esperar menos de quien busca el significado REAL del ARTE como actividad y se plantea cuál debe ser su último fin. Contra la definición del ARTISTA por naturaleza. Inglés.

[Ingo Günther](#)

Artista alemán que trabaja con el vídeo y las nuevas tecnologías, demostrando una voluntad crítica en todas sus obras. Actualmente simultanea sus instalaciones con proyectos on line como [World Processor](#) (1988-2000) o como [Refugee Republic](#) (1996-2003), un espacio online dedicado a los refugiados de todo el mundo que se mueve entre la ficción (pasaportes para los refugiados) y la realidad (acceso a informaciones exhaustivas acerca de los refugiados). Los usuarios pueden solidarizarse con ellos creando su propio Pasaporte de Refugiado. La web proporciona información real sobre los movimientos de las grandes migraciones a través de mapas y también posee un enlace con el UNHCR, Alto Comisariado de las Naciones Unidas para los Refugiados.

[Mario Hergueta. Cybordelics](#)

Cybordelics es la primera red personal de ordenadores on line que nos incita a participar en ella con estas

sugereentes propuestas: "¿estás cansado del mismo PC viejo y aburrido mirándote fijamente a la cara? ¿estás cansado del mismo sistema operativo viejo y disfuncional? Quizás sea el momento de evadirse definitivamente del diabólico imperio de Microsoft y de todos sus miserables clones y productos basura construidos mediante un bajísimo denominador común. Si, tu necesitas un PNC PX-2000 (Personal Network Computer), un sistema creado por los genios más geniales, que verdaderamente puede hacer posibles cualquiera de tus sueños. ¡Conéctate y participa!". Encontraréis muchas colaboraciones de los principales autores referenciados en este directorio. Inglés.

Ricardo Iglesias

DIY Do it yourself. Tomando como excusa el texto "[Manual de referencia para el artista de Internet](#)" de Lourdes Cilleruelo, Ricardo Iglesias se propone "ofrecer una orientación desorientada siguiendo las diferentes secciones en que esta dividido el texto, que funcionará como un gran menú, como una estructura hipertextual con múltiples links, como una interfaz de acceso a las diferentes piezas que se crearán para cada uno de estos enunciados y para los enunciados internos, planteando de una manera abierta los diferentes problemas a los que se enfrenta una pieza de Internet, como la autoría, la accesibilidad, el nombre de los dominios, la incidencia real de las propuestas planteadas, la virtualidad, la presentación formal en un mundo físico, las diferentes formas de interacción, la inexistencia del objeto único, los soportes secundarios, la programación utilizada, la visualización sobre eventos externos, la traducción a otros idiomas (inglés, francés, alemán) o a otros lenguajes (ASCII), la visibilidad de la pieza en la maraña de las redes, la participación por parte de los usuarios, la creación de bases de datos, la utilización de bots y otros miniprogramas, para terminar con la conclusión y dentro del caos correspondiente: **prescinde de cualquier intermediario y erígete como comisario de tu propia obra!!!!**

Dangerous liasons: Arte = Dinero + Política. Este trabajo se centra en la realización de fotografías en el marco de grandes inauguraciones museísticas, bienales, trienales y todo tipo de evento artístico de carácter internacional. La participación de los usuarios es fundamental, ya que son ellos quienes aportan la documentación de las diferentes exposiciones a través de sus imágenes y comentarios. La página web consiste en una base de datos que muestra de manera individualizada y por bloques cada una de las aportaciones. Actualmente están en marcha los bloques que corresponden a las inauguraciones de la Colección del MACBA de Barcelona (2002) y a la exposición "On Translation" de Muntadas (2003). La idea que reside en la base de este proyecto no es la construcción de un ingenuo archivo documental fotográfico, sino algo más crítico y complejo pues la pieza "indaga las relaciones creadas entre estas tres esferas que aparentemente funcionan de una manera independiente, pero que mantienen entre sí profundos vínculos de subsistencia".

Institute for Applied Autonomy

El IAA fue fundado en 1998 por un colectivo de artistas, ingenieros, escritores y activistas que decidieron dedicarse a la investigación de temas relacionados con el espacio público, la libre expresión y la vigilancia electrónica. Asimismo este grupo se interesa por el desarrollo de soluciones tecnológicas que ayuden a los intereses activistas a través de actuaciones públicas subversivas: para el proyecto **Contestational Robotics**, por ejemplo, han diseñado "**robots objetores**" que responden a las necesidades y al presupuesto de las fuerzas culturales de resistencia. Entre sus trabajos en la red destaca **iSee** una aplicación de Internet que explora los lugares donde se han colocado cámaras de vigilancia en circuito cerrado de televisión (CCTV) en el entorno urbano. .

JODI

UNO - DOS - TRES - CUATRO - CINCO y SEIS increíbles proyectos + **MAP (2000)**

Cuando en 1995, JOan Heemskerk y Dirk Paesmans decidieron crear una página web para mostrar su trabajo fotográfico, cometieron un error fatal que desencajó la página convirtiéndola en un caos de colores y signos. Pero el resultado plástico les pareció tan interesante, tan sorprendente, que dejaron de lado su pretensión inicial para concentrarse en este nuevo descubrimiento. Desde entonces no hacen otra cosa que dar órdenes contradictorias a la máquina con la intención de generar errores premeditados. La característica común a todos sus proyectos es que el usuario se enfrenta siempre a una serie de caracteres parpadeantes, a menudo sin ningún sentido: clickar no hace más que generar una nueva pantalla, distinta, pero siempre parpadeante e ilegible. En alguna de sus propuestas sólo la lectura del código fuente del documento nos permitirá obtener caracteres legibles: se trata de dibujos en ASCII, acumulados sobre las páginas de tal manera que el ordenador los ha re combinado según su propia lógica no visual. Es entonces cuando comprendemos que JODI nos está mostrando la cara oculta del ordenador, lo que está tras la pantalla, el interior de la máquina: paradójicamente, su lenguaje lógico, racional, genera un sin-sentido a partir de imágenes que sí son significantes para nosotros, los seres humanos.

SOD (2001). PROJECT WL_GAME.C Modification. La peculiar concepción de la Red que defiende JODI en todos sus trabajos —basada en la manipulación, la subversión y los errores de programación— se extiende también a este irracional y extraño juego. Aunque **SOD** parte de modificaciones en el código fuente del **Quake** y de **Castle Wolfenstein**, no esperéis encontrar aquí referente alguno; ambos han sido desposeídos de su estética y contenido guerrero para convertirse en un desconcertante entorno minimalista de planos geométricos blancos, negros y grises con los que el jugador interactúa sin ningún sentido, objetivo ni intención. Caos absoluto. Desaparece el condicionante de competitividad, pero arrastra consigo la noción de juego.

untitled game (2002) es un CD y también una web de JODI con doce modificaciones del juego **Quake**. La primera modificación, "Arenas", es de un blanco deslumbrante porque toda su arquitectura visible ha sido eliminada, quedando tan sólo los componentes del interfaz y el sonido. En el resto de modificaciones, el sonido también queda intacto de manera que el ataque de los monstruos y sus gruñidos se pueden oír en medio de extrañas composiciones

formalistas. Todas estas variaciones presentan una exploración lúdica y descontrolada del sistema **Quake**, un diálogo sobre los entornos en 3D y sobre sus posibilidades.... de volvernos locos.

[John Klima. The Great Game](#)

John Klima ha desarrollado numerosos proyectos de software creativo, entre los que destaca este peculiar juego en 3D que se desarrolla en el territorio de Afganistán durante la **Operación Libertad Duradera**. Este representa un mapa en relieve de Afganistán donde se traza el avance de las fuerzas militares norteamericanas en las fortalezas talibanas. La evolución del recorrido se inicia el 7 de octubre de 2001 y cada minuto nos avanza la información de un día; una progresión que se basa en las estadísticas desclasificadas de la web del Departamento de Defensa de EEUU. Desafortunadamente, el proyecto se acaba de ampliar con la sección **Iraq Expansion Pack & Campaign Maker v1.0!** Inglés.

[Knowbotic Research](#)

El genérico **IO_Dencies** ("tendencias") es el proyecto matriz del grupo Knowbotic Research básicamente interesado en explorar las posibilidades de intervención y actuación en los complejos procesos urbanos. Esta serie de proyectos muestra diferentes cortes topológicos a través de un montaje heterogéneo de espacios físicos, imaginaciones urbanas, organismos conectores y experiencias individuales, pero son presentados como espacios urbanos de acción y reflexión públicamente accesibles y modificables. En cualquier caso, el objetivo de Knowbotic Research no es desarrollar avanzadas herramientas para la arquitectura y el diseño urbano, sino crear situaciones que nos permitan repensar la planificación urbana y la construcción. Inglés.

Aleph ha colocado un mirror en castellano de **IO_LAVORO IMMATERIALE**, una base de datos colectiva en Internet, generada por Maurizio Lazzarato (teórico político), Luther Blisset (colectivo de activistas media), Michael Hardt (filósofo), Hans Ulrich Reck (teórico de los media), Enzo Rullani (economista) y Laia Vantaggiato (periodista). "Esta base de datos funciona como una máquina de discurso abierto que cuestiona las actuales condiciones de acción y producción creativas en el campo social. Cada uno de los participantes desarrolla un mapa individual con información textual (en italiano y en inglés), que evoluciona hacia una topología discursiva en continua transformación. La información de cada uno de los mapas de los distintos participantes se auto-organiza en un nuevo mapa. En éste, las relaciones entre la información añadida y manipulada por los diferentes participantes será visualizada como movimientos y campos de fuerza". Esta página incluye 4 textos principales traducidos.

Minds of Concern: Breaking News Esta instalación interactiva plantea una revisión crítica de los conceptos de libertad, seguridad y vulnerabilidad del metabolismo global de las comunicaciones telemáticas. Por medio de una interfaz llamada Public Domain Scanner, el usuario puede analizar las principales páginas de grupos, asociaciones y ONGs relacionadas con los distintos movimientos civiles en Internet, y detectar su grado de vulnerabilidad en la red. Los resultados del análisis se visualizan a través de señales de luz, sonido y flujos de datos proyectados en el espacio expositivo sobre un tapiz de largas tiras de plástico entrelazadas. Con ello se genera una zona de alerta transitable que conecta las redes virtuales con el espacio real. Inaugurada en la exposición Open Source Art Hack del New Museum de Nueva York e inmediatamente censurada, esta obra fue presentada con éxito en la muestra **el banquete** que tuvo lugar en España y Alemania.

[Andreja Kuluncic. Closed Reality: Embryo](#)

Proyecto que Andreja Kuluncic desarrolla junto a Gabrijela Radek, Matija Puzar e Ivo Martinovic. **Embryo** es un experimento basado en la interacción entre una serie de usuarios que escogen diferentes opciones para **crear un nuevo ser humano** que, tras la primera fase, entra en una embrión-galería, junto con los datos asignados por su creador. La segunda parte del proyecto consiste en una comparación entre la sociedad de humanos creados por los usuarios de Internet y la sociedad real. "Si podemos conocer el ADN y manipular el código genético, las generaciones futuras pueden encontrarse a nuestra merced... Este proyecto no es un juego ficticio y tampoco pretende popularizar descubrimientos científicos. Se trata más bien de una observación experimental sobre el desarrollo de la consciencia y de la ciencia. Propone una simple cuestión: ¿Hasta que punto estamos preparados para participar en todo lo que hemos hecho posible y en aquello que ansiamos hacer posible por nosotros mismos?" Inglés.

[La Société Anonyme](#)

Grupo de artistas y teóricos de composición variable, fundado en 1990 y dedicado específicamente a investigar y desarrollar experimentalmente las relaciones entre las prácticas artísticas y el pensamiento crítico. Ha producido numerosas obras, incluyendo textos, videos, instalaciones, piezas para catálogo y obras para la red. Actualmente trabaja exclusivamente en la problemática de la red, en cuanto relacionada con la extinción crítica del existir separado de lo artístico en las sociedades contemporáneas. Inglés y castellano.

[Latenta. ¿Quién es tu artista favorito?](#)

Latenta te ofrece la oportunidad única de descubrir como es tu artista favorito: su perfil psicológico, el tipo de trabajo produce, su actitud hacia su obra, su público. Aquí tienes un peculiar cuestionario cuya finalidad es detectar tus gustos y preferencias en cuestión de arte... y también tus trazos psicológicos más ocultos. Excelente proyecto de **The Somniloquy Institute**. Inglés y francés.

Tina Laporta. SHIFTING

¿Donde estará el cuerpo en el futuro? Todos los proyectos de net.art de Tina Laporta están incluidos en esta página que pretende explorar la potencialidad y el significado del cuerpo en el nuevo entorno de las comunicaciones tecnológicas. Un intento de reafirmación de la identidad femenina y la individualidad en una era de intensa transformación tecnológica. La tendencia de general de todas sus obras es claramente feminista y queda reflejada en títulos como [Women and Performance](#) y [The World's Women Online](#). Entre sus obras más recientes, [Future body version 1.0](#), [Alterities](#) y [Unveiled Imprints](#), una web de pantalla única que muestra el deseo femenino mediante imágenes pornográficas. Inglés.

Peter Luining. FF00FF Remixes

Remezclas de las piezas clásicas del net.art: obras de JODI, antirom, turux, lfoundation, kalx, antiorp, etc. Peter Luining estudió filosofía contemporánea y estuvo dirigiendo video-clips y haciendo trabajos comerciales con animaciones en 3D hasta que, en 1996, se dedicó por completo al net.art. Sus proyectos han sido bastante minimalistas y siempre ha mantenido un carácter experimental en todas sus propuestas. Inglés.

Conor McGarrigle. Spook

El irlandés Conor McGarrigle, net.artista y fundador de [Stunned.org](#), ha creado este proyecto artístico que aborda las cuestiones sobre vigilancia y rastreo en la red a través de una web interactiva basada en las convenciones de los videojuegos. Spook rastrea los movimientos de un servidor militar descubriendo su identidad, su ubicación geográfica, sus webs y también sus hits y sus condiciones de accesibilidad. El resultado es un verdadero mapa del servidor representado e interpretado gráficamente mediante animación y datos en bruto. Según Conor McGarrigle se trata de “una fascinante oportunidad de adquirir una nueva percepción de la estructura y de las actividades online de este particular sector del complejo industrial militar, y también de preguntarnos a nosotros mismos sobre la propia naturaleza de la red”

Jenny Marketou. Smell.bytes (TM) (1998-1999).

Smell.bytes es el entorno online de [Chris.053](#), un *bot* que trabaja las 24 horas del día en Internet viajando por nodos y direcciones y que se dedica a capturar los olores corporales de los habitantes de ciber-cafés y de chats a través de sus perfiles fotográficos. Esta especie invisible de la red cuenta con una base de datos de 7.000 olores y una colección de perfiles humanos que evalúa según su simetría, belleza y olor corporal para determinar qué clase de personas son y cuál es su valor en esta sociedad. Jenny Marketou lo ha creado como “un [serial sniffer](#), un hacker, un intervencionista que trabaja desde una posición simbólico-política y un artista”. Este proyecto contiene dosis de tecnología de la información, de espionaje, de inteligencia artificial y de arte contemporáneo, pero sobre todo cuestiona el valor de la privacidad, la autonomía individual y el cuerpo. También hemos seleccionado este texto de Sonia Papa titulado [Smell bytes: an outline for a cannibalistic serial murder of beauty mystery](#). Inglés.

[Taystes \(2001\)](#). Influenciada por Smell.bytes, esta reciente obra de Jenny Marketou está concebida como una herramienta online que permite al usuario un acceso ilimitado al mundo de las redes e infraestructuras de la comunicación tales como webcams, chat rooms y flujos de información que circulan en los espacios de vigilancia de la red.. Inglés.

* Antonio Mendoza. Subculture

Las obras de Antonio Mendoza son una especie de metacollages realizados a partir de imágenes, sonidos y scripts pirateados de revistas, libros, CDs, y webs corporativas y pornográficas (una acertada combinación). El propio autor define Subculture como “un paraíso autista repleto de información pero salteado de fastidiosos motivos repetitivos” donde la navegación randomizada puede conducirnos a curiosas interferencias entre las imágenes. Quizás la forma más precisa de definir su trabajo sea a partir de sus propias palabras clave: war, underground, posthuman, ironic, interface, corporate, commercialization, browser abuse, audio, animation, robot, machine, desire, artificial life, sex, japanese comic, chaos, appropriation, collage, piracy, virus worship, anti-copyright, corporate logo sabotage, disinformation, spam art,... en cualquier caso, un cóctel epiléptico que aborda de la manera más ácida posible todas esas referencias y acontecimientos globales que inevitablemente afectan a nuestras vidas. Este proyecto principal, junto con todas las derivaciones posteriores, enlaza con otros de sus espacios más emblemáticos: [Mayhem](#). Inglés.

Sally Minker y Jennifer Sloan. Artist Protection & Benefit Program

¿Que sucede cuando muere un artista? Pues que la cotización de su obra sube como la espuma. Pero claro, el ya no puede disfrutar esta nueva situación. Sally Minker y Jennifer Sloan han encontrado la solución a este problema creando un “Programa de Protección a Artistas”, similar a los “programas de protección de delatores” que conocemos por las películas americanas, y que consta de tres pasos: En primer lugar se trata de eliminar al artista que lo solicite del mundo del arte, después se le proporciona una nueva identidad en algún lugar paradisíaco donde pueda seguir creando lo que verdaderamente le apetezca y, finalmente, sólo queda cobrar los dividendos que le proporcionen la venta de sus obras “en vida”. Todo está controlado, con total garantía.

MONGREL

Mongrel es el nombre de un colectivo inglés de artistas Matsuko Yokokoji, Richard Pierre-Davis, Harwood y Mervin Jarman que, según sus palabras "trabajan juntos para celebrar los métodos de la ignorante e inmunda cultura urbana londinense". En todos sus proyectos poseen una fuerte implicación social, ya sean artísticos, creación de softwares o puesta en marcha de talleres. En ellos obligan al usuario a enfrentarse a sus propios prejuicios raciales culturales, biológicos y tecnológicos: de hecho todos sus trabajos investigan el arraigo del determinismo biológico racial en la cultura y en la vida diaria. Natural Selection, por ejemplo, simula la apariencia de un motor de búsqueda que "funciona a plena potencia" cuando el usuario introduce un término racista o pornográfico, enviándole precisamente a sitios web que se dedican a desenmascarar el racismo, el clasismo y la xenofobia en la red. Y Heritage Gold es un software gratuito con vocación activista que sustituye las herramientas y comandos convencionales del Adobe Photoshop por términos racistas y clasistas. Los menús del programa permiten al usuario añadir, modificar, o reducir los niveles de las características de cada raza, ya sean chinos, africanos, indios o caucasianos. Desde su página se puede acceder a otros proyectos: Rehearsal of Memory, National Heritage, Linker, and Uncomfortable Proximity. Inglés.

MTAA. MT Enterprises World Wide

MTAA es una iniciativa de colaboración artística y empresarial entre los artistas neoyorkinos **Mark River y Thomas Whid**. Su trabajo crítico explora la reconciliación entre las prácticas y estrategias artísticas contemporáneas e Internet. Este es el caso de TIME!®: the Nostalgia-Free History Sale, donde venden ediciones limitadas de dibujos; The Visual-Text Art Venue (V-TAV), una galería de información contemporánea; o Direct-to-Your-Home Art Projects (DYHAP), un proyecto que utiliza la comunicación por e-mail en las principales listas de correo artísticas para enviar las instrucciones de montaje y colocación de obras de arte en nuestros propios salones; ...aunque quizás uno de sus mejores y más populares trabajos sea el **Simple Net Art Diagram**. Inglés.

Muntadas

The File Room es un proyecto pionero en la web sobre **la censura en el arte y la cultura**. Consta de dos partes: una instalación, destinada a exhibirse en espacios físicos, y un archivo en la red que permite aportar información relacionada con el tema. Cualquier usuario que sepa de alguna obra censurada, esta invitado a aportar todos los datos que considere necesarios; después esa información estará al alcance de todos aquéllos que deseen consultarla en la web. Proyecto desarrollado por la Randolph Street Gallery de Chicago en colaboración con el Electronics Visualization Laboratory de la Universidad de Illinois (Chicago). Existen numerosos artículos sobre este importante artista mediático, pero desde aquí hemos seleccionado los siguientes textos online: **A De-cafinated Experience (of Net.Art)**, una entrevista realizada por Josephine Bosma y publicada en inglés en Telépolis y un artículo-entrevista de Robert Atkins titulado **Censor Sensibility: Antoni Muntadas on the "Media Landscape"**. Inglés. En **On Traslation**, un proyecto concebido para la Documenta X de Kassel, Muntadas parte de una breve frase formulada en inglés **-Communication in systems provide the possibility of developing better understanding between people: in which language?-** y posteriormente sometida a sucesivas traducciones de una lengua a otra, hasta un total de 23, pero sin volver a remitirse al enunciado original. "Como en el juego infantil del *teléfono* –metáfora de los propios juegos interactivos y de la conexión en la red-, el sentido literal de la frase original va transformándose y adquiriendo giros imprevistos en los sucesivos rizos de una espiral". Muntadas lanza la frase original y después sólo tiene que esperar sus incontrolables y, no obstante, previsibles efectos. Este proyecto forma parte de una serie de trabajos que exploran los conceptos de transcripción, interpretación y traducción: del lenguaje a los códigos, de la ciencia a la tecnología, de la subjetividad hasta la objetividad, de lo privado a lo público, de la semiología a la criptología: Español, coreano, alemán, árabe, inglés, japonés, portugués, hebreo, noruego, italiano, indonesio, finés, polaco, francés, chino, griego, ruso, hindi, holandés, urdu, rumano, checo y suahili.... ¡Por Dios!

*Mark Napier. POTATOLAND

En este espacio se mezclan los proyectos artísticos de excelente factura con espacios tremendamente críticos e incisivos, como es el caso de **Digital Landfill**, un vertedero on line, donde el visitante puede deshacerse de todos los desperdicios digitales que ya no necesita (e-mails, datos obsoletos, spam, viejas webs), contribuyendo a **"la creación del abono virtual para fertilizar el terreno de las ideas de diseñadores y artistas"**. Luego puede visualizar los desechos por bloques, inspirarse en ellos y utilizar los que necesita para realizar sus obras. La web también da acceso a dos creativos navegadores, ambos ideados por **Mark Napier: RIOT**, un browser que realiza un collage automático de la página que el usuario desea visualizar,... junto a las tres últimas que éste ha visitado: "Riot es un navegador multiusuario y antisocial al mismo tiempo; es un entorno darwiniano donde los contenidos luchan por sobrevivir"; y **The Shredder**, un navegador que presenta la estructura global de la página como un collage caótico e irracional: The Shredder se apropia de los datos de la página, destruyendo su estructura para luego reconstruir con sus contenidos otra web paralela a la original. **Una web magnífica**. Inglés.

Netochka Nezvanova. NATO.0+55

Software Art. Netochka Nezvanova -"Nameless Nobody"- es un misterioso colectivo que ha asumido el nombre de una de las primeras novelas de Dostoievski (1849) para darse a conocer en el mundo del net.art a través de

conferencias y performances. Aparece por primera vez en la primavera del 2000 en Montreal presentando su producto estrella, [NATO.0+55](#), un software para el tratamiento de la imagen y el sonido en tiempo real concebido como un conjunto de objetos externos QuickTime para MAX. Este programa permite la entrada de datos, su análisis, manipulación, transformación y su descomposición/recomposición en un producto modificado a partir de la mezcla de esos datos iniciales. Sus textos están repletos de citas y reflexiones biológico-socio-económico-políticas donde predomina cierta ideología feminista y anticorporativista. La versión original de [NATO.0+55](#), y su versión mejorada [NATO.0+55.3d](#) modular, han sido presentadas en los principales eventos internacionales de arte digital, pero siempre por diferentes artistas de nacionalidades diversas: Bruce Gremo, Johnny DeKam, Kurt Ralske y Jeremy Bernstein (EEUU), Rene Beekman (Holanda), Anne Laforet (Francia) y Domiziana Giordano (Italia). Anteriormente, algunos miembros de este colectivo utilizaron los nombres de [m9ndfukc](#) o [membank](#) para comunicarse en listas de correo como Nettime o Rhizome mediante un lenguaje inventado que mezclaba cifras e imágenes en caracteres ASCII con inglés, francés y alemán. Más información en: [Nato 0 + 55 + 3d modular](#), en [boot squad research](#), en [fiftyfifty.org](#) y en [miau-miau](#). Y también podéis ver algunas de sus piezas en: [0f0003.MACHIN3NKUNST](#), en [Membank](#) y en [Dadata Fyftyfifty](#), pero cuidado con "los cuelgues" de ordenador. Inglés.

* [Josh On, Futurefarmers. They Rule](#)

[Ellos mandan...](#) En 1956, C. Wright Mills escribía [The Power Elite](#) documentando las interconexiones entre la gente más poderosa de los EEUU. Desde entonces, la situación se ha vuelto todavía más extrema: unas pocas compañías controlan los grandes monopolios del sector económico y sus directores no sólo están relacionados comercialmente, sino que ocupan cargos relevantes en el gobierno. Por supuesto, sus conexiones permanecen ocultas al común de los mortales. [They Rule](#) intenta hacer visible estas conexiones de la élite a través de mapas y directorios interrelacionados que los usuarios pueden modificar y ampliar según sus propias informaciones. Impresionante diseño y contenidos. Este proyecto ganó el Premio Golden Nica en la categoría Net Excellence en el último certamen de Ars Electrónica celebrado del 7 al 12 de septiembre de 2002 en Linz (Austria) bajo el lema [UNPLUGGED. Art as The Scene of Global Conflicts](#).

[PaperVeins. Genochoice©](#)

"Gracias por tener en cuenta a [GenoChoice©](#) en el plan de futuro de su familia. Mi nombre es Dra. Elizabeth Preatnet, especializada en genética prenatal y embriología. Utilizando nuestros medios tecnológicos-artísticos usted puede estar seguro de que la vida de su hijo quedará libre de enfermedades como el cáncer, el Alzheimer y los ataques al corazón - y también de problemas como la obesidad, la agresión y la dislexia-. Con la ayuda especial de [GenoChoice©](#) usted podrá elegir los genes específicos que determinen las características favorables de su hijo". Evidentemente, el proyecto trata de la identidad y de la selección genética. El usuario puede crear un clon de sí mismo o elegir las características psico-físicas de su niño y, tras la lectura del posible código genético, [Genochoice©](#) le propondrá varios cambios y mejoras, acompañados de sus respectivas tasas. Si el visitante acepta las condiciones, recibe un correo informándole de que ha empezado el desarrollo de su criatura. Inglés.

[Pornolize](#)

Espacio de difícil catalogación y descripción; quizás podríamos decir que se trata de un "juego políticamente incorrecto". Introduce un texto, preferiblemente que haga alusión a la Iglesia, la teoría del arte, la literatura infantil, o simplemente tu currículum y mira a ver que pasa. Inglés, sueco, danés, noruego y húngaro.

[Francesca da Rimini](#)

Esta artista australiana inició su trayectoria artística en el vídeo durante los 80 y fue co-fundadora del colectivo cibrefeminista [VNS Matrix](#) junto a Julianne Pierce, Josephine Starrs y Virginia Barratt. En esta página se encuentran recopilados todos sus proyectos artísticos, entre los que destacan [Dollspace](#), una obra en colaboración con Ricardo Dominguez y Michael Grimm que presenta la historia de una mujer asesinada, Dollyoko, cuyo nombre coincide con uno de sus "alias". También [Los días y las noches de los muertos](#) es un proyecto realizado también junto a Michael Grimm y el colectivo Los Fantasmas que está dedicado al movimiento zapatista y que posteriormente amplió su radio de acción con un dossier de violaciones de derechos humanos que se cometieron en el encuentro G8 de Génova. Asimismo, Francesca da Rimini lleva a cabo una serie de iniciativas de carácter crítico a través de su reciente alias [GashGirl -GashGirl's Favourite US Defense Contracts for April 2002-](#). La web también da acceso a sus propios textos y a las principales entrevistas. Inglés.

[Alex Rivera. Remote Labor Systems \(RLS\)](#)

El artista Alex Ribera ha creado esta satírica página que propone la sustitución de los tradicionales braceros por prototipos robóticos cuyo objetivo es reemplazar a los inmigrantes en la industria agrícola de EEUU. Según su autor, "Cybracero es el programa que usa la tecnología robótica para reemplazar al bracero que tiene que viajar desde otros países para venir a trabajar a los campos de este país. Los robots se hacen cargo del trabajo de campo al sembrar y recoger las cosechas mientras son operados a control remoto por campesinos desde sus países de origen. Los trabajadores se quedan en sus países de origen y no tienen que separarse de sus familias, pero todavía pueden trabajar al operar electrónicamente los robots". Inglés.

Gustavo Romano. Cyberzoo

Este proyecto nos permite, en la seguridad de nuestro PC, experimentar los más salvajes virus informáticos enjaulados en su servidor. Del mismo modo que los zoológicos tienen por objetivo la investigación, reproducción y conservación de especies amenazadas en peligro de extinción, CyberZoo está involucrado en programas internacionales de cría en cautividad de especies amenazadas de virus y participa en diferentes proyectos de recuperación y reintroducción de vida artificial. La web nos propone un tour por diferentes tipos de virus en cautividad, que en este entorno podemos observar en acción, tal y como se muestran en las pantallas de los ordenadores cuando viven en libertad. Para ayudar al crecimiento de la fauna salvaje en la red, la web también contiene una sección desde la cual los usuarios pueden enviar postales con virus y otra donde es posible hacer donaciones. Español.

RSG Radical Software Group. CARNIVORE

El DCS1000, o CARNIVORE, es un programa de interceptación, desarrollado y utilizado por el **FBI**, que captura los datos de tráfico y los contenidos de un mensaje electrónico (en las dos direcciones). Inspirado en este programa, el colectivo internacional de net.artistas RSG ha creado su propio proyecto "Carnivore", de idéntico nombre y similares características. Este consta de dos partes: un servidor que actúa en un área concreta del tráfico de datos convirtiéndolos en imágenes y sonidos; por ejemplo, si instalamos la aplicación en nuestro ordenador, Carnivore podría ver todos los e-mails, páginas web recibidas o transmitidas y documentos añadidos de todos aquellos con quienes nos conectamos en la red. Pero también ofrece una serie de aplicaciones que ponen a disposición de los artistas y activistas de la red, para que los reinterpreten de diferentes maneras creativas. Entre sus clientes se encuentran Entropy8Zuper, Joshua Davis (Praystation) Mark Daggett y Mark Napier. Este proyecto ganó el Premio Golden Nica en la categoría Net Vision en el último certamen de Ars Electrónica celebrado en septiembre de 2002 en Linz (Austria) bajo el lema **UNPLUGGED. Art as The Scene of Global Conflicts**. Inglés.

Julia Scher. Securityland

Proyecto que que explora de manera lúdica todo tipo de sistemas de control, desde las cámaras de vigilancia en circuito cerrado a los cuestionarios que ceden información privada en Internet. La artista ironiza sobre estos últimos y somete al usuario a un disparatado interrogatorio. *"El control no es sólo parte de un profundo deseo de seguridad, sino también de una forma de orden. Debes entender el orden del mundo. Con mi trabajo, yo también contribuyo a buscar un orden del mundo"*. (Declaraciones de Julia Scher en una entrevista de Noemi Smolik publicada en Kuntsforum). El trabajo de Scher consigue desarrollar los temas de intimidad y control, con los que ya está suficientemente familiarizado el usuario de la red, de una manera lúdica y autoreferencial. Inglés.

SERO.ORG. Blank & Jeron

Página que da acceso a varios proyectos artísticos de Joachim Blank y Karl Heinz Jeron. (Uno de ellos, **without addresses**, se presentó en la Documenta X del 98). "Fundada en 1949, en la RDA, como una empresa de reciclaje de papel, SERO sobrevive a la caída del muro de Berlín y actualmente funciona reciclando basura electrónica" Blank & Jeron *dixit*. Sus proyectos son instalaciones híbridas basadas en el "reciclaje de sistemas de información" y en general, todo su trabajo cuestiona el paradigma de una sociedad donde la abundancia de información sólo es equiparable a la ausencia de contenido. En **Dump your trash**, por ejemplo, se brinda al usuario la posibilidad de reciclar su vieja página, convirtiéndola en una obra de arte. Tan sólo tiene que enviar la URL y pagar 1.500 dólares y entonces recibirá en su domicilio un bajorrelieve en mármol grabado con un trozo de texto, una imagen y la dirección de su web. **¡Un diploma en mármol! ¡Por fin la evanescencia de la red se consolida en materia!** Inglés.

Alexei Shulgin. FuckU-FuckMe

En este proyecto, Alexei Shulgin pone a la venta por 500 dólares cada uno, "unos aparatos que proporcionan la más completa solución al sexo por control remoto en Internet; un sistema con un interfaz intuitivo que permite al usuario concentrarse completamente en la comunicación sexual". La página se carga rápidamente y las imágenes son muy explicativas... Desde **su página personal** se puede acceder también al magnífico - e irónico- texto **Introduction to net.art (1994-1999)**, escrito en colaboración con **Nathalie Bookchin** y Blank&Jeron, del grupo **SERO**. Inglés.

N Yoshi Sodeoka. ASCII Bush

El artista Yoshi Sodeoka, del grupo C505, ha realizado este trabajo en ASCII que recoge dos videos de Bush y Junior: A la izquierda y en azul, un discurso de George W. Bush que tuvo lugar el 12 de Enero de 2003, sobre la Guerra de Irak; y a su derecha, en rojo, el discurso de su padre George H.W. Bush, sobre la Operación Tormenta del Desierto, el 6 de marzo de 1991. El artista nos recuerda que a pesar de las increíbles similitudes en sus ideas y en protocolo gubernamental los discursos no están editados, sólo se han filtrado con medios digitales.

[The Missing Gene Project](#)

¿Por qué nosotros podemos hablar y los (otros) animales no? Tras la muerte, en 1994, del biólogo británico Sir Richard Thomas Bacon, se publicaron sus cuadernos privados. En ellos, describía una "mutación evolutiva" que se produjo en nuestros genes. En su investigación -test de DNA realizado a humanos, primates y loros, donde se estudiaban más de 1000 genes- Beacon descubrió que algunas personas carecen del "gen del habla" D2433, aunque no parecían tener problemas a la hora de expresarse. The Missing Gene Project es un homenaje a Richard Beacon y a su importante contribución al conocimiento humano. La web presenta varias secciones: Información sobre Richard Beacon y su descubrimiento del gen D2433; su relación con la teoría del lenguaje propuesta por el escritor americano William S. Burroughs ("Language is a virus"); - por qué la gente habla, por qué no lo hacen los primates y cómo lo hacen los loros (con 13 archivos de audio!); información científica sobre el gen D2433, y un increíble test online de nuestro propio DNA. Otro excelente proyecto de [The Somniloquy Institute](#). Inglés.

[The Pinocchio Files](#)

Bienvenidos al universo donde las verdades son verdades y las mentiras, mentiras. Base de datos y recopilación de artículos sobre Mentiras y Fraudes, Aplicación Jurídica y Contribuciones Científicas. Para todos aquéllos que les gustaría saber mucho más sobre verdades y mentiras, y cómo reconocerlas. Según sus autores, el objetivo de este espacio holandés es crear un entorno educacional y de entretenimiento donde no se toleren conductas que puedan ser perjudiciales para los demás. Alojada en el excelente [The Somniloquy Institute](#). Inglés. *Aprovecho aquí para recomendaros una lectura relacionada que provocará algunas desmitificaciones (necesarias): [Imposturas intelectuales](#), Alan Sokal y Jean Bricmont, Paidós Transiciones, Barcelona, 1999. Repasito a Jacques Lacan, Julia Kristeva, Luce Irigaray, Jean Braudillard, Paul Virilio, Gilles Deleuze y Felix Guattari. Vamos, que no deja títere con cabeza.

[The Surveillance Camera Players](#)

Activistas políticos (se definen como anarquistas) que consideran que el uso de cámaras de vigilancia por parte de la policía es una flagrante violación de la cuarta enmienda de la Constitución Americana y se manifiestan en contra de su utilización. Los componentes del SCP realizan sus actuaciones frente a las cámaras de vigilancia aupándose para hacer sus pantomimas y alzando sus carteles hasta ellas (las cámaras no graban el sonido). Su repertorio es muy amplio e incluso tienen "números especiales" para lugares concretos, como por ejemplo iglesias. En su web se pueden consultar todo tipo de documentos legales y artículos sobre el uso y abuso de las cámaras de vigilancia, una situación que se ha agravado especialmente tras los hechos del 11 de septiembre de 2001. También encontrareis una detallada descripción de sus ideas y actividades en [NOT BORED](#).

[The Technologies To The People®](#)

Daniel García Andujar es artista, miembro de [irational.org](#) y fundador de Technologies To The People. Inició su actividad artística a finales de los 80, interesándose especialmente en proyectos de intervención pública relacionados con el abuso de la tecnología en los sistemas de vigilancia y con el racismo y la xenofobia. A partir de 1996, comenzó a desarrollar el proyecto Technologies To The People que consta de un espacio en la web y de diferentes extensiones bajo la forma de instalaciones y presentaciones en espacios físicos. En todas ellas, el autor cuestiona siempre los límites de la información legal, el acceso a la tecnología y la supuesta interactividad de la red, así como su credibilidad. La labor que desarrolla Daniel García Andujar mantiene su base de operaciones en Internet, mientras cuestiona sus supuestas ventajas, sus usos y abusos.

[Phoney](#) es un proyecto informativo que tiene lugar en la red y que ha sido concebido como una base de datos de armas informáticas (programas y virus) al servicio de cualquier persona que decida hacer uso de ellas,... y que conozca sus códigos. No obstante, la obra posee dos niveles: uno más especializado, para hackers capaces de provocar verdaderas catástrofes informáticas como introducirse en los ordenadores de potentes empresas o infectar servidores; y otro mucho más sencillo: resguardado en el anonimato, un usuario neófito puede seguir las sencillas instrucciones de Phoney para realizar pequeñas transferencias bancarias o para escuchar conversaciones telefónicas. Cualquiera de estas operaciones es absolutamente ilegal, y así lo advierten repetidos anuncios en la pantalla de nuestro ordenador, pero el artista ha decidido confiar en el buen juicio y en el sentido de la responsabilidad del usuario. Que se pueda acceder libremente a la información no significa forzosamente que se deba hacer (mal)uso de ella ...¿o sí?. Inglés.

[The Yes Men The Yes Men y World Trade Organization.](#)

The Yes Men crearon en 2000 una página denominada [GATT.org](#) que parodiaba la estética y los contenidos de la WTO (Organización Mundial del Comercio, en español). En mayo de 2000 recibieron un e-mail invitando a su director general Mike Moore, a hablar de la WTO en una conferencia acerca de materias relacionadas con el comercio internacional. The Yes Men decidió enviar a un representante que pronunció una demencial conferencia sin que el público llegase a sospechar nada. Desde entonces han realizado varias intervenciones similares ante audiencias predispuestas a aceptar cualquier cosa que provenga de la WTO. Posteriormente han parodiado también la página de la poderosa industria estadounidense [The Dow-Chemical](#), evidenciando su responsabilidad sobre la catástrofe de Bhopal (India) donde han muerto más de 20.000 personas. Desde estas páginas se puede acceder a toda la información.

Andrej Tisma

Página personal de este artista, crítico y comisario yugoslavo que atenta contra MacDonals y contra la Coca-cola, contra los regalos de Navidad y contra los *christmas*, contra los cuestionarios, contra los daños colaterales, contra... En fin, contra **ese estilo de vida típicamente norteamericano**.

Transnational Temps. Novus Extinctus

El grupo Transnational Temps, formado por los artistas Andy Deck (EEUU), Fred Adam (Francia), Verónica Perales (España), ganó con esta obra el tercer premio del certamen **VIDA 4** correspondiente a la edición de 2001. "Los artistas han realizado una extensa obra basada en Internet compuesta por una taxonomía de nombres de dominio de la Web, un buscador que rastrea por estos datos extraños, eslóganes de marketing, datos insertados por usuarios en el sitio y misteriosos gráficos. La idea y el mensaje clave de Novus Extinctus es que la expansión de la presencia humana en la World Wide Web corre paralela a la escalofriante pérdida de la biodiversidad en los hábitats del mundo real: el número de nombres de dominio de la Web registrados aumenta cada día, al mismo tiempo que crece el número de especies extinguidas. Por eso, para construir la metáfora, los nombres de dominios que aparecen en el sitio están asociados a nombres de especies en latín. Cuando alguien selecciona un nombre de dominio y lo procesa, aparece esta asociación con un enlace a sitios reales de animales, como TigerDirect.com. La sagacidad sociopolítica de esta obra se resume en la afirmación que hacen los artistas de que nuestro creciente banco de datos de códigos genéticos, como es el caso del Proyecto del Genoma Humano, no puede de ninguna manera compensar la pérdida de especies". Inglés.

VNS Matrix

VNS Matrix está compuesto por **Josephine Starrs, Julianne Pierce, Virginia Barrat y Francesca da Rimini**. Se trata de un proyecto conjunto que surgió en Australia, durante el verano de 1991 y que pretende investigar y descifrar las narrativas de dominación y control que rodean la cultura de alta tecnología, explorando la construcción del espacio social, la identidad y la sexualidad en el ciberespacio. Sus componentes, que se consideran a sí mismas como ciberfemistas, persiguen la idea de hacer trizas el mito masculino que pretende alienar a la mujer de los aparatos tecnológicos y sus productos culturales. Proyectos: theme parks, corpus fantastica MOO, manifesto, all.new.gen, spiral.space, y bad.code. Inglés.

Monkey brains! The tale... or not ...

Most people probably have heard the tale of the barbaric foreigners who strap a live monkey down and eat its brains while it screams. It has even made it into the Hollywood mainstream in movies like "Indiana Jones and the Temple of Doom." The common aspects of this story, as it is almost always told, make it an excellent illustration of a classic urban legend.

[Read the cruel story!](#)

[[It is the year of the monkey.](#)]

Hybrid Cars

Basics:

Any vehicle is a hybrid when it combines two or more sources of power. Hybrid cars run off a rechargeable battery and gasoline.

Hybrid engines are built smaller to accommodate the 99% of time when not going up hill or accelerating quickly. It uses the battery to provide extra acceleration power when needed.

When the car is stopped, hybrid gasoline motors can shut off and run off their electric motor and battery.

Hybrid cars are lighter and more aerodynamic; tires are often stiffer and inflated higher to reduce drag.

Hybrid cars often recover braking energy and use it to charge the battery; no plug-in or long extension cords necessary.

Check some of them out, [here](#).

Voting in Florida

That's what I call a democracy. [Watch it](#).

From "[wikipedia](#)":

"A democracy is a form of government under which the power to alter the basic laws and forms of government lies with the voting citizenry, referred to as "the people", and all decisions are made

by representatives who act by their consent, as enforced by elections and the rule of law. In some cases, democracy is associated with nominal monarchy where the monarch has sharply limited powers, but it is more commonly associated with a republic." "The word democracy originates from the Greek δημοκρατία from δῆμος meaning "the people", plus κρατεῖν meaning "to rule", and the suffix -ία; the term therefore means "Rule by the People." The term is also sometimes used as a measurement of how much influence a people has over their government, as in how much democracy exists. Anarchism and communism (as in the final stage of social development according to Marxist theory) are social systems that employ a form of direct democracy, and have no state independent of the people themselves."

Chung Yeung

From "[bigwhiteguy](#)".

"October 22 — Chung Yeung, like Ching Ming, is a day to remember ancestors. Families attend to the graves of their ancestors and pay their respects.

They often eat cakes known as Ko, which sounds like the Chinese word for top. Therefore, eating the cakes will help one be promoted.

The Chung Yeung Festival also commemorates a legend from the Han Dynasty (BC 202-AD 220) legend. In it, a soothsayer advised Woon King that he should take his family to a high place for the entire ninth day of the ninth moon. When they returned they found every living thing in their village had been killed.

Families often go hiking along the many trails to be found in Hong Kong."

Stanley on Hongkong Island

"Stanley is a little village on the south of Hong Kong Island and part of the Southern District, Hong Kong. The original Chinese name of the village was believed to be based on a big tall cotton tree (*Bombax malabaricum*) often covered with bright red blossoms at the time. It was given an English name based on Lord Stanley, 19th-century British Secretary of State for War and the Colonies." And it still is dominated by British expats. The little village was packed with foreigners today; though it is not too special at all. Its main attraction is ?? a market of course!! Island South is mainly a residential area. And a very nice one. Indeed it is probably one of the most beautiful places to live in Hongkong. (Hills all around are strewn with luxury apartment blocks) [Looking for a place to stay?](#)

Tokyo Recap

Puuh, first mid-term is over. (3 hours of starring at the ceiling!?! It was quite tough and I did not do well.) Anyway, some people left HKUST last Friday to head towards Tokyo. (well aware that the weather forecast was not too promising) After 4 hours of flight, 1 hour on the train from Narita Airport to "Central" and some time running in circles in Tokyo's underground system we made it to the hotel. (Are they missing some pyjamas there?) It was raining quite heavily already when we arrived. We met with another Austrian studying at [Keyo](#), took his "bible" (the Lonely Planet, of course) and had some excellent dinner. Saturday was sightseeing times n. Having sushi at Tokyo's fishmarket was hmmm yammie. (Best one ever) In the afternoon, the taifun rapidly approaching, we seeked refuge in Tokyo's History Museum. Night spent in Roppongi district. Weather on Sunday was much better, so we could go to the parks and temples. (<-- Now guess where Tokyo's goth girls meet?) Another sushi in a stylish restaurant at the Bay and we called it the night.

Great. Trendy. Beautiful people.

But I thought it would be much weirder. (Mangas are weird.)

Tokyo

"A stinking rich neon-lit metropolis; an Oriental monument to the gods of consumerism; a Japanese bow to America and the west. We think we know Tokyo even if we haven't been there. But look closer, past the McDonald's on street corners, the kids in baseball caps listening to hip hop and eating in Hard Rock and you'll see something unique. From the sushi and saki bars of Roppongi, to the design temples of Shibuya and the Bladerunner skyscrapers of Ginza, this is a hi-tech, surreal, sci-fi assault on the senses, a city like none other on earth. Say sayonara to what you think you know and fasten your seatbelts. Welcome to Tokyo." [from "[worldsbestbars](#)"]

"Monkey Mountain" Hiking

Kam Shan Country Park ("Monkey Mountain"): It is probably one of the places which is crowded every Sunday, with people feeding hundred's of monkeys. However, there were hardly any people around today as it was raining quite heavily. The whole trip (~ 2 1/2 hours) was kind of a disappointment, therefore I won't comment on it any further.

Instead I suggest reading "[Hong Kong's Tropical Cyclone Warning Signals](#)", so that you know what to do if you happen to be here. For me it is time to finally get an umbrella as well!

[Quite cool: By searching for "fortgehen in hongkong" (eng.: going out in hk!) at "google.de" the first site to appear is this one here. (so you definitely made a good choice) - my task is clear: do some more "bar hopping" for you]

Go to the [NASA](#) project page.

Quite an interesting project, I guess. How does the following comment fit in there? (any suggestions?)

"I'd like to share a revelation that I've had during my time here. It came to me when I tried to classify your species. I realized that you're not actually mammals. Every mammal on this planet instinctively develops a natural equilibrium with the surrounding environment, but you humans do not. You move to an area, and you multiply, and multiply, until every natural resource is consumed. The only way you can survive is to spread to another area. There is another organism on this planet that follows the same pattern. A virus. Human beings are a disease, a cancer of this planet, you are a plague, and we are the cure." (Quotation from "The Matrix", of course)

Electronic Voting Machines and Voteauction.com

Quite recently I read something about the failures of electronic voting machines in use in the US 2004 elections. [Read about some events that occurred recently](#). In this context it is worthwhile to mention that "a democracy is a form of government in which ordinary citizens take part in governing, in contrast with a monarchy or oligarchy". "The word democracy originates from the

Greek δημοκρατία from δῆμος meaning "the people", plus κρατεῖν meaning "to rule", and the suffix ία; the term therefore means Rule by the People". When I took lectures at the Institute of Cybernetics and Artificial Intelligence at the University of Vienna last year, in a guest lecture a "cyber-punk" or rather "cyber-artist" told us about his projects. Best of all was the presentation of his "voteauction.com" project. [Go there and check it out.](#)

"[V]ote-auction.com is devoted to combining the American principles of democracy and capitalism by bringing the big money of campaigns directly to the voting public. We provide a forum for campaign contributors and voters to come together for free-market exchange."

" 50% of the voting age population routinely stays home on election day. Are they fed up with the system? Are they disappointed by the two major parties? Are they desensitized by the thousands of political ads they see on Television? [V]ote-auction.com will allow these voters to profit from their democratic capital. By offering their voting capital at auction, these traditionally non-voting citizens will be participating in the democratic process and the expanding economy." As you can read on the webpage, media coverage was intense. I just had to bring it up again, (it was great fun watching the CNN interview enhanced with his personal comments), because I think the project perfectly questions the two principles it seems to unite.

Fahrenheit 9/11

Finally had time to see it. Pictures from Iraq were disturbing; scenes of mourning family were moving; soldiers combatting made me sick; so did the people who met at the conference ("exploring new-fields", or something); no comments on Bush, he is not worth it; nor is his "basis". Moore ends his "documentary" by quoting George Orwell "the war is waged by the ruling group against its own subjects . . . to keep the very structure of society intact". Well, definitely very biased and unbalanced. However maybe that is what the US need. November will show.

The system will not change.

[Michael Moore's website.](#)

[The White House.](#) Rather check out the sites of some leftist think tanks.

Hybrid Cars

Basics:

Any vehicle is a hybrid when it combines two or more sources of power. Hybrid cars run off a rechargeable battery and gasoline.

Hybrid engines are built smaller to accommodate the 99% of time when not going up hill or accelerating quickly. It uses the battery to provide extra acceleration power when needed.

When the car is stopped, hybrid gasoline motors can shut off and run off their electric motor and battery.

Hybrid cars are lighter and more aerodynamic; tires are often stiffer and inflated higher to reduce drag.

Hybrid cars often recover braking energy and use it to charge the battery; no plug-in or long extension cords necessary.

Check some of them out, [here](#).

Voting in Florida

That's what I call a democracy. [Watch it.](#)

From "[wikipedia](#)":

"A democracy is a form of government under which the power to alter the basic laws and forms of government lies with the voting citizenry, referred to as "the people", and all decisions are made by representatives who act by their consent, as enforced by elections and the rule of law. In some cases, democracy is associated with nominal monarchy where the monarch has sharply limited powers, but it is more commonly associated with a republic." "The word democracy originates from the Greek δημοκρατία from δῆμος meaning "the people", plus κρατεῖν meaning "to rule", and the suffix ἰα; the term therefore means "Rule by the People." The term is also sometimes used as a measurement of how much influence a people has over their government, as in how much democracy exists. Anarchism and communism (as in the final stage of social development according to Marxist theory) are social systems that employ a form of direct democracy, and have no state independent of the people themselves."

Stanley on Hongkong Island

"Stanley is a little village on the south of Hong Kong Island and part of the Southern District, Hong Kong. The original Chinese name of the village was believed to be based on a big tall cotton tree (*Bombax malabaricum*) often covered with bright red blossoms at the time. It was given an English name based on Lord Stanley, 19th-century British Secretary of State for War and the Colonies." And it still is dominated by British expats. The little village was packed with foreigners today; though it is not too special at all. Its main attraction is ?? a market of course!! Island South is mainly a residential area. And a very nice one. Indeed it is probably one of the most beautiful places to live in Hongkong. (Hills all around are strewn with luxury apartment blocks) [Looking for a place to stay?](#)

2 more weeks

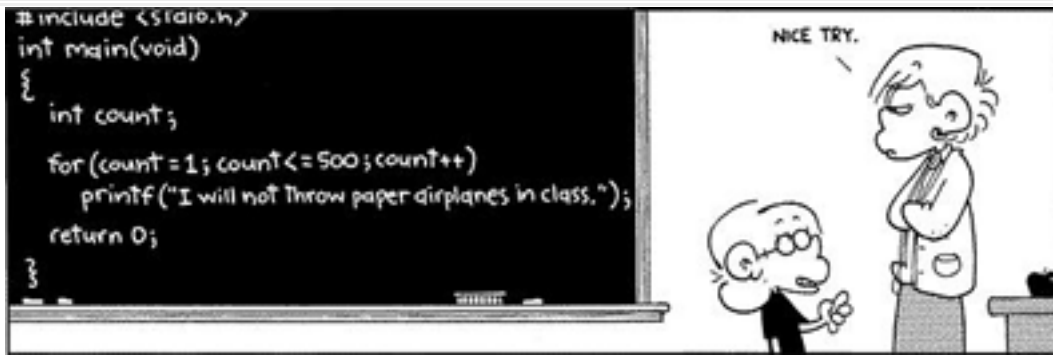

On 2 November 2004, U.S. voters will decide whether to give Republican President George W. Bush a second term or put Democrat John Kerry in the White House. Continuing a presidential election tradition, Science has asked each candidate to lay out his views on more than a dozen science-related issues facing the nation. Their answers, along with an accompanying editorial by Science Editor-in-Chief Donald Kennedy, can be found by following the links below.

Tokyo Recap

Puuh, first mid-term is over. (3 hours of starring at the ceiling!? It was quite tough and I did not do well.) Anyway, some people left HKUST last Friday to head towards Tokyo. (well aware that the weather forecast was not too promising) After 4 hours of flight, 1 hour on the train from Narita Airport to "Central" and some time running in circles in Tokyo's underground system we made it to the hotel. (Are they missing some pyjamas there?) It was raining quite heavily already when we arrived. We met with another Austrian studying at [Keyo](#), took his "bible" (the Lonely Planet, of course) and had some excellent dinner. Saturday was sightseeing times n. Having sushi at Tokyo's fishmarket was hmmm yammie. (Best one ever) In the afternoon, the taifun rapidly approaching, we seeked refuge in Tokyo's History Museum. Night spent in Roppongi district. Weather on Sunday was much better, so we could go to the parks and temples. (<-- Now guess where Tokyo's goth girls meet?) Another sushi in a stylish restaurant at the Bay and we called it the night.

Great. Trendy. Beautiful people.

But I thought it would be much weirder. (Mangas are weird.)

Tokyo

"A stinking rich neon-lit metropolis; an Oriental monument to the gods of consumerism; a Japanese bow to America and the west. We think we know Tokyo even if we haven't been there. But look closer, past the McDonald's on street corners, the kids in baseball caps listening to hip hop and eating in Hard Rock and you'll see something unique. From the sushi and saki bars of Roppongi, to the design temples of Shibuya and the Bladerunner skyscrapers of Ginza, this is a hi-tech, surreal, sci-fi assault on the senses, a city like none other on earth. Say sayonara to what you think you know and fasten your seatbelts. Welcome to Tokyo." [from "[worldsbestbars](#)"]

"Monkey Mountain" Hiking

Kam Shan Country Park ("Monkey Mountain"): It is probably one of the places which is crowded every Sunday, with people feeding hundred's of monkeys. However, there were hardly any people around today as it was raining quite heavily. The whole trip (~ 2 1/2 hours) was kind of a disappointment, therefore I won't comment on it any further.

Instead I suggest reading "[Hong Kong's Tropical Cyclone Warning Signals](#)", so that you know what to do if you happen to be here. For me it is time to finally get an umbrella as well!

[Quite cool: By searching for "fortgehen in hongkong" (eng.: going out in hk!) at "google.de" the first site to appear is this one here. (so you definitely made a good choice) - my task is clear: do some more "bar hopping" for you]

VoIP (Skype)

"What we've got is a simple bit of software we want to give you. It'll let you make free calls to your friends all over the world. And we don't want any money for it. It's free.

You could think of us as the big, free Internet telephony company. We prefer to think of ourselves as a big group hug, even a present. Yes... that's it... we're a present... but without the ribbon."

Well, as they are charging something on international calls I would not consider them the way they describe themselves (does altruism exist somewhere?). What I have to admit however is that a rate of € 0.02 from Hongkong to Austria is not too bad at all.

You can give me a call as well. Computer to Computer is free of charge. (by the way, "stritzi" is the name to call)

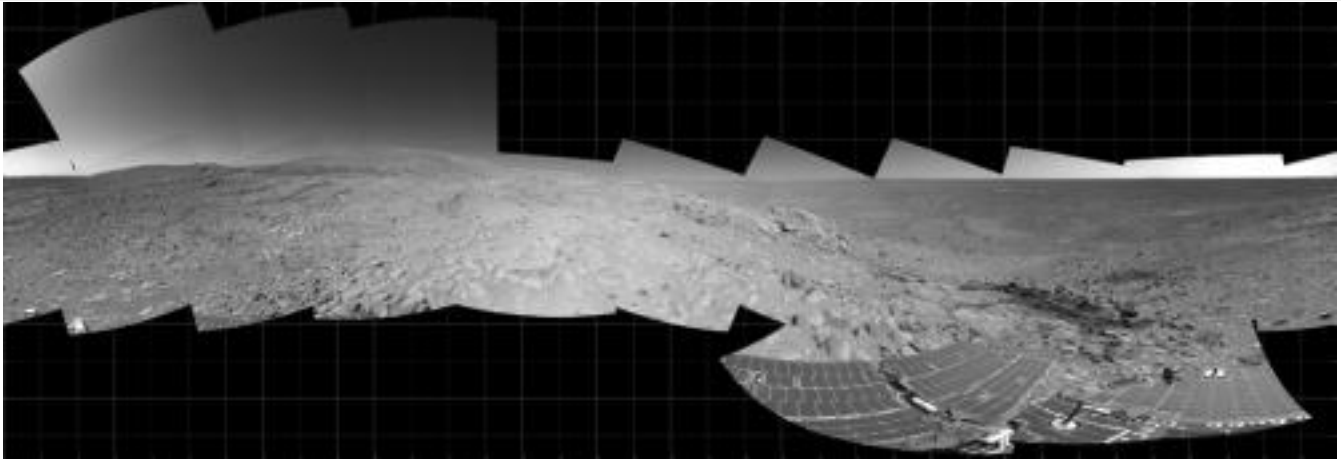

Download [SKYPE](#).

Exploring mars!

(image from NASA's Mars Exploration program)

Go to the [NASA](#) project page.

Quite an interesting project, I guess. How does the following comment fit in there? (any suggestions?)

"I'd like to share a revelation that I've had during my time here. It came to me when I tried to classify your species. I realized that you're not actually mammals. Every mammal on this planet instinctively develops a natural equilibrium with the surrounding environment, but you humans do not. You move to an area, and you multiply, and multiply, until every natural resource is consumed. The only way you can survive is to spread to another area. There is another organism on this planet that follows the same pattern. A virus. Human beings are a disease, a cancer of this planet, you are a plague, and we are the cure." (Quotation from "The Matrix", of course)

Electronic Voting Machines and **Voteauction.com**

Quite recently I read something about the failures of electronic voting machines in use in the US 2004 elections. [Read about some events that occurred recently](#). In this context it is worthwhile to mention that "a democracy is a form of government in which ordinary citizens take part in governing, in contrast with a monarchy or oligarchy". "The word democracy originates from the

Greek δημοκρατία from δῆμος meaning "the people", plus κρατεῖν meaning "to rule", and the suffix ία; the term therefore means Rule by the People". When I took lectures at the Institute of Cybernetics and Artificial Intelligence at the University of Vienna last year, in a guest lecture a "cyber-punk" or rather "cyber-artist" told us about his projects. Best of all was the presentation of his "[voteauction.com](#)" project. [Go there and check it out.](#)

"[V]ote-auction.com is devoted to combining the American principles of democracy and capitalism by bringing the big money of campaigns directly to the voting public. We provide a forum for campaign contributors and voters to come together for free-market exchange."

" 50% of the voting age population routinely stays home on election day. Are they fed up with the system? Are they disappointed by the two major parties? Are they desensitized by the thousands of political ads they see on Television? [V]ote-auction.com will allow these voters to profit from their democratic capital. By offering their voting capital at auction, these traditionally non-voting citizens will be participating in the democratic process and the expanding economy." As you can read on the webpage, media coverage was intense. I just had to bring it up again, (it was great fun watching the CNN interview enhanced with his personal comments), because I think the project perfectly questions the two principles it seems to unite.

More on the artist, [here](#).

Fahrenheit 9/11

Finally had time to see it. Pictures from Iraq were disturbing; scenes of mourning family were moving; soldiers combatting made me sick; so did the people who met at the conference ("exploring new-fields", or something); no comments on Bush, he is not worth it; nor is his "basis". Moore ends his "documentary" by quoting George Orwell "the war is waged by the ruling group against its own subjects . . . to keep the very structure of society intact". Well, definitely very biased and unbalanced. However maybe that is what the US need. November will show.

The system will not change.

[Michael Moore's website.](#)

[The White House.](#) Rather check out the sites of some leftist think tanks.

The elegant universe, superstrings and more

Quite a long time ago I came across one of the most interesting topics of the time (String theory), which tries to unify the forces of nature and to explain their relation in one formula only.

A fascinating introduction can be found [here](#). Back then, I watched every episode in one day. Brian Greene does an excellent job in explaining what the theory is all about. Without a physics background you will definitely enjoy the presentation and otherwise you probably will as well.

Posted by stritzi at [10:32 PM](#) | [Comments \(0\)](#) | [TrackBack](#)

Stephen Hawking revidiert Theorie

"Es gibt kein Baby-Universum, wie ich einst dachte", meint Hawking. "Wenn Sie in ein Schwarzes Loch springen, dann kommt ihre Massenenergie wieder zurück ins Universum, aber in veränderter Form, die zwar die Informationen über Sie enthält, wie Sie einst waren, aber in unerkennbarer Form." Schwarze Löcher können nach der Theorie also nicht Materie und Energie zerstören, weil diese in der Quantenmechanik in irgendeiner Form weiter existieren.

Amerikaner verkaufen Wahlstimmen

Auf der Website <http://www.voteauction.com> können Interessierte sich Wählerstimmen aus mehreren US-Bundesstaaten erkaufen.

Inzwischen haben sich 10000 Personen zum Verkauf Ihrer Stimme angeboten. Die Behörden in Illinois und New York sind nun schon gegen die Site aktiv geworden.

Der Server der Website befindet sich in Bulgarien und gehört einem Österreicher, daher ist eine rechtliche Einwirkung auf den Betreiber nicht allzuleicht.

Endlich anonym downloaden!

Die englische Firma UseNeXT bietet jetzt die ultimative Alternative zu Kazaa, eMule und co:

Bei Usenet kann man jetzt endlich völlig anonym seine Lieblingsdateien herunterladen. Und das mit **maximalem DSL-Speed!** UseNeXT benutzt das seit 1979 existierende Usenet, ein weltweites **unzensurbares** Informationsnetz, das lange vor dem WWW entstanden ist

Zweifler können sich für **nur 1 €** anmelden und dafür 14 Tage lang bis zu 1 GB an Daten auf die Festplatte schaufeln! Einfach [hier](#) klicken und testen

Americans sell votes

On the Website <http://www.voteauction.com> were interested votes from several US Federal States can to buy.

In the meantime 10000 persons offered themselves to your voice for the sales. The authorities in Illinois and New York became active now already against the Site.

The server of the Website is in Bulgaria and belongs to an Austrian, therefore a legal effect is on the operator not all too.

Tomments #6:

Politics and Investing: What qualities do you look for in a presidential candidate? A CEO[2 pages, 11/06/00]

[Introduction](#) | [Qualities of a Leader](#) | [The Process](#) | [A Leader's Import](#)

[Your Choice?](#) | [Your Say](#)

[Related Links](#) | [Feedback](#)

[Email this article to a friend](#)

Your Choice?

How much say do individuals have in the selection of the leader?

Individuals do have some control over the selection of Presidents and CEOs. As I mentioned above, both processes are representative democracies, and both are affected by money; but in each case, the individuals indirectly decide who's in charge. But why not directly? While the intermediary in the Presidential election process (the electoral college) generally has no effect on the outcome, the same can't be said of the intermediary in the CEO selection process (the board of directors).

Shareholders have the right to elect members of the board of directors, who in turn choose the CEO. Most investors don't even send in the ballot (although some sites, like ProxyVote (6), are making the process extremely easy). Those who do send in the ballot usually just rubber-stamp the names that are listed on it. They don't know anything about these folks and are therefore not able to make an informed decision about their qualifications.

As I have described in previous Tomments, the internet is enabling individual investors to become more empowered: they have access to more information, both through independent sources and through corporations themselves (such as conference calls), enabling them to make better decisions (Tomments #2) and to actually affect, rather than just reflect, the value of companies (Tomments #5). Maybe the next logical step is for shareholders to be able to directly decide who their CEOs should be. Just as some have argued that the electoral college is an antiquated and unnecessary step in the voting process, perhaps it's time for shareholders and CEOs to be more closely linked.

Boards of directors at public companies are often extremely patient with CEOs; more so than, for example, venture capitalists, who often kick out the founders even before they have a chance to make any mistakes. One reason it makes sense to be patient with a CEO is that there's a longer learning curve than for a politician; all other things being equal, the incumbent CEO is more qualified than other potential candidates. But this can be taken to the extreme, as it is at some companies where the CEO stays long after it's clear that he/she isn't the best person for the job. Additional inertia comes from the CEOs themselves, who are happy with the current system, because it subjects them to less scrutiny from shareholders and lets them stay at the helm as long as they don't completely mess things up.

Until very recently it would have been logistically very difficult for shareholders to directly elect CEOs, but the internet makes it quite feasible. Candidates could publish their resumes and video clips of their qualifications online, and answer questions from shareholders, and then the shareholders could vote. (One issue with this approach is that not all shareholders have internet access, but the numbers that don't are rapidly dwindling.) Would you be more or less inclined to invest in a company that handed this power over to you and its other shareholders? Do you think that individual investors are smart enough and informed enough to collectively choose a qualified CEO? Or might the election be decided more by style than substance (borrowing the negative aspects of the democratic process without also borrowing the positive aspects)?

Your Say

How much say do individuals have in other decisions?

What's the last major decision about one of the companies in your portfolio that you've been involved in? I'm not talking about a decision to buy or sell the stock, but a decision about how the company's business should be run. Currently, virtually the only impact shareholders have on the long-term success or failure of a company is a result of their buying or selling of the company's stock. As I alluded to in the previous section, the next logical step in shareholder empowerment might be more direct control over CEO selection. But why stop there? Why not give shareholders some control over other decisions as well?

[Tomments 1](#)

\$7.5 million for the business.com domain name: too much? [1 page, 12/07/99]

As a shareholder, wouldn't you like to have a real vote on takeover bid responses, merger decisions, takeover defense options, executive compensation, financial reporting, stock option plan details, and other decisions that affect the value of your holding? As I mentioned above, companies already have to let their shareholders vote on a few important decisions, but the list is very short.

Shareholders do have one additional option when they feel the company is on the wrong track: the shareholder proposal (sometimes called a shareholder resolution). This proposal is the corporate equivalent to a local ballot referendum. Generally, stockholders who have held a minimum of \$2,000 of company stock for at least one year can file a shareholder proposal. But unfortunately the system is designed to discourage its use. Filing proposals takes a significant amount of time, expertise and resources. And even if the proposal makes it on the ballot, many shareholders don't take the time to vote, and these unmarked ballots are automatically cast in accordance with management's recommendation (which is virtually always to reject the proposal). Some shareholder proposals are now advisory rather than binding. These are easier to get on the proxy and get passed, but they're largely ignored by management.

A few entities are trying to help investors benefit from proposals, such as Allied Owners (7), a mutual fund that identifies underperforming small companies, buys enough shares to gain significant minority voting power, and then tries to fix those companies and their sagging stock prices, either with the current management or with new management. Lens Inc. (8) is taking a similar approach.

Unfortunately, corporations often view shareholder proposals antagonistically, whether they come from individual shareholders or groups like Allied Owners or Lens. And the corporations usually respond legalistically. Most companies view shareholder activism as a negative rather than a positive.

And just as CEOs resist interference from shareholders, so do boards. According to Nell Minow, editor of the Corporate Library (9), a web site that covers issues of corporate governance and performance, "Chairmen have stretched and shrunk their boards in an effort to keep off insurgent candidates. They have adopted staggered terms and eliminated cumulative voting. They have packed the boards with insiders, celebrities, and cronies. They have sought protection from state and federal governments. They have denied access to shareholder lists, claiming that the purpose was 'improper.' They have appropriated pension assets to protect themselves, they have rejected higher bids in favor of deals that benefit management, and they have paid greenmail to get rid of potential acquirers."

These methods of deterrence seem to be motivated more by a desire to avoid sharing power than a desire to do what's best for the corporation (which, except in rare circumstances, is also what's best for the shareholders).

If shareholders were given more control over corporate decisions, several advantages would result:

1. The elimination of conflicts of interest. Who is most likely to act in the best interest of the shareholders: the CEO, the board of directors, or the shareholders themselves?
2. Feedback. Shareholders by definition have confidence in the company. Maybe they see something that management doesn't (but should). Have you ever emailed a company you hold stock in to suggest an improvement in the way they do business? If you haven't, it's probably not because you didn't have anything useful to say, but because the company didn't make it easy for you to provide them with this feedback.
3. Longer-term investors. Currently, most shareholders who disagree with a company's management consider selling the stock their only recourse. If they had other options, they would be more inclined to hold the stock for the long haul.

There are obviously some issues that would need to be worked out before giving shareholders too much decision-making power:

1. Shareholders would need to be well-informed enough to make the right choices, but anything that the shareholders know, the company's competitors would be able to find out too.
2. Similarly, a company's competitors might be able to anonymously buy stock in the company and then deliberately vote for the worst option.
3. If shareholders had more power, CEOs might be more easily swayed by public opinion.
4. It could be argued that shareholders might be too short-term in their thinking, since they aren't locked in to a company to the same degree that a CEO is.

While these are valid concerns, I expect that there are solutions for all of them. For example, to resolve the short-term mentality issue, a company could weight each shareholder's vote not just in proportion to his/her ownership but also in proportion to the duration of that ownership. Or in proportion to a score on a quiz each shareholder takes to demonstrate their level of understanding of

the company's business.

I'm certainly not suggesting that increased shareholder empowerment be legislated, nor am I saying that shareholders should be involved in day-to-day operational decisions, but I do think that companies that encourage some level of shareholder activism will be rewarded. As CalPERS, the largest public retirement system in the U.S., has said, "Good corporate governance leads to improved long-term performance. CalPERS' also strongly believes that 'good' governance requires the attention and dedication not only of a company's officers and directors, but also its owners. CalPERS is not simply a passive holder of stock. it is a 'shareowner,' and take seriously the responsibility that comes with company ownership." (10)

Just as the internet makes it feasible for shareholders to more actively participate in the CEO selection process, it also makes it feasible for them to participate in other corporate decisions as well. Shareholders can use the internet both for information (such as to find out when annual meetings are, see what proposals are on the ballots, and learn how institutional shareholders will vote) and for mobilization (such as to discuss what they think the company should do and to rally support for proposals).

While I'm hopeful that companies will embrace shareholder empowerment, I'm not certain that it will happen. For it to catch on, companies would need to derive value from empowering their shareholders. This value could come either from the shareholders making smart decisions (which companies presumably don't believe would happen) or from shareholders deciding to buy a stock based on the company's advocacy of shareholder empowerment. But the latter is unlikely to be compelling, because, for most investors, shareholder empowerment is unlikely to be a deciding factor in their decision of which stock to buy. On the other hand, it might work for a diversified holding company or a mutual fund (which is similar to the approach that MetaMarkets' OpenFund (11) is taking).

Voters often feel that they don't have enough of a voice in the political process. Voting in elections and in local ballot referenda do give them some power, but they still feel removed from the majority of the political process. Voters would probably care more about the political process if their roles in it were more direct and more meaningful. And investors are in the same boat. They feel strongly enough about a company to want to own part of it, but most don't think they have any voice at all in how the company is run. But shareholder activism is gradually awakening, and hopefully the internet will further accelerate the empowerment that many investors want and deserve.

If you believe in democracy, then you should also believe in shareholder empowerment. Some people say it's your duty as a citizen to vote. If you feel this way, shouldn't you also feel that it's your duty as a shareholder to participate in the decisions your companies make to the extent that you're able? In other words -- Ask not what your company can do for you, ask what you can do for your company.

Some final thoughts:

1. What would the country be like if the government were run like a corporation (cold and uncaring or efficient and profitable)?
2. If the United States was a stock, how would its value have changed during Bill Clinton's presidency?
3. Are there any CEOs in your portfolio who you think would make a good U.S. president?
4. Would you buy stock in a company that had George Bush or Al Gore as CEO?

[Email this article to a friend](#)

Your Choice?

How much say do individuals have in the selection of the leader?

Individuals do have some control over the selection of Presidents and CEOs. As I mentioned above, both processes are representative democracies, and both are affected by money; but in each case, the individuals indirectly decide who's in charge. But why not directly? While the intermediary in the Presidential election process (the electoral college) generally has no effect on the outcome, the same can't be said of the intermediary in the CEO selection process (the board of directors).

Shareholders have the right to elect members of the board of directors, who in turn choose the CEO. Most investors don't even send in the ballot (although some sites, like ProxyVote (6), are making the process extremely easy). Those who do send in the ballot usually just rubber-stamp the names that are listed on it. They don't know anything about these folks and are therefore not able to make an informed decision about their qualifications.

As I have described in previous Tomments, the internet is enabling individual investors to become more empowered: they have access to more information, both through independent sources and through corporations themselves (such as conference calls), enabling them to make better decisions (Tomments #2) and to actually affect, rather than just reflect, the value of companies (Tomments #5). Maybe the next logical step is for shareholders to be able to directly decide who their CEOs should be. Just as some have argued that the electoral college is an antiquated and unnecessary step in the voting process, perhaps it's time for shareholders and CEOs to be more closely linked.

Boards of directors at public companies are often extremely patient with CEOs; more so than, for example, venture capitalists, who often kick out the founders even before they have a chance to make any mistakes. One reason it makes sense to be patient with a CEO is that there's a longer learning curve than for a politician; all other things being equal, the incumbent CEO is more qualified than other potential candidates. But this can be taken to the extreme, as it is at some companies where the CEO stays long after it's clear that he/she isn't the best person for the job. Additional inertia comes from the CEOs themselves, who are happy with the current system, because it subjects them to less scrutiny from shareholders and lets them stay at the helm as long as they don't completely mess things up.

Until very recently it would have been logistically very difficult for shareholders to directly elect CEOs, but the internet makes it quite feasible. Candidates could publish their resumes and video clips of their qualifications online, and answer questions from shareholders, and then the shareholders could vote. (One issue with this approach is that not all shareholders have internet access, but the numbers that don't are rapidly dwindling.) Would you be more or less inclined to invest in a company that handed this power over to you and its other shareholders? Do you think that individual investors are smart enough and informed enough to collectively choose a qualified CEO? Or might the election be

decided more by style than substance (borrowing the negative aspects of the democratic process without also borrowing the positive aspects)?

Your Say

How much say do individuals have in other decisions?

What's the last major decision about one of the companies in your portfolio that you've been involved in? I'm not talking about a decision to buy or sell the stock, but a decision about how the company's business should be run. Currently, virtually the only impact shareholders have on the long-term success or failure of a company is a result of their buying or selling of the company's stock. As I alluded to in the previous section, the next logical step in shareholder empowerment might be more direct control over CEO selection. But why stop there? Why not give shareholders some control over other decisions as well?

As a shareholder, wouldn't you like to have a real vote on takeover bid responses, merger decisions, takeover defense options, executive compensation, financial reporting, stock option plan details, and other decisions that affect the value of your holding? As I mentioned above, companies already have to let their shareholders vote on a few important decisions, but the list is very short.

Shareholders do have one additional option when they feel the company is on the wrong track: the shareholder proposal (sometimes called a shareholder resolution). This proposal is the corporate equivalent to a local ballot referendum. Generally, stockholders who have held a minimum of \$2,000 of company stock for at least one year can file a shareholder proposal. But unfortunately the system is designed to discourage its use. Filing proposals takes a significant amount of time, expertise and resources. And even if the proposal makes it on the ballot, many shareholders don't take the time to vote, and these unmarked ballots are automatically cast in accordance with management's recommendation (which is virtually always to reject the proposal). Some shareholder proposals are now advisory rather than binding. These are easier to get on the proxy and get passed, but they're largely ignored by management.

A few entities are trying to help investors benefit from proposals, such as Allied Owners (7), a mutual fund that identifies underperforming small companies, buys enough shares to gain significant minority voting power, and then tries to fix those companies and their sagging stock prices, either with the current management or with new management. Lens Inc. (8) is taking a similar approach.

Unfortunately, corporations often view shareholder proposals antagonistically, whether they come from individual shareholders or groups like Allied Owners or Lens. And the corporations usually respond legalistically. Most companies view shareholder activism as a negative rather than a positive.

And just as CEOs resist interference from shareholders, so do boards. According to Nell Minow, editor of the Corporate Library (9), a web site that covers issues of corporate governance and performance, "Chairmen have stretched and shrunk their boards in an effort to keep off insurgent candidates. They have adopted staggered terms and eliminated cumulative voting. They have packed the boards with insiders, celebrities, and cronies. They have sought protection from state and federal governments. They have denied access to shareholder lists, claiming that the purpose was 'improper.' They have appropriated pension assets to protect themselves, they have rejected higher bids in favor of deals that benefit management, and they have paid greenmail to get rid of potential acquirers."

These methods of deterrence seem to be motivated more by a desire to avoid sharing power than a desire to do what's best for the corporation (which, except in rare circumstances, is also what's best for the shareholders).

If shareholders were given more control over corporate decisions, several advantages would result:

1. The elimination of conflicts of interest. Who is most likely to act in the best interest of the shareholders: the CEO, the board of directors, or the shareholders themselves?
2. Feedback. Shareholders by definition have confidence in the company. Maybe they see something that management doesn't (but should). Have you ever emailed a company you hold stock in to suggest an improvement in the way they do business? If you haven't, it's probably not because you didn't have anything useful to say, but because the company didn't make it easy for you to provide them with this feedback.
3. Longer-term investors. Currently, most shareholders who disagree with a company's management consider selling the stock their only recourse. If they had other options, they would be more inclined to hold the stock for the long haul.

There are obviously some issues that would need to be worked out before giving shareholders too

much decision-making power:

1. Shareholders would need to be well-informed enough to make the right choices, but anything that the shareholders know, the company's competitors would be able to find out too.
2. Similarly, a company's competitors might be able to anonymously buy stock in the company and then deliberately vote for the worst option.
3. If shareholders had more power, CEOs might be more easily swayed by public opinion.
4. It could be argued that shareholders might be too short-term in their thinking, since they aren't locked in to a company to the same degree that a CEO is.

While these are valid concerns, I expect that there are solutions for all of them. For example, to resolve the short-term mentality issue, a company could weight each shareholder's vote not just in proportion to his/her ownership but also in proportion to the duration of that ownership. Or in proportion to a score on a quiz each shareholder takes to demonstrate their level of understanding of the company's business.

I'm certainly not suggesting that increased shareholder empowerment be legislated, nor am I saying that shareholders should be involved in day-to-day operational decisions, but I do think that companies that encourage some level of shareholder activism will be rewarded. As CalPERS, the largest public retirement system in the U.S., has said, "Good corporate governance leads to improved long-term performance. CalPERS' also strongly believes that 'good' governance requires the attention and dedication not only of a company's officers and directors, but also its owners. CalPERS is not simply a passive holder of stock. it is a 'shareowner,' and take seriously the responsibility that comes with company ownership." (10)

Just as the internet makes it feasible for shareholders to more actively participate in the CEO selection process, it also makes it feasible for them to participate in other corporate decisions as well. Shareholders can use the internet both for information (such as to find out when annual meetings are, see what proposals are on the ballots, and learn how institutional shareholders will vote) and for mobilization (such as to discuss what they think the company should do and to rally support for proposals).

While I'm hopeful that companies will embrace shareholder empowerment, I'm not certain that it will happen. For it to catch on, companies would need to derive value from empowering their shareholders. This value could come either from the shareholders making smart decisions (which companies presumably don't believe would happen) or from shareholders deciding to buy a stock based on the company's advocacy of shareholder empowerment. But the latter is unlikely to be compelling, because, for most investors, shareholder empowerment is unlikely to be a deciding factor in their decision of which stock to buy. On the other hand, it might work for a diversified holding company or a mutual fund (which is similar to the approach that MetaMarkets' OpenFund (11) is taking).

Voters often feel that they don't have enough of a voice in the political process. Voting in elections and in local ballot referenda do give them some power, but they still feel removed from the majority of the political process. Voters would probably care more about the political process if their roles in it were more direct and more meaningful. And investors are in the same boat. They feel strongly enough about a company to want to own part of it, but most don't think they have any voice at all in how the company is run. But shareholder activism is gradually awakening, and hopefully the internet will further accelerate the empowerment that many investors want and deserve.

If you believe in democracy, then you should also believe in shareholder empowerment. Some people say it's your duty as a citizen to vote. If you feel this way, shouldn't you also feel that it's your duty as a shareholder to participate in the decisions your companies make to the extent that you're able? In other words -- Ask not what your company can do for you, ask what you can do for your company.

Some final thoughts:

1. What would the country be like if the government were run like a corporation (cold and uncaring or efficient and profitable)?
2. If the United States was a stock, how would its value have changed during Bill Clinton's presidency?
3. Are there any CEOs in your portfolio who you think would make a good U.S. president?
4. Would you buy stock in a company that had George Bush or Al Gore as CEO?

Der lange Weg zur europäischen Cyber-Rights-Union

 *Stefan Krempl* 01.01.2002

Hacker und NGOs machen mobil gegen Big Brother und Netz-Zensur

Das am Samstag zu Ende gegangene

[\[External Link\]](#) **Hackertreffen**, zu dem der Chaos Computer Club ([\[External Link\]](#) **CCC**) nach Berlin geladen hatte, war überschattet von der Verabschiedung einer ganzen Reihe neuer Gesetze im Rahmen der Anti-Terrorismus- und Cybercrime-Bekämpfung ([\[Local Link\]](#) **Hacking is Not a Crime**). Mit Sorge beobachten die sich für die Informationsfreiheit einsetzenden Technik-Freaks zudem die Düsseldorfer Bestrebungen zur Internet-Zensur ([\[Local Link\]](#) **Die Frohe Botschaft des Herrn Büssow**) und harren angespannt der Dinge, die mit der [\[Local Link\]](#) **Umsetzung** der neuen Urheberrechtsrichtlinie der EU auf die Napster-verwöhnten Verbraucher zukommen.

[Download](#)

Eines der Hauptanliegen der Veranstalter des 18. Chaos Communication Congresses war es daher, neue Allianzen für

die Rechte der Netzbürger zu schmieden. Ein besseres "Campaigning" streben die Hacker und gleich gesinnte Non Governmental Organizations (NGOs) daher an - Werbe- und Medienkampagnen, mit denen endlich die breite Öffentlichkeit mobilisiert und über die Folgen der beschlossenen oder anstehenden Gesetzeswerke und Kontrollmaßnahmen aufgeklärt werden soll.

Der ganze dritte Congresstag stand daher ganz im Zeichen des Brainstormings europäischer Netzaktivisten. Dem CCC schwebt demnach in Kooperation mit der britischen Bürgerrechtsorganisation [\[External Link\]](#) Statewatch, Vertretern der Global Internet Liberty Campaign ([\[External Link\]](#) GILC) und anderen Datenschutzvereinigungen der Aufbau einer "Cyber-Rights-Union" zum Schutz der Privatsphäre vor. Mittelfristiges Ziel ist es, ein Büro in Brüssel für das Lobbying auf der EU-Ebene aufzubauen. Die Pläne sind allerdings noch ganz im Anfangsstadium.

Hacktivismus für die Wissensfreiheit

Tastende Versuche in Richtung besserer Öffentlichkeitsarbeit kennzeichneten auch den Kampagnen-Workshop "Offene Kulturen und Freies Wissen", mit dem der schon tot geglaubte Berliner Vernetzungsverein [\[External Link\]](#) mikro sein Comeback ankündigte. "Wir wollen die Änderungen bei den Urheberrechtsgesetzen auf längere Zeit hin verfolgen", erklärte die Netzaktivistin Inke Arns. Momentan sei zu befürchten, dass auf politischem Wege Freiheiten, die das Urheberrecht in den analogen Medien noch gewährt, ausgeschaltet werden sollen. Dabei gehe es hauptsächlich um die Durchsetzung von Verwerterrechten der Medien- oder der Softwareindustrie, nicht um die Interessen der eigentlichen Urheber.

Um die Menschheit über das moderne Raubrittertum der Konzerne an der Wissensallmende und technische Gängelungen der Nutzer durch Digital Rights Management (DRM) aufzuklären, hat mikro sich an einer Reihe öffentlichkeitswirksamer Kampagnen anderer NGOs [\[External Link\]](#) inspirieren lassen ([\[Local Link\]](#) Digitale Rechte und ihre Manager. Vorbilder sehen die Berliner etwa in den Schockmarketing-Praktiken der aus Wien stammenden Manager der Agentur übermorgen ([\[Local Link\]](#) Schock-

Marketing), die im vergangenen Jahr in den USA einen großen Mediencoup mit der Wahlstimmen gegen Geld tauschenden Plattform Voteauction.com landen konnten.

Aber auch mit Preisverleihungen im Stile des [\[Local Link\]](#) Big Brother Awards), der von der [\[External Link\]](#) Deportation Class am Beispiel Lufthansa/Condor abgeschauten Imageverschmutzung von Firmen ([\[Local Link\]](#) Staatsschutz wittert Terror im Netz oder gezielten (Des-) Informationskampagnen a la [\[Local Link\]](#) Superweed liebäugeln die Verfechter des freien Wissensaustauschs. "Es geht darum, Medienviren zu verbreiten", sagt Inke Arns. Ergänzt werden soll die Palette der Aufmerksamkeitserregungsmittel durch klassische Methoden des Hactivismus ([\[Local Link\]](#) Widerstand aus dem Cyberspace). Vorbilder sind die Gruppen RTMark und Yes Man, die für Webseitenimitationen wie [\[External Link\]](#) Gatt.org verantwortlich zeichnen ([\[Local Link\]](#) Gatt.org bleibt vorerst im Netz).

Sie haben Post

Die genaue Vorgehensweise soll nun über die obligatorische Mailingliste diskutiert werden, deren Adresse mikro auf seiner Site veröffentlichen will. So gut wie "verabschiedet" wurde dagegen bereits die Idee eines Schweizer Hackers, die eine Konzernkampagne subversiv umdeutet: Microsoft hatte kürzlich Briefe an Geschäftskunden verschickt und sie darin der Verwendung von nicht lizenzierten Kopien bezichtigt. In ähnlich schockierendem Stil könnte man auch ausgewählte Nutzer anschreiben, so der Vorschlag, sie auf die Verwendung raubkopierter Software, Videos und Songs hinweisen und so für das Thema sensibilisieren. Schließlich plane die Industrie nichts anderes, als fast alle gängigen Nutzerpraktiken zu kriminalisieren.

Ein dritter, von süddeutschen CCC-Mitgliedern ins Leben gerufener Arbeitskreis will sich für die Rezipientenfreiheit im Internet und gegen die Kampagne des Düsseldorfer Regierungspräsidenten Jürgen Büssow zur Sperrung amerikanischer Websites stark machen. Als virtuelle

Planungsplattform soll die Homepage des Zensurgegners [\[External Link\]](#) Volker Birk dienen. Einige konkrete, die Fertigkeiten der Hacker gezielt einsetzenden Ideen wurden während des Workshops auch hier bereits entworfen.

Achtung, Umleitung

So könnte es durchaus passieren, dass Besucher der virtuellen Filiale der Düsseldorfer Bezirksregierung demnächst ganz unvermutet auf der von Büssow auf den Index gesetzten Site [\[External Link\]](#) www.rotten.com landen könnten. Außerdem soll die von einzelnen Providern in Nordrhein-Westfalen bereits implementierte, aber leicht umgehbare [\[Local Link\]](#) DNS-Sperre durch ein automatisches Plug-in ausgehebelt werden. Ein solches Programm wollen die Hacker notfalls über eine Erweiterung für das Mailprogramm Outlook automatisiert und Virus-artig im Netz verbreiten.

Der Anti-Zensur-Workshop zeigte allerdings gleichzeitig, dass die Freiheitskämpfer dringend juristischen Beistand benötigen. So hatten die meisten Teilnehmer über die rechtlichen Grundlagen der von Büssow ins Spiel gebrachten Sperren keinen blassen Schimmer. Für den Aufbau einer über Hacker-Tricks hinausgehenden Argumentationsbasis sind demnach noch einige juristischen Grundsatzrecherchen im Bereich Medien- und Internetrecht nötig.

MSCE Crash course!
Here order!

The long way to the European Cyber Rights union

Stefan Krempl 01.01.2002

Hackers and NGOs make mobilely against Big bread ago and net censorship

On Saturday the hacker meeting, to [eXternal left] which the chaos computer had loaded club (CCC) [eXternal left] to Berlin, gone to end, was overshadowed by the verabschiedung of a whole number of new laws in the context of the anti-terrorism and Cybercrime fight ([local ones left] Hacking is emergency A Crime). With concern the technology Freaks using for the uninformativeness observes besides the Duesseldorfer efforts to the InterNet censorship ([local ones left] the glad message of the Mr. Buessow) and awaits themselves tensely the things, which come [local ones left] to the European Union with the conversion of the new copyright guideline to the Napster delicate consumers.

[Download](#)

One of the main objectives of the organizers 18. Chaos Communication Congresses was it therefore, new alliances for the rights of the net citizens to schmieden. A better

"Campaigning" the hackers aim at and equal gesinnte Non Governmental organizations (NGOs) therefore - advertising and medium campaigns, with which the broad public is to be finally mobilized and be cleared up over the consequences of the decided or lining up law works and control measures.

The whole third Congressstag stood therefore completely in the indication of the brainstorming of European net activists. The CCC floats therefore in co-operation with the British citizen right organization [\[eXternal left \] Statewatch](#), representatives that global InterNet Liberty Campaign ([\[eXternal left \] GILC](#)) and other data security combinations the structure of a "Cyber Rights union" for the protection of the privatsphaere forwards. A medium-term goal is it to develop an office in Brussels for the lobbying on the European Union level. The plans are however still whole in the initial stage.

Hacktivismus for the knowledge liberty

Groping attempts toward better public work marked also the campaign Workshop "open cultures and free knowledge", with which the already dead believed citizen of Berlin cross-linking association [\[eXternal left \] micro](#) announced his comeback. "we want to pursue the changes with the copyright laws on longer time", explained the Netzaktivistin Inke Arns. Momentary it is to be feared that on political way liberties, which copyright in the similar media still grants are to be switched off. Go it mainly around the penetration from worth rights of the medium or to the software industry, not around the interests of the actual authors.

In order to clear mankind up over the modern Raubrittertum of the companies at that knowledge common land and technical course lungs of the users through digitally Rights management (DRM), micro could be inspired at a number of public-effective campaigns [\[eXternal left \]](#) of other NGOs ([\[local ones left \]](#) [digital rights and their managers](#)). Models see the citizens of Berlin for instance in the shock marketing practices of the managers of the agency originating from Vienna ubermorgen ([\[local ones left \]](#) [shock marketing](#)), who could land a large medium coup with the votes platform Voteauction.com exchanging for money in the past year in the USA.

In addition, with awards of the prize in styles [\[local ones left \]](#) of the [Big bread ago Awards](#)), that of [\[eXternal left \]](#) the [Deportation Class](#) image contamination of companies (state protection wittert terror in [\[local ones left \]](#) the net or [purposeful \(-\)](#), cribbed from by the example Lufthansa/cCondor, information campaigns A la [\[local ones left \]](#) [Superweed](#) liebaeugeln the advocates of the free knowledge exchange. "it concerns to spread medium viruses", says Inke Arns. To be supplemented the pallet of the attention excitation means is by classical methods of the Hacktivismus ([\[local ones left \]](#) [resistance from the Cyberspace](#)). Models are the groups of blank Marks and Yes one, which have responsibility for [\[eXternal left \]](#) [web page imitations](#) such as Gatt.org ([\[local ones left \]](#) [Gatt.org remains for the time being in the net](#)).

They have post office

The exact proceeding is to be discussed now the mandatory mailing list, whose address wants to publish micro on its Site. As "discharged" against it the idea Swiss of a hacker, who reinterprets a company campaign subversiv, became already as good: Microsoft had sent recently letters away at business customers and had not accused it therein the use of licensed copies. In similarly shocking style one could write users down also selected, so the suggestion, it to the use of robbery-copied software, refer video and Songs and sensitize in such a way for the topic. Finally plan the industry nothing different one to kriminalisieren than nearly all usual user practices.

A third, working group called of South German CCC members in the life wants to make itself strong for the recipient liberty in the InterNet and against the campaign of the Duesselderfer head of the provincial government Juergen Buessow the blockage of American Websites. As virtual planning platform those is to serve homepage [\[eXternal left \]](#) [of the censorship opponent Volker Birk](#). Some concrete, the talents of the hackers aimed using ideas were also here already sketched during the Workshops.

Attention, bypass

So it could quite happen that visitors of the virtual branch of the Duesseldorfer district government could land shortly completely unexpectedly on the Site set by Buessow on [\[eXternal left \]](#) the index [www.rotten.com](#). In addition is of individual Providern in North Rhine-Westphalia already implemented, but easily go aroundable [\[local ones left \]](#) [DNS barrier](#) by an automatic Plug in to be expenditure-levered. The hackers want to spread such a program if necessary over an extension for the Mailprogramm Outlook automated and virus-well-behaved in the net.

The anti- censorship Workshop showed however at the same time that the freedom fighters need urgently legal assistance. So most participants did not have a pale glow over the legal bases of the barriers brought by Buessow in the play. For the structure of one over hacker-cheat going out argumentation basis are therefore still some legal principle searches within the range medium and InterNet right necessary.

Der lange Weg zur europäischen Cyber-Rights-Union

[Stefan Krempl](#) 01.01.2002

Hacker und NGOs machen mobil gegen Big Brother und Netz-Zensur

Das am Samstag zu Ende gegangene

[\[External Link\]](#) **Hackertreffen**, zu dem der Chaos Computer Club ([\[External Link\]](#) **CCC**) nach Berlin geladen hatte, war überschattet von der Verabschiedung einer ganzen Reihe neuer Gesetze im Rahmen der Anti-Terrorismus- und

Cybercrime-Bekämpfung ([\[Local Link\]](#) **Hacking is Not a Crime**). Mit Sorge beobachten die sich für die Informationsfreiheit einsetzenden Technik-Freaks zudem die Düsseldorfer Bestrebungen zur Internet-Zensur ([\[Local Link\]](#) **Die Frohe Botschaft des Herrn Büssow**) und harren angespannt der Dinge, die mit der [\[Local Link\]](#) **Umsetzung** der neuen Urheberrechtsrichtlinie der EU auf die Napster-verwöhnten Verbraucher zukommen.

[Download](#)

Eines der Hauptanliegen der Veranstalter des 18. Chaos Communication Congresses war es daher, neue Allianzen für die Rechte der Netzbürger zu schmieden. Ein besseres "Campaigning" streben die Hacker und gleich gesinnte Non Governmental Organizations (NGOs) daher an - Werbe- und Medienkampagnen, mit denen endlich die breite Öffentlichkeit mobilisiert und über die Folgen der beschlossenen oder anstehenden Gesetzeswerke und Kontrollmaßnahmen aufgeklärt werden soll.

Der ganze dritte Congresstag stand daher ganz im Zeichen des Brainstormings europäischer Netzaktivisten. Dem CCC schwebt demnach in Kooperation mit der britischen Bürgerrechtsorganisation [\[External Link\]](#) **Statewatch**, Vertretern der Global Internet Liberty Campaign ([\[External Link\]](#) **GILC**) und anderen Datenschutzvereinigungen der Aufbau einer "Cyber-Rights-Union" zum Schutz der Privatsphäre vor. Mittelfristiges Ziel ist es, ein Büro in Brüssel für das Lobbying auf der EU-Ebene aufzubauen. Die Pläne sind allerdings noch ganz im Anfangsstadium.

Hacktivismus für die Wissensfreiheit

Tastende Versuche in Richtung besserer Öffentlichkeitsarbeit kennzeichneten auch den Kampagnen-Workshop "Offene Kulturen und Freies Wissen", mit dem der schon tot geglaubte Berliner Vernetzungsverein [\[External Link\]](#) **mikro** sein Comeback ankündigte. "Wir wollen die Änderungen bei den

Urheberrechtsgesetzen auf längere Zeit hin verfolgen", erklärte die Netzaktivistin Inke Arns. Momentan sei zu befürchten, dass auf politischem Wege Freiheiten, die das Urheberrecht in den analogen Medien noch gewährt, ausgeschaltet werden sollen. Dabei gehe es hauptsächlich um die Durchsetzung von Verwerterrechten der Medien- oder der Softwareindustrie, nicht um die Interessen der eigentlichen Urheber.

Um die Menschheit über das moderne Raubrittertum der Konzerne an der Wissensallmende und technische Gängelungen der Nutzer durch Digital Rights Management (DRM) aufzuklären, hat mikro sich an einer Reihe öffentlichkeitswirksamer Kampagnen anderer NGOs [\[External Link\]](#) inspirieren lassen ([\[Local Link\]](#) Digitale Rechte und ihre Manager). Vorbilder sehen die Berliner etwa in den Schockmarketing-Praktiken der aus Wien stammenden Manager der Agentur übermorgen ([\[Local Link\]](#) Schock-Marketing), die im vergangenen Jahr in den USA einen großen Mediencoup mit der Wahlstimmen gegen Geld tauschenden Plattform **Voteauction.com** landen konnten.

Aber auch mit Preisverleihungen im Stile des [\[Local Link\]](#) Big Brother Awards), der von der [\[External Link\]](#) Deportation Class am Beispiel Lufthansa/Condor abgeschauten Imageverschmutzung von Firmen ([\[Local Link\]](#) Staatsschutz wittert Terror im Netz oder gezielten (Des-) Informationskampagnen a la [\[Local Link\]](#) Superweed liebäugeln die Verfechter des freien Wissensaustauschs. "Es geht darum, Medienviren zu verbreiten", sagt Inke Arns. Ergänzt werden soll die Palette der Aufmerksamkeitserregungsmittel durch klassische Methoden des Hacktivismus ([\[Local Link\]](#) Widerstand aus dem Cyberspace). Vorbilder sind die Gruppen RTMark und Yes Man, die für Webseitenimitationen wie [\[External Link\]](#) Gatt.org verantwortlich zeichnen ([\[Local Link\]](#) Gatt.org bleibt vorerst im Netz).

Sie haben Post

Die genaue Vorgehensweise soll nun über die obligatorische

Mailingliste diskutiert werden, deren Adresse mikro auf seiner Site veröffentlichen will. So gut wie "verabschiedet" wurde dagegen bereits die Idee eines Schweizer Hackers, die eine Konzernkampagne subversiv umdeutet: Microsoft hatte kürzlich Briefe an Geschäftskunden verschickt und sie darin der Verwendung von nicht lizenzierten Kopien bezichtigt. In ähnlich schockierendem Stil könnte man auch ausgewählte Nutzer anschreiben, so der Vorschlag, sie auf die Verwendung raubkopierter Software, Videos und Songs hinweisen und so für das Thema sensibilisieren. Schließlich plane die Industrie nichts anderes, als fast alle gängigen Nutzerpraktiken zu kriminalisieren.

Ein dritter, von süddeutschen CCC-Mitgliedern ins Leben gerufener Arbeitskreis will sich für die Rezipientenfreiheit im Internet und gegen die Kampagne des Düsseldorfer Regierungspräsidenten Jürgen Büssow zur Sperrung amerikanischer Websites stark machen. Als virtuelle Planungsplattform soll die Homepage des Zensurgegners [\[External Link\]](#) Volker Birk dienen. Einige konkrete, die Fertigkeiten der Hacker gezielt einsetzenden Ideen wurden während des Workshops auch hier bereits entworfen.

Achtung, Umleitung

So könnte es durchaus passieren, dass Besucher der virtuellen Filiale der Düsseldorfer Bezirksregierung demnächst ganz unvermutet auf der von Büssow auf den Index gesetzten Site [\[External Link\]](#) www.rotten.com landen könnten. Außerdem soll die von einzelnen Providern in Nordrhein-Westfalen bereits implementierte, aber leicht umgehbare [\[Local Link\]](#) DNS-Sperre durch ein automatisches Plug-in ausgehebelt werden. Ein solches Programm wollen die Hacker notfalls über eine Erweiterung für das Mailprogramm Outlook automatisiert und Virus-artig im Netz verbreiten.

Der Anti-Zensur-Workshop zeigte allerdings gleichzeitig, dass die Freiheitskämpfer dringend juristischen Beistand benötigen. So hatten die meisten Teilnehmer über die rechtlichen Grundlagen der von Büssow ins Spiel gebrachten Sperren keinen blassen Schimmer. Für den Aufbau einer über Hacker-Tricks hinausgehenden Argumentationsbasis sind demnach noch einige juristischen Grundsatzrecherchen im Bereich Medien- und Internetrecht nötig.

Von Lucifer zu Rijndael

Die US-Regierung hat einen neuen Krypto-Algorithmus gekürt, der einen mindestens 30 Jahre lang gültigen Standard für Verschlüsselungsprodukte setzen soll

Stefan Krempf 03.10.2000

Das Oberste Gericht Russlands schränkt das Lauschgesetz SORM ein

Aber das ist nur ein kleiner Sieg, denn gleichwohl müssen die Provider auf ihre Kosten Abhörschnittstellen für den Geheimdienst einbauen, während ein neues Informationsgesetz auf Bedenken stößt

Florian Rötzer 03.10.2000

Napster bleibt vorerst online

Zweite Runde im Napster-Prozess endet ohne greifbares Ergebnis

Janko Röttgers 03.10.2000

Auferstanden aus Platinen

10 Jahre nach der Deutschen Einigung sind DDR-Computer begehrte Sammelobjekte

Peter Mühlbauer 03.10.2000

Chinas Regierung führt schärfere Internetgesetze ein

Provider sind für Inhalte verantwortlich und sollen illegale Inhalte zensieren und der Polizei melden

Florian Rötzer 03.10.2000

Bauernschläue vs. Verfassungstreue

Rechtsprofessor Lawrence Lessing und MPAA-Vorsitzender Jack Valenti diskutierten über geistiges Eigentum im Internet

Konrad Lischka 02.10.2000

Investoren gefällt Bezahlfernsehen mehr als Zuschauern

Nach einem Jahr will immer noch kaum jemand Premiere World sehen - trotz Fußball, Filmen, billigem Softsex und jahrzehntealten Serien

Konrad Lischka 02.10.2000

Wie ich bei der ICANN wählen ging

Tricksereien der ICANN bei den Wahlverfahren

Günter Hack 02.10.2000

Decoder vom Sozialamt

Die digitale Zukunft beginnt mit einem gigantischen Haufen an Elektroschrott

Ernst Corinth 02.10.2000

Keine Internetolympiade in Australien

Das IOC hatte eine rigide Beschränkungspolitik bei der Internetberichterstattung verfolgt und sagt jetzt, man habe die Bedeutung des Internet weit überschätzt.

Florian Rötzer 01.10.2000

SMS erfreut sich schnell wachsender Beliebtheit

Neun Milliarden SMS-Texte wurden im August über das GSM-Netz verschickt

Florian Rötzer 01.10.2000

Telefonbenutzer und private Surfer unter pauschalem Kriminalitätsverdacht

Bundesrat stimmt der umstrittenen Telekommunikationsdatenschutzverordnung zu

Stefan Krempl 30.09.2000

Daten auf Abruf

Bundesrat entscheidet über die Speicherfrist von Telekommunikationsverbindungsdaten

Christiane Schulzki-Haddouti 29.09.2000

Deutschland bleibt auch unter Rot-Grün »Weltmeister im Abhören«

Bundesregierung legt Abhörzahlen vor

Christiane Schulzki-Haddouti 29.09.2000

Digital ist unfair

Das Internet muss reguliert werden - um uns vor Urheberrechten zu schützen

Konrad Lischka 29.09.2000

Pappkarton mit Tresortür

Experten warnen vor der Informationsfülle digitaler Signaturen: Sie fürchten Nutzerprofile, Überwachung und Identitätsklau

Konrad Lischka 28.09.2000

Sind alle Telefonbenutzer und privaten Surfer Kriminelle?

Datenschutzbeauftragte warnen vor der Ausweitung der Datenspeicherei durch die Telekommunikationsdatenschutzverordnung

关注美国大选

大选透视

小布什戈尔到处圈地

任毓骏

美国总统选举还剩不到一个月时间，民主、共和两党都在使出浑身解数争取选票。真是地不分东南西北，人不分男女老少，只要哪里有选票，只要谁手中有选票，总统竞选人就会千方百计前往，想方设法把选票拉到手。

戈尔深入小布什腹地

美国总统竞选人第一次电视辩论后，几方面的民意测验都表明，小布什和戈尔的支持率越咬越紧，因而双方都希望在10月11日的第二次辩论中有突出表现。目前，两人都在集中精力为此做准备。10月8日，戈尔和他的竞选班子飞抵佛罗里达州，这已是他一周内第三次来到佛州。小布什的胞弟杰·布什是佛州的州长，为他哥哥的竞选早有经营，因而该州在某种意义上是小布什的根据地。此州有25张选举人票，实在不是个小数目。戈尔来此地的目的有两个，一是继续在该州世界上最大的鲨鱼研究中心的密室进行电视辩论操练，他的竞选班子已对第一次辩论总结了经验教训，为他准备了第二次辩论的提纲。戈尔的另一个或者说更重要的目的则是从小布什的盘中分羹。有分析家认为，戈尔的穿梭访问已产生影响。

美国大选有一传统战略，即让自己的副总统竞选人去攻击对方的总统竞选人，而主将则把精力集中在更直接地争取选民方面。目前，戈尔的副手利伯曼正在小布什的根据地得克萨斯州展开一系列活动，包括举行竞选集会，进行电视演说。

深入基层和选民接触，"目的是引起得州民众对该州的问题和缺点的关注"，证明"布什作为得州州长的记录是失败的记录"。

小布什发动胞弟

真是针尖对麦芒，戈尔到了小布什的根据地，小布什则前往戈尔的老家田纳西州进行竞选。据报道，小布什的声势颇大，取得了相当大的成功。有消息说，小布什在戈尔的家乡田纳西州的支持率目前竟然领先于戈尔。

人们早已知道布什家族父子兵的危害，竞选动用亲兄弟更是意料中事。小布什现任佛罗里达州州长的弟弟杰·布什，为哥哥竞选立下了汗马功劳。他一方面为小布什守住佛罗里达州的地盘，力争把该州的25张选举人票都拉在小布什名下，另一方面为争取捐款，四处活动，联络共和党要员特别是20多名共和党州长同僚，为小布什造势。

小布什拉票心切，竟然派另一个兄弟尼尔·布什前往台湾活动。据报道，尼尔·布什目前是一家网络教育公司的负责人，本月初抵达台湾，名为考察市场，开展业务，实则向台湾有关方面通报小布什对华政策的强硬立场，妄想拉一部分美籍台湾移民的选票。据统计，在美台湾省移民约有150多万，其中数十万聚居加利福尼亚州。小布什目前已加紧与加州的华裔选民接触，其弟台湾之行的目的不言自明。据报载，尼尔·布什此次赴台"十分低调，并未惊动官方"。出面接待的大多是"布什台湾之友会"的成员。

竟有网站拍卖选票

竞选之前，戈尔和小布什早就有了个人网站，至于支持各自党内总统竞选人（包括绿党、改革党在内）的形形色色的网站更是不胜枚举。如今又冒出一个视选票为奇货，待价而沽的“选票拍卖网站”。

据美联社报道，芝加哥有一个网站，公开声称自己是“选票拍卖者”，网址是：[WWW.voteauction.com](http://www.voteauction.com)。该网站的广告说，“这是一个让竞选活动捐款人可以和选民相聚并进行自由交易的理想之地”。其业务是，该网站通过调查，从选民那里核实哪些人可能在投票时缺席，然后征得这些选民的同意，把这些选票拍卖，出售给出价最高的人。而购票者“有权决定将选票一次性全部投给一个竞选人”。这家网站声称，目前全美国已有8000多名选民与他们“签订了合同”，其中有400余人来自芝加哥市所在的伊利诺伊州。这些选票目前的售价是每张16美元，而票价的行情正在看涨。

据悉，美国总统选举委员会已发现这一网站确实存在并进行活动，因而致函联邦检察官，强烈要求关闭这一网站。

大选透视

Young Bush Gore everywhere encircles

Lets the Yu steed

The American presidential election does not remain one month time, is democratic, the republican two parties all is causing all one's skill to win over the ballot. Really is does not divide the four cardinal points, the person does not divide everybody, so long as where has the ballot, so long as in who hand does have the ballot, president campaigns for the person can by any means possible go, does everything possible to pull the ballot the hand.

Gore thorough young Bush center

After American president campaigns for the person first television debate, several aspects public opinion polls all indicate, young Bush and Gore support rate more nips tightly, thus both sides both hope has the prominent performance in in the October 11th second debate. At present, two person of all centralisms energy are preparing for this. On October 8th, Gore and his campaign organized group flies to the Florida state, this already was in his one week third time arrives the Buddha state. Young Bush's younger blood brother outstanding - Bush is Buddha state governor, early has the management for his elder brother's campaign, thus this state in some kind of significance is the young Bush's base. This state has 25 elects the person ticket, really is not the small number. Gore comes this place goal to have two, one is continues in this state world the biggest shark fish research center Peru room to carry on the television debate drill, his campaign organized group had summarized the experience lesson to the first debate, prepared the compendium for him which second time debated. Gore another or said a more important goal is since childhood in Bush's plate the minute thick soup. Some analysts think, Gore shuttle visit has had the influence.

The American general election has one traditional strategy, namely lets oneself vice president campaign for the person attacks opposite party president campaigns for the person, but the commanding general concentrates the energy in directly strives for the voter aspect. At present, Gore 副手 Lieberman young Bush's base Texas state is launching a series of activities, includes the hold campaign assembly, carries on the television speech.

Goes down to the basic unit and the voter contacts, the " goal is causes the state populace to this state question and shortcoming attention ", proves " Bush takes the state governor's recording is defeat record ".

Young Bush mobilizes the younger blood brother

Really was the needle point to the wheat awn, Gore arrives the young Bush's base, young Bush went to Gore native place Tennessee state carries on the campaign. It is reported, young Bush's monentum very large, obtained the quite big success. Some news said, young Bush unexpectedly is in the lead in Gore hometown Tennessee state support rate at present to Gore.

The people already know Bush family fathers and sons soldier's fierce, the campaign use 亲兄弟 is in the anticipation the matter. Young Bush incumbent Florida state Governor's

younger brother outstanding - Bush, campaigned for for elder brother establishes the distinguished service. He on the one hand defends the Florida state for young Bush the domain, argues vigorously elects this state 25 the person ticket all pulls in the name of young Bush, on the other hand for strives for the donation, moves in all directions, contacts the Republican Party important person specially is more than 20 Republican Party governor the colleague, makes the potential for young Bush.

Young Bush garners votes cherished, unexpectedly sends another Brother Neil - Bush to go Taiwan moves. It is reported, Neil - Bush at present is one network education company's person in charge, at the beginning of this month arrives Taiwan, the named inspection market, the development service, the regulations notifies young Bush to the Taiwan parties concerned the China policy strong standpoint, the delusion pulls one part of American nationalities Taiwan immigrant's ballot. According to the statistics, approximately has 1500000 in the American Taiwan Province immigrant, several 100000 lives together the California state. Young Bush has at present stepped up with California's person of Chinese descent voter to contact, line its younger brother Taiwan goal obviously. According to appears in the newspapers, Neil - Bush this time goes to the " extremely low key, by no means alarms official ". Acts on behalf of to receive are greatly many is the member which " friend the Bush Taiwan meets ".

Unexpectedly has the website auctions the ballot

Before the campaign, Gore and young Bush already had individual website, as for supported each one inner-party president campaigns for the person (included green party, reform party in inside) the of all forms website is too numerous to cite individually. Now again emits one regards the ballot is the wonderful goods, waits for a better price the " ballot auctions website ".

According to the Associated Press reports, Chicago has one website, publicly declares oneself is " ballot auction ", the website is: WWW. voteauction. com. This website advertisement said, " this is one lets the campaign move the donor may gather with the voter and carry on the free transaction place " ideal. Its service is, this website through the investigation, which people verifies from voter there possibly when the voting absents, then gets collect requisition these voters' agreements, these ballot auctions, sells for bids the highest person. But buy tickets " has the power decides disposable completely throws the ballot for one campaigns for person ". This website declares, at present entire USA had had more than 8000 voters signs contract " with their ", including 400 extra people comes from Chicago to be at 伊利 诺伊 the state. These ballot at present selling prices are each 16 American dollars, but the ticket price quotation is being expected to rise.

It is reported, American president the election committee has discovered this website truly has and carries on the activity, thus sends a letter the federation public prosecutor, the intense request closes this website.

Die Frankfurter oder Offenbacher (Wo ist da eigentlich die Grenze) Galerie und Agentur (Und hier – wo ist hier die Grenze?) vier5, haben nebenbei noch ein wenig Zeit, um Schriften zu basteln und sich skurrile Namen auszudenken. Auch wenn echten Kerning-Freaks die Fonts hier doch etwas zu frei sein könnten, und man nicht um den Gedanken verlegen ist, zu sagen: „Also das, dass kann ich doch auch!“. Nein wirklich, fernab von allen Webfont oder „Emigre-Kopier“ Schmieden gibt es hier Typo die vielleicht Herrn Carson nicht mehr gefallen würde, aber zumindest staunen ließen. Wir staunen mit.

server@schoenerwissen.com

> [Boo](#)

Yup, hier ist sie (Miss Boo, heißt sie!) schon wieder, im neuen Look and Feel ist sie nun ein Fashionportal (gehört jetzt zum fashionmall dotcom Imperium), dass keine eigene Produkt-Auswahl hat, sondern einfach nur noch nach den Angeboten anderer eCommerce-Sites sucht. Ein schlechter Agent sozusagen. Da passiert es, dass man dann plötzlich bei Yahoo im Shoppingbereich landet, oder sich eben mal das neueste Verbrechen von Calvin Klein anschauen muss. Das wäre ja alles halb so schlimm, müsste man nicht dann bei jedem einzelnen, seine ID (Name, Strasse, XYZ,...) eingeben und könnte dann alles über boo ordern, aber so wird wohl boo bald wieder buh sein. Nett, oder?

Beim Interface sollte man sich erst einmal die alte boo-Site vorstellen – nur nun halt im html-Verschnitt (Da wird sich Herr Nielsen aber freuen...). Natürlich lacht einen immer noch die merkwürdig morbide Miss boo an, und versucht einem zu erzählen, dass das was man sich da gerade an den Mauszeiger hängt der heißeste Scheiß aus London, New York oder Paris sei. Aber lasst euch nicht verwirren – boykottiert boo, damit sie nicht die angestrebten 2 Millionen User Anfang 2001 erreichen. Aber mal ehrlich, dass würden sie nicht mal schaffen, wenn sich alle Debug und Tomorrow Leser verbünden würden. Bitte nicht zu Hause ausprobieren, hat Thomas Gottschalk an dieser Stelle immer gesagt.

to subscribe to de:bug webviews mailing list enter your email here:

Seit April erfüllt das Lifestyle Magazine wallpaper seine Mission im Netz. Die Zielgruppe ist klar: das junge reiche Paar, sportlich, gastfreundlich, reiselustig, in design und Architektur interessiert. Die Technikmarotte des Mannes überwiegt den weiblichen Ehrgeiz Teller schön zu dekorieren. Der Reihe nach: das Geld muss weg, kauft ein, lebt besser. Und das ist ganz einfach. Wallpaper erstattet Bericht über die letzte Möbelmesse in NY, hält eine Einführung in Gruppendynamik mit dem strategic seating planer (Drag and Drop System: wähl die Tischform aus und platzier Männchen neben Weibchen, dann erscheint ein wirklich blöder Kommentar, ob du es mit Raison gemacht hast), gibt Reisetips (Stadtplan zeigt Shops und Museen), offeriert das obligatorische Merchandising Angebot (Fahrrad, Turnschuh und CD), und den e- Messenger. Das alles kommt im flashy Easy Listening Style daher, und man verfällt ganz geheim dem Gedanken, dass man besser mit „The Face“ oder „ID“ als PDF leben kann, als sich diesen Praktikanten-Ideen länger zu widmen. Das Beste zum Schluss: schenkt eurer Liebsten zu Weihnachten ein Heim: das wallpaper Fertighaus kann überall aufgebaut werden und gibt dem Traum Raum.

➤ [FreeCustomer.com](#)

Daniel Pflumm, derzeitiger Liebling aller Galeristen, die verkaufen wollen – diesen Eindruck konnte man zumindest auf der ArtCologne in Köln gewinnen – geht es gut. Zumindest hat er ein Portal gegründet, das anlässlich seiner Ausstellung im Frankfurter Kunstverein (<http://www.fkv.de>) zu sehen ist. Hier will er uns erzählen, das bei ihm der Kunde frei sei – doch leider bringt uns sein Portal nur zu weiteren Pflummschen Websites oder dem verwandten Umfeld. Was dann ungefähr so funktioniert, wie dieses Spiel mit den Porno-Sites, bei dem man ohne Tastatur, also nur mit der Maus aus dem Porno-Imperium entfliehen muss. Wie hieß das noch mal?

Auf jeden Fall erfährt man eine Menge, über den wahren Kontext von diversen Szenarien. Das WMF zum Beispiel ist eigentlich ein Sportclub, bei Rolux spielt man Soccer, thing.net ist ein Webdesign-Laden und mikro ein Computerdiscounter. Das ist Humor wie wir ihn lieben, oder um es mit <http://www.ubermorgen.com> zu sagen: das ganze Leben ist ein Hoax!

▶ www.net-150.de

Net-150 ist ein interviewbasiertes Onlinezine, in dem Designer, Medientheoretiker, Konzepter in Wort und Bild über ihre Netzerfahrungen berichten. Net-150 - The Interview Channel bedeutet hier neue und kreative digitale Erzählkultur auf der Basis von filmbasierten Interviews (im Quicktimeformat) und text/bildbasierten Zusatzinformationen, die klassische dokumentarische Erzählweisen mit neuen multimedialen Darstellungsformen zu verbinden. Im Interview-Format erzählen die interviewten von ihrer Person, ihrem Privatleben, ihren Inspirationen und ihren Plänen im Kontext Web. Sehr kompaktes, einfach zugängliches, authetisches, innovatives und substanzielles Konzept in Thematik, Umsetzung und Usability.

Gebt mir einen Vorspann. Gebt mir diesen Vorspann. Ich liebe das Internet. "Wir lieben das Internet" ist da zu lesen. Sound, gute Mucke, überraschende Details in einem Flash-Movie, der Erdteile aufdimmt. SourceCode scrollt durch ein Fenster, die Internet-Ideologie wird sehr ironisch verarbeitet: "Wie man sich in das Internet

verliebt? Höre auf, Zeitung zu lesen. Lerne endlich richtig Englisch. Vergiss die Groß- und Kleinschreibung. Brich den Kontakt zu Leuten ohne Email-Adresse einfach ab. Der Rest ergibt sich von ganz allein." Kleine gelbe Löwen und tanzende Frauen, Cuben und ein Flugzeug. Ich schaue mir das noch einmal an.

Dann auf "Enter". Der Vorspann ist zu Ende und das Internet ist leider wieder so wie es ist. "Links", "Gästebuch", "Bilder", "Download", "Catcam", aber wir wollen nicht böse sein. Der Anfang war so schön. Und dann lassen wir lieber den Klick auf "Bilder". Bitte. Aber unter uns: Wer ist Anna?

NoNo: Menuepunkt "Bilder"

Yes: Der Vorspann. Never been better.

Menu: Klassisch nach dem Vorspann.

Data: Trailer in Flash (Sehr gutes Streaming), dann HTML

Links: Eigenes Menu mit sehr guten Flash-Beispielen

Returns: Nur zum Kucken. Aber das gerne.

▶ [I love Colette!](#)

Wer es bis jetzt noch nicht in das Edelkaufhaus Colette nach Paris geschafft hat, kann sich entweder im neuen e-Shop teure Gadgets aussuchen oder aber sich mit I love Colette! vergnügen.

Craig von flipflopflyin hat dem Laden auf seine Weise mehr Charme verpasst, als er in Wirklichkeit besitzt. Auf den vier Etagen tummeln sich pixelige Menschlein, die von den modernen Dingen des Lebens Liebe holen. Ausserdem gibt es eine Vorstellung der Lieblingsdesigner von Colette. Wer mehr von diesen, mini pixel Welten braucht, sollte besser gleich zu flipflopflyin gehen und winzigen Popstars verfallen, das MOMA besuchen und Banner, Icons etc. für den Eigengebrauch downloaden. Alles nur eine Frage des Maßstabs!

➤ [votauction](#)

Keiner kann eCommerce mehr hören, und deswegen gibt's jetzt auch den eCommerce für alle zum mitmachen, damit sich keiner ausgeschlossen, versetzt oder diskriminiert fühlt, kann sich ganz Amerika zusammenschließen. Ja, es geht um die Präsidentschaftswahlen, und die Leute dort gehen sowieso nicht wählen, dann können sie ihre Stimme doch auch einfach verkaufen, bzw. hier eben versteigern. Das sieht dann ungefähr so aus, dass Herr George W. Bush jun. sich mal eben 2000 Stimmen zusammenkaufen lässt und die Leute sich dafür in der Shoppingmall ein paar Burger und Pornokassetten holen. Das ist Demokratie im Cyberspace, nur dass die Handelnden über eine ganz reale Macht verfügen, mit der sie halt eben mal die Wahl manipulieren können. Nur, dass die Weltpolizei auch wieder dann an anderer Stelle Wahlbeobachter abstellt, damit die dritte Welt endlich mal zum Start Up wird.

server@schoenerwissen.de

➤ [ecko](#)

Selbe Baustelle wie eben, nur ein bisschen mehr Street und weniger Style, gleich bleibend langweilige Flashbastelarbeiten, von denen man ja wohl nichts mehr sehen kann. Bleibt nur zu hoffen das Flash 5, da etwas Freude in die Runde bringt.

Die Frankfurter oder Offenbacher (Wo ist da eigentlich die Grenze) Galerie und Agentur (Und hier – wo ist hier die Grenze?) vier5, haben nebenbei noch ein wenig Zeit, um Schriften zu basteln und sich skurrile Namen auszudenken. Auch wenn echten Kerning-Freaks die Fonts hier doch etwas zu frei sein könnten, und man nicht um den Gedanken verlegen ist, zu sagen: ???Also das, dass kann ich doch auch!“. Nein wirklich, fernab von allen Webfont oder ???Emigre-Kopier“ Schmieden gibt es hier Typo die vielleicht Herrn Carson nicht mehr gefallen würde, aber zumindest staunen ließen. Wir staunen mit.

server@schoenerwissen.com

> [Boo](#)

to subscribe to de:bug webviews mailing list enter your email here:

Yup, hier ist sie (Miss Boo, heißt sie!) schon wieder, im neuen Look and Feel ist sie nun ein Fashionportal (gehört jetzt zum fashionmall dotcom Imperium), dass keine eigene Produkt-Auswahl hat, sondern einfach nur noch nach den Angeboten anderer eCommerce-Sites sucht. Ein schlechter Agent sozusagen. Da passiert es, dass man dann plötzlich bei Yahoo im Shoppingbereich landet, oder sich eben mal das neueste Verbrechen von Calvin Klein anschauen muss. Das wäre ja alles halb so schlimm, müsste man nicht dann bei jedem einzeln, seine ID (Name, Strasse, XYZ,...) eingeben und könnte dann alles über boo ordern, aber so wird wohl boo bald wieder buh sein. Nett, oder?

Beim Interface sollte man sich erst einmal die alte boo-Site vorstellen – nur nun halt im html-Verschnitt (Da wird sich Herr Nielsen aber freuen...). Natürlich lacht einen immer noch die merkwürdig morbide Miss boo an, und versucht einem zu erzählen, dass das was man sich da gerade an den Mauszeiger hängt der heißeste Scheiß aus London, New York oder Paris sei. Aber lasst euch nicht verwirren – boykottiert boo, damit sie nicht die angestrebten 2 Millionen User Anfang 2001 erreichen. Aber mal ehrlich, dass würden sie nicht mal schaffen, wenn sich alle Debug und Tomorrow Leser verbünden würden. Bitte nicht zu Hause ausprobieren, hat Thomas Gottschalk an dieser Stelle immer gesagt.

» [Wallpaper](#)

Seit April erfüllt das Lifestyle Magazine wallpaper seine Mission im Netz. Die Zielgruppe ist klar: das junge reiche Paar, sportlich, gastfreundlich, reiselustig, in design und Architektur interessiert. Die Technikmarotte des Mannes überwiegt den weiblichen Ehrgeiz Teller schön zu dekorieren. Der Reihe nach: das Geld muss weg, kauft ein, lebt besser. Und das ist ganz einfach. Wallpaper erstattet Bericht über die letzte Möbelmesse in NY, hält eine Einführung in Gruppendynamik mit dem strategic seating planer (Drag and Drop System: wähl die Tischform aus und platzier Männchen neben Weibchen, dann erscheint ein wirklich blöder Kommentar, ob du es mit Raison gemacht hast), gibt Reisetips (Stadtplan zeigt Shops und Museen), offeriert das obligatorische Merchandising Angebot (Fahrrad, Turnschuh und CD), und den e- Messenger. Das alles kommt im flashy Easy Listening Style daher, und man verfällt ganz geheim dem Gedanken, dass man besser mit ???The Face“ oder ???ID“ als PDF leben kann, als sich diesen Praktikanten-Ideen länger zu widmen. Das Beste zum Schluss: schenkt eurer Liebsten zu Weihnachten ein Heim: das wallpaper Fertighaus kann überall aufgebaut werden und gibt dem Traum Raum.

server@schoenerwissen.com

» [FreeCustomer.com](#)

Daniel Pflumm, derzeitiger Liebling aller Galeristen, die verkaufen wollen – diesen Eindruck konnte man zumindest auf der ArtCologne in Köln gewinnen – geht es gut. Zumindest hat er ein Portal gegründet, das anlässlich seiner Ausstellung im Frankfurter Kunstverein (<http://www.fkv.de>) zu sehen ist. Hier will er uns erzählen, das bei ihm der Kunde frei sei – doch leider bringt uns sein Portal nur zu weiteren Pflummschen Websites oder dem verwandten Umfeld. Was dann ungefähr so funktioniert, wie dieses Spiel mit den Porno-Sites, bei dem man ohne Tastatur, also nur mit der Maus aus dem Porno-Imperium entfliehen muss. Wie hieß das noch mal?

Auf jeden Fall erfährt man eine Menge, über den wahren Kontext von diversen Szenarien. Das WMF zum Beispiel ist eigentlich ein Sportclub, bei Rolux spielt man Soccer, thing.net ist ein Webdesign-Laden und mikro ein Computerdiscounter. Das ist Humor wie wir ihn lieben, oder um es mit <http://www.ubermorgen.com> zu sagen: das ganze Leben ist ein Hoax!

Kiek kainuoja demokratija?

Naujas tinklapis www.voteauction.com, kaip tvirtina jo steigëjai, turintis „suartinti kapitalizmà ir demokratijà“, parduoda prezidento rinkëjø balsus aukcione. Oficialûs asmenys tvirtina, kad ði politinio protesto schema gali sukelti kriminaliniø pasekmiø.

„Rinkimø pramonë iðleidþia milijonus doleriø, siekdama daryti átakà prezidento rinkimø rezultatams“, – sakoma tinklapio steigëjø pareiðkime. – Ði sistema kandidatams ir juos palaikantiems yra neefektyvus pinigø iðleidimas. Mûsø aukcionas ir skirtas tam, kad rinkiminei kampanijai skirti pinigai tiesiogiai nukeliautø balsuotojams“.

Rugpjûeio mënese sukurtas tinklapis leidþia balsuoti aukcione ávairiø valstijø gyventojams. Daugiausiai pinigø pasiûlæs kandidatas á prezidento postà ir laimi.

„Að nesu cinikas“, – sako tinklapio ákûrëjas Dþeimsas Baumgartneris, politiniø mokslø absolventas ið Niujorko. – Að esu realistas. Þmonës mato, kaip kandidatai parduoda save, o balsuotojai turi kà nors laimëti“.

Taèiau ne visi sutinka su ðia idëja. Yra mananëiø, kad tai tiesiog nauja cinizmo iðraiðka bei demokratijos proceso griovimas. Jei 50 valstijø prokurorai nepatrauks atsakomybën organizatoriaus ir kiekvieno dalyvio, vadinasi, jie nedirba savo darbo. Tinklapis turëtø bûti panaikintas.

Balsø pirkëjai ir pardavëjai paþeidþia federalinius ástatymus ir gali susilaukti keleto tûkstanëiø doleriø baudos bei keleriø metø kalëjimo, tvirtina oficialûs asmenys. D. Baumgartneris sako, kad jis nèra nei balsø pirkëjas, nei pardavëjas, o tik suteikia galimybæ tai padaryti, pasiimdamas pelno dalá. Jis mano, kad ástatymai leidþia tai daryti, juolab kad 1970 m. buvo áteisintas pinigø vartojimas politinëse kampanijose. Dar daugiau, D. Baumgartneris tikisi artimiausiu metu susilaukti investuotojø bei reklamos skelbëjø.

Balsø pirkimo pasiûlymai „eBay“ aukcionø tinklapyje

Pinomame aukcionø tinklapyje „eBay“ atsirado norinëiø parduoti savo balsus. Tuo susidomëjo JAV

Teisingumo departamentas ir „eBay“, supinojæs apie „demokratijos pardavėjus“, nedelsiant iðtrynë pasiûlymus.

Merilendo valstijos balsuotojas, protestuodamas prieš politinæ korupcijà, paskelbë parduosiàs savo balsà prezidento rinkimuose up didþiausià pasiûlytà sumà. Rugsjûèio 15 d. pardavëjas aukcionø tinklapyje „eBay“ raðë: „parduodamas vieno JAV pilieèio, registruoto Merilendo valstijoje, balsas. Jûs privalote nurodyti up kà að turiu tiksliai balsuoti – partijà ir pavardæ. Kodël Amerikos pilieèiai turi bûti nuoðalyje, kai kongresmenai ir senatoriai parduoda savo balsus brangiau? Demokratija parduodama!“

Per dvi dienas buvo pateikta 20 pasiûlymø pirkti balsà, o kaina iðaugo nuo 5 iki 10100 doleriø. Kadangi balsø prekyba pabeidþia Merilendo valstijos ir JAV ástatymus, „eBay“ panaikino pasiûlymà, nors jis turëjo galioti iki rugsjûèio 25 dienos.

„Tai buvo tik politinis pokðtas, – sakë balsø pardavëjas Brajanas Vardas. – Að tikëjau, kad „eBay“ mano pasiûlymà panaikins. Tenorëjau atkreipti dëmesà á tai, kaip stambios firmos daro didelæ átakà finansuodamos politikus“.

Pagal Merilendo valstijos ástatymus, up balsø pardavimà ar pasiûlymà numatyta 1000 doleriø bauda ir vieneri metai kalëjimo, o balsø pirkëjai gali bûti nubausti ir penkeriais metais kalëjimo bei 2500 doleriø bauda. Nepaisant kriminaliniø pasekmiø, incidentas susilaukë pasekëjø – tà paèià dienà „eBay“ atsirado pasiûlymas pirkti balsà Vaðingtone. Pradinë kaina – tik 5 doleriai.

Kiek kainuoja demokratija?

Naujas tinklapis www.voteauction.com, kaip tvirtina jo steigėjai, turintis ???suartinti kapitalizmà ir demokratijà“, parduoda prezidento rinkøjø balsus aukcione. Oficialūs asmenys tvirtina, kad ði politinio protesto schema gali sukelti kriminaliniø pasekmiø.

???Rinkimø pramonė iðleidpia milijonus doleriø, siekdama daryti átakà prezidento rinkimø rezultatams“, – sakoma tinklapio steigøjø pareiðkime. – Ði sistema kandidatams ir juos palaikantiems yra neefektyvus pinigø iðleidimas. Mūsø aukcionas ir skirtas tam, kad rinkiminei kampanijai skirti pinigai tiesiogiai nukeliautø balsuotojams“.

Rugpjûeio mēnesà sukurtas tinklapis leidpia balsuoti aukcione ávairiø valstijø gyventojams. Daugiausiai pinigø pasiùlæs kandidatas á prezidento postà ir laimi.

???Að nesu cinikas“, – sako tinklapio ákûrėjas Dpeimsas Baumgartneris, politiniø mokslø absolventas ið Niujorko. – Að esu realistas. Þmonės mato, kaip kandidatai parduoda save, o balsuotojai turi kà nors laimėti“.

Taėiau ne visi sutinka su ðia idėja. Yra mananėiø, kad tai tiesiog nauja cinizmo iðraiðka bei demokratijos proceso griovimas. Jei 50 valstijø prokurorai nepatrauks atsakomybėn organizatoriaus ir kiekvieno dalyvio, vadinasi, jie nedirba savo darbo. Tinklapis turėtø bûti panaikintas.

Balsø pirkėjai ir pardavėjai paþeidpia federalinius ástatymus ir gali susilaukti keletu tūkstanėiø doleriø baudos bei keleriø metø kalėjimo, tvirtina oficialūs asmenys. D. Baumgartneris sako, kad jis nėra nei balsø pirkėjas, nei pardavėjas, o tik suteikia galimybæ tai padaryti, pasiimdamas pelno dalá. Jis mano, kad ástatymai leidpia tai daryti, juolab kad 1970 m. buvo áteisintas pinigø vartojimas politinėse kampanijose. Dar daugiau, D. Baumgartneris tikisi artimiausiu metu susilaukti investuotojø bei reklamos skelbėjø.

Balsø pirkimo pasiùlymai ???eBay“ aukcionø tinklapyje

Þinomame aukcionø tinklapyje ???eBay“ atsirado norinėiø parduoti savo balsus. Tuo susidomėjo JAV Teisingumo departamentas ir ???eBay“, supinojæs apie ???demokratijos pardavėjus“, nedelsiant iðtrynė pasiùlymus.

Merilendo valstijos balsuotojas, protestuodamas prieš politinę korupciją, paskelbė parduosiąs savo balsą prezidento rinkimuose už didžiausią pasiūlytą sumą. Rugsėjo 15 d. pardavėjas aukcione eBay“ rašė: „Parduodamas vienas JAV pilietis, registruotas Merilendo valstijoje, balsas. Jūs privalote nurodyti už ką aš turiu tiksliai balsuoti – partiją ir pavardę. Kodėl Amerikos piliečiai turi būti nuodalyje, kai kongresmenai ir senatoriai parduoda savo balsus brangiau? Demokratija parduodama!“

Per dvi dienas buvo pateikta 20 pasiūlymų pirkti balsą, o kaina išaugo nuo 5 iki 10100 dolerių. Kadangi balsų prekyba pabeigta Merilendo valstijos ir JAV ástatymus, eBay“ panaikino pasiūlymą, nors jis turėjo galioti iki rugsėjo 25 dienos.

Tai buvo tik politinis pokštas, – sakė balsų pardavėjas Brajanas Vardas. – Aš tikėjau, kad eBay“ mano pasiūlymą panaikins. Tenorėjau atkreipti dėmesį į tai, kaip stambios firmos daro didelę átaką finansuodamos politikus“.

Pagal Merilendo valstijos ástatymus, už balsų pardavimą ar pasiūlymą numatyta 1000 dolerių bauda ir vieneri metai kalėjimo, o balsų pirkėjai gali būti nubausti ir penkeriais metais kalėjimo bei 2500 dolerių bauda. Nepaisant kriminalinių pasekmių, incidentas susilaukė pasekėjų – tą pačią dieną eBay“ atsirado pasiūlymas pirkti balsą Vašingtone. Pradinė kaina – tik 5 doleriai.

Votos en venta al mejor postor

(18.10.2000): Un sitio web que ofrece vender 15,000 votos para las elecciones presidenciales estadounidenses al mejor postor, está siendo investigado por un posible fraude.

Bill Jones, secretario de Estado de California, hizo un anuncio incitando a los dueños austriacos del sitio a que prometieran no revelar jamás la identidad ni de los licitadores ni de los votantes. "Esto es un delito que podría ser castigado con hasta tres años en prisión (para los votantes)", señaló Jones.

De acuerdo a Jones, para el Estado podría ser difícil controlar las actividades de los inversionistas internacionales, pero que podría enjuiciar a los votantes. Aunque no aclaró como planea el Estado identificar a los participantes.

"Aún hasta quienes se inscribieron por bromear, esencialmente están cometiendo un fraude electoral", añadió Jones. Por su parte, Hans Bernhard, un inversionista, declaró que quitará el sitio de Internet antes de revelar la identidad de los votantes.

"Conozco a las instituciones americanas, especialmente a las instituciones legales y gubernamentales, amenazando masivamente es la forma en como resuelven las cosas, hacen que la gente tenga miedo. Nosotros no estamos asustados porque no existe una clara indicación de que algo serio puede venir de esto", afirmó Bernhard.

El lema del sitio es: "Acercando al capitalismo y la democracia" y el plan de sus propietarios es extender la "iniciativa" a todos los procesos electorales del mundo.

Votes for sale to the best postor

(18.10.2000): A Web site that offers to sell 15.000 votes for the American presidential elections to the best postor, is being investigated by a possible fraud.

Bill Jones, Secretary of State of California, did an announcement urging the Austrian owners from the site to that they promised to never reveal the identity neither of the bidders nor of the voters. "This is a crime that could be punished with up to three years in prison (for the voters)", it indicated Jones.

According to Jones, for the State it could be difficult to control the activities of the international investors, but who could judge the voters. Although it did not clarify as it plans the State to identify the participants.

"Still until those who registered to joke, essentially they are committing an electoral fraud", added Jones. On the other hand, Hans Bernhard, an investor, declared that it will clear the site of Internet before revealing the identity of the voters.

"I know the American institutions specially, to the legal institutions and governmental, threatening massively it is the form in as they solve the things, they cause that people are scared. We are not scared because a clear indication that does not exist something serious can come from this ", affirmed Bernhard.

The motto of the site is: "Approaching Capitalism and the democracy" and the plan of his proprietors it is to extend the "initiative" to all the electoral processes of the world.

Littérature numérique : existence d'un champ et communication des œuvres

Work in progress – Cerisy – 23 juillet 2004

Evelyne BROUDOUX

Laboratoire Paragraphe - IUT Vélizy - UVSQ

Prémises sur la littérature numérique

Depuis plus d'une vingtaine d'années, une production textuelle - lisible sur écran - d'œuvres narratives et poétiques, reste à la porte des champs éditoriaux gérant les documents imprimés et audiovisuels. Cette littérature que l'on pourrait qualifier d'expérimentale apparaît mieux reçue au sein des arts à dominante visuelle ou musicale utilisant l'informatique qu'au sein du champ éditorial légitimant les textes littéraires. Il faut noter cependant une exception concernant un genre littéraire ne dépendant d'aucun médium particulier, c'est celui de la poésie¹, puisque des manifestations comme E-poetry à Buffalo aux Etats-Unis ou P0es1s en Allemagne rendent compte régulièrement de l'avancée des créations.

On pourrait donc se demander si la littérature numérique participe à la constitution du champ des arts numériques ou si les pratiques du texte, en devenant indépendantes des circuits éditoriaux traditionnels, ne construisent pas elles-mêmes un nouveau champ.

Le fait est que nous sommes à une période jointure. En même temps que se développe la pratique du support informatique en tant que vecteur d'expression, l'informatique a provoqué la convergence des médias existants : images, sons et textes sont fondamentalement écrits avec le même langage " machine " même si leurs manifestations analogiques leur font garder le caractère spécifique de médias. La manipulation de ce langage machine est rendue accessible aux non informaticiens par les couches logicielles se matérialisant aux sens sous la forme d'interfaces graphiques.

Puisqu'écrire dans un espace-écran consiste aussi bien en la manipulation-transformation directe de la forme lisible qu'est le texte qu'en la programmation de sa forme linguistique, ce que l'on nomme " écriture " dans le geste est donc transformé par la multiplicité des interventions possibles sur le texte. Ce changement dans l'écriture pourrait fonder un champ.

S'agit-il d'un champ ?

La notion de champ empruntée par Pierre Bourdieu à la physique permet de décrire métaphoriquement le fonctionnement des univers sociaux. Ainsi, à la manière d'un électron soumis à un champ de forces électromagnétiques exerçant lui-même une force qui participe au champ et le modifie, l'agent du champ est agi et agissant. Il est partie prenante de luttes qui visent à définir ou à redéfinir les enjeux du champ.

Le principe de constitution d'un champ découle une loi d'attraction modulant les rapports entre les agents. C'est ainsi que le champ littéraire au XIXe se constitue, selon Bourdieu, autour de l'idée que la valeur symbolique de l'œuvre d'art est relativement indépendante de sa valeur commerciale. En résumé, la loi qui va constituer le champ spécifie le type de capital en jeu. Le champ littéraire se structurerait au XIXe autour de la répartition d'un capital symbolique géré par les maisons d'éditions, revues, écoles, salons, et autres institutions appartenant au champ.

Une condition de la pérennité du " champ " est sa persistance à exister dans l'espace social en tant qu'unité autonome. Ceci implique des caractéristiques comme la sensibilité aux luttes externes et la

¹ La poésie est un des genres littéraires qui précède le livre et lui survivra : au XXe siècle, des mouvements poétiques comme dada, la poésie concrète, sonore, visuelle animée ou numérique n'utilisent pas le support de l'imprimé comme vecteur principal d'expression.

capacité à les absorber, sinon il y a risque de dissolution du champ. Ces conflits à la périphérie influencent les rapports des agents à l'intérieur et sont susceptibles de modifier la configuration du champ, ce qui implique une capacité de traduction, seule garantie de l'autonomie. Un champ n'est donc pas figé mais en constante mutation.

Qu'est-ce qui fait loi ?

Le champ de la littérature numérique étant en construction, nous faisons l'hypothèse que ce qui fait loi dans le champ se tient dans les pratiques d'écriture de ses auteurs. C'est la maniabilité ou la pratique du support informatique intervenant directement dans les phases de l'écriture qui crée une modification substantielle d'avec le travail de l'écrivain classique. Celui-ci produit habituellement un texte dont la forme physique finale lui échappe totalement. Traité par d'autres mains, le texte sera formaté dans une mise en pages particulière à une collection, adapté à un genre littéraire, à un éditeur. Avec le travail informatique, la forme finale du texte à lire sur écran est sous la responsabilité de l'auteur qui l'inclut dans son travail d'écriture.

Plus spécifiquement, est revendiqué par une partie des acteurs, la programmation intervenant comme noyau structurant le dispositif de communication du texte à lire, d'autres niant ce codage pour se consacrer aux formes directement lisibles par le lecteur. Ces formes lisibles, faisant par ailleurs l'objet d'expérimentations par des artifices techniques (apparitions/disparitions, etc.), sont souvent automatisées et prêtes à l'emploi et sont quelquefois revendiquées comme étant la base du travail d'écriture.

" C'est toujours cette croyance qu'il y a un ailleurs, qu'il y a une apparition possible, et que ce que l'on voit n'est qu'une partie de la réalité. [...] Faire jouer des séquences d'apparition/disparition comme la première figure de toute rhétorique."²

Le champ étant en émergence, les tensions ont lieu sur ce qui doit faire loi, dans le champ. Pour les écrivains-programmeurs, c'est le degré de codage qui est l'indicateur de réussite du dispositif de communication ; pour l'hypertexte, ce peut être l'utilisation narrative des liens ; dans tous les cas, le dispositif technique donnant ou créant le texte à lire est reconnu comme élément fondamental de l'œuvre.

" Plusieurs auteurs, ainsi que des artistes d'art électronique, se sont regroupés pour mieux exprimer la complémentarité, la diversité et la richesse de ce qui, dans leur démarche, relève de cette voie. Ils considèrent, en très gros, que l'événement multimédia accessible au lecteur n'est qu'un transitoire observable, un état (et non un objet) produit par un processus physique non totalement maîtrisé par le programme, que l'auteur, tout comme le lecteur, sont des composantes du système avec tout ce que cela implique comme engagement et incommunicabilité, et enfin que le travail sur le programme (et non fondamentalement sur le produit observable) est la nature même de leur écriture."³

L'écriture littéraire informatique accorde une importance significative, voire signifiante, à l'inscription technologique produisant le texte. Il s'agit donc d'un technotexte, selon la définition qu'en donne Katherine Hayles⁴, où les significations attribuées aux textes interagissent avec leur matérialisation, et ce quelles que soient les techniques d'inscriptions du support utilisées.

Parmi les conséquences pour la lecture, retenons le fait que le lecteur n'appréhende que rarement les formes préparatoires que l'auteur a manoeuvrées ; ce qu'il lit est substantiellement différent de comment cela a été écrit. Le contrat de lecture inclut ce principe ; face au méta-auteur se tient un méta-lecteur. C'est ainsi que le processus de formation des phrases est exhibé pendant la génération poétique des œuvres de Jean-Pierre Balpe ou que certaines œuvres se cachent dans le code HTML autorisant leur affichage-écran⁵.

² Message de Xavier Malbreil du 14 juin 2001 à la liste E-critures intitulé apparition/disparition.

³ Message de Philippe Bootz, poète-théoricien de l'art programmé, du 15 avril 2003 à la liste E-critures.

⁴ "[...] *when a literary work interrogates the inscription technology that produces it, it mobilises reflexive loops between its imaginative world and the material apparatus embodying that creation as a physical presence.*" [Hayles, 2002, p.25]

⁵ <meta name="keywords" content="black, website, concept, 1951, 2003, ubermorgen, etoy, HANS BERNHARD, LIZVLX, rauschenberg, malevich, neo, anuscan, voteauction, metaballs, florian, dose,

Une littérature numérique qui cherche son champ ?

La littérature numérique, comme les " arts numériques " de façon générale, n'a pas encore trouvé de modèle économique susceptible de rendre autonome le travail créatif de ses auteurs. Elle est souvent autofinancée alors que les " arts numériques " seront plus facilement subventionnés, voire portés à bout de bras par les organismes publics (ministère de la Culture, institutions muséales, universités, centres de recherche et de création). L'autonomisation du champ se fait attendre : diverses revues en ligne ont mis la clé sous la porte faute de rentrées financières et les quelques initiatives françaises comme celle de l'Apelse⁶ ne subsistent que grâce à l'investissement personnel et financier de leurs promoteurs. Pourtant il faut reconnaître qu'une institutionnalisation progresse : des projets comme Elo⁷ ou l'existence d'associations de gestion de droits d'auteurs comme la Scam⁸ sont là pour en témoigner.

Il faut ajouter à ce constat le manque d'une critique régulière " grand public " des œuvres produites et une connaissance quasi-inexistante du lectorat potentiel, faute d'études engagées en ce sens. Pourtant, la littérature numérique bénéficie régulièrement d'articles dans la presse hebdomadaire nationale comme *Télérama* ou occasionnellement dans les rubriques du quotidien *Le Monde* – leurs suppléments sur le web se révélant par ailleurs bien fournis en la matière. Si la critique littéraire n'ignore pas la poésie numérique, elle ne semble pas encore s'être sérieusement penchée sur les hyperfictions et leur renouvellement du genre romanesque.

Enfin, et c'est peut-être la première raison, le volume des œuvres littéraires numériques n'a peut-être pas atteint la masse critique susceptible d'entraîner la création d'un marché. A noter que la structure même de ces œuvres peut entraîner une impossibilité d'appartenir au champ des industries culturelles basé sur la gestion de stocks et de flots unidirectionnels, alors qu'un nombre considérable de travaux ne tient qu'au flux échangé entre ordinateurs (*The famous sound of absolute wreaders*⁹ en est un exemple parlant).

Il nous faut donc constater l'émergence du champ et ne garder de cette notion que ce qui fonde la littérature numérique : une écriture spécifique faite de programmes et d'un jeu entremêlant le texte avec d'autres médias, ou ne gardant du texte que son image.

Genres de la littérature numérique et communication des œuvres

Les flous autour des définitions résultent des genres en construction et d'un travail substantiellement différent du support informatique. Fictions hypertextuelles ou hyperfictions, poésies animées, cinétiques ou performances, œuvres génératives, algorithmiques et combinatoires font appel à des techniques précises : langage vectoriel de Flash, codage HTML, liens conditionnels en Javascript, programmation en Lingo, génération en Java, etc.

La formation de listes de discussions en ligne montre que les pôles d'attraction sont eux-mêmes révélateurs de genres en formation : Autour de Vaduz (poésie sonore), E-critures (cyberlittérature), Nettime (net-art), Transitoire Observable (art programmé), etc.

shulgin, respect, copy, fast copy, super fast copy, laisser faire, making jokes about things, being serious anyway without being humourless"> - Extrait du code HTML de la page : http://www.ubermorgen.com/THE_BLACK_WEBSITE/index_sig.html

⁷ Electronic literature organisation (<http://www.eliterature.org>). PAD (Preservation, Archiving, and Dissemination of Electronic Literature) est un secteur de l'ELO chargé de la préservation, de l'archivage et la dissémination de la littérature électronique, organisant en cela une mémoire du champ.

⁸ Société civile des auteurs multimédia (

⁹ Wreaders : Johannes Auer, Reinhard Döhl, Sylvia Egger, Oliver Gassner, Martina Kieninger, Beate Suter (<http://kunstradio.cyberfiction.ch>). Travail d'écriture collective en ligne présenté à P0es1s'04 à Berlin.

On peut cependant aussi catégoriser les œuvres selon leur procédé de mise à disposition à un public : à la lecture publique correspondent des installations-performances, à la lecture privée répondent des dispositifs paratextuels de présentation des œuvres. Le travail sur le dispositif de communication d'une œuvre publiée sur le web sera sensiblement différent de celui d'une œuvre indépendante du réseau.

Alors que le livre est à lui-même un objet de communication (auquel vont correspondre des collections, des genres littéraires, etc.), l'œuvre numérique littéraire est confrontée à la nécessité d'inventer son propre dispositif de communication.

Comment se donne à lire une œuvre numérique ?

Les Interfaces de monstration d'œuvres sont là pour témoigner de la difficulté, pour le lecteur, à déterminer ce qui fait œuvre dans la frontière entre l'interface et l'œuvre elle-même. Un des pionniers de la littérature hypertextuelle à avoir exploité les possibilités offertes par cette faille est Michael Joyce, auteur d'*Afternoon, a story*¹⁰. Dans cette fiction écrite par un logiciel pratiquement conçu par et pour l'auteur¹¹, les titres des modules visités et les noms attribués aux liens se répondent. Des correspondances s'établissent entre la "chose parcourue" et la "chose qui parcourt". Ainsi, le parcours "Fragment" d'*Afternoon, a story* procède à la manière d'un poème dévoilant ses mots un à un et prenant une signification nouvelle si on le déroule à l'envers. Les mots deviennent les ricochets d'une balle envoyée par une raquette de ping pong. La raquette se composant du nom de parcours ou du lien, du titre du fragment et du fragment lui-même. Ici, une double lecture se fait : les mots ont un sens, mais le dispositif structurant qui les porte aussi.

*A life set for two*¹² de Robert Kendall s'inscrit dans une interface permettant de régler la vitesse de lecture de ce poème cinétique, changeant et inépuisable. Les choix effectués par le lecteur dans la "gradation des émotions" modifient ce qui est donné à lire et orientent le lecteur vers une des trois fins possibles du poème que le lecteur est alors invité à relire. Comme dans *Afternoon, a story*, un avertissement de l'auteur donne le "mode d'emploi" du poème.

L'interface donnant accès aux œuvres du n°12 d'*Alire*¹³ est performative : ici, la médiation éditoriale des œuvres est assurée directement par un auteur générique guidant le lecteur, l'apostrophant quelquefois et se jouant de ses difficultés à se saisir d'œuvres ne se donnant pas à lire si facilement. Ce paratexte jaillissant sous les actions du lecteur joue avec l'instabilité du support informatique et dédramatise une maîtrise aléatoire de l'interface dont le comportement est directement dépendant du matériel utilisé.

La position du lecteur indicatrice de futurs genres ?

Travaux algorithmiques produisant des textes dont la durée de vie est liée aux règles qui les constituent, œuvres dont les textes sont régénérés ou se modifiant à chaque matérialisation, sont des créations dont les paratextes sont indépendants des œuvres. Le lecteur est confronté à des textes en variation, des espaces de possibles d'œuvres, et il reste le spectateur de modifications qui lui échappent, il est ramené à un rôle principal qui est de donner un sens à l'œuvre. Quelquefois sa lecture est susceptible d'influencer l'évolution du déroulement de l'œuvre – le lecteur produit alors des interférences susceptibles de modifier les textes machines comme dans le *Poème à lecture unique*¹⁴ de Philippe Bootz. Cependant, c'est son comportement de lecteur qui est capté sans qu'il en soit toujours conscient : il n'agit donc pas sur le texte

¹⁰ Eastgate systems, 1992.

¹¹ Les conditions de la création du logiciel *Storyspace* ont été décrites dans le travail de la thèse, *Outils, pratiques autoritatives du texte, constitution du champ de la littérature numérique*, soutenue par l'auteur en 2003, à Paris8.

¹² Eastgate Systems, 1995.

¹³ Mots-Voir, 2004.

¹⁴ Poème évolutif (1995-2004) édité par l'auteur dans la revue *Alire*.

explicitement, sa lecture est non ergodique. Dans ce type d'œuvre, l'interprétation est libre et sans cesse renvoyée à la subjectivité du lecteur, l'œuvre est ouverte, le trajet du lecteur n'est pas contraint, sauf par une linéarité liée au défilement du texte dans un espace-temps.

En face, se dresse la cyberlittérature, où la sollicitation du déplacement du lecteur dans l'œuvre résulte d'une stratégie d'auteur : liens conditionnels autorisant l'ouverture de nouveaux fragments hypertextuels, choix dans des menus, introduction de mots-clés ou activation de zones cachées, construisent une lecture ergodique ; une gestion de ses déplacements est demandée au lecteur alors que ceux-ci sont quelquefois contraints par des règles ignorées par lui. Lorsque la séparation d'avec le paratexte est peu marquée voire gommée, l'œuvre se fait leurre.

Si une hybridation de ces œuvres existe, la gestion de la position du lecteur dans l'œuvre par l'auteur et ses conséquences implicites ou explicites pour le lecteur restent des constantes qui permettent de continuer à les distinguer.

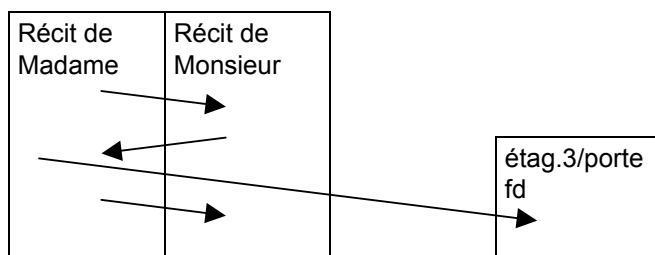

L'œuvre littéraire numérique est performative, jouable, exposable, et rejoint une catégorie d'œuvres d'arts depuis toujours confrontées à cet enjeu communicationnel de base : communiquer qu'elles sont des œuvres.

La médiation construite par l'auteur pour qu'autrui puisse se saisir de ce qui est dit, se l'approprier et faire sens est donc en étroite liaison avec la gestion de l'informatique en tant que support de lecture, ce qui suppose un contrat de lecture double. Les significations attribuées aux textes interagissant avec leur matérialisation, c'est-à-dire les techniques d'inscription.

Contrat de lecture matériel et dialogique

La manipulation du support se réalise tant au niveau des interfaces d'accès aux œuvres que dans leur arrangement interne. Cela va de la simple activation d'une icône générant un poème dans le cas de la génération à la gestion d'une carte matérialisant les fragments parcourus (cas de la cyberlittérature).

Dans un article sur l'art de l'ellipse, une des figures de rhétorique utilisée classiquement dans les hypertextes de fiction [CLÉMENT, 95], Serge Bouchardon a mis en perspective l'utilisation des liens et ancres hypertextes, comme des ressorts narratifs constitutifs de la lecture et de l'interprétation de *Non-Roman* [BOUCHARDON, 02]. Il admet cependant que ces figures narratives s'incarnent dans des figures matérielles. Sans le jeu sur le fenêtrage, pas de confrontation possible des récits de "Monsieur" et "Madame" (inclusion de deux fenêtres dans une seule). De même, la description de l'appartement où prend place la scène racontée et les interpellations du personnage lecteur par l'"auteur" se déroulent dans des hors-textes se matérialisant dans des fenêtres autonomes. Plutôt que d'inscrire l'entrelacement des récits par un procédé littéraire, l'auteur a préféré les incarner dans un jeu sur les fenêtres réalisant en cela une économie de mots et maintenant un récit conjugué au présent..

Si l'interprétation est autorisée grâce à l'identification du genre permettant la reconnaissance du contexte convoqué, nous avons vu que certaines œuvres brouillent les cartes : la manipulation du support entrant pour une bonne part dans l'œuvre elle-même. Ce jeu avec le support est aussi ancien que l'écriture : au XVIIIe, un jeu graphique avec le "pâté" d'imprimerie était relevé sur les libelles placardés sur les murs de Paris.

C'est ainsi que la gestion pragmatique des œuvres pourraient influencer la naissance de nouveaux genres. Borges a montré que le genre dépend moins du texte lui-même que de la façon dont il est lu. Il nécessite une intelligence réciproque entre locuteurs (en référence à l'angle dialogique de Bakhtine) qui passe par un contrat de lecture.

La construction de communautés de lecteurs autour des œuvres en ligne est un des signes de cette gestion pragmatique. Ainsi, *Trajectoires*¹⁵, roman génératif et aléatoire, recueille les traces de lecture et accélère la résolution de l'énigme qui se trouve entièrement dictée par l'interface. La tension narrative a donc été extraite du texte pour être portée par l'interface. Dans *Le livre des morts*¹⁶, les lecteurs sont invités à se transformer en scripteurs et à répondre aux questions dans la chambre de lecture créée à cet effet.

L'art programmé gomme les frontières qui autrefois séparaient les écritures artistiques (texte, musique, image) et pose la spécificité du littéraire dans le champ des arts. La poésie numérique telle que celle pratiquée par Alexandre Gherban¹⁷ n'est-elle qu'un jeu sur le signifiant ? S'agit-il encore de littérature ?

Si la manipulation du support prime sur la lecture du contenu, que devient la notion de lecture ? La distanciation par le choc esthétique remplace-t-elle pas la distanciation par la lecture ?

Littérature numérique : existence d'un champ

et communication des œuvres

Work in progress – Cerisy – 23 juillet 2004

Evelyne BROUDOUX

Laboratoire Paragraphe - IUT Vélizy - UVSQ

Prémises sur la littérature numérique

Depuis plus d'une vingtaine d'années, une production textuelle - lisible sur écran - d'œuvres narratives et poétiques, reste à la porte des champs éditoriaux gérant les documents imprimés et audiovisuels. Cette littérature que l'on pourrait qualifier d'expérimentale apparaît mieux reçue au sein des arts à dominante visuelle ou musicale utilisant l'informatique qu'au sein du champ éditorial légitimant les textes littéraires. Il faut noter cependant une exception concernant un genre littéraire ne dépendant d'aucun médium particulier, c'est celui de la poésie¹, puisque des manifestations comme E-poetry à Buffalo aux Etats-Unis ou P0es1s en Allemagne rendent compte régulièrement de l'avancée des créations.

On pourrait donc se demander si la littérature numérique participe à la constitution du champ des arts numériques ou si les pratiques du texte, en devenant indépendantes des circuits éditoriaux traditionnels, ne construisent pas elles-mêmes un nouveau champ.

Le fait est que nous sommes à une période jointure. En même temps que se développe la pratique du support informatique en tant que vecteur d'expression, l'informatique a provoqué la convergence des médias existants : images, sons et textes sont fondamentalement écrits avec le même langage " machine " même si leurs manifestations analogiques leur font garder le caractère spécifique de médias. La manipulation de ce langage machine est rendue accessible aux non informaticiens par les couches logicielles se matérialisant aux sens sous la forme d'interfaces graphiques.

Puisqu'écrire dans un espace-écran consiste aussi bien en la manipulation-transformation directe de la forme lisible qu'est le texte qu'en la programmation de sa forme linguistique, ce que l'on nomme " écriture " dans le geste est donc transformé par la multiplicité des interventions possibles sur le texte. Ce changement dans l'écriture pourrait fonder un champ.

S'agit-il d'un champ ?

La notion de champ empruntée par Pierre Bourdieu à la physique permet de décrire métaphoriquement le fonctionnement des univers sociaux. Ainsi, à la manière d'un électron soumis à un champ de forces électromagnétiques exerçant lui-même une force qui participe au champ et le modifie, l'agent du champ est agi et agissant. Il est partie prenante de luttes qui visent à définir ou à redéfinir les enjeux du champ.

Le principe de constitution d'un champ découle une loi d'attraction modulant les rapports entre les agents. C'est ainsi que le champ littéraire au XIXe se constitue, selon Bourdieu, autour de l'idée que la valeur symbolique de l'œuvre d'art est relativement indépendante de sa valeur commerciale. En résumé, la loi qui va constituer le champ spécifie le type de capital en jeu. Le champ littéraire se structurerait au XIXe

autour de la répartition d'un capital symbolique géré par les maisons d'éditions, revues, écoles, salons, et autres institutions appartenant au champ.

Une condition de la pérennité du " champ " est sa persistance à exister dans l'espace social en tant qu'unité autonome. Ceci implique des caractéristiques comme la sensibilité aux luttes externes et la

¹ La poésie est un des genres littéraires qui précède le livre et lui survivra : au XXe siècle, des mouvements poétiques comme dada, la poésie concrète, sonore, visuelle animée ou numérique n'utilisent pas le support de l'imprimé comme vecteur principal d'expression.

capacité à les absorber, sinon il y a risque de dissolution du champ. Ces conflits à la périphérie influencent les rapports des agents à l'intérieur et sont susceptibles de modifier la configuration du champ, ce qui implique une capacité de traduction, seule garantie de l'autonomie. Un champ n'est donc pas figé mais en constante mutation.

Qu'est-ce qui fait loi ?

Le champ de la littérature numérique étant en construction, nous faisons l'hypothèse que ce qui fait loi dans le champ se tient dans les pratiques d'écriture de ses auteurs. C'est la maniabilité ou la pratique du support informatique intervenant directement dans les phases de l'écriture qui crée une modification substantielle d'avec le travail de l'écrivain classique. Celui-ci produit habituellement un texte dont la forme physique finale lui échappe totalement. Traité par d'autres mains, le texte sera formaté dans une mise en pages particulière à une collection, adapté à un genre littéraire, à un éditeur. Avec le travail informatique, la forme finale du texte à lire sur écran est sous la responsabilité de l'auteur qui l'inclut dans son travail d'écriture.

Plus spécifiquement, est revendiqué par une partie des acteurs, la programmation intervenant comme noyau structurant le dispositif de communication du texte à lire, d'autres nient ce codage pour se consacrer aux formes directement lisibles par le lecteur. Ces formes lisibles, faisant par ailleurs l'objet d'expérimentations par des artifices techniques (apparitions/disparitions, etc.), sont souvent automatisées et prêtes à l'emploi et sont quelquefois revendiquées comme étant la base du travail d'écriture.

" C'est toujours cette croyance qu'il y a un ailleurs, qu'il y a une apparition possible, et que ce que l'on voit n'est qu'une partie de la réalité. [...] Faire jouer des séquences d'apparition/disparition comme la première figure de toute rhétorique. "

Le champ étant en émergence, les tensions ont lieu sur ce qui doit faire loi, dans le champ. Pour les écrivains-programmeurs, c'est le degré de codage qui est l'indicateur de réussite du dispositif de communication ; pour l'hypertexte, ce peut être l'utilisation narrative des liens ; dans tous les cas, le dispositif technique donnant ou créant le texte à lire est reconnu comme élément fondamental de l'œuvre.

" Plusieurs auteurs, ainsi que des artistes d'art électronique, se sont regroupés pour mieux exprimer la complémentarité, la diversité et la richesse de ce qui, dans leur démarche, relève de cette voie. Ils considèrent, en très gros, que l'événement multimédia accessible au lecteur n'est qu'un transitoire observable, un état (et non un objet) produit par un processus physique non totalement maîtrisé par le programme, que l'auteur, tout comme le lecteur, sont des composantes du système avec tout ce que cela implique comme engagement et incommunicabilité, et enfin que le travail sur le programme (et non fondamentalement sur le produit observable) est la nature même de leur écriture. "

L'écriture littéraire informatique accorde une importance significative, voire signifiante, à l'inscription technologique produisant le texte. Il s'agit donc d'un technotexte, selon la définition qu'en donne Katherine Hayles ⁴, où les significations attribuées aux textes interagissent avec leur matérialisation, et ce

quelles que soient les techniques d'inscriptions du support utilisées. Parmi les conséquences pour la lecture, retenons le fait que le lecteur n'appréhende que rarement les formes préparatoires que l'auteur a manoeuvrées ; ce qu'il lit est substantiellement différent de comment cela a été écrit. Le contrat de lecture inclut ce principe ; face au méta-auteur se tient un méta-lecteur. C'est ainsi que le processus de formation des phrases est exhibé pendant la génération poétique des œuvres de Jean-Pierre Balpe ou que certaines œuvres se cachent dans le code HTML autorisant leur affichage-écran⁵.

² Message de Xavier Malbreil du 14 juin 2001 à la liste E-critures intitulé apparition/disparition.

Une littérature numérique qui cherche son champ ?

La littérature numérique, comme les “ arts numériques ” de façon générale, n'a pas encore trouvé de modèle économique susceptible de rendre autonome le travail créatif de ses auteurs. Elle est souvent autofinancée alors que les “ arts numériques ” seront plus facilement subventionnés, voire portés à bout de bras par les organismes publics (ministère de la Culture, institutions muséales, universités, centres de recherche et de création). L'autonomisation du champ se fait attendre : diverses revues en ligne ont mis la clé sous la porte faute de rentrées financières et les quelques initiatives françaises comme celle de l'Apelse⁶ ne subsistent que grâce à l'investissement personnel et financier de leurs promoteurs. Pourtant il faut reconnaître qu'une institutionnalisation progresse : des projets comme Elo⁷ ou l'existence d'associations de gestion de droits d'auteurs comme la Scam⁸ sont là pour en témoigner.

Il faut ajouter à ce constat le manque d'une critique régulière “ grand public ” des œuvres produites et une connaissance quasi-inexistante du lectorat potentiel, faute d'études engagées en ce sens. Pourtant, la littérature numérique bénéficie régulièrement d'articles dans la presse hebdomadaire nationale comme Télérama ou occasionnellement dans les rubriques du quotidien Le Monde – leurs suppléments sur le web se révélant par ailleurs bien fournis en la matière. Si la critique littéraire n'ignore pas la poésie numérique, elle ne semble pas encore s'être sérieusement penchée sur les hyperfictions et leur renouvellement du genre romanesque.

Enfin, et c'est peut-être la première raison, le volume des œuvres littéraires numériques n'a peut-être pas atteint la masse critique susceptible d'entraîner la création d'un marché. A noter que la structure même de ces œuvres peut entraîner une impossibilité d'appartenir au champ des industries culturelles basé sur la gestion de stocks et de flots unidirectionnels, alors qu'un nombre considérable de travaux ne tient qu'au flux échangé entre ordinateurs (The famous sound of absolute wreaders⁹ en est un exemple parlant).

Il nous faut donc constater l'émergence du champ et ne garder de cette notion que ce qui fonde la littérature numérique : une écriture spécifique faite de programmes et d'un jeu entremêlant le texte avec d'autres médias, ou ne gardant du texte que son image.

Genres de la littérature numérique et communication des œuvres

Les flous autour des définitions résultent des genres en construction et d'un travail substantiellement différent du support informatique. Fictions hypertextuelles ou hyperfictions, poésies animées, cinétiques ou performances, œuvres génératives, algorithmiques et combinatoires font appel à des techniques précises : langage vectoriel de Flash, codage HTML, liens conditionnels en Javascript, programmation en Lingo, génération en Java, etc.

La formation de listes de discussions en ligne montre que les pôles d'attraction sont eux-mêmes révélateurs de genres en formation : Autour de Vaduz (poésie sonore), E-critures (cyberlittérature), Nettime (net-art), Transitoire Observable (art programmé), etc.

shulgin, respect, copy, fast copy, super fast copy, laisser faire, making jokes about things, being serious anyway without being humourless"> - Extrait du code HTML de la page : http://www.ubermorgen.com/THE_BLACK_WEBSITE/index_sig.html

⁷ Electronic literature organisation (<http://www.eliterature.org>). PAD (Preservation, Archiving, and Dissemination of Electronic Literature) est un secteur de l'ELO chargé de la préservation, de l'archivage et la dissémination de la littérature électronique, organisant en cela une mémoire du champ.

⁸ Société civile des auteurs multimédia (

⁹ Wreaders : Johannes Auer, Reinhard Döhl, Sylvia Egger, Oliver Gassner, Martina Kieninger, Beate Suter (<http://kunstradio.cyberfiction.ch>). Travail d'écriture collective en ligne présenté à P0es1s'04 à Berlin.

On peut cependant aussi catégoriser les œuvres selon leur procédé de mise à disposition à un public : à la lecture publique correspondent des installations-performances, à la lecture privée répondent des dispositifs paratextuels de présentation des œuvres. Le travail sur le dispositif de communication d'une œuvre publiée sur le web sera sensiblement différent de celui d'une œuvre indépendante du réseau.

Alors que le livre est à lui-même un objet de communication (auquel vont correspondre des collections, des genres littéraires, etc.), l'œuvre numérique littéraire est confrontée à la nécessité d'inventer son propre dispositif de communication.

Comment se donne à lire une œuvre numérique ?

Les Interfaces de monstration d'œuvres sont là pour témoigner de la difficulté, pour le lecteur, à déterminer ce qui fait œuvre dans la frontière entre l'interface et l'œuvre elle-même. Un des pionniers de la littérature hypertextuelle à avoir exploité les possibilités offertes par cette faille est Michael Joyce, auteur d'Afternoon, a story¹⁰. Dans cette fiction écrite par un logiciel pratiquement conçu par et pour l'auteur¹¹, les titres des modules visités et les noms attribués aux liens se répondent. Des correspondances s'établissent entre la "chose parcourue" et la "chose qui parcourt". Ainsi, le parcours "Fragment" d'Afternoon, a story procède à la manière d'un poème dévoilant ses mots un à un et prenant une signification nouvelle si on le déroule à l'envers. Les mots deviennent les ricochets d'une balle envoyée par une raquette de ping pong. La raquette se composant du nom de parcours ou du lien, du titre du fragment et du fragment lui-même. Ici, une double lecture se fait : les mots ont un sens, mais le dispositif structurant qui les porte aussi.

A life set for two ¹² de Robert Kendall s'inscrit dans une interface permettant de régler la vitesse de lecture de ce poème cinétique, changeant et inépuisable. Les choix effectués par le lecteur dans la " gradation des émotions " modifient ce qui est donné à lire et orientent le lecteur vers une des trois fins possibles du poème que le lecteur est alors invité à relire. Comme dans *Afternoon, a story*, un avertissement de l'auteur donne le " mode d'emploi " du poème.

L'interface donnant accès aux œuvres du n°12 d'Alire ¹³ est performative : ici, la médiation éditoriale des œuvres est assurée directement par un auteur générique guidant le lecteur, l'apostrophant quelquefois et se jouant de ses difficultés à se saisir d'œuvres ne se donnant pas à lire si facilement. Ce paratexte jaillissant sous les actions du lecteur joue avec l'instabilité du support informatique et dédramatise une maîtrise aléatoire de l'interface dont le comportement est directement dépendant du matériel utilisé.

La position du lecteur indicatrice de futurs genres ?

Travaux algorithmiques produisant des textes dont la durée de vie est liée aux règles qui les constituent, œuvres dont les textes sont régénérés ou se modifiant à chaque matérialisation, sont des créations dont les paratextes sont indépendants des œuvres. Le lecteur est confronté à des textes en variation, des espaces de possibles d'œuvres, et il reste le spectateur de modifications qui lui échappent, il est ramené à un rôle principal qui est de donner un sens à l'œuvre. Quelquefois sa lecture est susceptible d'influencer l'évolution du déroulement de l'œuvre – le lecteur produit alors des interférences susceptibles de modifier les textes machines comme dans le *Poème à lecture unique* ¹⁴ de Philippe Bootz. Cependant, c'est son comportement de lecteur qui est capté sans qu'il en soit toujours conscient : il n'agit donc pas sur le texte

¹⁰ Eastgate systems, 1992.

¹¹ Les conditions de la création du logiciel Storyspace ont été décrites dans le travail de la thèse, Outils, pratiques autoritatives du texte, constitution du champ de la littérature numérique, soutenue par l'auteure en 2003, à Paris8.

¹² Eastgate Systems, 1995.

¹³ Mots-Voir, 2004.

¹⁴ Poème évolutif (1995-2004) édité par l'auteur dans la revue Alire.

explicitement, sa lecture est non ergodique. Dans ce type d'œuvre, l'interprétation est libre et sans cesse renvoyée à la subjectivité du lecteur, l'œuvre est ouverte, le trajet du lecteur n'est pas contraint, sauf par une linéarité liée au défilement du texte dans un espace-temps.

En face, se dresse la cyberlittérature, où la sollicitation du déplacement du lecteur dans l'œuvre résulte d'une stratégie d'auteur : liens conditionnels autorisant l'ouverture de nouveaux fragments hypertextuels, choix dans des menus, introduction de mots-clés ou activation de zones cachées, construisent une lecture ergodique ; une gestion de ses déplacements est demandée au lecteur alors que ceux-ci sont quelquefois contraints par des règles ignorées par lui. Lorsque la séparation d'avec le paratexte est peu marquée voire gommée, l'œuvre se fait leurre.

Si une hybridation de ces œuvres existe, la gestion de la position du lecteur dans l'œuvre par l'auteur et ses conséquences implicites ou explicites pour le lecteur restent des constantes qui permettent de continuer à les distinguer.

L'œuvre littéraire numérique est performative, jouable, exposable, et rejoint une catégorie d'œuvres d'arts depuis toujours confrontées à cet enjeu communicationnel de base : communiquer qu'elles sont des œuvres.

La médiation construite par l'auteur pour qu'autrui puisse se saisir de ce qui est dit, se l'approprier et faire sens est donc en étroite liaison avec la gestion de l'informatique en tant que support de lecture, ce qui suppose un contrat de lecture double. Les significations attribuées aux textes interagissant avec leur matérialisation, c'est-à-dire les techniques d'inscription.

Contrat de lecture matériel et dialogique

La manipulation du support se réalise tant au niveau des interfaces d'accès aux œuvres que dans leur arrangement interne. Cela va de la simple activation d'une icône générant un poème dans le cas de la génération à la gestion d'une carte matérialisant les fragments parcourus (cas de la cyberlittérature).

Dans un article sur l'art de l'ellipse, une des figures de rhétorique utilisée classiquement dans les hypertextes de fiction [CLÉMENT, 95], Serge Bouchardon a mis en perspective l'utilisation des liens et ancres hypertextes, comme des ressorts narratifs constitutifs de la lecture et de l'interprétation de Non-Roman [BOUCHARDON, 02]. Il admet cependant que ces figures narratives s'incarnent dans des figures matérielles. Sans le jeu sur le fenêtrage, pas de confrontation possible des récits de " Monsieur " et " Madame " (inclusion de deux fenêtres dans une seule). De même, la description de l'appartement où prend place la scène racontée et les interpellations du personnage lecteur par l' " auteur " se déroulent dans des hors-textes se matérialisant dans des fenêtres autonomes. Plutôt que d'inscrire l'entrelacement des récits par un procédé littéraire, l'auteur a préféré les incarner dans un jeu sur les fenêtres réalisant en cela une économie de mots et maintenant un récit conjugué au présent..

Election campaigns

The presidential campaign

The issues

A videotaped address by **George W. Bush** is played at the annual conference of the **Christian Coalition** in Washington, D.C.: the GOP candidate promises to "lead [the] nation toward a culture that values life — the life of the elderly and the sick, the life of the young and the life of the unborn" if he is elected (30 Sept.). Fully aware that his election will depend on whether he can appeal to moderate voters who are sometimes pro-choice, Mr Bush **refrains from being too harsh on the issue of abortion**.

Congress's Joint Committee on Taxation reveals that **George W. Bush's tax-cut plan**, by lowering rates, would overwhelmingly benefit those who pay the most taxes, i.e. the wealthy. **Al Gore's own plan**, on the contrary, is aimed at cutting taxes for married couples and families specifically.

In an interview about his plans for **US foreign policy**, **Al Gore** reveals that his view that American armed forces overseas should be used to build democracies once peace is won was inspired by the post-World-War-II Marshall Plan (4 Oct.).

Speaking in a community center in Iowa, **George W. Bush** unveils a \$2.767 billion plan aimed at **fighting drug abuse**. He contends that the problem was dealt with successfully from 1979 to 1992 (i.e. under the Republican administrations of Ronald Reagan and George Bush Sr.) but that Bill Clinton has not handled the issue as a national priority.

Speaking in New York, **Al Gore** raises doubts about his opponent's plan to **remove a trillion dollars from Social Security** over the next decade and create **individual retirement accounts**. George W. Bush's response is made before workers in a Fraser plant, north of Detroit: he accuses Al Gore of irresponsibility and of "waging a campaign of fear" (19 Oct.).

Al Gore voices strong criticism of George W. Bush's **proposal to end the role of the US ground troops as peacekeepers in the Balkans**, which according to the Democratic candidate "could jeopardize fragile alliances [and] would be a damaging blow to NATO" (21 Oct.). In an unusual intervention in the campaign, **Secretary of State Albright** tells a *New York Times* reporter that Mr Bush's call for a US withdrawal from the Balkans "is damaging to American foreign policy" and "sends a dangerous signal."

Speaking to students and faculty at the University of Notre Dame in Indiana (24 Oct.), **Joseph Lieberman** vows that if the Democratic ticket is elected, Al Gore and himself will **use their office** and influence "to support and encourage [a] **new burst of moral and cultural renewal**."

Treasury Secretary Lawrence Summers says in an interview (24 Oct.) that George W. Bush's **Social Security scheme** reveals "a fundamental misunderstanding of the system" and offers a detailed critique of the plan. Mr Summers' intervention triggers a controversy, as the chief cabinet members generally make a point of remaining aloof from politics during election campaigns. **Nicholas Brady**, who was Treasury secretary under President Reagan in 1988 and under George Bush Sr. in 1992, says the comments are "totally inappropriate." Treasury officials, however, counter that they are quite appropriate in view of the fact that Lawrence Summers is the managing trustee of Social Security.

In Knoxville, Tennessee (Al Gore's home state), and in Arlington Heights, Illinois, **George W. Bush** ridicules his opponent's **tax-cut proposal**, saying it would exclude too many taxpayers and give the government too much control over people's lives

(24 Oct.)

President Clinton speaks up on 24 Oct. to remind voters that the next president is most likely to be in a position to **nominate at least two US Supreme Court justices** and thereby influence national policy. Currently many Supreme Court decisions are made with 5-to-4 votes.

The four televised debates

The first debate between Al Gore and George W. Bush takes place on 3 Oct. at the University of Massachusetts in Boston. **Ralph Nader**, the Green Party's candidate, obtains a ticket for the debate but organizers prevent him from entering the building, which prompts Mr Nader to complain about "the kind of creeping tyranny that has turned away so many voters from the electoral process."

According to polls taken just after the debate, even people who intend to vote for George W. Bush admit that **Al Gore** is both better qualified and better prepared to deal with world leaders and with Congress. However, Democrats and Republicans think the debate will not affect the dynamics of the race.

The only **televised debate** between the two **candidates for vice president** is held in Danville, Kentucky. The tone is sober and the debate brings no new elements: Dick Cheney and Joseph Lieberman focus on their running mates' proposals, such as the Republican plan for a large across-the-board reduction in income tax rates, and the Democratic proposal for a middle-class tax cut and increased spending on education and health care (5 Oct.).

The **second presidential debate** between George W. Bush and Al Gore is held in Winston-Salem, North Carolina (11 Oct.). The debate is **less confrontational** (Mr Bush calls it a "lovefest" as opposed to the "mudfest" of the first debate). The two candidates agree on the Clinton administration's handling of the current crises in Yugoslavia and the Middle East. Though they sharply disagree on domestic issues, it is only in the final minutes of the debate that their attacks become personal. Polls indicate that **Mr Bush** has been assessed as the stronger performer this time. The first and second debates have also given him a chance to (1) portray Al Gore as an advocate of "big government," which a majority of Americans frown upon; and (2) trip up the Democrat: Al Gore is accused of "embellishing" things, and his credibility is under attack.

The **third presidential debate** is held at Washington University in St Louis, Missouri, on 17 Oct. Al Gore seeks to trip up his opponent on policy details and George W. Bush is particularly aggressive on domestic issues, but neither debater commits any slipup. Some polls give **Al Gore** a slight edge, but political scientists think the debate is unlikely to determine the outcome of the 7 Nov. election.

On the stump

The *Washington Post* **endorses Al Gore** for the presidency (22 Oct.), claiming that "by virtue of **experience, capacity and positions on the issues**, he is the better-qualified candidate [and . . .] surely among the best prepared and most intelligent nominees of recent years." The *New York Times* announces the same position on 29 Oct.

All but one the nation's GOP governors, covering the party's ideological spectrum, flock to Austin, Texas, in support of **George W. Bush** (22 Oct.). The 28 governors will split into seven teams and go barnstorming for three days in 48 cities in 25 states (23 of which helped reelect Bill Clinton in 1996). They are to carry "the collective message that **the Clinton-Gore administration** has been the **chief obstacle to reform in America**," to quote the governor of Texas. They have also pledged to spread the word that, as opposed to Al Gore, Mr Bush is a **Washingtonoutsider** who can reach across party lines to get things done. The only Republican governor who has not joined the group is Cecil Underwood of West Virginia, who is involved in a very tough election battle.

Given **George W. Bush's (slight) lead** in the latest polls, **Al Gore** had decided to devote the entire week from 23 to 29 Oct. to campaigning in eleven small states, including his own state of Tennessee, and West Virginia, which has voted Republican only twice in the last 40 years. In many of these states (e.g. Oregon and Washington State), the vice president tries to woo voters who could be tempted to cast their ballots for **Ralph Nader**, the Green Party candidate. Meanwhile, **George W. Bush** focuses on key swing states such as Wisconsin and Florida.

Many of the best-know members of the **Democratic Party's left wing**, including civil rights leader **Jesse Jackson**, Senator **Paul Wellstone** of Minnesota, and singer **Melissa Etheridge**, are doing their utmost to stump for Al Gore on the streets, the airwaves or on TV ads: their message is that all those concerned by the environment should not vote for Ralph Nader but for

Al Gore — or else they will help elect George W. Bush.

The **Green Party candidate** says he has turned down a senior House Democrat and a prominent labor leader who urged him to withdraw from the race; "Al Gore has to earn his votes, just like us," Ralph Nader adds (25 Oct.).

President Clinton is to set out on a four- or five-day trip to stump for Al Gore in critical states, beginning on 2 Nov. Much to the president's dismay, the Gore campaign insists that his presence in a number of swing states might alienate some voters, and advises restraint. Bill Clinton is expected to be in New York with his wife on Election Day.

In the last week of the campaign, **Democrats** make an unprecedented effort to **encourage African-Americans to go to the polls** on 7 Nov. As part of this effort, telephone calls with a recorded message from President Clinton are placed to many Black households. The **NAACP** (National Association for the Advancement of Colored People) and the **Black Leadership Forum** also try to boost Black voter turnout, theoretically in a nonpartisan spirit.

Congressional races

Representative **Rick Lazio**, who is running for the US Senate against Hillary Rodham Clinton, declares himself pro-choice and in favor of the **"abortion pill," RU 486**, which was approved by the Food and Drug Administration last month. His position thus diverges from George W. Bush's, and his party's platform. However, Mr Lazio is against allowing RU 486 to be covered by Medicaid for poor women.

A number of **right-wing candidates** have been **approved by the Democratic Party**, which is trying to win back control of the US House of Representatives. In some rural districts of the South and the Midwest (e.g. in Arkansas or Kentucky), the Democratic candidate is opposed both to gun-control legislation and abortion, or to either of these causes. This stance is **at variance with the platform** adopted by the National Convention in August — but it is more likely to appeal to local voters.

A **third of Senate seats** are up for election in November. According to political analysts, seven Republican and one Democratic incumbents are not certain to be reelected in November: should four Democrats win these contested elections, there would be a 50-50 tie. Besides, **eight senators are over 75** today — including Strom Thurmond of South Carolina, 97, the oldest senator ever. Should their seats be vacated, it would be the governors of their respective states who would appoint a senator to serve until the next election; it so happens that all the states concerned either have a Democratic governor or are very likely to elect one in November. Under these circumstances, even if the GOP maintained an edge this year, the **partisan balance** in the chamber might be upset sometime in the next term.

Missouri Governor Mel Carnahan, a Democrat, dies in a plane accident (16 Oct.). He had been running a very close race for the US Senate and his death is a serious blow to the Democrats, who had hoped that his victory would help them make inroads into the GOP majority. Mr Carnahan's name will remain on the ballot with incumbent GOP Senator John Ashcroft's because the deadline for changing it has passed.

On 30 Oct. **Jean Carnahan**, the **widow** of the governor, announces that she would serve in the Senate if her husband won on 7 Nov. At 66, she has never held public office. The idea was first suggested by Governor Roger Wilson, a Democrat who had been Mr Carnahan's lieutenant governor before the plane crash.

According to a survey conducted by the *Washington Post* and the Center for Responsive Politics, **business political action committees** have contributed \$70 million to the two major parties' House campaigns, and the **Democratic Congressional Campaign Committee** has garnered 52 percent of these contributions, a significant rise from two years ago. However, when such contributors give to candidates directly, they give much more to Republicans than to Democrats.

The *New York Times* is the first of the state's major papers to **endorse Hillary Clinton** for the US Senate (22 Oct.). But the endorsement is not devoid of criticism: the paper's editors write that Mrs Clinton has "a lamentable tendency to treat political opponents as enemies," to have been "less than truthful in her comments to investigators, and too eager to follow President Clinton's method of peddling access for campaign donations."

State campaigns: ballot initiatives

There will be **32 initiatives** (referenda) **about education** this year, an all-time high. The questions put to voters concern, among other issues, school **vouchers** (in California, Michigan), **bilingual education** (Arizona), instruction about

homosexuality and bisexuality (Oregon), education **spending** (Colorado, California, Michigan). To confront those issues more effectively, the **National Education Association** — the nation's largest teachers' union — has voted to impose a \$3 annual surcharge on members' dues. Many of the major changes in public education in recent years have originated at the state level, often as a result of grassroots efforts.

On 7 Nov. **Oregon voters** will have to vote on **no less than 26 initiatives**. Citizens have received a 376-page guide presenting the questions on the ballot and 607 arguments for or against them. The increasing number of ballot initiatives raises the question of whether they are an adequate method of making public policy.

General information

According to a report by the Brennan Center for Justice at New York University School of Law, **the major parties spent \$18.5 million on television ads** in the last week of September and the first week of October. Most of this sum, \$14.5 million, was spent in six highly contested states: Florida, Michigan, Missouri, Ohio, Pennsylvania, Minnesota and Wisconsin. Political-science professor Ken Goldstein (University of Wisconsin) has analyzed data compiled by Campaign Media Analysis Group, a company which tracks publicity spending, and concludes that the Bush and Gore advertising campaigns, together with the two major parties, have used their commercials in a **highly selective way**, targeting specific locations with specific arguments. Thus in Tampa, Florida, a Democratic ad claims that "Two million more pounds of toxic chemicals [have been] dumped into Texas waterways" under Governor George W. Bush, and adds, "Now imagine Bush's Texas record in Florida's Everglades."

A Web site, www.voteauction.com, offers to **sell thousands of votes for president to the highest bidder**, arguing that "like the prison industry, the election industry is another excellent example of how privatization in America is creating great opportunities for investment." The proposal triggers an outcry among advocates of fair election practices: election officials in Michigan take legal action to get the site closed (16 Oct.). A representative of the site retorts that the auction system would not undermine democracy more than **soft money** [unregulated campaign contributions] does; the use of soft money, he says, causes "the candidate [to] make decisions that profit the highest bidder."

Domestic issues

In 1995, Governor George W. Bush signed into law a bill ending **Texas's** 125-year-old ban on **concealed handguns**, claiming it would make the state a "safer place." The *Los Angeles Times* reveals that today over 400 of the 215,000 Texans who have been licensed to carry concealed weapons **had criminal records** and prior convictions when they applied for the permit; besides, over 3,000 have been arrested since obtaining the license. The Texas government confirms the figures, but the governor's criminal justice policy adviser, Johnny Sutton, claims that the law has been "a smashing success" all the same.

According to the General Accounting Office, **52 percent of the nation's 1.6 million farm workers are illegal aliens**. Republican lawmakers have been pushing for a large-scale temporary-worker program. As for **President-elect Vincent Fox of Mexico**, he argues that it makes no sense for the US to spend almost \$1 billion a year to keep watch on the Mexican border, and that his countrymen should be allowed into the US as freely as goods are. The Clinton administration, however, does not share this viewpoint.

On 3 Oct. the US House of Representatives and Senate agree to press states to adopt a tough **national standard for drunk driving** (3 Oct.). President Clinton signs the bill into law on 23 Oct.. Under the legislation, drivers with 0.08 percent of alcohol in their blood are to be declared legally drunk. States that have not included the standard into their statute books by 2004 will lose in the next fiscal year two percent of the funds they receive from the federal government to maintain highways, 4 percent the next year, and 8 percent the year after that.

Representative Bud Shuster, Republican of Pennsylvania, who chairs the Transportation Committee of the House, is **rebuked** by the chamber's **Committee on Standards of Official Conduct** for accepting gifts in violation of the law, and for favoring a lobbyist (5 Oct.). No penalty is inflicted on the congressman, however.

Attorney General Janet Reno warns Congress that the Department of Justice needs about \$23 million in the fiscal year that began on 1 Oct. to prepare for its **lawsuit against the tobacco industry**: should Congress fail to make the appropriation, the lawsuit would have to be dropped (5 Oct.).

While the **cost of prescription drugs** in the US has become an issue in the ongoing presidential campaign, a rising number of Americans have taken to crossing the Canadian border to get cheaper drugs in **Canada**, where the government prohibits drug manufacturers from charging "excessive" amounts for patented medicines. Many drugs sold in Canada actually come from the

US, but these regulations compel US manufacturers to sell their products at lower prices on the Canadian market than in the US.

The **Senate** overwhelmingly (95 to 0) approves legislation that would allow **American victims of foreign terrorists to collect damages from countries that sponsor terrorism** (11 Oct.). The same bill has recently been passed by the House, and is expected to be signed into law by President Clinton.

The same day and with the same majority, the **Senate** passes a bill sponsored by Senator Paul Wellstone, Democrat of Minnesota, that would provide for **harsher punishment for those who bring women and children to the US and force them into prostitution or child labor**. The **House** passed the same bill five days ago (371 to 1), and President Clinton plans to sign it into law shortly. Some 45,000 to 50,000 women and children are estimated to come to the US under such conditions each year. The legislation would also make it possible for victims to be provided with temporary or permanent visas; up to 5,000 such visas could be granted per year.

According to the annual FBI report on crime released on 15 Oct., the **crime rate fell** for the eighth consecutive year in 1999. The murder rate dropped to 5.7 per 100,000, the lowest level since 1966. However, the decline appears to be in **inverse proportion to the size of the city**: the smaller the city, the steeper the drop — 9.4 percent in cities with 100,000 to 250,000 people, but only 1.8 percent in cities with over 1 million inhabitants. Experts conclude that the overall decline may be at an end.

On 12 Oct. the **Food and Drug Administration** revokes the license for the **genetically-engineered corn** which caused a recent recall of **taco shells** across the US [See September chronology]. The corn was approved in 1998 for use in animal feed only; henceforth it can no longer be planted for any agricultural purpose. However, the National Environmental Trust complains that "there appears to be absolutely no oversight of the recall" and that the incriminated taco shells marketed by Taco Bells are still being sold in some places.

Midwestern farmers who planted the bioengineered corn say they had not been properly advised of the FDA restrictions, nor told that the corn was to be kept separate from other crops.

Drug Czar Barry McCaffrey, who has been the Clinton administration's narcotics-policy adviser since March 1996, announces that he will step down on 6 Jan., two weeks before the next president is sworn in.

The 45.2 million Americans who benefit from **Social Security** will see their checks increased by 3.5 percent in 2001, as against 2.4 percent in 2000. Next year's **cost-of-living adjustment** will be the highest since 1992. The increase is triggered by inflation, i.e. mostly by soaring energy prices. Retirees will be able to cash a \$845 check next year, up from the current \$816.

The US is unlikely to be the only major industrial nation that does not grant **debt relief plan** to 41 poor nations in Africa and Latin America. Though European parliaments have been palpably more willing to take the necessary steps to strike out those nations' debts than Congress has, support has now tilted in favor of debt relief on Capitol Hill — apparently in response to pressure by such prominent figures as fundamentalist televangelist Pat Robertson, Pope John Paul II, Bono (the singer of the Irish pop group U2) and Republican standard-bearer George W. Bush.

By a vote of 394 to 14, the **House of Representatives** approves a bill authorizing an initial payment of \$1.4 billion that will go toward **saving the Florida Everglades**, endangered by over-development and pollution (19 Oct.). Congressman Porter Ross, Republican of Florida, says the project "represents the largest, most comprehensive environmental restoration ever attempted."

Following complaints voiced in 1997 by a private group, the Institute for Energy and Environmental Research, the Department of Energy has **re-estimated the amount of plutonium and other radioactive elements** that are released into soil during the **manufacture of nuclear weapons**. The amount is now said to be ten times as high as was previously assessed. The risk that the wastes could contaminate water supplies is therefore significantly higher.

President Clinton will shortly sign into law a bill, the *Breast and Cervical Cancer Prevention and Treatment Act*, which **authorizes states to provide Medicaid coverage for surgery, chemotherapy and other costly care for poor women who have been diagnosed with breast cancer**. **Representative Rick Lazio**, who is currently running for the Senate against the first lady, was the sponsor of the bill in the House. To avoid having to invite his wife's opponent to a public ceremony, the president has decided to sign the bill in private. He has cited his wife's advocacy of the bill as "the inspiration behind [the Clinton] administration's commitment to this issue."

A new report by the US **Census Bureau** reveals that, for the first time since such records began, **both parents hold jobs in 51 percent of households** across the country; the proportion was 33 percent in 1976.

According to a federal report released on 26 Oct., more than 3,500 students were **expelled for bringing a firearm to school** in 1998-99, **down** from 5,700 students in 1996-97.

President Clinton receives for signature the *Intelligence Authorization Act*, a bill requested by the CIA which would **toughen punishment for those convicted of leaking any classified information** to the press or to unauthorized persons. No public hearings were held on the issue on Capitol Hill, and testimony from CIA officials was heard in closed session. Many journalists and First Amendment specialists disapprove of the bill. Even some lawmakers believe it might seriously hinder the flow of information to the public. President Clinton has not yet said whether he will sign the bill into law or veto it.

On 30 Oct. **President Clinton vetoes a Treasury spending bill** that would have permitted Congress and the White House to function until the whole budget was approved, and would also have raised lawmakers' annual compensation by \$3,800, to \$145,000. As the Republican leadership has **rejected a White-House-backed \$315 million bill on education, labor and health** — largely because it introduced new workplace safety regulations —, the president claims: "I had no choice but to veto that legislation. I cannot in good conscience sign a bill that funds the operations of Congress and the White House before funding our schools."

Foreign policy and defense

The Middle East

President Clinton phones **Prime Minister Ehud Barak of Israel and Palestinian leader Yasser Arafat** on 2 Oct., urging them to investigate the resumption of violence in the Middle East and to do their utmost for order to be restored. White House spokesman Jake Siewert calls **Ariel Sharon's** visit to Harma al Sharif, which is widely believed to have triggered the explosion of Palestinian anger, "counterproductive."

Secretary of State Madeleine Albright meets with Ehud Barak and Yasser Arafat in Paris on 4 Oct., but the meeting does not result in an agreement, nor does it cause the ongoing unrest to subside.

Criticisms of **President Clinton's policy** of maintaining ties to **Yasser Arafat** are heard in Israel as well as among American Jews, who believe that the president should clearly lay the blame on Palestinians for the current violence. Conversely, Arab countries warn Bill Clinton against criticizing Mr Arafat: they contend that it would only reinforce Palestinian anger. On NBC's newsmagazine *Meet the Press* (8 Oct.) **Madeleine Albright** identifies the root of the problem as "the Palestinians. . . putting the Israelis under siege" by throwing stones, which is hardly a neutral position.

President Clinton flies to Sharm El Sheikh, Egypt, on 16 Oct. for hastily arranged **talks between Israeli and Palestinian leaders**. On 17 Oct. the president announces that Ehud Barak and Yasser Arafat have agreed to "take immediate, concrete measures" to put an end to the ongoing violence that has claimed over 100 lives, mostly Palestinians.

As the Middle East peace process increasingly seems to have been buried, **President Clinton's efforts to help broker an accord come under fire**: moderate Arab governments, some foreign policy specialists and the Bush campaign contend that because he wanted an agreement to be signed before the end of his term, the president rushed into the **Camp David meeting** without sufficient preparation, failed to consult with Arab allies and did not ponder over the situation that might arise if the peace talks foundered.

On 25 Oct. **Bill Clinton** places phone calls to Yasser Arafat and Ehud Barak to suggest they meet separately with him in Washington after the US elections with a view to giving the peace process a new chance, but **both leaders turn him down**, the White House reveals.

The USS Cole, a Norfolk-based US Navy destroyer, is hit by an **explosion** while entering the harbor of Aden, Yemen. A **terrorist action** is strongly suspected: the 6-by-12-meter hole in the ship's side is found to have been caused by a smaller harbor boat loaded with explosives; the boat was supposed to help the Cole dock at the harbor for fuel (12 Oct.). The same day, President Clinton announces that the **US military have been placed on high alert**. Also on 12 Oct. a person who professes to be speaking on behalf of the Islamic Army of Aden claims **responsibility** for the explosion; the group has

protested visits by US ships to Yemen ports in the past.

On 13 Oct., US officials reveal the **death toll** on board the Cole: 17 Americans have lost their lives and 38 have been injured. The FBI opens a terrorism investigation. The US Department of State charges that Yemen is a "safe haven for terrorist groups" and the CIA hints that **Osama bin Laden** may well be involved. President Ali Abdullah Saleh of Yemen denies both that the Cole was the victim of terrorism and that his country protects terrorists.

On 13 Oct. the US orders **embassies and consulates** in 22 countries in Africa, the Middle East and South Asia to **close** public operations until 16 Oct.

On 18 Oct. **President Clinton** leads a memorial service for the Cole victims in Norfolk, and pledges "To those who attacked them we say: You will not find a safe harbor. We will find you and justice will prevail."

FBI director Louis Freeh says he believes the Yemeni government is "now cooperating fully and genuinely" with the US investigation.

Appearing on the CBS News program *Face the Nation*, **Defense Secretary William Cohen** says the US has detected a **movement of elite Iraqi troops** west of Baghdad, and warns Saddam Hussein against attempting to take advantage of the current Middle East crisis to attack his neighbors (15 Oct.).

US forces in Turkey, Bahrain and Qatar are placed on the highest possible state of alert due to **terrorist threats** (24 Oct.). US warships are ordered to avoid the Suez Canal.

The US and Jordan have concluded an agreement whereby all **barriers to free trade** between them would be **eliminated**, as is already the case between the US and Canada, Mexico and Israel. The partners hope that the prospect of free trade will **attract multinational investment to Jordan**, which would help the population, 4.5 million of whom are Palestinians, most of them poor. Jordan borders the West Bank, where the US believes high unemployment contributes to unrest: more investment there could also benefit Palestinians. The pact is signed on 31 Oct. by President Clinton and King Abdullah of Jordan at a White House ceremony.

Asia

The Clinton administration is negotiating a **new arms control agreement with Beijing** under which China would promise to stop supplying Pakistan, Iran and some other countries with missile technology. President Clinton would like to be able to sign the accord when he meets with President Jiang Zemin in November. The agreement, however, would not go as far as to bring China into the Missile Technology Control Regime, signed by some 30 nations to restrict the export of missiles and missile technology.

Madeleine Albright meets with Communist leader **Kim Jong Il of North Korea** for three hours on 23 Oct. and six hours on 24 Oct. in Pyongyang. The talks are mostly about North Korea's **missile program**, which the US believes contributes to supply "rogue" states with missiles. A temporary moratorium was declared last year but the US would like the program to be scrapped altogether. Though the US secretary of state will leave North Korea without a formal agreement, a senior State Department official says Chairman Kim Jong Il "is accepting the idea of serious restraint on his missile program." But Kim Jong Il has hinted that it would be a slow and lengthy process.

South Korea and Japan are rumored to be concerned that the US is going too fast and that it might **upset Seoul's own diplomacy** with its northern neighbor. Indeed for years before the historic meeting between the North and South Korean leaders in June 2000, Pyongyang ignored Seoul and would only negotiate with Washington.

Cuba

A **measure aimed at ending the current embargo on the sale of US food and medicines to Cuba** [see September chronology] as well as all unilateral food and medicine embargoes imposed by the US and currently in effect [against Iran, Libya, Sudan and North Korea], comes under heavy fire: **Democrats** complain that it was nothing but a concession to US farmers by conservative Republican leaders, and that it is very **unlikely to improve Cuban citizens' lot**. Indeed Cuba would be barred from using US government or commercial credits to buy food or drugs, which would therefore remain unaffordable. Besides, the legislation would deprive the president of his ability to ease or tighten restrictions on American travel.

By a vote of 86 to 8, the **Senate** approves the controversial bill (18 Oct.). The impractical provisions that should prevent concrete improvements for the Cuban people are maintained: despite US farmers' lobbying, senators have been swayed by anti-Castro Cuban-Americans in Florida, which happens to be a hotly contested state in the presidential election.

The same bill permits the sale of food to North Korea, Iran, Sudan and Libya, countries which, unlike Cuba, are authorized to request US government credits and private financing.

In Havana, **Fidel Castro** leads a large demonstration against the bill, which he calls "insulting." Al Gore chooses not to comment on the Senate vote, and George W. Bush criticizes it, on the ground that there should be **no change whatsoever** in US-imposed sanctions until the Cuban leader is brought down.

Yugoslavia

Slobodan Milosevic's admission of defeat in Serbian elections encourages the US to step up contacts with Belgrade. Deputy Secretary of State Strobe Talbott advocates lifting the sanctions imposed on the country, and restoring Yugoslav membership in international organizations. Since **President Vojislav Kostunica** objects to handing Mr Milosevic over to the international tribunal at The Hague (which has indicted him for war crimes), the US will not press for an immediate trial.

On 12 Oct., **President Clinton announces that the US is lifting many of the trade and economic sanctions imposed on Yugoslavia** to force Mr Milosevic to step down. The oil embargo is also lifted, as well as the ban on US flights to Yugoslavia. For the time being, however, the sanction that prevents Belgrade from receiving aid from the World Bank and the International Monetary Fund is maintained, and US officials say it will be until Mr Milosevic's lot is agreed upon.

James O'Brien, President Clinton's special adviser for the Balkans, meets with President Kustonica for 90 minutes in Belgrade on 12 Oct.; both sides profess to be anxious that **diplomatic relations** between the two countries be restored. But in view of Serbs' continuing hostility to NATO, the newly elected president cannot afford to move too quickly on the issue.

Al Gore and US-Russian relations

In 1992, **then-Senator Al Gore and Senator John McCain** sponsored the *Iran-Iraq Arms Nonproliferation Act*, a piece of legislation which requires that the US impose **sanctions** on countries **selling sophisticated weapons** to countries — such as Iran — that **sponsor terrorism**. In June 1995, however, **Vice President Al Gore and Victor Chernomyrdin**, the then Russian prime minister, clinched an **agreement** the details of which were not disclosed to Congress or the American public. Under the deal, Russia pledged to stop selling conventional weapons to Iran by 31 Dec. 1999; in exchange, Mr Gore is believed to have promised that the US would not implement the 1992 law against Russia. Russia has failed to abide by the agreement, ignoring the December 1999 deadline despite repeated US complaints. As a result, **Al Gore's role in US-Russian relations** and his personal friendship with Mr Chernomyrdin are criticized.

During the second televised debate (11 Oct.) **George W. Bush** charges that the former Russian premier embezzled funds that had been granted to his country by the International Monetary Fund. **Mr Chernomyrdin** threatens to sue the GOP presidential candidate for libel (12 Oct.).

Speaking at a hearing staged by the Senate Foreign Relations Committee (25 Oct.), the deputy assistant secretary of state for nonproliferation control, John Barker, says there was **no secret deal** between Al Gore and Victor Chernomyrdin but only an **understanding** that was "announced publicly" although some documents related to it are still classified.

Defense: Miscellaneous

The **US Army's chief of staff**, General Erik Shinseki, announces that **all GIs will henceforth wear black berets**, headgear which so far has been the mark of the Rangers, an elite infantry combat unit. The officer believes the beret "will be a symbol of unity, a symbol of army excellence." [Today Rangers wear black, Special Forces green, and Paratroopers maroon.] The new regulations, which are to go into effect in June 2001, arouse the Rangers' anger.

Stephen Younger, associate director of Los Alamos National Laboratory, a leading American expert on nuclear weapons, contends that **conventional explosives could replace nuclear warheads** on most US strategic missiles, and that **small nuclear bombs would be sufficient** to handle the few tasks for which nuclear weapons are required. The proposal, which if

implemented would drastically reduce the US nuclear stockpile, triggers a debate at the Pentagon, the Department of State, and among Bill Clinton's security advisers.

Foreign policy: miscellaneous

Thanks to a campaign attacking **Sudan's** poor human-rights record, the US succeeds in preventing that country from winning a two-year term on the UN Security Council (10 Oct.). In the fourth round of ballot, **Mauritius**, backed by Washington, wins the only seat allocated to Africa by a vote of 133 to 55.

Shortly before a **resolution condemning the genocide of Armenians by Turkey** 85 years ago is voted on by the House of Representatives, **President Clinton** urges House Speaker Dennis Hastert to withdraw it (18 Oct.). Indeed Turkey has threatened to ground US warplanes that fly out of Turkish bases to patrol northern Iraq, and to cancel the purchase of 145 American attack helicopters. Besides, Bill Clinton says he fears the vote could adversely affect the situation in the Middle East.

In House-Senate negotiations about a \$14.9 billion spending bill on **foreign aid**, Republican lawmakers agree to allocate \$425 million to **international family planning institutions**, up from the current \$385 million, **without imposing restrictions** on how the money is spent (24 Oct.). Bill Clinton had threatened to veto the bill if abortion-related restrictions were maintained [see July 2000 chronology]. Anti-abortion advocates hope that George W. Bush will reinstate the restrictions if he wins the election.

Economic matters

Against all odds, the **US jobless rate fell to 3.9 percent in September** thanks to 252,000 new jobs created by the economy (according to Labor Department figures released on 6 Oct.). But average hourly earnings only rose by 0.2 percent, as against 0.4 percent in August.

On 3 Oct. the **Senate** overwhelmingly (96 to one) passes legislation to allow the **Immigration and Naturalization Service** to issue 195,000 **visas for highly-skilled foreign workers** in each of the next three years. The visas can be extended for up to six years; 115,000 such visas have been issued this year.

In a letter to Mario Monti (early Oct.), the EU commissioner for competition, **members of the antitrust subcommittee of the US Senate call on European governments to avoid "protectionist sentiments."** The senators are worried over what they consider to be a trend on the part of the EU to discriminate against US companies involved in transAtlantic mergers (such as that of WorldCom Inc. and Sprint Corp.); Time Warner Inc. and the British company EMI Group PLC have also renounced their music joint venture.

The **European Commission approves America Online Inc. (AOL)'s purchase of Time Warner** (11 Oct.): in Europe, the combined company could not have a monopoly position. The \$147 billion deal, however, may run into trouble in the US., where the combination would own one of the biggest cable networks and providers of online services.

According to the nonpartisan **Congressional Budget Office**, even if the current **budget surpluses** were used by the next presidents solely to pay off the national debt, the US would be in the red again once the baby-boom generation had left the workforce: indeed the cost of providing health and retirement benefits for them will overwhelm the federal budget.

On 12 Oct., the ongoing crisis in the Middle East causes **oil prices to surge** and brings about turmoil in the world's **financial markets**: on Wall Street, the Dow Jones industrial average closes 3.64 percent lower. The next day, however, oil prices ease and stocks rise again in New York City, with the Nasdaq composite index gaining 7.9 percent.

Several Chinese officials reveal that it will be a **state-owned Chinese firm**, the Hua Lian Pharmaceutical company, which will **produce the drug RU-486 for US consumers**; the medicine will be made in Shanghai. The legislative director of the **National Right to Life Committee**, who finds the news "very disturbing," announces that his organization will question the safety and purity of Chinese pharmaceuticals and will tie the drug to China's policy of restricting the number of children per family.

As for the American company which is to **market RU-486** in the US, Danco Laboratories, it is "one of the most **enigmatic** companies in the pharmaceutical industry," according to Robert O'Harrow of the *Washington Post*. It only has a handful of

employees — an unlisted phone number. Anti-abortion activists fear that Danco's secretive approach will spare it from respecting the principle of accountability.

Labor Department figures show that **producer prices rose** by 0.9 percent in September, the highest monthly rise in 7 months. The **core inflation rate** (calculated so as not to include food and energy prices) went up by 0.3 percent only, but there are indications that **companies absorb the rise** by making lower profits rather than imposing higher retail prices on consumers.

The Commerce Department reveals that **retail sales rose** by 0.9 percent in September as against 0.1 percent in August. The September rise, also the highest in 7 months, was largely due to increased car sales.

The University of Michigan, which computes an index of consumer confidence every month, says that **consumer confidence continued to decline** in September.

Chevron Corp. and **Texaco Inc.** announce their **merger** against the backdrop of volatile oil prices [oil costs over \$30 a barrel currently] and Middle East crisis (16 Oct.). Chevron plans to acquire Texaco for about \$36 billion in stock. The combination, which would create the world's fourth-largest oil company, is likely to be looked into very closely by federal antitrust regulators, insofar as it would **dominate the retail gas station business** in states like California.

Americans are allowed to move their assets abroad but are required to notify the IRS and pay taxes on their income worldwide. As the **Internal Revenue Service** strongly suspects that at least **\$70 billion a year in income tax revenue is lost to Caribbean tax havens**, it asks a federal judge to issue summonses for two years' worth of records of MasterCard and American Express Card transactions in the US billed to bank accounts in Antigua and Barbuda, the Bahamas and the Cayman Islands.

The White House announces (24 Oct.) that the federal government collected a record **\$237 billion surplus** for the fiscal year that ended in September 2000, the third consecutive year of surpluses.

America's largest communications company, **AT&T Corp.**, announces (25 Oct.) that over the next two years it will **divide itself into four pieces**. AT&T Wireless Group, the mobile phone section, and AT&T's cable-television holdings are to be made fully separate entities; a new stock will be created for AT&T's consumer long-distance division.

Government data released on 27 Oct. point to what analysts call a "**soft landing**" of the US economy in the third quarter of 2000, which is hailed as good news:

- **GDP** rose at an annual rate of 2.7 percent, down from 5.6 percent in the second quarter;
- the **price index for goods and services** increased at a 2.4 percent annual rate, up from 2.1 percent earlier (but still well below the 3.8 percent rise in the first quarter).
- however, **consumer spending** rose at a 4.5 percent rate, up from 3.1 percent previously.

Legal issues

Charlotte has become the seventh municipality in **North Carolina**, a state where the **death penalty** has long been entrenched, to call for a **statewide moratorium on executions** in a resolution approved by the city council. Although such resolutions do not have the force of law, the vote reflects an important shift in public attitudes. Other large cities such as Philadelphia, Atlanta, Baltimore, and San Francisco have adopted similar resolutions.

The results of the 7 Nov. presidential election will be pivotal as regards the **US Supreme Court's ideological makeup**: the **next president** is likely to be in a position to **make several appointments** that may well change it. Typically, when the candidates were asked to name the Supreme Court justices that they admire most, George W. Bush named arch-conservatives — **Antonin Scalia and Clarence Thomas** — while Al Gore named the two most famous liberals, **Thurgood Marshall** [the first African-American justice] and **William Brennan**.

After a three-month recess, the **US Supreme Court begins a new term** on 1 Oct.:

- It **rejects an appeal by Exxon Mobil Corp.** over the worst oil spill in US history [1,000 miles of Alaskan shores were polluted by the **Exxon Valdez** in 1989]. The Court lets stand without comment a decision by a lower court supporting the punitive damages (\$5 billion) inflicted on Exxon. However, the company is expected to resort to other ploys to avoid meeting its obligations.

- It **rejects** without comment an appeal by 31 **members of Congress who had sued President Clinton** for ordering the US Armed Forces to participate in NATO's bombing campaign in Yugoslavia (1999). The Congressmen contended the president had overstepped his authority, but their suit was dismissed by a lower court.

- It also **rejects** an appeal by two **gun manufacturers who challenged Congress's authority** to ban the manufacture, sale and possession of semi-automatic weapons.

Governor James Gilmore of Virginia **pardons a mentally-retarded convict after DNA tests cleared him** of the charge of rape and murder. Earl Washington Jr., 40, is the first Virginia death-row inmate to be exonerated in this way.

Mark David Chapman, the man who shot **John Lennon** to death 20 years ago, is denied parole.

The US Supreme Court upholds a lower court ruling denying the **residents of the District of Columbia** the same representation in the House of Representatives as the 50 states enjoy (16 Oct.). DC has a **delegate** (currently Eleanor Holmes Norton) who is **not allowed to vote** on the House floor. In 1998 some 75 DC residents filed two lawsuits on the ground that this situation discriminates against them in violation of the US Constitution. Yet the Supreme Court's decision is based on **strict construction** of a clause of the Constitution which reads that representatives "shall be apportioned among the several *states*": DC does not enjoy state status.

A report by the Texas Defender Service, a group which provides free legal advice to prisoners who have been sentenced to death, depicts the **application of capital punishment in Texas** as "a thoroughly **flawed** system" on account of "racial bias, incompetent defense counsel and misconduct committed by police officers and prosecutors." The study is based on hundreds of death penalty cases and provides what the group presents as "an unprecedented volume of objective evidence" (16 Oct.).

A new case suggests that the **Texas law-and-order system lacks the efficiency** that Governor George W. Bush has repeatedly praised. While two men have been in prison for a murder committed in 1988, a third, currently serving a life sentence for another crime, has sent letters to the governor's office and to Austin's police chief confessing to the 1988 killing. Despite the confession and the evidence provided, the letters have had no effect. **DNA tests** have now exonerated the two men.

An Egypt-born former US Army sergeant, Ali Mohamed, pleads guilty to **participating in the bombings of US embassies in Africa in 1998** (20 Oct.). He claims **Osama bin Laden** himself showed him in what parts of the buildings a suicide bomber could prove most deadly. The plot aimed at getting the US out of the Middle East.

In 1999, **Terry Anderson**, who was kidnapped in **Lebanon** in 1985 and was held **hostage** for 2,454 days, filed a suit against the **Iranian government**, with a view to demonstrating in a US courtroom that Iran had masterminded the plot. Unexpectedly, the federal government has decided that it will be the **US Treasury** that **will compensate** Mr Anderson as well as three other former Lebanon hostages or their families. Mr Anderson will receive \$41.2 million. More than \$213 million plus interest payments will also be distributed to eight families that have won suits against Iran in the US. Congress and the Clinton administration have agreed that the hostages have a right to damages and hope that the money will be recovered either through an international claims tribunal or through negotiations with Iran.

Miscellaneous

Thanks to **genetic testing**, for the first time a Colorado couple have **given birth to a test-tube baby so as to save their sick 6-year-old daughter**. The baby's cells are exactly identical to those of his sister, who suffers from Fanconi anemia, an inherited disorder that causes failure of bone marrow cell production. Cells from the baby's umbilical cord are infused into his sister's circulatory system (26 Sept.).

Bill Clinton opens a conference on the **Progressive Era** at Princeton University (5 Oct.) and likens his administration to that of **Theodore Roosevelt** as regards reforms enacted and the efforts made to reduce the influence of special interests.

Massachusetts-based **scientists have cloned a gaur**, an ox-like endangered species from Indian and Burmese jungles. The

gaur, named Noah, is currently being carried by Bessie, a cow on an Iowa farm. The scientists are planning to clone other endangered species such as giant pandas.

After a failed launch attempt on 5 Oct. and some delay, the **space shuttle Discovery** begins the 100th shuttle flight on 11 Oct. It **reaches the international space station** on 13 Oct. This flight is meant to set the stage for the arrival of the first permanent crew in the station in three weeks' time.

On 16 Oct., thousands of people congregate on the Mall in Washington, DC, for the **Million Family March**, called by **Louis Farrakhan**, the controversial leader of the **Nation of Islam**. The event celebrates the fifth anniversary of the 1995 Million Man March also organized by Mr Farrakhan, who was then criticized for inviting no one but Black men to join him. This time the **Unification Church** (Moonists) endorses the event, advertised as a day of "atonement, reconciliation and responsibility."

According to an article published on 18 Oct. in *Nature*, a **250-million-year-old bacterium is revived** from a drop of fluid caught in a crystal of rock salt near Carlsbad, New Mexico. The news arouses some suspicion among experts, many of whom believe that DNA can survive no longer than a few thousand years.

In the 20 Oct. edition of the *Atlanta Journal-Constitution*, **ex-President Jimmy Carter**, who has always be a **Southern Baptist**, announces that he is breaking away from the Church: he explains that he has been feeling "somewhat excluded" for years and that he made his decision after the Southern Baptists, last June, barred women from serving as pastors.

Election campaigns

The presidential campaign

The issues

A videotaped address by **George W. Bush** is played at the annual conference of the **Christian Coalition** in Washington, D.C.: the GOP candidate promises to "lead [the] nation toward a culture that values life — the life of the elderly and the sick, the life of the young and the life of the unborn" if he is elected (30 Sept.). Fully aware that his election will depend on whether he can appeal to moderate voters who are sometimes pro-choice, Mr Bush **refrains from being too harsh on the issue of abortion**.

Congress's Joint Committee on Taxation reveals that **George W. Bush's tax-cut plan**, by lowering rates, would overwhelmingly benefit those who pay the most taxes, i.e. the wealthy. **Al Gore's own plan**, on the contrary, is aimed at cutting taxes for married couples and families specifically.

In an interview about his plans for **US foreign policy**, **Al Gore** reveals that his view that American armed forces overseas should be used to build democracies once peace is won was inspired by the post-World-War-II Marshall Plan (4 Oct.).

Speaking in a community center in Iowa, **George W. Bush** unveils a \$2.767 billion plan aimed at **fighting drug abuse**. He contends that the problem was dealt with successfully from 1979 to 1992 (i.e. under the Republican administrations of Ronald Reagan and George Bush Sr.) but that Bill Clinton has not handled the issue as a national priority.

Speaking in New York, **Al Gore** raises doubts about his opponent's plan to **remove a trillion dollars from Social Security** over the next decade and create **individual retirement accounts**. George W. Bush's response is made before workers in a Fraser plant, north of Detroit: he accuses Al Gore of irresponsibility and of "waging a campaign of fear" (19 Oct.).

Al Gore voices strong criticism of George W. Bush's **proposal to end the role of the US ground troops as peacekeepers in the Balkans**, which according to the Democratic candidate "could jeopardize fragile alliances [and] would be a damaging blow to NATO" (21 Oct.). In an unusual intervention in the campaign, **Secretary of State Albright** tells a *New York Times* reporter that Mr Bush's call for a US withdrawal from the Balkans "is damaging to American foreign policy" and "sends a

dangerous signal."

Speaking to students and faculty at the University of Notre Dame in Indiana (24 Oct.), **Joseph Lieberman** vows that if the Democratic ticket is elected, Al Gore and himself will **use their office** and influence "to support and encourage [a] **new burst of moral and cultural renewal.**"

Treasury Secretary Lawrence Summers says in an interview (24 Oct.) that George W. Bush's **Social Security scheme** reveals "a fundamental misunderstanding of the system" and offers a detailed critique of the plan. Mr Summers' intervention triggers a controversy, as the chief cabinet members generally make a point of remaining aloof from politics during election campaigns. **Nicholas Brady**, who was Treasury secretary under President Reagan in 1988 and under George Bush Sr. in 1992, says the comments are "totally inappropriate." Treasury officials, however, counter that they are quite appropriate in view of the fact that Lawrence Summers is the managing trustee of Social Security.

In Knoxville, Tennessee (Al Gore's home state), and in Arlington Heights, Illinois, **George W. Bush** ridicules his opponent's **tax-cut proposal**, saying it would exclude too many taxpayers and give the government too much control over people's lives (24 Oct.)

President Clinton speaks up on 24 Oct. to remind voters that the next president is most likely to be in a position to **nominate at least two US Supreme Court justices** and thereby influence national policy. Currently many Supreme Court decisions are made with 5-to-4 votes.

The four televised debates

The first debate between Al Gore and George W. Bush takes place on 3 Oct. at the University of Massachusetts in Boston. **Ralph Nader**, the Green Party's candidate, obtains a ticket for the debate but organizers prevent him from entering the building, which prompts Mr Nader to complain about "the kind of creeping tyranny that has turned away so many voters from the electoral process."

According to polls taken just after the debate, even people who intend to vote for George W. Bush admit that **Al Gore** is both better qualified and better prepared to deal with world leaders and with Congress. However, Democrats and Republicans think the debate will not affect the dynamics of the race.

The only **televised debate** between the two **candidates for vice president** is held in Danville, Kentucky. The tone is sober and the debate brings no new elements: Dick Cheney and Joseph Lieberman focus on their running mates' proposals, such as the Republican plan for a large across-the-board reduction in income tax rates, and the Democratic proposal for a middle-class tax cut and increased spending on education and health care (5 Oct.).

The **second presidential debate** between George W. Bush and Al Gore is held in Winston-Salem, North Carolina (11 Oct.). The debate is **less confrontational** (Mr Bush calls it a "lovefest" as opposed to the "mudfest" of the first debate). The two candidates agree on the Clinton administration's handling of the current crises in Yugoslavia and the Middle East. Though they sharply disagree on domestic issues, it is only in the final minutes of the debate that their attacks become personal. Polls indicate that **Mr Bush** has been assessed as the stronger performer this time. The first and second debates have also given him a chance to (1) portray Al Gore as an advocate of "big government," which a majority of Americans frown upon; and (2) trip up the Democrat: Al Gore is accused of "embellishing" things, and his credibility is under attack.

The **third presidential debate** is held at Washington University in St Louis, Missouri, on 17 Oct. Al Gore seeks to trip up his opponent on policy details and George W. Bush is particularly aggressive on domestic issues, but neither debater commits any slipup. Some polls give **Al Gore** a slight edge, but political scientists think the debate is unlikely to determine the outcome of the 7 Nov. election.

On the stump

The *Washington Post* **endorses Al Gore** for the presidency (22 Oct.), claiming that "by virtue of **experience, capacity and positions on the issues**, he is the better-qualified candidate [and . . .] surely among the best prepared and most intelligent nominees of recent years." The *New York Times* announces the same position on 29 Oct.

All but one the nation's GOP governors, covering the party's ideological spectrum, flock to Austin, Texas, in support of

George W. Bush (22 Oct.). The 28 governors will split into seven teams and go barnstorming for three days in 48 cities in 25 states (23 of which helped reelect Bill Clinton in 1996). They are to carry "the collective message that **the Clinton-Gore administration** has been the **chief obstacle to reform in America**," to quote the governor of Texas. They have also pledged to spread the word that, as opposed to Al Gore, Mr Bush is a **Washingtonoutsider** who can reach across party lines to get things done. The only Republican governor who has not joined the group is Cecil Underwood of West Virginia, who is involved in a very tough election battle.

Given **George W. Bush's (slight) lead** in the latest polls, **Al Gore** had decided to devote the entire week from 23 to 29 Oct. to campaigning in eleven small states, including his own state of Tennessee, and West Virginia, which has voted Republican only twice in the last 40 years. In many of these states (e.g. Oregon and Washington State), the vice president tries to woo voters who could be tempted to cast their ballots for **Ralph Nader**, the Green Party candidate. Meanwhile, **George W. Bush** focuses on key swing states such as Wisconsin and Florida.

Many of the best-known members of the **Democratic Party's left wing**, including civil rights leader **Jesse Jackson**, Senator **Paul Wellstone** of Minnesota, and singer **Melissa Etheridge**, are doing their utmost to stump for Al Gore on the streets, the airwaves or on TV ads: their message is that all those concerned by the environment should not vote for Ralph Nader but for Al Gore — or else they will help elect George W. Bush.

The **Green Party candidate** says he has turned down a senior House Democrat and a prominent labor leader who urged him to withdraw from the race; "Al Gore has to earn his votes, just like us," Ralph Nader adds (25 Oct.).

President Clinton is to set out on a four- or five-day trip to stump for Al Gore in critical states, beginning on 2 Nov. Much to the president's dismay, the Gore campaign insists that his presence in a number of swing states might alienate some voters, and advises restraint. Bill Clinton is expected to be in New York with his wife on Election Day.

In the last week of the campaign, **Democrats** make an unprecedented effort to **encourage African-Americans to go to the polls** on 7 Nov. As part of this effort, telephone calls with a recorded message from President Clinton are placed to many Black households. The **NAACP** (National Association for the Advancement of Colored People) and the **Black Leadership Forum** also try to boost Black voter turnout, theoretically in a nonpartisan spirit.

Congressional races

Representative **Rick Lazio**, who is running for the US Senate against Hillary Rodham Clinton, declares himself pro-choice and in favor of the "**abortion pill**," **RU 486**, which was approved by the Food and Drug Administration last month. His position thus diverges from George W. Bush's, and his party's platform. However, Mr Lazio is against allowing RU 486 to be covered by Medicaid for poor women.

A number of **right-wing candidates** have been **approved by the Democratic Party**, which is trying to win back control of the US House of Representatives. In some rural districts of the South and the Midwest (e.g. in Arkansas or Kentucky), the Democratic candidate is opposed both to gun-control legislation and abortion, or to either of these causes. This stance is **at variance with the platform** adopted by the National Convention in August — but it is more likely to appeal to local voters.

A **third of Senate seats** are up for election in November. According to political analysts, seven Republican and one Democratic incumbents are not certain to be reelected in November: should four Democrats win these contested elections, there would be a 50-50 tie. Besides, **eight senators are over 75** today — including Strom Thurmond of South Carolina, 97, the oldest senator ever. Should their seats be vacated, it would be the governors of their respective states who would appoint a senator to serve until the next election; it so happens that all the states concerned either have a Democratic governor or are very likely to elect one in November. Under these circumstances, even if the GOP maintained an edge this year, the **partisan balance** in the chamber might be upset sometime in the next term.

Missouri Governor Mel Carnahan, a Democrat, dies in a plane accident (16 Oct.). He had been running a very close race for the US Senate and his death is a serious blow to the Democrats, who had hoped that his victory would help them make inroads into the GOP majority. Mr Carnahan's name will remain on the ballot with incumbent GOP Senator John Ashcroft's because the deadline for changing it has passed.

On 30 Oct. **Jean Carnahan**, the **widow** of the governor, announces that she would serve in the Senate if her husband won on 7 Nov. At 66, she has never held public office. The idea was first suggested by Governor Roger Wilson, a Democrat who had been Mr Carnahan's lieutenant governor before the plane crash.

According to a survey conducted by the *Washington Post* and the Center for Responsive Politics, **business political action committees** have contributed \$70 million to the two major parties' House campaigns, and the **Democratic Congressional Campaign Committee** has garnered 52 percent of these contributions, a significant rise from two years ago. However, when such contributors give to candidates directly, they give much more to Republicans than to Democrats.

The *New York Times* is the first of the state's major papers to **endorse Hillary Clinton** for the US Senate (22 Oct.). But the endorsement is not devoid of criticism: the paper's editors write that Mrs Clinton has "a lamentable tendency to treat political opponents as enemies," to have been "less than truthful in her comments to investigators, and too eager to follow President Clinton's method of peddling access for campaign donations."

State campaigns: ballot initiatives

There will be **32 initiatives** (referenda) **about education** this year, an all-time high. The questions put to voters concern, among other issues, school **vouchers** (in California, Michigan), **bilingual education** (Arizona), instruction about **homosexuality** and bisexuality (Oregon), education **spending** (Colorado, California, Michigan). To confront those issues more effectively, the **National Education Association** — the nation's largest teachers' union — has voted to impose a \$3 annual surcharge on members' dues. Many of the major changes in public education in recent years have originated at the state level, often as a result of grassroots efforts.

On 7 Nov. **Oregon voters** will have to vote on **no less than 26 initiatives**. Citizens have received a 376-page guide presenting the questions on the ballot and 607 arguments for or against them. The increasing number of ballot initiatives raises the question of whether they are an adequate method of making public policy.

General information

According to a report by the Brennan Center for Justice at New York University School of Law, **the major parties spent \$18.5 million on television ads** in the last week of September and the first week of October. Most of this sum, \$14.5 million, was spent in six highly contested states: Florida, Michigan, Missouri, Ohio, Pennsylvania, Minnesota and Wisconsin. Political-science professor Ken Goldstein (University of Wisconsin) has analyzed data compiled by Campaign Media Analysis Group, a company which tracks publicity spending, and concludes that the Bush and Gore advertising campaigns, together with the two major parties, have used their commercials in a **highly selective way**, targeting specific locations with specific arguments. Thus in Tampa, Florida, a Democratic ad claims that "Two million more pounds of toxic chemicals [have been] dumped into Texas waterways" under Governor George W. Bush, and adds, "Now imagine Bush's Texas record in Florida's Everglades."

A Web site, www.voteauction.com, offers to **sell thousands of votes for president to the highest bidder**, arguing that "like the prison industry, the election industry is another excellent example of how privatization in America is creating great opportunities for investment." The proposal triggers an outcry among advocates of fair election practices: election officials in Michigan take legal action to get the site closed (16 Oct.). A representative of the site retorts that the auction system would not undermine democracy more than **soft money** [unregulated campaign contributions] does; the use of soft money, he says, causes "the candidate [to] make decisions that profit the highest bidder."

Domestic issues

In 1995, Governor George W. Bush signed into law a bill ending **Texas's** 125-year-old ban on **concealed handguns**, claiming it would make the state a "safer place." The *Los Angeles Times* reveals that today over 400 of the 215,000 Texans who have been licensed to carry concealed weapons **had criminal records** and prior convictions when they applied for the permit; besides, over 3,000 have been arrested since obtaining the license. The Texas government confirms the figures, but the governor's criminal justice policy adviser, Johnny Sutton, claims that the law has been "a smashing success" all the same.

According to the General Accounting Office, **52 percent of the nation's 1.6 million farm workers are illegal aliens**. Republican lawmakers have been pushing for a large-scale temporary-worker program. As for **President-elect Vincent Fox of Mexico**, he argues that it makes no sense for the US to spend almost \$1 billion a year to keep watch on the Mexican border, and that his countrymen should be allowed into the US as freely as goods are. The Clinton administration, however, does not share this viewpoint.

On 3 Oct. the US House of Representatives and Senate agree to press states to adopt a tough **national standard for drunk**

driving (3 Oct.). President Clinton signs the bill into law on 23 Oct.. Under the legislation, drivers with 0.08 percent of alcohol in their blood are to be declared legally drunk. States that have not included the standard into their statute books by 2004 will lose in the next fiscal year two percent of the funds they receive from the federal government to maintain highways, 4 percent the next year, and 8 percent the year after that.

Representative Bud Shuster, Republican of Pennsylvania, who chairs the Transportation Committee of the House, is **rebuked** by the chamber's **Committee on Standards of Official Conduct** for accepting gifts in violation of the law, and for favoring a lobbyist (5 Oct.). No penalty is inflicted on the congressman, however.

Attorney General Janet Reno warns Congress that the Department of Justice needs about \$23 million in the fiscal year that began on 1 Oct. to prepare for its **lawsuit against the tobacco industry**: should Congress fail to make the appropriation, the lawsuit would have to be dropped (5 Oct.).

While the **cost of prescription drugs** in the US has become an issue in the ongoing presidential campaign, a rising number of Americans have taken to crossing the Canadian border to get cheaper drugs in **Canada**, where the government prohibits drug manufacturers from charging "excessive" amounts for patented medicines. Many drugs sold in Canada actually come from the US, but these regulations compel US manufacturers to sell their products at lower prices on the Canadian market than in the US.

The **Senate** overwhelmingly (95 to 0) approves legislation that would allow **American victims of foreign terrorists to collect damages from countries that sponsor terrorism** (11 Oct.). The same bill has recently been passed by the House, and is expected to be signed into law by President Clinton.

The same day and with the same majority, the **Senate** passes a bill sponsored by Senator Paul Wellstone, Democrat of Minnesota, that would provide for **harsher punishment for those who bring women and children to the US and force them into prostitution or child labor**. The **House** passed the same bill five days ago (371 to 1), and President Clinton plans to sign it into law shortly. Some 45,000 to 50,000 women and children are estimated to come to the US under such conditions each year. The legislation would also make it possible for victims to be provided with temporary or permanent visas; up to 5,000 such visas could be granted per year.

According to the annual FBI report on crime released on 15 Oct., the **crime rate fell** for the eighth consecutive year in 1999. The murder rate dropped to 5.7 per 100,000, the lowest level since 1966. However, the decline appears to be in **inverse proportion to the size of the city**: the smaller the city, the steeper the drop — 9.4 percent in cities with 100,000 to 250,000 people, but only 1.8 percent in cities with over 1 million inhabitants. Experts conclude that the overall decline may be at an end.

On 12 Oct. the **Food and Drug Administration** revokes the license for the **genetically-engineered corn** which caused a recent recall of **taco shells** across the US [See September chronology]. The corn was approved in 1998 for use in animal feed only; henceforth it can no longer be planted for any agricultural purpose. However, the National Environmental Trust complains that "there appears to be absolutely no oversight of the recall" and that the incriminated taco shells marketed by Taco Bells are still being sold in some places.

Midwestern farmers who planted the bioengineered corn say they had not been properly advised of the FDA restrictions, nor told that the corn was to be kept separate from other crops.

Drug Czar Barry McCaffrey, who has been the Clinton administration's narcotics-policy adviser since March 1996, announces that he will step down on 6 Jan., two weeks before the next president is sworn in.

The 45.2 million Americans who benefit from **Social Security** will see their checks increased by 3.5 percent in 2001, as against 2.4 percent in 2000. Next year's **cost-of-living adjustment** will be the highest since 1992. The increase is triggered by inflation, i.e. mostly by soaring energy prices. Retirees will be able to cash a \$845 check next year, up from the current \$816.

The US is unlikely to be the only major industrial nation that does not grant **debt relief plan** to 41 poor nations in Africa and Latin America. Though European parliaments have been palpably more willing to take the necessary steps to strike out those nations' debts than Congress has, support has now tilted in favor of debt relief on Capitol Hill — apparently in response to pressure by such prominent figures as fundamentalist televangelist Pat Robertson, Pope John Paul II, Bono (the singer of the Irish pop group U2) and Republican standard-bearer George W. Bush.

By a vote of 394 to 14, the **House of Representatives** approves a bill authorizing an initial payment of \$1.4 billion that will go toward **saving the Florida Everglades**, endangered by over-development and pollution (19 Oct.). Congressman Porter Ross, Republican of Florida, says the project "represents the largest, most comprehensive environmental restoration ever attempted."

Following complaints voiced in 1997 by a private group, the Institute for Energy and Environmental Research, the Department of Energy has **re-estimated the amount of plutonium and other radioactive elements** that are released into soil during the **manufacture of nuclear weapons**. The amount is now said to be ten times as high as was previously assessed. The risk that the wastes could contaminate water supplies is therefore significantly higher.

President Clinton will shortly sign into law a bill, the *Breast and Cervical Cancer Prevention and Treatment Act*, which **authorizes states to provide Medicaid coverage for surgery, chemotherapy and other costly care for poor women who have been diagnosed with breast cancer**. **Representative Rick Lazio**, who is currently running for the Senate against the first lady, was the sponsor of the bill in the House. To avoid having to invite his wife's opponent to a public ceremony, the president has decided to sign the bill in private. He has cited his wife's advocacy of the bill as "the inspiration behind [the Clinton] administration's commitment to this issue."

A new report by the US **Census Bureau** reveals that, for the first time since such records began, **both parents hold jobs in 51 percent of households** across the country; the proportion was 33 percent in 1976.

According to a federal report released on 26 Oct., more than 3,500 students were **expelled for bringing a firearm to school** in 1998-99, **down** from 5,700 students in 1996-97.

President Clinton receives for signature the *Intelligence Authorization Act*, a bill requested by the CIA which would **toughen punishment for those convicted of leaking any classified information** to the press or to unauthorized persons. No public hearings were held on the issue on Capitol Hill, and testimony from CIA officials was heard in closed session. Many journalists and First Amendment specialists disapprove of the bill. Even some lawmakers believe it might seriously hinder the flow of information to the public. President Clinton has not yet said whether he will sign the bill into law or veto it.

On 30 Oct. **President Clinton vetoes a Treasury spending bill** that would have permitted Congress and the White House to function until the whole budget was approved, and would also have raised lawmakers' annual compensation by \$3,800, to \$145,000. As the Republican leadership has **rejected a White-House-backed \$315 million bill on education, labor and health** — largely because it introduced new workplace safety regulations —, the president claims: "I had no choice but to veto that legislation. I cannot in good conscience sign a bill that funds the operations of Congress and the White House before funding our schools."

Foreign policy and defense

The Middle East

President Clinton phones **Prime Minister Ehud Barak of Israel and Palestinian leader Yasser Arafat** on 2 Oct., urging them to investigate the resumption of violence in the Middle East and to do their utmost for order to be restored. White House spokesman Jake Siewert calls **Ariel Sharon's** visit to Harma al Sharif, which is widely believed to have triggered the explosion of Palestinian anger, "counterproductive."

Secretary of State Madeleine Albright meets with Ehud Barak and Yasser Arafat in Paris on 4 Oct., but the meeting does not result in an agreement, nor does it cause the ongoing unrest to subside.

Criticisms of **President Clinton's policy** of maintaining ties to **Yasser Arafat** are heard in Israel as well as among American Jews, who believe that the president should clearly lay the blame on Palestinians for the current violence. Conversely, Arab countries warn Bill Clinton against criticizing Mr Arafat: they contend that it would only reinforce Palestinian anger. On NBC's newsmagazine *Meet the Press* (8 Oct.) **Madeleine Albright** identifies the root of the problem as "the Palestinians. . . putting the Israelis under siege" by throwing stones, which is hardly a neutral position.

President Clinton flies to Sharm El Sheikh, Egypt, on 16 Oct. for hastily arranged **talks between Israeli and Palestinian leaders**. On 17 Oct. the president announces that Ehud Barak and Yasser Arafat have agreed to "take immediate, concrete measures" to put an end to the ongoing violence that has claimed over 100 lives, mostly Palestinians.

As the Middle East peace process increasingly seems to have been buried, **President Clinton's efforts to help broker an accord come under fire**: moderate Arab governments, some foreign policy specialists and the Bush campaign contend that because he wanted an agreement to be signed before the end of his term, the president rushed into the **Camp David meeting** without sufficient preparation, failed to consult with Arab allies and did not ponder over the situation that might arise if the peace talks foundered.

On 25 Oct. **Bill Clinton** places phone calls to Yasser Arafat and Ehud Barak to suggest they meet separately with him in Washington after the US elections with a view to giving the peace process a new chance, but **both leaders turn him down**, the White House reveals.

The USS Cole, a Norfolk-based US Navy destroyer, is hit by an **explosion** while entering the harbor of Aden, Yemen. A **terrorist action** is strongly suspected: the 6-by-12-meter hole in the ship's side is found to have been caused by a smaller harbor boat loaded with explosives; the boat was supposed to help the Cole dock at the harbor for fuel (12 Oct.). The same day, President Clinton announces that the **US military have been placed on high alert**. Also on 12 Oct. a person who professes to be speaking on behalf of the Islamic Army of Aden claims **responsibility** for the explosion; the group has protested visits by US ships to Yemen ports in the past.

On 13 Oct., US officials reveal the **death toll** on board the Cole: 17 Americans have lost their lives and 38 have been injured. The FBI opens a terrorism investigation. The US Department of State charges that Yemen is a "safe haven for terrorist groups" and the CIA hints that **Osama bin Laden** may well be involved. President Ali Abdullah Saleh of Yemen denies both that the Cole was the victim of terrorism and that his country protects terrorists.

On 13 Oct. the US orders **embassies and consulates** in 22 countries in Africa, the Middle East and South Asia to **close** public operations until 16 Oct.

On 18 Oct. **President Clinton** leads a memorial service for the Cole victims in Norfolk, and pledges "To those who attacked them we say: You will not find a safe harbor. We will find you and justice will prevail."

FBI director Louis Freeh says he believes the Yemeni government is "now cooperating fully and genuinely" with the US investigation.

Appearing on the CBS News program *Face the Nation*, **Defense Secretary William Cohen** says the US has detected a **movement of elite Iraqi troops** west of Baghdad, and warns Saddam Hussein against attempting to take advantage of the current Middle East crisis to attack his neighbors (15 Oct.).

US forces in Turkey, Bahrain and Qatar are placed on the highest possible state of alert due to **terrorist threats** (24 Oct.). US warships are ordered to avoid the Suez Canal.

The US and Jordan have concluded an agreement whereby all **barriers to free trade** between them would be **eliminated**, as is already the case between the US and Canada, Mexico and Israel. The partners hope that the prospect of free trade will **attract multinational investment to Jordan**, which would help the population, 4.5 million of whom are Palestinians, most of them poor. Jordan borders the West Bank, where the US believes high unemployment contributes to unrest: more investment there could also benefit Palestinians. The pact is signed on 31 Oct. by President Clinton and King Abdullah of Jordan at a White House ceremony.

Asia

The Clinton administration is negotiating a **new arms control agreement with Beijing** under which China would promise to stop supplying Pakistan, Iran and some other countries with missile technology. President Clinton would like to be able to sign the accord when he meets with President Jiang Zemin in November. The agreement, however, would not go as far as to bring China into the Missile Technology Control Regime, signed by some 30 nations to restrict the export of missiles and missile technology.

Madeleine Albright meets with Communist leader **Kim Jong Il of North Korea** for three hours on 23 Oct. and six hours on 24 Oct. in Pyongyang. The talks are mostly about North Korea's **missile program**, which the US believes contributes to supply "rogue" states with missiles. A temporary moratorium was declared last year but the US would like the program to be scrapped altogether. Though the US secretary of state will leave North Korea without a formal agreement, a senior State

Department official says Chairman Kim Jong Il "is accepting the idea of serious restraint on his missile program." But Kim Jong Il has hinted that it would be a slow and lengthy process.

South Korea and **Japan** are rumored to be concerned that the US is going too fast and that it might **upset Seoul's own diplomacy** with its northern neighbor. Indeed for years before the historic meeting between the North and South Korean leaders in June 2000, Pyongyang ignored Seoul and would only negotiate with Washington.

Cuba

A **measure aimed at ending the current embargo on the sale of US food and medicines to Cuba** [see September chronology] as well as all unilateral food and medicine embargoes imposed by the US and currently in effect [against Iran, Libya, Sudan and North Korea], comes under heavy fire: **Democrats** complain that it was nothing but a concession to US farmers by conservative Republican leaders, and that it is very **unlikely to improve Cuban citizens' lot**. Indeed Cuba would be barred from using US government or commercial credits to buy food or drugs, which would therefore remain unaffordable. Besides, the legislation would deprive the president of his ability to ease or tighten restrictions on American travel.

By a vote of 86 to 8, the **Senate** approves the controversial bill (18 Oct.). The impractical provisions that should prevent concrete improvements for the Cuban people are maintained: despite US farmers' lobbying, senators have been swayed by anti-Castro Cuban-Americans in Florida, which happens to be a hotly contested state in the presidential election.

The same bill permits the sale of food to North Korea, Iran, Sudan and Libya, countries which, unlike Cuba, are authorized to request US government credits and private financing.

In Havana, **Fidel Castro** leads a large demonstration against the bill, which he calls "insulting." Al Gore chooses not to comment on the Senate vote, and George W. Bush criticizes it, on the ground that there should be **no change whatsoever** in US-imposed sanctions until the Cuban leader is brought down.

Yugoslavia

Slobodan Milosevic's admission of defeat in Serbian elections encourages the US to step up contacts with Belgrade. Deputy Secretary of State Strobe Talbott advocates lifting the sanctions imposed on the country, and restoring Yugoslav membership in international organizations. Since **President Vojislav Kostunica** objects to handing Mr Milosevic over to the international tribunal at The Hague (which has indicted him for war crimes), the US will not press for an immediate trial.

On 12 Oct., **President Clinton announces that the US is lifting many of the trade and economic sanctions imposed on Yugoslavia** to force Mr Milosevic to step down. The oil embargo is also lifted, as well as the ban on US flights to Yugoslavia. For the time being, however, the sanction that prevents Belgrade from receiving aid from the World Bank and the International Monetary Fund is maintained, and US officials say it will be until Mr Milosevic's lot is agreed upon.

James O'Brien, President Clinton's special adviser for the Balkans, meets with President Kustonica for 90 minutes in Belgrade on 12 Oct.; both sides profess to be anxious that **diplomatic relations** between the two countries be restored. But in view of Serbs' continuing hostility to NATO, the newly elected president cannot afford to move too quickly on the issue.

Al Gore and US-Russia relations

In 1992, **then-Senator Al Gore and Senator John McCain** sponsored the *Iran-Iraq Arms Nonproliferation Act*, a piece of legislation which requires that the US impose **sanctions** on countries **selling sophisticated weapons** to countries — such as Iran — that **sponsor terrorism**. In June 1995, however, **Vice President Al Gore and Victor Chernomyrdin**, the then Russian prime minister, clinched an **agreement** the details of which were not disclosed to Congress or the American public. Under the deal, Russia pledged to stop selling conventional weapons to Iran by 31 Dec. 1999; in exchange, Mr Gore is believed to have promised that the US would not implement the 1992 law against Russia. Russia has failed to abide by the agreement, ignoring the December 1999 deadline despite repeated US complaints. As a result, **Al Gore's role in US-Russian relations** and his personal friendship with Mr Chernomyrdin are criticized.

During the second televised debate (11 Oct.) **George W. Bush** charges that the former Russian premier embezzled funds that had been granted to his country by the International Monetary Fund. **Mr Chernomyrdin** threatens to sue the GOP presidential candidate for libel (12 Oct.).

Speaking at a hearing staged by the Senate Foreign Relations Committee (25 Oct.), the deputy assistant secretary of state for nonproliferation control, John Barker, says there was **no secret deal** between Al Gore and Victor Chernomyrdin but only an **understanding** that was "announced publicly" although some documents related to it are still classified.

Defense: Miscellaneous

The **US Army's chief of staff**, General Erik Shinseki, announces that **all GIs will henceforth wear black berets**, headgear which so far has been the mark of the Rangers, an elite infantry combat unit. The officer believes the beret "will be a symbol of unity, a symbol of army excellence." [Today Rangers wear black, Special Forces green, and Paratroopers maroon.] The new regulations, which are to go into effect in June 2001, arouse the Rangers' anger.

Stephen Younger, associate director of Los Alamos National Laboratory, a leading American expert on nuclear weapons, contends that **conventional explosives could replace nuclear warheads** on most US strategic missiles, and that **small nuclear bombs would be sufficient** to handle the few tasks for which nuclear weapons are required. The proposal, which if implemented would drastically reduce the US nuclear stockpile, triggers a debate at the Pentagon, the Department of State, and among Bill Clinton's security advisers.

Foreign policy: miscellaneous

Thanks to a campaign attacking **Sudan's** poor human-rights record, the US succeeds in preventing that country from winning a two-year term on the UN Security Council (10 Oct.). In the fourth round of ballot, **Mauritius**, backed by Washington, wins the only seat allocated to Africa by a vote of 133 to 55.

Shortly before a **resolution condemning the genocide of Armenians by Turkey** 85 years ago is voted on by the House of Representatives, **President Clinton** urges House Speaker Dennis Hastert to withdraw it (18 Oct.). Indeed Turkey has threatened to ground US warplanes that fly out of Turkish bases to patrol northern Iraq, and to cancel the purchase of 145 American attack helicopters. Besides, Bill Clinton says he fears the vote could adversely affect the situation in the Middle East.

In House-Senate negotiations about a \$14.9 billion spending bill on **foreign aid**, Republican lawmakers agree to allocate \$425 million to **international family planning institutions**, up from the current \$385 million, **without imposing restrictions** on how the money is spent (24 Oct.). Bill Clinton had threatened to veto the bill if abortion-related restrictions were maintained [see July 2000 chronology]. Anti-abortion advocates hope that George W. Bush will reinstate the restrictions if he wins the election.

Economic matters

Against all odds, the **US jobless rate fell to 3.9 percent in September** thanks to 252,000 new jobs created by the economy (according to Labor Department figures released on 6 Oct.). But average hourly earnings only rose by 0.2 percent, as against 0.4 percent in August.

On 3 Oct. the **Senate** overwhelmingly (96 to one) passes legislation to allow the **Immigration and Naturalization Service** to issue 195,000 **visas for highly-skilled foreign workers** in each of the next three years. The visas can be extended for up to six years; 115,000 such visas have been issued this year.

In a letter to Mario Monti (early Oct.), the EU commissioner for competition, **members of the antitrust subcommittee of the US Senate call on European governments to avoid "protectionist sentiments."** The senators are worried over what they consider to be a trend on the part of the EU to discriminate against US companies involved in transAtlantic mergers (such as that of WorldCom Inc. and Sprint Corp.); Time Warner Inc. and the British company EMI Group PLC have also renounced their music joint venture.

The **European Commission approves America Online Inc. (AOL)'s purchase of Time Warner** (11 Oct.): in Europe, the combined company could not have a monopoly position. The \$147 billion deal, however, may run into trouble in the US., where the combination would own one of the biggest cable networks and providers of online services.

According to the nonpartisan **Congressional Budget Office**, even if the current **budget surpluses** were used by the next

presidents solely to pay off the national debt, the US would be in the red again once the baby-boom generation had left the workforce: indeed the cost of providing health and retirement benefits for them will overwhelm the federal budget.

On 12 Oct., the ongoing crisis in the Middle East causes **oil prices** to **surge** and brings about turmoil in the world's **financial markets**: on Wall Street, the Dow Jones industrial average closes 3.64 percent lower. The next day, however, oil prices ease and stocks rise again in New York City, with the Nasdaq composite index gaining 7.9 percent.

Several Chinese officials reveal that it will be a **state-owned Chinese firm**, the Hua Lian Pharmaceutical company, which will **produce the drug RU-486 for US consumers**; the medicine will be made in Shanghai. The legislative director of the **National Right to Life Committee**, who finds the news "very disturbing," announces that his organization will question the safety and purity of Chinese pharmaceuticals and will tie the drug to China's policy of restricting the number of children per family.

As for the American company which is to **market RU-486** in the US, Danco Laboratories, it is "one of the most **enigmatic** companies in the pharmaceutical industry," according to Robert O'Harrow of the *Washington Post*. It only has a handful of employees — an unlisted phone number. Anti-abortion activists fear that Danco's secretive approach will spare it from respecting the principle of accountability.

Labor Department figures show that **producer prices rose** by 0.9 percent in September, the highest monthly rise in 7 months. The **core inflation rate** (calculated so as not to include food and energy prices) went up by 0.3 percent only, but there are indications that **companies absorb the rise** by making lower profits rather than imposing higher retail prices on consumers.

The Commerce Department reveals that **retail sales rose** by 0.9 percent in September as against 0.1 percent in August. The September rise, also the highest in 7 months, was largely due to increased car sales.

The University of Michigan, which computes an index of consumer confidence every month, says that **consumer confidence continued to decline** in September.

Chevron Corp. and **Texaco Inc.** announce their **merger** against the backdrop of volatile oil prices [oil costs over \$30 a barrel currently] and Middle East crisis (16 Oct.). Chevron plans to acquire Texaco for about \$36 billion in stock. The combination, which would create the world's fourth-largest oil company, is likely to be looked into very closely by federal antitrust regulators, insofar as it would **dominate the retail gas station business** in states like California.

Americans are allowed to move their assets abroad but are required to notify the IRS and pay taxes on their income worldwide. As the **Internal Revenue Service** strongly suspects that at least **\$70 billion a year in income tax revenue is lost to Caribbean tax havens**, it asks a federal judge to issue summonses for two years' worth of records of MasterCard and American Express Card transactions in the US billed to bank accounts in Antigua and Barbuda, the Bahamas and the Cayman Islands.

The White House announces (24 Oct.) that the federal government collected a record **\$237 billion surplus** for the fiscal year that ended in September 2000, the third consecutive year of surpluses.

America's largest communications company, **AT&T Corp.**, announces (25 Oct.) that over the next two years it will **divide itself into four pieces**. AT&T Wireless Group, the mobile phone section, and AT&T's cable-television holdings are to be made fully separate entities; a new stock will be created for AT&T's consumer long-distance division.

Government data released on 27 Oct. point to what analysts call a "**soft landing**" of the US economy in the third quarter of 2000, which is hailed as good news:

- **GDP** rose at an annual rate of 2.7 percent, down from 5.6 percent in the second quarter;

- the **price index for goods and services** increased at a 2.4 percent annual rate, up from 2.1 percent earlier (but still well below the 3.8 percent rise in the first quarter).

- however, **consumer spending** rose at a 4.5 percent rate, up from 3.1 percent previously.

Legal issues

Charlotte has become the seventh municipality in **North Carolina**, a state where the **death penalty** has long been entrenched, to call for a **statewide moratorium on executions** in a resolution approved by the city council. Although such resolutions do not have the force of law, the vote reflects an important shift in public attitudes. Other large cities such as Philadelphia, Atlanta, Baltimore, and San Francisco have adopted similar resolutions.

The results of the 7 Nov. presidential election will be pivotal as regards the **US Supreme Court's ideological makeup**: the **next president** is likely to be in a position to **make several appointments** that may well change it. Typically, when the candidates were asked to name the Supreme Court justices that they admire most, George W. Bush named arch-conservatives — **Antonin Scalia and Clarence Thomas** — while Al Gore named the two most famous liberals, **Thurgood Marshall** [the first African-American justice] and **William Brennan**.

After a three-month recess, the **US Supreme Court begins a new term** on 1 Oct.:

- It **rejects an appeal by Exxon Mobil Corp.** over the worst oil spill in US history [1,000 miles of Alaskan shores were polluted by the **Exxon Valdez** in 1989]. The Court lets stand without comment a decision by a lower court supporting the punitive damages (\$5 billion) inflicted on Exxon. However, the company is expected to resort to other ploys to avoid meeting its obligations.

- It **rejects** without comment an appeal by 31 **members of Congress who had sued President Clinton** for ordering the US Armed Forces to participate in NATO's bombing campaign in Yugoslavia (1999). The Congressmen contended the president had overstepped his authority, but their suit was dismissed by a lower court.

- It also **rejects** an appeal by two **gun manufacturers who challenged Congress's authority** to ban the manufacture, sale and possession of semi-automatic weapons.

Governor James Gilmore of Virginia **pardons a mentally-retarded convict after DNA tests cleared him** of the charge of rape and murder. Earl Washington Jr., 40, is the first Virginia death-row inmate to be exonerated in this way.

Mark David Chapman, the man who shot **John Lennon** to death 20 years ago, is denied parole.

The US Supreme Court upholds a lower court ruling denying the **residents of the District of Columbia** the same representation in the House of Representatives as the 50 states enjoy (16 Oct.). DC has a **delegate** (currently Eleanor Holmes Norton) who is **not allowed to vote** on the House floor. In 1998 some 75 DC residents filed two lawsuits on the ground that this situation discriminates against them in violation of the US Constitution. Yet the Supreme Court's decision is based on **strict construction** of a clause of the Constitution which reads that representatives "shall be apportioned among the several *states*": DC does not enjoy state status.

A report by the Texas Defender Service, a group which provides free legal advice to prisoners who have been sentenced to death, depicts the **application of capital punishment in Texas** as "a thoroughly **flawed** system" on account of "racial bias, incompetent defense counsel and misconduct committed by police officers and prosecutors." The study is based on hundreds of death penalty cases and provides what the group presents as "an unprecedented volume of objective evidence" (16 Oct.).

A new case suggests that the **Texas law-and-order system lacks the efficiency** that Governor George W. Bush has repeatedly praised. While two men have been in prison for a murder committed in 1988, a third, currently serving a life sentence for another crime, has sent letters to the governor's office and to Austin's police chief confessing to the 1988 killing. Despite the confession and the evidence provided, the letters have had no effect. **DNA tests** have now exonerated the two men.

An Egypt-born former US Army sergeant, Ali Mohamed, pleads guilty to **participating in the bombings of US embassies in Africa in 1998** (20 Oct.). He claims **Osama bin Laden** himself showed him in what parts of the buildings a suicide bomber could prove most deadly. The plot aimed at getting the US out of the Middle East.

In 1999, **Terry Anderson**, who was kidnapped in **Lebanon** in 1985 and was held **hostage** for 2,454 days, filed a suit against the **Iranian government**, with a view to demonstrating in a US courtroom that Iran had masterminded the plot. Unexpectedly, the federal government has decided that it will be the **US Treasury** that **will compensate** Mr Anderson as well as three other former Lebanon hostages or their families. Mr Anderson will receive \$41.2 million. More than \$213 million plus interest payments will also be distributed to eight families that have won suits against Iran in the US. Congress and the Clinton

administration have agreed that the hostages have a right to damages and hope that the money will be recovered either through an international claims tribunal or through negotiations with Iran.

Miscellaneous

Thanks to **genetic testing**, for the first time a Colorado couple have **given birth to a test-tube baby so as to save their sick 6-year-old daughter**. The baby's cells are exactly identical to those of his sister, who suffers from Fanconi anemia, an inherited disorder that causes failure of bone marrow cell production. Cells from the baby's umbilical cord are infused into his sister's circulatory system (26 Sept.).

Bill Clinton opens a conference on the **Progressive Era** at Princeton University (5 Oct.) and likens his administration to that of **Theodore Roosevelt** as regards reforms enacted and the efforts made to reduce the influence of special interests.

Massachusetts-based **scientists have cloned a gaur**, an ox-like endangered species from Indian and Burmese jungles. The gaur, named Noah, is currently being carried by Bessie, a cow on an Iowa farm. The scientists are planning to clone other endangered species such as giant pandas.

After a failed launch attempt on 5 Oct. and some delay, the **space shuttle Discovery** begins the 100th shuttle flight on 11 Oct. It **reaches the international space station** on 13 Oct. This flight is meant to set the stage for the arrival of the first permanent crew in the station in three weeks' time.

On 16 Oct., thousands of people congregate on the Mall in Washington, DC, for the **Million Family March**, called by **Louis Farrakhan**, the controversial leader of the **Nation of Islam**. The event celebrates the fifth anniversary of the 1995 Million Man March also organized by Mr Farrakhan, who was then criticized for inviting no one but Black men to join him. This time the **Unification Church** (Moonists) endorses the event, advertised as a day of "atonement, reconciliation and responsibility."

According to an article published on 18 Oct. in *Nature*, a **250-million-year-old bacterium is revived** from a drop of fluid caught in a crystal of rock salt near Carlsbad, New Mexico. The news arouses some suspicion among experts, many of whom believe that DNA can survive no longer than a few thousand years.

In the 20 Oct. edition of the *Atlanta Journal-Constitution*, **ex-President Jimmy Carter**, who has always been a **Southern Baptist**, announces that he is breaking away from the Church: he explains that he has been feeling "somewhat excluded" for years and that he made his decision after the Southern Baptists, last June, barred women from serving as pastors.

MICROSOFT AND DOJ: SKIRMISHES CONTINUE, SCHEDULE SET

On October 3rd, the government submitted its proposed briefing schedule and on October 5th, Microsoft replied. Microsoft held fast to its originally proposed schedule of October 2nd, which would defer arguments until next spring instead of holding them in January, as the government wanted. The U.S. Court of Appeals for the District of Columbia Circuit settled the matter on October 11th, splitting the difference between the parties and giving Microsoft until November 27th to file its primary brief and requiring the federal government to file its brief by January 12th, with Microsoft's reply brief due by January 29th. Final briefs must be submitted by February 9th and oral arguments are slated for February 26th and 27th.

Meanwhile, legal experts have suggested that U.S. District Judge Thomas Penfield Jackson, who delivered the initial decision against Microsoft, may have scotched his ability to rehear the case if it is returned to his court by making repeated statements about the case to lecture audiences and the media. It is thought likely that Microsoft will ask that Judge Jackson be disqualified on the grounds that his comments indicate bias. Jackson has also recently indicated that he may remove himself if the appeals court does not appear to repose much faith in his findings and conclusions.

At the end of October, the appeals court backed off a proposed briefing on computer basics after both sides expressed concerns. The briefing was to be conducted by Illinois Institute of Technology official Michael H. Hites covering "basic concepts underlying the fundamentals of automation." Microsoft expressed concern that the briefing would touch on issues involved in the case and pointed out that Hites had performed research on behalf of rival Sun Microsystems. The DOJ, which expressed no objection in principle to the briefing, also expressed concern that the session would involve discussions of issues in the case and suggested that the court would learn a great deal about computer basics simply by reviewing the trial transcripts. On October 26th, after considering the parties' concerns, the Court announced that it had canceled the briefing. On October 25th, AOL asked the appeals court for permission to file an amicus brief in support of the government's case. Three other trade associations, the Project to Promote Competition & Innovation in the Digital Age (ProComp), the Software & Information Industry Association (SIIA) and the Computer and Communications Industry Association (CCIA) also requested permission to file amicus briefs in support of the government. The Association for Competitive Technology (ACT) and the Computing Technology Industry Association (CTIA) asked to file amicus briefs on behalf of Microsoft. The court has said it is encouraging friends of the court supporting the same side to file a single joint brief to make the process more efficient. The Court has set up a portion of its site dedicated to the case, which may be found at <http://www.cadc.uscourts.gov>

HACKING BRINGS MICROSOFT AND G-MEN TOGETHER

After discovering that its computers had been hacked, Microsoft called in the federal government in the form of the FBI, which is now investigating a hacking incident "heard round the world." The incident was revealed on October 26th and apparently targeted a single future product of Microsoft's and did not involve the loss of Windows or Office source code, as had originally been reported. On the other hand, as we go to press, Microsoft has changed its story on multiple fronts, including what damage was done, how long the incident lasted, and even whether Microsoft was aware of the hacking while it was going on. Hackers infiltrated Microsoft's internal networks with QAZ Trojan, a virus that first appeared in July. The break-in is

being treated as a probable act of industrial espionage, and was discovered by Microsoft employees after they detected passwords being sent to an e-mail account in St. Petersburg, Russia. Microsoft's statement regarding the break-in may be found at <http://www.microsoft.com/presspass/features/2000/oct00/10-27security.asp>

SEX SITE BILLING SCAM RESULTS IN TRO

On October 2nd, U.S. District Judge Lewis Kaplan of the Southern District of New York issued a temporary restraining order halting the conduct of Verity International Ltd. and two individuals from Britain as well as freezing their assets. The FTC had charged the defendants with billing thousands of U.S. consumers for videotext services that they did not know had been accessed through their phone lines. In order to use Verity's system, consumers downloaded special dialing software from "teaser" sites. Once activated, the program would disconnect from the normal ISP, dial a Madagascar number and direct the browser to an explicit sex site from a U.S. server. The remote link cost \$2.99 per minute. In a consumer alert issued on October 5th, the FTC warned Net users to beware of scams that reconnect computers to remote spots, at rates as high as \$7 a minute. The FTC's press release regarding the case and a link to the complaint may be found at <http://www.ftc.gov/opa/2000/10/verity.htm>

BUSINESS METHODS PATENT BILL INTRODUCED

On October 3rd, Reps. Rich Boucher and Howard Berman introduced a bill, the Business Method Patent Improvement Act of 2000, which examines the granting of patents on Internet business methods, such as Amazon's "one-click" shopping and Priceline's "name your price" methodology. Though no action is expected in this session of Congress, the bill marks the first effort to determine whether Net business methods patents afford protection to real innovation or inappropriately offer protection to offline business methods that are simply assisted by technology. Boucher said the bill would "create the presumption that the computer-assisted implementation of an analog-world business method is obvious and thus is not patentable." The text of the Act may be found at <http://www.house.gov/boucher/docs/bmpiapage.htm>

CHINA CRACKS DOWN ON NET

On October 2nd, China published broad new regulations on Internet firms which limit foreign investment, require firms to strictly guard against "subversive" content, and would close down any unlicensed firms. The new rules are likely to deal a severe blow to China's nascent Internet industry that is heavily reliant on foreign capital. The regulations ban any content that is "subversive," that supports cults, that "harms the reputation" of China, or that hurts reunification efforts with Taiwan. Internet content and service providers must keep records of all content on their sites and of all users who dial into their servers for 60 days. These records must be given to police on demand. Current commercial Internet sites have 60 days from October 1st to provide detailed information for their businesses to the Ministry of Information Industry in order to obtain licenses. Companies without licenses or exceeding their stated business scopes will be fined or shut down. The rules also state that Internet content providers must have the approval of the Ministry of Information Industry before receiving foreign capital, cooperating with foreign businesses, or attempting domestic or overseas stock offerings. Further information may be found at <http://www.techweb.com/wire/story/reuters/REU20001002S0002>

PROFESSORS SETTLE TEACHER REVIEW WEB SITE CASE

On October 2nd, two California professors settled their suit against the Teacher Review web site, which called them "insane," "drugged out" and sex maniacs. Conceding that they are now afraid of being bankrupted by the case, plaintiffs Daniel Curzon Brown and Jesse David Wall, had filed their suit in 1999 alleging that the web site, which allows students to post anonymous critiques, contained vicious and false comments. In their suit, the teachers said the site had become a clearinghouse for lies, slander and personal attacks. Under the settlement agreement, the professors will pay the American Civil Liberties Union (ACLU) \$10,000 in attorney's fees and will stop posting anonymous reviews of themselves, a step they took to balance the commentary of the anonymous posters. Further information may be found at <http://>

www.wired.com/news/politics/0,1283,39258,00.html. The site itself may be found at <http://www.teacherreview.com>

ACLU CHARGES BIAS IN CARNIVORE REVIEW

On October 4th, the American Civil Liberties Union accused the Justice Department of bias in its choice of a university team to review its Carnivore e-mail surveillance system. The DOJ had announced its selection of the Illinois Institute of Technology Research Institute (IITRI), but the ACLU alleged that members of the IITRI are too close to law enforcement agencies and the current administration to be impartial. The team includes a former Clinton administration policy advisor and a former Justice Department official. Also included on the team are members who have backgrounds with the National Security Agency and the Department of Defense. Additionally, IITRI has for more than 30 years operated the Defense Department's Information Analysis Centers. The DOJ's site, at <http://www.usdoj.gov/jmd/pss/iitritechnicalproposal.pdf>, shows the names of team members blacked out in the PDF file. ACLU's site includes a link to <http://cryptome.org>, which contains a page that essentially fills in the blacked-out names in the DOJ's page. The ACLU's press release regarding the latest development on Carnivore may be found at <http://www.aclu.org/news/2000/n100400.html>

ICANN VOTE SELECTS FIVE NEW BOARD MEMBERS

On October 11th, the Internet Corporation for Assigned Names and Numbers (ICANN) announced that its global online election resulted in the selection of five at-large board members. The new members are Karl Auerbach, a member of the Internet Engineering Task Force and a network architect at Cisco Systems Inc., Ivan Moura Campos, from Brazil and CEO of Akwan Information Technologies, Masanobu Katoh, a Japanese citizen who works for Fujitsu in the United States, Andy Mueller-Maguhn, a member of the Chaos Computer Club, a German computer activist group and Nii Quaynor, from Ghana and on staff at Network Computer Systems. The new board members will assume their seats November 16th at ICANN's annual meeting. The results of the voting and further information may be found at <http://www.icann.org>

TEEN PUMP AND DUMPER SETTLES WITH SEC

On September 20th, the SEC settled with teenage stock trader Jonathan G. Lebed, who had been accused of operating a pump and dump scheme in which he bought low-priced stocks, hyped them on various Internet bulletin boards, and then sold them at a large profit. To settle the case, Lebed paid \$285,000, though he did not admit or deny the allegations. However, it appears that his profit was more like \$800,000, as reported on "60 Minutes," leaving many observers to wonder what sort of lesson the SEC hoped to teach. Jonathan's family is now driving a Mercedes SUV, admittedly purchased with his stock proceeds. The consent order in the case may be found at <http://www.sec.gov/enforce/adminact/33-7891.htm>

TOBACCO COMPANY SUES N.Y. OVER NET SALES

Brown & Williamson Tobacco announced on October 16th that it had filed suit in federal district court in New York to overturn a state law banning cigarette sales via mail, telephone, and the Internet. Brown & Williamson, the U.S. division of British tobacco company British American Tobacco, wants to combat the increasingly competitive retail market by offering catalog sales. B&W calls the law an "unconstitutional interference with commerce." The company wants smokers to be able to order cigarettes by mail, fax, telephone and, in the future, the Internet. Named as defendants in the lawsuit are Governor Pataki, Eliot Spitzer, the New York Attorney General and Antonia C. Novello, M.D., New York's Commissioner of Health. Further information may be found at <http://www.thestandard.com/article/display/0,1151,19424,00.html>

ISPS ORDERED TO REVEAL USERS' IDENTITIES

On October 12th, a Florida appeals court ruled that Internet service providers must disclose the identity of eight individuals who posted anonymous messages in a Yahoo financial chat room. The messages contained material allegedly defamatory to Erik Hvide, the former CEO of Hvide Marine. The American Civil Liberties Union had fought the disclosures, and obtained a stay freezing subpoenas for the records of Yahoo and America Online. The ACLU had asked the court to rule on whether Hvide had been defamed before identifying the defendants. The court did not explain its ruling and the defendants are considering whether to appeal. Further information may be found at <http://www.wired.com/news/politics/0,1283,39485,00.html>

TEAM CLAIMS VICTORY IN SDMI MUSIC HACKING CHALLENGE

Researchers from two U.S. universities and Xerox' Palo Alto Research Center (PARC) are claiming that they beat the music security schemes proffered by the Secure Digital Music Initiative and therefore qualify for the cash prizes offered for anyone who could defeat the four watermarking and two encryption schemes put forward by SDMI to protect music. The SDMI, which is seeking secure methods to distribute music online and via digital music devices, received 447 submissions. The team from Princeton University, Rice University and Xerox's PARC said they were apparently successful in breaking all four watermarking schemes. The SDMI says it is still evaluating submissions. Further information may be found at <http://abcnews.go.com/sections/tech/DailyNews/sdmi001024.html> Information about the efforts of the university/ PARC team may be found at <http://www.cs.princeton.edu/sip/sdmi>

CYBERCRIME TREATY STIRS CONTROVERSY

The United States and a group of European nations have been negotiating the terms of a cybercrime treaty that is generating controversy among computer security experts. The Council of Europe's Draft Cybercrime Treaty, authorized by the 41 nation body in consultation with the U.S. Department of Justice, reportedly might be signed as early as December. The treaty makes it illegal to write or possess hacking software, both of which are legal in the U.S. The treaty also includes aiding and abetting rules which would make the publication of software vulnerabilities illegal. At a gathering of experts on computer security issues in Amsterdam in late October, experts warned that stealing information is not the same as deliberately defeating security measures, which is often done by those who want to enhance computer security and improve products. The Council of Europe has promised to provide a list of exceptions to the treaty, and professional network administrators are expected to be exempt. The treaty also includes extradition agreements and other controversial elements, such as requirements for Internet service providers and Network administrators to help police by maintaining detailed logs of all network activity. Further information may be found at <http://www.wired.com/news/politics/0,1283,39519,00.html>

SUPREME COURT REFUSES TO REVIEW AOL SUBSCRIBER SUIT

On October 2nd, the U.S. Supreme Court declined to review a lower court opinion which held that AOL is not a "common carrier" that can be regulated by the Federal Communications Commission. Four AOL subscribers had filed a class action lawsuit, Howard v. America Online, alleging that AOL set improper charges and failed to protect subscribers' privacy rights and copyrights in violation of the 1934 Communications Act. The trial court dismissed the suit, ruling that Internet Service Providers are not common carriers and therefore not covered by the law. This decision was also upheld by the 9th Circuit Court of Appeals. The basis of the holding is that Internet companies are not common carriers because they provide "enhanced" services rather than basic communication services. The appeals court also said that the 1996 Telecommunications Act specified that it was not designating interactive computer services as common carriers. Further information may be found at <http://www.techserver.com/noframes/story/0,2294,500264747-500410488-502507401-0,00.html>

ILLINOIS CLOSES VOTE AUCTION SITE

On October 18th, a Cook County, Illinois Circuit Court judge issued an order prohibiting a website (voteauction.com) from auctioning off votes for the Presidential election. The preliminary injunction was

issued by Judge Michael J. Murphy after the Chicago Board of Election Commission filed suit against the web site operators. Under Illinois law, selling or buying votes or attempting to sell or buy votes or conspiring or soliciting to buy or sell votes is a Class 4 felony. The web site is owned by a group of Austrians. After their domain name had been placed on hold, the group opened a second vote auction web site with a slightly different name. The new site may be found at <http://www.vote-auction.com> and further information is available at http://www.apbnews.com/newscenter/breakingnews/2000/10/26/votes1026_01.html

FEDERAL AGENCIES USING COOKIES IN SPITE OF BAN

Despite a White House order forbidding the use of cookies on government web sites, 13 government agencies are still using them according to the General Accounting Office. The agencies range from the Federal Aviation Administration to the federal offices that provide disaster relief and administer Medicare. Cookies, small text files that record information about a person's browsing habits when surfing the Net, were forbidden by the White House Office of Management and Budget in June unless approved by the head of the agency and with clear notice about the use of cookies being given on the site. The U.S. Forest Service's International Programs site was even found to be using third-party cookies, which transmit visitors' activities to a private company hired to compile reports for the agency. Other agencies found to be using the cookie software were the U.S. Customs Service, Bureau of Labor Statistics, Federal Emergency Management Agency, Office of National Drug Control Policy, Bureau of Land Management, Central Federal Lands Highway Division, the Energy Department's Ames Laboratory, National Park Service, Office of Personnel Management, the U.S. Trade and Development Agency, and the Health Care Financing Administration. Further information may be found at <http://www0.mercurycenter.com/svtech/news/breaking/ap/docs/543482l.htm>

NEW ENCRYPTION STANDARD CHOSEN

Following the conclusion of a three year worldwide competition, the Commerce Department announced on October 2nd that the Belgian Rijndael encryption algorithm had been selected as the nation's new Advanced Encryption Standard. The AES is intended to protect information in federal computer systems, but it is also expected to be widely utilized in the private sector, particularly in the financial services industry. The competition, which involved some of the world's leading cryptographers from 12 countries, was organized by the National Institute of Standards and Technology (NIST), an agency of the Commerce Department's Technology Administration. Each candidate algorithm was required to support key sizes of 128, 192 and 256 bits. They were evaluated for the strength of their security as well as for their speed and versatility across a variety of computer platforms. Rijndael was selected because it had the best combination of security, performance, efficiency, ease of implementation and flexibility. A technical analysis of the AES candidates is posted on NIST's Web site, along with a wealth of other information about AES. The site may be found at http://www.nist.gov/public_affairs/releases/g00-176.htm

EUROPE APPROVES AOL-TIME WARNER MERGER

The European Commission announced on October 11th that it had approved America Online Inc.'s \$135 billion acquisition of media company Time Warner Inc. After a four month investigation, the Commission said it had approved the merger after AOL agreed to sever all structural links with the German media group Bertelsmann AG. "The proposed undertakings will prevent AOL from having access to Europe's leading source of music publishing rights, thereby eliminating the risk of dominance in the emerging markets for online delivery of music over the Internet and software-based music players," the Commission said in a statement. The acquisition has not yet received approval from the Federal Trade Commission. Further information about the status of the talks with the FTC may be found at <http://news.excite.com/news/r/001024/16/media-timewarner>

FLORIDA: HOT GOODS AND WANTED LIST ONLINE

Florida recently launched an online record system to allow users to enter identification numbers for

everything from appliances to cars to see if they have been reported as stolen. If an item turns up in the database, users can click on it and e-mail a tip to police, potentially receiving a tipper's reward of up to \$1,000. Beginning in December, the web site will let the public check to see if someone they know has been reported missing or is wanted by law enforcement agencies. Further information may be found at <http://www.computeruser.com/news/00/10/13/news12.html>

NAPSTER DECISION ON HOLD

The long-awaited Napster decision has been postponed as the three member panel of the Ninth Circuit Court of Appeals retired without a decision on October 2nd after a 50 minute hearing. Attorneys for the Recording Industry Association of America and the music-swapping service Napster fielded questions from the judges, who will shortly rule on the RIAA's request to reinstate the July 26th decision by a lower court prohibiting Napster from continuing to engage in its music swapping enterprise. Napster has been probing the possibility of making payment to major recording companies to compensate artists for the use of their music, but thus far all proposals have been rejected. Under one reported offer, Napster would pay \$500 million per year to the recording industry, with the funds coming from a \$4.95 monthly fee charged to Napster users. Further information may be found at <http://www.thestandard.com/article/display/0,1151,19760,00.html>

WEB TV SETTLES WITH FTC

WebTV Networks, Inc (WNI), a marketer of Internet access devices and a subsidiary of Microsoft, has agreed to settle Federal Trade Commission charges that advertising for the WebTV system was deceptive and violated federal law. The settlement will bar WNI from making deceptive advertising claims about the performance capabilities of the WebTV system, require clear and conspicuous disclosure of long distance telephone toll charges that some consumers may incur while using WebTV, and require reimbursement to certain former WebTV Internet service subscribers for long distance charges they incurred in the past. It also calls for a consumer education campaign to inform consumers about how to determine the advantages and disadvantages of using Internet access devices as compared to computers. A full list of all the deceptive claims and a link to the complaint and order in the case may be found at <http://www.ftc.gov/opa/2000/10/webtv.htm>

LIBRARIANS PROTEST LOC DIGITAL COPYRIGHT RULING

Library associations are concerned that a recent Library of Congress ruling endangers the "fair use" principles that govern published materials. In issuing a ruling on the implementation of the Digital Millennium Copyright Act, the Library of Congress effectively left owners of copyrighted digital content in control of how that information is accessed. Library associations maintain that fair use exceptions should be made. Librarians are concerned that the ruling will severely limit the public's ability to quote from digital materials, especially those that are not published in nondigital formats. The ruling prevents them from circumventing technological protection measures in seeking to refer to copyrighted material. Librarian of Congress James Billington noted in a public statement that the ruling addresses access to copyrighted materials, not use of content. Further information may be found at <http://www.techweb.com/wire/story/TWB20001030S0006>

"*Bytes in Brief*"[®] is a FREE monthly digest of Internet law and technology news delivered to you by e-mail. For members of the legal and business community interested in Internet law and technology developments, "*Bytes in Brief*" provides a synopsis of related news and links to sources with more expanded coverage. In the time it takes to drink a cup of coffee, "*Bytes in Brief*" is designed to make sure you are tracking major developments in this fast moving area.

If staying current in this field is important to you and you find yourself buried under unread magazines,

newspapers and journals, "Bytes in Brief" can help you stay in touch without a major outlay of time or expense.

ICANN VOTE SELECTS FIVE NEW BOARD MEMBERS

On October 11th, the Internet Corporation for Assigned Names and Numbers (ICANN) announced that its global online election resulted in the selection of five at-large board members. The new members are Karl Auerbach, a member of the Internet Engineering Task Force and a network architect at Cisco Systems Inc., Ivan Moura Campos, from Brazil and CEO of Akwan Information Technologies, Masanobu Katoh, a Japanese citizen who works for Fujitsu in the United States, Andy Mueller-Maguhn, a member of the Chaos Computer Club, a German computer activist group and Nii Quaynor, from Ghana and on staff at Network Computer Systems. The new board members will assume their seats November 16th at ICANN's annual meeting. The results of the voting and further information may be found at <http://www.icann.org>

TEEN PUMP AND DUMPER SETTLES WITH SEC

On September 20th, the SEC settled with teenage stock trader Jonathan G. Lebed, who had been accused of operating a pump and dump scheme in which he bought low-priced stocks, hyped them on various Internet bulletin boards, and then sold them at a large profit. To settle the case, Lebed paid \$285,000, though he did not admit or deny the allegations. However, it appears that his profit was more like \$800,000, as reported on "60 Minutes," leaving many observers to wonder what sort of lesson the SEC hoped to teach. Jonathan's family is now driving a Mercedes SUV, admittedly purchased with his stock proceeds. The consent order in the case may be found at <http://www.sec.gov/enforce/adminact/33-7891.htm>

TOBACCO COMPANY SUES N.Y. OVER NET SALES

Brown & Williamson Tobacco announced on October 16th that it had filed suit in federal district court in New York to overturn a state law banning cigarette sales via mail, telephone, and the Internet. Brown & Williamson, the U.S. division of British tobacco company British American Tobacco, wants to combat the increasingly competitive retail market by offering catalog sales. B&W calls the law an "unconstitutional interference with commerce." The company wants smokers to be able to order cigarettes by mail, fax, telephone and, in the future, the Internet. Named as defendants in the lawsuit are Governor Pataki, Eliot Spitzer, the New York Attorney General and Antonia C. Novello, M.D., New York's Commissioner of Health. Further information may be found at <http://www.thestandard.com/article/display/0,1151,19424,00.html>

ISPS ORDERED TO REVEAL USERS' IDENTITIES

On October 12th, a Florida appeals court ruled that Internet service providers must disclose the identity of eight individuals who posted anonymous messages in a Yahoo financial chat room. The messages contained material allegedly defamatory to Erik Hvide, the former CEO of Hvide Marine. The American Civil Liberties Union had fought the disclosures, and obtained a stay freezing subpoenas for the records of Yahoo and America Online. The ACLU had asked the court to rule on whether Hvide had been defamed before identifying the defendants. The court did not explain its ruling and the defendants are considering whether to appeal. Further information may be found at <http://www.wired.com/news/politics/0,1283,39485,00.html>

TEAM CLAIMS VICTORY IN SDMI MUSIC HACKING CHALLENGE

Researchers from two U.S. universities and Xerox' Palo Alto Research Center (PARC) are claiming that they beat the music security schemes proffered by the Secure Digital Music Initiative and therefore qualify for the cash prizes offered for anyone who could defeat the four watermarking and two encryption schemes put forward by SDMI to protect music. The SDMI, which is seeking secure methods to distribute music online and via digital music devices, received 447 submissions. The team from Princeton University, Rice University and Xerox's PARC said they were apparently successful in breaking all four watermarking schemes. The SDMI says it is still evaluating submissions. Further information may be found at <http://abcnews.go.com/sections/tech/DailyNews/sdmi001024.html> Information about the efforts of the university/ PARC team may be found at <http://www.cs.princeton.edu/sip/sdmi>

CYBERCRIME TREATY STIRS CONTROVERSY

The United States and a group of European nations have been negotiating the terms of a cybercrime treaty that is generating controversy among computer security experts. The Council of Europe's Draft Cybercrime Treaty, authorized by the 41 nation body in consultation with the U.S. Department of Justice, reportedly might be signed as early as December. The treaty makes it illegal to write or possess hacking software, both of which are legal in the U.S. The treaty also includes aiding and abetting rules which would make the publication of software vulnerabilities illegal. At a gathering of experts on computer security issues in Amsterdam in late October, experts warned that stealing information is not the same as deliberately defeating security measures, which is often done by those who want to enhance computer security and improve products. The Council of Europe has promised to provide a list of exceptions to the treaty, and professional network administrators are expected to be exempt. The treaty also includes extradition agreements and other controversial elements, such as requirements for Internet service providers and Network administrators to help police by maintaining detailed logs of all network activity. Further information may be found at <http://www.wired.com/news/politics/0,1283,39519,00.html>

SUPREME COURT REFUSES TO REVIEW AOL SUBSCRIBER SUIT

On October 2nd, the U.S. Supreme Court declined to review a lower court opinion which held that AOL is

not a "common carrier" that can be regulated by the Federal Communications Commission. Four AOL subscribers had filed a class action lawsuit, *Howard v. America Online*, alleging that AOL set improper charges and failed to protect subscribers' privacy rights and copyrights in violation of the 1934 Communications Act. The trial court dismissed the suit, ruling that Internet Service Providers are not common carriers and therefore not covered by the law. This decision was also upheld by the 9th Circuit Court of Appeals. The basis of the holding is that Internet companies are not common carriers because they provide "enhanced" services rather than basic communication services. The appeals court also said that the 1996 Telecommunications Act specified that it was not designating interactive computer services as common carriers. Further information may be found at <http://www.techserver.com/noframes/story/0,2294,500264747-500410488-502507401-0,00.html>

ILLINOIS CLOSES VOTE AUCTION SITE

On October 18th, a Cook County, Illinois Circuit Court judge issued an order prohibiting a website (voteauction.com) from auctioning off votes for the Presidential election. The preliminary injunction was issued by Judge Michael J. Murphy after the Chicago Board of Election Commission filed suit against the web site operators. Under Illinois law, selling or buying votes or attempting to sell or buy votes or conspiring or soliciting to buy or sell votes is a Class 4 felony. The web site is owned by a group of Austrians. After their domain name had been placed on hold, the group opened a second vote auction web site with a slightly different name. The new site may be found at <http://www.vote-auction.com> and further information is available at http://www.apbnews.com/newscenter/breakingnews/2000/10/26/votes1026_01.html

FEDERAL AGENCIES USING COOKIES IN SPITE OF BAN

Despite a White House order forbidding the use of cookies on government web sites, 13 government agencies are still using them according to the General Accounting Office. The agencies range from the Federal Aviation Administration to the federal offices that provide disaster relief and administer Medicare. Cookies, small text files that record information about a person's browsing habits when surfing the Net, were forbidden by the White House Office of Management and Budget in June unless approved by the head of the agency and with clear notice about the use of cookies being given on the site. The U.S. Forest Service's International Programs site was even found to be using third-party cookies, which transmit visitors' activities to a private company hired to compile reports for the agency. Other agencies found to be using the cookie software were the U.S. Customs Service, Bureau of Labor Statistics, Federal Emergency Management Agency, Office of National Drug Control Policy, Bureau of Land Management, Central Federal Lands Highway Division, the Energy Department's Ames Laboratory, National Park Service, Office of Personnel Management, the U.S. Trade and Development Agency, and the Health Care Financing Administration. Further information may be found at <http://www0.mercurycenter.com/svtech/news/breaking/ap/docs/543482l.htm>

NEW ENCRYPTION STANDARD CHOSEN

Following the conclusion of a three year worldwide competition, the Commerce Department announced on October 2nd that the Belgian Rijndael encryption algorithm had been selected as the nation's new Advanced Encryption Standard. The AES is intended to protect information in federal computer systems, but it is also expected to be widely utilized in the private sector, particularly in the financial services industry. The competition, which involved some of the world's leading cryptographers from 12 countries, was organized by the National Institute of Standards and Technology (NIST), an agency of the Commerce Department's Technology Administration. Each candidate algorithm was required to support key sizes of 128, 192 and 256 bits. They were evaluated for the strength of their security as well as for their speed and versatility across a variety of computer platforms. Rijndael was selected because it had the best combination of security, performance, efficiency, ease of implementation and flexibility. A technical analysis of the AES candidates is posted on NIST's Web site, along with a wealth of other information about AES. The site may be found at http://www.nist.gov/public_affairs/releases/g00-176.htm

EUROPE APPROVES AOL-TIME WARNER MERGER

The European Commission announced on October 11th that it had approved America Online Inc.'s \$135 billion acquisition of media company Time Warner Inc. After a four month investigation, the Commission said it had approved the merger after AOL agreed to sever all structural links with the German media group Bertelsmann AG. "The proposed undertakings will prevent AOL from having access to Europe's leading source of music publishing rights, thereby eliminating the risk of dominance in the emerging markets for online delivery of music over the Internet and software-based music players," the Commission said in a statement. The acquisition has not yet received approval from the Federal Trade Commission. Further information about the status of the talks with the FTC may be found at <http://news.excite.com/news/r/001024/16/media-timewarner>

FLORIDA: HOT GOODS AND WANTED LIST ONLINE

Florida recently launched an online record system to allow users to enter identification numbers for everything from appliances to cars to see if they have been reported as stolen. If an item turns up in the database, users can click on it and e-mail a tip to police, potentially receiving a tipper's reward of up to \$1,000. Beginning in December, the web site will let the public check to see if someone they know has been reported missing or is wanted by law enforcement agencies. Further information may be found at <http://www.computeruser.com/news/00/10/13/news12.html>

NAPSTER DECISION ON HOLD

The long-awaited Napster decision has been postponed as the three member panel of the Ninth Circuit Court of Appeals retired without a decision on October 2nd after a 50 minute hearing. Attorneys for the Recording Industry Association of America and the music-swapping service Napster fielded questions from the judges, who will shortly rule on the RIAA's request to reinstate the July 26th decision by a lower court prohibiting Napster from continuing to engage in its music swapping enterprise. Napster has been probing the possibility of making payment to major recording companies to compensate artists for the use of their music, but thus far all proposals have been rejected. Under one reported offer, Napster would pay \$500 million per year to the recording industry, with the funds coming from a \$4.95 monthly fee charged to Napster users. Further information may be found at <http://www.thestandard.com/article/display/0,1151,19760,00.html>

WEB TV SETTLES WITH FTC

WebTV Networks, Inc (WNI), a marketer of Internet access devices and a subsidiary of Microsoft, has agreed to settle Federal Trade Commission charges that advertising for the WebTV system was deceptive and violated federal law. The settlement will bar WNI from making deceptive advertising claims about the performance capabilities of the WebTV system, require clear and conspicuous disclosure of long distance telephone toll charges that some consumers may incur while using WebTV, and require reimbursement to certain former WebTV Internet service subscribers for long distance charges they incurred in the past. It also calls for a consumer education campaign to inform consumers about how to determine the advantages and disadvantages of using Internet access devices as compared to computers. A full list of all the deceptive claims and a link to the complaint and order in the case may be found at <http://www.ftc.gov/opa/2000/10/webtv.htm>

LIBRARIANS PROTEST LOC DIGITAL COPYRIGHT RULING

Library associations are concerned that a recent Library of Congress ruling endangers the "fair use" principles that govern published materials. In issuing a ruling on the implementation of the Digital Millennium Copyright Act, the Library of Congress effectively left owners of copyrighted digital content in control of how that information is accessed. Library associations maintain that fair use exceptions should be made. Librarians are concerned that the ruling will severely limit the public's ability to quote from digital materials, especially those that are not published in nondigital formats. The ruling prevents them from

circumventing technological protection measures in seeking to refer to copyrighted material. Librarian of Congress James Billington noted in a public statement that the ruling addresses access to copyrighted materials, not use of content. Further information may be found at <http://www.techweb.com/wire/story/TWB20001030S0006>

"*Bytes in Brief*"® is a FREE monthly digest of Internet law and technology news delivered to you by e-mail. For members of the legal and business community interested in Internet law and technology developments, "*Bytes in Brief*" provides a synopsis of related news and links to sources with more expanded coverage. In the time it takes to drink a cup of coffee, "*Bytes in Brief*" is designed to make sure you are tracking major developments in this fast moving area.

If staying current in this field is important to you and you find yourself buried under unread magazines, newspapers and journals, "Bytes in Brief" can help you stay in touch without a major outlay of time or expense.

[V]ote-Auction / voteauction.com

2000 till now

Austria

collage; computer-print-outs and ink-drawing on paper

13 law suits have been announced in 2000 4 law suits / temporary injunctions have been granted 2000 The Missouri law suit was dropped 2001 Legal battles in Chicago, Mass. and Wisconsin are still ongoing in 2004...

Over 1800 news-features [TV, radio, online, magazines, newspapers...] 7 CNN features; including a 30 minutes [V]ote-auction special Over 450 million people from all continents have read/ heard/ seen/ [V]a Over 29 press-releases have been issued by [V]ote-auction" [übermorgen]

Wie definiert sich die digitale Kunst und wo sind die Perspektiven der aktuellen Medienkunst? Der Schritt zurück steht nicht zur Diskussion - was also kann der Schritt nach vorne und was können die neuen Ansätze und Diskurse sein, die Medienschaffende beschäftigen und die sie aufgreifen? Wie könnte das Selbstverständnis einer zeitgenössischen Kunst im 21. Jh. sein? Was sind ihre Sinnhorizonte und Perspektiven? Gibt es ein zukunftsweisendes Rollenbild für Kunstschaffende, das über das herkömmliche Konzept des Individualkünstlers hinausgeht und sich zugleich dem neoliberalen Diktat eines angepassten(!), kulturwirtschaftlich orientierten Neu-Unternehmers nach dem Modell "creative industries" widersetzt?

Der Strukturwandel von Öffentlichkeiten im Übergang der Weltgesellschaft von der Modernisierung zur Globalisierung zeigt sich nicht zuletzt in einer expandierenden Elektrosphäre, die heute wesentlich die neuen ökonomischen, kulturellen und kommunikativen Umgebungen der Menschen formiert. Das Leben in einer kybernetisch-medialen Welt - Stichwort: Cybernetic turn - hat in umfassender Weise unsere Erkenntnisgrundlage und die Wahrnehmungskonzepte verändert. Das trifft selbstredend auch auf eine dezidiert zeitgenössische Kunstpraxis zu, die - wie schon die Avantgarden der ästhetischen Moderne im 20. Jh. - auf der Suche nach neuen Funktionen in der Gesellschaft ist.

CODED CULTURES will unter diesem Anspruch auch zu einem Dialog anregen zwischen verschiedenen Kulturen auf Basis digitaler Werkzeuge. Wie schon in der Vergangenheit, gibt es bei allen Unterschieden auch sehr viele Gemeinsamkeiten zwischen der Kunstkultur und der Subkultur. Hier konkret, zwischen der Medienkunst und bspw. der Demoscene, vor allem wenn es um Fragestellungen zur dislozierten Produktionsweise geht, um neue Strategien zur Distribution/Publikation - also um die Schaffung von Öffentlichkeiten unter den neuen Bedingungen - und um neue Formen der Rezeption etwa unter dem Aspekt der Interaktivität.

[V]ote Auction/voteauction.com

2000 till now

Austria

collage; computer print outs and ink drawing on PAPER

13 law suits have been announced in 2000 4 law suits/temporary injunctions have been granted 2000 The Missouri law suit which dropped 2001 legal of battles in Chicago, measure of and Wisconsin acres quietly ongoing in 2004...

Over 1800 news features [TV, radio, on-line, magazine, new PAPER...] 7 CNN feature; including A 30 minutes [V]ote auction special Over 450 million people from all continents have READ/heard/lakes/[V]a Over 29 press releases have been issued by [V]ote auction "[ubermorgen]

As the digital art defines itself and where are the perspectives that current media art? The step back does not stand to the discussion - which thus can the step forward and which to be able the new beginnings and discourses its, the medium-creative employ and them take up? As the self understanding of a contemporary could Art in 21. Jh. its? What are their sense horizons and perspectives? It hands over a trend-setting role picture for art-creative, the conventional concept of the individual artist goes out itself and at the same time the neoliberalen dictation one angepassten(!), culture-economically oriented new entrepreneur according to the model "creative industries" opposes?

The structural change of publicnesses in the transition that World company from the modernization to the globalization shows up not least in an expanding electrical sphere, those today substantially the new economic, cultural and kommunikativen Environments of humans forms. The life in one cybernetic medialen world - keyword: Cybernetic turn - has in comprehensive way our realization basis and those Perception concepts changes. That meets naturally also one decidedly contemporary art practice too, - like already those Avant-gardes of the aesthetischen modern trend in 20. Jh. - on the search after new functions in the society is.

CODED of CULTURES wants to energize under this requirement also to a dialogue between different cultures on basis of digital tools. How already in the past, it gives with all differences also much many thing in common between the art culture and the subculture. Here concretely, between the media art and bspw. the Demoscene, above all if it concerns questions to the deployed production way, over new strategies for distribution/publication - thus around the creation of publicnesses under the new conditions - and around new forms the rezeption for instance under the aspect of the interactivity.

The End Of The Internet

Since this the end of Internet Observer postings for this month, year, century, and millennium, we decided to pass along a hyperlink to [The End of the Internet](#).

[29 December 2000, [top](#)]

Google News for Google-holics

Sometimes the *real-world* aspects of computing suck. A couple of weeks ago, Google placed the following on their homepage.

Have a credit card and 5 minutes? [Get your ad on Google today](#).

If you click the hyperlink, then you go to Google's Self-Service Advertising System.

Google remains cool, however, because their advertisements are presented using HTML -- you are not subjected to banner ads that blink, rotate, go up and down, and detract the hell out of you.

[More Google News]

Google has a new toolbar you can install that keeps track of every website you visit in order for them to analyze your search and surfing patterns. "By using the Advanced Features version of the Google Toolbar, you may be sending information about the sites you visit to Google," Google warns during the Toolbar installation process. [Google Product Tracker Could Raise Privacy Concerns](#) [CNET.com]

[Even More Google News]

This seems like a bunch of stuff to me, but I guess there are users out there who expect Google to suppress all *fake* websites. Here was their test: They used Google to search for nude pictures of Liv Tyler. [Did Smut Spammers Scan Google?](#) [WiredNews]

[22 December 2000, [top](#)]

Wireless...WAP...Wireless...WAP...Wireless...WAP...

Wireless, wireless, wireless... appears to be today's most popular buzzword. It's going to happen, but I'm in no hurry for it. Again, Jakob Nielsen bellies up to the bar and announces that WAP (Wireless Application Protocol) sucks and doesn't work. [Goto related [Alertbox article](#).]

Despite Jakob's findings, wireless communications has a lot of momentum and money behind it. [Unchaining the Net](#) from Salon.com is an article about the increasing popularity of wireless communications. [Hyperlink obtained from an [AZIPA](#) posting.]

[**Extra Item**] Pets.com, which is now a dot-nothing, donated more than 21 tons of dog food to help mushers in Alaska's Interior. [Goto related [WiredNews article](#).]

[15 December 2000, [top](#)]

Numerous Major Websites Experiencing Outages

Amazon.com, BestBuy.com and Wal-mart.com have all suffered outages or slowdowns in the past couple of weeks. This news was reported on the front page of the AZ Republic Business section. Some of the quotes in the article are hard to believe, but are facts of computing.

"Walmart.com's new website dropped offline three times over a weekend as, the company said, new features were being installed. The outages ranged from 60 to 90 minutes."

"Amazon.com has suffered three shutdowns lasting from 15 to 40 minutes since the day after Thanksgiving." Quote on quote: We believe we've debugged the system now, said a company spokesperson.

Downtimes are un-acceptable if we want the Internet to become a ubiquitous tool. Large companies can tolerate downtimes because they have size and money, but small websites can't afford to be sloppy like these companies have been. I suspect the software practices that are being employed to maintain these websites is average at best.

[**Update**] On 08 Dec 2000 the AZ Republic had an article about ASU going after

ASUNudes.com. In addition, a student reported to me that they saw information about ASU and ASUNudes.com on the local nightly news.

[08 December 2000, [top](#)]

[XXX Postings] ASU vs. ASUNudes.com and Beaver College Name Change

WARNING: This week's postings are for mature audiences.

ASU Not Happy With ASUNudes.com

I picked up a copy of the ASU State Press and learned that ASU is considering taking legal action against ASUNudes . com The website -- which is nothing but porn -- uses ASU colors and has the following phrase on its homepage: " Sexy Devils." The University is not happy that ASUNudes . com wants to put a video camera into one of the dorms. The website's homepage does display a pop-up browser window that contains a disclaimer stating that the website is not affiliated with ASU in any way, but ASU says the disclaimer is no good. [I think ASU is right -- if a user has client-side scripting disabled, then they don't see the disclaimer pop-up.]

Beaver College Changes It Name

Beaver College has announced that it will change its name to Arcadia University, a move that university officials hope will reverse the trend of declining enrollment they attributed to the old name. Earlier we reported that Beaver College (because of its name which has been in use since 1853) was being blocked by many Internet filtering programs. [[More...](#)]

[01 December 2000, [top](#)]

French Order Yahoo to Deny Them Access to Nazi Items

The following may be a step toward imposing national boundaries on the frontier-free Internet.

On 20 November 2000, a French judge ruled that Yahoo will face daily fines if it does not block French users from auctions of Nazi items on Yahoo's website. The judge gave Yahoo 90 days to comply with the ruling; after that, the company will face fines of about \$13,000 a day. [[CNN Article](#)]

This sucks. If the French don't want their citizens to visit `auctions.yahoo.com`, then *why don't they do their own blocking, filtering, censorship, or whatever you want to call it?* I don't see how this ruling can be enforced without the U.S. courts getting involved [and that we do NOT want]. If I was Yahoo, I'd tell the French government to worry about running their country and to take a flying leap off their goofy [Eiffel Tower](#).

[24 November 2000, [top](#)]

ICANN Selects Seven New gTLDs

ICANN has selected seven (7) new generic top-level domain names:

.aero .biz .name .info
.pro .coop .museum

I thought for sure `.shop` would be selected. If you want to buy foofoo's, then go to `foofoo.shop` But if you want to see if there is something real (e.g. a company) behind `foofoo.shop` then you would visit `foofoo.com` I like `.info` We have the `LearningAboutComputing.com` domain name and I'm interested in getting `LearningAboutComputing.info` To me `.museum` is too long, too hard to spell, and probably will be frequently redundant (e.g. `MuseumOfScienceAndIndustry.museum`) And is `.biz` for show-biz or is it the New Economy's term for biz-ness. I guess `.pro` could be fun... `HerbMumford.pro` My dad's domain name (if he wants one) will be `TrumanThurman.name` [[Washington Post Article](#)]

[**Bonus Item**] [Internet 2 and the Next Generation Initiative](#)

Thanks JasonI for this interesting article. Internet 2 will be great, but it is not going to happen anytime soon [particularly for the masses]. The article is worth reading for many reasons, but I found it interesting that TCP/IP has problems when it runs on ultra-high speed networks: Reliable transmission of data must be an absolute guarantee. We are lucky that many of the fathers of the ARPANET and Internet are around to help work on the next generation Internet(s?).

[17 November 2000, [top](#)]

We May Have to Pay to Use Napster

Napster signed a deal with Bertelsmann (which owns the BMG recording label and was suing Napster) to create a new, non-copyright-infringing file-trading service. Sadly, Napster usage may come with a service charge (\$4.95 per month has been discussed). Here is the story provided by [\[Inside\] Music](#).

[Side-bar] At 8:00pm MST on 04 Nov 2000, there was almost 2 million files available on Napster. A month ago, this number rarely exceeded 1 million. I down-loaded a great version of Lynyrd Skynyrd's "That Smell"e; recorded live in Dallas, TX in 1987. To me this is one of the great features of Napster -- getting copies of live music.

[10 November 2000, [top](#)]

I Promise to Vote for Bore (oops Gore), but...

The Internet has enabled the following:

"A trading system whereby a Gore voter in a non-swing state promises to vote for Nader if a Nader voter in a swing state promises to vote for Gore. If current polls are right, then it would only take about 2% of the vote in a couple of the larger swing states where Nader is doing well, say Oregon and Wisconsin, to change the outcome. That's about 70,000 people, well within the reach of the Internet, especially given that the voters most likely to go for such a scheme are probably among the most wired of voters already."

Numerous election related websites have been shutdown because the Internet is changing everything. Its reach, depth, and open-ness are amazing. Our form of government does not allow things to be done in a timely and efficient fashion. The Internet is spawning a continuous stream of social and political and legal questions. I'm convinced that the following saying is true: "When it rains, it pours."

[03 November 2000, [top](#)]

A Smorgasbord of Items

This week's Internet Observer is a smorgasbord of items...

- Next year, Verizon Communications, is going to include email addresses in their phone books. Residents of NY, New England and the mid-Atlantic states will be able to include their email addresses as well as URLs to their websites.
- Microsoft announced that it will spend \$1 billion to promote its MSN network of websites. \$150 million goes to TV and Internet ads and the rest on promotions, rebates, and various marketing programs.
- The Clinton administration has decided to review the privacy practices of government Websites in response to a damning study from the General Accounting Office. The study determined that 13 government agencies failed to follow the administration's policy against tracking visitors to government websites.

ICANN (what is it, elections, new TLDs)

The Internet Corporation for Assigned Names and Numbers (ICANN), the non-profit, international corporation that oversees the management of the domain name system (DNS) and the allocation of IP address, unveiled a web site aimed at luring "at-large" members. The program was created as a new way for Internet users from all over the globe to participate directly in the ICANN process and help ensure the smooth coordination of the Internet's technical infrastructure.

Some of the most hardest criticism of ICANN has come from Internet stake holders who claim that the organization is making key decisions about Internet governance without consulting the Internet community. The at-large membership is supposed to provide a voice for those who have a stake in the disposition of the DNS (i.e. almost all Internet users).

On 10 October 2000, ICANN finished holding an election for five new board members and here is a note about the [election results](#).

On 02 October 2000, ICANN stopped taking applications for new *Top-Level Domains* (TLDs). A whole bunch have [been suggested](#).

Internet2: Bigger, Faster, ... Better?

Here we are busting butt to learn about the Internet and on the horizon there is Internet 2. *Will it be twice as good?* I received the content for this posting via email from Edupage:

Edupage is a service of EDUCAUSE, an international nonprofit association dedicated to transforming education through information technologies.

Internet2's latest advance is the Next Generation Internet (NGI) Initiative's ultra-fast network, vBNS (very high-performance backbone network service), which now links nearly 200 campuses. The network handles powerful new applications, allowing astronomers, for example, to remotely manipulate telescopes at an observatory in Hawaii from anywhere in the world. Work is proceeding on the Abilene network and on Internet service quality so collaborative medical procedures, for example, will not be disrupted by e-mail traffic. Meanwhile, the University of Illinois at Chicago's Electronic Visualization Laboratory is working on technology that allows users to walk around and inspect 3D images. The next Internet will link these virtual spaces, called "caves," allowing designers in Germany to look at a car model located in Detroit. Students, too, are expected to benefit from Internet2 technology as universities such as Northwestern allow them to send and receive video from their dorm rooms. (Interactive Week, August 28 2000)

Don't Cybersquat Jethro Tull or Jimi Hendrix

Cybersquatting is an interesting phenomenon. In my programming classes we are always harping about how important it is to use good names when declaring classes, variables, methods, files, directories and so forth. With respect to the Internet, some names when appended by a dot-com have monetary value associated with them. Cybersquatting is the art of selecting a name that you think somebody will want in the future and they will pay you money for it. In some cases, however, names are copyrighted or trademarked and these names can be taken away from a cybersquatter and returned to their rightful owner. Here are two examples:

Mattel/CyberPatrol/cphack/legal stuff/GNU Story Continues

The ACLU has filed lawsuits against Mattel on behalf of those people who mirrored the *cphack* program and are currently being harassed (threatened with legal crap) by Mattel.

[07 Apr 2000, [top](#)]

Mattel/CyberPatrol/cphack/legal stuff/GNU

CyberPatrol is an Internet filtering program owned by Mattel (the huge toy company). A couple of hackers wrote a program (*cphack*) that can be used to obtain a list of blocked websites. Mattel sued the hackers and immediately *cphack* was mirrored around the Internet. Mattel didn't like this so they demanded that all copies of *cphack* be removed from the Internet and threatened lawsuits against those who resisted. Mattel started issuing Esubpenas and a judge ruled that these subpenas would be enforceable.

Judge Harrington entered a temporary restraining order prohibiting any further publication of "CP4break.zip" or "cphack.exe" or any derivative thereof, which likely violate United States copyright laws.

Mattel later settled with the hackers and bought the "rights" to the *cphack*. Now those people having copies of *cphack* may be violating copyright laws (or whatever). But it turns out that the *cphack* program may have been distributed using GNU Licensing and

that the hackers were not legally allowed to sell *cphack* to Mattel. At this point and time everybody is confused: Mattel, the hackers, the Open Source movement, me, and probably you. The following resources are useful.

Why is There an Internet Observer?

The Internet Observer is a collection of news items and hyperlinks that are related to the Internet. It is updated on a weekly basis and covers a wide array of Internet topics such as privacy, security, browser usage, server usage, domain name speculation, ecommerce, and so forth. The following blurb summarizes the goal of the Internet Observer:

Because of the constant evolution of the Internet this document could be updated every minute of every day, but that would result in way too much information. The primary objective of the Internet Observer it to open our eyes to just how expansive the Internet is and to help us realize that like-it-or-not the Internet is here to stay. We are becoming a "networked" society and if you use the Internet, then you are a member of the *cyber-community*. If users of the Internet are Internet-literate, then the Internet will be a better place for all of us to work and live.

The Internet Observer was started January of 1998. As of 01 January 2001, there have been 131 items posted to this resource. Reviewing archived Internet Observer postings is an interesting way to get an Internet related history lesson.

Ralph Nader quote:

"The technology of the Internet is far ahead of any legal framework, any ethical framework or global framework."

One of the objectives of this resource is to observe [and maybe participate in] how the frameworks mentioned by Nader evolve.

Google News for Google-holics

Sometimes the *real-world* aspects of computing suck. A couple of weeks ago, Google placed the following on their homepage.

Have a credit card and 5 minutes? [Get your ad on Google today.](#)

If you click the hyperlink, then you go to Google's Self-Service Advertising System.

Google remains cool, however, because their advertisements are presented using HTML -- you are not subjected to banner ads that blink, rotate, go up and down, and detract the hell out of you.

[More Google News]

Google has a new toolbar you can install that keeps track of every website you visit in order for them to analyze your search and surfing patterns. "By using the Advanced Features version of the Google Toolbar, you may be sending information about the sites you visit to Google," Google warns during the Toolbar installation process. [Google Product Tracker Could Raise Privacy Concerns](#) [CNET.com]

[Even More Google News]

This seems like a bunch of stuff to me, but I guess there are users out there who expect Google to suppress all *fake* websites. Here was their test: They used Google to search for nude pictures of Liv Tyler. [Did Smut Spammers Scan Google?](#) [WiredNews]

[22 December 2000, [top](#)]

Wireless...WAP...Wireless...WAP...Wireless...WAP...

Wireless, wireless, wireless... appears to be today's most popular buzzword. It's going to happen, but I'm in no hurry for it. Again, Jakob Nielsen bellies up to the bar and announces that WAP (Wireless Application Protocol) sucks and doesn't work. [Goto related [Alertbox article](#).]

Despite Jakob's findings, wireless communications has a lot of momentum and money behind it. [Unchaining the Net](#) from Salon.com is an article about the increasing popularity of wireless communications. [Hyperlink obtained from an [AZIPA](#) posting.]

[Extra Item] Pets.com, which is now a dot-nothing, donated more than 21 tons of dog food to help mushers in Alaska's Interior. [Goto related [WiredNews article](#).]

[15 December 2000, [top](#)]

Numerous Major Websites Experiencing Outages

Amazon.com, BestBuy.com and Wal-mart.com have all suffered outages or slowdowns in the past couple of weeks. This news was reported on the front page of the AZ Republic Business section. Some of the quotes in the article are hard to believe, but are facts of computing.

"Walmart.com's new website dropped offline three times over a weekend as, the company said, new features were being installed. The outages ranged from 60 to 90 minutes."

"Amazon.com has suffered three shutdowns lasting from 15 to 40 minutes since the day after Thanksgiving." Quote on quote: We believe we've debugged the system now, said a company spokesperson.

Downtimes are un-acceptable if we want the Internet to become a ubiquitous tool. Large companies can tolerate downtimes because they have size and money, but small websites can't afford to be sloppy like these companies have been. I suspect the software practices that are being employed to maintain these websites is average at best.

[Update] On 08 Dec 2000 the AZ Republic had an article about ASU going after ASUNudes.com. In addition, a student reported to me that they saw information about ASU and ASUNudes.com on the local nightly news.

[08 December 2000, [top](#)]

[XXX Postings] ASU vs. ASUNudes.com and Beaver College Name Change

WARNING: This week's postings are for mature audiences.

ASU Not Happy With ASUNudes.com

I picked up a copy of the ASU State Press and learned that ASU is considering taking legal action against ASUNudes . com The website -- which is nothing but porn -- uses ASU colors and has the following phrase on its homepage: " Sexy Devils." The University is not happy that ASUNudes . com wants to put a video camera into one of the dorms. The website's homepage does display a pop-up browser window that contains a disclaimer stating that the website is not affiliated with ASU in any way, but ASU says the disclaimer is no good. [I think ASU is right -- if a user has client-side scripting disabled, then they don't see the disclaimer pop-up.]

Beaver College Changes It Name

Beaver College has announced that it will change its name to Arcadia University, a move that university officials hope will reverse the trend of declining enrollment they attributed to the old name. Earlier we reported that **Beaver College** (because of its name which has been in use since 1853) was being blocked by many Internet filtering programs. [[More...](#)]

French Order Yahoo to Deny Them Access to Nazi Items

The following may be a step toward imposing national boundaries on the frontier-free Internet.

On 20 November 2000, a French judge ruled that Yahoo will face daily fines if it does not block French users from auctions of Nazi items on Yahoo's website. The judge gave Yahoo 90 days to comply with the ruling; after that, the company will face fines of about \$13,000 a day. [[CNN Article](#)]

This sucks. If the French don't want their citizens to visit `auctions.yahoo.com`, then *why don't they do their own blocking, filtering, censorship, or whatever you want to call it?* I don't see how this ruling can be enforced without the U.S. courts getting involved [and that we do NOT want]. If I was Yahoo, I'd tell the French government to worry about running their country and to take a flying leap off their goofy [Eiffel Tower](#).

ICANN Selects Seven New gTLDs

ICANN has selected seven (7) new generic top-level domain names:

.aero .biz .name .info
.pro .coop .museum

I thought for sure .shop would be selected. If you want to buy foofoo's, then go to foofoo.shop But if you want to see if there is something real (e.g. a company) behind foofoo.shop then you would visit foofoo.com I like .info We have the LearningAboutComputing.com domain name and I'm interested in getting LearningAboutComputing.info To me .museum is too long, too hard to spell, and probably will be frequently redundant (e.g. MuseumOfScienceAndIndustry.museum) And is .biz for show-biz or is it the New Economy's term for biz-ness. I guess .pro could be fun... HerbMumford.pro My dad's domain name (if he wants one) will be TrumanThurman.name [[Washington Post Article](#)]

[Bonus Item] [Internet 2 and the Next Generation Initiative](#)

Thanks JasonI for this interesting article. Internet 2 will be great, but it is not going to happen anytime soon [particularly for the masses]. The article is worth reading for many reasons, but I found it interesting that TCP/IP has problems when it runs on ultra-high speed networks: Reliable transmission of data must be an absolute guarantee. We are lucky that many of the fathers of the ARPANET and Internet are around to help work on the next generation Internet(s?).

[17 November 2000, [top](#)]

We May Have to Pay to Use Napster

Napster signed a deal with Bertelsmann (which owns the BMG recording label and was suing Napster) to create a new, non-copyright-infringing file-trading service. Sadly, Napster usage may come with a service charge (\$4.95 per month has been discussed). Here is the story provided by [\[Inside\] Music](#).

[Side-bar] At 8:00pm MST on 04 Nov 2000, there was almost 2 million files available on Napster. A month ago, this number rarely exceeded 1 million. I down-loaded a great version of Lynyrd Skynyrd's "That Smell"e; recorded live in Dallas, TX in 1987. To me this is one of the great features of Napster -- getting copies of live music.

[10 November 2000, [top](#)]

I Promise to Vote for Bore (oops Gore), but...

The Internet has enabled the following:

"A trading system whereby a Gore voter in a non-swing state promises to vote for Nader if a Nader voter in a swing state promises to vote for Gore. If current polls are right, then it would only take about 2% of the vote in a couple of the larger swing states where Nader is doing well, say Oregon and Wisconsin, to change the outcome. That's about 70,000 people, well within the reach of the Internet, especially given that the voters most likely to go for such a scheme are probably among the most wired of voters already."

Numerous election related websites have been shutdown because the Internet is changing everything. Its reach, depth, and open-ness are amazing. Our form of government does not allow things to be done in a timely and efficient fashion. The Internet is spawning a continuous stream of social and political and legal questions. I'm convinced that the following saying is true: "When it rains, it pours."

[03 November 2000, [top](#)]

A Smorgasbord of Items

This week's Internet Observer is a smorgasbord of items...

- Next year, Verizon Communications, is going to include email addresses in their phone books. Residents of NY, New England and the mid-Atlantic states will be able to include their email addresses as well as URLs to their websites.
- Microsoft announced that it will spend \$1 billion to promote its MSN network of websites. \$150 million goes to TV and Internet ads and the rest on promotions, rebates, and various marketing programs.
- The Clinton administration has decided to review the privacy practices of government Websites in response to a damning study from the General Accounting Office. The study determined that 13 government agencies failed to follow the administration's policy against tracking visitors to government websites.

ICANN (what is it, elections, new TLDs)

The Internet Corporation for Assigned Names and Numbers (ICANN), the non-profit, international corporation that oversees the management of the domain name system (DNS) and the allocation of IP address, unveiled a web site aimed at luring "at-large" members. The program was created as a new way for Internet users from all over the globe to participate directly in the ICANN process and help ensure the smooth coordination of the Internet's technical infrastructure.

Some of the most hardest criticism of ICANN has come from Internet stake holders who claim that the organization is making key decisions about Internet governance without consulting the Internet community. The at-large membership is supposed to provide a voice for those who have a stake in the disposition of the DNS (i.e. almost all Internet users).

On 10 October 2000, ICANN finished holding an election for five new board members and here is a note about the [election results](#).

On 02 October 2000, ICANN stopped taking applications for new *Top-Level Domains* (TLDs). A whole bunch have [been suggested](#).

Internet2: Bigger, Faster, ... Better?

Here we are busting butt to learn about the Internet and on the horizon there is Internet 2. *Will it be twice as good?* I received the content for this posting via email from **Edupage**:

Edupage is a service of EDUCAUSE, an international nonprofit association dedicated to transforming education through information technologies.

Internet2's latest advance is the Next Generation Internet (NGI) Initiative's ultra-fast network, vBNS (very high-performance backbone network service), which now links nearly 200 campuses. The network handles powerful new applications, allowing astronomers, for example, to remotely manipulate telescopes at an observatory in Hawaii from anywhere in the world. Work is proceeding on the Abilene network and on Internet service quality so collaborative medical procedures, for example, will not be disrupted by e-mail traffic. Meanwhile, the University of Illinois at Chicago's Electronic Visualization Laboratory is working on technology that allows users to walk around and inspect 3D images. The next Internet will link these virtual spaces, called "caves," allowing designers in Germany to look at a car model located in Detroit. Students, too, are expected to benefit from Internet2 technology as universities such as Northwestern allow them to send and receive video from their dorm rooms. (Interactive Week, August 28 2000)

Don't Cybersquat Jethro Tull or Jimi Hendrix

Cybersquatting is an interesting phenomenon. In my programming classes we are always harping about how important it is to use good names when declaring classes, variables, methods, files, directories and so forth. With respect to the Internet, some names when appended by a dot-com have monetary value associated with them. Cybersquatting is the art of selecting a name that you think somebody will want in the future and they will pay you money for it. In some cases, however, names are copyrighted or trademarked and these names can be taken away from a cybersquatter and returned to their rightful owner. Here are two examples:

Mattel/CyberPatrol/cphack/legal stuff/GNU Story Continues

The ACLU has filed lawsuits against Mattel on behalf of those people who mirrored the *cphack* program and are currently being harassed (threatened with legal crap) by Mattel.

[07 Apr 2000, [top](#)]

Mattel/CyberPatrol/cphack/legal stuff/GNU

CyberPatrol is an Internet filtering program owned by Mattel (the huge toy company). A couple of hackers wrote a program (*cphack*) that can be used to obtain a list of blocked websites. Mattel sued the hackers and immediately *cphack* was mirrored around the Internet. Mattel didn't like this so they demanded that all copies of *cphack* be removed from the Internet and threatened lawsuits against those who resisted. Mattel started issuing Esubpenas and a judge ruled that these subpenas would be enforceable.

Judge Harrington entered a temporary restraining order prohibiting any further publication of "CP4break.zip" or "cphack.exe" or any derivative thereof, which likely violate United States copyright laws.

Mattel later settled with the hackers and bought the "rights" to the *cphack*. Now those people having copies of *cphack* may be violating copyright laws (or whatever). But it turns out that the *cphack* program may have been distributed using GNU Licensing and that the hackers were not legally allowed to sell *cphack* to Mattel. At this point and time everybody is confused: Mattel, the hackers, the Open Source movement, me, and probably you. The following resources are useful.

Business-to-Business Business is Big Business

Nobody can predict what's going to happen with the Internet over the next few years, but one popular belief is that revenue generated by B2B (Business-to-Business) transactions conducted via the Internet will exceed that generated by B2C (Business-to-Consumer). Some reliable sources predict that by 2003 B2B revenues will be 10 times greater B2C revenues. [XML is going to play a big role in accomplishing this.]

[22 Jan 2000, [top](#)]

Why is There an Internet Observer?

The Internet Observer is a collection of news items and hyperlinks that are related to the Internet. It is updated on a weekly basis and covers a wide array of Internet topics such as privacy, security, browser usage, server usage, domain name speculation, ecommerce, and so forth. The following blurb summarizes the goal of the Internet Observer:

Because of the constant evolution of the Internet this document could be updated every minute of every day, but that would result in way too much information. The primary objective of the Internet Observer it to open our eyes to just how expansive the Internet is and to help us realize that like-it-or-not the Internet is here to stay. We are becoming a "networked" society and if you use the Internet, then you are a member of the *cyber-community*. If users of the Internet are Internet-literate, then the Internet will be a better place for all of us to work and live.

The Internet Observer was started January of 1998. As of 01 January 2001, there have been 131 items posted to this resource. Reviewing archived Internet Observer postings is an interesting way to get an Internet related history lesson.

Ralph Nader quote:

"The technology of the Internet is far ahead of any legal framework, any ethical framework or global framework."

One of the objectives of this resource is to observe [and maybe participate in] how the frameworks mentioned by Nader evolve.

Top News Online

1. Nahost-Konflikt - Eskalation auch im Internet

Wie der Konflikt im Nahen Osten enden wird, gleicht zur Zeit einem "Russisch Roulette"-Spiel. An einem Tag liefern sich Israelis und Palästinenser heftigste Gefechte und am nächsten wird wieder über einen Waffenstillstand verhandelt. Auf einem Schlachtfeld geht der Krieg aber bestimmt auch nach all den Verhandlungen weiter - dem Internet. Viren, Trojanische Pferde, DoS (Denial of Service)- oder Hacker-Attacken ersetzen Panzer und Raketen.

Sowohl die Webseiten des israelischen Parlaments (Knesset), des Außenministeriums und der "Israeli Defence Forces" (IDF) als auch die der "Palestinian National Authority" und der Hisbollah konnten für einige Zeit nicht mehr aufgerufen werden. Auf der Hisbollah-Seite war außerdem für einige Zeit die israelische Flagge gehisst worden.

Dazu wurden zudem spezielle Webseiten eingerichtet, die es jedem ermöglichten, an der virtuellen Attacke teilzunehmen. Über ein Programm auf der Seite konnte man mit seinem Browser im Sekundentakt immer wieder dieselbe URL automatisch aufrufen lassen um so den jeweiligen Server zu überlasten.

Die virtuelle Kriegsführung gibt es nicht erst seit dem Nahost-Konflikt: Sowohl im Kosovo-Krieg (nNL 21/99), der Kaschmir-Krise als auch im Konflikt um Osttimor (Indonesien, seit 1975) bekämpfen sich die Gegner online. Bei einem Symposium des Bundesnachrichtendienstes am gestrigen Donnerstag räumten die Spitzenvertreter des deutschen Geheimdienstes ein, dass Deutschland vor einem Internetkrieg nicht ausreichend gewappnet sei. Bei der Bundeswehr wurde immerhin schon ein eigenes Fachreferat eingerichtet, das natürlich der höchsten Geheimhaltungsstufe unterliegt. Die zentrale Koordinierung aller Anstrengungen übernimmt das Bundesinnenministerium. Sprecher Dirk Inger kann allerdings noch nicht viel dazu sagen, derzeit ist man gerade dabei "die vorhandenen Formen der Bedrohung zu prüfen". Und dann erst sieht man weiter.

Aber solange man an zwei der vier zentralen Knotenpunkte des europäischen Internets fast ohne Kontrolle manipulieren kann braucht man kaum eine Task Force...

2. Dotcon - Die Top Ten-Betrügereien im Internet

In Deutschland, Australien, Irland, Neuseeland, Norwegen, Finnland, Kanada, Großbritannien und den Vereinigten Staaten haben sich Verbraucherschützer auf die Suche gemacht - und insgesamt 251 aktenkundige Fälle aufgetan, die unter dem Titel "dot con" zusammengefasst wurden. Dot con, der große Schwindel im Internet. Um die wachsende Kundschaft vor ihren eigenen Fehlern zumindest zu warnen, stellte die US-amerikanische Federal Trade Commission (FTC) die Top Ten der "dot cons" ins Internet.

Mit von der Partie waren der Berliner Verbraucherschutzverein und die Stiftung Warentest. Über 285.000 Beschwerden erreichten die Verbraucherschützer weltweit, mehr als 1600 Webseiten wurden ermittelt, die zumindest den Verdacht nahe legen, unlautere Verdienstmöglichkeiten anzubieten.

Platz 1 bis 10 der Schwindeleien nehmen ein:

1. Internet Auktionen: Mit großartigen Angeboten werden Kunden geködert. Die Bezahlung erfolgt als Vorkasse und wenn die Ware überhaupt geschickt wird, dann entspricht sie oft nicht dem

Versprochenen.

2. spezielle Providerverträge: Beim Einlösen eines (geschenkten) Schecks über US-\$ 3,50 "unterschieden" die Kunden automatisch einen langfristigen Internet-Zugangs-Vertrag.
3. Kreditkartenbetrug: Nur zur Prüfung des Alters wurden Kunden aufgefordert, die Kreditkartennummer online einzugeben. Die Nummern wurden aber für falsche Abrechnungen missbraucht.
4. Modemschwindel: Um Pornos kostenlos ansehen zu können, sollten die User einen "Viewer" herunterladen. Durch das Programm wurde das Modem aber nach dem Trennen der Internetverbindung zur erneuten Einwahl bei weit entfernt sitzenden Providern veranlasst - kostenpflichtig versteht sich.
5. Webdienste: Die gratis 30-Tages-Testversion einer Kundenwebseite kostete dennoch: Der Anbieter belastete die Telefonrechnung der Kunden oder schickte Rechnungen, unabhängig davon, ob die Kunden die Testversion akzeptierten oder längerfristige Verträge schlossen.
6. Anleitung, reich zu werden: Die Kunden sollten an ihren eigenen Umsätzen und derer ihrer geworbenen Kollegen verdienen. Die Kundschaft waren aber wiederum Distributoren, nicht die breite Öffentlichkeit. Gewinnspannen gibt es keine, zudem ist diese Pyramidenstruktur illegal.
7. Reiseschwindler: Statt einer luxuriösen Reise mit vielen Extras bekamen die Kunden für viel Geld minderwertige Hotels oder gar keine Reise.
8. Geschäftsmodelle: Der Kunde solle sein eigener Chef sein und viel Geld verdienen. Die im Voraus gezahlten Investitionen erwiesen sich aber als "aus dem Fenster geworfen" - ein fast klassischer Geschäftsflop.
9. Lohnende Investitionen: Mit einem geringen Einsatz sollten die Kunden schnelle und hohe Gewinne erzielen. Statt dessen verloren sie aber ihr Geld mit den Spekulationen.
10. Gesundheitsschwindel: Selbst schwerwiegende gesundheitliche Probleme sollten mit den "geheimnisvollen" Produkten geheilt werden.

In der Negativ-Liste der Deutschen steht nur ein Unternehmen auch in einer TopTen-Kategorie: Die Aero Lloyd Flugreisen GmbH in der Reiseabteilung.

Aber mal ganz ehrlich: Diese ganzen Schwindeleien gibt es nicht erst seit der Entdeckung des Internets. Auf das Versprechen, schnelle Gewinne zu machen, fallen auch viele an der Haustüre herein. Gesunder Menschenverstand und etwas Vorsicht (z. B. regelmäßiges Lesen des netNewsLetters ;-)) - und die Liste kann man sich getrost schenken.

3. NaderGore.org - Entscheidet das Internet über Präsidentschaft?

Am Dienstag wird in den Vereinigten Staaten von Amerika der neue Präsident (nNL 42/00) gewählt. Da die beiden aussichtsreichsten Kandidaten Gore (Dem) und Bush (Rep) sich ein Kopf an Kopf-Rennen liefern, könnten die Stimmen für den Außenseiter Nader (Grüne) das Zünglein an der Waage sein. Stimmen, die ihm das Internet beschaffen könnte.

Nader muss landesweit nur auf 5% kommen um im nächsten Wahlkampf 2004 Geldmittel aus der Staatskasse zu bekommen - egal in welchem Bundesland. Für Gore und Bush zählen keine landesweiten Prozente, sondern nur ob sie die Mehrheit in den einzelnen Bundesstaaten gewinnen.

Also versucht man die Gore-Stimmen der - schon heute verlorenen Bundesstaaten (z.B. Texas, Mississippi) - in diejenigen zu transferieren, in denen ein Kopf-an-Kopf Rennen droht (z.B. Kalifornien, Washington). Dieser Transfer gelingt, indem zwei Wähler per eMail vereinbaren, jeweils die Stimme des anderen abzugeben. Die Wähler Naders machen mit, weil sie so den konservativen Bush als Präsidenten verhindern könnten.

Als deutsches Pendant zu dem amerikanischen Stimmentausch sieht Steffen Wenzel, Chefredakteur von politik-digital, die Leihstimmenkampagne der CDU und CSU in der Ära Kohl. Diese Stimmen verhalfen der FDP, über die 5 %-Hürde zu kommen, und zementierten gleichzeitig Kohls Position.

Da die Stimmen in den USA nicht gekauft werden (vgl: Votauction wurde bereits verboten, nNL 37/00), verstößt der Stimmentausch nach Angaben des "U.S. Department of Justice" auch nicht gegen das amerikanische (Wahl-)Gesetz. Steffen Wenzel sieht in dieser Art der Wahlbeeinflussung dann auch nichts Verwerfliches. Und da "die Schnittmenge der Leute die unentschieden und Internet-User sind, hoch ist", könnten diese Wahlen die ersten sein, die nicht nur durch das Internet beeinflusst, sondern sogar entschieden werden.

4. Totale Kontrolle... Über Windows 2000 mit einem kleinen Trick

Da hat man schon ein angeblich hochsicheres System wie Windows 2000 auf seinem Rechner, jeder Benutzer hat seine persönliche, passwortgeschützte Oberfläche - und dann diese Meldung der Computerbild: Mit einer geringen Veränderung in einer Systemdatei soll es möglich sein, jeglichen Passwortschutz zu umgehen.

Andreas Eickelkamp, Redakteur der Computerbild, wurde durch einen Leser auf dieses Loch aufmerksam gemacht und prüfte nach: Tatsächlich sei es machbar, sobald der Rechner im DOS-Modus gebootet wird, die entsprechende Datei so zu verändern, dass jede Passwortprüfung hinfällig wird - egal, mit welchem Passwort man sich einloggt, jedes wird akzeptiert. Der Fremduser wuerde so automatisch zum Systemadministrator.

Allerdings nur auf dem lokalen Rechner, auf den Netzwerkzugriff hätte das keine Auswirkungen, so Eickelkamp. Die einzige Lösung, die er parat hat, um solche unangenehmen Löcher zu stopfen, ist die mechanische: Rechner wegsperren und/oder das Diskettenlaufwerk ausbauen!

Ob die Vorgänger-Version von Windows 2000, Windows NT 4, ein ähnliches Loch aufweist, will die Redaktion noch prüfen. Mehr darüber, in allen Einzelheiten, erfahren Sie am Montag in der kommenden Ausgabe der Computerbild.

5.1 nNL-Spezial: Mega-SMS mit 700 Zeichen ins Ausland

Mit Bekannten oder Freunden in den USA oder Australien Kontakt aufzunehmen, ist Dank Internet und eMail wie ein Kinderspiel. Daneben bieten die meisten Anbieter der kostenlosen eMail-Konten auch einen SMS-Service an. Doch leider macht der Spaß oft an deutschen Landesgrenzen (bzw. an ausländischen Netzen) halt.

Dank Internet kann man seinen Lieben aber trotzdem eine Message auf's Handy schicken, egal ob diese am Strand in Kalifornien liegen oder beim Tauchen in Australien sind.

Wir haben Ihnen eine Reihe an Websites zusammengestellt, die einen kostenlosen und z. T. weltweiten SMS-Service anbieten.

Die netNewsLetter-Empfehlung "time2bcool.com" schickt aber die SMS nicht nur ins Ausland sondern hat noch eine Spezialität: Anstatt der üblichen 160 Zeichen kann man 700 (!) Zeichen per SMS verschicken und wir haben das natürlich gleich einmal getestet. Die Nachricht kommt zwar zerlegt in bis zu sechs Teilen beim Empfänger an, doch zumindest kann man sich das lästige Eintippen der Handy-Nummer sparen!

5.2 Erstmals Live-Streaming von der ISS

Am Dienstag hat die erste Besatzung der Internationalen Space Station "ISS" die Reise angetreten. Die Reise durchs All verlief problemlos (sieht man mal von fehlenden Toiletten und keiner Heizung ab!), die drei Astronauten dockten gestern planmäßig an der ISS an - und werden nun ca. vier Monate (nach einem ausgiebigen Toilettengang) im All verbringen. Die NASA hält deshalb auf ihrer Webseite umfangreiche Informationen rund um die Mission und die Raumstation bereit.

Unangefochtenes Highlight ist wohl "Nasa-TV": Derzeit werden noch Videos von der Bodenstation und den Kontrollbildschirmen gezeigt, sobald die Sojus-Kapsel der Astronauten an der ISS andocken soll, hält Nasa-TV auch live "drauf". Sollte einem bis zum Donnerstag aber langweilig werden, hält die Nasa im Videoarchiv z. B. auch den vergangenen Start und die glückliche Landung der STS 92 bereit. Wer aber nicht alte Flüge ansehen will und statt dessen das neue Umfeld der Astronauten vor ihnen erkunden will, kann virtuell durch die ISS wandern. Oder via VRML (virtual reality markup language) einzelne Punkte der Raumstation selbst erkunden. Wer das nicht alleine tun will, kann sich von einem ISS-Roboter begleiten lassen. "MC" zeigt in einem kurzen Überflug die Geschichte der Idee einer Raumstation und erklärt, warum eine Raumstation überhaupt gebraucht wird. Zu guter Letzt stehen zudem Wetterinformationen zur Verfügung, werden die Flugroute der Fähre und Raumstation angeboten oder Links zu den SkyWatch-Seiten: Hier findet der Hobby-Astronaut Ort und Zeitpunkt, wo er die Raumfähre ISS oder das Space Shuttle am besten erkennen kann.

Allerdings sollte man dann gut im Lesen und Interpretieren von Tabellen sein. Oder doch wieder auf Nasa-TV "umschalten"...

5.3 Rechtzeitig zum Comeback - Die offizielle Beatles-Homepage

Totgesagte leben länger, heißt es. Die "Beatles" gibt es als Band schon lange nicht mehr, der Mythos lebt aber dennoch weiter. Jetzt soll zum 13. November ein neues Album herauskommen - und zeitgleich die offizielle Webseite der Band mit Inhalten gefüllt sein und online gehen.

Es gibt zwar keine neuen Glanzstücke und Hitparadenstürmer auf der Platte zu hören - die Seite dagegen wartet neben den altbekannten Hits mit kaum gesendetem Archivmaterial und Videomitschnitten auf. Mit dabei wird die Aufzeichnung des fast legendären Konzerts 1969 auf dem Dach ihres Hauses in London sein. Das besondere Highlight ist aber, so die Plattenfirma EMI, eine virtuelle Tour durch die Abbey-Road-Studios. Und, dass der Fan online in die Rolle eines der "Fab Four" schlüpfen kann.

Bislang steht auf der Seite außer einer gelben Eins noch nicht viel; bis zum 13. November sollte man sich aber schon mit Shockwave oder Quicktime gerüstet haben, will man bei der spektakulären Wiederauferstehung der Beatles dabei sein!

5.4 Skihorizon - Diese Datenbank bastelt Ihnen den idealen Skiurlaub

Die Vorbereitungen auf die neue Ski-Saison laufen bei vielen auf Hochtouren. Wenn man nicht jedes Jahr ins gleiche Skigebiet fährt, kommt man nicht umhin, sich Gedanken zu machen, welcher Skiort einem das Optimum in punkto Unterkunft, Pisten und Apres Ski bieten kann. Skihorizon.com nimmt diese Entscheidung zwar nicht ab, aber zumindest wird sie erleichtert.

Geboten wird alles, was man rund ums Skifahren in den fünf Alpenländern Deutschland, Schweiz, Österreich, Italien und Frankreich wissen muss. Besonders einfach ist dabei die Suche nach dem "perfekten" Ort. Wenn man schon eine gewisse Vorstellung hat, in welches Land die Reise gehen soll, steht eine Liste mit 3519 Unterkünften in 213 Skiorten zur Auswahl.

Schwieriger wird es, wenn noch gar nichts entschieden wurde. Skihorizon bietet Ihnen die Möglichkeit, Ihre Präferenzen zu den Themen Ski (oder Snowboard), Pisten (Schwierigkeitsgrad), Kinder und Ortsbild (Bauweise und Größe) einzutragen. Ausgeworfen werden die "Top-Ten" der Skiorte, die diesen Kriterien am besten entsprechen. Zu jedem Ort stehen alle möglichen Informationen über Plus- und Minuspunkte des Skigebiets, die Wetter- und Schneeverhältnisse, die Anfahrtswege, etc.

Ein Manko gibt es aber doch: Die Angebote können nur für sieben oder 14 Tage gebucht werden. Kurzurlauber müssen sich also nach anderen Buchungsmöglichkeiten umschaun. Für Kurzentschlossene ist wohl eher die Webseite von ski-infos.de geeignet: Von einer Begrenzung ist da keine Rede. Was aber die Dominikanische Republik, Jamaika und Syrien in der Hotelliste zu suchen haben, bleibt wohl für immer das Geheimnis von ski-infos.de .

TopNews Hardware / Software

6. Mac: Der "MP3 Strip" für die Kontroll-Leiste (Beta)

Wer den Computer als Jukebox verwenden möchte, nutzt einfach das CD-ROM-Laufwerk als CD-Player oder spielt MP3-komprimierte Dateien von der Festplatte ab. Besonders für Notebooks bieten sich die MP3-Dateien an: Die CD wird überflüssig und die stromfressenden Festplattenzugriffe werden auf ein Minimum reduziert - das Power- oder iBook wird somit zum Walkman und hält über mehrere Stunden, ohne dass man Akkus oder Musik-CDs auswechseln müsste.

Bleibt die Frage nach dem richtigen MP3-Player: Der QuickTime-Player fällt aus (da keine Playlist-Funktion) und die meisten anderen Player fressen mit ihren animierten Anzeigen nur unnötig Strom. Auftritt "MP3 Strip": Dieses kleine Kontrollleisten-Modul ist ein vollwertiger MP3-Player und steht, wie alles in der Kontrollleiste, ohne Programm-Ladezeit zur Verfügung - besonders praktisch für den schnellen Zugriff, der Musik-Genuss ist also nur einen Mausklick entfernt.

Einfach einen Ordner mit MP3-Dateien auswählen und der 'MP3 Strip' legt los. Unkomplizierter geht's nicht. Und selbst für den Einsatz am stationären Mac ist das Modul bestens geeignet: Sogar an einem alten iMac düdeln die MP3-Dateien ohne Unterbrechung vor sich hin, selbst wenn dabei fleißig in den aktiven Programmen gearbeitet, zwischen ihnen gewechselt oder ein Menü heruntergeklappt wird.

Leider ist der 'MP3 Strip' derzeit nur als 30 Tage lauffähige Beta-Version erhältlich, dafür aber derzeit noch kostenlos. Das Modul läuft aber auch jetzt schon stabil und lässt keine Wünsche offen.

++ MP3 Strip - kostenlose Beta-Version:

* <http://www.softwarium.com/mp3strip.html>

TOP 

7. PC: 12Ghosts - Lassen Sie sich von diesen Geistern helfen (Shareware)

Oft sind es die einfachen und kleinen Programme, die einem Windows-Benutzer manchmal ungemein die Arbeit erleichtern. Dazu gehört auch die Programmsammlung "12Ghosts", die insgesamt 21 verschiedene Programme enthält.

Aufgeteilt ist das Programm in zwölf sogenannte Ghosts und neun Add-Ons. Zu den Geistern gehört beispielsweise das Programm "Show-Time", das Ihnen auf Ihrem Desktop ununterbrochen die Uhrzeit anzeigt. Einstellen lassen sich auch Alarmsignale (z. B. pünktlich zur Kaffeepause) oder ein Countdown z. B. bis zum Feierabend. Damit die Uhrzeit immer genau stimmt, aktualisieren Sie Ihre Systemuhr regelmäßig mit einem Timeserver im Internet. Diese Aufgabe übernimmt "Synchronize". Zum schnellen Herunterfahren Ihres Rechners koennen Sie "ShutDown" verwenden. Statt lästiger Sicherheitsabfragen, genügt hier ein einziger Mausklick.

Das sind natürlich längst nicht alle Funktionen, die die kleinen Geister übernehmen können, in der 1170 KB großen Shareware steckt noch einiges mehr.

Einen Tipp geben wir Ihnen allerdings noch: Positionieren Sie nur die Programme, die Sie wirklich benötigen in der Taskleiste, denn sonst wird das Bedienen durch die vielen verschiedenen Icons schnell unübersichtlich.

* <http://www.12ghosts.de/>

OnlineMix

8. Jack hoch drei - MailJack-Familie bietet besten Rundum-Service

ISDN und Co. ist schon was tolles. Man kann gleichzeitig surfen und telefonieren, über den freien D-Kanal kann man sich mittlerweile (ohne Onlineverbindung) über neue eMails informieren lassen (siehe nNL). Und jetzt kann man damit auch über seine Vergesslichkeit hinweg täuschen! Der Erfinder, die Münchner Firma "equinux" hat die Lösung mit den beiden kostenlosen Programmen Online- und Connect-Jack parat: Auch von unterwegs lässt sich auf den Heimrechner zugreifen.

Sobald die Programme auf dem Rechner installiert sind, kann der PC von einem beliebigen Ort aus online geschaltet werden - mit dem OnlineJack-Cockpit. Relativ einfach lassen sich Links einrichten, über die der OnlineJacker die passwort-geschützte Verbindung zum eigenen Rechner aufbauen kann, wie z. B. den Dateiaustausch und die Fernsteuerung. Der Desktop des Heimrechners baut sich dann im Webfenster auf dem Bürorechner auf, von dort aus lassen sich Dateien aufrufen und gewisse Änderungen vornehmen. Daten "saugen" geht jedoch nur über die FTP-Funktion.

Als zusätzliches Feature bieten die Münchner mit ConnectJack die Möglichkeit, aus dem eigenen Rechner einen kleinen Webserver on demand aufzustellen. Allerdings geht der Rechner erst dann online, wenn die Webseite explizit angewählt wird, die IP-Adresse wird dynamisch zugewiesen. Die Adresse ist aber immer die gleiche: <http://name.connectjack.de> . Man sollte dabei aber beachten, dass die Seiten vom heimischen Rechner nicht so schnell abrufbar sind wie "normale" Webseiten - denn immerhin muss sich das Bild erst von zuhause auf den langen Weg durchs Netz machen. Angenehm ist, dass man vorher festlegen kann, über welchen Provider sich der Rechner einwählen soll: Call-by-Call-, Flatrate- und DSL-Angebote werden unterstützt.

Fazit unseres OnlineJack-Testers: eMail-, Online- und ConnectJack sind drei sinnvolle Dienste für den Privatanwender, der via Internet von jedem Ort der Welt aus auf Dateien des heimischen PC´s zugreifen möchte. Bei ConnectJack sollte man bedenken, dass bei jedem Aufruf der heimischen Seiten Online-Gebühren fällig werden (der Rechner wählt sich jedesmal ins Internet ein), das kann schnell sehr teuer werden. Das flexibelste Angebot stellt mit Sicherheit OnlineJack dar, denn damit kann man nicht nur Dateien vom heimischen Rechner abrufen und den Rechner fernsteuern, sondern mit ein bisschen Geschick auch andere Programme aus der Ferne starten. Und das Schönste an dem Angebot: Alle Jacks sind kostenlos zu haben.

* <http://www.myjack.de/onlinejack/>

9. Der Provider-Kostentest (Das günstigste Internet-by-Call)

In letzter Zeit sieht man des öfteren doppelte Werbeanzeigen für "Planet Internet": Ein "völlig unkompliziertes und übersichtliches Preissystem" gäbe es für den Internetzugang, "keine versteckten Extrakosten", usw. - denn, was "wirklich zählt: Ideen und Inspiration". Na, neugierig geworden?

● **Genauer betrachtet: Der Provider "Planet Internet"**

Eine Kleinigkeit vermisst man jedoch in den 'Planet Internet'- Werbungen: Angaben zu den Kosten. Selbst auf der HomePage findet man sie nicht auf Anhieb.

Der Minutenpreis des "Planet Go"-Tarifs beträgt stolze 3,4 Pf., abgerechnet im Minutentakt. Nur wer den "Planet Premium"-Tarif wählt, kommt eventuell etwas günstiger weg: In den 39 DM monatlicher Grundgebühr sind 25 Freistunden enthalten, umgerechnet also im Idealfall 2,6 Pf/min. Darüber hinaus kostet jede Minute wie gehabt 3,4 Pfennig.

Leider benötigt selbst der "Planet Go"-Tarif eine Anmeldung, da per Bankeinzug bezahlt wird - entsprechende Formalitäten bei der Anmeldung sind beim "unkomplizierten" Planet Internet also inklusive.

Natürlich gibt es bei diesem Provider die üblichen Dreingaben: eMail-Adresse, HomePage; nicht gerade weltbewegend. Als einzige Besonderheit gibt es bei Planet Internet sogenannte "SubAccounts": Jeder Kunde kann vier weitere Zugangskennungen (z. B. für Familienmitglieder) einrichten - das erleichtert die Kostenkontrolle.

Nun die Beschränkungen: Eine ISDN-Kanalbündelung ist nicht möglich, und das Transfervolumen für die HomePage beträgt maximal ein Gigabyte - das soll wohl gewerblichen 'Missbrauch' verhindern. Zudem ist es verboten, den Zugang für das komplette Firmennetz zu verwenden: Es darf höchstens ein Netzwerk mit fünf Rechnern an den 'Planet Internet'-Zugang angebunden werden - aber wer sich dies mit nur einem ISDN-Kanal antäte, ist sowieso selber schuld.

Fazit: Die Marketing-Strategen von "Planet Internet" liegen absolut richtig, wenn sie meinen, viele Werbeanzeigen schalten zu müssen. Denn durch Preis oder Leistung überzeugen sie keinesfalls.

++ Planet Internet - liegt wohl irgendwo hinter'm Mond...

* <http://www.planetinternet.de>

Tipps & Tricks

12. Der Suchmaschinen-Report (31) - Paperazzi.de

Paperazzi.de ist eine Artikelsuchmaschine, die aufs Stichwort aktuelle Zeitungs- und Zeitschriftenartikel aus der deutschen und internationalen Presse sammelt. Die Suchmaschine ist im September 1999 an den Start gegangen und wird von TNF Medien aus Oberasbach (bei Nürnberg) produziert.

Bei der Suche kann man zwischen deutscher und englischer Presse auswählen sowie die Optionen Quick- oder Langzeitsuche aktivieren. Bei der Quicksuche werden nur Artikel der letzten 48 Stunden nach relevanter Anordnung aufgelistet, während man mit der Langzeitsuche eine chronologische Auflistung bis zu sechs Monate alter Nachrichten bekommt. Der Zeitraum kann dabei auf die letzte Stunde, einzelne Tage oder Wochen eingegrenzt werden.

In über 200 Publikationen inkl. Pressediensten und E-Zines wird gesucht. Als beliebteste Medien führen hier der Tagesspiegel, RP Online, die Financial Times, die Berliner Morgenpost und die Süddeutsche die Rangliste an.

Neben Fuzzy Logic und Wildcard-Suche können auch ganze Phrasen eingegeben werden, wie Zitate eines Politikers. Angezeigt werden die Treffer mit der Quelle, der Headline, dem Satz oder Absatz, der den Suchbegriff enthält, Datum und Uhrzeit des Erscheinens und sogar die Anzahl der Worte, Sätze und Anschläge. Mit Klick auf ein Symbol wird der gezeigte Artikel in einem separaten Browser-Fenster geöffnet.

Praktischer Service: Wenn man von der deutschen Suche zu der Suche in englische Medien oder umgekehrt überwechselt, wird das eingegebene Suchwort automatisch in die andere Sprache übersetzt! Für die internationale Suche gibt es eine Länderdatenbank mit Medien aus Europa, USA/Kanada, Afrika, Asien und Südamerika, deren Links aber leider zu einer Fehlermeldung führen.

Ein besonderer Service ist auch Paperazzi by Mail: Hier erhalten die Abonnenten alle 24 Stunden kostenlos eine eMail mit Links zu allen Artikeln, die in dieser Zeit zu einem gewünschten Suchbegriff erschienen sind. Wer sich also über den Wahlkampf in den USA, den Aktiengang der Deutschen Post oder einen neuen Kinofilm informieren will, erhält so viele aktuelle Quellen zum Thema aufgelistet. Inzwischen benutzen, laut Betreiber, über 17.000 User diesen Service.

Fazit: Trotz einiger toter Seiten eine wirklich gut durchdachte, eigenständige und nützliche Artikelsuchmaschine, die jedem Nachrichtenhungrigen praktisch und schnell alle relevanten News mundgerecht auf dem Tablett serviert! Unbedingt bookmarken!

13. netNewsLetter intern

In eigener Sache - netNewsLetter auf der SYSTEMS (Halle B 3 Stand 313/514)

Ab Montag ist es mal wieder soweit. Geballt werden Neuheiten aus den Bereichen Informationstechnik, Telekommunikation und Neue Medien in München auf der Systems präsentiert. Ein wahres Eldorado für unsere Redaktion! Wir werden ständig vor Ort auf der Suche nach den interessantesten News sein und so dafür sorgen, dass - tataa - Sie sich in der kommenden Woche gleich zweimal auf den netNewsLetter freuen dürfen. Am Mittwoch gibt's nämlich ein Special direkt von der Systems und am Freitag erscheint der netNewsLetter natürlich auch noch mal mit jeder Menge Fachmessen-Infos.

Selbstverständlich nutzen wir von der netNewsLetter-Redaktion die Gelegenheit und präsentieren unsere Kompetenz direkt vor Ort. Für alle unsere Fans ;-) und alle anderen Interessierten, wie z. B. Contentanbieter und Mediaplaner, bietet sich somit die Gelegenheit, uns persönlich kennenzulernen. Und wer mal sehen will, wie man einen richtig guten Newsletter macht (das sagen andere über uns!!!), ist bei uns ebenfalls gut aufgehoben. Wir jedenfalls würden uns freuen, wenn wir Sie dort treffen würden. Das netNewsLetter-Team finden Sie in Halle B3, Stand 313/514 auf dem Stand unseres Partners SpaceNet. Also, C U!!!

Top News on-line one

1. Middle East conflict - escalation also in the InterNet

As the conflict in the Near East will end, at present "Russian Roulette" play resembles one. On one day Israelis and Palestinians supply themselves most violent engagements and next again about an armistice are negotiated. On a battleground the war continues however certainly also according to all the negotiations - the InterNet. Viruses, Trojan horses, DOS (Denial OF service) - or hacker attacks replace tanks and rockets.

Both the web pages of the Israeli parliament (Knesset), the State Department and the "Israeli Defence Forces" (IDF) and those the "Palestinian national Authority" and the Hisbollah could not be called for some time no more. In addition on the Hisbollah side for some time had been go-eaten the Israeli flag. In addition besides special web pages were furnished, which it each made possible to participate in the virtual attack. Over a program on the side one could with its Browser in the 1-second pulse again and again the same URL call let automatically the the respective server to overloads.

The virtual war guidance does not only give it since the Middle East conflict: Both in the Kosovo war (nNL 21/99), the Kashmir crisis and in the conflict around Osttimor (Indonesia, since 1975) the opponents on-line fight each other. With a symposium of the Federal Information Service on Thursday of yesterday the top representatives of the German secret service granted that Germany before an InterNet war was not sufficiently prepared. With the German Federal Armed Forces a its own specialized paper was nevertheless already furnished, which is subject naturally to the highest security classification. The central coordination of all efforts takes over the Federal Ministry of the Interior. Speaker Dirk Inger cannot say to it, at present is one straight thereby "the existing forms of the threat however yet much to examine". And then only one continues to see.

But one at two of the four central junctions of the European Internets nearly without control to so long manipulate can hardly needs one a task Force...

2. Dotcon - the Top Ten frauds in the InterNet

In Germany, Australia, Ireland, New Zealand, Norway, Finland, Canada, Great Britain and the United States Verbraucherschuetzer opened themselves 251 on record cases, which were summarized under the title "DOT con" on the search made - and altogether. DOT con, the large swindle in the InterNet. In order to warn increasing customers before their own errors at least, the US-American Federal trade Commission (FTC) placed the Top Ten of the "DOT cons" in the InterNet.

Also of the portion the citizen of Berlin was consumer protection association and the donation goods test. Over 285.000 complaints the Verbraucherschuetzer reached world-wide, more than 1600 web pages was determined, which put at least the suspicion close, to offer unfair earning facilities.

Place 1 to 10 the Schwindeleien take:

1. InterNet auctions: With great offers customers are gekoedert. The payment takes place as vorauskasse and if the commodity is at all sent, then it corresponds often not to the promise.

2. special Providervertraege: When redeeming (given) a cheque over US-\$ 3.50 the customers "signed" automatically a long-term InterNet entrance contract.

3. Credit card fraud: Only to the examination of the age customers were requested to enter the credit card number on-line. The numbers were abused however for wrong accounts.
4. Modem swindle: In order to be able to regard Pornos free of charge, those should download user a "Viewer". By the program the modem however after the separation of the InterNet connection to the renewed a choice with far removes sitting Providern arranged - liable to pay the costs understands itself.
5. Web services: Those free of charge 30-Tages-Testversion of a customer web page cost nevertheless: The offerer loaded the phone bill of the customers or sent calculations, independently of the fact whether the customers accepted the test version or closed long-term contracts.
6. Guidance to become rich: The customers should earn at their own conversions and those of their recruited colleagues. Customers were however again Distributoren, not the broad public. There are profit margins none, besides is this pyramid structure illegal.
7. Travel swindler: Instead of a luxurioesen journey with many extras the customers received inferior hotels or no journey for much money.
8. Business models: The customer is to be own boss be and much money earn. In advance paid investments proved however as "a Geschaefstflop nearly classical from the window thrown" -.
9. Worthwhile investments: With a small employment the customers should obtain fast and high profits. Instead they lost however their money with the speculations.
10. Health swindle: Even serious health problems should be healed with the "mysterious" products.

In the negative list of the Germans only one enterprise is located also in a TopTen category: The aero Lloyd air passage GmbH in the travel department.

But times completely honestly: This whole Schwindeleien does not only give it since the discovery of the Internets. On the promise to make fast profits also many fall in here to the Haustuere. Healthy human understanding and something caution (e.g. regular reading netNewsLetters; -) - and the list can one confidently give oneself.

3. NaderGore.org - does the InterNet decide on presidency?

On Tuesday in the United States by America the new president (nNL 42/00) is selected. There the two most promising candidates Gore () and Bush (Rep) a head at head running supply themselves, could be the voices for the outsider Nader (the Green) the Zuenglein at the balance. Voices, which for it the InterNet could procure.

Nader must come country-wide only on 5% over in the next election campaign 2004 funds from the treasury to get - all the same in which Land of the Federal Republic. For Gore and Bush no country-wide per cent count, but only whether they win the majority in the individual Federal States.

Thus one tries to transfer the Gore voices - already today lost Federal States (e.g. Texas, Mississippi) - into those, in those a head on head running threatens (e.g. California, Washington). This transfer succeeds, as two voters agree by email to deliver in each case the voice of the other one. The voters Naders go through, because they could prevent so the conservative Bush as presidents.

As German counterpart to the American voice exchange Steffen Wenzel, editor-in-chief of politics digital sees, the borrowing voice campaign of the CDU and CSU in the era Kohl. These voices help the FDP to come over the 5 %-hurdle and cemented at the same time of Kohl position.

Since the voices in the USA not to be bought (vgl: Voteauction was forbidden already, nNL to 37/00), does not offend the voice exchange according to data of the "U.S. department OF Justice" also against the American (choice)Gesetz. Steffen Wenzel sees in this kind of the undue influencing of the electorate then also nothing despicable. And there "the schnittmenge of the people those undecided and InterNet user are, highly are", could these elections first be, not only by the InterNet affected, but to be even decided.

4. Total control... Over Windows 2000 with a small trick

There one has already an allegedly high-safe system such as Windows 2000 on his computer, each user has its personal, password-protected surface - and then this message that computer picture: With a small change in a system file it is to be possible to go around any password protection.

Andreas Eickelkamp, editor that computer picture, was made by a reader on this hole attentively and tested: Actual is it feasible, as soon as computer in DOS mode gebootet, appropriate file so to change that each password check becomes void - no matter, with which password one logs in, everyone is accepted. The foreign user became the system administrator so automatically.

Allerdings nur auf dem lokalen Rechner, auf den Netzwerkzugriff hätte das keine Auswirkungen, so Eickelkamp. Die einzige Lösung, die er parat hat, um solche unangenehmen Löcher zu stopfen, ist die mechanische: Rechner wegsperren und/oder das Diskettenlaufwerk ausbauen!

Ob die Vorgänger-Version von Windows 2000, Windows NT 4, ein ähnliches Loch aufweist, will die Redaktion noch prüfen. Mehr darüber, in allen Einzelheiten, erfahren Sie am Montag in der kommenden Ausgabe der Computerbild.

Neue / empfehlenswerte Webpages

5.1 nNL-Spezial: Mega-SMS mit 700 Zeichen ins Ausland

Mit Bekannten oder Freunden in den USA oder Australien Kontakt aufzunehmen, ist Dank Internet und eMail wie ein Kinderspiel. Daneben bieten die meisten Anbieter der kostenlosen eMail-Konten auch einen SMS-Service an. Doch leider macht der Spaß oft an deutschen Landesgrenzen (bzw. an ausländischen Netzen) halt.

Dank Internet kann man seinen Lieben aber trotzdem eine Message auf's Handy schicken, egal ob diese am Strand in Kalifornien liegen oder beim Tauchen in Australien sind.

Wir haben Ihnen eine Reihe an Websites zusammengestellt, die einen kostenlosen und z. T. weltweiten SMS-Service anbieten.

Die netNewsLetter-Empfehlung "time2bcool.com" schickt aber die SMS nicht nur ins Ausland sondern hat noch eine Spezialität: Anstatt der üblichen 160 Zeichen kann man 700 (!) Zeichen per SMS verschicken und wir haben das natürlich gleich einmal getestet. Die Nachricht kommt zwar zerlegt in bis zu sechs Teilen beim Empfänger an, doch zumindest kann man sich das lästige Eintippen der Handy-Nummer sparen!

5.2 Erstmals Live-Streaming von der ISS

Am Dienstag hat die erste Besatzung der Internationalen Space Station "ISS" die Reise angetreten. Die Reise durchs All verlief problemlos (sieht man mal von fehlenden Toiletten und keiner Heizung ab!), die drei Astronauten dockten gestern planmäßig an der ISS an - und werden nun ca. vier Monate (nach einem ausgiebigen Toilettengang) im All verbringen. Die NASA hält deshalb auf ihrer Webseite umfangreiche Informationen rund um die Mission und die Raumstation bereit.

Unangefochtenes Highlight ist wohl "Nasa-TV": Derzeit werden noch Videos von der Bodenstation und den Kontrollbildschirmen gezeigt, sobald die Sojus-Kapsel der Astronauten an der ISS andocken soll, hält Nasa-TV auch live "drauf". Sollte einem bis zum Donnerstag aber langweilig werden, hält die Nasa im Videoarchiv z. B. auch den vergangenen Start und die glückliche Landung der STS 92 bereit. Wer aber nicht alte Flüge ansehen will und statt dessen das neue Umfeld der Astronauten vor ihnen erkunden will, kann virtuell durch die ISS wandern. Oder via VRML (virtual reality markup language) einzelne Punkte der Raumstation selbst erkunden. Wer das nicht alleine tun will, kann sich von einem ISS-Roboter begleiten lassen. "MC" zeigt in einem kurzen Überflug die Geschichte der Idee einer Raumstation und erklärt, warum eine Raumstation überhaupt gebraucht wird. Zu guter letzt stehen zudem Wetterinformationen zur Verfügung, werden die Flugroute der Fähre und Raumstation angeboten oder Links zu den SkyWatch-Seiten: Hier findet der Hobby-Astronaut Ort und Zeitpunkt, wo er die Raumfähre ISS oder das Space Shuttle am besten erkennen kann.

Allerdings sollte man dann gut im Lesen und Interpretieren von Tabellen sein. Oder doch wieder auf Nasa-TV "umschalten"...

5.3 Rechtzeitig zum Comeback - Die offizielle Beatles-Homepage

Totgesagte leben länger, heißt es. Die "Beatles" gibt es als Band schon lange nicht mehr, der Mythos lebt aber dennoch weiter. Jetzt soll zum 13. November ein neues Album herauskommen - und zeitgleich die offizielle Webseite der Band mit Inhalten gefüllt sein und online gehen.

Es gibt zwar keine neuen Glanzstücke und Hitparadenstürmer auf der Platte zu hören - die Seite dagegen wartet neben den altbekannten Hits mit kaum gesendetem Archivmaterial und Videomitschnitten auf. Mit dabei wird die Aufzeichnung des fast legendären Konzerts 1969 auf dem Dach ihres Hauses in London sein. Das besondere Highlight ist aber, so die Plattenfirma EMI, eine virtuelle Tour durch die Abbey-Road-Studios. Und, dass der Fan online in die Rolle eines der "Fab Four" schlüpfen kann.

Bislang steht auf der Seite außer einer gelben Eins noch nicht viel; bis zum 13. November sollte man sich aber schon mit Shockwave oder Quicktime gerüstet haben, will man bei der spektakulären Wiederauferstehung der Beatles dabei sein!

* <http://www.thebeatles.com/>

TOP 

5.4 Skihorizon - Diese Datenbank bastelt Ihnen den idealen Skiurlaub

Die Vorbereitungen auf die neue Ski-Saison laufen bei vielen auf Hochtouren. Wenn man nicht jedes Jahr ins gleiche Skigebiet fährt, kommt man nicht umhin, sich Gedanken zu machen, welcher Skiort einem das Optimum in punkto Unterkunft, Pisten und Apres Ski bieten kann. Skihorizon.com nimmt diese Entscheidung zwar nicht ab, aber zumindest wird sie erleichtert.

Geboten wird alles, was man rund ums Skifahren in den fünf Alpenländern Deutschland, Schweiz, Österreich, Italien und Frankreich wissen muss. Besonders einfach ist dabei die Suche nach dem "perfekten" Ort. Wenn man schon eine gewisse Vorstellung hat, in welches Land die Reise gehen soll, steht eine Liste mit 3519 Unterkünften in 213 Skiorten zur Auswahl.

Schwieriger wird es, wenn noch gar nichts entschieden wurde. Skihorizon bietet Ihnen die Möglichkeit, Ihre Präferenzen zu den Themen Ski (oder Snowboard), Pisten (Schwierigkeitsgrad), Kinder und Ortsbild (Bauweise und Größe) einzutragen. Ausgeworfen werden die "Top-Ten" der Skiorte, die diesen Kriterien am besten entsprechen. Zu jedem Ort stehen alle möglichen Informationen über Plus- und Minuspunkte des Skigebiets, die Wetter- und Schneeverhältnisse, die Anfahrtswege, etc.

Ein Manko gibt es aber doch: Die Angebote können nur für sieben oder 14 Tage gebucht werden. Kurzurlauber müssen sich also nach anderen Buchungsmöglichkeiten umschauen. Für Kurzentschlossene ist wohl eher die Webseite von ski-infos.de geeignet: Von einer Begrenzung ist da keine Rede. Was aber die Dominikanische Republik, Jamaika und Syrien in der Hotelliste zu suchen haben, bleibt wohl für immer das Geheimnis von ski-infos.de .

6. Mac: Der "MP3 Strip" für die Kontroll-Leiste (Beta)

Wer den Computer als Jukebox verwenden möchte, nutzt einfach das CD-ROM-Laufwerk als CD-Player oder spielt MP3-komprimierte Dateien von der Festplatte ab. Besonders für Notebooks bieten sich die MP3-Dateien an: Die CD wird überflüssig und die stromfressenden Festplattenzugriffe werden auf ein Minimum reduziert - das Power- oder iBook wird somit zum Walkman und hält über mehrere Stunden, ohne dass man Akkus oder Musik-CDs auswechseln müsste.

Bleibt die Frage nach dem richtigen MP3-Player: Der QuickTime-Player fällt aus (da keine Playlist-Funktion) und die meisten anderen Player fressen mit ihren animierten Anzeigen nur unnötig Strom. Auftritt "MP3 Strip": Dieses kleine Kontrollleisten-Modul ist ein vollwertiger MP3-Player und steht, wie alles in der Kontrollleiste, ohne Programm-Ladezeit zur Verfügung - besonders praktisch für den schnellen Zugriff, der Musik-Genuss ist also nur einen Mausklick entfernt.

Einfach einen Ordner mit MP3-Dateien auswählen und der "MP3 Strip" legt los. Unkomplizierter geht's nicht. Und selbst für den Einsatz am stationären Mac ist das Modul bestens geeignet: Sogar an einem alten iMac düdeln die MP3-Dateien ohne Unterbrechung vor sich hin, selbst wenn dabei fleißig in den aktiven Programmen gearbeitet, zwischen ihnen gewechselt oder ein Menü heruntergeklappt wird.

Leider ist der 'MP3 Strip' derzeit nur als 30 Tage lauffähige Beta-Version erhältlich, dafür aber derzeit noch kostenlos. Das Modul läuft aber auch jetzt schon stabil und lässt keine Wünsche offen.

++ MP3 Strip - kostenlose Beta-Version:

* <http://www.softwarium.com/mp3strip.html>

7. PC: 12Ghosts - Lassen Sie sich von diesen Geistern helfen (Shareware)

Oft sind es die einfachen und kleinen Programme, die einem Windows-Benutzer manchmal ungemein die Arbeit erleichtern. Dazu gehört auch die Programmsammlung "12Ghosts", die insgesamt 21 verschiedene Programme enthält.

Aufgeteilt ist das Programm in zwölf sogenannte Ghosts und neun Add-Ons. Zu den Geistern gehört beispielsweise das Programm "Show-Time", das Ihnen auf Ihrem Desktop ununterbrochen die Uhrzeit anzeigt. Einstellen lassen sich auch Alarmsignale (z. B. pünktlich zur Kaffeepause) oder ein Countdown z. B. bis zum Feierabend. Damit die Uhrzeit immer genau stimmt, aktualisieren Sie Ihre Systemuhr regelmäßig mit einem Timeserver im Internet. Diese Aufgabe übernimmt "Synchronize". Zum schnellen Herunterfahren Ihres Rechners koennen Sie "ShutDown" verwenden. Statt lästiger Sicherheitsabfragen, genügt hier ein einziger Mausklick.

Das sind natürlich längst nicht alle Funktionen, die die kleinen Geister übernehmen können, in der 1170 KB großen Shareware steckt noch einiges mehr.

Einen Tipp geben wir Ihnen allerdings noch: Positionieren Sie nur die Programme, die Sie wirklich benötigen in der Taskleiste, denn sonst wird das Bedienen durch die vielen verschiedenen Icons schnell unübersichtlich.

* <http://www.12ghosts.de/>

OnlineMix

8. Jack hoch drei - MailJack-Familie bietet besten Rundum-Service

ISDN und Co. ist schon was tolles. Man kann gleichzeitig surfen und telefonieren, über den freien D-Kanal kann man sich mittlerweile (ohne Onlineverbindung) über neue eMails informieren lassen (siehe nNL). Und jetzt kann man damit auch über seine Vergesslichkeit hinweg täuschen! Der Erfinder, die Münchner Firma "equinux" hat die Lösung mit den beiden kostenlosen Programmen Online- und Connect-Jack parat: Auch von unterwegs lässt sich auf den Heimrechner zugreifen.

Sobald die Programme auf dem Rechner installiert sind, kann der PC von einem beliebigen Ort aus online geschaltet werden - mit dem OnlineJack-Cockpit. Relativ einfach lassen sich Links einrichten, über die der OnlineJacker die passwort-geschützte Verbindung zum eigenen Rechner aufbauen kann, wie z. B. den Dateiaustausch und die Fernsteuerung. Der Desktop des Heimrechners baut sich dann im Webfenster auf dem Bürorechner auf, von dort aus lassen sich Dateien aufrufen und gewisse Änderungen vornehmen. Daten "saugen" geht jedoch nur über die FTP-Funktion.

Als zusätzliches Feature bieten die Münchner mit ConnectJack die Möglichkeit, aus dem eigenen Rechner einen kleinen Webserver on demand aufzustellen. Allerdings geht der Rechner erst dann online, wenn die Webseite explizit angewählt wird, die IP-Adresse wird dynamisch zugewiesen. Die Adresse ist aber immer die gleiche: <http://name.connectjack.de> . Man sollte dabei aber beachten, dass die Seiten vom heimischen Rechner nicht so schnell abrufbar sind wie "normale" Webseiten - denn immerhin muss sich das Bild erst von zuhause auf den langen Weg durchs Netz machen. Angenehm ist, dass man vorher festlegen kann, über welchen Provider sich der Rechner einwählen soll: Call-by-Call-, Flatrate- und DSL-Angebote werden unterstützt.

Fazit unseres OnlineJack-Testers: eMail-, Online- und ConnectJack sind drei sinnvolle Dienste für den Privatanwender, der via Internet von jedem Ort der Welt aus auf Dateien des heimischen PC's zugreifen möchte. Bei ConnectJack sollte man bedenken, dass bei jedem Aufruf der heimischen Seiten Online-Gebühren fällig werden (der Rechner wählt sich jedesmal ins Internet ein), das kann schnell sehr teuer werden. Das flexibelste Angebot stellt mit Sicherheit OnlineJack dar, denn damit kann man nicht nur Dateien vom heimischen Rechner abrufen und den Rechner fernsteuern, sondern mit ein bisschen Geschick auch andere Programme aus der Ferne starten. Und das Schönste an dem Angebot: Alle Jacks sind kostenlos zu haben.

* <http://www.myjack.de/onlinejack/>

TOP 

9. Der Provider-Kostentest (Das günstigste Internet-by-Call)

In letzter Zeit sieht man des öfteren doppelte Werbeanzeigen für "Planet Internet": Ein "völlig unkompliziertes und übersichtliches Preissystem" gäbe es für den Internetzugang, "keine versteckten Extrakosten", usw. - denn, was "wirklich zählt: Ideen und Inspiration". Na, neugierig geworden?

• Genauer betrachtet: Der Provider "Planet Internet"

Eine Kleinigkeit vermisst man jedoch in den 'Planet Internet'-Werbungen: Angaben zu den Kosten. Selbst auf der HomePage findet man sie nicht auf Anhieb.

Der Minutenpreis des "Planet Go"-Tarifs beträgt stolze 3,4 Pf., abgerechnet im Minutentakt. Nur wer den "Planet Premium"-Tarif wählt, kommt eventuell etwas günstiger weg: In den 39 DM monatlicher Grundgebühr sind 25 Freistunden enthalten, umgerechnet also im Idealfall 2,6 Pf/min. Darüber hinaus kostet jede Minute wie gehabt 3,4 Pfennig.

Leider benötigt selbst der "Planet Go"-Tarif eine Anmeldung, da per Bankeinzug bezahlt wird - entsprechende Formalitäten bei der Anmeldung sind beim "unkomplizierten" Planet Internet also inklusive.

Natürlich gibt es bei diesem Provider die üblichen Dreingaben: eMail-Adresse, HomePage; nicht gerade weltbewegend. Als einzige Besonderheit gibt es bei Planet Internet sogenannte "SubAccounts": Jeder Kunde kann vier weitere Zugangskennungen (z. B. für Familienmitglieder) einrichten - das erleichtert die Kostenkontrolle.

Nun die Beschränkungen: Eine ISDN-Kanalbündelung ist nicht möglich, und das Transfervolumen für die HomePage beträgt maximal ein Gigabyte - das soll wohl gewerblichen 'Missbrauch' verhindern. Zudem ist es verboten, den Zugang für das komplette Firmennetz zu verwenden: Es darf höchstens ein Netzwerk mit fünf Rechnern an den 'Planet Internet'-Zugang angebunden werden - aber wer sich dies mit nur einem ISDN-Kanal antäte, ist sowieso selber schuld.

Fazit: Die Marketing-Strategen von "Planet Internet" liegen absolut richtig, wenn sie meinen, viele Werbeanzeigen schalten zu müssen. Denn durch Preis oder Leistung überzeugen sie keinesfalls.

++ Planet Internet - liegt wohl irgendwo hinter'm Mond...

Veranstaltungen

10.1 SYSTEMS 2000 in München

Die 19. internationale Fachmesse für Informationstechnologie, Telekommunikation und Neue Medien kann erneut mit Rekordmarken aufwarten, über 3000 Aussteller sollen sich in diesem Jahr auf dem Neuen Messegelände in München einfinden. Mehr Platz denn je steht den Veranstaltern zur Verfügung, Sonderaktionen wie der Linux Park, das Mobile Solutions Forum oder das Software Solution Center finden natürlich auch wieder statt. Parallel zur Systems laufen erneut die "Medientage München", die Neuen Medien werden auch hier ergänzend eine große Rolle einnehmen.

- + Datum: 6. - 11. November 2000
- + Ort: Neue Messe München
- + Kosten: Tageskarte DM 52,- (ermäßigt DM 37,-)
- + Veranstalter: Messe München GmbH
- + Telefon: 01805 - 23 56 573
- + E-Mail: info@systems.de

10.2 Stream-Tipp der Woche: Lara-Croft-Dreh live

Blairwitch hat es vorgemacht, wie aus einem Lowbudget-Film ein Kassenschlager gemacht werden kann: Über das Internet. Bei den Machern von Lara Croft hat sich die Tatsache auch schon herumgesprochen - die Zielgruppe ist nun mal computer- und internetaffin. Also nichts leichter als das - man zieht ein Tomb Raider-Webevent auf: Ab dem 9. November kann jeder live und ganz offiziell die Dreharbeiten in den Londoner Pinewood Studios mitverfolgen.

++ Ab 9. November, 20.30 Uhr in den Pinewood-Studios

* <http://www.tombraidermovie.com/events/index.html>

Lexikon der PC- und Online-Fachbegriffe

11. Liquid Audio

Im Zusammenhang mit MP3 und anderen Musikdatei-Formaten fällt immer wieder der Begriff Liquid Audio. Das ist eine Software zum Kodieren und Verbreiten von Musik übers Internet. Die gleichnamige Firma wurde 1996 von einem Tontechniker der Rockgruppe Grateful Dead gegründet und achtet auf den Copyright-Schutz: Anders als MP3-Dateien kann Liquid-Audio-Musik nicht beliebig oft kopiert werden. Ihre Klangqualität gilt als der von MP3 überlegen.

12. Der Suchmaschinen-Report (31) - Paperazzi.de

Paperazzi.de ist eine Artikelsuchmaschine, die aufs Stichwort aktuelle Zeitungs- und Zeitschriftenartikel aus der deutschen und internationalen Presse sammelt. Die Suchmaschine ist im September 1999 an den Start gegangen und wird von TNF Medien aus Oberasbach (bei Nürnberg) produziert.

Bei der Suche kann man zwischen deutscher und englischer Presse auswählen sowie die Optionen Quick- oder Langzeitsuche aktivieren. Bei der Quicksuche werden nur Artikel der letzten 48 Stunden nach relevanter Anordnung aufgelistet, während man mit der Langzeitsuche eine chronologische Auflistung bis zu sechs Monate alter Nachrichten bekommt. Der Zeitraum kann dabei auf die letzte Stunde, einzelne Tage oder Wochen eingegrenzt werden.

In über 200 Publikationen inkl. Pressediensten und E-Zines wird gesucht. Als beliebteste Medien führen hier der Tagesspiegel, RP Online, die Financial Times, die Berliner Morgenpost und die Süddeutsche die Rangliste an.

Neben Fuzzy Logic und Wildcard-Suche können auch ganze Phrasen eingegeben werden, wie Zitate eines Politikers. Angezeigt werden die Treffer mit der Quelle, der Headline, dem Satz oder Absatz, der den Suchbegriff enthält, Datum und Uhrzeit des Erscheinens und sogar die Anzahl der Worte, Sätze und Anschläge. Mit Klick auf ein Symbol wird der gezeigte Artikel in einem separaten Browser-Fenster geöffnet.

Praktischer Service: Wenn man von der deutschen Suche zu der Suche in englische Medien oder umgekehrt überwechselt, wird das eingegebene Suchwort automatisch in die andere Sprache übersetzt! Für die internationale Suche gibt es eine Länderdatenbank mit Medien aus Europa, USA/Kanada, Afrika, Asien und Südamerika, deren Links aber leider zu einer Fehlermeldung führen.

Ein besonderer Service ist auch Paperazzi by Mail: Hier erhalten die Abonnenten alle 24 Stunden kostenlos eine eMail mit Links zu allen Artikeln, die in dieser Zeit zu einem gewünschten Suchbegriff erschienen sind. Wer sich also über den Wahlkampf in den USA, den Aktiengang der Deutschen Post oder einen neuen Kinofilm informieren will, erhält so viele aktuelle Quellen zum Thema aufgelistet. Inzwischen benutzen, laut Betreiber, über 17.000 User diesen Service.

Fazit: Trotz einiger toter Seiten eine wirklich gut durchdachte, eigenständige und nützliche Artikelsuchmaschine, die jedem Nachrichtenhungrigen praktisch und schnell alle relevanten News mundgerecht auf dem Tablett serviert! Unbedingt bookmarken!

13. netNewsLetter intern

In eigener Sache - netNewsLetter auf der SYSTEMS (Halle B 3 Stand 313/514)

Ab Montag ist es mal wieder soweit. Geballt werden Neuheiten aus den Bereichen Informationstechnik, Telekommunikation und Neue Medien in München auf der Systems präsentiert. Ein wahres Eldorado für unsere Redaktion! Wir werden ständig vor Ort auf der Suche nach den interessantesten News sein und so dafür sorgen, dass - tataa - Sie sich in der kommenden Woche gleich zweimal auf den netNewsLetter freuen dürfen. Am Mittwoch gibt's nämlich ein Special direkt von der Systems und am Freitag erscheint der netNewsLetter natürlich auch noch mal mit jeder Menge Fachmessen-Infos.

Selbstverständlich nutzen wir von der netNewsLetter-Redaktion die Gelegenheit und präsentieren unsere Kompetenz direkt vor Ort. Für alle unsere Fans ;-) und alle anderen Interessierten, wie z. B. Contentanbieter und Mediaplaner, bietet sich somit die Gelegenheit, uns persönlich kennenzulernen. Und wer mal sehen will, wie man einen richtig guten Newsletter macht (das sagen andere über uns!!!), ist bei uns ebenfalls gut aufgehoben. Wir jedenfalls würden uns freuen, wenn wir Sie dort treffen würden. Das netNewsLetter-Team finden Sie in Halle B3, Stand 313/514 auf dem Stand unseres Partners SpaceNet. Also, C U!!!

Top News Online

1. Nahost-Konflikt - Eskalation auch im Internet

Wie der Konflikt im Nahen Osten enden wird, gleicht zur Zeit einem "Russisch Roulette"-Spiel. An einem Tag liefern sich Israelis und Palästinenser heftigste Gefechte und am nächsten wird wieder über einen Waffenstillstand verhandelt. Auf einem Schlachtfeld geht der Krieg aber bestimmt auch nach all den Verhandlungen weiter - dem Internet. Viren, Trojanische Pferde, DoS (Denial of Service)- oder Hacker-Attacken ersetzen Panzer und Raketen.

Sowohl die Webseiten des israelischen Parlaments (Knesset), des Außenministeriums und der "Israeli Defence Forces" (IDF) als auch die der "Palestinian National Authority" und der Hisbollah konnten für einige Zeit nicht mehr aufgerufen werden. Auf der Hisbollah-Seite war außerdem für einige Zeit die israelische Flagge gehisst worden.

Dazu wurden zudem spezielle Webseiten eingerichtet, die es jedem ermöglichten, an der virtuellen Attacke teilzunehmen. Über ein Programm auf der Seite konnte man mit seinem Browser im Sekundentakt immer wieder dieselbe URL automatisch aufrufen lassen um so den jeweiligen Server zu überlasten.

Die virtuelle Kriegsführung gibt es nicht erst seit dem Nahost-Konflikt: Sowohl im Kosovo-Krieg (nNL 21/99), der Kaschmir-Krise als auch im Konflikt um Osttimor (Indonesien, seit 1975) bekämpfen sich die Gegner online. Bei einem Symposium des Bundesnachrichtendienstes am gestrigen Donnerstag räumten die Spitzenvertreter des deutschen Geheimdienstes ein, dass Deutschland vor einem Internetkrieg nicht ausreichend gewappnet sei. Bei der Bundeswehr wurde immerhin schon ein eigenes Fachreferat eingerichtet, das natürlich der höchsten Geheimhaltungsstufe unterliegt. Die zentrale Koordinierung aller Anstrengungen übernimmt das Bundesinnenministerium. Sprecher Dirk Inger kann allerdings noch nicht viel dazu sagen, derzeit ist man gerade dabei "die vorhandenen Formen der Bedrohung zu prüfen". Und dann erst sieht man weiter.

Aber solange man an zwei der vier zentralen Knotenpunkte des europäischen Internets fast ohne Kontrolle manipulieren kann braucht man kaum eine Task Force...

2. Dotcon - Die Top Ten-Betrügereien im Internet

In Deutschland, Australien, Irland, Neuseeland, Norwegen, Finnland, Kanada, Großbritannien und den Vereinigten Staaten haben sich Verbraucherschützer auf die Suche gemacht - und insgesamt 251 aktenkundige Fälle aufgetan, die unter dem Titel "dot con" zusammengefasst wurden. Dot con, der große Schwindel im Internet. Um die wachsende Kundschaft vor ihren eigenen Fehlern zumindest zu warnen, stellte die US-amerikanische Federal Trade Commission (FTC) die Top Ten der "dot cons" ins Internet.

Mit von der Partie waren der Berliner Verbraucherschutzverein und die Stiftung Warentest. Über 285.000 Beschwerden erreichten die Verbraucherschützer weltweit, mehr als 1600 Webseiten wurden ermittelt, die zumindest den Verdacht nahe legen, unlautere Verdienstmöglichkeiten anzubieten.

Platz 1 bis 10 der Schwindeleien nehmen ein:

1. Internet Auktionen: Mit großartigen Angeboten werden Kunden geködert. Die Bezahlung erfolgt als Vorkasse und wenn die Ware überhaupt geschickt wird, dann entspricht sie oft nicht dem Versprochenen.
2. spezielle Providerverträge: Beim Einlösen eines (geschenkten) Schecks über US-\$ 3,50 "unterschieden" die Kunden automatisch einen langfristigen Internet-Zugangs-Vertrag.
3. Kreditkartenbetrug: Nur zur Prüfung des Alters wurden Kunden aufgefordert, die Kreditkartennummer online einzugeben. Die Nummern wurden aber für falsche Abrechnungen missbraucht.
4. Modemschwindel: Um Pornos kostenlos ansehen zu können, sollten die User einen "Viewer" herunterladen. Durch das Programm wurde das Modem aber nach dem Trennen der Internetverbindung zur erneuten Einwahl bei weit entfernt sitzenden Providern veranlasst - kostenpflichtig versteht sich.
5. Webdienste: Die gratis 30-Tages-Testversion einer Kundenwebseite kostete dennoch: Der Anbieter belastete die Telefonrechnung der Kunden oder schickte Rechnungen, unabhängig davon, ob die Kunden die Testversion akzeptierten oder längerfristige Verträge schlossen.
6. Anleitung, reich zu werden: Die Kunden sollten an ihren eigenen Umsätzen und derer ihrer geworbenen Kollegen verdienen. Die Kundschaft waren aber wiederum Distributoren, nicht die breite Öffentlichkeit. Gewinnspannen gibt es keine, zudem ist diese Pyramidenstruktur illegal.
7. Reiseschwindler: Statt einer luxuriösen Reise mit vielen Extras bekamen die Kunden für viel Geld minderwertige Hotels oder gar keine Reise.
8. Geschäftsmodelle: Der Kunde solle sein eigener Chef sein und viel Geld verdienen. Die im Voraus gezahlten Investitionen erwiesen sich aber als "aus dem Fenster geworfen" - ein fast klassischer Geschäftsflop.
9. Lohnende Investitionen: Mit einem geringen Einsatz sollten die Kunden schnelle und hohe Gewinne erzielen. Statt dessen verloren sie aber ihr Geld mit den Spekulationen.
10. Gesundheitsschwindel: Selbst schwerwiegende gesundheitliche Probleme sollten mit den "geheimnisvollen" Produkten geheilt werden.

In der Negativ-Liste der Deutschen steht nur ein Unternehmen auch in einer TopTen-Kategorie: Die Aero Lloyd Flugreisen GmbH in der Reiseabteilung.

Aber mal ganz ehrlich: Diese ganzen Schwindeleien gibt es nicht erst seit der Entdeckung des Internets. Auf das Versprechen, schnelle Gewinne zu machen, fallen auch viele an der Haustüre herein. Gesunder Menschenverstand und etwas Vorsicht (z. B. regelmäßiges Lesen des netNewsLetters ;-)) - und die Liste kann man sich getrost schenken.

3. NaderGore.org - Entscheidet das Internet über Präsidentschaft?

Am Dienstag wird in den Vereinigten Staaten von Amerika der neue Präsident (nNL 42/00) gewählt. Da die beiden aussichtsreichsten Kandidaten Gore (Dem) und Bush (Rep) sich ein Kopf an Kopf-Rennen liefern, könnten die Stimmen für den Außenseiter Nader (Grüne) das Zünglein an der Waage sein. Stimmen, die ihm das Internet beschaffen könnte.

Nader muss landesweit nur auf 5% kommen um im nächsten Wahlkampf 2004 Geldmittel aus der Staatskasse zu bekommen - egal in welchem Bundesland. Für Gore und Bush zählen keine landesweiten Prozente, sondern nur ob sie die Mehrheit in den einzelnen Bundesstaaten gewinnen.

Also versucht man die Gore-Stimmen der - schon heute verlorenen Bundesstaaten (z.B. Texas, Mississippi) - in diejenigen zu transferieren, in denen ein Kopf-an-Kopf Rennen droht (z.B. Kalifornien, Washington). Dieser Transfer gelingt, indem zwei Wähler per eMail vereinbaren, jeweils die Stimme des anderen abzugeben. Die Wähler Naders machen mit, weil sie so den konservativen Bush als Präsidenten verhindern könnten.

Als deutsches Pendant zu dem amerikanischen Stimmentausch sieht Steffen Wenzel, Chefredakteur von politik-digital, die Leihstimmenkampagne der CDU und CSU in der Ära Kohl. Diese Stimmen verhalfen der FDP, über die 5 %-Hürde zu kommen, und zementierten gleichzeitig Kohls Position.

Da die Stimmen in den USA nicht gekauft werden (vgl: **Voteauction** wurde bereits verboten, nNL 37/00), verstößt der Stimmentausch nach Angaben des "U.S. Department of Justice" auch nicht gegen das amerikanische (Wahl-)Gesetz. Steffen Wenzel sieht in dieser Art der Wahlbeeinflussung dann auch nichts Verwerfliches. Und da "die Schnittmenge der Leute die unentschieden und Internet-User sind, hoch ist", könnten diese Wahlen die ersten sein, die nicht nur durch das Internet beeinflusst, sondern sogar entschieden werden.

4. Totale Kontrolle... Über Windows 2000 mit einem kleinen Trick

Da hat man schon ein angeblich hochsicheres System wie Windows 2000 auf seinem Rechner, jeder Benutzer hat seine persönliche, passwortgeschützte Oberfläche - und dann diese Meldung der Computerbild: Mit einer geringen Veränderung in einer Systemdatei soll es möglich sein, jeglichen Passwortschutz zu umgehen.

Andreas Eickelkamp, Redakteur der Computerbild, wurde durch einen Leser auf dieses Loch aufmerksam gemacht und prüfte nach: Tatsächlich sei es machbar, sobald der Rechner im DOS-Modus gebootet wird, die entsprechende Datei so zu verändern, dass jede Passwortprüfung hinfällig wird - egal, mit welchem Passwort man sich einloggt, jedes wird akzeptiert. Der Fremduser wuerde so automatisch zum Systemadministrator.

Allerdings nur auf dem lokalen Rechner, auf den Netzwerkzugriff hätte das keine Auswirkungen, so Eickelkamp. Die einzige Lösung, die er parat hat, um solche unangenehmen Löcher zu stopfen, ist die mechanische: Rechner wegsperren und/oder das Diskettenlaufwerk ausbauen!

Ob die Vorgänger-Version von Windows 2000, Windows NT 4, ein ähnliches Loch aufweist, will die Redaktion noch prüfen. Mehr darüber, in allen Einzelheiten, erfahren Sie am Montag in der kommenden Ausgabe der Computerbild.

5.1 nNL-Spezial: Mega-SMS mit 700 Zeichen ins Ausland

Mit Bekannten oder Freunden in den USA oder Australien Kontakt aufzunehmen, ist Dank Internet und eMail wie ein Kinderspiel. Daneben bieten die meisten Anbieter der kostenlosen eMail-Konten auch einen SMS-Service an. Doch leider macht der Spaß oft an deutschen Landesgrenzen (bzw. an ausländischen Netzen) halt.

Dank Internet kann man seinen Lieben aber trotzdem eine Message auf's Handy schicken, egal ob diese am Strand in Kalifornien liegen oder beim Tauchen in Australien sind.

Wir haben Ihnen eine Reihe an Websites zusammengestellt, die einen kostenlosen und z. T. weltweiten SMS-Service anbieten.

Die netNewsLetter-Empfehlung "time2bcool.com" schickt aber die SMS nicht nur ins Ausland sondern hat noch eine Spezialität: Anstatt der üblichen 160 Zeichen kann man 700 (!) Zeichen per SMS verschicken und wir haben das natürlich gleich einmal getestet. Die Nachricht kommt zwar zerlegt in bis zu sechs Teilen beim Empfänger an, doch zumindest kann man sich das lästige Eintippen der Handy-Nummer sparen!

5.2 Erstmals Live-Streaming von der ISS

Am Dienstag hat die erste Besatzung der Internationalen Space Station "ISS" die Reise angetreten. Die Reise durchs All verlief problemlos (sieht man mal von fehlenden Toiletten und keiner Heizung ab!), die drei Astronauten dockten gestern planmäßig an der ISS an - und werden nun ca. vier Monate (nach einem ausgiebigen Toilettengang) im All verbringen. Die NASA hält deshalb auf ihrer Webseite umfangreiche Informationen rund um die Mission und die Raumstation bereit.

Unangefochtenes Highlight ist wohl "Nasa-TV": Derzeit werden noch Videos von der Bodenstation und den Kontrollbildschirmen gezeigt, sobald die Sojus-Kapsel der Astronauten an der ISS andocken soll, hält Nasa-TV auch live "drauf". Sollte einem bis zum Donnerstag aber langweilig werden, hält die Nasa im Videoarchiv z. B. auch den vergangenen Start und die glückliche Landung der STS 92 bereit.

Wer aber nicht alte Flüge ansehen will und statt dessen das neue Umfeld der Astronauten vor ihnen erkunden will, kann virtuell durch die ISS wandern. Oder via VRML (virtual reality markup language) einzelne Punkte der Raumstation selbst erkunden. Wer das nicht alleine tun will, kann sich von einem ISS-Roboter begleiten lassen. "MC" zeigt in einem kurzen Überflug die Geschichte der Idee einer Raumstation und erklärt, warum eine Raumstation überhaupt gebraucht wird.

Zu guter letzt stehen zudem Wetterinformationen zur Verfügung, werden die Flugroute der Fähre und Raumstation angeboten oder Links zu den SkyWatch-Seiten: Hier findet der Hobby-Astronaut Ort und Zeitpunkt, wo er die Raumfähre ISS oder das Space Shuttle am besten erkennen kann.

Allerdings sollte man dann gut im Lesen und Interpretieren von Tabellen sein. Oder doch wieder auf Nasa-TV "umschalten"...

5.3 Rechtzeitig zum Comeback - Die offizielle Beatles-Homepage

Totgesagte leben länger, heißt es. Die "Beatles" gibt es als Band schon lange nicht mehr, der Mythos lebt aber dennoch weiter. Jetzt soll zum 13. November ein neues Album herauskommen - und zeitgleich die offizielle Webseite der Band mit Inhalten gefüllt sein und online gehen.

Es gibt zwar keine neuen Glanzstücke und Hitparadenstürmer auf der Platte zu hören - die Seite dagegen wartet neben den altbekannten Hits mit kaum gesendetem Archivmaterial und Videomitschnitten auf. Mit dabei wird die Aufzeichnung des fast legendären Konzerts 1969 auf dem Dach ihres Hauses in London sein. Das besondere Highlight ist aber, so die Plattenfirma EMI, eine virtuelle Tour durch die Abbey-Road-Studios. Und, dass der Fan online in die Rolle eines der "Fab Four" schlüpfen kann.

Bislang steht auf der Seite außer einer gelben Eins noch nicht viel; bis zum 13. November sollte man sich aber schon mit Shockwave oder Quicktime gerüstet haben, will man bei der spektakulären Wiederauferstehung der Beatles dabei sein!

* <http://www.thebeatles.com/>

TOP 

5.4 Skihorizon - Diese Datenbank bastelt Ihnen den idealen Skiurlaub

Die Vorbereitungen auf die neue Ski-Saison laufen bei vielen auf Hochtouren. Wenn man nicht jedes Jahr ins gleiche Skigebiet fährt, kommt man nicht umhin, sich Gedanken zu machen, welcher Skiort einem das Optimum in punkto Unterkunft, Pisten und Apres Ski bieten kann. Skihorizon.com nimmt diese Entscheidung zwar nicht ab, aber zumindest wird sie erleichtert.

Geboten wird alles, was man rund ums Skifahren in den fünf Alpenländern Deutschland, Schweiz, Österreich, Italien und Frankreich wissen muss. Besonders einfach ist dabei die Suche nach dem "perfekten" Ort. Wenn man schon eine gewisse Vorstellung hat, in welches Land die Reise gehen soll, steht eine Liste mit 3519 Unterkünften in 213 Skiorten zur Auswahl.

Schwieriger wird es, wenn noch gar nichts entschieden wurde. Skihorizon bietet Ihnen die Möglichkeit, Ihre Präferenzen zu den Themen Ski (oder Snowboard), Pisten (Schwierigkeitsgrad), Kinder und Ortsbild (Bauweise und Größe) einzutragen. Ausgeworfen werden die "Top-Ten" der Skiorte, die diesen Kriterien am besten entsprechen. Zu jedem Ort stehen alle möglichen Informationen über Plus- und Minuspunkte des Skigebiets, die Wetter- und Schneeverhältnisse, die Anfahrtswege, etc.

Ein Manko gibt es aber doch: Die Angebote können nur für sieben oder 14 Tage gebucht werden. Kurzurlauber müssen sich also nach anderen Buchungsmöglichkeiten umschauen. Für Kurzentschlossene ist wohl eher die Webseite von ski-infos.de geeignet: Von einer Begrenzung ist da keine Rede. Was aber die Dominikanische Republik, Jamaika und Syrien in der Hotelliste zu suchen haben, bleibt wohl für immer das Geheimnis von ski-infos.de .

TopNews Hardware / Software

6. Mac: Der "MP3 Strip" für die Kontroll-Leiste (Beta)

Wer den Computer als Jukebox verwenden möchte, nutzt einfach das CD-ROM-Laufwerk als CD-Player oder spielt MP3-komprimierte Dateien von der Festplatte ab. Besonders für Notebooks bieten sich die MP3-Dateien an: Die CD wird überflüssig und die stromfressenden Festplattenzugriffe werden auf ein Minimum reduziert - das Power- oder iBook wird somit zum Walkman und hält über mehrere Stunden, ohne dass man Akkus oder Musik-CDs auswechseln müsste.

Bleibt die Frage nach dem richtigen MP3-Player: Der QuickTime-Player fällt aus (da keine Playlist-Funktion) und die meisten anderen Player fressen mit ihren animierten Anzeigen nur unnötig Strom. Auftritt "MP3 Strip": Dieses kleine Kontrollleisten-Modul ist ein vollwertiger MP3-Player und steht, wie alles in der Kontrollleiste, ohne Programm-Ladezeit zur Verfügung - besonders praktisch für den schnellen Zugriff, der Musik-Genuss ist also nur einen Mausklick entfernt.

Einfach einen Ordner mit MP3-Dateien auswählen und der "MP3 Strip" legt los. Unkomplizierter geht's nicht. Und selbst für den Einsatz am stationären Mac ist das Modul bestens geeignet: Sogar an einem alten iMac düdeln die MP3-Dateien ohne Unterbrechung vor sich hin, selbst wenn dabei fleißig in den aktiven Programmen gearbeitet, zwischen ihnen gewechselt oder ein Menü heruntergeklappt wird.

Leider ist der 'MP3 Strip' derzeit nur als 30 Tage lauffähige Beta-Version erhältlich, dafür aber derzeit noch kostenlos. Das Modul läuft aber auch jetzt schon stabil und lässt keine Wünsche offen.

++ MP3 Strip - kostenlose Beta-Version:

* <http://www.softwarium.com/mp3strip.html>

TOP

7. PC: 12Ghosts - Lassen Sie sich von diesen Geistern helfen (Shareware)

Oft sind es die einfachen und kleinen Programme, die einem Windows-Benutzer manchmal ungemein die Arbeit erleichtern. Dazu gehört auch die Programmsammlung "12Ghosts", die insgesamt 21 verschiedene Programme enthält.

Aufgeteilt ist das Programm in zwölf sogenannte Ghosts und neun Add-Ons. Zu den Geistern gehört beispielsweise das Programm "Show-Time", das Ihnen auf Ihrem Desktop ununterbrochen die Uhrzeit anzeigt. Einstellen lassen sich auch Alarmsignale (z. B. pünktlich zur Kaffeepause) oder ein Countdown z. B. bis zum Feierabend. Damit die Uhrzeit immer genau stimmt, aktualisieren Sie Ihre Systemuhr regelmäßig mit einem Timeserver im Internet. Diese Aufgabe übernimmt "Synchronize". Zum schnellen Herunterfahren Ihres Rechners koennen Sie "ShutDown" verwenden. Statt lästiger Sicherheitsabfragen, genügt hier ein einziger Mausklick.

Das sind natürlich längst nicht alle Funktionen, die die kleinen Geister übernehmen können, in der 1170 KB großen Shareware steckt noch einiges mehr.

Einen Tipp geben wir Ihnen allerdings noch: Positionieren Sie nur die Programme, die Sie wirklich benötigen in der Taskleiste, denn sonst wird das Bedienen durch die vielen verschiedenen Icons schnell unübersichtlich.

OnlineMix

8. Jack hoch drei - MailJack-Familie bietet besten Rundum-Service

ISDN und Co. ist schon was tolles. Man kann gleichzeitig surfen und telefonieren, über den freien D-Kanal kann man sich mittlerweile (ohne Onlineverbindung) über neue eMails informieren lassen (siehe nNL). Und jetzt kann man damit auch über seine Vergesslichkeit hinweg täuschen! Der Erfinder, die Münchner Firma "equinux" hat die Lösung mit den beiden kostenlosen Programmen Online- und Connect-Jack parat: Auch von unterwegs lässt sich auf den Heimrechner zugreifen.

Sobald die Programme auf dem Rechner installiert sind, kann der PC von einem beliebigen Ort aus online geschaltet werden - mit dem OnlineJack-Cockpit. Relativ einfach lassen sich Links einrichten, über die der OnlineJacker die passwort-geschützte Verbindung zum eigenen Rechner aufbauen kann, wie z. B. den Dateiaustausch und die Fernsteuerung. Der Desktop des Heimrechners baut sich dann im Webfenster auf dem Bürorechner auf, von dort aus lassen sich Dateien aufrufen und gewisse Änderungen vornehmen. Daten "saugen" geht jedoch nur über die FTP-Funktion.

Als zusätzliches Feature bieten die Münchner mit ConnectJack die Möglichkeit, aus dem eigenen Rechner einen kleinen Webserver on demand aufzustellen. Allerdings geht der Rechner erst dann online, wenn die Webseite explizit angewählt wird, die IP-Adresse wird dynamisch zugewiesen. Die Adresse ist aber immer die gleiche: <http://name.connectjack.de> . Man sollte dabei aber beachten, dass die Seiten vom heimischen Rechner nicht so schnell abrufbar sind wie "normale" Webseiten - denn immerhin muss sich das Bild erst von zuhause auf den langen Weg durchs Netz machen. Angenehm ist, dass man vorher festlegen kann, über welchen Provider sich der Rechner einwählen soll: Call-by-Call-, Flatrate- und DSL-Angebote werden unterstützt.

Fazit unseres OnlineJack-Testers: eMail-, Online- und ConnectJack sind drei sinnvolle Dienste für den

Privatanwender, der via Internet von jedem Ort der Welt aus auf Dateien des heimischen PC´s zugreifen möchte. Bei ConnectJack sollte man bedenken, dass bei jedem Aufruf der heimischen Seiten Online-Gebühren fällig werden (der Rechner wählt sich jedesmal ins Internet ein), das kann schnell sehr teuer werden. Das flexibelste Angebot stellt mit Sicherheit OnlineJack dar, denn damit kann man nicht nur Dateien vom heimischen Rechner abrufen und den Rechner fernsteuern, sondern mit ein bisschen Geschick auch andere Programme aus der Ferne starten. Und das Schönste an dem Angebot: Alle Jacks sind kostenlos zu haben.

9. Der Provider-Kostentest (Das günstigste Internet-by-Call)

In letzter Zeit sieht man des öfteren doppelte Werbeanzeigen für "Planet Internet": Ein "völlig unkompliziertes und übersichtliches Preissystem" gäbe es für den Internetzugang, "keine versteckten Extrakosten", usw. - denn, was "wirklich zählt: Ideen und Inspiration". Na, neugierig geworden?

• Genauer betrachtet: Der Provider "Planet Internet"

Eine Kleinigkeit vermisst man jedoch in den 'Planet Internet'-Werbungen: Angaben zu den Kosten. Selbst auf der HomePage findet man sie nicht auf Anhieb.

Der Minutenpreis des "Planet Go"-Tarifs beträgt stolze 3,4 Pf., abgerechnet im Minutentakt. Nur wer den "Planet Premium"-Tarif wählt, kommt eventuell etwas günstiger weg: In den 39 DM monatlicher Grundgebühr sind 25 Freistunden enthalten, umgerechnet also im Idealfall 2,6 Pf/min. Darüber hinaus kostet jede Minute wie gehabt 3,4 Pfennig.

Leider benötigt selbst der "Planet Go"-Tarif eine Anmeldung, da per Bankeinzug bezahlt wird - entsprechende Formalitäten bei der Anmeldung sind beim "unkomplizierten" Planet Internet also inklusive.

Natürlich gibt es bei diesem Provider die üblichen Dreingaben: eMail-Adresse, HomePage; nicht gerade weltbewegend. Als einzige Besonderheit gibt es bei Planet Internet sogenannte "SubAccounts": Jeder Kunde kann vier weitere Zugangskennungen (z. B. für Familienmitglieder) einrichten - das erleichtert die Kostenkontrolle.

Nun die Beschränkungen: Eine ISDN-Kanalbündelung ist nicht möglich, und das Transfervolumen für die HomePage beträgt maximal ein Gigabyte - das soll wohl gewerblichen 'Missbrauch' verhindern. Zudem ist es verboten, den Zugang für das komplette Firmennetz zu verwenden: Es darf höchstens ein Netzwerk mit fünf Rechnern an den 'Planet Internet'-Zugang angebunden werden - aber wer sich dies mit nur einem ISDN-Kanal antäte, ist sowieso selber schuld.

Fazit: Die Marketing-Strategen von "Planet Internet" liegen absolut richtig, wenn sie meinen, viele Werbeanzeigen schalten zu müssen. Denn durch Preis oder Leistung überzeugen sie keinesfalls.

++ Planet Internet - liegt wohl irgendwo hinter'm Mond...

Veranstaltungen

10.1 SYSTEMS 2000 in München

Die 19. internationale Fachmesse für Informationstechnologie, Telekommunikation und Neue Medien kann erneut mit Rekordmarken aufwarten, über 3000 Aussteller sollen sich in diesem Jahr auf dem Neuen Messegelände in München einfinden. Mehr Platz denn je steht den Veranstaltern zur Verfügung, Sonderaktionen wie der Linux Park, das Mobile Solutions Forum oder das Software Solution Center finden natürlich auch wieder statt. Parallel zur Systems laufen erneut die "Medientage München", die Neuen Medien werden auch hier ergänzend eine große Rolle einnehmen.

- + Datum: 6. - 11. November 2000
- + Ort: Neue Messe München
- + Kosten: Tageskarte DM 52,- (ermäßigt DM 37,-)
- + Veranstalter: Messe München GmbH
- + Telefon: 01805 - 23 56 573
- + E-Mail: info@systems.de

10.2 Stream-Tipp der Woche: Lara-Croft-Dreh live

Blairwitch hat es vorgemacht, wie aus einem Lowbudget-Film ein Kassenschlager gemacht werden kann: Über das Internet. Bei den Machern von Lara Croft hat sich die Tatsache auch schon herumgesprochen - die Zielgruppe ist nun mal computer- und internetaffin. Also nichts leichter als das - man zieht ein Tomb Raider-Webevent auf: Ab dem 9. November kann jeder live und ganz offiziell die Dreharbeiten in den Londoner Pinewood Studios mitverfolgen.

++ Ab 9. November, 20.30 Uhr in den Pinewood-Studios

Tipps & Tricks

12. Der Suchmaschinen-Report (31) - Paperazzi.de

Paperazzi.de ist eine Artikelsuchmaschine, die aufs Stichwort aktuelle Zeitungs- und Zeitschriftenartikel aus der deutschen und internationalen Presse sammelt. Die Suchmaschine ist im September 1999 an den Start gegangen und wird von TNF Medien aus Oberasbach (bei Nürnberg) produziert.

Bei der Suche kann man zwischen deutscher und englischer Presse auswählen sowie die Optionen Quick- oder Langzeitsuche aktivieren. Bei der Quicksuche werden nur Artikel der letzten 48 Stunden nach relevanter Anordnung aufgelistet, während man mit der Langzeitsuche eine chronologische Auflistung bis zu sechs Monate alter Nachrichten bekommt. Der Zeitraum kann dabei auf die letzte Stunde, einzelne Tage oder Wochen eingegrenzt werden.

In über 200 Publikationen inkl. Pressediensten und E-Zines wird gesucht. Als beliebteste Medien führen hier der Tagesspiegel, RP Online, die Financial Times, die Berliner Morgenpost und die Süddeutsche die Rangliste an.

Neben Fuzzy Logic und Wildcard-Suche können auch ganze Phrasen eingegeben werden, wie Zitate eines Politikers. Angezeigt werden die Treffer mit der Quelle, der Headline, dem Satz oder Absatz, der den Suchbegriff enthält, Datum und Uhrzeit des Erscheinens und sogar die Anzahl der Worte, Sätze und Anschläge. Mit Klick auf ein Symbol wird der gezeigte Artikel in einem separaten Browser-Fenster geöffnet.

Praktischer Service: Wenn man von der deutschen Suche zu der Suche in englische Medien oder umgekehrt überwechselt, wird das eingegebene Suchwort automatisch in die andere Sprache übersetzt! Für die internationale Suche gibt es eine Länderdatenbank mit Medien aus Europa, USA/Kanada, Afrika, Asien und Südamerika, deren Links aber leider zu einer Fehlermeldung führen.

Ein besonderer Service ist auch Paperazzi by Mail: Hier erhalten die Abonnenten alle 24 Stunden kostenlos eine eMail mit Links zu allen Artikeln, die in dieser Zeit zu einem gewünschten Suchbegriff erschienen sind. Wer sich also über den Wahlkampf in den USA, den Aktiengang der Deutschen Post oder einen neuen Kinofilm informieren will, erhält so viele aktuelle Quellen zum Thema aufgelistet. Inzwischen benutzen, laut Betreiber, über 17.000 User diesen Service.

Fazit: Trotz einiger toter Seiten eine wirklich gut durchdachte, eigenständige und nützliche Artikelsuchmaschine, die jedem Nachrichtenhungrigen praktisch und schnell alle relevanten News mundgerecht auf dem Tablett serviert! Unbedingt bookmarken!

13. netNewsLetter intern

In eigener Sache - netNewsLetter auf der SYSTEMS (Halle B 3 Stand 313/514)

Ab Montag ist es mal wieder soweit. Geballt werden Neuheiten aus den Bereichen Informationstechnik, Telekommunikation und Neue Medien in München auf der Systems präsentiert. Ein wahres Eldorado für unsere Redaktion! Wir werden ständig vor Ort auf der Suche nach den interessantesten News sein und so dafür sorgen, dass - tataa - Sie sich in der kommenden Woche gleich zweimal auf den netNewsLetter freuen dürfen. Am Mittwoch gibt's nämlich ein Special direkt von der Systems und am Freitag erscheint der netNewsLetter natürlich auch noch mal mit jeder Menge Fachmessen-Infos.

Selbstverständlich nutzen wir von der netNewsLetter-Redaktion die Gelegenheit und präsentieren unsere Kompetenz direkt vor Ort. Für alle unsere Fans ;-) und alle anderen Interessierten, wie z. B. Contentanbieter und Mediaplaner, bietet sich somit die Gelegenheit, uns persönlich kennenzulernen. Und wer mal sehen will, wie man einen richtig guten Newsletter macht (das sagen andere über uns!!!), ist bei uns ebenfalls gut aufgehoben. Wir jedenfalls würden uns freuen, wenn wir Sie dort treffen würden. Das netNewsLetter-Team finden Sie in Halle B3, Stand 313/514 auf dem Stand unseres Partners SpaceNet. Also, C U!!!

*Andrei Costin**Cyberculture - from electronic media to net.art*

New Tendencies

Nowadays there are many cultural pseudo-trends that involve electronic activities linked to or simply consisting in internet communication and cyberspace. Visual arts are turning into something new, modern art is not to be understood, nor felt, it is to be observed only. Vee-jaying and live broadcasting on the Internet (Streaming) are new forms of cultural manifestation. All of these can be called from both an artistic and a cultural point of view: net.art and net.culture. In the post modernist blur, the periphery becomes the center, which also divides itself in myriads of other potential centers. Then all that's centered disperses, forming new central-peripheries in a fractal-like manner, all based on an ongrowing(?) technological development. From this perspective, the cybernetic culture can be called the most popular trend of our times.

Cyberspace is a social space. Whether emailing a friend, surfing the Web, or posting to a listserv or newsgroup, users interact with one another. This communication -- often random and sporadic, often prolonged and regular - fosters a sense of community and can help to generate what Howard Rheingold in his book: *The Virtual Community: Homesteading on the Electronic Frontier* calls virtual communities. According to Rheingold, virtual communities are "social aggregations that emerge from the Net when enough people carry on...public discussions long enough, with sufficient human feeling, to form webs of personal relationships in cyberspace". One of the most interesting aspects of cyberculture is the changing notion of selfhood. How do we represent ourselves within online spaces and how is this representation different from the 'real' self? Where are our bodies when we negotiate through electronic spaces? How much of our online persona is a product of self-representation? How can - or do - we tweak this persona?

The truth is that the virtual electronic space, allows a much more flexible, free, and uncontrolled display of ideas and informational interchange, properties that lead to a very high degree of interactivity. The communication channel established between the cybernetic creators results in cultural product that is profoundly collective, the identity of the individual, of the creator fading out in favor of the group, or of the trend. This is the case of the open source software community that is basically based on an utopian form of equal sharing, the programmers who work to create all this software (that is distributed for free) are not important. All that matters is that the

needs of the community are met. Usually the people developing these programs are never paid, but they receive donations, based on the very same system that looks more and more like a version of electronic socialism, opposing the ideas of proprietary software that stand as the symbol of the most fierce capitalism.

Definitions

But this is just an example, not only the General Public Licence (GPL) is such an issue, but works like collaborative magazines. For instance WickyWicky is a software that allows all users to modify a certain website, in order to create a product, that has no real author, but is rather the merging of many personalities, that mix, create and destroy parts of each other, changing even their own original matrix, rather than the creations of separate individuals put together. Yet, not only text and image is used for collective works. Other projects such as Radioqualia and Frequency Clock coordinated by Adam Hyde and Honor Harger allow people all over the world to schedule over the internet a community radio program that is broadcasted on the airwaves. Also a few years ago in this project was involved a public tv station in Amsterdam, basically allowing the viewers to change the program on tv according to their own will.

There are various ways through which cyberculture evolves. One of these ways is a different type of media, Tactical Media. The best definition of this concept was provided in 1997 by Geert Lovink. It says: Tactical Media are what happens when the cheap 'do it yourself' media, made possible by the revolution in consumer electronics and expanded forms of distribution (from public access cable to the internet) are exploited by groups and individuals who feel aggrieved by or excluded from the wider culture. Tactical media do not just report events, as they are never impartial they always participate and it is this that more than anything separates them from mainstream media.

Basically one could consider this as being a shift of the emphasis from representations in their own right to the mental, or rather psychological 'uses' of representations. In other words how do we as consumers use the texts and artifacts that surround us. And this way can be considered 'tactical'. It is all about a certain alteration, not in content as it would seem at first sight, but rather in the perception of the message conveyed. The process of information consumption can be described as a set of tactics by which the weak make use of the strong, thus depicting a portrait of the "rebellious user" (a term that is preferable to consumer, according to Michel De Certeau) as tactical and the presumptuous producer (category in which can be included authors, educators, curators and revolutionaries) as strategic.

Awareness of this tactical versus strategic dichotomy leads to the creation of a very specific vocabulary, and the main principle of Tactical Media is creating temporary reversals in the flow of power. A certain class of producers of who seem uniquely aware of the value of these reversals, instead of resisting them, would rather do anything in their power to amplify

them and create more and more spaces, channels and platforms for other new reversals.

This phenomenon is based on a principal of flexible response, of working with different groups, being able to move between the different entities in the vast media landscape without betraying their original purposes and motivations. It is the same principle invoked before, that of the interaction between many peripheral nuclei in order to form together a vast (sub)cultural network.

In concrete manifestation, it is all about new hybrid forms of media being created, consisting in the strangest combinations that usually have a temporary character. All that matters is the establishment of a frail temporary link between sentient beings, here and now, not by means of a futuristic technology that does not exist yet, but with the help of available and ordinary means of communication.

This is just the theoretical description of this phenomenon, in fact things are far more complex as the main characteristic of cyberculture is a multitude of aspects that are continuously shapeshifting, a kind of cultural and artistic kaleidoscope. There are many organizations worldwide spread that offer various solutions regarding this particular type of communication.

Practically speaking

A first and one of the best examples is the Next5Minutes organization from Amsterdam that has its origins in a network that sprang up around "The Seropositive Ball", an AIDS event that was held in Amsterdam's Paradiso in 1990. The Ball set out to create an alternative to the fatalism, which prevailed at the time in the Netherlands in relationship to the AIDS epidemic. Although it included all the arts, most striking was a collision between two distinct cultures of resistance. This group organizes cultural activities that have to do with the Internet and IT, throughout the whole world by means of the so called Tactical Media Labs, or TML, that would uphold the online communicational process.

The best way to present this group is probably to quote directly from their web site (www.n5m.org): As organizers we acknowledge the radical changes in context by decentralizing our own structure in a similarly radical way. Next 5 Minutes is en route to become a series of interlinked local laboratories for action-oriented research and reflection, and simultaneous platforms for public presentation, debate, and discussion. Each of these labs, hosted in different cities on different continents, will be devoted to a specific theme which is closely linked to the interests and concerns of the local organizers, but connected to an on-going research effort supported by an international group of editorial advisors. The TMLs will create an immediate interface between international artistic and activist media networks and local practitioners and initiatives.

To support the immediate availability of the outcomes of the various local

TMLs and workshops in the frame of N5M4 - for a world-wide audience - an on-line editorial environment will be constructed. This on-line resource will contain written reports, articles, essays and other text materials, as well as audio documents, photographs, stills, film, and video materials. The TMLs and smaller workshops together will define the final content of the Next 5 Minutes festival, which is planned for May 2003. The festival will be the aspect of Next 5 Minutes 4 that most closely resembles the traditional gathering associated with the previous editions. What is essentially different about the new edition is that the content of the festival will be defined by the outcomes and ideas produced in the TMLs, the workshops, and within the international editorial board. The festival will thus operate as a showcase and presentation platform for tactical media making from around the world, bringing together artistically challenging productions with socially relevant and politically urgent questions."

But there are many ways of manifesting cyber-attitudes and not all of them are so peaceful. The concept known as hacker ethics and reunited in Stalman's General Public Licence is already famous worldwide. A relevant example concerning this type of so called hacktivism would be the Italian group 0100101110101101.ORG which has invented the life and work of an imaginary Serbian artist, called Darko Maver, created a mock site of the Vatican, and made an anti-copyright clone of the website of a private net.art museum. Their work raises questions not only about the relation between the copy and the original but also about the transparency of data on the Internet. Yet they work as a group and anonymously.

Probably their most interesting action is that of creating a clone site of the Vatican. For a whole year "vaticano.org" was one of the (un)official organs of information of the Holy See. A huge site, aesthetically identical to the "real" one but with "slightly" modified contents. The detournement of the holy texts involved tens of people from the whole country, who were about to add German, Spanish and English language sections to the main, Italian one. For 12 months thousands of people visited "vaticano.org" and nobody realized that the contents of the site had been "re-touched". Dozens of texts in which one could find everything: "heretical" proclamations, invented words, unpardonable errors and songs by 883 (an Italian teeny-bopper band) perfectly put in a "plausible" context. From the site it was possible to address letters directly to the Pope. Strange instructions "hijacked" pilgrims in the most remote places.

As there was no international legislation to cover such actions, the only solution for the Catholic Church was to ask the Canadian company that provided the hosting and the domain for this site not to renew the contract for the following year. But for the one year that it existed, the site received a total requests of 4,210,542 and 196,236 actual visits.

One of the biggest media hoaxes was the invention of Darko Maver - the media created Balkan artist with shocking, explicitly violent works, who, as it was revealed at the Venice Biennale in 1999, did not exist. This action demonstrated that by means of manipulating information, a well orchestrated

mix can be presented as art created by an individual that actually came to be appreciated among modern art critics. Of course, details about the latest hoaxes made by 0100101110101101.ORG can be found within their website www.0100101110101101.org.

Tactical media, in contrast to the mainstream, don't occupy a stable ideological place from which they put forward counter messages; they speak in tongues, offering a temporary flash or illumination rather than a denunciation and a counter-message. 'Alternative' media were initially counted as part of tactical media by David Garcia and Geert Lovink, but it seems that their logic is quite different. Small, grassroots initiatives which are focused on staying small, building a community around other values than the mainstream, do occupy an ideological place that is marked as different; but sometimes they infiltrate the mainstream in order to pirate or detourn it.

Alternative reacting

It is the case of the another group from the United States, who call themselves ®™ark, and their project The Yes Men at the World Trade Organisation. In early 2000, ®™ark transferred Gatt.org-which people sometimes mistake for the World Trade Organization's official Web site-to a group of impostors known as the Yes Men. In May 2000 the Center for International Legal Studies in Salzburg, Austria sent letter to Gatt.org inviting Mike Moore, the real Director-General of the WTO, to discuss the WTO at a conference on international trade matters. The Yes Men decided to do the ethical thing ... and to try their best to fulfill the request. In late October, one Dr. Andreas Bichlbauer-the substitute "Moore" decided to send-spoke at the conference. His lecture described the WTO's ideas and ultimate aims in terms that were horrifyingly stark-suggesting, for example, the replacement of inefficient democratic institutions like elections with private-sector solutions like selling votes to the highest corporate bidder. None of the lawyers in attendance expressed shock or dismay at Dr. Bichlbauer's proposals." The only people who seemed to react to Bichlbauer's outlandish remarks were some Italian delegates who were offended by his statement concerning the impossibility of a merger between KLM and Alitalia due to the basic laziness of the Italian worker.

Posted on the ®™ark site is a hysterically comical series of letters and e-mail correspondence between Dr. Bichlbauer, Professor Campbell (the conference organizer), "Mike Moore" (the impostor) and his administrative assistant, Alice Foley. Through the series of letters, memos and e-mails, the farce unfolds. The point of this Salzburg action was to enhance the visibility of the WTO's policies. To that end, the Yes Men gave a kind of uncensored version of the WTO's real positions ... There was an audience of legal experts who basically did not object to Andreas Bichlbauer explaining that the WTO believed in doing away with all cultural differences (for example, siestas) that get in the way of free trade or to the presentation of Voteauction.com (a project that basically states that elections should be auctioned) as a model for making elections more efficient. This should be a wake-up call to

all of us who care about our votes ... or any kind of representative government reflecting social interests.

There are numerous ways of creating, manifesting and promoting net.art, net.culture and Tactical Media, examples go back to even before the concept was defined. A more serious approach belongs to the Free Radio Movement initiated by Felix Guattari in Italy, and continued by Tetsuo Kogawa in Japan. Guattari stressed the radically different function of free radio from conventional mass media. His notions of transmission, transversal and molecular revolution suggested that, unlike conventional radio, free radio would not impose programs on a mass audience, whose numbers have been forecast, but would come across freely to a molecular public, in a way that would change the nature of communication between those who speak and those who listen.

Using MiniFM transmitters, based on the same technology as remote controlled toys, thus not illegal, in highly overpopulated urban areas, this movement came up with a new term, narrowcasting. Kogawa himself stated that: Radio could serve as a communication vehicle not for broadcast but for narrowcasting. Radio transmission technology could be available for individuals to take control of their transmission and reception. Mini-FM had a powerful therapeutic function: an isolated person who sought companionship through radio happened to hear us and visited the mini-FM station; a shy person started to speak into the microphone; people who never used to be able to share ideas and values found a place for dialogue. I called this kind of media "polymorphous media" or "polymedia." Polymedia are not intended simply to link smaller units into a larger whole: instead they involve the recovery of electronic technology that individuals can communicate, share idiosyncrasies and be "convivial."

The Electrodomestic television that was originally created by the CandidaTV group in Italy, is another concept of forming, and deforming the information consumer's immediate reality. Their manifesto openly declares that a transformation from the television for everybody to the television created by everybody is necessary, their aim is to overcome the differences between the consumer and the producer: television can be done by everyone, you just have to use the television as a monitor, the camera as an eye, the video recorder as an editing tool. And their slogan is: "MAKE YOUR OWN TELEVISION" - doubt prefabricated authorities and promote the decentralization of information!

Being independent is a tough job

But these are just a few examples of groups and actions, there are many more some very local, as it is the case with Tilos Radio from Budapest (in Hungarian tilos means forbidden), that started out as a pirate radio, and then became the most popular community radio in Hungary. It is currently streaming on the Internet www.tilosradio.hu. and this year it has been granted a one year community fm radio license from the Hungarian

Government. Or things can get really global. Such a global network is the Independent Media Centers Network known as Indymedia, that has centers in more than 20 countries worldwide. All Indymedia sites use a special software that allows anyone to post online anything they want (including video and audio files besides text) by means of the Open Publishing System. Concerning the Indymedia network, the Genoa incident is rather famous in which the Italian Police (Carabinieri) arrested a whole Indymedia center (around 100 persons), under the accusation of supporting anti globalization illegal movements. Unfortunately all ended up in a violent confrontation with 5 casualties and many injured. And all this because they wouldn't respect the rules imposed by the Italian mainstream media, and play an important role in providing alternative information for the public opinion.

"World War III will be a guerilla information war, with no division between military and civilian participation." (Marshall McLuhan).

This is probably the best and only conclusion for this short presentation of the cyber/net artistic and cultural environment. This whole social, artistic and cultural migration to the high tech areas is taking place, maybe slowly at first, but at a very visible growing rate. The imagination is projected directly into society by means of technology. Unfortunately, for most people this is nothing but a mere form of protest. Only time will tell what shall become of these cyber trends of our times.

Cyberculture - from electronic media to net.art

New Tendencies

Nowadays there are many cultural pseudo-trends that involve electronic activities linked to or simply consisting in internet communication and cyberspace. Visual arts are turning into something new, modern art is not to be understood, nor felt, it is to be observed only. Vee-jaying and live broadcasting on the Internet (Streaming) are new forms of cultural manifestation. All of these can be called from both an artistic and a cultural point of view: net.art and net.culture. In the post modernist blur, the periphery becomes the center, which also divides itself in myriads of other potential centers. Then all that's centered disperses, forming new central-peripheries in a fractal-like manner, all based on an ongrowing(?) technological development. From this perspective, the cybernetic culture can be called the most popular trend of our times.

Cyberspace is a social space. Whether emailing a friend, surfing the Web, or posting to a listserv or newsgroup, users interact with one another. This communication -- often random and sporadic, often prolonged and regular - fosters a sense of community and can help to generate what Howard Rheingold in his book: *The Virtual Community: Homesteading on the Electronic Frontier* calls virtual communities. According to Rheingold, virtual communities are "social aggregations that emerge from the Net when enough people carry on...public discussions long enough, with sufficient human feeling, to form webs of personal relationships in cyberspace". One of the most interesting aspects of cyberculture is the changing notion of selfhood. How do we represent ourselves within online spaces and how is this representation different from the 'real' self? Where are our bodies when we

negotiate through electronic spaces? How much of our online persona is a product of self-representation? How can - or do - we tweak this persona?

The truth is that the virtual electronic space, allows a much more flexible, free, and uncontrolled display of ideas and informational interchange, properties that lead to a very high degree of interactivity. The communication channel established between the cybernetic creators results in cultural product that is profoundly collective, the identity of the individual, of the creator fading out in favor of the group, or of the trend. This is the case of the open source software community that is basically based on an utopian form of equal sharing, the programmers who work to create all this software (that is distributed for free) are not important. All that matters is that the needs of the community are met. Usually the people developing these programs are never paid, but they receive donations, based on the very same system that looks more and more like a version of electronic socialism, opposing the ideas of proprietary software that stand as the symbol of the most fierce capitalism.

Definitions

But this is just an example, not only the General Public Licence (GPL) is such an issue, but works like collaborative magazines. For instance WickyWicky is a software that allows all users to modify a certain website, in order to create a product, that has no real author, but is rather the merging of many personalities, that mix, create and destroy parts of each other, changing even their own original matrix, rather than the creations of separate individuals put together. Yet, not only text and image is used for collective works. Other projects such as Radioqualia and Frequency Clock coordinated by Adam Hyde and Honor Harger allow people all over the world to schedule over the internet a community radio program that is broadcasted on the airwaves. Also a few years ago in this project was involved a public tv station in Amsterdam, basically allowing the viewers to change the program on tv according to their own will.

There are various ways through which cyberculture evolves. One of these ways is a different type of media, Tactical Media. The best definition of this concept was provided in 1997 by Geert Lovink. It says: Tactical Media are what happens when the cheap 'do it yourself' media, made possible by the revolution in consumer electronics and expanded forms of distribution (from public access cable to the internet) are exploited by groups and individuals who feel aggrieved by or excluded from the wider culture. Tactical media do not just report events, as they are never impartial they always participate and it is this that more than anything separates them from mainstream media.

Basically one could consider this as being a shift of the emphasis from representations in their own right to the mental, or rather psychological 'uses' of representations. In other words how do we as consumers use the texts and artifacts that surround us. And this way can be considered 'tactical'. It is all about a certain alteration, not in content as it would seem at first sight, but

rather in the perception of the message conveyed. The process of information consumption can be described as a set of tactics by which the weak make use of the strong, thus depicting a portrait of the "rebellious user" (a term that is preferable to consumer, according to Michel De Certeau) as tactical and the presumptuous producer (category in which can be included authors, educators, curators and revolutionaries) as strategic.

Awareness of this tactical versus strategic dichotomy leads to the creation of a very specific vocabulary, and the main principle of Tactical Media is creating temporary reversals in the flow of power. A certain class of producers of who seem uniquely aware of the value of these reversals, instead of resisting them, would rather do anything in their power to amplify them and create more and more spaces, channels and platforms for other new reversals.

This phenomenon is based on a principal of flexible response, of working with different groups, being able to move between the different entities in the vast media landscape without betraying their original purposes and motivations. It is the same principle invoked before, that of the interaction between many peripheral nuclei in order to form together a vast (sub)cultural network.

In concrete manifestation, it is all about new hybrid forms of media being created, consisting in the strangest combinations that usually have a temporary character. All that matters is the establishment of a frail temporary link between sentient beings, here and now, not by means of a futuristic technology that does not exist yet, but with the help of available and ordinary means of communication.

This is just the theoretical description of this phenomenon, in fact things are far more complex as the main characteristic of cyberculture is a multitude of aspects that are continuously shapeshifting, a kind of cultural and artistic kaleidoscope. There are many organizations worldwide spread that offer various solutions regarding this particular type of communication.

Practically speaking

A first and one of the best examples is the Next5Minutes organization from Amsterdam that has its origins in a network that sprang up around "The Seropositive Ball", an AIDS event that was held in Amsterdam's Paradiso in 1990. The Ball set out to create an alternative to the fatalism, which prevailed at the time in the Netherlands in relationship to the AIDS epidemic. Although it included all the arts, most striking was a collision between two distinct cultures of resistance. This group organizes cultural activities that have to do with the Internet and IT, throughout the whole world by means of the so called Tactical Media Labs, or TML, that would uphold the online communicational process.

The best way to present this group is probably to quote directly from their web site (www.n5m.org): As organizers we acknowledge the radical changes

in context by decentralizing our own structure in a similarly radical way. Next 5 Minutes is en route to become a series of interlinked local laboratories for action-oriented research and reflection, and simultaneous platforms for public presentation, debate, and discussion. Each of these labs, hosted in different cities on different continents, will be devoted to a specific theme which is closely linked to the interests and concerns of the local organizers, but connected to an on-going research effort supported by an international group of editorial advisors. The TMLs will create an immediate interface between international artistic and activist media networks and local practitioners and initiatives.

To support the immediate availability of the outcomes of the various local TMLs and workshops in the frame of N5M4 - for a world-wide audience - an on-line editorial environment will be constructed. This on-line resource will contain written reports, articles, essays and other text materials, as well as audio documents, photographs, stills, film, and video materials. The TMLs and smaller workshops together will define the final content of the Next 5 Minutes festival, which is planned for May 2003. The festival will be the aspect of Next 5 Minutes 4 that most closely resembles the traditional gathering associated with the previous editions. What is essentially different about the new edition is that the content of the festival will be defined by the outcomes and ideas produced in the TMLs, the workshops, and within the international editorial board. The festival will thus operate as a showcase and presentation platform for tactical media making from around the world, bringing together artistically challenging productions with socially relevant and politically urgent questions."

But there are many ways of manifesting cyber-attitudes and not all of them are so peaceful. The concept known as hacker ethics and reunited in Stalman's General Public Licence is already famous worldwide. A relevant example concerning this type of so called hacktivism would be the Italian group 0100101110101101.ORG which has invented the life and work of an imaginary Serbian artist, called Darko Maver, created a mock site of the Vatican, and made an anti-copyright clone of the website of a private net.art museum. Their work raises questions not only about the relation between the copy and the original but also about the transparency of data on the Internet. Yet they work as a group and anonymously.

Probably their most interesting action is that of creating a clone site of the Vatican. For a whole year "vaticano.org" was one of the (un)official organs of information of the Holy See. A huge site, aesthetically identical to the "real" one but with "slightly" modified contents. The detournement of the holy texts involved tens of people from the whole country, who were about to add German, Spanish and English language sections to the main, Italian one. For 12 months thousands of people visited "vaticano.org" and nobody realized that the contents of the site had been "re-touched". Dozens of texts in which one could find everything: "heretical" proclamations, invented words, unpardonable errors and songs by 883 (an Italian teeny-bopper band) perfectly put in a "plausible" context. From the site it was possible to address letters directly to the Pope. Strange instructions "hijacked" pilgrims in the

most remote places.

As there was no international legislation to cover such actions, the only solution for the Catholic Church was to ask the Canadian company that provided the hosting and the domain for this site not to renew the contract for the following year. But for the one year that it existed, the site received a total requests of 4,210,542 and 196,236 actual visits.

One of the biggest media hoaxes was the invention of Darko Maver - the media created Balkan artist with shocking, explicitly violent works, who, as it was revealed at the Venice Biennale in 1999, did not exist. This action demonstrated that by means of manipulating information, a well orchestrated mix can be presented as art created by an individual that actually came to be appreciated among modern art critics. Of course, details about the latest hoaxes made by 0100101110101101.ORG can be found within their website www.0100101110101101.org.

Tactical media, in contrast to the mainstream, don't occupy a stable ideological place from which they put forward counter messages; they speak in tongues, offering a temporary flash or illumination rather than a denunciation and a counter-message. 'Alternative' media were initially counted as part of tactical media by David Garcia and Geert Lovink, but it seems that their logic is quite different. Small, grassroots initiatives which are focused on staying small, building a community around other values than the mainstream, do occupy an ideological place that is marked as different; but sometimes they infiltrate the mainstream in order to pirate or detourn it.

Alternative reacting

It is the case of the another group from the United States, who call themselves ®™ark, and their project The Yes Men at the World Trade Organisation. In early 2000, ®™ark transferred Gatt.org-which people sometimes mistake for the World Trade Organization's official Web site-to a group of impostors known as the Yes Men. In May 2000 the Center for International Legal Studies in Salzburg, Austria sent letter to Gatt.org inviting Mike Moore, the real Director-General of the WTO, to discuss the WTO at a conference on international trade matters. The Yes Men decided to do the ethical thing ... and to try their best to fulfill the request. In late October, one Dr. Andreas Bichlbauer-the substitute "Moore" decided to send-spoke at the conference. His lecture described the WTO's ideas and ultimate aims in terms that were horrifyingly stark-suggesting, for example, the replacement of inefficient democratic institutions like elections with private-sector solutions like selling votes to the highest corporate bidder. None of the lawyers in attendance expressed shock or dismay at Dr. Bichlbauer's proposals." The only people who seemed to react to Bichlbauer's outlandish remarks were some Italian delegates who were offended by his statement concerning the impossibility of a merger between KLM and Alitalia due to the basic laziness of the Italian worker.

Posted on the ®™ark site is a hysterically comical series of letters and e-mail

correspondence between Dr. Bichlbauer, Professor Campbell (the conference organizer), "Mike Moore" (the impostor) and his administrative assistant, Alice Foley. Through the series of letters, memos and e-mails, the farce unfolds. The point of this Salzburg action was to enhance the visibility of the WTO's policies. To that end, the Yes Men gave a kind of uncensored version of the WTO's real positions ... There was an audience of legal experts who basically did not object to Andreas Bichlbauer explaining that the WTO believed in doing away with all cultural differences (for example, siestas) that get in the way of free trade or to the presentation of [Voteauction.com](#) (a project that basically states that elections should be auctioned) as a model for making elections more efficient. This should be a wake-up call to all of us who care about our votes ... or any kind of representative government reflecting social interests.

There are numerous ways of creating, manifesting and promoting net.art, net. culture and Tactical Media, examples go back to even before the concept was defined. A more serious approach belongs to the Free Radio Movement initiated by Felix Guattari in Italy, and continued by Tetsuo Kogawa in Japan. Guattari stressed the radically different function of free radio from conventional mass media. His notions of transmission, transversal and molecular revolution suggested that, unlike conventional radio, free radio would not impose programs on a mass audience, whose numbers have been forecast, but would come across freely to a molecular public, in a way that would change the nature of communication between those who speak and those who listen.

Using MiniFM transmitters, based on the same technology as remote controlled toys, thus not illegal, in highly overpopulated urban areas, this movement came up with a new term, narrowcasting. Kogawa himself stated that: Radio could serve as a communication vehicle not for broadcast but for narrowcasting. Radio transmission technology could be available for individuals to take control of their transmission and reception. Mini-FM had a powerful therapeutic function: an isolated person who sought companionship through radio happened to hear us and visited the mini-FM station; a shy person started to speak into the microphone; people who never used to be able to share ideas and values found a place for dialogue. I called this kind of media "polymorphous media" or "polymedia." Polymedia are not intended simply to link smaller units into a larger whole: instead they involve the recovery of electronic technology that individuals can communicate, share idiosyncrasies and be "convivial."

The Electrodomestic television that was originally created by the CandidaTV group in Italy, is another concept of forming, and deforming the information consumer's immediate reality. Their manifesto openly declares that a transformation from the television for everybody to the television created by everybody is necessary, their aim is to overcome the differences between the consumer and the producer: television can be done by everyone, you just have to use the television as a monitor, the camera as an eye, the video recorder as an editing tool. And their slogan is: "MAKE YOUR OWN

TELEVISION" - doubt prefabricated authorities and promote the decentralization of information!

Being independent is a tough job

But these are just a few examples of groups and actions, there are many more some very local, as it is the case with Tilos Radio from Budapest (in Hungarian tilos means forbidden), that started out as a pirate radio, and then became the most popular community radio in Hungary. It is currently streaming on the Internet www.tilosradio.hu. and this year it has been granted a one year community fm radio license from the Hungarian Government. Or things can get really global. Such a global network is the Independent Media Centers Network known as Indymedia, that has centers in more than 20 countries worldwide. All Indymedia sites use a special software that allows anyone to post online anything they want (including video and audio files besides text) by means of the Open Publishing System. Concerning the Indymedia network, the Genoa incident is rather famous in which the Italian Police (Carabinieri) arrested a whole Indymedia center (around 100 persons), under the accusation of supporting anti globalization illegal movements. Unfortunately all ended up in a violent confrontation with 5 casualties and many injured. And all this because they wouldn't respect the rules imposed by the Italian mainstream media, and play an important role in providing alternative information for the public opinion.

"World War III will be a guerilla information war, with no division between military and civilian participation." (Marshall McLuhan).

This is probably the best and only conclusion for this short presentation of the cyber/net artistic and cultural environment. This whole social, artistic and cultural migration to the high tech areas is taking place, maybe slowly at first, but at a very visible growing rate. The imagination is projected directly into society by means of technology. Unfortunately, for most people this is nothing but a mere form of protest. Only time will tell what shall become of these cyber trends of our times.

EL MUNDO - Jueves, 19 de octubre de 2000 - Número 16

INTERNET | INICIATIVAS

El cuarto poder crece. La red está dejando de ser un medio marginal en la campaña electoral estadounidense. Tanto que la casa blanca ha designado un portavoz para los medios electrónicos. y si Los candidatos han extendido a la web sus intervenciones, los voluntarios no se quedan atrás

ELECCIONES USA

Por primera vez, Internet cuenta

M. VALDEBENITO/J.
PARRADO

El gabinete de prensa de la Casa Blanca y del Departamento de Estado son los feudos de la prensa tradicional estadounidense con distribución nacional. Pero el panorama está cambiando. El reciente encuentro entre 12 reporteros on-line con el jefe de personal de la Casa Blanca, John Podesta, era más que una reunión simbólica. "El presidente Clinton ordenó claramente el desarrollo de una estrategia para Internet", asegura Mark Kitchen, recientemente ascendido a viceportavoz para medios electrónicos.

La creación de este subdepartamento es una respuesta al constante aumento de medios cibernéticos que reclaman información de la Casa Blanca. "Aunque sus demandas son muy similares a las de la prensa o la televisión, este tipo de reportero suele interesarse por asuntos de legislación en materia de tecnología y nueva economía", explica Kitchen. Actualmente, una veintena de reporteros de medios digitales están acreditados ante la Casa Blanca. La mayor parte corresponde a las versiones on-line de megagrupos de información como CNN, NBC, ABC Television, pero también figuran medios nacidos en Internet como Znet News o Slate (de Microsoft).

Por ahora, las ruedas de prensa se realizan en la angosta habitación de conferencias de la Casa Blanca, pero Kitchen espera que en breve se puedan desarrollar salas de conferencia on-line para albergar las ruedas de corresponsales digitales.

El incremento de la atención a los medios digitales es paralelo al crecimiento de la audiencia de noticias on-line, especialmente entre el público joven y mejor preparado. Una encuesta

del pasado mes de junio del Pew Research Center for the People and the Press aseguraba que un tercio de la audiencia busca noticias on-line al menos una vez a la semana, frente al 20% que lo hacía hace dos años. La cifra se dispara cuando se trata de información económica. Un 50% del público interesado en los mercados bursátiles consulta los canales digitales.

Lo cierto es que, en el país de Internet, la Red se ha transformado en una herramienta fundamental para los candidatos, que han montado páginas web en las que exponen sus principales ideas, ofrecen herramientas multimedia y despliegan una serie de medios con tal de captar a los potenciales votantes.

VENTA DE VOTOS. Tanto es así que han sido muchos los votantes que están ofreciendo su voto a través de la Red. El sitio web de [VoteAuction](#) ha alcanzado los 5.500 registros con su fórmula de “acercar más el capitalismo y la democracia”. La subasta de votos se promociona con este aviso: “¿Planea usted permanecer en casa el día de las elecciones? Ahora puede obtener un beneficio económico vendiendo su voto al mejor postor”. Las espadas están en todo lo alto y las papeletas se disputan una a una, lo que hace muy difícil aventurar cualquier resultado. En Internet hay un [sitio](#) que realiza continuas encuestas sobre intención de voto, y uno de sus últimos resultados otorgaba un empate técnico a 40% entre Gore y Bush. Aunque por internautas, parece que el primer puesto lo tienen los republicanos. Según un reciente estudio de [Media Metrix y Jupiter Media Metrix](#) dedicado a analizar el uso que hacen de la Red los dos partidos en liza, concluye que un 36,8% de los republicanos registrados es usuario de Internet, superando al 27,9% que logran los demócratas.

El uso que hacen de Internet ambas formaciones es diametralmente opuesto. Mientras los republicanos visitan en mayor medida los sitios dedicados a las finanzas y los negocios, quienes apoyan a Al Gore están registrados en sitios de acceso gratuito que permiten conocer mejor las preferencias de los internautas.

Los usuarios de la Red de ambos partidos convierten las nuevas tecnologías en un centro fundamental en la campaña. Gore promete terminar de conectar todas las escuelas de Estados Unidos a la Red, proyecto que ha impulsado desde la vicepresidencia. Se define como un firme defensor del crecimiento de Internet y del comercio electrónico, por lo que está dispuesto a evitar el exceso de impuestos a las ventas on-line, que pueden perjudicar al mercado global. George Bush, por su parte, propone la creación de un e-Gobierno, para lo que se nombrará a un director del Departamento de Información del Gobierno Federal, que será responsable de hacer realidad la visión de un gobierno verdaderamente digital, enfocado al servicio del ciudadano. Además, pretende invertir 20.000 millones de pesetas para el apoyo de esta iniciativa.

El show electoral se traslada por primera vez a la Red. Tal vez ahí, la carrera por la presidencia se defina mejor que tras un debate televisivo, por lo demás cada vez más predecible, mecánico y en nada interactivo.

DEBATE “ON-LINE”

Contraste de opiniones

El 3 de octubre se llevó a cabo el primero de tres debates presidenciales televisivos entre

George Bush Jr y Al Gore. Según las cifras de audiencia, casi 40 millones las personas siguieron el primer cara a cara de los candidatos, una cifra inferior a los 46 millones que vieron el debate entre Bill Clinton y Bod Dole, en 1996, y mucho menor de los 80 millones que marcaron el récord, en 1980, para ver a Ronald Reagan y Jimmy Carter. Pero la televisión no es el único canal en el que se debate. La Fundación Markle, organización independiente sin ánimo de lucro, mantiene un web en el que ambos candidatos se dirigen a la población, contestan a sus preguntas y contraponen sus ideas. Es la primera vez en la historia del país que los aspirantes a la Casa Blanca se enfrentan a través de Internet. La página [White and Blue Cyber Debate](#) ofrece vídeos de Gore, Bush, y los otros dos candidatos, Ralph Nader y Pat Buchanan, en los que se formulan preguntas diarias y los candidatos explican sus propuestas.

AL GORE

“Ven a conocernos”

El sitio oficial de [Gore](#) tiene una interfaz bastante cuidada. Con fondo blanco donde predominan los colores azul y rojo, la página de bienvenida ofrece un formato simple sin imágenes en movimiento ni gráficos que retarden la descarga de la información. Se organiza en tres columnas: la central y más ancha contiene datos actualizados de las actividades del candidato y muestra el pensamiento de Gore sobre temas claves de la campaña, como salud, educación e impuestos. Sobre la cabecera del sitio se puede acceder a su programa sobre agricultura, defensa, reforma de la financiación de las campañas y nuevas tecnologías e Internet, entre otros. En la primera columna, a la izquierda de la pantalla, aparecen una serie de pequeñas fotografías con la imagen de Al Gore y su esposa, Tipper, junto al candidato a vicepresidente Joseph Lieberman y su mujer Hadassha. Sobre las fotos un titular: “Ven a conocernos” invita a los electores a saber más sobre la vida de los candidatos. También hay una sección en la que se pide opinión y críticas sobre las ideas del candidato. Para ello se puede escoger el estado al que se pertenece o a uno de los grupos que lo representa, como afroamericanos, discapacitados, educadores, empresarios o latinos. Este último puede ser decisivo en la definición final de esta carrera electoral en la que están prácticamente igualados. Por ello, el sitio tiene también una versión en español. Otra sección es la de Gorennet, dirigida a los jóvenes estadounidenses. En la columna de la derecha de la pantalla hay un buscador y la sección interactiva en la que se invita a ver y escuchar (vídeo, audio, fotografías y una webcam de Nashville). También tiene una sección para niños, una tienda de productos relacionada con la campaña y la posibilidad de descargar los contenidos a un PDA.

GEORGE BUSH

Tecnología interactiva

George Bush Jr., ha hecho una apuesta más osada por la tecnología interactiva. En su [sitio oficial](#) se presenta la GwB TV, una emisora de televisión para Internet que ofrece tres canales para que los internautas se puedan acercar al mensaje del candidato republicano. Utilizando Real Player y Windows Media Player, quienes accedan a este sitio pueden elegir

entre comerciales, palabras de apoyo y discursos. El sitio web del actual gobernador número 46 del Estado de Texas, que ha caracterizado su mandato por ordenar la ejecución de más de 130 personas que habían sido condenadas a muerte por la justicia texana, está organizado también en tres columnas. La central ofrece diversas informaciones actualizadas del candidato, además de enlaces a noticias, secciones de voluntarios, etcétera. Novedoso es el eTrain, una sección que da la posibilidad de saber dónde se encuentra el tren con el que el candidato recorre el país haciendo campaña, además de la posibilidad de personalizar el sitio. La columna de la izquierda de la pantalla cuenta con un menú de contenidos, en los que destaca la información sobre el tándem Bush-Cheney (candidato a presidente y vicepresidente, respectivamente, de Estados Unidos por el Partido Republicano), noticias e informaciones, multimedia, programa, calendario de actividades y una sección para hacer contribuciones a la campaña. Destaca una ingeniosa calculadora de impuestos, en la que el internauta puede calcular los beneficios que podría obtener en su tributación si gana Bush Jr. La columna de la derecha de la pantalla contiene el vínculo a GwBTV, a un trivial, acceso a grupos de apoyo, como profesionales, médicos, afroamericanos o veteranos y conexiones a los distintos estados en los que se desarrollará la campaña. El sitio de Bush también toma conciencia del papel de los latinos en estas elecciones y por ello cuenta con una versión en español.

CRÍTICAS

La otra cara

Por el nombre de la URL, <http://www.algore-2000.org>, no habrán sido pocos los que hayan caído en este web pensando que se trataba del sitio oficial del candidato. Pero, al echar un vistazo, es fácil darse cuenta de sus diferencias. El menú de contenidos reemplaza los originales por temas como Mentiras, Hipocresías y Escándalos, entre otros. Es un sitio en el que se ataca sin tregua a Gore. En un estilo un poco más suave, el sitio <http://www.nogo re.org>, también alerta sobre el peligro de que el vicepresidente de Estados Unidos ocupe el primer sillón de la Casa Blanca. Además de los contenidos contra Gore, hay una serie de vínculos a otros web relacionados con el tema.

Risas para Bush

Se le critica su ignorancia en temas globales, su tono campechano y, por supuesto, su defensa de la pena de muerte en el estado de Texas, del cual es gobernador. Esas mismas críticas son las que se repiten en los sitios web que están en contra de George Bush como candidato a la presidencia de Estados Unidos. Un ejemplo es el sitio <http://www.littlegeorgebush.com> en el que se ridiculiza a Bush Jr y se siguen sus pasos desde que era un bebé, llamándole poppy. Otro es <http://www.stopbush2000.com>, en el que “No elegir a Bush” es la consigna y para ello se convoca a artistas para que envíen sus afiches irónicos para ser publicados en esta anti-campaña contra el republicano.

The supplement to include/understand the digital world

The WORLD - Thursday, 19 of October of 2000 - Number 16

Internet | INITIATIVES

The fourth power grows. The network is stopping being marginal means in the American electoral campaign. As much that the white house has designated a spokesman for electronic means. and if the candidates have extended to the Web their interventions, the volunteers do not remain back

ELECTIONS THE USA **For the first time, Internet counts**

M. VALDEBENITO/J.
PARRADO

The cabinet of press of the White House and the Department of State is the feudos of the American traditional press with national distribution. But the panorama is changing. The recent encounter between 12 reporters online with the head of personnel of the White House, John Podesta, was more than a symbolic meeting. "president Clinton ordered clearly the development of a strategy for Internet", assures Mark Kitchen, recently ascended to spokeswoman for electronic means.

The creation of this subdepartment is an answer to the constant increase of cybernetic means that demand information of the White House. "Although their demands are very similar to those of the press or the television, this type of reporter usually is interested in subjects of legislation in the matter of technology and new economy", explains Kitchen. At the moment, a twenty of reporters of average digitalises is credited before the White House. Most corresponds to the versions online of megagrupos of information like Cnn, NBC, ABC Television, but also they appear means born in Internet like Znet News or Slate (of Microsoft).

So far, the press conferences are made in the narrow room of conferences of the White House, but Kitchen hopes that shortly conference halls can be developed online to lodge the wheels of digital correspondents.

The increase of the attention to average digitalises is parallel to the growth of the hearing of the news online, specially between the young public and better prepared. A survey of the last

month of June of the Pew Research for Center the People and the Press assured that a third of the hearing at least once looks for the news online the week, as opposed to 20% that it did two years ago. The number goes off when it is economic information. A 50% of the public interested in the stock markets consult the digital channels.

The certain thing is that, the country of Internet, the Network it has been transformed into a fundamental tool for the candidates, that they have mounted pages Web in which they expose his main ideas, they offer tools multimedia and they unfold a series of means with so catching to the voting potentials.

SALE OF VOTES . As much it is so the voters have been many who are offering their vote through the Network. The Web site of [VoteAuction](#) has reached the 5,500 registries with its formula "to approach plus Capitalism and the democracy". The auction of votes is promoted with this warning: "Plan you to remain in house the day of the elections? Now he can obtain an economic benefit selling his vote to the best postor ".

The swords are in all the stop and the problems dispute one to one, which does very difficult to venture any result. In Internet there is [a site](#) that makes continuous surveys on intention of vote, and one of its last results granted a technical tie to 40% between Gore and Bush.

Although by internauts, it seems that the first position has the republicans. According to a recent study of [Average Metrix and Jupiter Average dedicated](#) Metrix to analyze the use which they do of the Network both divided in heddle, it concludes that a 36.8% of the registered republicans are usuary of Internet, surpassing to 27.9% that the democrats obtain. The use which they make of Internet both formation diametrically is opposed. While the republicans visit in greater measurement the sites dedicated to the finances and the businesses, that support to A Gore are registered in sites of gratuitous access which they allow to know the preferences better the internauts.

The users of the Network of both parties turn the new technologies a fundamental center in the campaign. Gore promises to finish connecting all the schools from the United States to the Network, project that she has impelled from the vice-presidency. A firm defender of the growth of Internet and the electronic commerce defines itself as, reason why he is arranged to avoid the excess of taxes to the sales online, that can harm the global market. George Bush, on the other hand, proposes the creation of a and-Government, for which he will name to a director of the Department of Information of the Federal Government, who will be responsible to make reality the vision of a truely digital government, focused to the service of the citizen. In addition, he tries to invest 20,000 million pesetas for the support of this initiative.

The electoral show is transferred for the first time to the Network Perhaps there, the race by the presidency is defined better than after a televising debate, by the others more and more predictable, mechanical and in nothing interactive.

DEBATE "Online"

Resistance of opinions

The 3 of October were carried out first of three televising presidential debates between George Bush Jr and to Gore. According to the numbers of hearing, almost 40 million the people followed first the face face of the candidates, an inferior number to 46 million that saw

the debate between Bill Clinton and Bob Dole, in 1996, and much smaller of 80 million which they marked the record, in 1980, to see Ronald Reagan and Jimmy Carter. But the television is not the only channel in which it struggles. The Markle Foundation, independent organization without profit spirit, maintains a Web in which both candidates go to the population, answer their questions and oppose their ideas. It is the first time in the history of the country that the aspirings to the White House face through Internet. The [White page and Blue Cyber Debate](#) offers videos of Gore, Bush, and the other two candidates, Ralph Nader and Pat Buchanan, in which daily questions are formulated and the candidates explain their proposals.

TO GORE

"They see know us"

The official site of [Gore](#) has a quite well-taken care of interface. With white bottom where the colors predominate blue and red, the welcome page offers a simple format without graphical images in movement nor that slow down the unloading of the information. It is organized in three columns: the wider power station and contains updated data of the activities of the candidate and shows the thought of Gore on key subjects of the campaign, like health, education and taxes. On the head of the site it is possible to be acceded to his program on agriculture, defense, reform of the financing of the campaigns and new technologies and Internet, among others. In the first column, to the left of the screen, Gore and their wife, Tipper appear a series of small photographs with the image of A, next to the candidate to vice-president Joseph Lieberman and his Hadassha woman. On the photos a holder: "They see know us" invites namely more to the voters on the life of the candidates. Also there is a section in which one requests opinion and critics on the ideas of the candidate. For it the state to which it is belonged or to one of the groups that represent it, like Afro-American, discapacitados, educating, Latin industrialists can be chosen or. This last one can be decisive in the final definition of this electoral race in which they are practically even. For that reason, the site also has a version in Spanish. Another section is the one of Gorennet, directed to the American young people. In the column of the right of the screen there is a finder and the interactive section in which it is invited to see and to listen (video, audio, photographs and one webcam of Nashville). Also it has a section for children, a product store related to the campaign and the possibility of unloading the contents to a PDA.

GEORGE BUSH

Interactive technology

George Bush Jr, has made one more a bet daring by the interactive technology. In its [official site](#) the GwB appears TV, a transmitter of television for Internet that offers three channels so that the internauts can be approached the message of the republican candidate. Using Real Player and Windows Average Player, that accede to this site can choose between commercial, words of support and speeches. The Web site of the present governor number 46 of the State of Texas, that has characterized its mandate to order the execution of more

than 130 people than they had been the condemned until death by texana justice, is also organized in three columns. The power station offers diverse updated information of the candidate, in addition to connections to the news, sections of volunteers, et cetera. Novel he is eTrain, a section that gives the possibility of knowing where is the train with which the candidate crosses the country doing campaign, in addition to the possibility ofing personalize the site. The column of the left of the screen counts on a menu of contents, in which it emphasizes the information on the Bush-Cheney tandem (candidate to president and vice-president, respectively, of the United States by the Republican Party), the news and information, multimedia, program, calendar of activities and a section to make contributions to the campaign. It emphasizes an ingenious computer of taxes, in which the internaut can calculate the benefits that could obtain in their tributación if Bush Jr wins. The column of the right of the screen contains the bond to GwBTV, to a trivial one, access to support battalions, like professionals, doctors, Afro-American or veteran and connections to the different states in which the campaign will be developed. The site of Bush also becomes aware from the paper of the Latins in these elections and for that reason it counts on a version in Spanish.

CRITICS

The other face

By the name of the URL, <http://www.algore-2000.org>, those will not have been few that have fallen in this Web thinking that it was the official site of the candidate. But, when throwing a look, is easy to realize its difference. The menu of contents replaces the original ones by subjects like Lies, Hipocresías and Esca'ndalos, among others. It is a site in which it is attacked without truce Gore. In a style a little smoother, the site <http://www.nogore.org>, also alerts on the danger that the vice-president of the United States occupies the first armchair of the White House. In addition to the contents against Gore, there is a series of bonds to other Web related to the subject.

Risas para Bush

Se le critica su ignorancia en temas globales, su tono campechano y, por supuesto, su defensa de la pena de muerte en el estado de Texas, del cual es gobernador. Esas mismas críticas son las que se repiten en los sitios web que están en contra de George Bush como candidato a la presidencia de Estados Unidos. Un ejemplo es el sitio <http://www.littlegeorgebush.com> en el que se ridiculiza a Bush Jr y se siguen sus pasos desde que era un bebé, llamándole poppy. Otro es <http://www.stopbush2000.com>, en el que “No elegir a Bush” es la consigna y para ello se convoca a artistas para que envíen sus afiches irónicos para ser publicados en esta anti-campaña contra el republicano.

ARIADNA@

El suplemento para comprender el mundo digital

EL MUNDO - Jueves, 19 de octubre de 2000 - Número 16

INTERNET | INICIATIVAS

El cuarto poder crece. La red está dejando de ser un medio marginal en la campaña electoral estadounidense. Tanto que la casa blanca ha designado un portavoz para los medios electrónicos. y si Los candidatos han extendido a la web sus intervenciones, los voluntarios no se quedan atrás

ELECCIONES USA

Por primera vez, Internet cuenta

M. VALDEBENITO/J.
PARRADO

El gabinete de prensa de la Casa Blanca y del Departamento de Estado son los feudos de la prensa tradicional estadounidense con distribución nacional. Pero el panorama está cambiando. El reciente encuentro entre 12 reporteros on-line con el jefe de personal de la Casa Blanca, John Podesta, era más que una reunión simbólica. “El presidente Clinton ordenó claramente el desarrollo de una estrategia para Internet”, asegura Mark Kitchen, recientemente ascendido a viceportavoz para medios electrónicos.

La creación de este subdepartamento es una respuesta al constante aumento de medios cibernéticos que reclaman información de la Casa Blanca. “Aunque sus demandas son muy similares a las de la prensa o la televisión, este tipo de reportero suele interesarse por asuntos de legislación en materia de tecnología y nueva economía”, explica Kitchen.

Actualmente, una veintena de reporteros de medios digitales están acreditados ante la Casa Blanca. La mayor parte corresponde a las versiones on-line de megagrupos de información como CNN, NBC, ABC Television, pero también figuran medios nacidos en Internet como Znet News o Slate (de Microsoft).

Por ahora, las ruedas de prensa se realizan en la angosta habitación de conferencias de la Casa Blanca, pero Kitchen espera que en breve se puedan desarrollar salas de conferencia on-line para albergar las ruedas de corresponsales digitales.

El incremento de la atención a los medios digitales es paralelo al crecimiento de la audiencia de noticias on-line, especialmente entre el público joven y mejor preparado. Una encuesta del pasado mes de junio del Pew Research Center for the People and the Press aseguraba que un tercio de la audiencia busca noticias on-line al menos una vez a la semana, frente al 20% que lo hacía hace dos años. La cifra se dispara cuando se trata de información económica. Un 50% del público interesado en los mercados bursátiles consulta los canales digitales.

Lo cierto es que, en el país de Internet, la Red se ha transformado en una herramienta fundamental para los candidatos, que han montado páginas web en las que exponen sus principales ideas, ofrecen herramientas multimedia y despliegan una serie de medios con tal de captar a los potenciales votantes.

VENTA DE VOTOS. Tanto es así que han sido muchos los votantes que están ofreciendo su voto a través de la Red. El sitio web de **VoteAuction** ha alcanzado los 5.500 registros con su fórmula de “acercar más el capitalismo y la democracia”. La subasta de votos se promociona con este aviso: “¿Planea usted permanecer en casa el día de las elecciones? Ahora puede obtener un beneficio económico vendiendo su voto al mejor postor”.

Las espadas están en todo lo alto y las papeletas se disputan una a una, lo que hace muy difícil aventurar cualquier resultado. En Internet hay un sitio que realiza continuas encuestas sobre intención de voto, y uno de sus últimos resultados otorgaba un empate técnico a 40% entre Gore y Bush. Aunque por internautas, parece que el primer puesto lo tienen los republicanos. Según un reciente estudio de Media Metrix y Jupiter Media Metrix dedicado a analizar el uso que hacen de la Red los dos partidos en liza, concluye que un 36,8% de los republicanos registrados es usuario de Internet, superando al 27,9% que logran los demócratas.

El uso que hacen de Internet ambas formaciones es diametralmente opuesto. Mientras los republicanos visitan en mayor medida los sitios dedicados a las finanzas y los negocios, quienes apoyan a Al Gore están registrados en sitios de acceso gratuito que permiten conocer mejor las preferencias de los internautas.

Los usuarios de la Red de ambos partidos convierten las nuevas tecnologías en un centro fundamental en la campaña. Gore promete terminar de conectar todas las escuelas de Estados Unidos a la Red, proyecto que ha impulsado desde la vicepresidencia. Se define como un firme defensor del crecimiento de Internet y del comercio electrónico, por lo que está dispuesto a evitar el exceso de impuestos a las ventas on-line, que pueden perjudicar al mercado global. George Bush, por su parte, propone la creación de un e-Gobierno, para lo que se nombrará a un director del Departamento de Información del Gobierno Federal, que será responsable de hacer realidad la visión de un gobierno verdaderamente digital, enfocado al servicio del ciudadano. Además, pretende invertir 20.000 millones de pesetas para el apoyo de esta iniciativa.

El show electoral se traslada por primera vez a la Red. Tal vez ahí, la carrera por la presidencia se defina mejor que tras un debate televisivo, por lo demás cada vez más predecible, mecánico y en nada interactivo.

DEBATE “ON-LINE”

Contraste de opiniones

El 3 de octubre se llevó a cabo el primero de tres debates presidenciales televisivos entre George Bush Jr y Al Gore. Según las cifras de audiencia, casi 40 millones las personas siguieron el primer cara a cara de los candidatos, una cifra inferior a los 46 millones que vieron el debate entre Bill Clinton y Bod Dole, en 1996, y mucho menor de los 80 millones que marcaron el récord, en 1980, para ver a Ronald Reagan y Jimmy Carter. Pero la televisión no es el único canal en el que se debate. La Fundación Markle, organización independiente sin ánimo de lucro, mantiene un web en el que ambos candidatos se dirigen a la población, contestan a sus preguntas y contraponen sus ideas. Es la primera vez en la historia del país que los aspirantes a la Casa Blanca se enfrentan a través de Internet. La página [White and Blue Cyber Debate](#) ofrece vídeos de Gore, Bush, y los otros dos candidatos, Ralph Nader y Pat Buchanan, en los que se formulan preguntas diarias y los candidatos explican sus propuestas.

AL GORE

“Ven a conocernos”

El sitio oficial de [Gore](#) tiene una interfaz bastante cuidada. Con fondo blanco donde predominan los colores azul y rojo, la página de bienvenida ofrece un formato simple sin imágenes en movimiento ni gráficos que retarden la descarga de la información. Se organiza en tres columnas: la central y más ancha contiene datos actualizados de las actividades del candidato y muestra el pensamiento de Gore sobre temas claves de la campaña, como salud, educación e impuestos. Sobre la cabecera del sitio se puede acceder a su programa sobre agricultura, defensa, reforma de la financiación de las campañas y nuevas tecnologías e Internet, entre otros. En la primera columna, a la izquierda de la pantalla, aparecen una serie de pequeñas fotografías con la imagen de Al Gore y su esposa, Tipper, junto al candidato a vicepresidente Joseph Lieberman y su mujer Hadassha. Sobre las fotos un titular: “Ven a conocernos” invita a los electores a saber más sobre la vida de los candidatos.

También hay una sección en la que se pide opinión y críticas sobre las ideas del candidato. Para ello se puede escoger el estado al que se pertenece o a uno de los grupos que lo representa, como afroamericanos, discapacitados, educadores, empresarios o latinos. Este último puede ser decisivo en la definición final de esta carrera electoral en la que están prácticamente igualados. Por ello, el sitio tiene también una versión en español. Otra sección es la de Gorennet, dirigida a los jóvenes estadounidenses. En la columna de la derecha de la pantalla hay un buscador y la sección interactiva en la que se invita a ver y escuchar (vídeo, audio, fotografías y una webcam de Nashville). También tiene una sección para niños, una tienda de productos relacionada con la campaña y la posibilidad de descargar los contenidos a un PDA.

GEORGE BUSH

Tecnología interactiva

George Bush Jr., ha hecho una apuesta más osada por la tecnología interactiva. En su [sitio oficial](#) se presenta la GwB TV, una emisora de televisión para Internet que ofrece tres canales para que los internautas se puedan acercar al mensaje del candidato republicano. Utilizando Real Player y Windows Media Player, quienes accedan a este sitio pueden elegir entre comerciales, palabras de apoyo y discursos. El sitio web del actual gobernador número 46 del Estado de Texas, que ha caracterizado su mandato por ordenar la ejecución de más de 130 personas que habían sido condenadas a muerte por la justicia texana, está organizado también en tres columnas. La central ofrece diversas informaciones actualizadas del candidato, además de enlaces a noticias, secciones de voluntarios, etcétera. Novedoso es el eTrain, una sección que da la posibilidad de saber dónde se encuentra el tren con el que el candidato recorre el país haciendo campaña, además de la posibilidad de personalizar el sitio. La columna de la izquierda de la pantalla cuenta con un menú de contenidos, en los que destaca la información sobre el tándem Bush-Cheney (candidato a presidente y vicepresidente, respectivamente, de Estados Unidos por el Partido Republicano), noticias e informaciones, multimedia, programa, calendario de actividades y una sección para hacer contribuciones a la campaña. Destaca una ingeniosa calculadora de impuestos, en la que el internauta puede calcular los beneficios que podría obtener en su tributación si gana Bush Jr. La columna de la derecha de la pantalla contiene el vínculo a GwBTV, a un trivial, acceso a grupos de apoyo, como profesionales, médicos, afroamericanos o veteranos y conexiones a los distintos estados en los que se desarrollará la campaña. El sitio de Bush también toma conciencia del papel de los latinos en estas elecciones y por ello cuenta con una versión en español.

CRÍTICAS

La otra cara

Por el nombre de la URL, <http://www.algore-2000.org>, no habrán sido pocos los que hayan caído en este web pensando que se trataba del sitio oficial del candidato. Pero, al echar un vistazo, es fácil darse cuenta de sus diferencias. El menú de contenidos reemplaza los originales por temas como Mentiras, Hipocresías y Escándalos, entre otros. Es un sitio en el

que se ataca sin tregua a Gore. En un estilo un poco más suave, el sitio <http://www.nogore.org>, también alerta sobre el peligro de que el vicepresidente de Estados Unidos ocupe el primer sillón de la Casa Blanca. Además de los contenidos contra Gore, hay una serie de vínculos a otros web relacionados con el tema.

Risas para Bush

Se le critica su ignorancia en temas globales, su tono campechano y, por supuesto, su defensa de la pena de muerte en el estado de Texas, del cual es gobernador. Esas mismas críticas son las que se repiten en los sitios web que están en contra de George Bush como candidato a la presidencia de Estados Unidos. Un ejemplo es el sitio <http://www.littlegeorgebush.com> en el que se ridiculiza a Bush Jr y se siguen sus pasos desde que era un bebé, llamándole poppy. Otro es <http://www.stopbush2000.com>, en el que “No elegir a Bush” es la consigna y para ello se convoca a artistas para que envíen sus afiches irónicos para ser publicados en esta anti-campaña contra el republicano.

What

This is my first attempt at trying to build a [Wiki](#)-like knowledge base on top of the Flutterby content management system.

This is a place for explanation, description and static links on a topic that's either too broad to be covered under a single link, or that you're just too lazy to find the real link to.

Entries are automatically generated.

Add A Section About: interactive drama

Note that you can use the radio buttons by each section heading to put this commentary in the middle, or leave it at the end: . Editing existing comments is *strongly* encouraged. Links to stable outside resources as well. This part isn't meant to be about discussion but about information.

Title:

Format with:

(You should probably use "Text" mode: URLs will be mostly recognized and linked, `_underscore quoted_ text` is looked up in a glossary, `_underscore quoted_ (http://xyz.pdq)` becomes a link, without the link in the parenthesis it becomes a `<cite>` and link to the [Flutterby Knowledgebase](#) definition. Two enters (ie: a blank line) gets you a new paragraph, special treatment for paragraphs that are manually indented or start with `"#"` (as in `"#include"` or `"#!/usr/bin/perl"`), `"/* "` or `">"` (as in a quoted message) or look like lists, or within a paragraph you can use a number of HTML tags:

`p`, `img`, `br`, `hr`, `a`, `sub`, `sup`, `tt`, `i`, `b`, `h1`, `h2`, `h3`, `h4`, `h5`, `h6`, `cite`, `em`, `strong`, `code`, `samp`, `kbd`, `pre`, `blockquote`, `address`, `ol`, `dl`, `ul`, `dt`, `dd`, `li`, `dir`, `menu`, `table`, `tr`, `td`, `th`

Connectivity provided by [highertech.net](#) , awesome bandwidth, well away from fault lines and other potential for natural disasters, reliable, and run by cool people.

What

This is my first attempt at trying to build a [Wiki](#)-like knowledge base on top of the Flutterby content management system.

This is a place for explanation, description and static links on a topic that's either too broad to be covered under a single link, or that you're just too lazy to find the real link to.

Entries are automatically generated.

Add A Section About: interactive drama

Note that you can use the radio buttons by each section heading to put this commentary in the middle, or leave it at the end: . Editing existing comments is *strongly* encouraged. Links to stable outside resources as well. This part isn't meant to be about discussion but about information.

Title:

Format with:

(You should probably use "Text" mode: URLs will be mostly recognized and linked, `_underscore quoted_` text is looked up in a glossary, `_underscore quoted_` (`http://xyz.pdq`) becomes a link, without the link in the parenthesis it becomes a `<cite>` and link to the [Flutterby Knowledgebase](#) definition. Two enters (ie: a blank line) gets you a new paragraph, special treatment for paragraphs that are manually indented or start with "#" (as in "#include" or "#!/usr/bin/perl"), "/* " or ">" (as in a quoted message) or look like lists, or within a paragraph you can use a number of HTML tags:

p, img, br, hr, a, sub, sup, tt, i, b, h1, h2, h3, h4, h5, h6, cite, em, strong, code, samp, kbd, pre, blockquote, address, ol, dl, ul, dt, dd, li, dir, menu, table, tr, td, th

Connectivity provided by [highertech.net](#) , awesome bandwidth, well away from fault lines and other potential for natural disasters, reliable, and run by cool people.

1986/1987

- Die Post (heute DTAG) sperrt die Angebote des CCC an öffentlichen BTX-Terminals
 - http://www.chscene.ch/ccc/chalisti/chalisti_08/002_HBX2.html

1996

- Die Mannheimer Staatsanwaltschaft ermittelt am 25.01.1996 gegen Ernst Zündel, einem in Kanada lebenden Rechtsradikalen, wegen des Verdachts auf Volksverhetzung. Zündel gilt als Verbreiter der Ausschwitzlüge, die in Deutschland unter Strafe gestellt ist. Unter anderem wird auch überprüft, ob sich die Verantwortlichen von Providern wie T-Online oder CompuServe "strafbar gemacht haben, weil sie inländischen Interessenten den Zugang zum Internet ermöglichen." Aufgrund dessen sperrt T-Online einen Tag später www.webcom.com, den Server der Zundel-Site. Dieser Sperre schliessen sich kurz darauf auch das Baden-Württembergische Hochschulnetz (BelWü) und das Deutsche Forschungsnetz (DFN) an, das DFN aber nicht, weil sie selbst in das Blickfeld der Ermittlungen gelangt sind, sondern nur unter "Berufung auf die "Tagespresse".
 - <http://www.informatik.uni-bremen.de/~thoddi/referate/IuG/zundel.html>
- "Internet Content Task Force"/Bocatel-RA Schneider arbeitet an Sperrkonzepten. Dort

ging es offensichtlich um KiPo in Brasilien, unabhängig vom Fall Radikal.

- <http://www.heise.de/newsticker/data/un-16.09.96-000/>
- Zu diesem schrieb Schneider 14 Tage(!) vorher noch als Sprecher der Internet Content Task Force (ICTF) des ECO e.V. einen öffentlichen Kommentar, in dem er sich eigentlich recht eindeutig gegen Sperren, bzw. deren technische Möglichkeit ausspricht, sie den dem ECO e.V. angeschlossenen Providern aber doch empfiehlt:
 - Konserve unter <http://web.archive.org/web/19970202201357/http://www.anwalt.de/ictf/p960901d.htm>
 - Stellungnahme zur "Beihilfe" durch Internet Service Provider RA Michael Schneider, eco e.V.
 - <http://web.archive.org/web/19971022224623/www.anwalt.de/ictf/ispwww27.htm>
- Die Bundesanwaltschaft macht die Internetprovider, huhl über RA Schneider ICTF/eco auf Radikal bei xs4all.nl aufmerksam (siehe oben). Mindestens crontrib.net, space.net, PoP und
 - Teilweise wird <http://www.ourworld.compuserve.com/> wegen der Homepage von Angela Marquard auch gleich mitgesperrt, später von Compuserve gelöscht: <http://www.heise.de/newsticker/data/fm-13.09.96-001/>
 - "Radikal"-Verfahren gegen Provider eingestellt: <http://www.heise.de/newsticker/data/ame-31.01.98-000/>
 - SPIEGEL-Gespräch: Generalbundesanwalt Kay Nehm über die Chancen der Ermittler bei der Verbrecherjagd im Internet: <http://www.fitug.de/debate/9611/msg00050.html>

1997

- Der gleiche Tanz nochmal, diesmal sperrt das DFN.
 - <http://www.heise.de/tp/deutsch/inhalt/te/1194/1.html>
 - <http://www.heise.de/newsticker/data/un-17.04.97-000/>

 - <http://www.heise.de/newsticker/data/un-09.09.96-000/>
 - <http://www.heise.de/newsticker/data/fm-13.09.96-001/>
- Verfahren gegen Angela Marquardt
 - Weiteres Verfahren gegen Angela Marquardt: <http://www.heise.de/newsticker/data/fm-11.03.97-001/>
 - Verfahren gegen Angela Marquardt eröffnet: <http://www.heise.de/newsticker/data/>

[fr-06.06.97-000/](#)

- Angela Marquardt freigesprochen: <http://www.heise.de/newsticker/data/fm-30.06.97-000/>
- Wau Holland: Zensur in der Bitbananenrepublik: <http://www.heise.de/tp/deutsch/inhalt/te/1180/1.html>
- "Selbstregulierung" einmal anders: Nach KiPo-Vorwurf und Razzia beim Provider Vip schalten "Österreicher schalten Internet ab"
 - <http://www.heise.de/newsticker/data/jus-24.03.97-000/>

1998

- das Radikal-Verfahren wird eingestellt
 - <http://www.heise.de/tp/deutsch/inhalt/te/1388/1.html> Guter Überblick unter: <http://www.nadir.org/nadir/archiv/Medien/Zeitschriften/radikal/netzzensur/>
- Die Bundespolizei hat Schweizer Internet-Service-Anbieter aufgefordert, rassistische Internetseiten im Ausland dem Zugriff ihrer Kunden zu entziehen. Damit soll offenbar ein Pilotprozess in Sachen Rassismus im Internet vorbereitet werden. Das überstürzte Vorgehen der Bundespolizei provozierte Kopfschütteln und Verärgerung. Nicht nur wurden viele technische Probleme übersehen, es gibt auch Rechtsunsicherheiten.
 - <http://md.hudora.de/blog/guids/72/03/319981016213300472.html>
 - Schweizer Polizei läßt Web-Sites sperren (c't 17/1998, S. 32): `(Es) steht mit dem durch Sie gegebenenfalls ermöglichten Zugang zu den entsprechenden Sites eine Strafbare Gehilfenschaft (...) in Frage.`
- "PSINet Deutschland, will ein 'jugendfreies' und 'gesetzestreu' Surfen" über Proxyserver mit "geheimen" Filterlisten ermöglichen wollten** <http://www.heise.de/newsticker/data/ame-30.10.98-000/>
 - <http://www.heise.de/tp/deutsch/inhalt/te/1619/1.html>
- ADL HateFilter: Internet-Filter für diskriminierende Webpages. Powered by ICRA.
 - <http://www.heise.de/tp/deutsch/inhalt/te/1645/1.html>
 - <http://www.adl.org/hatefilter/default.asp>
- BKA will Provider zur Sperrung illegaler Inhalte verpflichten. Provider sollen eigenständig nach strafrechtlich relevanten Daten auf ihren Systemen suchen und auf Anfrage Verkehrsdaten bereitstellen. Der Vorstoß wird u.a. von Fitug heftig kritisiert:
 - <http://www.heise.de/newsticker/data/ad-16.12.98-000/>
 - <http://www.heise.de/tp/deutsch/inhalt/te/1721/1.html>
 - <http://www.fitug.de/news/bka-pe.html>

- Man glaubt es kaum, aber auch die Fachzeitschrift iX fand providerseitige Filter mal ganz toll: "Einen Ansatz ganz anderer Art verfolgt Bess. Hier muß nicht ein Filterprogramm auf dem PC installiert werden, sondern der Internet-Provider Bess selbst agiert als Filter. (Hallo, liest ein Mitarbeiter der Deutschen Telekom diese Zeilen? Ich möchte solch einen Service von Ihnen!) Bess-Mitarbeiter übernehmen das Monitoring und sorgen dafür, daß Zugriffe auf nicht kindgerechte Server abgewiesen werden. Ein grandios einfacher Gedanke, der hoffentlich reichlich Nachahmer findet. (ka)" - <http://www.heise.de/ix/artikel/1998/09/142/>

1996-1999

- CompuServe/Somm
 - c't 02/1996, Seite 14: Pornowächter versus Internet, Proteste gegen bayerische Datensperre. Alles nur ein "Übersetzungsfehler"?
 - CompuServe-Chef unter Pornographie-Anklage: <http://www.heise.de/newsticker/data/cp-16.04.97-000/>
 - CompuServe reagiert auf Porno-Anklage: <http://www.heise.de/newsticker/data/ad-17.04.97-000/>
 - 05.08.1998: Verurteilung als "nationale Geisel": <http://www.heise.de/tp/deutsch/inhalt/te/1515/1.html>
 - c't 11/1998, Seite 34: Bundesrepublik gegen Internet, Rechtsgrundlage im Somm-Prozeß umstritten

2000

- Die Uni Erlangen versucht sich nach einem KiPo-Fund im Sperren von Webseiten .. und scheitert:
 - <http://www.heise.de/newsticker/data/ad-26.10.00-000/>
- Yahoo! soll Nazi-Auktionen in Frankreich nicht anzeigen. Wenn Yahoo nicht folgt, sollen die Provider 'ran.
 - <http://www.heise.de/tp/deutsch/inhalt/te/4203/1.html>
- Potentiell "rechtsradikale" Internet-Domain(-Namen) beim Web-Hoster Strato
 - Bundesjustizministerium bietet sich als Koordinator fuer eine Liste mit "anstößigen Internet-Adressen" an, um die "Vergabe solcher Adressen künftig zu verhindern"; Denic löscht die Domains; Rechtslage bleibt unklar, zumindest

wenn keine strafrechtlich relevanten Inhalte hinterlegt sind (Quelle: c't 17/2000, Seite 28)

- <http://www.heise.de/newsticker/data/mbb-07.08.00-000/>
- <http://www.heise.de/newsticker/data/fr-08.08.00-000/>
- <http://www.heise.de/tp/deutsch/inhalt/te/8503/1.html>
- Denic hält nicht viel von einer "Schwarzen Liste": <http://www.heise.de/newsticker/data/hob-09.08.00-001/>
- Büssow droht den Unternehmen Geldbußen an, möchte ein internationales Gesetz, damit "rechtsradikale Adressen gar nicht erst vergeben werden" und will nötigenfalls gegen Access-Provider vorgehen. IM Behrens sieht das ähnlich: <http://www.heise.de/newsticker/data/jk-26.08.00-005/>

- Die Domain Votauction wird von den Amerikanern gehighjacked
 - <http://www.heise.de/newsticker/data/fr-23.10.00-000/>

- It's not the Nazis, Stupid! Esther Dyson empört sich über Zensurbestrebungen des Bundesjustizministeriums.
 - <http://www.heise.de/tp/deutsch/inhalt/te/4210/1.html>

- Mitverantwortung von DNS-Betreibern: Das hanseatische Oberlandesgericht (OLG) hat einem DNS-Betreiber per einstweiliger Verfügung (AZ 3 U 274/98) verboten, für eine venezuelanische Firma den Domain-Name-Server zu unterhalten und beim InterNIC eine Domain zu verwalten. Auf der Domain wurden ohne Konzession Glücksspiele angeboten, die Richter sahen den DNS-Provider als "Störer" nach UWG (c't 1/2000, S. 19)

- Der Bundesverband der Phonographischen Wirtschaft IFPI fordert providerseitige Filterung, um MP3-Dateien zu sperren. Sie soll bei den Providern unmittelbar vor jenen Routern zum Einsatz kommen, die über eine Verbindung ins Ausland verfügen.

- Die US-Armee sperrt für die Soldaten Seiten über Kriegsoffer im Irak. <http://www.heise.de/newsticker/meldung/51277>
 - <http://www.heise.de/newsticker/data/fr-24.02.00-002/>

2001

- Ankündigung des Düsseldorfer Regierungspräsident Jürgen Büssow auf einer Fachtagung der Aufsichtsbehörden: Anbieter von Internet-Zugängen sollen zur Sperrung von rechtsextremen Webseiten im Ausland verpflichtet werden, inländische Provider sollen ihre "Online-Dienste" nach entsprechenden Inhalten durchsuchen.
 - <http://www.teltarif.de/arch/2001/kw22/s5276.html>
 - <http://www.heise.de/newsticker/data/jk-26.08.00-005/>

- In NRW läuft die Sperrmaschinerie mit einer Anhörung der Provider an
 - <http://www.telepolis.de/deutsch/inhalt/te/9902/1.html>
 - <http://www.fitug.de/debate/0110/msg00557.html>
- l'accuse klagt in Frankreich auf Sperrung von Front14.org
 - <http://www.heise.de/tp/deutsch/inhalt/te/9716/1.html>
- Private Schweizer Initiative bringt Provider zur Sperrung von front14.org
 - <http://www.heise.de/tp/deutsch/inhalt/te/4953/1.html>
- Die Bundestagsfraktion Bündnis90/Die Grünen diskutiert in einem Grundsatzpapier von August die Blockade von Inhalten auf Zugangsebene und empfiehlt diese auf die "quantitativ verhältnismäßig geringe Anzahl von kinderpornografischen Angeboten" zu konzentrieren, da "der Versuch zur Unterbindung des Zugriffs auf einfache Pornografie und extremistische Propaganda, die in vielen Ländern strafrechtlich nicht sanktioniert wird, nicht erfolgversprechend" wäre. Unter der Überschrift "Schützenswerte Freiheitsrechte im Netz" gibt es zumindest eine kleine Relativierung: "Die Maßnahmen zur Unterbindung bestimmter Inhalte im Netz bzw. des Zugriffs auf sie greifen in dieses Grundrecht ein. Sie müssen deshalb sorgfältig abgewogen werden. Dabei ist zu berücksichtigen, dass die Sperrung des Zugriffs auf bestimmte strafbare Inhalte möglicherweise dazu führt, dass auch auf legale Informationen nicht mehr zugegriffen werden kann."
 - <http://www.g-bettin.de/cybercrime.pdf> bzw. http://www.gruene-fraktion.de/rsvgn/rs_datei/0,,171,00.pdf

2002

- Die Bahn AG klagt die Radikalseite zivilrechtlich erfolgreich weg.
- Listen4ever in China bietet MP3s an. ISPs sollen sperren, aber vorher geht die Seite vom Netz. RIAA klagt gegen AT&T Broadband, Cable & Wireless USA, Sprint Corp., Advanced Network Services and UUNET, lassen die Klage aber fallen, nachdem die Seite offline gegangen ist.
 - <http://slashdot.org/articles/02/08/16/2258222.shtml>

 - <http://www.heise.de/tp/deutsch/inhalt/musik/13114/1.html>
- Durch einen IP-Wechsel von front14.org sperrt IP-Plus/Swisscom beziehungsweise Sunrise den Provider Butlerweb - wer hatte denen gesagt, sie sollen front14.org sperren?
 - <http://www.siug.ch/presse/Presse.20020405.html>

- Worldcom wird in Pennsylvania, USA verurteilt den Zugang zu fünf Kinderporno-Sites zu sperren. Zuvor sollen bereits 200 vergleichbare Sperren ohne Gerichtsbeschluss eingerichtet worden sein.
 - <http://www.intern.de/news/3492.html>
 - <http://www.heise.de/newsticker/data/wst-19.09.02-002/>
 - <http://www.heise.de/newsticker/data/anw-18.08.02-002/>
 - <http://www.theregister.co.uk/content/6/26718.html>
- Kein "Jude" bei eBay. Telepolis berichtet über Wortfilter der Auktionsplattform.
 - <http://www.heise.de/tp/deutsch/inhalt/te/12788/1.html>
 - <http://www.wortfilter.de>
- Wegen Ehrverletzung werden schweizer ISPs angewiesen, zwei Webseiten sperren.
 - <http://www.heise.de/newsticker/data/hob-12.12.02-000/>
- Auf Betreiben von Scientology kappt das US-Unternehmen Cignal die Verbindungen des holländischen Providers Xtended Internet. Ein Kunde des Providers hatte eine Seite ins Netz gestellt, die sich kritisch mit der Sekte auseinandersetzt. (Quellen?)
- Israel besetzt und zerstört den einzigen palestinänsischen ISP und IP Infrastruktur
 - <http://www.wired.com/news/print/0,1294,53873,00.html>

2003

- Die Beschwerde der ISPs Schweizer ISPs ist erfolgreich.
 - <http://www.heise.de/newsticker/data/hob-12.12.02-000/>
 - <http://www.symlink.ch/articles/03/02/14/2326231.shtml>
 - <http://md.hudora.de/blog/guids/22/92/3321213426132496.html>
- Die Schweizer ISPs sollen erneut Sperren
 - <http://www.heise.de/newsticker/data/hob-11.06.03-000/>
- Und tun das auch: c't Heft 14, Seite 42, 30.06.2003
- Domains von Online-Headshops ("der Handel mit Utensilien, die primär der Drogennutzung dienen, ist den USA durch Bundesgesetz verboten") und eine Seite aus dem Umfeld der Warex-Szene werden von der US-Justizministerium uebernommen, durch Druck auf die fuer die Domains zustaendigen Registrare, die die DNS-Eintraege fuer die Domains umbiegen mussten - ganz OHNE gerichtlichen Beschluß.
 - <http://www.intern.de/news/4049.html>
 - <http://news.com.com/2102-1023-986225.html>

- Auch im Falle IsoNews, einer Seite auf der zeitnah zum Release NFO-Files aus der Ware-Scene publiziert, wurden die DNS-Einträge umgebogen. Die DNS-Server verweisen nun auf einen Webserver beim Department of Justice (Justizministerium) der USA. Der Server stand in Kanada und wurde noch Wochen später ausgiebig benutzt. Vorgeworfen wurde den Betreibern primär der Handel mit Mod-Chips für die Microsoft Xbox und die PlayStation von Sony, nicht der Vertrieb von Ware. Das gab es schlicht nicht.
 - <http://www.telepolis.de/deutsch/special/copy/14278/1.html>
- Es wird gegen einen Registrar ermittelt, weil der Registrant auf der Domain Schweinkram hat - ogrish.com

 - <http://www.heise.de/newsticker/data/un-09.09.96-000/>
 - <http://www.heise.de/newsticker/data/fm-13.09.96-001/>
- Procedure against Angela Marquardt
 - Further procedure against Angela Marquardt: <http://www.heise.de/newsticker/data/fm-11.03.97-001/>
 - Procedure against Angela Marquardt opens: <http://www.heise.de/newsticker/data/fr-06.06.97-000/>

- Angela Marquardt acquitted: <http://www.heise.de/newsticker/data/fm-30.06.97-000/>
- Wau Holland: Censorship in the bit banana republic: <http://www.heise.de/tp/deutsch/inhalt/te/1180/1.html>
- "self adjustment" once differently: After KiPo reproach and raid with the Provider Vip switch "Austrians switch InterNet off"
 - <http://www.heise.de/newsticker/data/jus-24.03.97-000/>

1998

- the radical procedure is stopped
 - <http://www.heise.de/tp/deutsch/inhalt/te/1388/1.html> good overview under: <http://www.nadir.org/nadir/archiv/Medien/Zeitschriften/radikal/netzzensur/>
- The federal police requested Swiss InterNet service offerer to extract racist InterNet sides abroad from the access of its customers. Thus a pilot process in things racism in the InterNet is obviously to be prepared. The rushed into procedure of the federal police provoked head vibrating and annoying. Only many technical problems were ignored, it give also juridical insecurities.
 - <http://md.hudora.de/blog/guids/72/03/319981016213300472.html>
 - Web Sites lets Swiss police close (17/1998, P. 32 c't): `(Es) punishable assistant shank (...) in question stands. with the entrance to the appropriate Sites, made possible if necessary by you, '
- "PSINet Germany, wants to make a ' youth-free ' and ' law-abiding ' Surfen" over Proxyserver with "secret" filter lists wanted ** <http://www.heise.de/newsticker/data/ame-30.10.98-000> possible/
 - <http://www.heise.de/tp/deutsch/inhalt/te/1619/1.html>
- ADL having filter: InterNet filter for discriminating Webpages. Powered by ICRA.
 - <http://www.heise.de/tp/deutsch/inhalt/te/1645/1.html>
 - <http://www.adl.org/hatefilter/default.asp>
- Federal Bureau of Criminal Investigations wants to obligate Provider to the blockage of illegal contents. Provider are to look for independently for criminally relevant data on their systems and on request traffic data make available. The raid we and others of Fitug violently criticizes:
 - <http://www.heise.de/newsticker/data/ad-16.12.98-000/>
 - <http://www.heise.de/tp/deutsch/inhalt/te/1721/1.html>
 - http://www.fitug.de/news/bka_pe.html

- One hardly believes it, in addition, the Fachzeitschrift ix found providerseitige filters times completely mad: "Bess pursues a beginning of completely different kind. Here a filter program on the PC does not have to be installed, but the InterNet Provider Bess acts as filter. (hello, reads a coworker of the German Telekom these lines? I would like such a service of you!) Bess coworkers take over the monitoring and ensure for the fact that accesses to not child-fair servers are rejected. Grandios a simple thought, which finds hopefully plentifully imitators. (ka)"- <http://www.heise.de/ix/artikel/1998/09/142/>

1996-1999

- CompuServe/Somm
 - c't 02/1996, page 14: Pornowaechter versus InterNet, protests against Bavarian data lock. Everything only a "translation error"?
 - CompuServe boss under Pornographie accusation: <http://www.heise.de/newsticker/data/cp-16.04.97-000/>

 - <http://www.heise.de/tp/deutsch/inhalt/te/9716/1.html>
- Provider brings private Swiss to initiative to the blockage of front14.org
 - <http://www.heise.de/tp/deutsch/inhalt/te/4953/1.html>
- The Bundestag faction Buendnis90/Die the Green discussed in a principle paper of August the blockade of contents on entrance level and recommends to concentrate these on the "quantitatively relatively small number of kinderpornografischen offers", since "the attempt would be not promising for the prevention of the access to simple Pornografie and extremistic propaganda, which are criminally not sanctioned in many countries,". Under the heading "there are protecting values of liberty rights in the net" at least a small relating: "the measures for the prevention of certain contents in the net and/or the access to them intervene in this fundamental right. They must be weighed out therefore carefully. It is to be considered that the blockage of the access to certain punishable contents leads possibly to the fact that also legal information any longer cannot be accessed."

1986/1987

- Die Post (heute DTAG) sperrt die Angebote des CCC an öffentlichen BTX-Terminals
 - http://www.chscene.ch/ccc/chalisti/chalisti_08/002_HBX2.html

1996

- Die Mannheimer Staatsanwaltschaft ermittelt am 25.01.1996 gegen Ernst Zündel, einem in Kanada lebenden Rechtsradikalen, wegen des Verdachts auf Volksverhetzung. Zündel gilt als Verbreiter der Ausschwitzlüge, die in Deutschland unter Strafe gestellt ist. Unter anderem wird auch überprüft, ob sich die Verantwortlichen von Providern wie T-Online oder CompuServe "strafbar gemacht haben, weil sie inländischen Interessenten den Zugang zum Internet ermöglichen." Aufgrund dessen sperrt T-Online einen Tag später www.webcom.com, den Server der Zündel-Site. Dieser Sperre schliessen sich kurz darauf auch das Baden-Württembergische Hochschulnetz (BelWü) und das Deutsche Forschungsnetz (DFN) an, das DFN aber nicht, weil sie selbst in das Blickfeld der Ermittlungen gelangt sind, sondern nur unter "Berufung auf die Tagespresse".
 - <http://www.informatik.uni-bremen.de/~thoddi/referate/IuG/zundel.html>
- "Internet Content Task Force"/Bocatel-RA Schneider arbeitet an Sperrkonzepten. Dort ging es offensichtlich um KiPo in Brasilien, unabh ngig vom Fall Radikal.
 - <http://www.heise.de/newsticker/data/un-16.09.96-000/>
- Zu diesem schrieb Schneider 14 Tage(!) vorher noch als Sprecher der Internet Content Task Force (ICTF) des ECO e.V. einen oeffentlichen Kommentar, in dem er sich eigentlich recht eindeutig gegen Sperren, bzw. deren technische Moeglichkeit ausspricht, sie den dem ECO e.V. angeschlossenen Providern aber doch empfiehlt:
 - Konserve unter <http://web.archive.org/web/19970202201357/http://www.anwalt.de/ictf/p960901d.htm>
 - Stellungnahme zur "Beihilfe" durch Internet Service Provider RA Michael Schneider, eco e.V.
 - <http://web.archive.org/web/19971022224623/www.anwalt.de/ictf/ispwww27.htm>
- Die Bundesanwaltschaft macht die Internetprovider, huhl  ber RA Schneider ICTF/eco auf Radikal bei xs4all.nl aufmerksam (siehe oben). Mindestens crontrib.net, space.net, PoP und
 - Teilweise wird <http://www.ourworld.compuserve.com/> wegen der Homepage von Angela Marquard auch gleich mitgesperrt, sp ter von CompuServe gel scht: <http://www.heise.de/newsticker/data/fm-13.09.96-001/>
 - "Radikal"-Verfahren gegen Provider eingestellt: <http://www.heise.de/newsticker/data/ame-31.01.98-000/>
 - SPIEGEL-Gespr ch: Generalbundesanwalt Kay Nehm  ber die Chancen der Ermittler bei der Verbrecherjagd im Internet: <http://www.fitug.de/debate/9611/msg00050.html>

1997

- Der gleiche Tanz nochmal, diesmal sperrt das DFN.

 - Weiteres Verfahren gegen Angela Marquardt: <http://www.heise.de/newsticker/data/fm-11.03.97-001/>
 - Verfahren gegen Angela Marquardt eröffnet: <http://www.heise.de/newsticker/data/fr-06.06.97-000/>
 - Angela Marquardt freigesprochen: <http://www.heise.de/newsticker/data/fm-30.06.97-000/>
 - Wau Holland: Zensur in der Bitbananenrepublik: <http://www.heise.de/tp/deutsch/inhalt/te/1180/1.html>
- "Selbstregulierung" einmal anders: Nach KiPo-Vorwurf und Razzia beim Provider Vip schalten "Österreicher schalten Internet ab"
 - <http://www.heise.de/newsticker/data/jus-24.03.97-000/>

1998

- das Radikal-Verfahren wird eingestellt
 - <http://www.heise.de/tp/deutsch/inhalt/te/1388/1.html> Guter Überblick unter: <http://www.nadir.org/nadir/archiv/Medien/Zeitschriften/radikal/netzzensur/>
- Die Bundespolizei hat Schweizer Internet-Service-Anbieter aufgefordert, rassistische Internetseiten im Ausland dem Zugriff ihrer Kunden zu entziehen. Damit soll offenbar ein Pilotprozess in Sachen Rassismus im Internet vorbereitet werden. Das überstürzte Vorgehen der Bundespolizei provozierte Kopfschütteln und Verärgerung. Nicht nur wurden viele technische Probleme übersehen, es gibt auch Rechtsunsicherheiten.
 - <http://md.hudora.de/blog/guids/72/03/319981016213300472.html>
 - Schweizer Polizei läßt Web-Sites sperren (c't 17/1998, S. 32): `(Es) steht mit dem durch Sie gegebenenfalls ermöglichten Zugang zu den entsprechenden Sites eine Strafbare Gehilfenschaft (...) in Frage.`
- "PSINet Deutschland, will ein 'jugendfreies' und 'gesetzestreu' Surfen" über

Proxyserver mit "geheimen" Filterlisten ermöglichen wollten** <http://www.heise.de/newsticker/data/ame-30.10.98-000/>

- <http://www.heise.de/tp/deutsch/inhalt/te/1619/1.html>
- ADL HateFilter: Internet-Filter für diskriminierende Webpages. Powered by ICRA.
 - <http://www.heise.de/tp/deutsch/inhalt/te/1645/1.html>
 - <http://www.adl.org/hatefilter/default.asp>
- BKA will Provider zur Sperrung illegaler Inhalte verpflichten. Provider sollen eigenständig nach strafrechtlich relevanten Daten auf ihren Systemen suchen und auf Anfrage Verkehrsdaten bereitstellen. Der Vorstoß wird u.a. von Fitug heftig kritisiert:
 - <http://www.heise.de/newsticker/data/ad-16.12.98-000/>
 - <http://www.heise.de/tp/deutsch/inhalt/te/1721/1.html>
 - <http://www.fitug.de/news/bka-pe.html>
- Man glaubt es kaum, aber auch die Fachzeitschrift iX fand providerseitige Filter mal ganz toll: "Einen Ansatz ganz anderer Art verfolgt Bess. Hier muß nicht ein Filterprogramm auf dem PC installiert werden, sondern der Internet-Provider Bess selbst agiert als Filter. (Hallo, liest ein Mitarbeiter der Deutschen Telekom diese Zeilen? Ich möchte solch einen Service von Ihnen!) Bess-Mitarbeiter übernehmen das Monitoring und sorgen dafür, daß Zugriffe auf nicht kindgerechte Server abgewiesen werden. Ein grandios einfacher Gedanke, der hoffentlich reichlich Nachahmer findet. (ka)" - <http://www.heise.de/ix/artikel/1998/09/142/>

1996-1999

- CompuServe/Somm
 - c't 02/1996, Seite 14: Pornowächter versus Internet, Proteste gegen bayerische Datensperre. Alles nur ein "Übersetzungsfehler"?
 - CompuServe-Chef unter Pornographie-Anklage: <http://www.heise.de/newsticker/data/cp-16.04.97-000/>
 - CompuServe reagiert auf Porno-Anklage: <http://www.heise.de/newsticker/data/ad-17.04.97-000/>

2000

- Die Uni Erlangen versucht sich nach einem KiPo-Fund im Sperren von Webseiten .. und scheitert:
 - <http://www.heise.de/newsticker/data/ad-26.10.00-000/>
- Yahoo! soll Nazi-Auktionen in Frankreich nicht anzeigen. Wenn Yahoo nicht folgt, sollen die Provider 'ran.
 - <http://www.heise.de/tp/deutsch/inhalt/te/4203/1.html>
- Potentiell "rechtsradikale" Internet-Domain(-Namen) beim Web-Hoster Strato
 - Bundesjustizministerium bietet sich als Koordinator fuer eine Liste mit "anstößigen Internet-Adressen" an, um die "Vergabe solcher Adressen künftig zu verhindern"; Denic löscht die Domains; Rechtslage bleibt unklar, zumindest wenn keine strafrechtlich relevanten Inhalte hinterlegt sind (Quelle: c't 17/2000, Seite 28)
 - <http://www.heise.de/newsticker/data/mbb-07.08.00-000/>
 - <http://www.heise.de/newsticker/data/fr-08.08.00-000/>
 - <http://www.heise.de/tp/deutsch/inhalt/te/8503/1.html>
 - Denic hält nicht viel von einer "Schwarzen Liste": <http://www.heise.de/newsticker/data/hob-09.08.00-001/>
 - Büssow droht den Unternehmen Geldbußen an, möchte ein internationales Gesetz, damit "rechtsradikale Adressen gar nicht erst vergeben werden" und will nötigenfalls gegen Access-Provider vorgehen. IM Behrens sieht das ähnlich: <http://www.heise.de/newsticker/data/jk-26.08.00-005/>
- Die Domain **Voteauction** wird von den Amerikanern gehighjacked
 - <http://www.heise.de/newsticker/data/fr-23.10.00-000/>
- It's not the Nazis, Stupid! Esther Dyson empört sich über Zensurbestrebungen des Bundesjustizministeriums.
 - <http://www.heise.de/tp/deutsch/inhalt/te/4210/1.html>
- Mitverantwortung von DNS-Betreibern: Das hanseatische Oberlandesgericht (OLG) hat einem DNS-Betreiber per einstweiliger Verfügung (AZ 3 U 274/98) verboten, für eine venezuelanische Firma den Domain-Name-Server zu unterhalten und beim InterNIC eine Domain zu verwalten. Auf der Domain wurden ohne Konzession Glücksspiele angeboten, die Richter sahen den DNS-Provider als "Störer" nach UWG (c't 1/2000, S. 19)
- Der Bundesverband der Phonographischen Wirtschaft IFPI fordert providerseitige Filterung, um MP3-Dateien zu sperren. Sie soll bei den Providern unmittelbar vor jenen Routern zum Einsatz kommen, die über eine Verbindung ins Ausland verfügen.

- Die US-Armee sperrt für die Soldaten Seiten über Kriegsoffer im Irak. <http://www.heise.de/newsticker/meldung/51277>
 - <http://www.heise.de/newsticker/data/fr-24.02.00-002/>

2001

- Ankündigung des Düsseldorfer Regierungspräsident Jürgen Büssow auf einer Fachtagung der Aufsichtsbehörden: Anbieter von Internet-Zugänge sollen zur Sperrung von rechtsextremen Webseiten im Ausland verpflichtet werden, inländische Provider sollen ihre "Online-Dienste" nach entsprechenden Inhalten durchsuchen.
 - <http://www.teltarif.de/arch/2001/kw22/s5276.html>
 - <http://www.heise.de/newsticker/data/jk-26.08.00-005/>
- In NRW läuft die Sperrmaschinerie mit einer Anhörung der Provider an
 - <http://www.telepolis.de/deutsch/inhalt/te/9902/1.html>
 - <http://www.fitug.de/debate/0110/msg00557.html>
- l'accuse klagt in Frankreich auf Sperrung von Front14.org
 - <http://www.heise.de/tp/deutsch/inhalt/te/9716/1.html>
- Private Schweizer Initiative bringt Provider zur Sperrung von front14.org
 - <http://www.heise.de/tp/deutsch/inhalt/te/4953/1.html>
- Die Bundestagsfraktion Bündnis90/Die Grünen diskutiert in einem Grundsatzpapier von August die Blockade von Inhalten auf Zugangsebene und empfiehlt diese auf die "quantitativ verhältnismäßig geringe Anzahl von kinderpornografischen Angeboten" zu konzentrieren, da "der Versuch zur Unterbindung des Zugriffs auf einfache Pornografie und extremistische Propaganda, die in vielen Ländern strafrechtlich nicht sanktioniert wird, nicht erfolgversprechend" wäre. Unter der Überschrift "Schützenswerte Freiheitsrechte im Netz" gibt es zumindest eine kleine Relativierung: "Die Maßnahmen zur Unterbindung bestimmter Inhalte im Netz bzw. des Zugriffs auf sie greifen in dieses Grundrecht ein. Sie müssen deshalb sorgfältig abgewogen werden. Dabei ist zu berücksichtigen, dass die Sperrung des Zugriffs auf bestimmte strafbare Inhalte möglicherweise dazu führt, dass auch auf legale Informationen nicht mehr zugegriffen werden kann."
 - <http://www.g-bettin.de/cybercrime.pdf> bzw. http://www.gruene-fraktion.de/rsvgn/rs_datei/0,,171,00.pdf

2002

- Die Bahn AG klagt die Radikalseite zivilrechtlich erfolgreich weg.

- Listen4ever in China bietet MP3s an. ISPs sollen sperren, aber vorher geht die Seite vom Netz. RIAA klagt gegen AT&T Broadband, Cable & Wireless USA, Sprint Corp., Advanced Network Services and UUNET, lassen die Klage aber fallen, nachdem die Seite offline gegangen ist.

Top: Society: Activism: Media: Culture_Jamming

Culture jamming, or "media hacking", is the deliberate subversion of media messages (usually advertising). This category is particularly for groups or organizations whose express purpose is to disrupt the institutions of modern, usually Western culture: the corporation, the media, science, religion. In short, their targets are "the Establishment" and most authority. The tactics used are varied, but generally fall in the category of subversive/humorous media stunts. That can range from straight-forward parodies to deliberate hoaxes. At the extremes includes anarchistic acts of "poetic terrorism," like billboard defacement, or "art sabotage", willful acts of destruction in a performance art style.

Akayism

Akay is a young Stockholm artist whose guerilla art contains messages about reclaiming the streets and the idea that public space belongs to public expression.

Andre the Giant Has a Posse

Obey-Giant is artist and skateboarder Shepard Fairey's experiment in phenomenology. It began in 1990 with the "ANDRE THE GIANT HAS A POSSE: 7'4", 520 LB" stickers. Over one million of the stickers have since been distributed worldwide. After enjoined from using the copywritten name "Andre the Giant" in 1996, Fairey has been producing mock-propoganda Obey-Giant posters and stickers.

Billboard Alteration

Altering outdoor advertising to subvert its message.

Called "billboard liberation" or "billboard improvement" by its proponents. Called "vandalism" by its opponents.

Hoaxes

Please submit links to subversive and artistic hoaxes. Deliberate hoaxes for personal gain belong in Society/Issues/Fraud/. Scientific hoaxes belong in Science/Science in Society/Skeptical Inquiry/Hoaxes. Self-propagating hoaxes or fictions (or stranger-than-fictions) belong in Society/Urban Legends.

[more information](#) (editors only)

Deliberate hoaxes that are intended to defraud people of preconceptions, not money or power.

Kill the Dot

Poster campaign featuring posters with a circle-slashed-dot and domain names like "ButIdon'tNeedMyToothpasteDelivered.com", "ShredsOfSomeonesSoulForAuction.com", "AnythingIFoundInMyGarageForSale.com.", and "AllThePornYouCanEat.com".

Nike ID

Nike ID allows users to order personalized Nike sneakers with messages of their choosing stitched on them. They have been reluctant to process orders with subversive words like "sweatshop".

Patenting Own Genes

Donna McLean of Bristol, Great Briton, reportedly became the first person to try and patent her own genes.

Pepsi Shirt on Coke Day

Greenbrier High School of Evans, Georgia, USA, held "Coke in Education Day" to win a \$500 local contest by the Coca-Cola Bottling Company of Augusta, and a national contest with a \$10,000 prize. Coca-Cola was incorporated in various classroom activities. A Coke marketing executive addressed economics students, chemistry students analyzed the sugar content of Coke, and a Coca-Cola cake recipe was prepared in home economics.

During a photo shoot lining students up to spell out the word "Coke", Mike Cameron wore a T-shirt with the logo of Coca-Cola competitor Pepsi, and was suspended for his "disruptive" behavior.

In response to negative media attention, the suspension was erased from Mike Cameron's record.

SpooF Websites

This category is for explicitly culture-jamming spooF websites, though all spooF sites are culture-jamming to some degree. Most spooF websites should go under Recreation/Humor/Parodies. Only those which deliberately attempt to trick the viewer into believing that the site is real should be included here.

[more information](#) (editors only)

Sites that look like other websites at first (and second) glance, but with subversive content.

Telephone Tone Copyright

Australian composers Nigel Helyer, aka Dr Sonique, and Jon Drummond have copyrighted the melodies produced by 100,000,000,000 telephone tone sequences to lampoon copyright laws.

Vote Auctions

In the site's own words:

"The election industry is spending hundreds of millions of dollars in an attempt to influence the presidential election, system is an inefficient waste of money for the candidates and their supporters. Voteauction.com is committed to improving this system by bringing the campaign contributors' money directly to the voters."

etoy

etoy is a group of artists working on the internet since 1994. The group's first and most publicized action was the "digital hijack" in 1996, in which they tricked a number of major search engines to list fake pages first for many popular search terms. About 1.5 million searchers were diverted to etoy's own hijack site. The action won etoy the 1996 Golden Nica in the internet art category at Ars Electronica.

In the Fall of 1999, etoy was the focus of a domain name dispute with online retailer eToys, Inc., who sued the artists for trademark infringement and dilution. After a

preliminary injunction took etoy's site offline on November 28, 1999, support around the internet community for etoy resulted in a boycott campaign against eToys.

®TMark

®TMark (the TM should be superscript), pronounced "art mark," supports the sabotage of corporate products by channeling funds and resources to the creative saboteurs. Past successes include the Barbie Liberation Organization, Phone in Sick Day, and Deconstructing Beck. The EFF of pranskterism.

Voteauction

- [Voteauction](#)
- [External link](#)

Voteauction was satirical Website which offered US citizens to sell their presidential vote to the highest bidder during the presidential elections 2000. The Website was conceived by the student James Baumgartner and later moved to [Ubermorgen](#) in [Austria](#). Several US States sued the site for alleged illegal vote trading.

HOT SITES

Gene Watch has briefings, news and developments in genetic engineering and a database of information on GM crops and foods:

---> <http://www.genewatch.org>

The One Tree Hill Allotment Society site incorporates the Community Composting and London Community Recycling Networks. See special feature 'Don't shop at supermarkets':

---> <http://www.othas.org.uk/>

Only 49 percent of Americans voted in the last presidential election. Maybe selling your vote is the way forward...

---> <http://voteauction.com/>

Vote auction background:

---> <http://www.fsb.com/fortunesb/articles/0,2227,966,00.html>

WORLD BANK PROTEST

Hundreds of people world-wide have sent a joint letter to the World Bank President expressing major concerns about a new \$60 million Bank internet portal initiative. The Global Development Gateway aims to become "the premier web entry point for information about poverty and sustainable development".

Previous report in AlterNet #34:

--> <http://www.gn.apc.org/activities/alternet/034%2009-03-00.html#world>

Bretton Woods Project:

--> <http://www.brettonwoodsproject.org/action/gdg/gdgltnl.html>

NINE LADIES CAMPAIGN

The Nine Ladies campaign works to save 35 acres of Peak District National Park woodland from a new quarry.

The Birthday Bash weekend extravaganza over 7th and 8th of October will celebrate a year of the camp. Talks, walks, some devilish fun and (nights only) a fully unlicensed bar!

More:

--> <http://www.pagan36.freeseerve.co.uk/page13.html>

SUCCESS STORIES

The US brown pelican and the Mississippi alligator may no longer need the protection of the Endangered Species Act, while in Europe, the ibex has been successfully reintroduced in the Alps. Sparrowhawks and goshawks have recovered in many parts of the world after the banning of certain pesticides. Andreas Gigon has drawn up registers of endangered species whose fortunes have improved, and discovered that it's not all doom and gloom:

--> <http://www.newscientist.com/nl/0923/back.html>

MEDIA TOOLKIT

This campaigning resource gives the low-down on using the media - everything from writing press releases and being interviewed to starting up your own newsletter.

Includes up to date database with phone and fax numbers for over 300 national and regional media. The database also comes on disk, ready to import into your fax software for sending press releases.

Only £2.50 inc. p&p (chq's payable to Oxyacetylene) from:

Undercurrents
16b Cherwell St
Oxford OX4 1BG

E-mail: info@toolkits.org.uk

PHILIPPINES MEETING

Symposium on Mindanao (Philippines)
September 26, 2000 (Tuesday) 6:00 to 8:00 pm
Room B102, Brunei Gallery, School of Oriental and African Studies (SOAS),
1 Thornhaugh St., Russell Square, WC1H 0XG

Speakers:

Fr Eliseo R Mercado, OMI (Philippine ceasefire monitor)
Foreign Office representative (to be confirmed)
Mr Tim Parritt (Amnesty International)
Steve Alston (CAFOD)
Ed Garcia of International Alert (to be confirmed)
E-mail: tongtong@gn.apc.org

APPALLING TREATMENT OF ABORIGINES

Despite the glitz of the Olympics, Australia's treatment of Aborigines is described as 'appalling' by campaign group Survival. Director General Stephen Corry said, 'The Australian government...stance can only be described as racist, and seems like a throwback to attitudes 30 years ago.'

Two UN Committees have recently condemned the Australian government's treatment of its Aboriginal population.

The facts speak for themselves:

Aboriginal life expectancy is 17 - 20 years less than other Australians. Aboriginal babies are four times as likely to die at birth as non-Aborigines. Aborigines accounted for almost one quarter of deaths in custody in 1999. The suicide rate is 6 times higher for Aborigines than the national average.

E-mail is@survival-international.org
--> <http://www.survival-international.org/>

ANIMAL TESTS WASTEFUL

A fringe meeting during the Labour party conference will discuss the wastefulness of combating adverse drug reactions in the NHS because of reliance on animal testing as a methodology. Doctors and Lawyers for Responsible Medicine are organising the meeting in the Grand Hotel in Brighton on 25th September.

---> <http://www.dlrm.org/>

PERU CONFERENCE

The following speakers will offer their perspectives on the post-electoral situation in Peru; Javier Iguñiz, Professor of socio-economics at the Catholic University in Lima, Dr. Lewis Taylor, Liverpool University, Linda Fabiani, MSP for Central Scotland, and Nick Caistor, BBC World Service. Cost includes Peruvian-style lunch: £5 unwaged

£6 PSG members or £7 others

Saturday 30 September
Catholic Chaplaincy, Liverpool University,
Mount Pleasant, Liverpool, L3 5TQ

To reserve a place and to find out further details,
please contact the PSG office.

COMMEDIA 2000

Riding The Waves - The Annual conference of the Community Media Association
will be held at the The Drum Community Centre

Birmingham over October 6/7

Further information:
--> <http://www.commedia.org.uk/commedia2000>

UNZIPPING FASHION

Labour Behind the Label supports garment workers in defending their rights and
improving their wages and conditions. The network includes major development
agencies
(Oxfam, CAFOD, War on Want), UK trade unions (KFAT, TGWU, GMB), homeworking
organisations (National Group on Homeworking, AEKTA, Homenet), Traidcraft, Ethical
Consumer, and solidarity
organisations (Central America Women's Network, Women Working World-wide).
A conference will be held on 1 October at Methodist International Centre, 81-103
Euston Street,
London, NW1 2EZ

Further information:
E-mail: nead@gn.apc.org

JOBS

HUMAN RIGHTS OBSERVERS WANTED

Peace Brigades International British section, a human rights
organisation working for the transformation of conflict, is organising an
orientation weekend for prospective volunteers wanting to work as
International Human Right Observers in countries such as Colombia, Mexico,
The Balkans, and Indonesia.
The orientation weekend of 16th to 19th of November will explore issues such as
the role of a non-partisan human rights organisation implementing non-violent
alternatives in conflict areas.

Further information:
A4 SAE (54p) with your CV to PBI British Section,
1a Waterloo Road, London N19 5NJ.
E-mail: pbibritain@gn.apc.org

Project Co-ordinator

The Forest Peoples Project seeks a co-ordinator for the project 'Indigenous Peoples and Protected Areas in Africa: from Principles to Practice'. The project aims to help African indigenous peoples influence the policies and practice of conservation projects on their lands.

The post is half-time for a period of 21 months, based at the Forest Peoples Project office, Gloucestershire.

Payment £20,000 - £24,000 p.a. pro rata, negotiable depending on qualifications and experience. The closing date is 30th September 2000.

Further information:

[Email: info@fppwrm.gn.apc.org](mailto:info@fppwrm.gn.apc.org)

Black and Minority Ethnic Freelance Theatre Practitioner

The Scarman Trust in Brighton and Hove (UK) is looking for an experienced Black or minority ethnic freelance theatre practitioner for its Theatre for Change project running from October 2000-March 2001.

The role requires experience of devising theatre with communities and of Forum/Legislative Theatre. The practitioner will have responsibility for facilitating the devising and touring of two productions.

A fee of £2,500 including travel expenses is available.

Further information:

Send an A4 SAE to:

The Scarman Trust, Community Base, 113 Queens Road, Brighton, BN1 3XG

For an informal conversation about the project, please telephone Naomi Alexander on 01273 234854.

Applications deadline: 12 noon Friday 22nd September

QUOTE/UNQUOTE

"There is a wonderful mythical law of nature that the three things we crave most in life - happiness, freedom and peace of mind - are always attained by giving them to someone else."

Peyton Conway March, 1864-1955

DIARY DATES

Reclaim the Streets: 020 7281 4621; rts@gn.apc.org

LONDON MEETING EVERY TUESDAY 7pm - Cock Tavern pub, Phoenix Road, London;

SEPTEMBER:

23: Palestine 2000 Festival Edinburgh U. Chaplaincy Centre - guest Afif Safieh, Palestinian General Delegate to the UK and the Holy See.

HOT SITES

Gene Watch has briefings, news and developments in genetic engineering and a database of information on GM crops and foods:

---> <http://www.genewatch.org>

The One Tree Hill Allotment Society site incorporates the Community Composting and London Community Recycling Networks. See special feature 'Don't shop at supermarkets':

---> <http://www.othas.org.uk/>

Only 49 percent of Americans voted in the last presidential election. Maybe selling your vote is the way forward...

---> [http://**voteauction**.com/](http://voteauction.com/)

Vote auction background:

---> <http://www.fsb.com/fortunesb/articles/0,2227,966,00.html>

WORLD BANK PROTEST

Hundreds of people world-wide have sent a joint letter to the World Bank President expressing major concerns about a new \$60 million Bank internet portal initiative. The Global Development Gateway aims to become "the premier web entry point for information about poverty and sustainable development".

Previous report in AlterNet #34:

--> <http://www.gn.apc.org/activities/alternet/034%2009-03-00.html#world>

Bretton Woods Project:

--> <http://www.brettonwoodsproject.org/action/gdg/gdgltnl.html>

NINE LADIES CAMPAIGN

The Nine Ladies campaign works to save 35 acres of Peak District National Park woodland from a new quarry.

The Birthday Bash weekend extravaganza over 7th and 8th of October will celebrate a year of the camp. Talks, walks, some devilish fun and (nights only) a fully unlicensed bar!

More:

--> <http://www.pagan36.freemove.co.uk/page13.html>

SUCCESS STORIES

The US brown pelican and the Mississippi alligator may no longer need the protection of the Endangered Species Act, while in Europe, the ibex has been successfully reintroduced in the Alps. Sparrowhawks and goshawks have recovered in many parts of the world after the banning of certain pesticides. Andreas Gigon has drawn up registers of endangered species whose fortunes have improved, and discovered that it's not all doom and gloom:

--> <http://www.newscientist.com/nl/0923/back.html>

MEDIA TOOLKIT

This campaigning resource gives the low-down on using the media - everything from writing press releases and being interviewed to starting up your own newsletter.

Includes up to date database with phone and fax numbers for over 300 national and regional media. The database also comes on disk, ready to import into your fax software for sending press releases.

Only £2.50 inc. p&p (chq's payable to Oxyacetylene) from:
Undercurrents
16b Cherwell St
Oxford OX4 1BG

E-mail: info@toolkits.org.uk

PHILIPPINES MEETING

Symposium on Mindanao (Philippines)
September 26, 2000 (Tuesday) 6:00 to 8:00 pm
Room B102, Brunei Gallery, School of Oriental and African Studies (SOAS),
1 Thornhaugh St., Russell Square, WC1H 0XG

Speakers:

Fr Eliseo R Mercado, OMI (Philippine ceasefire monitor)
Foreign Office representative (to be confirmed)
Mr Tim Parritt (Amnesty International)
Steve Alston (CAFOD)
Ed Garcia of International Alert (to be confirmed)
E-mail: tongtong@gn.apc.org

APPALLING TREATMENT OF ABORIGINES

Despite the glitz of the Olympics, Australia's treatment of Aborigines is described as 'appalling' by campaign group Survival. Director General Stephen Corry said, 'The Australian government...stance can only be described as racist, and seems like a throwback to attitudes 30 years ago.'

Two UN Committees have recently condemned the Australian government's treatment of its Aboriginal population.

The facts speak for themselves:

Aboriginal life expectancy is 17 - 20 years less than other Australians.
Aboriginal babies are four times as likely to die at birth as non-Aborigines.
Aborigines accounted for almost one quarter of deaths in custody in 1999.
The suicide rate is 6 times higher for Aborigines than the national average.

More:

E-mail is@survival-international.org
--> <http://www.survival-international.org/>

ANIMAL TESTS WASTEFUL

A fringe meeting during the Labour party conference will discuss the wastefulness of combating adverse drug reactions in the NHS because of reliance on animal testing as a methodology. Doctors and Lawyers for Responsible Medicine are organising the meeting in the Grand Hotel in Brighton on 25th September.

---> <http://www.dlrm.org/>

PERU CONFERENCE

The following speakers will offer their perspectives on the post-electoral situation in Peru; Javier Iguñiz, Professor of socio-economics at the Catholic University in Lima, Dr. Lewis Taylor, Liverpool University, Linda Fabiani, MSP for Central Scotland, and Nick Caistor, BBC World Service. Cost includes Peruvian-style lunch: £5 unwaged £6 PSG members or £7 others

Saturday 30 September
Catholic Chaplaincy, Liverpool University,
Mount Pleasant, Liverpool, L3 5TQ

To reserve a place and to find out further details,
please contact the PSG office.

Email: perusupport@gn.apc.org
---> <http://www.perusupportgroup.co.uk>

COMMEDIA 2000

Riding The Waves - The Annual conference of the Community Media Association will be held at the The Drum Community Centre

Birmingham over October 6/7

Further information:
--> <http://www.commedia.org.uk/commedia2000>

UNZIPPING FASHION

Labour Behind the Label supports garment workers in defending their rights and improving their wages and conditions. The network includes major development agencies (Oxfam, CAFOD, War on Want), UK trade unions (KFAT, TGWU, GMB), homeworking organisations (National Group on Homeworking, AEKTA, Homenet), Traidcraft, Ethical Consumer, and solidarity organisations (Central America Women's Network, Women Working World-wide). A conference will be held on 1 October at Methodist International Centre, 81-103 Euston Street, London, NW1 2EZ

Further information:
E-mail: nead@gn.apc.org

JOBS

HUMAN RIGHTS OBSERVERS WANTED

Peace Brigades International British section, a human rights organisation working for the transformation of conflict, is organising an orientation weekend for prospective volunteers wanting to work as International Human Right Observers in countries such as Colombia, Mexico, The Balkans, and Indonesia.

The orientation weekend of 16th to 19th of November will explore issues such as the role of a non-partisan human rights organisation implementing non-violent alternatives in conflict areas.

Further information:

A4 SAE (54p) with your CV to PBI British Section,
1a Waterlow Road, London N19 5NJ.

E-mail: pbibritain@gn.apc.org

Project Co-ordinator

The Forest Peoples Project seeks a co-ordinator for the project 'Indigenous Peoples and Protected Areas in Africa: from Principles to Practice'. The project aims to help African indigenous peoples influence the policies and practice of conservation projects on their lands.

The post is half-time for a period of 21 months, based at the Forest Peoples Project office, Gloucestershire.

Payment £20,000 - £24,000 p.a. pro rata, negotiable depending on qualifications and experience. The closing date is 30th September 2000.

Further information:

Email: info@fppwrm.gn.apc.org

Black and Minority Ethnic Freelance Theatre Practitioner

The Scarman Trust in Brighton and Hove (UK) is looking for an experienced Black or minority ethnic freelance theatre practitioner for its Theatre for Change project running from October 2000-March 2001.

The role requires experience of devising theatre with communities and of Forum/Legislative Theatre. The practitioner will have responsibility for facilitating the devising and touring of two productions.

A fee of £2,500 including travel expenses is available.

Further information:

Send an A4 SAE to:

The Scarman Trust, Community Base, 113 Queens Road, Brighton, BN1 3XG

For an informal conversation about the project, please telephone Naomi Alexander on 01273 234854.

Applications deadline: 12 noon Friday 22nd September

QUOTE/UNQUOTE

"There is a wonderful mythical law of nature that the three things we crave most in life - happiness, freedom and peace of mind - are always attained by giving them to someone else."

Peyton Conway March, 1864-1955

Malmoe

Wikipedia

Malmoe

Malmoe is an independent [Austrian](#) newspaper (in German language) targeting a young urban political group of readers. It was started when the extreme right-wing party [FPÖ](#) became a coalition partner in the Austrian Government and *Malmoe* in response established itself as modern, independent monthly newspaper covering topics like employment situations, music or the open-source movement.

It is available for free in bars and clubs all over Austria and most articles are available on the website.

Note that *Malmoe* has nothing to do with the Swedish industrial town [Malmö](#).

Kommute Archives for May, 2001

Archival hi-Kwality Kommute Entries. Read through these to catch up with me, or waste time, or whatever! Wow! summer-like weather. It makes me yearn for the days when May meant school was almost out and I had a long lazy summer to look forward to. Le sigh. I guess my nostalgia paid off, in a way, because I got **laid off** at the end of the month. May was a month of weirdities. A Month of Mayness. **Read up, enjoy! Dilute! Dilute!**

Thursday, 05-31-01 (the last day of the classic kommute)

<morning> Today's kommute was a strange one. I woke up late to the sound of the doorbell and a guy holding up my housemate's purse and saying he'd found it in the park. It's a doubly good thing that he came by with it because I had neglected to turn my alarm on. Doi! So I was grossed out because it was already really really hot out and it wasn't even 8am, so I laid around kind of trying to psyche myself out that it was chilly and cold. It didn't work, so eventually I got up and took a shower. I got out the door just in time to catch Muni, and made it to **HAMSTOP** with a little time to kill before the 50 showed up. I read some more of the article about Dan Clowes and snapped some photos and did the usual **HAMSTOP** routine. The cool girl who works in Sausalito showed up after a little bit and I said hello and she said "Late, huh?" and I said "Yeah, lately it seems like i'm either super early or super late." Then she said "You know that Philipina woman we see sometimes on the bus, with the long hair? She was asking me where you'd been, she was wondering about you." and I said "Whoa, no way, really? Weird!" So then the bus came, and I kept reading my magazine (it's a really long interview) and kind of kept to myself for the remainder of the trip. It's a beautiful, if scorchingly hot day. When I got to San Rafael, it was even hotter. I wandered in to my office and saw all these people standing around outside but nothing was so weird about that, they generally take their smokebreaks around that time, 10:30 or so. I headed in to my cube and all these people were cruising out past me, saying goodbye. I got to my desk and noticed that nobody else was in, and I tried checking my mail but the server was down or something. I decided to start in on downloading the photos for the kommute, and tackle some work, and then this HR woman came by and it all started to make sense. She asked, in this very conciliatory, hushed tone if she could speak with me, and pulled me in to an office and went over my severance and paperwork and everything with me. Massive layoffs, nothing personal, it's a deep cut. None of this was surprising, but it was still weird, and all I kept thinking about was "what's going to happen to the kommute?" I'm such a realist. So I went through my stuff and crammed some of the important stuff in to my bag, which is small, and bid adieu to my doodles, posters and my plant and scooted out. I'll post photos later, i don't feel like it now.

Wednesday, 05-30-01

<morning> It's bagel day. It's also violently hot outside. Phew! A scorcher! Hot enough for ya? Etcetera, ad nauseum, wash rinse repeat! I woke up very late today, because I am willful and naughty. I got out the door with just enough time to get a small coffee and hop on Muni. There were these two totally weird fantastic freaks on the bus, sitting just a few seats ahead of me, this guy had a *big old waxed moustache* and the girl sitting with him had this totally amazing huge pair of sunglasses on and big bushy pigtails. They were so cool, and I tried to get a photo of them, but [this is as good as I could get](#). I got to

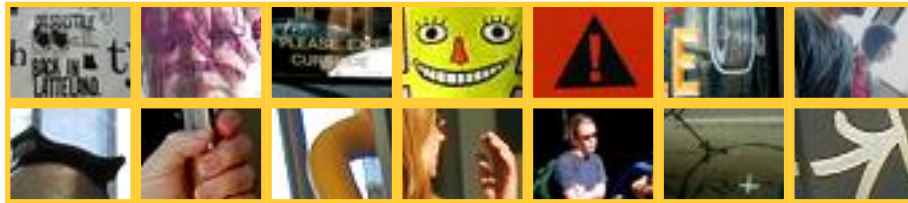

HAMSTOP and grabbed a copy of the SF Weekly and turned around to see this woman I sometimes talk to, this british woman who does some kind of skin-related dermo-thing as a job, and she said "Hiiii! I was just thinking about you this morning!" and I responded "Uhoh! Whatever for?" She said she just hadn't seen me in a great while and was wondering what I'd been up to. Funny! So I spent a few minutes talking to her in the blistering sunshine (yes i dressed all in black and YES i wore a long-sleeved shirt I am wicked smart) about this-and-that and fluffy stuff. The bus came along shortly, which mercifully ended our awkward chit-chat swiftly. The bus was relatively quiet and empty, so I hunkered down, read some stuff in the SF Weekly, and then I read the [Comics Journal](#) when I got tired of the Weekly. Nothing else happened that really bears mentioning, but [this](#) kind of hits close to home.

Tuesday, 05-29-01

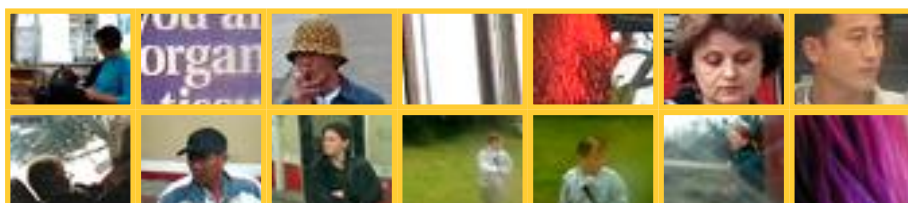

<morning> I'm suffering from a serious case of 3-day weekenditis. Tired, kind of spaced out. I woke up a little late today, very late, actually. I got in a little later than I would have liked, but officially, I was on time. Neener neener. My coworkers were all a little tardy today, so as it turns out, I was the first of my group to arrive. Even when I try to be tardy, I am on time! A lot of people are out on vacation. I envy them. I dashed out the door and swept past the cafe, thinking that I should hustle on over to **MEATSTOP** lest I miss Muni. I stood around for about 5 minutes, realized I probably had enough time and need for coffee, so I doubled back and got some. Muni came along after a few minutes and got me to **HAMSTOP** without incident. It's a really bright, sunny day, and people are in reasonably good spirits. I got a good seat way in the back on the 50, and I didn't notice this cool punkrock guy that I've talked to a little before was on the bus, sitting a couple of seats ahead. I only noticed him after i'd passed by, I felt kind of lame for not nodding or smiling at him, so when he got off the bus, I didn't look up from my book. I'm such a spaz. The bus was mostly empty. Quiet and peaceful and a little bit boring. I neglected to bring along any meaningful reading material so I spent some time looking at the [Muni map](#) and scouting out random weird bus routes. I like maps. Late last night, I was waiting around for the 5 Fulton way out by Ocean Beach, and this interesting shirtless wild-eyed guy came along and started striking a variety of kung-fu poses and pacing back and forth. He was amusing, so he sort of had everyone's attention, so he told us "You know, Satan, he has excellent eyesight in the dark, eh?" I nodded and said "Oh yeah, really?" and kind of encouraged him to continue, which he did, "Yes. He has good vision, living underground, his other senses increase... He

can find you by your smell, the way you move your body, by the way you feel. The dark mean nothing to him." This euro-jock guy who was standing nearby looked confused by the way the conversation was going, so he asked "Excuse me, did you say Satan?" and the crazyguy said "Yes," and the euro-jock said "I would have guessed that satan would have bad vision from all that fire" and the crazyguy went on to tell us all about how Jesus loves Satan but keeps him in check, etc. We smiled and waved at each other when he got off the bus. The funny part of this story is that I saw the crazyguy again this morning, trying to get on my bus and failing. I waved, but I don't think he saw me. Yay crazyguy!

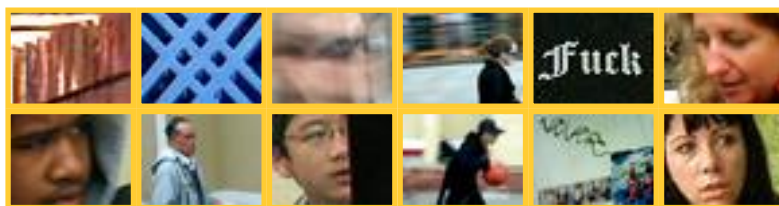

Friday, 05-25-01

<morning> Waking up was kind of easy today. I woke up early, way before my alarm was set to go off, but try as I might, I could not get back to sleep. I tossed and turned for a little while before I just gave up and got up and showered. Getting ready was easy enough but leaving was difficult. I got out the door as the 24 was just about to pull up to **MEATSTOP**, but the lights were against me, and the bus got there before I did. I was a little worried about missing it, so the moment the light turned green I sprinted across the street, and people were still getting off the bus, but it could have pulled away at that decisive moment, but it just sat there. I got on and said "Hi" to the bus driver and he sort of glowered malevolently, so I flashed my pass and moved towards the back of the bus, and then I heard him say, "Tssssh. you're **welcome**." and I said "oh... thank you" in a super quiet meek voice. I hate people who wait to be thanked like that. It's so passive-aggressive. And saying "you're welcome" is just so stupid. And all he did was wait a second while I ran my ass off to make it on the bus, so what the hell should I thank him for? For *not* being an asshole? Jeez! Ok. So I made it to **HAMSTOP** in time to hang out a little bit, it was really gloomy, drizzly and cold out, so I kind of huddled in the doorway of the **HAMSTORE** for **HAMWARMTH** until the bus came. These new drivers they swapped in to my route are all kind of weird, like this guy driving the 50 had this thing about announcing all of the stops in this creepy super quiet evil voice over the PA. Yeep! One of my coworkers got on at the bridge, and spent some time fiddling with my camera. The sun came out around Sausalito, and it was glinting off of the water in a super-disco sort of way that was further enhanced by the scratched-up windows of the bus, a positive side-effect of destructive negativity. I officially got to work on time today. Not an hour early, not 30 minutes late. Just right on time. Of course, with the holiday weekend, the office is almost deserted, but i'm here. Aww yeah. Links! [Tea is good for your mouth](#) :: [skullfuqmuni](#) :: [crazy cat lady](#) :: [sad news from the squidfactory](#)

Thursday, 05-24-01

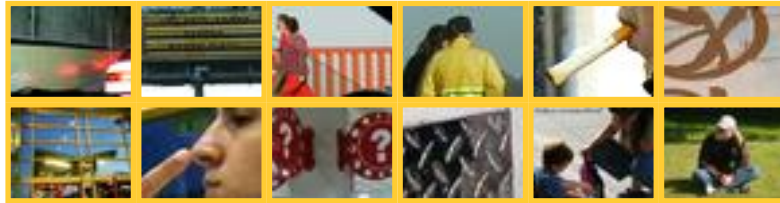

<morning> Yes, I've been sick, sicksicksick. I spent the last two days sleeping, drinking liquids, and reading *The People's History of the United States*. A lot. It's amazing how much work can pile up during a 2-day absence. I'm still pretty spaced out and moderately woozy but i'm way better than yesterday. I had to wake up extra-early today, which was pretty amusing with my head all stuffy and spaced out. I wound up resetting my alarm to get a few precious extra minutes' worth of sleep, but then I jumped up all guilt-ridden and ran around frantically, rushing to make it out the door in time to catch Muni by 7:35. Muni, of course, was late, but that's ok because so was I, but as a result the bus was thoroughly crammed with people. Sardines! I generally stand up without complaint and just kind of play human bumper-cars with the other passengers when I get on to a super-mega-ultra-crowded bus, but there was a seat way in the front, the seats reserved for the elderly, handicapped and otherwise infirm - so I took it. I felt weird and guilty, though, like all these other people on the bus would be thinking "Ptch, those seats are for *old people* and *the handicapped*, and besides, my feet hurt, I wish *I* had thought to sit there!" haha. I know what everyone is thinkin'. I got to **HAMSTOP** with about 4 minutes to spare before the bus came, and I got on, and went way to the back, got myself a primo seat and started reading my book. The city was cold cold foggy foggy and so I wore my jacket, but of course it all cleared up by the time we got to Sausalito, and so of course it's 90 degrees out in San Rafael and i'm left lugging around my jacket. Duh.

**Monday, 05-21-01**

<morning> I woke up to the most horrible noise this morning, my clock radio was set just slightly between stations and the sound was like horrible experimental music, so the first time it went off, I got up and set the alarm for about 20 minutes more sleep. The second time it went off, the noise was the same, so I knew something was amiss. Funny that I would assume the scratchy horrible sound was intentional! ha-ha! I am a gullible arteest! The sunshiney morning warmth was kind of nice today, and after I left my house *just* a minute too late to make the 9:00 bus, or maybe it was several minutes too late, I don't know - anyhow I had plenty of time to sit at **HAMSTOP**, reading [A People's History of the United States](#), soaking up great gobs of warmth. I'm feeling a little bit sickly, kind of sore-throaty, stuffy-headed. I made sure to buy myself something for breakfast, so I went over to this roach coach that's always in front of the hospital and I got a bagel and some coffee drink thing. I took very few photos this morning, because I am so thoroughly immersed in my book, but I have some leftovers from Friday. Friday evening I rode in to the city with my co worker and we got stuck in evil traffic which was all caused by people rubbernecking the scene after someone jumped. This sparked a really interesting, though morbid conversation about which method of suicide was the most brave, or romantic, and we agreed that the bridge jump was a fairly brave method, and that taking pills was pretty cowardly. More of a cry for help than a genuine attempt. We talked about the fact that jumping off of the bridge in to the bay was essentially the same as jumping from a building half that height in to

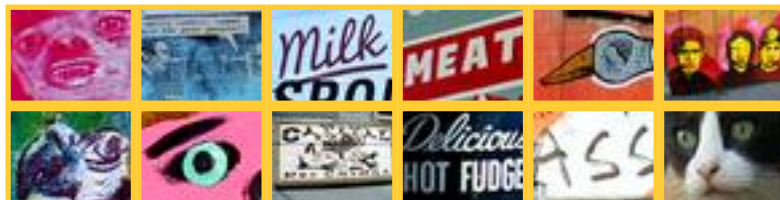

concrete, and I mentioned having heard something about people surviving, and we both marvelled over that. How much it would suck, but that it would be a completely freak accident and would likely paralyze you. Like I said, Morbid.

Over the weekend, I went to a really excellent screening/benefit for [@TMark](#) and [voteauction.com](#) at [ATA](#) and I saw one of the many characters from my k o m m u t e . We didn't acknowledge each other, but it was good to see that he had cool, leftist leanings, or at least supported cool, leftist organizations. So, to date, that's 3 run-ins with k o m m u t e regulars. Interesting.

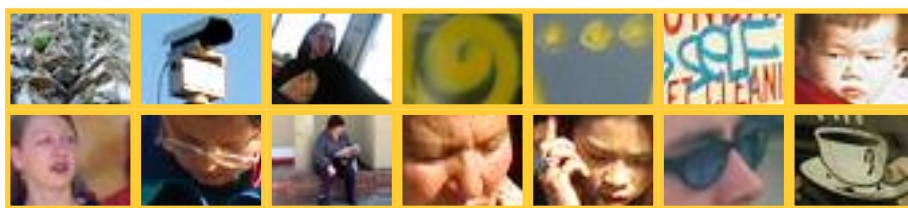

Friday, 05-18-01

<morning> So I woke up at the usual time, and then I decided that I needed more sleep. It's Friday for cryin' out loud, I needs my rest! I made good time, regardless of my stolen moments of slumber, and I only suffered briefly from t-shirt indecision, which made me waste precious minutes before I finally settled on my classy glittery new "Keep on Truckin'" shirt. I'm all about refinement, baby. So this wasted time cost me dearly, as I walked out of my apartment to see muni taking off from **MEATSTOP**, and i had a head-slapping "d'oh!" moment. I was struggling with the implications of waiting for muni (which is always a major gamble) or trying to walk it when a crazy cab driver made a wild turn in front of me and so I took it as some kind of a SIGN, so I got in. I was kind of out of it, and so instead of telling him the intersection I wanted to go to, I said "Hayes and Divis" instead of "Geary and Divis" and he laughed, pointed to his meter, saying "We're here! That'll be \$2.50, get out! haha!" and I just sort of stared at him, totally baffled, and then I broke out laughing. Humor takes thought and thought takes effort and effort requires lucidity and I was not entirely lucid. He said "Sometimes you need someone to tell you where you are." and I said "Well, \$2.50 is a pretty reasonable charge." and he said "For someone to tell you where you're at, yeah!" What a hippy. I felt kind of like I was a let-down, not entertaining this crazy old hippy cab driver, wearing his purple sunglasses. We rode in traffic, listening to "[Burning Down the House](#)" by the Talking Heads, and I was really grooving to the lyric "People on their way to work baby what did you expect/Gonna burst into flame" for some reason. It seems that all of the Golden Gate Transit bus drivers have changed routes, so all these unfamiliar people are driving me around. Eek! Around about 5 minutes after I got to **HAMSTOP**, I realized that the batteries in my digital camera were dead. Dead dead. But they lasted about a MONTH, so I'm not complaining. It just means no new photos for today. But, to make up for it, I present to you some photos of random murals and graffiti and other nonsense around SF last weekend.

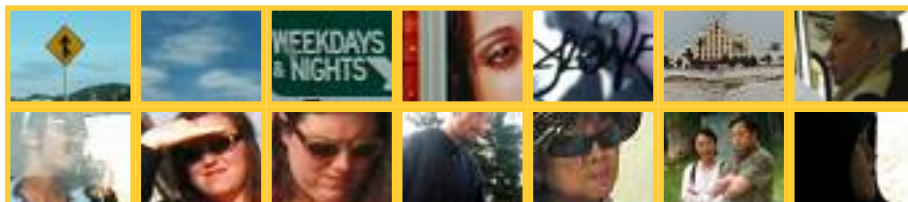

Thursday, 05-17-01 :: :: it's my MOM's birthday! woo!

<morning> I came in at the regular time today, not that anyone was around to notice or anything. It's a sunshiney kind of day. My mom is playing hooky because it's her birthday. It's no wonder I have such a great work ethic what with having such a great role model, mom! psh. I kid. My mom rocks. Apparently the web is celebrating its 10th [birthday](#), too. How weird is that? So I had to really tear myself away from my bed this morning, it was horribly dramatic. I got up and out in time to make it to **MEATSTOP** in good time to catch Muni *and* get some coffee. I was standing around lamely wondering if I should take some photos, meditating on the signs in the Meat Market windows when my hyper eager k o m m u t e pal came trundling over and started talking about her hangover and her boss and all manner of silly stuff. She's nice, we chatted throughout the busride and during our wait at **HAMSTOP**. She invited me to some kind of weird cabaret/supper/nightclub place tonight, which was nice but felt a little... Strange. Whenever she's around I can't do my photography. It stifles my creativity! There were a lot of kids at **HAMSTOP**, some kind of field trip maybe. I'm reading another book, since I finished up [Survivor](#). I'm reading some hugely, grossly outdated book called [GEEKS](#). It's kind of cutesy. Since i'm on a run with the hyperlinks, [Kerouac made a list](#). The day has begun. It's going to be a busy one.

**Wednesday, 05-16-01**

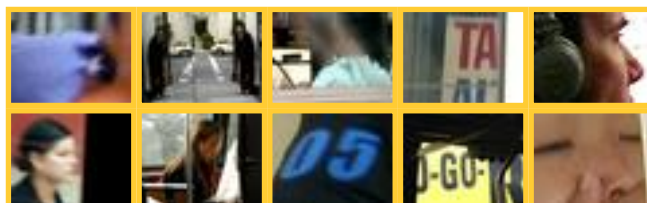

<morning> An early morning two days in a row. (!!!) Here's the deal about the missing k o m m u t e s. I stayed home Monday, felt nasty and slept a lot. I was feeling much better after a day of rest. I got a call late in the evening from work telling me to come in early for a big important marketing meeting thing yesterday, and so I had to wake up at **6:20 a.m.** in order to make it in. Then, after that meeting were more meetings, and work, and so I never had a chance to deal with k o m m u t e - r e l a t e d tasks. Forgive my employers, they know not what they meddle with. Poop! Today I couldn't help but wake up early, too early, and so I wound up coming in plenty early today. I opted to forgo my morning caffeine stop and headed directly over to **MEATSTOP** in order to catch the earlier bus. I have to say that the k o m m u t e is a little less fun at earlier hours. I guess maybe it's because the k o m m u t e r s are more bitter and serious about having to be awake so early in the morning, or something. Could be just a bad crop of k o m m u t e r s who are unpleasant regardless of the hour. Muni is much more somber and I shouldn't even mention how depressing the crowd is on the 50. Buncha sourpusses. There was this one really odd woman, I can't quite put my finger on what was so weird about her, but she seemed really annoyed with me. Imagine! She was waiting at **HAMSTOP** with me, and every time I looked in her direction she was sort of scowling at me. When we got on to the bus, I headed to the very back seat and sat next to the window, like I always do, but I guess she had that seat marked as her own, or something because she sat there making these bizarre "ohmygod" faces at this guy sitting across from me, who was, I dunno, saving that seat for her or something. Stupid yuppies. I'm *glad* I took her seat. They both sat across from me reading their respective

yuppie newspapers until Sausalito, where they both got off at my old stop. I spent my time window-gazing and writing in my journal, which I do way too much. I looked for whales again but saw only kayakers. There was a bunch of roadwork going on along the Sausalito waterfront, and they had narrowed the roadway to only one slim lane, and the bus couldn't make the tight turn so we ran over this really long line of carefully arranged traffic cones ka-thunk ka-thunk ka-thunk and as we passed the construction guys, they looked kind of hurt and upset as they went to repair their work.

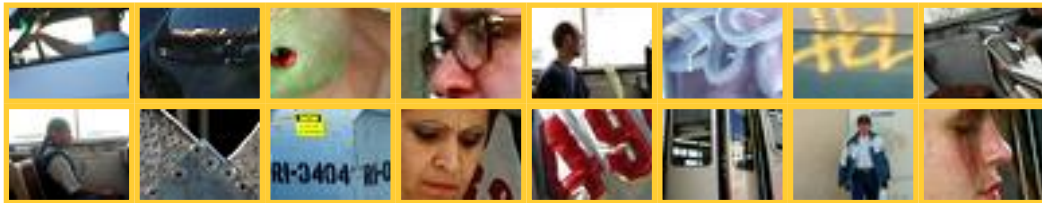

Friday, 05-11-01

<morning> I am the picture of motivation. I am serene efficiency personified. I am a mover/shaker. I woke up early, before my alarm, and I managed to go through my morning routine quickly enough to be able to catch the 8:30 bus to San Rafael, so I even got to work early, boy howdy. I had good muni luck, there were buses line up almost end to end, so when I missed one, another one was along shortly. Rad. I got to **HAMSTOP** just in time, too. It was all foggy and grey and moist out, which was a welcome change from the sunshiney summer hot mornings i've been dealing with lately. I've been seeing way too much of Tourette's Guy on my k o m m u t e. Every morning, and then last night when I rode the bus back from San Rafael. He always makes a little terse conversation with me, and smiles and raises his eyebrows at me like he wants to talk more. It'd mess up my quasi-anonymous photo-voyeurism if I were to start making conversation with this guy. It's not that i'm unfriendly or anything, it's just that I'm fanatically devoted to my craft. Uhh. Yeah. Yesterday's evening k o m m u t e was interesting. I took a bus which plops me way the hell down by the Marina rather than anywhere near my neighborhood, so I opted to use up the last of my cash on a cabride. I tend to get pretty amusing drivers when I catch cabs down there and this was no exception. This driver had a thick accent, for some reason I thought of Trinidad, though I have no idea where he's from. He started talking about beautiful women and the nice weather. He told me a story about when he was a boy, he was friends with a lot of older girls who were much taller than him, and when they would make fun of him he would take off his shoes and jump up and "touch their titties and run like hell because they would be mad!" He went on to talk about relationships and his girlfriends and their "big asses" and such. He was very jovial, so none of this came off as offensive or abrasive in the least. We passed by a McDonald's restaurant at Fillmore and Turk and there was a crowd of people there all crying and hugging, placing flowers and balloons around a tree outside. Apparently someone was shot there yesterday. Yikes.

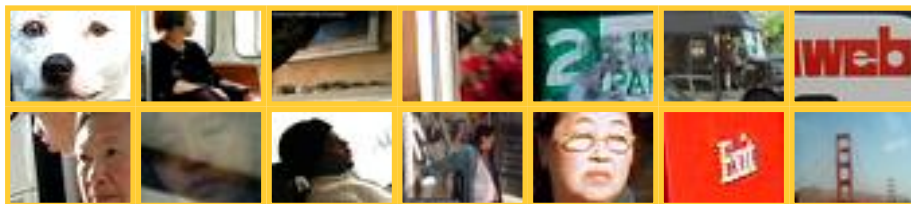

Thursday, 05-10-01

<morning> Today has started off pretty nicely! I woke up late but got in on time, which is always nice. The sun is shining, it's hazy and icky out, but it's also lending this gauzy, romantic quality to everything, the heat making everything shimmer slightly. Nice nice. People smelled great, my buses were on time. It was just a totally copacetic morning, a bunch of the **HAMSTOP** regulars said hello and good morning. The girl who said that everything smelled like pee yesterday wound up sitting near me on the 50, a guy with super dreadlocks got on and started chatting her up. I learned a lot about her by listening in to their conversation. Like for instance, she works for an architect in Sausalito, and she does paintings, watercolors and such, for a living. Cooool. She also talked about waking up at 3:30 a.m. which is kind of crazy but she said she had more energy than she did when she woke up at 7, because she could drink her coffee. Must be some big cups of coffee to take 5 hours to drink! Anyhow, around about Sausalito, I was reading and kind of vaguely listening in on this conversation when people suddenly started exclaiming and craning to see out of the windows because there were **whales** out there, between Sausalito and Angel Island. I've never seen a whale before, and there one was, all shiny and grey, a big lumbering curve bumping up out of the water, and a big white spout. Cool, man, cool. The girl said that she's been seeing whales out there all week. Must be nice, working with that kind of view. When I came in to work, everyone was pretty bouncy, and my boss brought in a huge bowl of fresh strawberries, so I grabbed a handful. And now back to work.

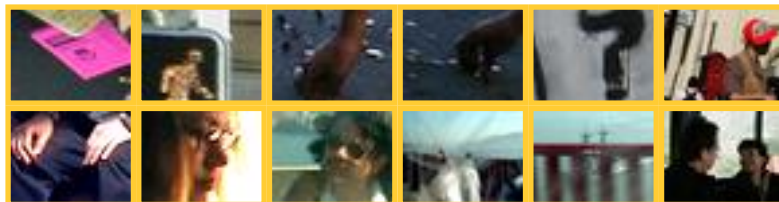

**Wednesday, 05-09-01**

<morning> Crazy day, crazy day. I got up earlier today and got in to work on time, for a change. Perhaps this is the start of a new trend of efficiency? I got coffee, and everything. It's sunny and gorgeous out, but the pollution is pretty heavy. Hazy ick. Today, at **HAMSTOP**, a girl I see and chat with from time to time showed up and went over to the far end of the bus stop, where she usually sits and reads her [Guardian](#), but she quickly doubled back and came over to the bus shelter where I was sitting and she smiled, said hello, and then said "Everything over there smells like Pee today!" and I cracked up laughing. I spent the rest of the k o m m u t e reading my book and the [SF Weekly](#).

**Tuesday, 05-08-01**

<morning> Slightly contrary views of the current trends: [Dot-Com jobless having fun](#) - or - [Jobless in San Francisco & Looking to Move](#) - Huh... Yeah, uh, ok. So it's been really hot and icky lately. Work hasn't been bad, or too hectic,

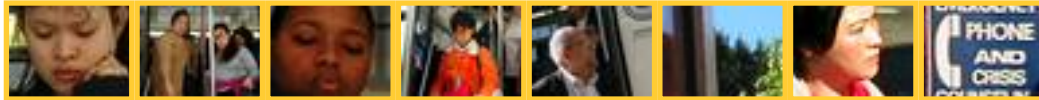

but I'm feeling a little bit overwhelmed. I think it's allergies or something, I keep getting these really awful headaches. It sucks. Whine, whine! I'm falling apart! Anyhow, I didn't really feel up to tackling the k o m m u t e yesterday. I'm back in the saddle today, though. I got up early, but I went back to bed and wound up coming in a little late. What a ridiculous charade! I waited for Muni for about 15 minutes, watching these two really vicious looking crows stalk the intersection malevolently. Eventually, I freaked out that the bus wouldn't come and I'd miss my connection so I flagged down a cab. The driver was this really friendly, totally incomprehensible old russian guy who kept trying to have a conversation with me but I really couldn't understand him, so I just smiled and agreed with him. He seemed to like that. Most people do. He dropped me off about a block away from where I wanted to get out, but I didn't argue, it was only a block. It's so bright and hazy and polluted out! I need sunglasses and detox. A guy came along at **HAMSTOP** and had this really amusing ordeal where he dropped some change, bent down to pick it up only to have about \$3 in change pour out of his pockets, along with some other little items. I watched all of this and couldn't help laughing sympathetically with him as I watched him try to pick it all up without getting hit by the bus. Yesterday there was a similar scene: A young girl got off of a very crowded bus, and she dropped her manga and the door closed up, jamming on the book, and she struggled to get it loose, but the door wouldn't open or close all the way because it was crammed in there. She kept trying to get the door to close, and then had to repeatedly run up to the front door to try to get the driver to help. Eventually, the door closed, and the book was passed, hand-to-hand between a bunch of passengers, and then out of the side window to the girl. Sometimes life is like that. I'm reading [Survivor by Chuck Palahniuk](#) and it's pretty damned good.

Thursday, 05-03-01

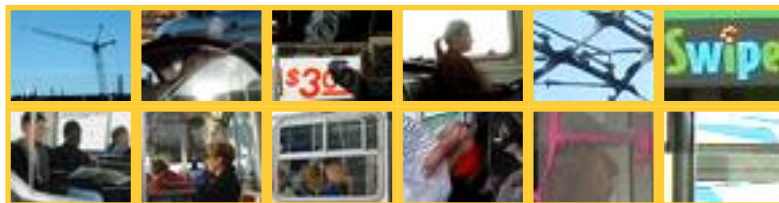

<afternoony> Today's k o m m u t e was delayed by a meeting which turned in to a birthday party which spawned further meetings and then a FIRE. Seriously. Part of the building I work in was **on fire**. Boy howdy. Usually I don't take lunches, but today I did. I watched the firemen wander around the building carrying hatchets and equipment and things, and then I decided I should go wander off. Now the building is all empty and quiet. I like it like this. In the proceedings I managed to totally forget this morning's crummy commute. I got up and out pretty early, got my coffee, it was all efficiency and hooray for me until I realized I was going to miss the 8:30 bus, and a wave of futility and resentment hit me. Damn Muni coming in clumps of 3 or 4 buses. Stupid! Anyhow, I got on the 9:00 bus, and made my connections and got in to work on time, only 2 hours after I left my house. Sheesh. My intentions were pure, I wanted to come in bright and early to get a fresh start on the day since I'll be taking tomorrow off to wait around for PacBell. Tried some new photographic techniques today, with mixed results.

Wednesday, 05-02-01

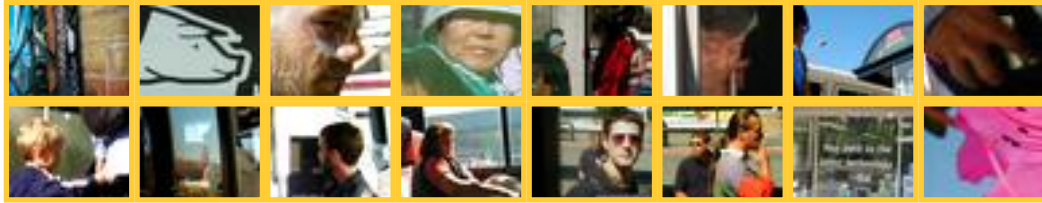

<morning> I was rushrushrush busybusybusy all morning so I'm only getting to write today's k commute now that it's 3:30 in the afternoon. I got out the door a little later than I had hoped, but I made all my connections, and got to sit and watch in silent wonder while two teenage mook boys flipped through a homemade booklet titled "the death book" and "the great book of DEATH". It was full of images of death and dismemberment, apparently, and one of the kids kept asking the other for details, like "What happened to this guy's head? How did that happen? GOD! SICK dude!" and the other kid beamed proudly. They started talking about [rotten.com](http://www.rottentomatoes.com) and I started smirking. One of the kids is someone I see all the time on my k commutes, and he's always super friendly and polite. Last night, I watched a [Really Great Documentary](#) on pbs about the commodification of "Cool". Later, I went to Google and did a search for the word [k commute](#) and what I got was: Searched the web for k commute. Results 1 - 10 of about 14. Search took 0.18 seconds. Did you mean: *commuter* **Category: Science > Social Sciences > Psychology > Dreams > Dream Sharing** . Very interesting. Dream sharing. Hmm. I guess sometimes I do that in my k commutes... but, like... neet. I think it's cool. i like being indexed in that way, dream sharing. It's kind of poetic. A nice young man sat down next to me today and asked me where we were, and I told him we were passing through Sausalito and he said "Hmm, wow, I'll have to come back here someday. It's beautiful! Just look at that sky, the water. Mmm!" He had apparently fallen asleep on the bus and missed his stop going south, and had to double back from SF. He was seeing my boring old k commute with a sense of childlike awe.

Tuesday, 05-01-01

<morning> I didn't write yesterday or take any photos because it was an icky day. At least the first half of it. I left my camera at home, I spilled grape-flavored Jolt all over myself, it just didn't start well. This morning, however, was great. And to make up for a k commuteless Monday, I present to you a k commuteful Tuesday with no less than 16 fotos. Hooray! And, since it's the first of May, check it out, a new [desktop calendar](#), lovingly hand-crafted by me, right on schedule. Um. So, people were friendly this morning. Smiling and commenting on my hair and whatnot. It's very sunshiney and nice out. May is starting out to be a very efficient month for me, which is strange. I got my coffee and got on to Muni in good time to make it to **HAMSTOP**, tried to get back in to the swing of things with my new camera and the whole k commute-photography thing, which is actually kind of difficult. I'm kind of happy with the new camera, the shutter is much faster than the old one, which makes for better results. While I was standing around at **HAMSTOP**, I noticed that there was dog poo on the sidewalk for the second day in a row. It was different poo than yesterday. I watched people approaching, wondering if they would notice and avoid the poo

or just blindly stumble in to the dreaded poo-trap. Nobody stepped in it, but very few people noticed it. My cow orker said something yesterday about watching a beautiful butterfly for a long time, watching it float gracefully through the air, admiring how delicate and unique it was until WHAM it splattered across the windshield of a midsize truck and that, he stated emphatically, was what the universe was like. Hmm. In some ways, yeah. In the news: [Tales of the City](#).

Kommutte Archives for May, 2001

Archival hi-Kwality Kommutte Entries. Read through these to catch up with me, or waste time, or whatever! Wow! summer-like weather. It makes me yearn for the days when May meant school was almost out and I had a long lazy summer to look forward to. Le sigh. I guess my nostalgia paid off, in a way, because I got **laid off** at the end of the month. May was a month of weirdities. A Month of Mayness. **Read up, enjoy! Dilute! Dilute!**

Thursday, 05-31-01 (the last day of the classic kommutte)

<morning> Today's kommutte was a strange one. I woke up late to the sound of the doorbell and a guy holding up my housemate's purse and saying he'd found it in the park. It's a doubly good thing that he came by with it because I had neglected to turn my alarm on. Doi! So I was grossed out because it was already really really hot out and it wasn't even 8am, so I laid around kind of trying to psyche myself out that it was chilly and cold. It didn't work, so eventually I got up and took a shower. I got out the door just in time to catch Muni, and made it to **HAMSTOP** with a little time to kill before the 50 showed up. I read some more of the article about Dan Clowes and snapped some photos and did the usual **HAMSTOP** routine. The cool girl who works in Sausalito showed up after a little bit and I said hello and she said "Late, huh?" and I said "Yeah, lately it seems like i'm either super early or super late." Then she said "You know that Philipina woman we see sometimes on the bus, with the long hair? She was asking me where you'd been, she was wondering about you." and I said "Whoa, no way, really? Weird!" So then the bus came, and I

kept reading my magazine (it's a really long interview) and kind of kept to myself for the remainder of the trip. It's a beautiful, if scorchingly hot day. When I got to San Rafael, it was even hotter. I wandered in to my office and saw all these people standing around outside but nothing was so weird about that, they generally take their smokebreaks around that time, 10:30 or so. I headed in to my cube and all these people were cruising out past me, saying goodbye. I got to my desk and noticed that nobody else was in, and I tried checking my mail but the server was down or something. I decided to start in on downloading the photos for the k o m m u t e , and tackle some work, and then this HR woman came by and it all started to make sense. She asked, in this very conciliatory, hushed tone if she could speak with me, and pulled me in to an office and went over my severance and paperwork and everything with me. Massive layoffs, nothing personal, it's a deep cut. None of this was surprising, but it was still weird, and all I kept thinking about was "what's going to happen to the k o m m u t e ?" I'm such a realist. So I went through my stuff and crammed some of the important stuff in to my bag, which is small, and bid adieu to my doodles, posters and my plant and scooted out. I'll post photos later, i don't feel like it now.

Wednesday, 05-30-01

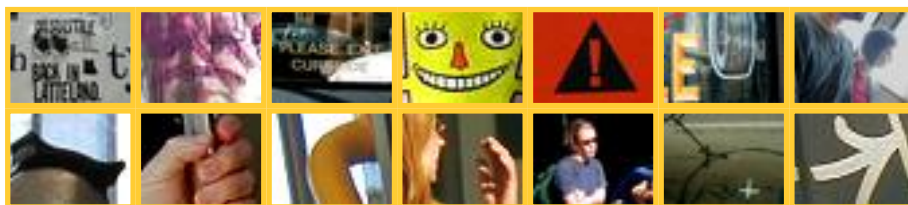

<morning> It's bagel day. It's also violently hot outside. Phew! A scorcher! Hot enough for ya? Etcetera, ad nauseum, wash rinse repeat! I woke up very late today, because I am willful and naughty. I got out the door with just enough time to get a small coffee and hop on Muni. There were these two totally weird fantastic freaks on the bus, sitting just a few seats ahead of me, this guy had a *big old waxed moustache* and the girl sitting with him had this totally amazing huge pair of sunglasses on and big bushy pigtails. They were so cool, and I tried to get a photo of them, but [this is as good as I could get](#). I got to **HAMSTOP** and grabbed a copy of the SF Weekly and turned around to see this woman I sometimes talk to, this british woman who does some kind of skin-related dermo-thing as a job, and she said "Hiiii! I was just thinking about you this morning!" and I responded "Uhoh! Whatever for?" She said she just hadn't seen me in a great while and was wondering what I'd been up to. Funny! So I spent a few minutes talking to her in the blistering sunshine (yes i dressed all in black and YES i wore a long-sleeved shirt I am wicked smart) about this-and-that and fluffy stuff. The bus came along shortly, which mercifully ended our awkward chit-chat swiftly. The bus was relatively quiet and empty, so I hunkered down, read some stuff in the SF Weekly, and then I read the [Comics Journal](#) when I got tired of the Weekly. Nothing else happened that really bears mentioning, but [this](#) kind of hits close to home.

Tuesday, 05-29-01

<morning> I'm suffering from a serious case of 3-day weekenditis. Tired, kind of spaced out. I woke up a little late today, very late, actually. I got in a little later than I would have liked, but officially, I was on time. Neener neener. My coworkers were all a little tardy today, so as it turns out, I was the first of my group to arrive. Even when I try to be tardy, I am on time! A lot of people are out on

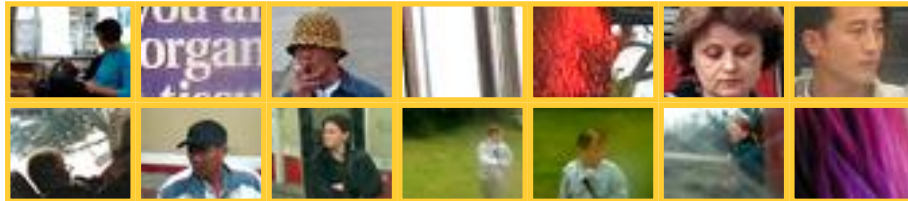

vacation. I envy them. I dashed out the door and swept past the cafe, thinking that I should hustle on over to **MEATSTOP** lest I miss Muni. I stood around for about 5 minutes, realized I probably had enough time and need for coffee, so I doubled back and got some. Muni came along after a few minutes and got me to **HAMSTOP** without incident. It's a really bright, sunny day, and people are in reasonably good spirits. I got a good seat way in the back on the 50, and I didn't notice this cool punkrock guy that I've talked to a little before was on the bus, sitting a couple of seats ahead. I only noticed him after i'd passed by, I felt kind of lame for not nodding or smiling at him, so when he got off the bus, I didn't look up from my book. I'm such a spaz. The bus was mostly empty. Quiet and peaceful and a little bit boring. I neglected to bring along any meaningful reading material so I spent some time looking at the [Muni map](#) and scouting out random weird bus routes. I like maps. Late last night, I was waiting around for the 5 Fulton way out by Ocean Beach, and this interesting shirtless wild-eyed guy came along and started striking a variety of kung-fu poses and pacing back and forth. He was amusing, so he sort of had everyone's attention, so he told us "You know, Satan, he has excellent eyesight in the dark, eh?." I nodded and said "Oh yeah, really?" and kind of encouraged him to continue, which he did, "Yes. He has good vision, living underground, his other senses increase... He can find you by your smell, the way you move your body, by the way you feel. The dark mean nothing to him." This euro-jock guy who was standing nearby looked confused by the way the conversation was going, so he asked "Excuse me, did you say Satan?" and the crazyguy said "Yes," and the euro-jock said "I would have guessed that satan would have bad vision from all that fire" and the crazyguy went on to tell us all about how Jesus loves Satan but keeps him in check, etc. We smiled and waved at each other when he got off the bus. The funny part of this story is that I saw the crazyguy again this morning, trying to get on my bus and failing. I waved, but I don't think he saw me. Yay crazyguy!

Friday, 05-25-01

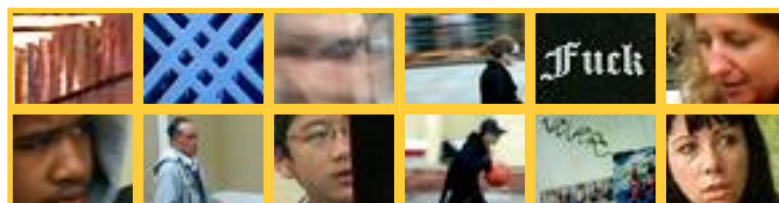

<morning> Waking up was kind of easy today. I woke up early, way before my alarm was set to go off, but try as I might, I could not get back to sleep. I tossed and turned for a little while before I just gave up and got up and showered. Getting ready was easy enough but leaving was difficult. I got out the door as the 24 was just about to pull up to **MEATSTOP**, but the lights were against me, and the bus got there before I did. I was a little worried about missing it, so the moment the light turned green I sprinted across the street, and people were still getting off the bus, but it could have pulled away at that decisive moment, but it just sat there. I got on and said "Hi" to the bus driver and he sort of glowered malevolently, so I flashed my pass and moved towards the back of the bus, and then I heard him say, "Tsssshhh. you're **welcome**." and I said "oh... thank you" in a super quiet meek voice. I hate people who wait to be thanked like that. It's so passive-aggressive. And saying "you're welcome" is just so stupid. And all he did was wait a second while I ran my ass off to make it on the bus, so what the hell should I thank him for? For *not* being an asshole? Jeez! Ok. So I made it to **HAMSTOP** in time to hang out a little bit, it was really gloomy, drizzly and cold out, so I kind of huddled in the doorway of the **HAMSTORE** for **HAMWARMTH**

until the bus came. These new drivers they swapped in to my route are all kind of weird, like this guy driving the 50 had this thing about announcing all of the stops in this creepy super quiet evil voice over the PA. Yeep! One of my coworkers got on at the bridge, and spent some time fiddling with my camera. The sun came out around Sausalito, and it was glinting off of the water in a super-disco sort of way that was further enhanced by the scratched-up windows of the bus, a positive side-effect of destructive negativity. I officially got to work on time today. Not an hour early, not 30 minutes late. Just right on time. Of course, with the holiday weekend, the office is almost deserted, but i'm here. Aww yeah. Links! [Tea is good for your mouth](#) :: [skullfuqmuni](#) :: [crazy cat lady](#) :: [sad news from the squidfactory](#)

Thursday, 05-24-01

<morning> Yes, I've been sick, sicksicksick. I spent the last two days sleeping, drinking liquids, and reading The People's History of the United States. A lot. It's amazing how much work can pile up during a 2-day absence. I'm still pretty spaced out and moderately woozy but i'm way better than yesterday. I had to wake up extra-early today, which was pretty amusing with my head all stuffy and spaced out. I wound up resetting my alarm to get a few precious extra minutes' worth of sleep, but then I jumped up all guilt-ridden and ran around frantically, rushing to make it out the door in time to catch Muni by 7:35. Muni, of course, was late, but that's ok because so was I, but as a result the bus was thoroughly crammed with people. Sardines! I generally stand up without complaint and just kind of play human bumper-cars with the other passengers when I get on to a super-mega-ultra-crowded bus, but there was a seat way in the front, the seats reserved for the elderly, handicapped and otherwise infirm - so I took it. I felt weird and guilty, though, like all these other people on the bus would be thinking "Ptch, those seats are for *old people* and *the handicapped*, and besides, my feet hurt, I wish *I* had thought to sit there!" haha. I know what everyone is thinkin'. I got to **HAMSTOP** with about 4 minutes to spare before the bus came, and I got on, and went way to the back, got myself a primo seat and started reading my book. The city was cold cold foggy foggy and so I wore my jacket, but of course it all cleared up by the time we got to Sausalito, and so of course it's 90 degrees out in San Rafael and i'm left lugging around my jacket. Duh.

Monday, 05-21-01

<morning> I woke up to the most horrible noise this morning, my clock radio was set just slightly between stations and the sound was like horrible experimental music, so the first time it went off, I got up and set the alarm for

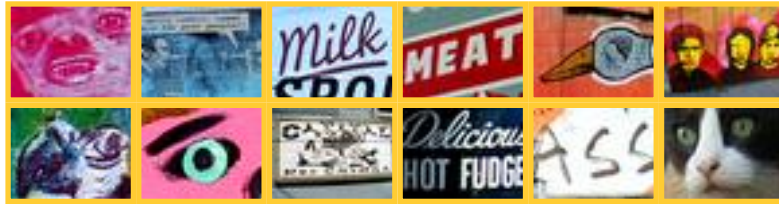

about 20 minutes more sleep. The second time it went off, the noise was the same, so I knew something was amiss. Funny that I would assume the scratchy horrible sound was intentional! ha-ha! I am a gullible arteest! The sunshiney morning warmth was kind of nice today, and after I left my house *just* a minute too late to make the 9:00 bus, or maybe it was several minutes too late, I don't know - anyhow I had plenty of time to sit at **HAMSTOP**, reading [A People's History of the United States](#), soaking up great gobs of warmth. I'm feeling a little bit sickly, kind of sore-throaty, stuffy-headed. I made sure to buy myself something for breakfast, so I went over to this roach coach that's always in front of the hospital and I got a bagel and some coffee drink thing. I took very few photos this morning, because I am so thoroughly immersed in my book, but I have some leftovers from Friday. Friday evening I rode in to the city with my co worker and we got stuck in evil traffic which was all caused by people rubbernecking the scene after someone jumped. This sparked a really interesting, though morbid conversation about which method of suicide was the most brave, or romantic, and we agreed that the bridge jump was a fairly brave method, and that taking pills was pretty cowardly. More of a cry for help than a genuine attempt. We talked about the fact that jumping off of the bridge in to the bay was essentially the same as jumping from a building half that height in to concrete, and I mentioned having heard something about people surviving, and we both marvelled over that. How much it would suck, but that it would be a completely freak accident and would likely paralyze you. Like I said, Morbid. Over the weekend, I went to a really excellent screening/benefit for [@TMark](#) and [voteauction.com](#) at [ATA](#) and I saw one of the many characters from my k o m m u t e . We didn't acknowledge each other, but it was good to see that he had cool, leftist leanings, or at least supported cool, leftist organizations. So, to date, that's 3 run-ins with k o m m u t e regulars. Interesting.

Friday, 05-18-01

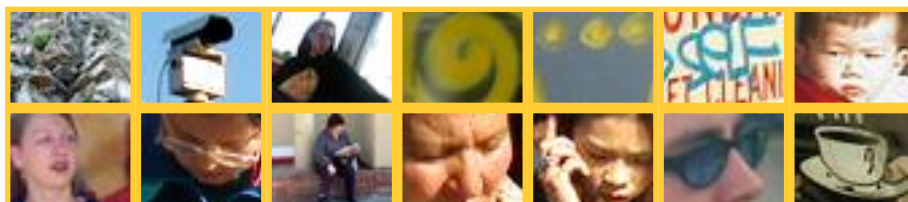

<morning> So I woke up at the usual time, and then I decided that I needed more sleep. It's Friday for cryin' out loud, I needs my rest! I made good time, regardless of my stolen moments of slumber, and I only suffered briefly from t-shirt indecision, which made me waste precious minutes before I finally settled on my classy glittery new "Keep on Truckin'" shirt. I'm all about refinement, baby. So this wasted time cost me dearly, as I walked out of my apartment to see muni taking off from **MEATSTOP**, and i had a head-slapping "d'oh!" moment. I was struggling with the implications of waiting for muni (which is always a major gamble) or trying to walk it when a crazy cab driver made a wild turn in front of me and so I took it as some kind of a SIGN, so I got in. I was kind of out of it, and so instead of telling him the intersection I wanted to go to, I said "Hayes and Divis" instead of "Geary and Divis" and he laughed, pointed to his meter, saying "We're here! That'll be \$2.50, get out! haha!" and I just sort of stared at him, totally baffled, and then I broke out laughing. Humor takes thought and thought takes effort and effort requires lucidity and I was not entirely lucid. He said "Sometimes you need someone to tell you where you are." and I said "Well, \$2.50 is a pretty reasonable charge." and he said "For

someone to tell you where you're at, yeah!" What a hippy. I felt kind of like I was a let-down, not entertaining this crazy old hippy cab driver, wearing his purple sunglasses. We rode in traffic, listening to "[Burning Down the House](#)" by the Talking Heads, and I was really grooving to the lyric "People on their way to work baby what did you expect/Gonna burst into flame" for some reason. It seems that all of the Golden Gate Transit bus drivers have changed routes, so all these unfamiliar people are driving me around. Eek! Around about 5 minutes after I got to **HAMSTOP**, I realized that the batteries in my digital camera were dead. Dead dead. But they lasted about a MONTH, so I'm not complaining. It just means no new photos for today. But, to make up for it, I present to you some photos of random murals and graffiti and other nonsense around SF last weekend.

Thursday, 05-17-01 :: :: it's my MOM's birthday! woo!

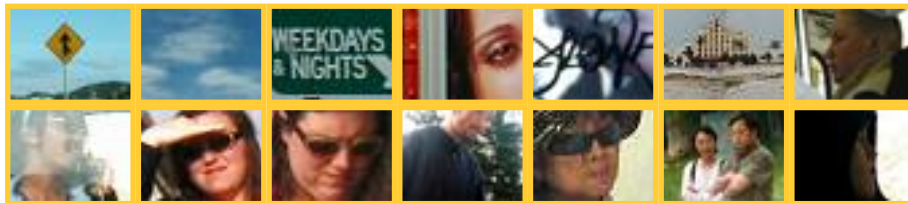

<morning> I came in at the regular time today, not that anyone was around to notice or anything. It's a sunshiney kind of day. My mom is playing hooky because it's her birthday. It's no wonder I have such a great work ethic what with having such a great role model, mom! psh. I kid. My mom rocks. Apparently the web is celebrating its 10th [birthday](#), too. How weird is that? So I had to really tear myself away from my bed this morning, it was horribly dramatic. I got up and out in time to make it to **MEATSTOP** in good time to catch Muni *and* get some coffee. I was standing around lamely wondering if I should take some photos, meditating on the signs in the Meat Market windows when my hyper eager k o m m u t e pal came trundling over and started talking about her hangover and her boss and all manner of silly stuff. She's nice, we chatted throughout the busride and during our wait at **HAMSTOP**. She invited me to some kind of weird cabaret/supper/nightclub place tonight, which was nice but felt a little... Strange. Whenever she's around I can't do my photography. It stifles my creativity! There were a lot of kids at **HAMSTOP**, some kind of field trip maybe. I'm reading another book, since I finished up [Survivor](#). I'm reading some hugely, grossly outdated book called [GEEKS](#). It's kind of cutesy. Since i'm on a run with the hyperlinks, [Kerouac made a list](#). The day has begun. It's going to be a busy one.

Wednesday, 05-16-01

<morning> An early morning two days in a row. (!!!) Here's the deal about the missing k o m m u t e s. I stayed home Monday, felt nasty and slept a lot. I was feeling much better after a day of rest. I got a call late in the evening from work telling me to come in early for a big important marketing meeting thing

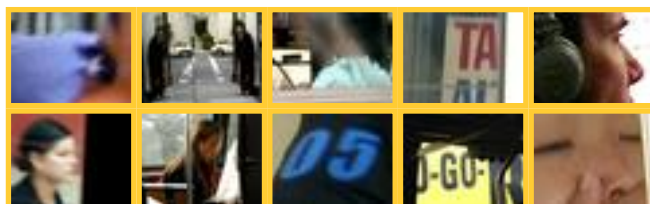

yesterday, and so I had to wake up at **6:20 a.m.** in order to make it in. Then, after that meeting were more meetings, and work, and so I never had a chance to deal with k commute-related tasks. Forgive my employers, they know not what they meddle with. Poop! Today I couldn't help but wake up early, too early, and so I wound up coming in plenty early today. I opted to forgo my morning caffeine stop and headed directly over to **MEATSTOP** in order to catch the earlier bus. I have to say that the k commute is a little less fun at earlier hours. I guess maybe it's because the k commuters are more bitter and serious about having to be awake so early in the morning, or something. Could be just a bad crop of k commuters who are unpleasant regardless of the hour. Muni is much more somber and I shouldn't even mention how depressing the crowd is on the 50. Buncha sourpusses. There was this one really odd woman, I can't quite put my finger on what was so weird about her, but she seemed really annoyed with me. Imagine! She was waiting at **HAMSTOP** with me, and every time I looked in her direction she was sort of scowling at me. When we got on to the bus, I headed to the very back seat and sat next to the window, like I always do, but I guess she had that seat marked as her own, or something because she sat there making these bizarre "ohmygod" faces at this guy sitting across from me, who was, I dunno, saving that seat for her or something. Stupid yuppies. I'm *glad* I took her seat. They both sat across from me reading their respective yuppie newspapers until Sausalito, where they both got off at my old stop. I spent my time window-gazing and writing in my journal, which I do way too much. I looked for whales again but saw only kayakers. There was a bunch of roadwork going on along the Sausalito waterfront, and they had narrowed the roadway to only one slim lane, and the bus couldn't make the tight turn so we ran over this really long line of carefully arranged traffic cones ka-thunk ka-thunk ka-thunk and as we passed the construction guys, they looked kind of hurt and upset as they went to repair their work.

Friday, 05-11-01

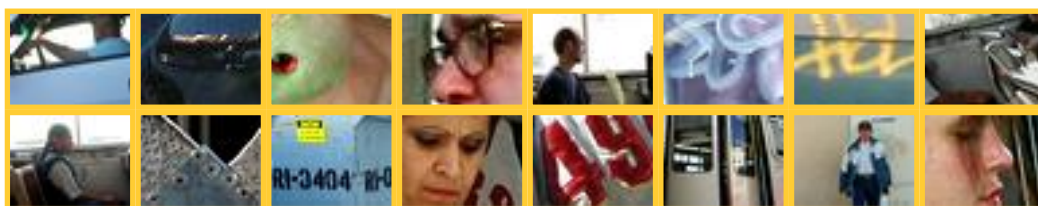

<morning> I am the picture of motivation. I am serene efficiency personified. I am a mover/shaker. I woke up early, before my alarm, and I managed to go through my morning routine quickly enough to be able to catch the 8:30 bus to San Rafael, so I even got to work early, boy howdy. I had good muni luck, there were buses line up almost end to end, so when I missed one, another one was along shortly. Rad. I got to **HAMSTOP** just in time, too. It was all foggy and grey and moist out, which was a welcome change from the sunshiney summer hot mornings i've been dealing with lately. I've been seeing way too much of Tourette's Guy on my k commute. Every morning, and then last night when I rode the bus back from San Rafael. He always makes a little terse conversation with me, and smiles and raises his eyebrows at me like he wants to talk more. It'd mess up my quasi-anonymous photo-voyeurism if I were to start making conversation with this guy. It's not that i'm unfriendly or anything, it's just that I'm fanatically devoted to my craft. Uhh. Yeah. Yesterday's evening k commute was interesting. I took a bus which plops me way the hell down by the Marina rather than anywhere near my neighborhood, so I opted to use up the last of my cash on a cabride. I tend to get pretty amusing drivers when I catch cabs down

there and this was no exception. This driver had a thick accent, for some reason I thought of Trinidad, though I have no idea where he's from. He started talking about beautiful women and the nice weather. He told me a story about when he was a boy, he was friends with a lot of older girls who were much taller than him, and when they would make fun of him he would take off his shoes and jump up and "touch their titties and run like hell because they would be mad!" He went on to talk about relationships and his girlfriends and their "big asses" and such. He was very jovial, so none of this came off as offensive or abrasive in the least. We passed by a McDonald's restaurant at Fillmore and Turk and there was a crowd of people there all crying and hugging, placing flowers and balloons around a tree outside. Apparently someone was shot there yesterday. Yikes.

Thursday, 05-10-01

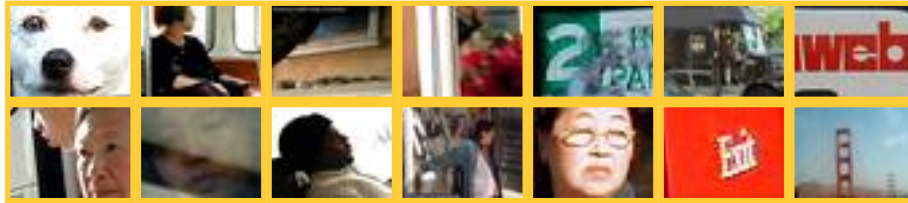

<morning> Today has started off pretty nicely! I woke up late but got in on time, which is always nice. The sun is shining, it's hazy and icky out, but it's also lending this gauzy, romantic quality to everything, the heat making everything shimmer slightly. Nice nice. People smelled great, my buses were on time. It was just a totally copacetic morning, a bunch of the **HAMSTOP** regulars said hello and good morning. The girl who said that everything smelled like pee yesterday wound up sitting near me on the 50, a guy with super dreadlocks got on and started chatting her up. I learned a lot about her by listening in to their conversation. Like for instance, she works for an architect in Sausalito, and she does paintings, watercolors and such, for a living. Cooool. She also talked about waking up at 3:30 a.m. which is kind of crazy but she said she had more energy than she did when she woke up at 7, because she could drink her coffee. Must be some big cups of coffee to take 5 hours to drink! Anyhow, around about Sausalito, I was reading and kind of vaguely listening in on this conversation when people suddenly started exclaiming and craning to see out of the windows because there were **whales** out there, between Sausalito and Angel Island. I've never seen a whale before, and there one was, all shiny and grey, a big lumbering curve bumping up out of the water, and a big white spout. Cool, man, cool. The girl said that she's been seeing whales out there all week. Must be nice, working with that kind of view. When I came in to work, everyone was pretty bouncy, and my boss brought in a huge bowl of fresh strawberries, so I grabbed a handful. And now back to work.

Wednesday, 05-09-01

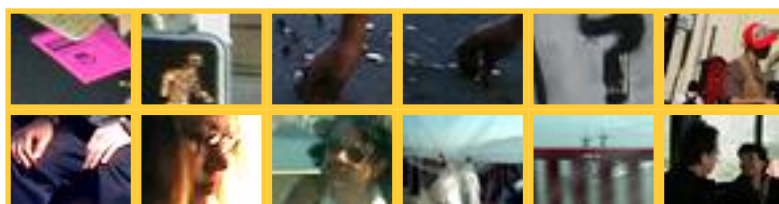

<morning> Crazy day, crazy day. I got up earlier today and got in to work on time, for a change. Perhaps this is the start of a new trend of efficiency? I got

coffee, and everything. It's sunny and gorgeous out, but the pollution is pretty heavy. Hazy ick. Today, at **HAMSTOP**, a girl I see and chat with from time to time showed up and went over to the far end of the bus stop, where she usually sits and reads her [Guardian](#), but she quickly doubled back and came over to the bus shelter where I was sitting and she smiled, said hello, and then said "Everything over there smells like Pee today!" and I cracked up laughing. I spent the rest of the k o m m u t e reading my book and the [SF Weekly](#).

Tuesday, 05-08-01

<morning> Slightly contrary views of the current trends: [Dot-Com jobless having fun](#) - or - [Jobless in San Francisco & Looking to Move](#) - Huh... Yeah, uh, ok. So it's been really hot and icky lately. Work hasn't been bad, or too hectic, but I'm feeling a little bit overwhelmed. I think it's allergies or something, I keep getting these really awful headaches. It sucks. Whine, whine! I'm falling apart! Anyhow, I didn't really feel up to tackling the k o m m u t e yesterday. I'm back in the saddle today, though. I got up early, but I went back to bed and wound up coming in a little late. What a ridiculous charade! I waited for Muni for about 15 minutes, watching these two really vicious looking crows stalk the intersection malevolently. Eventually, I freaked out that the bus wouldn't come and I'd miss my connection so I flagged down a cab. The driver was this really friendly, totally incomprehensible old russian guy who kept trying to have a conversation with me but I really couldn't understand him, so I just smiled and agreed with him. He seemed to like that. Most people do. He dropped me off about a block away from where I wanted to get out, but I didn't argue, it was only a block. It's so bright and hazy and poluted out! I need sunglasses and detox. A guy came along at **HAMSTOP** and had this really amusing ordeal where he dropped some change, bent down to pick it up only to have about \$3 in change pour out of his pockets, along with some other little items. I watched all of this and couldn't help laughing sympathetically with him as I watched him try to pick it all up without getting hit by the bus. Yesterday there was a similar scene: A young girl got off of a very crowded bus, and she dropped her manga and the door closed up, jamming on the book, and she struggled to get it loose, but the door wouldn't open or close all the way because it was crammed in there. She kept trying to get the door to close, and then had to repeatedly run up to the front door to try to get the driver to help. Eventually, the door closed, and the book was passed, hand-to-hand between a bunch of passengers, and then out of the side window to the girl. Sometimes life is like that. I'm reading [Survivor by Chuck Palahniuk](#) and it's pretty damned good.

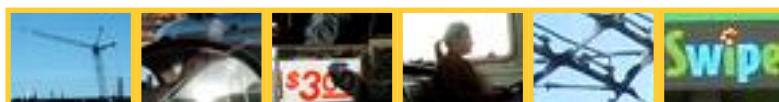

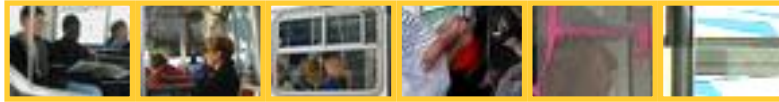

Thursday, 05-03-01

<afternoony> Today's k o m m u t e was delayed by a meeting which turned in to a birthday party which spawned further meetings and then a FIRE. Seriously. Part of the building I work in was **on fire**. Boy howdy. Usually I don't take lunches, but today I did. I watched the firemen wander around the building carrying hatchets and equipment and things, and then I decided I should go wander off. Now the building is all empty and quiet. I like it like this. In the proceedings I managed to totally forget this morning's crummy commute. I got up and out pretty early, got my coffee, it was all efficiency and hooray for me until I realized I was going to miss the 8:30 bus, and a wave of futility and resentment hit me. Damn Muni coming in clumps of 3 or 4 buses. Stupid! Anyhow, I got on the 9:00 bus, and made my connections and got in to work on time, only 2 hours after I left my house. Sheesh. My intentions were pure, I wanted to come in bright and early to get a fresh start on the day since I'll be taking tomorrow off to wait around for PacBell. Tried some new photographic techniques today, with mixed results.

**Wednesday, 05-02-01**

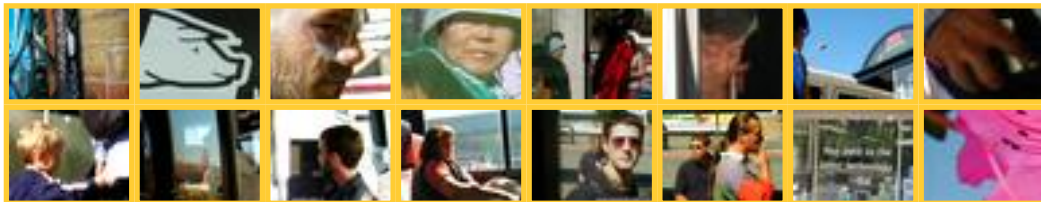

<morning> I was rushrushrush busybusybusy all morning so I'm only getting to write today's k o m m u t e now that it's 3:30 in the afternoon. I got out the door a little later than I had hoped, but I made all my connections, and got to sit and watch in silent wonder while two teenage mook boys flipped through a homemade booklet titled "the death book" and "the great book of DEATH". It was full of images of death and dismemberment, apparently, and one of the kids kept asking the other for details, like "What happened to this guy's head? How did that happen? GOD! SICK dude!" and the other kid beamed proudly. They started talking about [rotten.com](http://www.rottentomatoes.com) and I started smirking. One of the kids is someone I see all the time on my k o m m u t e s, and he's always super friendly and polite. Last night, I watched a [Really Great Documentary](#) on pbs about the commodification of "Cool". Later, I went to Google and did a search for the word [k o m m u t e](#) and what I got was: Searched the web for k o m m u t e. Results 1 - 10 of about 14. Search took 0.18 seconds. Did you mean: *commuter* **Category: Science > Social Sciences > Psychology > Dreams > Dream Sharing** . Very interesting. Dream sharing. Hmm. I guess sometimes I do that in my k o m m u t e s... but, like... neet. I think it's cool. i like being indexed in that way, dream sharing. It's kind of poetic. A nice young man sat down next to me today and asked me where we were, and I told him we were passing through Sausalito and he said "Hmm, wow, I'll have to come back here someday. It's beautiful! Just look at that sky, the water. Mmm!" He had apparently fallen asleep on the bus and missed his stop going south, and had to double back from SF. He was seeing my boring old k o m m u t e with a sense of childlike awe.

Tuesday, 05-01-01

<morning> I didn't write yesterday or take any photos because it was an icky day. At least the first half of it. I left my camera at home, I spilled grape-flavored Jolt all over myself, it just didn't start well. This morning, however, was great. And to make up for a k o m m u t e l e s s Monday, I present to you a k o m m u t e f u l Tuesday with no less than 16 fotos. Hooray! And, since it's the first of May, check it out, a new [desktop calendar](#), lovingly hand-crafted by me, right on schedule. Um. So, people were friendly this morning. Smiling and commenting on my hair and whatnot. It's very sunshiney and nice out. May is starting out to be a very efficient month for me, which is strange. I got my coffee and got on to Muni in good time to make it to **HAMSTOP**, tried to get back in to the swing of things with my new camera and the whole k o m m u t e - p h o t o g r a p h y thing, which is actually kind of difficult. I'm kind of happy with the new camera, the shutter is much faster than the old one, which makes for better results. While I was standing around at **HAMSTOP**, I noticed that there was dog poo on the sidewalk for the second day in a row. It was different poo than yesterday. I watched people approaching, wondering if they would notice and avoid the poo or just blindly stumble in to the dreaded poo-trap. Nobody stepped in it, but very few people noticed it. My cow orker said something yesterday about watching a beautiful butterfly for a long time, watching it float gracefully through the air, admiring how delicate and unique it was until WHAM it splattered across the windshield of a mid-sized truck and that, he stated emphatically, was what the universe was like. Hmm. In some ways, yeah. In the news: [Tales of the City](#).

Subject: Votes for Sale

Dear Colleagues -

My "Site for Thieves" mailing about burglar.com shocked some of my readers. What is next, they asked. Another of my colleagues provides a timely answer

<http://www.voteauction.com/>

about a site where you can sell your vote. He comments

> *Apparently it has been getting a lot of attention in Chicago which
> was already in the midst of an absentee ballot scandal. Here in
> Oregon where we have just converted ALL elections to vote-by-mail,
> virtually every ballot is available. This site shows nearly 400
> ballots currently for sale in Oregon. This isn't a huge number,
> but we have a US congresswoman in the Portland area who won with a

Subject: Votes for Sale

Dear Colleagues -

My "Site for Thieves" mailing about burglar.com shocked some of my readers. What is next, they asked. Another of my colleagues provides a timely answer

<http://www.voteauction.com/>

about a site where you can sell your vote. He comments

> Apparently it has been getting a lot of attention in Chicago which
> was already in the midst of an absentee ballot scandal. Here in
> Oregon where we have just converted ALL elections to vote-by-mail,
> virtually every ballot is available. This site shows nearly 400

> ballots currently for sale in Oregon. This isn't a huge number,
> but we have a US congresswoman in the Portland area who won with a
> smaller margin than this two years ago. To date there has been no
> significant evidence of fraud in our voting, but it doesn't seem
> like it would take too much effort to convince useful numbers of
> disinterested voters to sell their signed but unmarked ballots.

Modern information technology is like a fluid that seeps into the
interstices of our social structures, sometimes as a welcome
lubricant, sometimes as a corrosive solvent.

October 20, 2000

Odd moment from the other

Odd moment from the other day: I'm sitting at the movies, waiting for it to start, and some guys behind us start talking about [voteauction.com](#), a site that lets you "sell" your vote in the upcoming election. I'd never heard of it, and was anxious to check it out when I got home. So after checking it out, my next thought was "put it on [MetaFilter](#)" and just to be safe, I searched for the URL in the archives. It turns out that two weeks ago two people already covered it. You know a site covers too much ground when you can't keep up with it, but when it's a site you built, that's something else entirely different.

[Home](#) > [Soapbox](#) > Best of Mike's Soapbox 2000

The Best of Mike's Soapbox for 2000

This is my collection of the best rants, generally decided by the feedback I receive from visitors.

However, during the year 2000, when the election and Elian made for easy targets of the rants, my career necessitated that I not publish many of my true thoughts. So, instead of ranting about politics and such, my soapbox mostly became the home of me "Weird People I've Met" segment. I had to rant about my thoughts, because I knew one day I would be free to publish my real thoughts some day. So, now the story can be told. While you were reading all the stories of my weird roommates, this is what I really wanted to be saying.

For you fans of the Weird People stories, I have published a few of those for you.
Enjoy!

3/18 - I just saw a commercial for Scooby Doo for President (I am not kidding - it was on The Cartoon Network). Based on the candidates, I just have to say - he's got my vote!

2002 Note: And if 2004 is anything like 2000, I'll vote for him again.

3/25 - Does anyone remember the good old days when we used to have new TV shows all the time? Now it seems that we only have new shows during sweeps months (November, February, and May). I am tired of seeing threepats of shows. I just saw a *Frasier* on repeat the other night on network TV, and the same show was in syndication later that night!

In this week's **Weird People I've Met**, I will tell you about another of my favorite weird people. This was my second roommate named Andy, whom I will refer to as Andy2. I have many stories about Andy2, but this week's story is about his Playboy magazines. He used to subscribe to Playboy, but he would never let us look at them, because he was afraid that the oils in our skin might mess up the glossy print. He kept them in pristine condition on top of his desk, and we could see the covers, but never the forbidden fruit inside. Then, one

day, Doug and I were drunk, and we decided to raid Andy2's stash of Playboys. We were flipping through them with our drunken oily hands, when all of a sudden a bunch of pubes fell out of the centerfold. Doug threw the magazine across the room, and we took some sticks and carefully scooped it up and put it on the desk. All I know is that we never had a desire to see any of Andy2's magazines again!

2002 Note: I used to have a segment on "Weird People I've Met". Two of my all-time favorites were my roommates who were both named Andy...

4/6 - **Weird People I've Met** - This week, it's Dick Drunk - my roommate who puked in our heater. He was at a party and got drunk and when he started to feel sick, he felt cold chills. So, he got up and stood over the heater, which made him puke - which he did, right into the heater. After that, we never ran the heater without opening the window. Once, someone closed the window, and the room smelled like puke within 5 minutes (this was six months after Dick *supposedly* cleaned it up); and then, it was about 24 hours before the smell returned to normal (or as close to normal as possible - I'll talk about the "Old Spice" story later)...

2002 Note: My "Weird People I've Met" segment on Dick and the heater. Pretty funny, but then you didn't have to smell it...

4/8 - Have you seen the network news recently? It's all Elian all the time! Send the kid home already. It makes me long for the days when all that was discussed on the news was OJ hacking people to death and the President's sex life. I hope celebrity does something stupid soon, so we can get back to some different sensationalistic story!

2002 Note: Who can forget Elian?

4/13 - Did anyone see the footage this morning of Elian? Was it just me, or he did resemble Castro with all that finger pointing and a very impassioned speech. Maybe he will be right at home in Cuba after all...

BTW, did anyone catch George W. Bush pronouncing Elian as "alien"? It then occurred to me that technically, Elian is an alien! We could have him star in his own TV show called "Elian the Alien". After that video this morning, we all can see that he is good at memorizing his lines, so maybe he can have his own TV

show.

Also, speaking of Bush, I don't know who I am going to vote for. Al Gore is about as charismatic as my Physics 101 professor who only spoke to the chalkboard, and I am still bitter about the efforts of Tipper to ban so called "obscene" rock lyrics. However, George Bush comes off like a member of Animal House (and based on his answers to "Who's Who in Foreign Affairs", probably like the guy who had a 0.0 GPA). Bush always reminds me of the guy in the bar who says, "You know how you solve unemployment? Create more jobs!" and then has another beer; really - look at some of Bush's stands on issues and they are like, "Duh, but how do you really plan to do that?"

So, I don't know who I am voting for. Maybe I'll vote for that guy Charles R. Doty who was on *The Daily Show* last night. At least he is for kissing on a first date. And, he could probably use my vote.

2002 Note: More Elian... Little did we know that Gary Condit would relieve us from this - albeit a year late...

4/16 - I am supporting the *Star Trek Excelsior* campaign.

I heard a rumor (but a pretty reliable one) that the next *Star Trek* series will be a prequel to the *Original Series* focusing on the creation of the Star Fleet and Federation. However, the evil villain who will be messing things up is a time traveler from the 29th century. Hmmm, sounds sucky to me. Now, I am not saying that the Excelsior is the best plot in the world either, but it has to be better than this time travel early days thing. The writers of Trek should take a good look at *Farscape* and see how good *Star Trek* could be...

2002 Note: The rumor was correct. *Enterprise* came to be. And it sucks...

8/5 - Did anyone watch the convention? I sure didn't. I wanted to see who got kicked out of the house on *Big Brother*. But I did watch the recaps (on *the Daily Show*).

Is it just me, or does George W. come across like a drunken hick? He always, uh, slumbles, uh, sumbers, uh, **stumbles**, over his words. Then, uh, he mispronounces words, like "nucular" instead of "nuclear". And, uh, he, uh, seems forgetful sometimes. Where was I going with this...

But, in his defense, I would much rather listen to Bush than Gore. Gore the

Bore. I hope he abandons Clinton's traditional three-hour State of the Union addresses. I am concerned that if he speaks for that long at one time, he might put the entire nation to sleep.

I just wish Perot was still in the race. You could always count on him to come up with something so off the wall, that the debates were always worth watching. He would spout indecipherable crap like, "Hey, you know this economy is like a fish - if you put a little peanut butter in the chicken feed, you can create jobs for Americans", which caused everyone to wonder - who would actually vote for this guy? Maybe we should start a campaign to get Perot to join the debates, even if he isn't running for President. At least it would be entertaining...

2002 Note: This is one of the "missing" rants that I wrote but couldn't publish until now. I can't wait until 2004.

8/9 - I just saw an interview with Gore and Lieberman on *Good Morning America*. Gore did all the talking, while Lieberman sat there next to him and smiled. I figured out who these guys remind me of: Penn and Teller! Next time you see them together, think about it. Also, did anyone read Al Franken's book *Why Not Me?* Ironically, in the book he speculates who he would pick as VP, and it was Lieberman. I kept trying to figure out why I heard this guy's name before, and then it hit me. Maybe Al Franken was on to something...

2002 Note: Can you smell the sarcasm? Now you can...

8/10 - Weird People I've Met: Andy2

This is one of my all-time favorite weird people: Andy2. One peculiar thing about Andy2 was that he liked to argue, and he always believed that you were always trying to mess with his head. Yes, of course, we messed with his head, but it is hard to describe, so I'll just share one particular incident with you.

We were watching "Hunt for Red October" on video, and Andy2 turns to me and asks, "Dude, what kind of sub is that?" referring to the Red October. It's actually a Typhoon class submarine, and I believe that is mentioned in the film a couple of times. However, I didn't feel like getting into a discussion with Andy2 (I wanted to watch the movie), so I told him I didn't know.

He tells me, "You must know; they teach you that stuff in ROTC." Just wanting

him to shut up, I replied "It's a Typhoon class sub."

He sits there for a second, and then says, "Are you sure? I think it's a Kilo class."

Not wanting to argue or talk any further, I just agree with him. "Yep, I think maybe you might be right. But, it doesn't really matter. Watch the show."

He sits there again for another few seconds, and then says, "No, maybe you're right; it might be a Typhoon."

I gave him a stern look; I wanted to watch the movie, and I didn't care. "It doesn't really matter; watch the show." Who cares what kind of sub it is, it doesn't matter.

Andy then quietly says, "Dude, get your Soviet Military Power book and look it up." I had a book which listed all of the Soviet military hardware, including submarines (for all you young ones out there, "Soviet" is what we used to call Russians).

I replied that I didn't care, I wanted to watch the movie. He kept pressing, though, so I knew I wouldn't get a chance to finish the movie without getting him the damn book. So, I pause the movie, get my book, toss it at him, and continue watching the movie.

"Dude, you were right," he then says, "it is a Typhoon sub. Wow, look at this sub it's cool." He then started reading off all of the stats about the sub. Needless to say, I didn't enjoy watching the movie very much.

So, do you see what I am saying? You see how annoying he could be? He was like that all the time...

[2002 Note: More Andy2... He really was a crappy roommate.](#)

8/12 - I am disappointed that no one responded to my campaign to convince Adele to let me see *Road Trip*. So, I need to know - was it because the movie was bad? Was it because you do not like me? Was it because you didn't want to upset Adele? I had the campaign up for eight weeks, and in that time, none of the 325 visitors to the web page sent Adele a message to convince her I needed to see the movie. She says, "See - even the people who visit your web page know it sucks!" So, needless to say, I couldn't even say in my defense, "But, so-and-so said I needed to see it - they said it was the best movie ever!" Nope, nothing like that.

Oh, well. I did make her sit through *Deuce Bigalow: Male Gigolo*, though.

I have a couple more rants about drivers. First, I was in a hurry the other day, and the woman in front of me was driving her four wheel drive Isuzu Rodeo (which had 4WD on it), and she came to a complete stop at every single speed bump in the parking lot. Here I am blowing over them in my Grand Prix at 5 to 10 mph, and she comes up to one, stops, slowly goes over it with the front axle, stops, and slowly goes over it with the back axle. Needless to say, I was going nuts as she is afraid to go over speedbumps with her four wheel drive, and it is taking me a half-hour to get through the parking lot. Hey, lady, I am just taking a guess here, but I would suppose that it would be safe if I said that you had never been off road, and probably, never even put your vehicle in four wheel drive. Maybe you should get a minivan - you might find it easier to drive and safer on the environment!

However, there was a problem with minivans, as well. I was behind a guy with one of these economy minivans, like the itty bitty Nissan and Mazda minivans, who was going so slow on the highway (like 45 mph in rush hour). The problem was, it was packed full of people, and the little three cylinder engine or whatever piece of crap motor it has couldn't pull all that weight. Dude, just because it has places to seat six people, that doesn't mean that the motor can carry six people. If you absolutely must, may I recommend a place other than the fast lane on the interstate during rush hour?

*2002 Note: I was trying to get people to e-mail and convince Adele to let me see *Road Trip*. Didn't work... Had to rant against all you who let me down. Although I did eventually see *Road Trip*, so maybe I should be thanking you now...*

8/19 - Four more years! Four more years! Four more years!

No, I wasn't chanting for four more years of Gore - I was celebrating the fact that we don't have to see this boring convention crap for FOUR MORE YEARS!

Four more years! Four more years! Four more years!

By the way, due to the recent decision by a US court to decline to protect source code with the Constitutional right of free speech, I am offering you this bit of source code which may not be protected by free speech, so I hope I don't get sued (see http://www.eff.org/Cases/MPAA_DVD_cases/)!

Warning!

The following source code is NOT protected by free speech!

```
10 PRINT "HELLO WORLD - RIAA and MPAA SUCK!"
```

20 GOTO 10

Download or link to this source at your own risk!

2002 Note: I hate political conventions as much as I hate infringements on free speech. When the court ruled that source code is not protected by free speech, I had to make my protest. The really scary part? They ruled that you can't even link to it. Like I said, download or link at your own risk...

10/7 - I have a lot to cover, so let's get to it!

What is up with the people in the Middle East? Why is everyone fighting over this piece of land? Matt Biers-Ariel of NPR has some [thoughts](#) about it. I have to say I agree with him. They are all descended from the same place, and the area that they are fighting over is nothing to write home about. I mean, if it was a beautiful area like Seattle that would be one thing, but the area over which they are fighting is more like Laughlin, Nevada. Maybe they should all move over to Nevada. It's big and unpopulated, so there is plenty of room for everyone and no need to fight.

I watched *Star Trek Voyager* this week. What happened to Star Trek? The Borg have been reduced to wusses. Remember *Star Trek the Next Generation* when one Borg cube destroyed about half of Starfleet at Wolf 359? I do, because I am a big geek. Now, one small ship like Voyager is whooping butt all over the place on the Borg. The writing is terrible. They hit a quantum gate and shoot ten years closer to home. They get shot ten years closer by Kes. They rig a quantum slipstream drive and get another ten years closer. But, then a week later, the crewman they left behind three years ago manages to catch up with them, even though the crewman didn't chance upon the same sequence of events that Voyager did. And never mind that they are well past Borg space, they seem to be able to meet up with the Borg whenever they want (or whenever ratings dictate). I remember when the producers said that even though Voyager is in the Delta Quadrant (where the Borg live), they would not be meeting the Borg. How I wish they held true to their philosophy...

Is everyone watching the debates? I'm not. I was watching *Dark Angel*. I figured I would just catch the highlights on CNN. Unfortunately, there weren't any. They need to change the format of these. They should have something like on *Jeopardy* where they buzz in. If they give an incorrect answer, the other guy gets a chance to get the points. Then, the audience could decide if they liked the answer or not. Also, they would be limited to like five words apiece, like the Webby Awards. Imagine it:

Moderator: This next question is for 400 points. What will you do to improve education? It looks like Mr. Gore rang in first. Mr Gore, go ahead.

Gore: Thanks, Jim. I want to tell - (buzzzzz)

Moderator: Oh, sorry Mr. Gore, you went over the five word limit. Audience, you can only consider the first five words, which are "Thanks Jim I want to". Audience, what do you think?

The audience boos.

Moderator: Sorry, Mr. Gore, the audience doesn't like that answer. Mr. Bush, you have a chance to steal.

Bush: Better edumacation promotes higher learnin'.

Moderator: Audience?

The audience boos again.

Moderator: It looks like neither one of you wins any points there. Sorry, this round is over. The score is zero to zero. It looks like neither of you will be making it to the next round. Tell them what they won!

Announcer: For being a contestant on the Presidential Debate, you each will take home a year's supply of Rice-a-Roni, the San Francisco treat! Be sure to join us next time for another Presidential Debate between our two new contestants Bruce Vilanch and Charo!

2002 Note: This was my attempt at election humor. It can now be told.

10/31 - Some miscellaneous thoughts I picked up from different sources:

"People are just squeaking by while their employers are zillionaires! At least if the government rips you off then they use the money to build roads and schools and airports and jails and all, they build the whole damn infrastructure! ... Yes ... because government is the people! The [business] owners just take the money and build castles in Barbados."

- Kim Stanley Robinson from his novel *Antarctica* on how tax cuts may not necessarily be good for everyone

"I don't think they [either candidate] know whether a missile defense shield would really keep us safe from incoming North Korean Taepodong missiles, especially if terrorists in a rubber

boat can cripple a United States Navy warship and inflict such devastating casualties."

- Christopher Buckley, "Know Problem: Still Undecided? Don't Worry, So Are the Candidates", *TV Guide* (Nov 4-10), on why both candidates might seem to misjudge the real threats to our nation's defense

Happy Halloween! A week from now, Gore or Bush will be your new President. How is that for some scary thoughts!

2002 Note: This is one that had to do with the election, but didn't have to do with the election. I pulled it from publication anyway. But now, it can be told.

11/1 - You have heard me talk about "voteauction.com". Now, there is another example of how the Internet age will affect voting. It is this site for "[Nader Traders](#)". The premise is that you want to vote for Nader but you don't want to hurt Gore - you go here and agree to vote for Gore in a contested state, and some Gore supporter in a state that Gore has locked up will cast a vote for Nader. This way, Nader gets enough votes to qualify for Federal campaign funds and Gore gets enough votes to win the election. Note: I don't endorse this site, but I am putting it here to show all sides.

Why don't I think this is a good idea? Well, it's your vote, and you should cast it for who you want. If you sell it for some scam, you are no better than politicians who sell their votes to special interests. Let me put it to you with an example from my own past: I was in school, and there was a special program that only one person could attend. I wanted to go, and so did a friend of mine. The catch was that you had to be nominated by your peers (you couldn't nominate yourself). Well, my friend and I hatched a plan - I would nominate him, and he would nominate me. Then, our classmates would pick the winner. However, it didn't work that way - I nominated him, and he didn't nominate me. No one else was nominated, so he was picked by default. Needless to say, we were no longer friends after that. But, I learned a valuable lesson - I don't trust the "you do this and I'll do that" scheme.

Finally, one last thing to remember on the note of Nader is this: if you want to vote for Nader, cast your vote for Nader. Cast your vote for the candidate that you most want for President. ***The only wasted vote is the one not cast!***

One other issue that has me irked is the fact that the Congress recessed for the election without passing the budget. You know, there is all sort of talk about the lack of values in today's society - and most of those come from politicians! What kind of values are they sending with today's message? Well, let me tell you the lessons I learned from our Congressional leaders. First, it's okay to go past the October 1 deadline - in fact, it's okay to miss it by over a

month! Second, it's okay to put off your work when your own butt is on the line - even to ask to be kept in a job that you haven't completely finished! Third, it's okay to be consistently late - you aren't accountable to anyone! I mean seriously - how come I seem to be the only one hollering that these guys can't pass a budget every year. Why don't they get started now on next year's budget, so that they don't miss their deadline (that's what I tell my workers when they miss their first deadline - I'd fire them when they miss their second deadline, but fortunately - they get the message the first time). I guess they feel that they can do this and still get re-elected with no problem. If this keeps up, they'll pass the 2002 budget in 2003!

[2002 Note](#): Another one that I decided not to publish until now. If you saw my [Mother of All Soapboxes](#), you know that the budget is something I still feel very strongly about.

11/2 - Today's soapbox is on Social Security. This has become a hot topic this election year. I want to share with you my feelings on the matter.

First, we have known for some time, at least 10 years, that social security was going to become an issue. With people living longer, as well as the fact that more people will now be taking out than were putting in, social security was on its way to being bankrupt. Something had to be done, and all of the Presidential candidates in the 1990s all pledged to do something to overhaul social security. So far, though, nothing has really been done.

So, what to do. One candidate has suggested allowing people to determine how to best invest their social security contributions in the stock market. However, this needs a little more attention. First, social security was set up during the Depression (after the stock market crash) to provide some sort of income for elderly people, who at that time had no income on which to live. A lot people had their long-term retirement investments disappear when the stock market crashed and there was a run on banks. Social security was to provide a long-term income in case a severe crash crippled the economy again. By placing social security in the stock market is to subject it to the same risks as every other investment plan!

The second thing wrong with this plan is that it is based on letting people invest their money in the way that they think is best. However, if people invested their money in the ways that they thought best, there would be no debt and thus, no need for social security! But, not all people invest their money wisely or safely. I certainly don't want my "economic safety net" (because that's what social security is) to be directly tied to the success of "heyidiot.com"!

Thirdly, my parents will be drawing their social security off of my contributions. This is the way it works. You don't put your money in now and let it add up. No, the retirees today are drawing their money from the contributions made in my income. When it comes time for me to draw income, it will be from the contributions made at that time by my kids and grandkids.

But, we must be fair and look at the other candidate's plan. Well, he has acknowledged it is a problem, but he hasn't figured out a good solution to it. He favors using some of the budget surplus to help it, but he hasn't given specifics as to how much will go to this versus how much will go to building a missile shield to how much will go to future social programs.

As for my solution - well, the only one I have heard that was about as good as these was a suggestion by a friend of mine for a fund raiser for one of our organizations:

We had a budget of \$2,000, and we were shooting to double our money. We had several ideas, all of which would require significant money for the startup costs (like \$1,200 to \$1,500). It's like before you could do car washes, you gotta buy hoses and buckets and towels and soap or before you do a bake sale you gotta buy flour and eggs and milk. The potential downside is that you buy \$1,500 worth of stuff, you bring in \$500 and now your budget is \$1,000.

My friend was on his way to go to Las Vegas and he said, "Give me the \$2,000 and I'll double your money. It won't cost you a thing, as I am going to Vegas already, so you'll just have to give me the money and I'll invest it for you. Of course there is the chance I'll lose, but there is also the chance I'll win." We thought about it, and as we discussed strategy, someone said that the best strategy was to simply go to a blackjack table, plop the \$2,000 down and in one hand we would either double our money or lose it all; either way, it would be over.

In the end, we decided to have a car wash, bake sale, and T-shirt sale. At the end, we shelled out \$1,200 for hoses, ingredients, and t-shirts, and we brought in \$1,200. At the end of our fund-raiser, we broke even. If you factor the time we spent into the equation, we probably lost money.

The moral of this story is: you have two options here - you can vote to risk the money and either win big or lose big or you can vote to choose to keep things the way they are and risk nothing changing.

[2002 Note:](#) My "issue" rant on Social Security. I was going to publish this one, because I did not mention either candidate by name, but we were warned at work about just staying away from the election, so I just left this until now. I knew that one day I would be allowed to publish these. Better late than never.

11/3 - Today's soapbox is about education. We know that there are problems with education, but we don't know what is the best way to solve them.

One issue is the program of school vouchers, where parents can get vouchers from the government to send their kids to private school. However, I don't think this is the best solution. In fact, it avoids the problem. If a school isn't teaching its students well, then the school needs to be fixed. Sending kids to other schools won't fix the problem. There needs to be more money put into education, and if we allow a system of vouchers, the money won't be put into fixing the problem schools - it will only make the good schools better.

Another issue is the role of the Federal government in education. Some favor a strong program of standards that schools must meet. Others favor a standardized test that all students across the country would take. Still others favor a pay scale for teachers that directly correlates their pay to the performance of their students. I don't know if any of these will work, but I know that there are other major issues that need to be worked out at the school board level, and no amount of Federal government will change that. For example, in my high school, we had a \$1.5 million sprinkler system for our practice football field; meanwhile, in my chemistry class, we were doing experiments with chemicals that were so old that my 12 molar sulfuric acid had a pH factor of about 6.7, making it only slightly more acidic than water. My school had its priorities, and unfortunately, athletics rated a lot higher than academics. Nebraska is a long way from DC, and there isn't much the Federal government will be able to do to change that mindset.

Another issue similarly related to this is that of affirmative action. I used to agree with the people who want to get rid of affirmative action. I would hear the argument of "wouldn't you rather be hired based on your performance rather than your race?" I would buy into that, and I would agree that if I was a minority, I would want someone to want to hire me because I was a good worker rather than the fact that I was a minority. However, once I was out in the real world and dealt with real people, I realize that there is a flaw in this argument.

The problem with this argument is that you assume it is a perfect world. Ideally everyone would have a fair opportunity to compete for all jobs. However, many minorities are not considered for jobs, because they don't have the opportunity to receive the education that would qualify them for those jobs. I have worked with minorities who received educational opportunities from affirmative action that they otherwise would not have received. I found that some of the finest engineers I have worked with were minority engineers who would not have been successful without affirmative action. Yet, this isn't the biggest impact that has changed my mindset.

I had a young "at-risk" minority youth who worked for me. He told me he was

afraid that he would end up in a gang like the rest of his peers. I told him that he was in control of his destiny, and that if he didn't want to end up in a gang, he wouldn't. He told me it wasn't that easy. I took him to meet other minority engineers and professionals to show him that there were opportunities open to him. I wanted him to see that there were mentors and role models to follow. This is why affirmative action is important. Yes, there is no reason why a certain minority can't be a certain profession, but if there are none currently in that job, it is a lot more difficult to aspire to that profession.

Which brings me back to what I think is the biggest single problem with education today. I think this is what we need to fix in America: Kids need to be told that their opportunities are not limited by who they are, but rather only by what they want to be. Or in other words, you are not limited by your gender, ethnicity, national origin, handicap, sexual preference, or eye color, but rather by how hard you are willing to work to achieve your goal. It should be the Department of Education, not the Army, that has the slogan "Be All That You Can Be"!

2002 Note: This was my "education" issue rant, which you are seeing for the first time. I still feel strongly about this one as well.

11/4 - Today's issue is about the Internet and the freedom of expression. This is the issue that is most important to me, for without the freedom that we enjoy on the Internet and the guarantees provided to us in the First Amendment, I would not be able to have this soapbox and you wouldn't be able to read this. Do not underestimate the power that you and I hold in our hands. Yes, this is a stupid little page with minimal graphics, yet I am free to put anything in here. Just think, in some countries, what I am about to put here is illegal:

Free Tibet! Overthrow Castro! Revolt against Saddam Hussein! Free Leonard Peltier! Vote your conscience! Prince Charles is a twit!

Yes, this is a powerful right we have, and we must do all we can to protect it. The technology of the Internet now allows us to communicate almost instantaneously with any part of the world. With this new form of communication comes challenges to the freedom of speech. After all - is this speech? I am not actually speaking any of these words. Yet, we must ensure that we do not lose any of our freedoms in this new media.

So, I will now put up two actual quotes from each candidate about the Internet, and I am putting up these quotes to show equal time to both candidates. Also, I want to show that neither side really understands the Internet.

"During my service in the United States Congress, I took the initiative in creating the Internet."

-Al Gore, CNN's Late Edition with Wolf Blitzer, March 9, 1999, even though the Internet began in 1969 as ARPANet - before Gore began service with the U.S. Congress

"Ideally, it should be tax-free. But in the real world, we cannot ignore the fact that our democracy thrives in a federal system in which state and local governments derive one-third of their revenue from sales taxes."

-Al Gore in an interview with Business Week, December 20, 1999, in which he didn't really say whether he was for or against an Internet sales tax.

"But Columbine spoke to a larger issue and it's really a matter of culture, it's a culture that somewhere along the line we've begun to disrespect life. Where a child can walk in and have their heart turn dark as a result of being on the Internet and decide to take somebody else's life."

-George W. Bush in the Presidential Debate at Wake Forest University on October 11, 2000, where he directly blames the Internet with corrupting youth and making them evil.

"There ought to be limits to freedom!"

-George W. Bush at a Press conference at the Texas State House, May 21, 1999, on the gwbush.com website and his frustrated attempts to shut it down. You can download an [MP3](#) of the speech.

2002 Note: This was my "Internet" issue rant, and you are seeing it now for the first time. It was actually during the writing of this rant that I came up with the idea of "Values Learned from Politicians". I still feel as strongly about these issues - especially free speech and the Internet.

11/5 - Have you noticed how neither candidate has commented on their feelings about the 3rd Amendment? What aren't they telling us? What don't they want us to know?

2002 Note: An attempt at humor, satirizing the media. Kind of dry, I know...

11/6 - Today's soapbox is on voter apathy. I had lunch with a guy who told me he doesn't vote, because he doesn't like the candidates, mostly because he doesn't like the two party system. He told me that by not voting, he is sending a message to Washington. I pointed out to him, however, that he is not sending a message, and I then showed him how to send the message.

It's like this: Let's suppose there are 12,000 eligible voters in an area. However, only 10,000 vote. 6,000 vote for Candidate A and 4,000 vote for Candidate B. The breakdown is 60% for A and 40% for B. This is what is reported in the media.

Now, if you want to send a message, do what they do in Nevada - write in "None of these candidates". What does this show? Well, let's look at the above scenario. Let's say that all 12,000 eligible voters cast ballots - 6,000 for A, 4,000 for B, and 2,000 for "None of these candidates". What will the media report? 50% for A, 33.3% for B, and 16.7% for "None of these candidates".

So, what does this show? It shows that you cared enough to take the time to state your opinion and make your message known that you don't like the system. If you don't vote, you don't count. If you go and vote for "None of the above", however, your vote counts against all other candidates.

It is interesting to [note](#) that over 5,000 people voted for "None of these candidates" in Nevada in 1996, which accounted for around 1.2% of the people. "None" received more votes than Nader or Browne. While it doesn't seem like that much, I find it fascinating that 5,000 people had the heart to get up and vote against all of the other candidates.

Now, don't get me wrong - I am not advocating that everyone go and vote for "None of the above". However, if you really feel that strongly, you should make the effort to vote for "none of the above" rather than not voting at all. Did you know that in 1996, [less than 50% of all eligible voters](#) in the US turned out to vote? Of 196.5 million people, only 96.5 million people actually came to make their voice known. Imagine if only a quarter of those people who didn't vote had voted for "None of these candidates" - they would have received 25 million votes. The breakdown would have been: Clinton 42.3%, Dole 35%, and "None" 22.5%. Now THAT would have been a message!

A lot of the people (mostly those in fringe groups or militias, but also Al Gore) have said they wish there was a "second American revolution". Fortunately for them, there will be a second American revolution - every election day. Every election day, the people get to decide their form of government. Your vote is your role in the second American revolution. Be a patriot and fulfill your role in the revolution - vote and make your voice heard!

[2002 Note](#): I actually published this one, because it was not directed at a specific candidate, but rather at voter apathy. I still like this one, and believe it is even more valid after the events of the 2000 election fiasco - every vote truly does count, as we saw.

11/7 - Today's soapbox is about the Electoral College. I have something to admit - just yesterday, I was all for abolishing the Electoral College. Then, I read an article that has changed my mind. I think that the Electoral College is a good thing - but I think it does need some overhauling.

Right now, the Electoral College picks the President. The popular vote in each state determines the make-up of the Electoral College, and in all states except Maine and Nebraska, whoever wins the popular vote in the state wins all of the electors from that state. So, here is the problem.

Conceivably, a candidate can win the Presidency without winning a majority of the states or the popular vote. How? Well, if a candidate wins 51% of the popular vote, he or she receives 100% of the electoral vote. So, looking at this, it is conceivable that a candidate could win 51% of 11 states' popular vote and secure enough electoral votes to become President. Here is the math:

CA, NY, TX, FL, PA, IL, OH, MI, NJ, NC, and VA have 270 electoral college votes, which is exactly enough electoral college votes needed to win. If we look at what it would take to win a popular vote (based on 1996 election numbers), 57 million voters of the 196.5 million eligible voters could decide the next President. This number is only 29% of the national total. Yet, less than half of all eligible voters actually voted in the 1996 election; thus, in 1996, a President could have been decided by 27 million voters living in those states, which is only 28% of all US voters. When you look at the actual number of voters who could have decided the outcome (27 million) versus the total number of eligible voters (196 million), you find that theoretically, 13.8% of the total eligible voters could have decided the President!

I was firmly against the Electoral College until I read an article at <http://www.fec.gov/pdf/eleccoll.pdf> about the history of the Electoral College. I realized after reading this article that there are some good sides to the Electoral College. You may read it for yourself, but I found the most important thing is that it keeps the two party system in check and stabilizes the country.

The fact that we have endured whereas many other European democracies have problems is that we have a two party system. In our case, all coalition governments are decided before elections. In Europe, countries like Italy have to deal with multiple parties, such as the socialists and communists, in their government. In our country, any regional or special interest agenda must align itself with one of the two major parties or else they cannot survive.

It is noted that the electoral college presents minorities and special interests with a greater pull than they would normally have. After all, you only have to win 51% of the popular vote, so if a minority group or special interest has only 30% of a popular vote, they will not win; however, if they can align themselves with a group that can pull 21% of the vote, they can win that vote. As I said, it is minority groups and special interests that benefit from the electoral college.

What is interesting to note is that the candidates usually go along with who gives them more money, so who is more likely to benefit from the electoral college - the NAACP or the NRA?

However, I still feel that the problem of the Electoral College is that if you win the majority of the popular vote in a state, you will automatically win all of the electoral votes of that state. I think that a way to reform the Electoral College is to follow the model that Nebraska has.

In Nebraska, whoever wins the popular vote in the state wins two electoral votes. Whoever wins the popular vote in a Congressional district wins that electoral vote. Think about it - the rural parts of upstate New York will never have a say in the Presidential race otherwise; the city can influence the popular vote for the entire state. Thus, a candidate that wants to appeal to New York voters needs only to address the needs of the citizens of Manhattan. All other citizens don't really count, because as long as the citizens of the city make up over half of the voting population, they're the only ones that count in the Presidential race.

I used to think the electoral college was completely wrong and an archaic idea; now, I think it is a good idea that still needs some improvement. Once again, I am pleased to see that despite its shortcomings, our form of government is the best form of government on earth!

[2002 Note](#): This was one of my first in-depth research articles. What do you think?

11/12 - I have a few thoughts for each of the candidates about this supposed election:

For Mr. Bush - You ran on the platform that you want to restore integrity to the White House. You should have lost in Palm Beach, because you have heard from the huge amount of people who voted for Gore, only to have their votes not count. Also, look at the [stats for Buchanan](#) and tell me that you don't think something was screwed up on the ballot. You said you would listen to the will of the people, and the fact that the popular vote was for Gore and the fact that an overwhelming number of people in Palm Beach are complaining that they were robbed of the opportunity to speak their voice in democracy shows me that the will of the people might be for Gore. You have an opportunity here to step aside, say you will practice what you preach, and admit you lost the election, and say that the ideals of democracy and the will of the people are more important than partisan politics. Then, you can return to being governor (you still have a job there) and garner even more support for a 2004 bid - especially since you can say that you put aside partisan politics, listened to the will of the people, and put aside your personal ambitions to save the nation.

For Mr. Gore - You should have been a shoe-in - a slam dunk - just like Bush was in 88. George Bush (senior) rode in on Reagan's coattails, and the Presidency was guaranteed. Why was it so hard for you? Because you had to deal with the spectre of "what the definition of 'is' is". Yes, it was the stupid crap like that which makes the American people pissed off. So, you lost the election. What did you do? Well, you demanded a recount. Then, you demanded a hand count. It's like the guy who challenges you to a 2 out of 3 basketball game, only to lose twice, so he then says "best 3 out of 5" followed by "best 4 out of 7". You lost. The more you try all the political and legal maneuvering, the more you just make everyone upset, and you will lose the public support you now enjoy. What should you do? Step aside, admit that you lost the election, and then publicly challenge the President-elect to keep the prosperity going for the next four years. This is where you are in an ideal situation - any time the new President does something good, you could say that you would have done the same thing; then, whenever he screws something up, you can say that if you were President, you would have done it differently. No one will forget that with just a couple of votes, things would be different, and for the next four years, everyone will wonder what could have been. You can be the thorn in the President's side throughout his administration, and keep reminding people that you followed the law in this election and you will return prosperity in 2004. Nixon lost before he eventually became President, and so this isn't the end for you. If you play your cards right, you could be like Obi-wan in *Star Wars* (which I know you've seen - you have to be a geek, because you invented the Internet) - if they vote you down, you will only become more powerful than anyone can imagine.

Now, back to the rest of the soapbox. I mentioned the "voteauction.com" controversy and the "nadertrader.com" controversy, and now, I have another controversial [website](#) for this election. This website calls for huge democracy demonstrations, just like we saw a few months ago in Serbia. I don't think this is the answer - I think the best thing to do is remain calm and be happy with whoever wins. I think we should just get a ruling from the Supreme Court, since that is eventually where this thing is going to end up. You know, neither Bush nor Gore has won, and I am already looking forward to 2004 when we can pick a new President. No one has taken office for the 2000-2004 administration yet, and I am already sick of both of them.

2002 Note: I am still sick of the 2000 election. Another one that you are seeing for the first time. How I wish I really could have told the candidates this message. I'm happy knowing that in 2004, I will be able to.

The Best of Mike's Soapbox for 2000

This is my collection of the best rants, generally decided by the feedback I receive from visitors.

However, during the year 2000, when the election and Elian made for easy targets of the rants, my career necessitated that I not publish many of my true thoughts. So, instead of ranting about politics and such, my soapbox mostly became the home of me "Weird People I've Met" segment. I had to rant about my thoughts, because I knew one day I would be free to publish my real thoughts some day. So, now the story can be told. While you were reading all the stories of my weird roommates, this is what I really wanted to be saying.

For you fans of the Weird People stories, I have published a few of those for you. Enjoy!

3/18 - I just saw a commercial for Scooby Doo for President (I am not kidding - it was on The Cartoon Network). Based on the candidates, I just have to say - he's got my vote!

2002 Note: And if 2004 is anything like 2000, I'll vote for him again.

3/25 - Does anyone remember the good old days when we used to have new TV shows all the time? Now it seems that we only have new shows during sweeps months (November, February, and May). I am tired of seeing threeppeats of shows. I just saw a *Frasier* on repeat the other night on network TV, and the same show was in syndication later that night!

In this week's **Weird People I've Met**, I will tell you about another of my favorite weird people. This was my second roommate named Andy, whom I will refer to as Andy2. I have many stories about Andy2, but this week's story is about his Playboy magazines. He used to subscribe to Playboy, but he would never let us look at them, because he was afraid that the oils in our skin might mess up the glossy print. He kept them in pristine condition on top of his desk, and we could see the covers, but never the forbidden fruit inside. Then, one day, Doug and I were drunk, and we decided to raid Andy2's stash of Playboys. We were flipping through them with our drunken oily hands, when all of a sudden a bunch of pubes fell out of the centerfold. Doug threw the magazine across the room, and we took some sticks and carefully scooped it up and put it on the desk. All I know is that we never had a desire to see any of Andy2's magazines again!

2002 Note: I used to have a segment on "Weird People I've Met". Two of my all-time favorites were my roommates who were both named Andy...

4/6 - **Weird People I've Met** - This week, it's Dick Drunk - my roommate who puked in our heater. He was at a party and got drunk and when he started to feel sick, he felt cold chills. So, he got up and stood over the heater, which made him puke - which he did, right into the heater. After that, we never ran the heater without opening the window. Once, someone closed the window, and the room smelled like puke within 5 minutes (this was six months after Dick *supposedly* cleaned it up); and then, it was about 24 hours before the smell returned to normal (or as close to normal as possible - I'll talk about the "Old Spice" story later)...

2002 Note: My "Weird People I've Met" segment on Dick and the heater. Pretty funny, but then you didn't have to smell it...

4/8 - Have you seen the network news recently? It's all Elian all the time! Send

the kid home already. It makes me long for the days when all that was discussed on the news was OJ hacking people to death and the President's sex life. I hope celebrity does something stupid soon, so we can get back to some different sensationalistic story!

[2002 Note: Who can forget Elian?](#)

4/13 - Did anyone see the footage this morning of Elian? Was it just me, or he did resemble Castro with all that finger pointing and a very impassioned speech. Maybe he will be right at home in Cuba after all...

BTW, did anyone catch George W. Bush pronouncing Elian as "alien"? It then occurred to me that technically, Elian is an alien! We could have him star in his own TV show called "Elian the Alien". After that video this morning, we all can see that he is good at memorizing his lines, so maybe he can have his own TV show.

Also, speaking of Bush, I don't know who I am going to vote for. Al Gore is about as charismatic as my Physics 101 professor who only spoke to the chalkboard, and I am still bitter about the efforts of Tipper to ban so called "obscene" rock lyrics. However, George Bush comes off like a member of Animal House (and based on his answers to "Who's Who in Foreign Affairs", probably like the guy who had a 0.0 GPA). Bush always reminds me of the guy in the bar who says, "You know how you solve unemployment? Create more jobs!" and then has another beer; really - look at some of Bush's stands on issues and they are like, "Duh, but how do you really plan to do that?"

So, I don't know who I am voting for. Maybe I'll vote for that guy Charles R. Doty who was on *The Daily Show* last night. At least he is for kissing on a first date. And, he could probably use my vote.

[2002 Note: More Elian... Little did we know that Gary Condit would relieve us from this - albeit a year late...](#)

4/16 - I am supporting the *Star Trek Excelsior* campaign.

I heard a rumor (but a pretty reliable one) that the next *Star Trek* series will be a prequel to the *Original Series* focusing on the creation of the Star Fleet and Federation. However, the evil villain who will be messing things up is a time traveler from the 29th century. Hmmm, sounds sucky to me. Now, I am not saying that the Excelsior is the best plot in the world either, but it has to be better than this time travel early days thing. The writers of Trek should take a

good look at *Farscape* and see how good *Star Trek* could be...

2002 Note: The rumor was correct. *Enterprise* came to be. And it sucks...

8/5 - Did anyone watch the convention? I sure didn't. I wanted to see who got kicked out of the house on *Big Brother*. But I did watch the recaps (on *the Daily Show*).

Is it just me, or does George W. come across like a drunken hick? He always, uh, slumbles, uh, stumbles, uh, **stumbles**, over his words. Then, uh, he mispronounces words, like "nucular" instead of "nuclear". And, uh, he, uh, seems forgetful sometimes. Where was I going with this...

But, in his defense, I would much rather listen to Bush than Gore. Gore the Bore. I hope he abandons Clinton's traditional three-hour State of the Union addresses. I am concerned that if he speaks for that long at one time, he might put the entire nation to sleep.

I just wish Perot was still in the race. You could always count on him to come up with something so off the wall, that the debates were always worth watching. He would spout indecipherable crap like, "Hey, you know this economy is like a fish - if you put a little peanut butter in the chicken feed, you can create jobs for Americans", which caused everyone to wonder - who would actually vote for this guy? Maybe we should start a campaign to get Perot to join the debates, even if he isn't running for President. At least it would be entertaining...

2002 Note: This is one of the "missing" rants that I wrote but couldn't publish until now. I can't wait until 2004.

8/9 - I just saw an interview with Gore and Lieberman on *Good Morning America*. Gore did all the talking, while Lieberman sat there next to him and smiled. I figured out who these guys remind me of: Penn and Teller! Next time you see them together, think about it. Also, did anyone read Al Franken's book *Why Not Me?* Ironically, in the book he speculates who he would pick as VP, and it was Lieberman. I kept trying to figure out why I heard this guy's name before, and then it hit me. Maybe Al Franken was on to something...

2002 Note: Can you smell the sarcasm? Now you can...

8/10 - Weird People I've Met: Andy2

This is one of my all-time favorite weird people: Andy2. One peculiar thing about Andy2 was that he liked to argue, and he always believed that you were always trying to mess with his head. Yes, of course, we messed with his head, but it is hard to describe, so I'll just share one particular incident with you.

We were watching "Hunt for Red October" on video, and Andy2 turns to me and asks, "Dude, what kind of sub is that?" referring to the Red October. It's actually a Typhoon class submarine, and I believe that is mentioned in the film a couple of times. However, I didn't feel like getting into a discussion with Andy2 (I wanted to watch the movie), so I told him I didn't know.

He tells me, "You must know; they teach you that stuff in ROTC." Just wanting him to shut up, I replied "It's a Typhoon class sub."

He sits there for a second, and then says, "Are you sure? I think it's a Kilo class."

Not wanting to argue or talk any further, I just agree with him. "Yep, I think maybe you might be right. But, it doesn't really matter. Watch the show."

He sits there again for another few seconds, and then says, "No, maybe you're right; it might be a Typhoon."

I gave him a stern look; I wanted to watch the movie, and I didn't care. "It doesn't really matter; watch the show." Who cares what kind of sub it is, it doesn't matter.

Andy then quietly says, "Dude, get your Soviet Military Power book and look it up." I had a book which listed all of the Soviet military hardware, including submarines (for all you young ones out there, "Soviet" is what we used to call Russians).

I replied that I didn't care, I wanted to watch the movie. He kept pressing, though, so I knew I wouldn't get a chance to finish the movie without getting him the damn book. So, I pause the movie, get my book, toss it at him, and continue watching the movie.

"Dude, you were right," he then says, "it is a Typhoon sub. Wow, look at this sub it's cool." He then started reading off all of the stats about the sub. Needless to say, I didn't enjoy watching the movie very much.

So, do you see what I am saying? You see how annoying he could be? He was like that all the time...

2002 Note: More Andy2... He really was a crappy roommate.

8/12 - I am disappointed that no one responded to my campaign to convince Adele to let me see *Road Trip*. So, I need to know - was it because the movie was bad? Was it because you do not like me? Was it because you didn't want to upset Adele? I had the campaign up for eight weeks, and in that time, none of the 325 visitors to the web page sent Adele a message to convince her I needed to see the movie. She says, "See - even the people who visit your web page know it sucks!" So, needless to say, I couldn't even say in my defense, "But, so-and-so said I needed to see it - they said it was the best movie ever!" Nope, nothing like that.

Oh, well. I did make her sit through *Deuce Bigalow: Male Gigolo*, though.

I have a couple more rants about drivers. First, I was in a hurry the other day, and the woman in front of me was driving her four wheel drive Isuzu Rodeo (which had 4WD on it), and she came to a complete stop at every single speed bump in the parking lot. Here I am blowing over them in my Grand Prix at 5 to 10 mph, and she comes up to one, stops, slowly goes over it with the front axle, stops, and slowly goes over it with the back axle. Needless to say, I was going nuts as she is afraid to go over speedbumps with her four wheel drive, and it is taking me a half-hour to get through the parking lot. Hey, lady, I am just taking a guess here, but I would suppose that it would be safe if I said that you had never been off road, and probably, never even put your vehicle in four wheel drive. Maybe you should get a minivan - you might find it easier to drive and safer on the environment!

However, there was a problem with minivans, as well. I was behind a guy with one of these economy minivans, like the itty bitty Nissan and Mazda minivans, who was going so slow on the highway (like 45 mph in rush hour). The problem was, it was packed full of people, and the little three cylinder engine or whatever piece of crap motor it has couldn't pull all that weight. Dude, just because it has places to seat six people, that doesn't mean that the motor can carry six people. If you absolutely must, may I recommend a place other than the fast lane on the interstate during rush hour?

2002 Note: I was trying to get people to e-mail and convince Adele to let me see *Road Trip*. Didn't work... Had to rant against all you who let me down. Although I did eventually see *Road Trip*, so maybe I should be thanking you now...

8/19 - Four more years! Four more years! Four more years!

No, I wasn't chanting for four more years of Gore - I was celebrating the fact that we don't have to see this boring convention crap for FOUR MORE YEARS!

Four more years! Four more years! Four more years!

By the way, due to the recent decision by a US court to decline to protect source code with the Constitutional right of free speech, I am offering you this bit of source code which may not be protected by free speech, so I hope I don't get sued (see http://www.eff.org/Cases/MPAA_DVD_cases/)!

Warning!

The following source code is NOT protected by free speech!

```
10 PRINT "HELLO WORLD - RIAA and MPAA SUCK!"  
20 GOTO 10
```

Download or link to this source at your own risk!

2002 Note: I hate political conventions as much as I hate infringements on free speech. When the court ruled that source code is not protected by free speech, I had to make my protest. The really scary part? They ruled that you can't even link to it. Like I said, download or link at your own risk...

10/7 - I have a lot to cover, so let's get to it!

What is up with the people in the Middle East? Why is everyone fighting over this piece of land? Matt Biers-Ariel of NPR has some [thoughts](#) about it. I have to say I agree with him. They are all descended from the same place, and the area that they are fighting over is nothing to write home about. I mean, if it was a beautiful area like Seattle that would be one thing, but the area over which they are fighting is more like Laughlin, Nevada. Maybe they should all move over to Nevada. It's big and unpopulated, so there is plenty of room for everyone and no need to fight.

I watched *Star Trek Voyager* this week. What happened to Star Trek? The Borg have been reduced to wusses. Remember *Star Trek the Next Generation* when one Borg cube destroyed about half of Starfleet at Wolf 359? I do, because I am a big geek. Now, one small ship like Voyager is whooping butt all over the place on the Borg. The writing is terrible. They hit a quantum gate and shoot ten years closer to home. They get shot ten years closer by Kes. They rig a quantum slipstream drive and get another ten years closer. But, then a week later, the crewman they left behind three years ago manages to catch up with

them, even though the crewman didn't chance upon the same sequence of events that Voyager did. And never mind that they are well past Borg space, they seem to be able to meet up with the Borg whenever they want (or whenever ratings dictate). I remember when the producers said that even though Voyager is in the Delta Quadrant (where the Borg live), they would not be meeting the Borg. How I wish they held true to their philosophy...

Is everyone watching the debates? I'm not. I was watching *Dark Angel*. I figured I would just catch the highlights on CNN. Unfortunately, there weren't any. They need to change the format of these. They should have something like on *Jeopardy* where they buzz in. If they give an incorrect answer, the other guy gets a chance to get the points. Then, the audience could decide if they liked the answer or not. Also, they would be limited to like five words apiece, like the Webby Awards. Imagine it:

Moderator: This next question is for 400 points. What will you do to improve education? It looks like Mr. Gore rang in first. Mr Gore, go ahead.

Gore: Thanks, Jim. I want to tell - (buzzzz)

Moderator: Oh, sorry Mr. Gore, you went over the five word limit. Audience, you can only consider the first five words, which are "Thanks Jim I want to". Audience, what do you think?

The audience boos.

Moderator: Sorry, Mr. Gore, the audience doesn't like that answer. Mr. Bush, you have a chance to steal.

Bush: Better edumacation promotes higher learnin'.

Moderator: Audience?

The audience boos again.

Moderator: It looks like neither one of you wins any points there. Sorry, this round is over. The score is zero to zero. It looks like neither of you will be making it to the next round. Tell them what they won!

Announcer: For being a contestant on the Presidential Debate, you each will take home a year's supply of Rice-a-Roni, the San Francisco treat! Be sure to join us next time for another Presidential Debate between our two new contestants Bruce Vilanch and Charo!

2002 Note: This was my attempt at election humor. It can now be told.

10/31 - Some miscellaneous thoughts I picked up from different sources:

"People are just squeaking by while their employers are zillionaires! At least if the government rips you off then they use the money to build roads and schools and airports and jails and all, they build the whole damn infrastructure! ... Yes ... because government is the people! The [business] owners just take the money and build castles in Barbados."

- Kim Stanley Robinson from his novel *Antarctica* on how tax cuts may not necessarily be good for everyone

"I don't think they [either candidate] know whether a missile defense shield would really keep us safe from incoming North Korean Taepodong missiles, especially if terrorists in a rubber boat can cripple a United States Navy warship and inflict such devastating casualties."

- Christopher Buckley, "Know Problem: Still Undecided? Don't Worry, So Are the Candidates", *TV Guide* (Nov 4-10), on why both candidates might seem to misjudge the real threats to our nation's defense

Happy Halloween! A week from now, Gore or Bush will be your new President. How is that for some scary thoughts!

2002 Note: This is one that had to do with the election, but didn't have to do with the election. I pulled it from publication anyway. But now, it can be told.

11/1 - You have heard me talk about "**voteauction**.com". Now, there is another example of how the Internet age will affect voting. It is this site for "[Nader Traders](#)". The premise is that you want to vote for Nader but you don't want to hurt Gore - you go here and agree to vote for Gore in a contested state, and some Gore supporter in a state that Gore has locked up will cast a vote for Nader. This way, Nader gets enough votes to qualify for Federal campaign funds and Gore gets enough votes to win the election. Note: I don't endorse this site, but I am putting it here to show all sides.

Why don't I think this is a good idea? Well, it's your vote, and you should cast it for who you want. If you sell it for some scam, you are no better than politicians who sell their votes to special interests. Let me put it to you with an example from my own past: I was in school, and there was a special program that only one person could attend. I wanted to go, and so did a friend of mine. The catch was that you had to be nominated by your peers (you couldn't nominate yourself). Well, my friend and I hatched a plan - I would nominate him, and he would nominate me. Then, our classmates would pick the winner. However, it didn't work that way - I nominated him, and he didn't nominate

me. No one else was nominated, so he was picked by default. Needless to say, we were no longer friends after that. But, I learned a valuable lesson - I don't trust the "you do this and I'll do that" scheme.

Finally, one last thing to remember on the note of Nader is this: if you want to vote for Nader, cast your vote for Nader. Cast your vote for the candidate that you most want for President. ***The only wasted vote is the one not cast!***

One other issue that has me irked is the fact that the Congress recessed for the election without passing the budget. You know, there is all sort of talk about the lack of values in today's society - and most of those come from politicians! What kind of values are they sending with today's message? Well, let me tell you the lessons I learned from our Congressional leaders. First, it's okay to go past the October 1 deadline - in fact, it's okay to miss it by over a month! Second, it's okay to put off your work when your own butt is on the line - even to ask to be kept in a job that you haven't completely finished! Third, it's okay to be consistently late - you aren't accountable to anyone! I mean seriously - how come I seem to be the only one hollering that these guys can't pass a budget every year. Why don't they get started now on next year's budget, so that they don't miss their deadline (that's what I tell my workers when they miss their first deadline - I'd fire them when they miss their second deadline, but fortunately - they get the message the first time). I guess they feel that they can do this and still get re-elected with no problem. If this keeps up, they'll pass the 2002 budget in 2003!

[2002 Note](#): Another one that I decided not to publish until now. If you saw my [Mother of All Soapboxes](#), you know that the budget is something I still feel very strongly about.

11/2 - Today's soapbox is on Social Security. This has become a hot topic this election year. I want to share with you my feelings on the matter.

First, we have known for some time, at least 10 years, that social security was going to become an issue. With people living longer, as well as the fact that more people will now be taking out than were putting in, social security was on its way to being bankrupt. Something had to be done, and all of the Presidential candidates in the 1990s all pledged to do something to overhaul social security. So far, though, nothing has really been done.

So, what to do. One candidate has suggested allowing people to determine how to best invest their social security contributions in the stock market. However, this needs a little more attention. First, social security was set up during the Depression (after the stock market crash) to provide some sort of income for elderly people, who at that time had no income on which to live. A lot people

had their long-term retirement investments disappear when the stock market crashed and there was a run on banks. Social security was to provide a long-term income in case a severe crash crippled the economy again. By placing social security in the stock market is to subject it to the same risks as every other investment plan!

The second thing wrong with this plan is that it is based on letting people invest their money in the way that they think is best. However, if people invested their money in the ways that they thought best, there would be no debt and thus, no need for social security! But, not all people invest their money wisely or safely. I certainly don't want my "economic safety net" (because that's what social security is) to be directly tied to the success of "heyidiot.com"!

Thirdly, my parents will be drawing their social security off of my contributions. This is the way it works. You don't put your money in now and let it add up. No, the retirees today are drawing their money from the contributions made in my income. When it comes time for me to draw income, it will be from the contributions made at that time by my kids and grandkids.

But, we must be fair and look at the other candidate's plan. Well, he has acknowledged it is a problem, but he hasn't figured out a good solution to it. He favors using some of the budget surplus to help it, but he hasn't given specifics as to how much will go to this versus how much will go to building a missile shield to how much will go to future social programs.

As for my solution - well, the only one I have heard that was about as good as these was a suggestion by a friend of mine for a fund raiser for one of our organizations:

We had a budget of \$2,000, and we were shooting to double our money. We had several ideas, all of which would require significant money for the startup costs (like \$1,200 to \$1,500). It's like before you could do car washes, you gotta buy hoses and buckets and towels and soap or before you do a bake sale you gotta buy flour and eggs and milk. The potential downside is that you buy \$1,500 worth of stuff, you bring in \$500 and now your budget is \$1,000.

My friend was on his way to go to Las Vegas and he said, "Give me the \$2,000 and I'll double your money. It won't cost you a thing, as I am going to Vegas already, so you'll just have to give me the money and I'll invest it for you. Of course there is the chance I'll lose, but there is also the chance I'll win." We thought about it, and as we discussed strategy, someone said that the best strategy was to simply go to a blackjack table, plop the \$2,000 down and in one hand we would either double our money or lose it all; either way, it would be over.

In the end, we decided to have a car wash, bake sale, and T-shirt sale. At the

end, we shelled out \$1,200 for hoses, ingredients, and t-shirts, and we brought in \$1,200. At the end of our fund-raiser, we broke even. If you factor the time we spent into the equation, we probably lost money.

The moral of this story is: you have two options here - you can vote to risk the money and either win big or lose big or you can vote to choose to keep things the way they are and risk nothing changing.

2002 Note: My "issue" rant on Social Security. I was going to publish this one, because I did not mention either candidate by name, but we were warned at work about just staying away from the election, so I just left this until now. I knew that one day I would be allowed to publish these. Better late than never.

11/3 - Today's soapbox is about education. We know that there are problems with education, but we don't know what is the best way to solve them.

One issue is the program of school vouchers, where parents can get vouchers from the government to send their kids to private school. However, I don't think this is the best solution. In fact, it avoids the problem. If a school isn't teaching its students well, then the school needs to be fixed. Sending kids to other schools won't fix the problem. There needs to be more money put into education, and if we allow a system of vouchers, the money won't be put into fixing the problem schools - it will only make the good schools better.

Another issue is the role of the Federal government in education. Some favor a strong program of standards that schools must meet. Others favor a standardized test that all students across the country would take. Still others favor a pay scale for teachers that directly correlates their pay to the performance of their students. I don't know if any of these will work, but I know that there are other major issues that need to be worked out at the school board level, and no amount of Federal government will change that. For example, in my high school, we had a \$1.5 million sprinkler system for our practice football field; meanwhile, in my chemistry class, we were doing experiments with chemicals that were so old that my 12 molar sulfuric acid had a pH factor of about 6.7, making it only slightly more acidic than water. My school had its priorities, and unfortunately, athletics rated a lot higher than academics. Nebraska is a long way from DC, and there isn't much the Federal government will be able to do to change that mindset.

Another issue similarly related to this is that of affirmative action. I used to agree with the people who want to get rid of affirmative action. I would hear the argument of "wouldn't you rather be hired based on your performance rather than your race?" I would buy into that, and I would agree that if I was a minority, I would want someone to want to hire me because I was a good

worker rather than the fact that I was a minority. However, once I was out in the real world and dealt with real people, I realize that there is flaw in this argument.

The problem with this argument is that you assume it is a perfect world. Ideally everyone would have a fair opportunity to compete for all jobs. However, many minorities are not considered for jobs, because they don't have the opportunity to receive the education that would qualify them for those jobs. I have worked with minorities who received educational opportunities from affirmative action that they otherwise would not have received. I found that some of the finest engineers I have worked with were minority engineers who would not have been successful without affirmative action. Yet, this isn't the biggest impact that has changed my mindset.

I had a young "at-risk" minority youth who worked for me. He told me he was afraid that he would end up in a gang like the rest of his peers. I told him that he was in control of his destiny, and that if he didn't want to end up in a gang, he wouldn't. He told me it wasn't that easy. I took him to meet other minority engineers and professionals to show him that there were opportunities open to him. I wanted him to see that there were mentors and role models to follow. This is why affirmative action is important. Yes, there is no reason why a certain minority can't be a certain profession, but if there are none currently in that job, it is a lot more difficult to aspire to that profession.

Which brings me back to what I think is the biggest single problem with education today. I think this is what we need to fix in America: Kids need to be told that their opportunities are not limited by who they are, but rather only by what they want to be. Or in other words, you are not limited by your gender, ethnicity, national origin, handicap, sexual preference, or eye color, but rather by how hard you are willing to work to achieve your goal. It should be the Department of Education, not the Army, that has the slogan "Be All That You Can Be"!

2002 Note: This was my "education" issue rant, which you are seeing for the first time. I still feel strongly about this one as well.

11/4 - Today's issue is about the Internet and the freedom of expression. This is the issue that is most important to me, for without the freedom that we enjoy on the Internet and the guarantees provided to us in the First Amendment, I would not be able to have this soapbox and you wouldn't be able to read this. Do not underestimate the power that you and I hold in our hands. Yes, this is a stupid little page with minimal graphics, yet I am free to put anything in here. Just think, in some countries, what I am about to put here is illegal:

Free Tibet! Overthrow Castro! Revolt against Saddam Hussein! Free Leonard Peltier! Vote your conscience! Prince Charles is a twit!

Yes, this is a powerful right we have, and we must do all we can to protect it. The technology of the Internet now allows us to communicate almost instantaneously with any part of the world. With this new form of communication comes challenges to the freedom of speech. After all - is this speech? I am not actually speaking any of these words. Yet, we must ensure that we do not lose any of our freedoms in this new media.

So, I will now put up two actual quotes from each candidate about the Internet, and I am putting up these quotes to show equal time to both candidates. Also, I want to show that neither side really understands the Internet.

"During my service in the United States Congress, I took the initiative in creating the Internet."

-Al Gore, CNN's Late Edition with Wolf Blitzer, March 9, 1999, even though the Internet began in 1969 as ARPANet - before Gore began service with the U.S. Congress

"Ideally, it should be tax-free. But in the real world, we cannot ignore the fact that our democracy thrives in a federal system in which state and local governments derive one-third of their revenue from sales taxes."

-Al Gore in an interview with Business Week, December 20, 1999, in which he didn't really say whether he was for or against an Internet sales tax.

"But Columbine spoke to a larger issue and it's really a matter of culture, it's a culture that somewhere along the line we've begun to disrespect life. Where a child can walk in and have their heart turn dark as a result of being on the Internet and decide to take somebody else's life."

-George W. Bush in the Presidential Debate at Wake Forest University on October 11, 2000, where he directly blames the Internet with corrupting youth and making them evil.

"There ought to be limits to freedom!"

-George W. Bush at a Press conference at the Texas State House, May 21, 1999, on the gwbush.com website and his frustrated attempts to shut it down. You can download an [MP3](#) of the speech.

2002 Note: This was my "Internet" issue rant, and you are seeing it now for the first time. It was actually during the writing of this rant that I came up with the idea of "Values Learned from Politicians". I still feel as strongly about these issues - especially free speech and the Internet.

11/5 - Have you noticed how neither candidate has commented on their feelings about the 3rd Amendment? What aren't they telling us? What don't they want us to know?

2002 Note: An attempt at humor, satirizing the media. Kind of dry, I know...

11/6 - Today's soapbox is on voter apathy. I had lunch with a guy who told me he doesn't vote, because he doesn't like the candidates, mostly because he doesn't like the two party system. He told me that by not voting, he is sending a message to Washington. I pointed out to him, however, that he is not sending a message, and I then showed him how to send the message.

It's like this: Let's suppose there are 12,000 eligible voters in an area. However, only 10,000 vote. 6,000 vote for Candidate A and 4,000 vote for Candidate B. The breakdown is 60% for A and 40% for B. This is what is reported in the media.

Now, if you want to send a message, do what they do in Nevada - write in "None of these candidates". What does this show? Well, let's look at the above scenario. Let's say that all 12,000 eligible voters cast ballots - 6,000 for A, 4,000 for B, and 2,000 for "None of these candidates". What will the media report? 50% for A, 33.3% for B, and 16.7% for "None of these candidates".

So, what does this show? It shows that you cared enough to take the time to state your opinion and make your message known that you don't like the system. If you don't vote, you don't count. If you go and vote for "None of the above", however, your vote counts against all other candidates.

It is interesting to [note](#) that over 5,000 people voted for "None of these candidates" in Nevada in 1996, which accounted for around 1.2% of the people. "None" received more votes than Nader or Browne. While it doesn't seem like that much, I find it fascinating that 5,000 people had the heart to get up and vote against all of the other candidates.

Now, don't get me wrong - I am not advocating that everyone go and vote for "None of the above". However, if you really feel that strongly, you should make the effort to vote for "none of the above" rather than not voting at all. Did you know that in 1996, [less than 50% of all eligible voters](#) in the US turned out to vote? Of 196.5 million people, only 96.5 million people actually came to make their voice known. Imagine if only a quarter of those people who didn't vote had voted for "None of these candidates" - they would have received 25 million votes. The breakdown would have been: Clinton 42.3%, Dole 35%, and "None" 22.5%. Now THAT would have been a message!

A lot of the people (mostly those in fringe groups or militias, but also Al Gore) have said they wish there was a "second American revolution". Fortunately for them, there will be a second American revolution - every election day. Every election day, the people get to decide their form of government. Your vote is your role in the second American revolution. Be a patriot and fulfill your role in the revolution - vote and make your voice heard!

2002 Note: I actually published this one, because it was not directed at a specific candidate, but rather at voter apathy. I still like this one, and believe it is even more valid after the events of the 2000 election fiasco - every vote truly does count, as we saw.

11/7 - Today's soapbox is about the Electoral College. I have something to admit - just yesterday, I was all for abolishing the Electoral College. Then, I read an article that has changed my mind. I think that the Electoral College is a good thing - but I think it does need some overhauling.

Right now, the Electoral College picks the President. The popular vote in each state determines the make-up of the Electoral College, and in all states except Maine and Nebraska, whoever wins the popular vote in the state wins all of the electors from that state. So, here is the problem.

Conceivably, a candidate can win the Presidency without winning a majority of the states or the popular vote. How? Well, if a candidate wins 51% of the popular vote, he or she receives 100% of the electoral vote. So, looking at this, it is conceivable that a candidate could win 51% of 11 states' popular vote and secure enough electoral votes to become President. Here is the math:

CA, NY, TX, FL, PA, IL, OH, MI, NJ, NC, and VA have 270 electoral college votes, which is exactly enough electoral college votes needed to win. If we look at what it would take to win a popular vote (based on 1996 election numbers), 57 million voters of the 196.5 million eligible voters could decide the next President. This number is only 29% of the national total. Yet, less than half of all eligible voters actually voted in the 1996 election; thus, in 1996, a President could have been decided by 27 million voters living in those states, which is only 28% of all US voters. When you look at the actual number of voters who could have decided the outcome (27 million) versus the total number of eligible voters (196 million), you find that theoretically, 13.8% of the total eligible voters could have decided the President!

I was firmly against the Electoral College until I read an article at <http://www.fec.gov/pdf/eleccoll.pdf> about the history of the Electoral College. I realized after reading this article that there are some good sides to the Electoral College. You may read it for yourself, but I found the most important thing is

that it keeps the two party system in check and stabilizes the country.

The fact that we have endured whereas many other European democracies have problems is that we have a two party system. In our case, all coalition governments are decided before elections. In Europe, countries like Italy have to deal with multiple parties, such as the socialists and communists, in their government. In our country, any regional or special interest agenda must align itself with one of the two major parties or else they cannot survive.

It is noted that the electoral college presents minorities and special interests with a greater pull than they would normally have. After all, you only have to win 51% of the popular vote, so if a minority group or special interest has only 30% of a popular vote, they will not win; however, if they can align themselves with a group that can pull 21% of the vote, they can win that vote. As I said, it is minority groups and special interests that benefit from the electoral college. What is interesting to note is that the candidates usually go along with who gives them more money, so who is more likely to benefit from the electoral college - the NAACP or the NRA?

However, I still feel that the problem of the Electoral College is that if you win the majority of the popular vote in a state, you will automatically win all of the electoral votes of that state. I think that a way to reform the Electoral College is to follow the model that Nebraska has.

In Nebraska, whoever wins the popular vote in the state wins two electoral votes. Whoever wins the popular vote in a Congressional district wins that electoral vote. Think about it - the rural parts of upstate New York will never have a say in the Presidential race otherwise; the city can influence the popular vote for the entire state. Thus, a candidate that wants to appeal to New York voters needs only to address the needs of the citizens of Manhattan. All other citizens don't really count, because as long as the citizens of the city make up over half of the voting population, they're the only ones that count in the Presidential race.

I used to think the electoral college was completely wrong and an archaic idea; now, I think it is a good idea that still needs some improvement. Once again, I am pleased to see that despite its shortcomings, our form of government is the best form of government on earth!

[2002 Note: This was one of my first in-depth research articles. What do you think?](#)

11/12 - I have a few thoughts for each of the candidates about this supposed election:

For Mr. Bush - You ran on the platform that you want to restore integrity to the White House. You should have lost in Palm Beach, because you have heard from the huge amount of people who voted for Gore, only to have their votes not count. Also, look at the [stats for Buchanan](#) and tell me that you don't think something was screwed up on the ballot. You said you would listen to the will of the people, and the fact that the popular vote was for Gore and the fact that an overwhelming number of people in Palm Beach are complaining that they were robbed of the opportunity to speak their voice in democracy shows me that the will of the people might be for Gore. You have an opportunity here to step aside, say you will practice what you preach, and admit you lost the election, and say that the ideals of democracy and the will of the people are more important than partisan politics. Then, you can return to being governor (you still have a job there) and garner even more support for a 2004 bid - especially since you can say that you put aside partisan politics, listened to the will of the people, and put aside your personal ambitions to save the nation.

For Mr. Gore - You should have been a shoe-in - a slam dunk - just like Bush was in 88. George Bush (senior) rode in on Reagan's coattails, and the Presidency was guaranteed. Why was it so hard for you? Because you had to deal with the spectre of "what the definition of 'is' is". Yes, it was the stupid crap like that which makes the American people pissed off. So, you lost the election. What did you do? Well, you demanded a recount. Then, you demanded a hand count. It's like the guy who challenges you to a 2 out of 3 basketball game, only to lose twice, so he then says "best 3 out of 5" followed by "best 4 out of 7". You lost. The more you try all the political and legal maneuvering, the more you just make everyone upset, and you will lose the public support you now enjoy. What should you do? Step aside, admit that you lost the election, and then publicly challenge the President-elect to keep the prosperity going for the next four years. This is where you are in an ideal situation - any time the new President does something good, you could say that you would have done the same thing; then, whenever he screws something up, you can say that if you were President, you would have done it differently. No one will forget that with just a couple of votes, things would be different, and for the next four years, everyone will wonder what could have been. You can be the thorn in the President's side throughout his administration, and keep reminding people that you followed the law in this election and you will return prosperity in 2004. Nixon lost before he eventually became President, and so this isn't the end for you. If you play your cards right, you could be like Obi-wan in *Star Wars* (which I know you've seen - you have to be a geek, because you invented the Internet) - if they vote you down, you will only become more powerful than anyone can imagine.

Now, back to the rest of the soapbox. I mentioned the "[voteauction.com](#)" controversy and the "[nadertrader.com](#)" controversy, and now, I have another controversial [website](#) for this election. This website calls for huge democracy demonstrations, just like we saw a few months ago in Serbia. I don't think this

is the answer - I think the best thing to do is remain calm and be happy with whoever wins. I think we should just get a ruling from the Supreme Court, since that is eventually where this thing is going to end up. You know, neither Bush nor Gore has won, and I am already looking forward to 2004 when we can pick a new President. No one has taken office for the 2000-2004 administration yet, and I am already sick of both of them.

2002 Note: I am still sick of the 2000 election. Another one that you are seeing for the first time. How I wish I really could have told the candidates this message. I'm happy knowing that in 2004, I will be able to.

Obsessive-compulsive. - 9/22/2000

Dear Neil,

Making paper white requires bleach and lots of it. Most dining halls are equipped with pure white napkins. Somewhere in the world, a town smells like sulfur, because you wiped your face with a thin sheet of paper instead of a cloth rag.

Traditionally, ideas written on cocktail napkins are hot ideas cooked up during a party that need to be written down before they grow cold. I like to doodle and scribble haiku during or after a meal. It is sort of a nervous habit. One time, I was inspired by a book to fill a jacket pocket with napkins full of ideas. Most of my napkins contained poems or stories. When the pocket grew full, I decided to burn the thoughts on the spring equinox. That morning, I arose early and walked out to a church parking lot. I set the napkins down on a sheet, pulled out some scissors and cut my hair. Then I tried to ignite that pile containing my body and thoughts. At first, the lighter wouldn't work. Then as I was about to give up it did. The ideas burned gloriously. All that was left behind was the sheet on which they had been set.

My mom had one big goal for this summer, an Omega Yard Sale, which would be the final yard sale of all time. So, for the duration of the summer, our house was filled with racks and racks of clothing. Whenever company is coming, my mom starts compulsively vacuuming. Now, it seems to me that when you walk into a house full of racks of clothing, you don't think, "Boy this place needs a good vacuuming." You think, "Wow, racks and racks of clothing." You see shopping and vacuuming are my mother's two obsessive-compulsive outlets. She buys clothes since it feels good to buy a bargain and she vacuums, I assume, because it is soothing. To my knowledge the yard sale still has not taken place.

I, on the other hand, managed to accomplish my goals for the summer. I wrote a bunch, emailed people, saw "Shanghai Noon", got a driver's license and much more. It would seem that when you set your goals to be your compulsions, it is easy to accomplish them.

Scenario:

You're walking down the street and a man says, "Hey, take my

sandwich, please."

You eye the sandwich for signs of disease, say OK, eat the sandwich, and keep walking down the street.

Half-hour later the man comes back and says, "OK, you owe me a favor. Give me a dollar."

Now, does the man have the right to make demands of you? You never asked for the sandwich. You just saw a free meal and took it. Why then do people suppose they owe their parents anything? Another example, today in a story about voteauction.com, some guy said it was a shame people sold their votes, since many people have died for the right to vote. Well, you know that's awful kind of them to die like that, and I'm mighty thankful but it isn't like I owe them for that. A gift can't have new strings attached to it after you get it. I'm sorry if I'm wasting all the cool stuff my parents and society gave me, but I couldn't help but to receive it, could I? So don't blame me if I follow my compulsions instead of someone's expectations. As Palahniuk said, "First your parents give you life; then they give you their's."

Last night, I went to a concert that was the final event of orientation. A band known as "Gran Torino" got on stage and played some fun pop-alt-ska. They have two drummers, a few kids on trumpet, and some nice synthesizers. So they got up there and encouraged everyone to get out of their seats and dance. The trouble was most of the people out of their seats weren't dancing either. So there I was jumping to beat in my brown wool blazer and blue jeans thinking, these kids don't know how to dance. Yet, dancing is the singularly most natural activity for adolescents. Dancing is, of course, the method by which a mate is attracted and seduced. It proves you can hear, move smoothly, and maintain a high energy output level for a while. What more does one need in a life partner?

Lately, I've taken to sleeping in public, on benches outside and whatnot. I'm not sure why I like the idea and the practice. A good nap right in the middle of everything just feels right. Maybe I'm just continuing my hobo training. Maybe it is some new compulsion emerging from my psyche.

I gave up on the concert and went out and looked for trouble. All I found was a pile of concrete sand. I proceeded to create a sand castle and sand village with sand walls and sand towers. It rained last night, so the sand was especially good for molding. That was about the third sand village complex

that I have made so far. The campus is apparently always under construction, so there are plenty of chances to make them. I wonder what the reaction of the construction workers is. Do they smile and laugh? Or do they shake their head and scowl? Let's hope they don't have some compulsion about keeping a tidy work site. It doesn't seem like a perfectionist could last too long in construction. The best part of a concrete sand pile is it looks like moon dust. After I get done I need to wash my hands and shake out my boots, but there is always a little bit left.

Today is the autumnal equinox. Fall started about thirty minutes ago. Which leaves me about 23½ hours to get a haircut. I'd better get busy!

Barot via metafilter.com) [One](#)

of the greatest discoveries in the history of
archaeology was made last summer, off Japan.
There, spread over an amazing 311 miles on the
ocean floor, are the well-preserved remains of an
ancient city. Or at the very least, a number of
closely related sites. Having heard a skepticalish comment from an acquaintance I went
in search of corroboration and it seems the 'respectable' world is not going to put it's cozy
reputation on the line cause all other news came form the same fabulating prone crowd
(through which this news item did spread thoroughly though) my regulareader will know already;

conspiracy, ufology, anomalists and catastrophists are quick to lend an ear here; anyway, I found a sort of overview of this colossal 'foremainision' at: www.science-frontiers.com/sf118/sf118p01.htm for all that's worth. <http://kurellian.tripod.com/lostcv3.html> No internal rooms or

The monument lies 750ft below the surface of Yonaguni Island 250 miles west of Okinawa

passageways have been found. So the structures may be monuments rather than buildings. ((a site with deep past and fa off future speculations)) <http://plaza14.mbn.or.jp/~taizan/foreigners.html> page for non-japanese) Kent goes on to speculate on purposeful destruction by means of earthquakes (yes the legend of Tesla still lives on big time amongst some of us USee!!) and links thisaway =>><http://www.sonic.net/~west/ewar/ewar.htm> (can teach dogs of war new tricks after all; so, does that mean we may hope?? The man is a musician and one can't help but love him for these sort of counsels: "Instead of hawking guns hand out fiddles and drums! Dance! Through Jerusalem, Palestine, The Pentagon, the barracks, Parliament, the Whitehouse lawn, the Vatican! DANCE! DANCE!" teamatlantis.com/schoch/yonaguni1.html largest piece of text I could find on it: My current working hypothesis is that the Yonaguni Monument is primarily of natural origin; that is, it's overall structure is the result of natural geological and geomorphological processes. I think it should be considered a primarily natural structure until more evidence is found to the contrary. However, by no means do I feel that this is an absolutely closed case. The question of its genesis - - artificial versus natural - - may not be an all or nothing question. We should also consider the possibility that the Yonaguni Monument is fundamentally a natural structure that was utilized, enhanced, and modified by humans in ancient times. The Yonaguni Monument may even have been a quarry from which blocks were cut, utilizing natural bedding, joint, and fracture planes of the rock, and thence removed for the purpose of constructing other structures which are long since gone. (this man dove down there hisself) Guess what the LATimes has on this front today: [Japan Amazed as Archeologist's Magic Exposed as Sleight of Hand](#) (not only assinine diction of course but they go on to make top(blood) sport out of the **prolonged elections** which, if you ask me, only emphasize (one more superfluous and injurious time) that not only is exactly half of the general populace unhappy (apathetic) but precisely each half of the rest is too (that tallies to three quarter total if you follow me). Seems like people are hellbent on proving (if only symbolically) that the mindsets are as deadlockingly equal as genders are too!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!) chaparraltree.com/honeyguide/

((science log with an emphasis on biology; see Dutch breeches flower)
A Japanese archaeologist has admitted faking a find of stone tools in
a 600,000-year old layer of earth. Further down I cite a
minarchist but the very next day I publish this I see the word
applied to multinational attitudes; I will not surrender a word so
appropriate to the niche needs of minorities that easily. FUCK,
when do we impartial definers ever win more than the right to
show what needs co-optation for a prolongation of paydirt and
the wages of sin????????????? x|||x|||x|||x

multiraciality as an anti-racism strategy. webcom.com/~intvoice/ Interracial
Voice is an independent, information-oriented, networking newsjournal, serving the
mixed-race/interracial community in cyberspace. This electronic publication
advocates universal recognition of mixed-race individuals as constituting a separate
"racial" entity. about.com contains
information, resources, support and community for people of mixed-race heritage,
biracial or multiracial individuals in the form of chat and live forums, articles and
other links. multiracial.com The Multiracial Activist (TMA) is a libertarian
oriented activist journal covering social and civil liberties issues of interest to
biracial/multiracial individuals, interracial couples/families and transracial
adoptees. pbs.org/wgbh/pages/frontline/shows/secret/portraits Bi-Racial
American Portraits, an online exhibition in conjunction with PBS Frontline special,
"Secret Daughter," illuminates the biracial experience in the post-Civil Rights era.
These guys list the ADL as well; well lemme add this from gush-shalom.org/ (43 sites
Supporting Middle East Peace, democracy and Tolerance) Still, after consulting with my fellow
activists I am in a position to make an offer. Should a complete week - seven (7) days - pass in
which not a single unarmed Palestinian is killed by the Israeli armed forces which are answerable
to Mr. Barak, we would remove the abovementioned cartoon from our website. As for the ADL -
an organization which claims to "counteract hatred, prejudice and bigotry" - can you truly find no
other places to search for such, with Israeli society in its present condition, except at our modest
website? x|||x|||x|||x **Talk about old patriarchal plots, plies and
scars (some more):** From <http://www.gush-shalom.org/jerusalem>: "The army
is systematically cutting down our olive trees, which we were just going to
harvest. Two hundred trees were already destroyed. Our land does not produce
enough food for our daily needs, we relied on what we could buy from outside.
Now, even if we succeed in slipping around the soldiers and getting to
neighboring village, it does not help because they are in the same position,
also besieged by the army. "The officer in the roadblock told me it was all

in punishment for our throwing stones. Last night our water was also cut off.

Me: Sorry folks but if this doesn't shatter your illusions about the lofty untouchable / scapegoat pacifist family oriented status of the originally Zionistically and then more and more orthodoxly oppressive state, I don't know what will. It seems to me the good old textashomelanders (Steiner) have certainly some catching up in mind when it comes to letting their armies do their worst as good as the best of the rest. She says she had no apprehension about going to a Palestinian town and staying there the night. "I know many people in Beit Sahur, and have friends there. The Palestinians are well able to distinguish between an Israeli who comes to them as a respectful friend and guest, and one which comes as an occupier, gun in hand. As a matter of fact, these days I feel more safe as an Israeli in Beit Sahur than as a peace activist in the streets of Jerusalem, facing the extreme right". I am going to keep on pointing to Walter Zander's economic work to you Middle Easterners till I get a satisfactory answer as to why yall choose to ignore his early work. Is it just because he did so himself? Spending time and effort on the attempt to make Jerusalem international without making allowances or at least explicit reference to the need for some sort of parallel currencies?? States within states can be given legitimacy as much as party populated parliaments need to be. Taking some cues from traffic and trade between city states thriving next to each other. If you haven't already seen Zander's work and that of associates I beg you to take a few moments and see: For more and similar challenges see some recent logs

<http://www.aimovement.org/LaDukeNader.html> From: MOMFEATHR@aol.com Reply-To: discussion@fpcn-global.org To: discussion@fpcn-global.org, IAWP-post-092262209@topica.com CC: news@fpcn-global.org, admin@irja.org Subject: [FPCN_News] VERNON BELLECOURT AMERICAN INDIAN MOVEMENT Date: Wed, 1 Nov 2000 11:17:12 EST AN OPEN LETTER TO WINONA LADUKE AND RALPH NADER Released: October 30, 2000 By: WaBun-Inini, aka, Vernon Bellecourt, White Earth Anishinabe Ojibwa Nation Telephone: 612-721-3914 Fax: 612-721-7826 Email: aimggc@worldnet.att.net Web Address: <http://www.aimovement.org>

Dear Winona, I write this letter to you as an elder, counselor, and citizen of the sovereign Ga-wa-ba-be-ka-neekag Anishinabe Ojibwa En-da-na-kee-wad (White Earth Peoples Ojibwa Nation) in northern Minnesota, which we both are member citizens first and foremost. Secondly, we are also citizens of these United States, a citizenship, which was imposed on the nations of Indian peoples arbitrarily and unilaterally with the passage of the 1924 Indian Citizenship Act by the United States Congress. The passage of the 1924 Indian Citizenship Act created for Indian people special rights and responsibilities, and a unique relationship with federal and state government in that we have dual citizenship. We are able to vote in both our Indian government elections, and run for office, as well are able to vote in federal and state government elections and run for office. As a fellow citizen of the White Earth Anishinabe Ojibwa Nation, and one of your many elders, I want to have a frank discussion with you as to the dangers that exist for our Indian people across America due to your involvement with the Green Party. Specifically, your campaign for Vice-President of the United States as running mate to Ralph Nader. First of all, I have always believed that the two-party system dominated by the Democrats and Republicans is one and the same beast with the head of an elephant on one end, and the head of a donkey on the other. The consequences of this reality is that this beast has a gluttonous appetite historically, and to the present, that continues to consume Indian lands, water, petroleum, timber, and other resources which makes the two-party system totally constipated for Indian people, and all others who are people without power or rights. Second, I have always been a strong advocate for the development of an alternative third political party. In 1983, I, along with Ned Anderson, who was then the President of the San Carlos Apache Nation were founding members of the Rainbow Coalition, which was

formed that year in Washington, D.C. Later both Mr. Anderson and I, as well as many other Indian people were present at the Washington D.C. Convention Center when Ned Anderson and I endorsed Jesse Jackson for the Presidency of the United States. President Ned Anderson coined the phrase, which became the call to action for the campaign, "Run Jesse, Run." This phrase was first popularized for the great Olympic star, Jesse Owens at the Berlin Olympics. I am convinced that had Jesse Jackson stayed the course, the Rainbow Coalition with Jesse Jackson as candidate for the Presidency would be a serious threat to the two-party system in this 2000 election. However, when Jesse Jackson took the Rainbow Coalition into the center of the Democratic Party many progressives including myself bolted from the coalition. In 1988, I supported Dr. Lenora Fulani who was on the ballot in all 50 states, and she had asked me to be her vice-president running mate. While I declined the offer, I worked nationwide for her candidacy as she was raising important issues affecting Indian people, as well as other Americans. I was strongly criticized by many of the progressives and liberals across the county for supporting her.

Winona, while I completely support the Nader/LaDuke 2000 Green Party Native American platform, which supports tribal sovereignty and government to government relations; the right and responsible exercise of retained treaty rights; return of public landholdings to Indian property owners, settlement of claims; restitution and reconciliation for loss of billions of dollars by Democrat and Republican administrations of Indian money trust accounts; the breaching of dams in order to save the salmon; clemency for Leonard Peltier; the protection of native intellectual and other property rights to name a few of the many issues facing Native people in your platform, unfortunately your message is not being heard. You should be on all media outlets, television, radio, print media, and all news and talk shows nationwide along with Ralph Nader. The fact is, we see more of the vice-presidential candidate of fringe candidate Pat Buchanan.

Same happened today in 'Trouw' a Dutch national (christian) daily; an article devoted to Nader didn't mention his running mistress and I made a comment in red pencil about her not only being female but NA as well. Of course that is one correction in 10s of thousands(?) I did comment on Nader's campaign recently (check /logbriefer.htm) Niko: I understand why many Elders will vote Democrat. I respect that. But I must say, it is better not to cast a stone that will spring back in ones face, then a stone which will arrive in clear water, the water of the future of Mother Nature.

Me: It is easy to cast a stone in water,. . . too easy. . . . In my eyes one becomes a man with provisional vision only when turning a few things around; water cast or soaking or cascading into stone is very much life put to death inverted; many more will like to see a hoard become a gift, death put to life from our (and the stone's) perspective. I wonder why I don't tire saying this sort of thing all the time?????????? Vote Green Party. Or do not vote at all!!! Sincerely, Niko

By the way, I found some Native style graphics via momfeather: <http://members.aol.com/Andahatey/> leading to a large free [GraphicsRing](http://www.nationalreview.com/kopel/kopel110100.shtml) <http://www.nationalreview.com/kopel/kopel110100.shtml> (a libertarian votes Nader) <http://www.lewrockwell.com/anderson/anderson23.html> (this one calls him a fascist on the (coffee) grounds. . . . he will outlaw harmful things)

x||||x||||x Protest West African Gas Pipe line request from Environmental Rights Action and Oilwatch Africa Dear Friends and colleagues, We have attached a petition to the World Bank asking it to withdraw all support for the proposed West African Gas Pipeline because of the serious threat the project poses to the communities and the environment of Niger Delta area, Ghana, Benin and Togo. We appeal to all concerned individuals and organisations around the world to quickly study the petition and sign-on. As the petition will be released in different locations around the world in early November, we urge all those endorsing the petition to do so before November 13, 2000. Please note: sign-ons should be sent NOT to us but to <oilwatch@infoweb.abs.net> and <disera@infoweb.abs.net> -- by November 13

'demoncreedties' (votovalues) [//rtmark.com/featured.html#VOTE](http://rtmark.com/featured.html#VOTE)) follow up from last issue:

precisely because the satirical site helps highlight the ways corporations already effectively purchase votes. As law professor Jamin Raskin said about Voteauction, "...we have now evolved a system in which it's OK for money to buy elections, and yet we somehow cling to the fantasy that there's something deeply immoral about the purchase of an individual vote." ([.wirednews.com/news/politics/0,1283,38559,00.html](http://www.wirednews.com/news/politics/0,1283,38559,00.html)) RTMark and many others believe that if U.S. authorities such as Bill Jones wish to purge the election process of corruption, they should start by preventing corporations from spending unlimited sums on electing particular candidates, not by stopping a satire that highlights the problem. As one commentator wrote, "few would disagree that the problem with money in politics today is the hundreds of millions of dollars at the top, not a few dollars at the bottom. Which is why the short-lived vote sale should be seen less as a serious act of sabotage and more as guerrilla theater."

I stuck the following [10 years old and counting; well preserved, disregarded and unworn out repiet piece here:http://62.116.31.68/index00.htm](http://62.116.31.68/index00.htm) **Mock the vote, unblock the rock, clock the buck: LETS level and square about bottom lines.** Money may evolve to businesscard (called visiting card in Dutch) like ID and means of payment in one, it will have date and time of birth, eyeball, hair, nail, tooth, skin, frame and silhouette info; even enumerate, qualify, categorize and index: tools, capital goods, instruments, toys and arsenals, in short inventorize everything including talents and predilections, kinda like the CIA, etc., except, here comes the clincher: open and accesible like sunshine, serving accurate and reciprocal scrutiny by and for everybody, processed efficiently into daily scorekeeping.

Plenty of decentralized every man for (but not by) himself competition out there, yet relatively negligible amounts in complementarily representational currency to reflect relative value thereof and base capital demand (meet ready goods to be moved or plans to be executed) and corresponding supply on. We run into problems from too much money sooner than from too many monies. In its socalled golden age the 17th century Holland had a (**valued in but not traded for gold**) 1000 kinds of circulating bills. Don't hang your most tender feelings of security, justice and/or equality on "legal" tender. Look, you haven't even the right to create yours at your own risk and that of those who choose to deal with you! Money is not the root of all evil, not even the love of money but the love of any one kind of money alone, which can and will become a very mis- treat-, guid- and representing one at that. Instead the love of monies (**more than one coherent identity undoing kind**) is like the love of dictionaries and discernment, the love of coordinates and success rates of microclimate and bioregional radiance reception, it also has the ability to buy from and/or go help out with any growing production that strikes your fancy, even merely projected ones. mellowing the tides that stretch between abundance and scarcity.

Do any of the numberpushing global administrators and debt reschedulers ever blow soap bubbles and deal in viral rumours? Start a viably against all odds one today; cause under open conditions the good drives out the bad. **And that's only one 22nd of one of hundreds of files!!!!** [California shuts down vote-trader Web site \(via free-market.com\)](http://www.free-market.com) ----- California election officials shut down a Web site that allowed

supporters of presidential candidates Al Gore and Ralph Nader to trade votes, so that Naderites could add to their candidate's vote tally without hurting Gore's prospects. (11/1/00) URL: [Why shouldn't a vote for Nader count as 2 for Gore I wonder???????](http://www.free-market.com)

Now to the present: Dear AGoreai must much adora .. .BUT can we see you make that friendly All diff makin gesture . . or one . . two . . . countannually bevenbetter betterbesoontool?!?!?!?!? I mean towards your left, . . . TIGHT LEFT . . . Tighter!!!! better keep on the right side of that greeNADER brother .. . not THAT far though. Think of some concessions and promises to the left which won't worry, even please the right and not antagonizing them. Come and see (next link), tis my specialty; day's too short to educate your public all the way before elections but at least check the Nader criticism an issue back. Let's

talk about money Al; ain't you kept an eye on the career of the man who handed you a copy of what became a part of my green chapter (most visited since I linked to it twice at the top of my / [Blabsabs_Index.htm](#) file for years) and must have worked like magic rock it fuel seeing it was signed by [MARB*LOUS piet??](#) (might be how Madonna's security team remembers me too; they may have stored the evidence of the hastily scribbled (with black smeary and thick wick pencil) first piece of paper I ceremoniously deposited in her mail box after a 'Freudentanz' mime show to celebrate my ((what I was so sure about to be my (((and the world's!!!!!!))) budding luck)) in front of the security camera's some months previous ((longer account around here someplace ((go ogle madonna and poet- or marblous piet)) at it if you care); lucky for you, your first and last piece of paper happened to be proper (US) A4 size and printed but wether you too filed it away??? I just yesterday had to choose a name and didn't even think of this one again myself so I forgive if you forgot but not if you forgo **these renewed and more along your line of 'demonicrasilly' gilded but none the less most rigorous platterprofferings: /** [quest appearances/intro to currency issues.htm](#) **For my views on democracy, google it and be sure to add: pietpiet** x|||||x|||||x latest news on my personal legitimacy / identity / itineRANT status:my hotbot mail account is to be discontinued but the LYCOS network is softening the blow by offering almost 4 times the storage space and lots more features, so I moved (to pietepoot@lycos.com) and took a handful of minutes to mess with their templates: <http://pietepoot.tripod.com>. disimputably apposite piet is at it again (and eeh eerr to prevent misunderstandings 'poot' means 'paw' or 'plant' (the verb) and further afield 'homosexual' but that is only very minimally applicable in this case) . . . I think I'll stick to me netscapee for a while yet though x|||||x|||||xlemme leave you with some more listening advice: 'autechre' (geocities.com/SunsetStrip/Basement/3881/autechre.html ; [brief samples](#)) I find pretty passable for techno . . . but where are the real musomen doing (or even helping (us who want to) do) the real fucking thing for play (with or without slices of defense budgetary edgefetching and mess-aeon-ic-kross-borde-ring): turning rockgrinding and dust spreading into a whole range of graduated and progressively highertec olympic but ongoing and commonsensical disciplines???????? Bono??? Gratuitous and minimal this problem is not. x|||||x|||||x Pacifist vote-view-posting from Colman McCarthy, director of the Center for Teaching Peace in Washington, who teaches courses on nonviolence at six Washington area schools, including the University of Maryland, College Park and Oak Hill Youth Center in Laurel. at the anarchist library list about voting: **According to the Center for Defense Information, the U.S military budget at \$305 billion is 22 times as large as the combined spending of the seven countries Pentagon officials label as potential attackers (Cuba, Iran, Iraq, Libya, North Korea, Sudan and Syria). Except for astronomers, the \$305 billion figure is too large to comprehend. Better to break it down. Congress gives the military \$700 million a day - - three times more than what the Peace Corps gets in a year. Still more comprehensible: \$305 billion a year amounts to about \$8,000 a second. The military receives 49 percent of the federal discretionary budget, or roughly \$4 a day - every day - per person. The numbers suggests that Martin Luther King Jr.'s 1967 judgment still holds: "The greatest purveyor of violence in the world today [is] my own government." And: "A nation that continues year after year to spend more money on military defense than on programs of social uplift is approach ing spiritual death."** Arguing against voting is akin to saying that motherhood is evil and apple pie is poisonous. When telling my voting friends that I can't in conscience vote, and that people who do vote unwittingly endorse killing as a way of settling disputes, I'm chided, denounced or damned for being a misguided purist, an addled idealist and - now it gets rough - a despicable ingrate who dishonors brave men who died in combat to keep democracy alive. How dare I not vote. I dare. But perhaps my friends are right. First, though, I'd like to see some evidence that voting has made the U.S. government less militaristic and more humane. The record shows otherwise. Historian

William Blum has devised the Quick Political Scholastic Aptitude Test (QPSAT). He listed the countries that duly elected U.S. officials have ordered bombed since the end of World War II: China, 1945-1946; Korea, 1950-1953; China, 1950-1953; Guatemala, 1954; Indonesia, 1958; Cuba, 1959-1960; Guatemala, 1960; Congo, 1964; Peru, 1965; Laos, 1964-1973; Vietnam, 1961-1973; Cambodia, 1967-1970; Guatemala, 1967-1969; Grenada, 1983; Libya, 1986; El Salvador, 1980s; Nicaragua, 1980s; Panama, 1989; Iraq 1991-2000; Sudan, 1998; Afghanistan, 1998; Yugoslavia, 1999. Rather than being negative, not voting is positive. It means affirming one's own power - lasting moral power, not fleeting one- moment- every- four-years- voting- booth power. (my comment: that is a pretty close argument (often use the last part of it meself).. . too bad he ain't getting into community currencies after such a good lead but breaks of and concludes intead!!!!) Date: Mon, 06 Nov 2000 09:51:04 -0600 From: "Brad Scott" <brads@gwmail.

plano.gov> Subject: Re: Fwd: Vote For Peace By Staying Home Refusing to vote is about as effective, as a means of bringing about political change, as tying a gag on your own mouth. If the PR-driven campaigns of the two-headed monster called the American party system repel you, find someone or some group that you can support in good conscience. If there's absolutely no one you can stand running in the election, vote for a write-in candidate to show your disgust with the whole system and reduce strength of the "mandate" that the winning candidate will claim. (I understand that Willie Nelson routinely gets a substantial number of votes here in Texas....)

Pacifists and others who oppose jingoistic, bullying foreign adventurism should note that there are alternatives to the Demublicans and the Republicrats. Most notably; Ralph Nader and the Green party have some pacifistic tendencies. For those of a more conservative/individualistic bent, the

Libertarian party advocates a scaling-back of America's military activities to that which was originally envisioned by the authors of the Constitution: defense of American citizens and territory against actual foreign aggression. (Most of the founding fathers would have gagged if they had been told that their brainchild would itself become an example of the kind of bullying, "imperial"

power that they so feared!) If you find Bush and Gore to be too militaristic, too statist, too anything, consider supporting a third party candidate. The only way that any of their ideas will be taken seriously is if there is visible public support for them. www.speakout.com is a useful web resource for the views of various candidates and parties. Unlike the so-called mainstream news organizations, they don't selectively edit out the "insignificant" third parties that they disapprove of. **Bradley A. Scott ... who has just shown his colors as a "minarchist", instead of an "anarchist", and who most certainly does NOT represent the views of the Plano Public Library....**

>>> chuck@tao.ca 11/05/00 06:02PM >>> Brad: Need I remind you that this is the anarchist librarians list, so most of us aren't going to be too excited about participating in sham elections. I've put together a page with a large number of explanations about why anarchists oppose voting and what they propose as an alternative: <http://www.infoshop.org/voting.html>

Chuck0 <http://www.votefraud.org/News/2000/11/110700.html> (via Kent; see first link at the top) x|||||x||||x

I will slip slap two more anarcho-items in: Carol, Following the get together at the London book Fair, I have set up a website with a chat-room as the initial means of communicating between each other. You can also contact "ervin_sabo@hotmail.com" if you want to forward information to others on the list. The website address is: <http://communities.msn.co.uk/LibraryoftheUnseenUniversity> In addition to the chat room I've added folders where longer documents can be stored for people to read, and I'm starting to set up some useful links. suggestions and/or contributions for the website welcome. Send them to "ervin". Not much on the website yet, I'm afraid, but then that gives us all a "clean slate" to work with....

x||||| Roger Caillois |||||x If some of these next -->>> links are repeats I am not sorry; they can even bear being quoted I figure, the first one is good and new for me: etc.www.ina.fr/INA/Imagina/99/Village/index.en.html - 19k IMAGINA 99:Innovation village THE INA MULTI-DELIVERY PRODUCTION STUDIO The documentary from the series "A century of writers " devoted to Roger Caillois becomes interactive via the Web. By the development of advanced browsing modes, it is possible to search for footage on particular themes (for example: travel, science) or particular periods (childhood of Roger Callois, his Surrealist period, etc.), to make the excerpts into a mini-documentary by the use of an integrated editing system, to view all the interviews used to make the programme (the rushes), and to move around at will to any point in the documentary (by searching for particular key-words or film shots), etc. [ets.](#)

uidaho.edu/center_for_ethics/handout8.htm Best and shortest intro I could find [hsph.](#)
harvard.edu/rt21/concepts/GROSZ.htm 71K from a '95 book This girl tops everybody when it comes to mentioning Caillois a few times in one file; here is why (from chapter 15): Animal Sex; Libido as desire and death Thus, instead of focusing on various representations of women's sexual pleasure (in literature, poetry, painting, sculpture, pornography and so on) or on personal experience, as many feminists have tended to, I decided to explore the work of two apparently unrelated male theorists whose candour and intellectual honesty have for some time impressed me, and whose work represents a rare combination of openly expressed personal obsession and scholarly rigour, the rigorous reading and analysis of their driving personal preoccupations:² **Roger Caillois, the French sociologist and co-founder of the College de sociologie,**³ **whose life-long preoccupation with insects, with the femme fatale and with rocks,**⁴ signals early anticipations of what might be considered a 'philosophy' or perhaps even an 'anthropology' of the post-human; and Alphonso Lingis, distinguished American philosopher and translator of phenomenological theory (most notably, Merleau-Ponty and Levinas), the only professional philosopher I have read who writes openly yet philosophically, and at great length, about orgasm, bodily pleasures, lust and sexuality in its many permutations and extremes (transvestism, trans-sexualism, prostitution, pornography, pederasty, sado-masochism among them). Between them, Caillois and Lingis provide a coverage from among the most primitive and ancient of insects⁵ to the most developed and enculturated of human sexual practices -- a veritable panorama of sexual pleasures and practices which may help to specify what is masculine about representations of human, and non-human, sexualities. uni-karlsruhe.de/~ed01/Hyle/Hyle6/laszlo.htm 40K 2. What is play? Playing is an activity (truly, an intricate set of very diverse activities and behaviors) associated with children, but which of course also adults are occasionally engaged in, too.[5] When performed by young children, a play shows components of orienting within an environment; achieving a measure of control of the objects present; learning to associate e.g. visual and tactile perceptions; mimicking or emulating a behavior, typically that of adults in 'pretending games'; identifying the self and pitting it against others in social interactions. Most of these factors are also involved, are at play one might say, in the handling of molecular models by professional chemists. Johann Huizinga in his justifiably classic book on play and games, Homo ludens,[6] emphasized the competition aspect. As a rationalist, he espoused the ages-old discrimination by contrasting the playful with the serious. Later, Roger Caillois[7] also put his systematic study of games under the same overarching duality. He went on organizing games according to a typology along the four basic categories of competition (agôn), chance (alea), altered mental states (ilinx), and simulation (mimicry). Clearly, playing with a model for representing a chemical compound belongs predominantly to the fourth category. Furthermore, many languages (such as French) denote by a word such as jeu or the equivalent an imperfect fit in the adjustment of interacting mechanical parts, as in a geared assembly or in a piece of woodwork or carpentry. The real mechanical device is distinguished from the idealized fully deterministic contraption in the abstract realm of rational mechanics precisely by such a measure of freedom, by a degree of behavior unpredictable from the well-understood laws and rules of mechanics.[8] One might say that jeu in any kind of mechanical devices serves as a real-life and avowedly anthropomorphic metaphor, standing for this playful-serious duality. True, quite a few authors

have questioned its very existence. In the philosophical tradition of Nietzsche and Heidegger, Jacques Derrida for instance regards play as the cornerstone for any culture.[9] Derrida's interpretation of play as a

cultural root also enjoys an ancient and distinguished history. To quote from the entry in the Encyclopédie for 'Game of Roman children (Roman history)': One of their most usual games was representation of a day at court, under all its aspects, which they named *judicia ludere*. There were judges, prosecutors, attorney, and guards to put in jail a condemned party. Plutarch, in his life of Cato from Utica, tells about one of these children who, after the ruling was led by a boy older than he was, took him to a small room and locked him up. The child was scared and called for Cato (also a participant in this game) to help him.

Cato made his way through their playmates, freed his client, and brought him back to his place [...]. Thus, Derrida's is quite a respectable viewpoint. Nevertheless, for the purpose of this paper the discussion will be set in the traditional rationalist interpretation. Another feature yet ought to

be mentioned in this section devoted to a reminder of the most relevant factors, for our purpose, in play and games. This is game as the attempted prediction of a random outcome. We can best illustrate this aspect with the Brazilian illegal lottery, *jogo do bicho*, originated in Rio de Janeiro. This occurred in the distant past, about a century ago: at irregular intervals, animals from the zoo were taken out for a stroll through the Rio streets. Soon, the Cariocas (inhabitants of Rio) started betting on which animals would show up. Thus, the *jogo do bicho*, a form of gambling, had been invented. It endures to this day. There is a total of 24 emblematic animals. The results of the daily draw are posted in every bar. Brazilians are very fond of their game, both on account of it being illegal (**most people, worldwide, when playing games, such as cowboys and Indians, prefer the side of the outlaws to that of the law enforcers, the cops**) and for the connection it enables them to draw between their dream life and reality (**one of them might say: "I dreamt of hearing mocking sounds in the forest, hence I'll wager on the monkey."**). As Émile Borel has reminded us most convincingly,[10]all such money games are structurally biased in favor of the organizer; and the probability laws ensure that the bank in a casino, the government coffers in a lottery, or the Swiss accounts for a local Mafia (*jogo do bicho* or others) are inevitably the winners, by a hefty margin.

This URL seems a bit iffy again (was when I first tried it more than a year ago now) but luckily google caches come in handy for these cases:

<http://206.168.15.216/ABH-Metaphor%2011%20-European%20Metaphors.html> -- 101K -- THE REIGNING SOCIAL METAPHORS OF EUROPEAN CULTURE THE GAME METAPHOR The game metaphor has always been an intrinsic part of Western thought. It can be found in the simulation of Greek drama in which the games of the gods were witnessed by mere mortals; and it is also evidenced in the casting of the dice among the *populi vulgari*. It is also seen in the reading of the Tarot or in the interpretation of the Nordic Runes. This concern for games was so endemic to European thought that Johan Huizinga (1955: 4) considered it to be a cultural trait. This claim was carefully substantiated and further articulated by Roger Caillois. He also considered play to be a cultural element, but he found Huizinga's focus to be too narrow. His revision and reclassification of games led to the four major types of games outlined in this article: *agon* (games of competition), *alea* (games of chance), *mimesis* (games of mimicry), and *illynx* (games of vertigo). More recently, the game metaphor has resurfaced as a major framework within the philosophy of Ludwig Wittgenstein. He considers logic to be a *Sprachspiel* (a language game). In mathematics, the tossing of coins led to the development of probability theory, a mathematical game. **Hence, the game metaphor continues to dominate Western thought.**

Huizinga (1955) argued that it is because of play that one is able to transcend the immediate needs of life and to pretend.

Anthropologist such as Victor Turner (1969) would agree. He is interested in cultural rites and rituals. He sees rituals as social dramas which imitate some cosmic or mystical event, a happening. Hence the use of masks in Greek drama. One wears a mask to become another person. One wears a mask to participate in a cosmic happening. In drama, one understands this event by acting it out. He comes to identify with it. A rite is a *dromenon*, something which is acted out. The event was present. Later attempts to re-enact the event make it present again. The mystical repetition becomes a re-presentation. Huizinga argues that play differs in some regards from social drama. In drama and ritual one acts out the event (a *methetic act*). In play, on the other hand, one merely imitates or copies life. It is an illusion, cf. Latin *in+ludo* "in play."

Roger Caillois (1979) dispensed with Huizinga's distinction between acts and simulations and

reclassified games into a continuum ranging from ludus (games that require skill and patience) to paidia (childlike games, games without control, uncontrolled fantasy). His reclassification is theoretically interesting in some regards and disturbing in others. In discussing Agon (games of competition), he merely reiterates what Huizinga has stated. His inclusion of Alea (games of chance) is informative because he acknowledges that there are cultures that see life in such fatalistic terms. For them, the game of life is aleatic. The discussion of Mimesis (games of mimicry and simulation) is interesting also because it naturally leads one to the metaphor of the stage. However, Caillois does nothing with this implication. He implies that such games are used as an escape and yet war games are definitely mimetic. However, they do not function as escape mechanisms. Finally, the classification of games in pursuit of vertigo is also an engaging concept because of the existence of cultures which practice this search for voluptuous panic as a way of life. Such groups range from the Sufis to modern drug cultures. They seek to destroy reality in the hope that it will lead to an escape into another kind of reality. However, such games represent a desire for disorder and chaos.

uk/ perhaps a (small) few pieces from part VI of a giant textsite mixing elizabethan times with treelore, myths and astrology to close this section??? (((it reminds me of Leslie Fiedler's treatment in "the stranger in Shakespeare" Contents: I The Elizabethan Age II Essex III Marlowe IV Raleigh V Donne VI The Idea of the Goddess [tkline.freeseerve.co.uk /Webworks/Website/Stormgoddess.htm](http://tkline.freeseerve.co.uk/Webworks/Website/Stormgoddess.htm): And Caliban, who is the corrupted spirit in man, the fallen one, the brute, the potential rapist, the outsider, the 'natural' man. Caliban, who knows 'all the qualities o' the isle', the dreamer whose irrational dream is full of rare music and lulling voices sounding in a paradise garden, will be 'wise hereafter and seek for grace.' Prospero's 'imperialist' mercy allows even Caliban to be part of the community if he behaves. Prospero's severity is also Donne's, who calls beggars 'dogs' and 'vermin', and for whom the 'herd of vagabonds' are not fit for charity being outcasts from' the household of God'. Donne, who argues 'an inherent right in the Christians, to plant Christianity in any part of the dominions of the infidels, and consequently, to despoil them even of their possession, if they oppose such plantations.' All shall conform, accept, obey the laws, constrain their thoughts. It is the cold message of Puritanism, which will become the cold message of Protestant imperialism, and parliamentary democracy. It is a clinical, scientific coldness, Prospero's coldness, the coldness of Plato' Republic. And just as reading Plato leaves an uncomfortable chill behind, so does The Tempest. So does a reading of Donne's sermons. Compassion, and pity, and mercy, and love are still there, but they do not somehow seem to mean what they meant. The reconciliation is still a defeat for the Goddess. sacredearth.com ethnobotanical list, books, travels, etc servtech.com/~grugyn/bk147.htm another Robert Graves admirer who weaves a lot of politics into his work (with a tinge if not taint of conspiracy and semi-semitism: [/2c-awl.htm](http://2c-awl.htm))

Where are my hits coming from?
Greetings from Weblogs.Com! We have a great new feature for all UserLand-hosted Manila sites, including those hosted on Weblogs.Com.

It's called the "Referers Page" -- and it answers the question, where are my hits coming from? It lists all the "referers" of hits that came into your site in the last 24 hours. You can see how the search engines are indexing your site, and may get some ideas about who is reading you, and how they found you. To find your Referers Page, start with the URL to your website, for example: <http://soap.weblogs.com/> and add "stats/referers" to the end of the URL, as follows: <http://soap.weblogs.com/stats/referers> This works with any UserLand-hosted Manila site, not just mine and yours. Be careful though, you can easily waste hours if not days crawling around the Web to see how things are linked together. I hope you like this feature, we have many more on the way, new stuff that only works in Manila. Our goal is to ! keep moving, to make it the most interesting and powerful and fun writing environment on the World Wide Web. Dave PS: I know that "referers" is mis-spelled. Somewhere at the beginning of the Web, one of

the browser implementors mis-spelled it, and it's been spelled that way on the Web, ever since. "It's even worse than it appears." x|||||x|||||x nicci, and the **Saul Williams** (see issue before last) poems I sent are but a shadow of the ones in the movie which he did looking lots more youthful (10 years or so ago); I'd be thrilled to find the text of that climax of the move (for me at least; haven't been able to though). PS: may our repartees keep this sudden upbeat up cross 'quatorcaressingly. Love you as ever Piet x|||||x|||||x <http://homepages.ihug.co.nz/~d-w-m/index.htm> Douglas Morrison body electronician; the most beloved of John Ray the founder's followers x|||||x|||||x<http://www.michaelparenti.org/KozyWithKlan.html>

OK sorta man I guess, recording faithfully if biasedly: "The press regularly fails to report the Klan's worst features, . . . ", substitute Parenti for 'press' and Serbia for 'Klan' to get a picture of Parenti's own reporting perspectives, the very same ones he abuses others for. . . x||||||x||||||x

These guys list the ADL as well; well lemme add this from gush-shalom.org/ (43 sites Supporting Middle East Peace, democracy and Tolerance) Still, after consulting with my fellow activists I am in a position to make an offer. Should a complete week - seven (7) days - pass in which not a single unarmed Palestinian is killed by the Israeli armed forces which are answerable to Mr. Barak, we would remove the abovementioned cartoon from our website. As for the ADL - an organization which claims to "counteract hatred, prejudice and bigotry" - can you truly find no other places to search for such, with Israeli society in its present condition, except at our modest website?

x|||x Talk about old patriarchal plots, plies and scars (some more): From <http://www.gush-shalom.org/jerusalem>: "The army is systematically cutting down our olive trees, which we were just going to harvest. Two hundred trees were already destroyed. Our land does not produce enough food for our daily needs, we relied on what we could buy from outside. Now, even if we succeed in slipping around the soldiers and getting to neighboring village, it does not help because they are in the same position, also besieged by the army. "The officer in the roadblock told me it was all in punishment for our throwing stones. Last night our water was also cut off. Me: Sorry folks but if this doesn't shatter your illusions about the lofty untouchable / scapegoat pacifist family oriented status of the originally Zionistically and then more and more orthodoxically oppressive state, I don't know what will. It seems to me the good old textashomelanders (Steiner) have certainly some catching up in mind when it comes to letting their armies do their worst as good as the best of the rest. She says she had no apprehension about going to a Palestinian town and staying there the night. "I know many people in Beit Sahur, and have friends there. The Palestinians are well able to distinguish between an Israeli who comes to them as a respectful friend and guest, and one which comes as an occupier, gun in hand. As a matter of fact, these days I feel more safe as an Israeli in Beit Sahur than as a peace activist in the streets of Jerusalem, facing the extreme right". I am going to keep on pointing to Walter Zander's economic work to you Middle Easterners till I get a satisfactory answer as to why yall choose to ignore his early work. Is it just because he did so himself? Spending time and effort on the attempt to make Jerusalem international without making allowances or at least explicit reference to the need for some sort of parallel currencies?? States within states can be given legitimacy as much as party populated parliaments need to be. Taking some cues from traffic and trade between city states thriving next to each other. If you haven't already seen Zander's work and that of associates I beg you to take a few moments and see: For more and similar challenges see some recent logs

<http://www.aimovement.org/LaDukeNader.html> From: MOMFEATHR@aol.com Reply-To: discussion@fpcn-global.org To: discussion@fpcn-global.org, IAWP-post-092262209@topica.com CC: news@fpcn-global.org, admin@irja.org Subject: [FPCN_News] VERNON BELLECOURT AMERICAN INDIAN MOVEMENT Date: Wed, 1 Nov 2000 11:17:12 EST AN OPEN LETTER TO WINONA LADUKE AND RALPH NADER Released: October 30, 2000 By: WaBun-Inini, aka, Vernon Bellecourt, White Earth Anishinabe Ojibwa Nation Telephone: 612-721-

3914 Fax: 612-721-7826 Email: aimggc@worldnet.att.net Web Address: <http://www.aimovement.org>

Dear Winona, I write this letter to you as an elder, counselor, and citizen of the sovereign Ga-wa-ba-be-ka-neekag Anishinabe Ojibwa En-da-na-kee-wad (White Earth Peoples Ojibwa Nation) in northern Minnesota, which we both are member citizens first and foremost. Secondly, we are also citizens of these United States, a citizenship, which was imposed on the nations of Indian peoples arbitrarily and unilaterally with the passage of the 1924 Indian Citizenship Act by the United States Congress. The passage of the 1924 Indian Citizenship Act created for Indian people special rights and responsibilities, and a unique relationship with federal and state government in that we have dual citizenship. We are able to vote in both our Indian government elections, and run for office, as well are able to vote in federal and state government elections and run for office. As a fellow citizen of the White Earth Anishinabe Ojibwa Nation, and one of your many elders, I want to have a frank discussion with you as to the dangers that exist for our Indian people across America due to your involvement with the Green Party. Specifically, your campaign for Vice-President of the United States as running mate to Ralph Nader. First of all, I have always believed that the two-party system dominated by the Democrats and Republicans is one and the same beast with the head of an elephant on one end, and the head of a donkey on the other. The consequences of this reality is that this beast has a gluttonous appetite historically, and to the present, that continues to consume Indian lands, water, petroleum, timber, and other resources which makes the two-party system totally constipated for Indian people, and all others who are people without power or rights. Second, I have always been a strong advocate for the development of an alternative third political party. In 1983, I, along with Ned Anderson, who was then the President of the San Carlos Apache Nation were founding members of the Rainbow Coalition, which was formed that year in Washington, D.C. Later both Mr. Anderson and I, as well as many other Indian people were present at the Washington D.C. Convention Center when Ned Anderson and I endorsed Jesse Jackson for the Presidency of the United States. President Ned Anderson coined the phrase, which became the call to action for the campaign, "Run Jesse, Run." This phrase was first popularized for the great Olympic star, Jesse Owens at the Berlin Olympics. I am convinced that had Jesse Jackson stayed the course, the Rainbow Coalition with Jesse Jackson as candidate for the Presidency would be a serious threat to the two-party system in this 2000 election. However, when Jesse Jackson took the Rainbow Coalition into the center of the Democratic Party many progressives including myself bolted from the coalition. In 1988, I supported Dr. Lenora Fulani who was on the ballot in all 50 states, and she had asked me to be her vice-president running mate. While I declined the offer, I worked nationwide for her candidacy as she was raising important issues affecting Indian people, as well as other Americans. I was strongly criticized by many of the progressives and liberals across the county for supporting her. Winona, while I completely support the Nader/LaDuke 2000 Green Party Native American platform, which supports tribal sovereignty and government to government relations; the right and responsible exercise of retained treaty rights; return of public landholdings to Indian property owners, settlement of claims; restitution and reconciliation for loss of billions of dollars by Democrat and Republican administrations of Indian money trust accounts; the breaching of dams in order to save the salmon; clemency for Leonard Peltier; the protection of native intellectual and other property rights to name a few of the many issues facing Native people in your platform, unfortunately your message is not being heard. You should be on all media outlets, television, radio, print media, and all news and talk shows nationwide along with Ralph Nader. The fact is, we see more of the vice-presidential candidate of fringe candidate Pat Buchanan.

Same happened today in 'Trouw' a Dutch national (christian) daily; an article devoted to Nader didn't mention his running mistress and I made a comment in red pencil about her not only being female but NA as well. Of course that is one correction in 10s of thousands(?) I did comment on Nader's campaign recently (check /logbriefer.htm) Niko: I understand why many Elders will vote Democrat. I respect that. But I must say, it is better not to cast a stone that will spring back in ones face, then a stone which will arrive in clear water, the water of the future of Mother Nature. Me: It is easy to cast a stone in water, . . . too easy. . . In my eyes one becomes a man with provisional vision only when turning a few things around; water cast or soaking or cascading into stone is very much life put to death inverted; many more will like to see a hoard become a gift, death put to life from our (and the stone's)

perspective. I wonder why I don't tire saying this sort of thing all the time????????? Vote Green Party. Or do not vote at all!!! Sincerely, Niko By the way, I found some Native style graphics via momfeather: <http://members.aol.com/Andahatey/> leading to a large free [GraphicsRing](http://www.graphicsring.com/) [nationalreview.com/kopel/kopel110100.shtml](http://www.nationalreview.com/kopel/kopel110100.shtml) (a libertarian votes Nader) <http://www.lewrockwell.com/anderson/anderson23.html> (this one calls him a fascist on the (coffee) grounds. . . . he will outlaw harmful things) x||||||x||||||x Protest West African Gas Pipe line request from Environmental Rights Action and Oilwatch Africa Dear Friends and colleagues, We have attached a petition to the World Bank asking it to withdraw all support for the proposed West African Gas Pipeline because of the serious threat the project poses to the communities and the environment of Niger Delta area, Ghana, Benin and Togo. We appeal to all concerned individuals and organisations around the world to quickly study the petition and sign-on. As the petition will be released in different locations around the world in early November, we urge all those endorsing the petition to do so before November 13, 2000. Please note: sign-ons should be sent NOT to us but to <oilwatch@infoweb.abs.net> and <disera@infoweb.abs.net> -- by November 13

'demoncreedties' (votovalues) [//rtmark.com/featured.html#VOTE](http://rtmark.com/featured.html#VOTE)) follow up from last issue: precisely because the satirical site helps highlight the ways corporations already effectively purchase votes. As law professor Jamin Raskin said about **Voteauction**, "...we have now evolved a system in which it's OK for money to buy elections, and yet we somehow cling to the fantasy that there's something deeply immoral about the purchase of an individual vote." (wirednews.com/news/politics/0,1283,38559,00.html) RTMark and many others believe that if U.S. authorities such as Bill Jones wish to purge the election process of corruption, they should start by preventing corporations from spending unlimited sums on electing particular candidates, not by stopping a satire that highlights the problem. As one commentator wrote, "few would disagree that the problem with money in politics today is the hundreds of millions of dollars at the top, not a few dollars at the bottom. Which is why the short-lived vote sale should be seen less as a serious act of sabotage and more as guerrilla theater." I stuck the following 10 years old and counting; well preserved, disregarded and unworn out repiet piece here:<http://62.116.31.68/index00.htm> Mock the vote, unblock the rock, clock the buck: LETS level and square about bottom lines. Money may evolve to businesscard (called visiting card in Dutch) like ID and means of payment in one, it will have date and time of birth, eyeball, hair, nail, tooth, skin, frame and silhouette info; even enumerate, qualify, categorize and index: tools, capital goods, instruments, toys and arsenals, in short inventorize everything including talents and predilections, kinda like the CIA, etc., except, here comes the clincher: open and accesible like sunshine, serving accurate and reciprocal scrutiny by and for everybody, processed efficiently into daily scorekeeping. Plenty of decentralized every man for (but not by) himself competition out there, yet relatively negligible amounts in complementarily representational currency to reflect relative value thereof and base capital demand (meet ready goods to be moved or plans to be executed) and corresponding supply on. We run into problems from too much money sooner than from too many monies. In its socalled golden age the 17th century Holland had a (valued in but not traded for gold) 1000 kinds of circulating bills. Don't hang your most tender feelings of security, justice and/or equality on "legal" tender. Look, you haven't even the right to create yours at your own risk and that of those who choose to deal with you! Money is not the root of all evil, not even the love of money but the love of any one kind of money alone, which can and will become a very mis- treat-, guid- and representing one at that. Instead the love of monies

(more than one coherent identity undoing kind) is like the love of dictionaries and discernment, the love of coordinates and success rates of microclimate and bioregional radiance reception, it also has the ability to buy from and/or go help out with any growing production that strikes your fancy, even merely projected ones. mellowing the tides that stretch between abundance and scarcity. Do any of the numberpushing global administrators and debt reschedulers ever blow soap bubbles and deal in viral rumours? Start a viably against all odds one today; cause under open conditions the good drives out the bad. **And that's only one 22nd of one of hundreds of files!!!!** [California shuts down vote-trader Web site \(via free-market.com\)](#) ----- California election officials shut down a Web site that allowed supporters of presidential candidates Al Gore and Ralph Nader to trade votes, so that Naderites could add to their candidate's vote tally without hurting Gore's prospects. (11/1/00) URL: [Why shouldn't a vote for Nader count as 2 for Gore I wonder???????](#)

Now to the present: Dear **AGoreai** must much adora .. **.BUT** can we see you make that friendly All diff makin gesture .. or one .. two ... countannually bevenbetter betterbesoontoo!?!?!?!? Bono??? Gratuitous and minimal this problem is not. x|||x|||x **Pacifist vote-view-**

posting from Colman McCarthy, director of the Center for Teaching Peace in Washington, who teaches courses on nonviolence at six Washington area schools, including the University of Maryland, College Park and Oak Hill Youth Center in Laurel. at the anarchist library list about voting: **According to the Center for Defense Information, the U.S military budget at \$305 billion is 22 times as large as the combined spending of the seven countries Pentagon officials label as potential attackers (Cuba, Iran, Iraq, Libya, North Korea, Sudan and Syria). Except for astronomers, the \$305 billion figure is too large to comprehend. Better to break it down. Congress gives the military \$700 million a day - - three times more than what the Peace Corps gets in a year. Still more comprehensible: \$305 billion a year amounts to about \$8,000 a second. The military receives 49 percent of the federal discretionary budget, or roughly \$4 a day - every day - per person. The numbers suggests that Martin Luther King Jr.'s 1967 judgment still holds: "The greatest purveyor of violence in the world today [is] my own government." And: "A nation that continues year after year to spend more money on military defense than on programs of social uplift is approach ing spiritual death."** Arguing against voting is akin to saying that motherhood is evil and apple pie is poisonous. When telling my voting friends that I can't in conscience vote, and that people who do vote unwittingly endorse killing as a way of settling disputes, I'm chided, denounced or damned for being a misguided purist, an addled idealist and - now it gets rough - a despicable ingrate who dishonors brave men who died in combat to keep democracy alive. How dare I not vote. I dare. But perhaps my friends are right. First, though, I'd like to see some evidence that voting has made the U.S. government less militaristic and more humane. The record shows otherwise. Historian William Blum has devised the Quick Political Scholastic Aptitude Test (QPSAT). He listed the countries that duly elected U.S. officials have ordered bombed since the end of World War II: China, 1945-1946; Korea, 1950-1953; China, 1950-1953; Guatemala, 1954; Indonesia, 1958; Cuba, 1959-1960; Guatemala, 1960; Congo, 1964; Peru, 1965; Laos, 1964-1973; Vietnam, 1961-1973; Cambodia, 1967-1970; Guatemala, 1967-1969; Grenada, 1983; Libya, 1986; El Salvador, 1980s; Nicaragua, 1980s; Panama, 1989; Iraq 1991-2000; Sudan, 1998; Afghanistan, 1998; Yugoslavia, 1999. Rather than being negative, not voting is positive. It means affirming one's own power - lasting moral power, not fleeting one- moment- every- four-years- voting- booth power. (my comment: that is a pretty close argument (often use the last part of it meself).. . too bad he ain't getting into community currencies after such a good lead but breaks of and concludes inthead!!!!) **Date: Mon, 06 Nov 2000 09:51:04 -0600 From: "Brad Scott" <brads@gwmail.plano.gov> Subject: Re: Fwd: Vote For Peace By Staying Home Refusing to vote is about as effective, as a means of bringing about political change, as tying a gag on your own mouth. If the PR-driven campaigns of the two-headed monster called the American party system repel you, find someone or some group that you can support in good conscience. If there's absolutely no one you can stand running in the election, vote for a write-in candidate to show your disgust with the whole system and reduce strength of the "mandate" that the winning candidate will claim. (I understand that Willie Nelson routinely gets a substantial number of votes here in Texas....)** Pacifists and others who oppose jingoistic, bullying foreign adventurism should note that there are alternatives to the Demublicans and the Republicrats. Most notably; Ralph Nader and the Green party have some pacifistic tendencies. For those of a more conservative/individualistic bent, the Libertarian party advocates a scaling-back of America's military activites to that which was originally envisioned by the authors of the Constitution: defense of American citizens and territory against actual foreign aggression. (Most of the founding fathers would have gagged if they had been told that their brainchild would itself become an example of the kind of bullying, "imperial" power that they so feared!) If you find Bush and Gore to be too militaristic, too statist, too anything, consider supporting a third party candidate. The only way that any of their ideas will be taken seriously is if there is visible public support for them. www.speakout.com is a useful web resource for the views of various candidates and parties. Unlike the so-called mainstream news

organizations, they don't selectively edit out the "insignificant" third parties that they disapprove of. **Bradley A. Scott ... who has just shown his colors as a "minarchist", instead of an "anarchist", and who most certainly does NOT represent the views of the Plano Public Library....** >>> chuck@tao.ca 11/05/00 06:02PM >>> Brad: Need I remind you that this is the anarchist librarians list, so most of us aren't going to be too excited about participating in sham elections. I've put together a page with a large number of explanations about why anarchists oppose voting and what they propose as an alternative: <http://www.infoshop.org/voting.html>

Chuck0 <http://www.vote fraud.org/News/2000/11/110700.html> (via Kent; see first link at the top) x||||x|||x I will slip slap two more anarcho-items in: Carol, Following the get together at the London book Fair, I have set up a website with a chat-room as the initial means of communicating between each other. You can also contact "ervin_sabo@hotmail.com" if you want to forward information to others on the list. The website address is: <http://communities.msn.co.uk/LibraryoftheUnseenUniversity> In addition to the chat room I've added folders where longer documents can be stored for people to read, and I'm starting to set up some useful links. suggestions and/or contributions for the website welcome. x||||| Roger Caillois ||||x If some of these next -->>> links are repeats I am not sorry; they can even bear being quoted I figure, the first one is good and new for me: etc.www.ina.fr/INA/Imagina99/Village/index.en.html - 19k IMAGINA 99:Innovation village THE INA MULTI-DELIVERY PRODUCTION STUDIO The documentary from the series "A century of writers " devoted to Roger Caillois becomes interactive via the Web. By the development of advanced browsing modes, it is possible to search for footage on particular themes (for example: travel, science) or particular periods (childhood of Roger Callois, his Surrealist period, etc.), to make the excerpts into a mini-documentary by the use of an integrated editing system, to view all the interviews used to make the programme (the rushes), and to move around at will to any point in the documentary (by searching for particular key-words or film shots), etc. [ets. uidaho.edu/center_for_ethics/handout8.htm](http://ets.uidaho.edu/center_for_ethics/handout8.htm) Best and shortest intro I could find [hsph. harvard.edu/rt21/concepts/GROSZ.htm](http://hsph.harvard.edu/rt21/concepts/GROSZ.htm) 71K from a '95 book This girl tops everybody when it comes to mentioning Caillois a few times in one file; here is why (from chapter 15): Animal Sex; Libido as desire and death Thus, instead of focusing on various representations of women's sexual pleasure (in literature, poetry, painting, sculpture, pornography and so on) or on personal experience, as many feminists have tended to, I decided to explore the work of two apparently unrelated male theorists whose candour and intellectual honesty have for some time impressed me, and whose work represents a rare combination of openly expressed personal obsession and scholarly rigour, the rigorous reading and analysis of their driving personal preoccupations:2 **Roger Caillois, the French sociologist and co-founder of the College de sociologie,3 whose life-long preoccupation with insects, with the femme fatale and with rocks,4** signals early anticipations of what might be considered a 'philosophy' or perhaps even an 'anthropology' of the post-human; and Alphonso Lingis, distinguished American philosopher and translator of phenomenological theory (most notably, Merleau-Ponty and Levinas), the only professional philosopher I have read who writes openly yet philosophically, and at great length, about orgasm, bodily pleasures, lust and sexuality in its many permutations and extremes (transvestism, trans-sexualism, prostitution, pornography, pederasty, sado-masochism among them). Between them, Caillois and Lingis provide a coverage from among the most primitive and ancient of insects5 to the most developed and enculturated of human sexual practices -- a veritable panorama of sexual pleasures and practices which may help to specify what is masculine about representations of human, and non-human, sexualities. [//userwww.service.emory.edu/~ivishne/Kojeve.html](http://userwww.service.emory.edu/~ivishne/Kojeve.html) 24K [rz.](http://www.rz.com)

uni-karlsruhe.de/~ed01/Hyle/Hyle6/laszlo.htm 40K 2. What is play? Playing is an activity (truly, an intricate set of very diverse activities and behaviors) associated with children, but which of course also adults are occasionally engaged in, too.[5] When performed by young children, a play shows components of orienting within an environment; achieving a measure of control of the objects present; learning to associate e.g. visual and tactile perceptions; mimicking or emulating a behavior, typically that of adults in 'pretending games'; identifying the self and pitting it against others in social interactions. Most of these factors are also involved, are at play one might say, in the handling of molecular models by professional chemists. Johann Huizinga in his justifiably classic book on play and games, *Homo ludens*, [6] emphasized the competition aspect. As a rationalist, he espoused the ages-old discrimination by contrasting the playful with the serious. Later, Roger Caillois [7] also put his systematic study of games under the same overarching duality. He went on organizing games according to a typology along the four basic categories of competition (*agôn*), chance (*alea*), altered mental states (*ilinx*), and simulation (mimicry). Clearly, playing with a model for representing a chemical compound belongs predominantly to the fourth category. Furthermore, many languages (such as French) denote by a word such as *jeu* or the equivalent an imperfect fit in the adjustment of interacting mechanical parts, as in a geared assembly or in a piece of woodwork or carpentry. The real mechanical device is distinguished from the idealized fully deterministic contraption in the abstract realm of rational mechanics precisely by such a measure of freedom, by a degree of behavior unpredictable from the well-understood laws and rules of mechanics. [8] One might say that *jeu* in any kind of mechanical devices serves as a real-life and avowedly anthropomorphic metaphor, standing for this playful-serious duality. True, quite a few authors have questioned its very existence. In the philosophical tradition of Nietzsche and Heidegger, Jacques Derrida for instance regards play as the cornerstone for any culture. [9] Derrida's interpretation of play as a cultural root also enjoys an ancient and distinguished history. To quote from the entry in the *Encyclopédie* for 'Game of Roman children (Roman history)': One of their most usual games was representation of a day at court, under all its aspects, which they named *judicia ludere*. There were judges, prosecutors, attorney, and guards to put in jail a condemned party. Plutarch, in his life of Cato from Utica, tells about one of these children who, after the ruling was led by a boy older than he was, took him to a small room and locked him up. The child was scared and called for Cato (also a participant in this game) to help him. Cato made his way through their playmates, freed his client, and brought him back to his place [...]. Thus, Derrida's is quite a respectable viewpoint. Nevertheless, for the purpose of this paper the discussion will be set in the traditional rationalist interpretation. Another feature yet ought to be mentioned in this section devoted to a reminder of the most relevant factors, for our purpose, in play and games. This is game as the attempted prediction of a random outcome. We can best illustrate this aspect with the Brazilian illegal lottery, *jogo do bicho*, originated in Rio de Janeiro. This occurred in the distant past, about a century ago: at irregular intervals, animals from the zoo were taken out for a stroll through the Rio streets. Soon, the Cariocas (inhabitants of Rio) started betting on which animals would show up. Thus, the *jogo do bicho*, a form of gambling, had been invented. It endures to this day. There is a total of 24 emblematic animals. The results of the daily draw are posted in every bar. Brazilians are very fond of their game, both on account of it being illegal (**most people, worldwide, when playing games, such as cowboys and Indians, prefer the side of the outlaws to that of the law enforcers, the cops**) and for the connection it enables them to draw between their dream life and reality (**one of them might say: "I dreamt of hearing mocking sounds in the forest, hence I'll wager on the monkey."**). As Émile Borel has reminded us most convincingly, [10] all such money games are structurally biased in favor of the organizer; and the probability laws ensure that the bank in a casino, the government coffers in a lottery, or the Swiss accounts for a local Mafia (*jogo do bicho* or others) are inevitably the winners, by a hefty margin.

This URL seems a bit iffy again (was when I first tried it more than a year ago now) but luckily google caches come in handy for these cases:

<http://206.168.15.216/ABH-Metaphor%2011%20-European%20Metaphors.html> -- 101K -- THE REIGNING SOCIAL METAPHORS OF EUROPEAN CULTURE THE GAME METAPHOR The game metaphor has always been an intrinsic part of Western thought. It can be found in the simulation of Greek drama in which the games of the gods were witnessed by mere mortals; and it is also evidenced in the casting of the dice among the *populi vulgari*. It is also seen in the reading of the

Tarot or in the interpretation of the Nordic Runes. This concern for games was so endemic to European thought that Johan Huizinga (1955: 4) considered it to be a cultural trait. This claim was carefully substantiated and further articulated by Roger Caillois. He also considered play to be a cultural element, but he found Huizinga's focus to be too narrow. His revision and reclassification of games led to the four major types of games outlined in this article: *agon* (games of competition), *alea* (games of chance), *mimesis* (games of mimicry), and *ilynx* (games of vertigo). More recently, the game metaphor has resurfaced as a major framework within the philosophy of Ludwig Wittgenstein. He considers logic to be a *Sprachspiel* (a language game). In mathematics, the tossing of coins led to the development of probability theory, a mathematical game. **Hence, the game metaphor continues to dominate Western thought.** Huizinga (1955) argued that it is because of play that one is able to transcend the immediate needs of life and to pretend.

Anthropologist such as Victor Turner (1969) would agree. He is interested in cultural rites and rituals. He sees rituals as social dramas which imitate some cosmic or mystical event, a happening. Hence the use of masks in Greek drama. One wears a mask to become another person. One wears a mask to participate in a cosmic happening. In drama, one understands this event by acting it out. He comes to identify with it. A rite is a *dromenon*, something which is acted out. The event was present. Later attempts to re-enact the event make it present again. The mystical repetition becomes a re-presentation. Huizinga argues that play differs in some regards from social drama. In drama and ritual one acts out the event (a *methetic act*). In play, on the other hand, one merely imitates or copies life. It is an illusion, cf. Latin *in+ludo* "in play."

Roger Caillois (1979) dispensed with Huizinga's distinction between acts and simulations and reclassified games into a continuum ranging from *ludus* (games that require skill and patience) to *paidia* (childlike games, games without control, uncontrolled fantasy). His reclassification is theoretically interesting in some regards and disturbing in others. In discussing *Agon* (games of competition), he merely reiterates what Huizinga has stated. His inclusion of *Alea* (games of chance) is informative because he acknowledges that there are cultures that see life in such fatalistic terms. For them, the game of life is aleatic. The discussion of *Mimesis* (games of mimicry and simulation) is interesting also because it naturally leads one to the metaphor of the stage. However, Caillois does nothing with this implication. He implies that such games are used as an escape and yet war games are definitely mimetic. However, they do not function as escape mechanisms. Finally, the classification of games in pursuit of vertigo is also an engaging concept because of the existence of cultures which practice this search for voluptuous panic as a way of life. Such groups range from the Sufis to modern drug cultures. They seek to destroy reality in the hope that it will lead to an escape into another kind of reality. However, such games represent a desire for disorder and chaos.

perhaps a (small) few pieces from part VI of a giant textsite mixing elizabethan times with treelore, myths and astrology to close this section??? (((it reminds me of Leslie Fiedler's treatment in "the stranger in Shakespeare" Contents: I The Elizabethan Age II Essex III Marlowe IV Raleigh V Donne VI The Idea of the Goddess [tkline.freeseerve.co.uk /Webworks/Website/Stormgoddess.htm](http://tkline.freeseerve.co.uk/Webworks/Website/Stormgoddess.htm): And Caliban, who is the corrupted spirit in man, the fallen one, the brute, the potential rapist, the outsider, the 'natural' man. Caliban, who knows 'all the qualities o' the' isle', the dreamer whose irrational dream is full of rare music and lulling voices sounding in a paradise garden, will be 'wise hereafter and seek for grace.'

Prospero's 'imperialist' mercy allows even Caliban to be part of the community if he behaves. Prospero's severity is also Donne's, who calls beggars 'dogs' and 'vermin', and for whom the 'herd of vagabonds' are not fit for charity being outcasts from' the household of God'. Donne, who argues 'an inherent right in the Christians, to plant Christianity in any part of the dominions of the infidels, and consequently, to despoil them even of their possession, if they oppose such plantations.' All shall conform, accept, obey the laws, constrain their thoughts. It is the cold message of Puritanism, which will become the cold message of Protestant imperialism, and parliamentary democracy. It is a clinical, scientific coldness, Prospero's coldness, the coldness of Plato' Republic. And just as reading Plato leaves an uncomfortable chill behind, so does The Tempest. So does a reading of Donne's sermons. Compassion, and pity, and mercy, and love are still there, but they do not somehow seem to mean what they meant. The reconciliation is still a defeat for the Goddess. sacredearth.com ethnobotanical list, books, travels, etc servtech.com/~grugyn/bk147.htm another Robert Graves admirer who weaves a lot of politics into his work (with a tinge if not taint of conspiracy and semi-semitism: [/2c-awl.htm](http://2c-awl.htm)

Where are my hits coming from?

Greetings from Weblogs.Com! We have a great new feature for all UserLand-hosted Manila sites, including those hosted on Weblogs.Com.

It's called the "Referers Page" -- and it answers the question, where are my hits coming from? It lists all the "referers" of hits that came into your site in the last 24 hours. You can see how the search engines are indexing your site, and may get some ideas about who is reading you, and how they found you. To find your Referers Page, start with the URL to your website, for example: <http://soap.weblogs.com/> and add "stats/referers" to the end of the URL, as follows: <http://soap.weblogs.com/stats/referers> This works with any UserLand-hosted Manila site, not just mine and yours. Be careful though, you can easily waste hours if not days crawling around the Web to see how things are linked together. I hope you like this feature, we have many more on the way, new stuff that only works in Manila. Our goal is to ! keep moving, to make it the most interesting and powerful and fun writing environment on the World Wide Web. Dave PS: I know that "referers" is mis-spelled. Somewhere at the beginning of the Web, one of the browser implementors mis-spelled it, and it's been spelled that way on the Web, ever since. "It's

even worse than it appears." nicci, and the **Saul Williams** (see issue before last) poems I sent are but a shadow of the ones in the movie which he did looking lots more youthful (10 years or so ago); I'd be thrilled to find the text of that climax of the move (for me at least; haven't been able to though). PS: may our repartees keep this sudden upbeat up cross 'quatorcaressingly. Love you as ever Piet

And in that time he became sensible of her astonishing, and to him it seemed miraculous, improvement n all that renders mind the equal of mind - miraculous for he guessed not the influence that makes miracles its commonplace. This passage is from the last Bulwer Lytton book I read 'Night and morning'. It is masterful as always; no wonder he was a bestseller and reading public favorite (see a recent TLS). He answers to the need for substitution, betrayal sweetening make believe, hi-lights in cross-generational flashes. Soap as absorbing as the flicker screen ones will never be for me.

x|||x|||x|||x||| gristmagazine.com: FOR GOODNESS HAKE about fishpop. decim. in the Northsea and elsewhere CONGREGATULATIONS! A growing number of religious leaders are getting active in environmental issues, urging their congregations to be good stewards of the earth. This fall, leaders in 16 states have

joined an interfaith effort aimed at educating people about climate change. Last year, a group of "Redwood Rabbis" fought to save old-growth trees in California's Headwaters Forest, and next year eight Catholic bishops in Oregon, Washington, and British Columbia plan to issue a pastoral letter on caring for the Columbia River. "Our goal is to bring the mission of care for God's creation more fully to the heart of religious life," said Paul Gorman, head of the National Religious Partnership for the Environment, which brings together Roman Catholic, Jewish, Protestant, and evangelical Christian groups. (aren't their wordplay headings the joy of the day??? It's a confirmative action in the sense that it gives one the confidence and ability to exert some tweakin'fluence over the otherwise purely tragic events)

29 August 2000

more meanwhile...

Everything competes for my attention. There's people looking at our roof, at the mill's wheel, at our room for rent. There's Willem van Gogh's Casa de la Musica compilation cd I received today which introduces me to the likes of Ruben Blades, Trilok Gurtu, Dexter Johnson and his Afro-Cubans, Candido Dupuy y su Son Diamante, Maria Teresa Vera and Destiny's Child featuring Wyclef Jean...

Then there's topics out there that need *serious* scrutiny and thinking over their effects/affordances (eg. [voteauction](#)). There's a trip to Lyon ahead tomorrow, and more guests coming in upon my return. Rock steady. There's email to be replied. These are only the fun things to attend to. Summer's over. Wait until the great bureaucracies of this world wake up to a new season of victories over Joe Doe. And go after his moulin, his car, his papers—instead of solving some of the world's true problems, like fading morals and other sellable items. Ha ha indeed. *The joke's on us.* Let's have fun and go underground.

28 August 2000

meanwhile...

I had hardly any sleep Sa/Su. Got up 21 hours ago at 3:30am and started to design a small sheet which I will take to Lyon next Wednesday when I'll visit Andrea and Francine at their artists' residency. Hope to stay a couple of days. The lay-out had me back in Quark: how much you get out of touch with a program... it's a completely different trip from HTML authoring and browsing, jeez I forgot. OTOH: during my typography studies I had to space VAANDELDRAGER in capital lead type (I'm not *that* old, but went to a traditional school, that's why, ok?) Then came Letraset, for neat spacing and less weight (NPI). So I'm still thinking over the nano-corps' *O growth, n replication* strategy. And I picked up re:reading Brian O'Doherty's 'Inside the White Cube'. Smart, originally from 1976, in his 1986 afterword he says: "Most artists become time-bound to the moment of their greatest contribution, and are not allowed out of it. The present rushes by, leaving them curating their investment—sad imperialists of the esthetic self. Nor is any change tolerated; change is considered a moral failure unless its morality can be convincingly demonstrated."

I'm writing the darn Lyon flyer like I'm writing for NQP. Easy. Nonchalantly precise. But even when it is only to be printed out in a couple of copies, still it has this 'print' thing about it. *I'll be wasting paper on it...* I would not like send out 9 different copies of it, eg. personalized, too the G-pack. No? While I could do this in email, or even in web 'pages'. Where rests the border between publishing and writing someone in person? It's not in the edition number only, rather in the medium. Like I imagine playing a song to tape it to send it around or record it to reproduce it, is different than playing it ad hoc in front of your friends, or object of fondness.

26-27 August 2000

the culture is our nature suite

I really love this little sucker of a hot folder. Gives me all kinds of good vibes (courtesy: a [nano-corps](#) discussion list)

technology we'll be remembered by

My kids will remember me at my computer. Like I remember my grandmother stirring up the stove in the early morning, my grandfather asleep on the couch, my father in his papers or the paper, my mother at the cooker, the piano or the drawing board; me at the screen will be a prime memory for R+r. Of all the things you remember your parents by and for, be it fondly or not, there are some prime images that stand apart, from whatever the qualities of one's relationship to one's parent were. (I remember my uncle Cees Jouwersma, whose visit from Strassbourg with his dear friend Brigitte I deeply enjoyed a few weeks ago, kicking an apparently rotten onion on the [Texel](#) (site sez: from 28 August on a faster server) beach, flinging the onion gunge all over our little company, you know, back in the old age when onions were still quietly rotting away on the beaches). Early morning as a kid you always saw the grownups' backs first, when they were doing some adult thing and you sneaked up behind them. Do I want R+r to remember me at my computer, my back turned to the door which they usually pass? How to change that image. I'd always prefer it to them remembering me glued to a cell phone. Gil they'll probably remember at the other end of a proper tool, in the (vegetable) garden. Which makes good balance to remember this period of our lives, their introduction to memory.

oh mylieu! au milieu

My brand-new Hachette French dictionary, *phonétique, étymologique, précis grammatical*, bought at a local supermarket during our recent royal trip, gives the etymology for *milieu*: from *mi* (middle) and *lieu* (place). Our milieu is that which we are surrounded by or, that which we are in the middle (not necessary at the center) of. Ecology (Gr. *oikos*: house, family, and *logos*: word, treatise) determines us in an active mutual relationship to our milieu, and all its other inhabiting species. Our cultural milieu's ecology is how we interact with the '[stuff that surrounds us](#)', and with its other users and performers who, like ourselves, bring that stuff alive by informing it. We inform our milieu as vitally as it informs us.

Local currency: '[personal environmental activism](#)' is our [prime concern](#). Pair that to [Paul](#)'s recent link to 'nano-corporations': when 'small is beautiful' meets '[being](#)

ruthlessly small'.

(LEFT UNFINISHED)

zero growth, n replication? From critical mass to critical momentum

If replication replaces growth as a 'business' strategy for nano-corporations, what can we expect to see emerge in the corporate milieu? Lots and lots and lots (that's infinite growth... at an explosive rate) of connected interests, forever shifting focus in interaction, and changing value in transaction, changing patterns with restless concentrations of activity, smart trade enhanced by computer supported realtime never-stop communication, all in search of a profitable momentum, when any value (measured in an infinite diversity of information currencies) differentiation's balance drives partners to end negotiations and have the transaction end, only to allow another bidding to start.

Yet the desire for domination drives the need for convergence. 'Those in the grow' will want to invest their power. One of the big questions of the landscape of diversification and fragmentation is whether or not the many will outnumber the few, whether the ruthlessly small will gain momentum over the arrogantly big—there's a chance here, with intricately networked rapidly moving small players, but they need some kind of organisation, a *devoir*, beyond the goal of survival as small, but strong. *Otherwise we're only looking at the relentlessly vulnerable.*

Zero Growth for survival? **critical mass -> critical momentum**

ruthlessly small bears on the road

What pleads against 'ruthlessly small'? First and foremost: the spell of growth, its charming and impressive image, the magic power of big; then: arrogance, elitism, privilege, the creative drives of competition, and other human preoccupations.

25 August 2000

capital observations: space, money and wit, generosity, soep en land

gaining space

First thing today, I gained a space around the source's

water tank, by trimming and weeding the far west corner of the North Garden. Up to 6ft I cut away all lower branches of an as of yet unknown bush/tree (actually sculpting it from an insignificant shrub into a dramatic tree), thus creating a space under and around it, letting in air and light and freeing a volume that could easily house a table and some chairs, with a view on the mill's pond and the best evening oranges and greens and reds. Then for the fern, ditto. Later in the fall I'll be trimming more, gaining more space for a winter as naked as possible. Joes and Marjolein in our absence had cleaned big areas, so we continue their good work. *And we dug some real fine gardens on our trip.*

money and wit: call for capital

Over the past week we saw the best art and architecture and *genius loci* that money and wit could buy over the past centuries: the Loire et al valleys' castles and gardens. Their stories are the stories of ideas, change, wit and taste, money and power, which make Bill Gates' wonderland household the sign of degeneration and a laughing stock. *Money and wit used to buy art and move mountains. May those who have it today spend it to that effect.* Don't blow it on the media.

toys

The best snail mail in the box when I returned was the fat brown envelope that smiled 'toys' at the customs. *It jingled when shaken.* It contained the dream stuff one can apparently live without in San Francisco—or indeed potlatch to our family. Treasury. R+r looted most of it up to their room and arranged it around their bed: cowboys and indians, flies, dinosaurs, jumping bugs, a flat glass pebble they use to transmit kisses to the sender (because it is a lot like the pebble Truus gave them when we left Amsterdam, telling them it would send off any kisses they would give it to her). The bird of course I confiscated immediately. The key I found in the dark on the terrace tonight: it is on the move, I think Roemer takes it places to try to fit it. Some of the *petite* animals joined the library kingdom and stare at the books from the fireplace's mantle. Thank you and *bon voyage* from the four of us, Judith.

soep en land

I was without web access the first half of the day. Shame on wanadoo. I phoned Paul to be comforted and to hear

whatsup. As usual he supplied water to drink. My disconnectedness helped the garden come about. I will be out there a lot with my favorite season fast approaching and my current taste for taming nature going wild. Also my Mavica will return from the doctor, 2 September, so I expect to give lemoulindumerle.com a big swing. Then moerstaal is waiting for more *stahoogte*, *rijksambtenaar*, *paardentram*, *tafelschikking*, *draadeinde*, *tevens*, *weleer* and *gedoe*. It's all here. And I'm culturally challenged to the teeth. Even QS Serafijn appeared in my dream yelling 'soep en land!' at me ('soup and land!'), jumping out of a shabby white van... (the white cube?). Joke when she was here showed me his [Omission](#) has a website of its own now. I'll sink into that one for you, later. *Soep en land to you QS!*

17 August 2000

Le Moulin du Merle

Tomorrow we'll leave the moulin to Joes, Marjolein and Linde (arriving tonight), and R+r, to go on a fact finding trip—the two of us. Seems like a real long time since we spent longer than 48 hours together, sans R+r. Today we're cleaning and I'm writing the Moulin Manual which still lacked. Simple instructions and sound advice. Where to find the best bread, cheese and wine in the valley. And how to get on or off the grounds, when the main electrical gate refuses to open, due to the heat, or some electrical failure. Things like that.

16 August 2000

more simple instructions

click here

It is the simplest of all, and people love it. Those who

would otherwise take no orders, give in, joyfully. It's the true one-order basis of the information age. Repeat [click here](#). What kind of production can we anticipate from the one-click crowd, in the upcoming age, beyond following that one order? Should we be optimistic about the level of democratic creativity: a splendid rising, spreading, thriving of authentic content? Will people have anything to say, beyond: 'I click'? Are they expected to, and what would it be that they will be saying? Is there anyone out there or in here who really cares to prepare the people for some kind of creativity? Something to say? And how to put it? Or who to share it with? What to charge for it, and why? When did you last give some *simple instructions*, motivate people to use the new media, share some clicks? Well? *There's more lag out there than we're willing to think about*. And without our help it isn't gonna get any better.

15 August 2000

candid isolation: tomorrow's home made

the manual that built Jack

In order to keep pace with informational accessibility, material distribution has to find shortcuts to the household asap. Material distribution has to follow the distribution of information—not the other way around, like it used to (when the manual came in the box with the apparatus, while tomorrow you'll download the manual, which will then fabricate the apparatus for you, *in situ*. No more boxes). The shortest cut would of course be on site materialization, or manufacturing, in the individual household, instead of heavy duty transport: downloading not information to be browsed on a screen, but instructions to be fed to a production unit at home. Such facilities should be researched with great effort, and probably are. I'm very interested to know of examples of 'goods' produced at home in such a way, and I don't mean [rapid prototypes](#) here, but immediately *usable goods*. Fashion items (the IP knitting machine?) would be the first thing I could think of. What else is prepared out there that can be sent down the wires?

Upon first search it appears that the process is most commonly referred to as [telemanufacturing](#).

simple instructions

Take an x amount of material A, act B on it, voilà the finished product C. Repeat n times for n products. A spinning wheel in every household, to force the British fashion industry on its knees. [Remember Ghandi's khadi.](#)

pourrissement oblige, decay obliges

Jacob van Ostayen, active ca. 1640: Still life with flowers, birds and cherries, 1643 (private collection)

13 August 2000

greedy breathing man, inapt promoter

Sunday morning early. We progress by lots of small steps these days. We move around and about a moulin, *très datscha*, we move back and forth from it. With Joke still here and other friends coming today and tomorrow and Thursday, we move beds and pillows and sheets and thin blankets up and down. The summer heat makes us move in and out of the shadow, in and out of the water. The

house remains open all day and night as we cross it, wake it, sleep it. Outside, the *vide greniers*, 'attics emptied', this summer spectacle of the French countryside, its people's material coming out, makes us move to Tamnay en Bazois, Varzy and Champlemy and other small villages, to browse whatever families rid themselves off from their households these days. It seems hard for them to decide what to throw out, there's no logic. *Markets are deeply sentimental*. Yesterday's and the day before yesterday's books and goods and outmoded everything, all waste, without having been used. The other day in Corbigny... so I didn't buy, just drifted. At her shop in the former church, Simone gave me Rainer Maria Rilke POÉSIE, which apparently waited for me on her shelves, translated by Maurice Betz and published in 1947 by Éditions Émile-Paul Frères, as a present. At home the book fell apart on pages 176-177, right after 'Portrait du poète par lui-même'. Among the poems he wrote in French (1923-1926) is 'Dans la multiple rencontre':

Dans la multiple rencontre
faisons à tout sa part
afin que l'ordre se montre
parmi les propos du hasard

Tout autour veut qu'on écoute,—
écoutons jusqu'au bout;
car le verger et la route
c'est toujours nous!

These are days of endless *propos du hasard*, in which multiple orders come and go. Rilke in the long 'Verger' means:

Nom clair qui cache le printemps antique,
tout aussi plein que transparent,
et qui dans ses syllabes symétriques
redouble tout et devient abondant.

The 'verger', the abundant orchard ('vers quel soleil gravitent / tant de désirs pesants?') is too rich for the poor poet, greedy to breathe in all, 'écoutons jusqu'au bout', at the end of his life.

right in front of our eyes

'Everything' which 'doubles in symmetry', in front of our abusive eyes, in a desperate attempt to become invisible in us, administered in our language, multiplies again and again in our experience, and in our experience of language. *Experience, the multiplier*; not even communication or expression (or 'reflection'), already experience raw, *sensations in their prime effects*, saturates us. Expression and communication of experience are man's clumsy attempts to throw off experience, in per-formed memories and impressions and insights, preoccupations not at all meant to be shared, to be enjoyed with others or to promote them, as much as first and foremost to get them out of oneself and out of one's lonely nightmares and make them disappear completely—to make way for new and unavoidably confusing ones.

The final form for us, the ultimate form at the end of chaos: *an order out of us*, ordering intoxicating experience out of us, to protect ourselves from it, allowing to throw off experience and make it disappear from our world, from the deadly monumental, into the immaculate invisible—this is all we do, breathe in and out, without a single effect as far as solving any of the known and unknown problems of life, only aggravating these by dumping our sorrows on it, forever wasting.

increasing returns

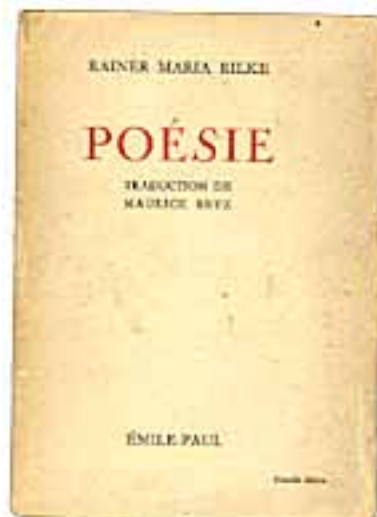

All this taking in and this throwing off, propelling different meanings in today's media, today's interests being irremediably unfit to ever fix in a final word (when all remains process and search), might allow us just so to make way to a new breathing of the eternal return of experience, to returning angels, to returning intoxication as to their meaningful consumption and production.

Those who claim today's media cannot ever indulge in the luxury of deeply processing experience (consume, produce, breathe) at all levels of suffering, because of it lacking material shape and tangibility—them miserable downsizers are sadly missing the point. Let them trade their own petty experiences *entr'eux*, let them be emptied by a culture industry for their sex and drugs and other substitute religious appetites, for ever catered to them under the enslaving laws of industrial

customization. With all their wonders, new media are no revolutionary democratic emancipation machines. Theirs are very old rules, the rules of man's many faces, showing vital passion for every good and evil it can lay its hands on, to realize and maintain the ultimate power for man's cause and capital and ego.

New immediacy media, their ubiquitous presence and real time momentum, their 24/24 streaming availability for consumption-production symmetry, their individual publishing control—these first rate technological specifics might as well stimulate a breathing interaction with experiential reality at all levels of representation, multiplied to the abundance. Rather than feeling invited to 'eat as much as you can', we should invite ourselves and others to produce as much fertilizing fragments as we can, to till the land for a new search reality. If these media allow us to throw off our experience in such a way as to provide multiple learning-to-perform opportunities in the interaction, we will have found our Eden orchard in which no fruits ever will rot away in oblivion.

To bring to mind once more Rainer Maria Rilke: the orchard and the road, they are always us!, *le verger et la route c'est toujours nous!*

allegory

- Walter Benjamin (...) showed that allegory was not a failed symbol, or an abstract personification, but a power of figuration entirely different from that of the symbol: the latter combines the eternal and the momentary, nearly at the center of the world, but allegory uncovers nature and history according to the order of time. It produces a history from nature and transforms history into nature in a world that no longer has its center. If we consider the logical relation of a concept to its object, we discover that the linkage can be surpassed in a symbolic and an allegorical way. Sometimes we isolate, purify, or concentrate the object; we cut all its ties with the universe, and thus we raise it up, we put it in contact no longer with a simple concept, but with an Idea that develops this concept morally or esthetically.

Sometimes, on the contrary, the object itself is broadened according to a whole network of natural relations. The object itself overflows its frame in order to enter into a cycle or a series, and now the concept is what is found increasingly compressed, interiorized, wrapped in an instance that can ultimately be called 'personal.'

(from: Gilles Deleuze, 'The Fold; Leibniz and the Baroque')

11 August 2000

more is less

the golden goose of information: once you've grabbed her, or those who went before, you're *included in the search party* and no geek wizard of the woods will ever come to again disengage you from her tail feather for sure

for R+r

once just-in-time, a fairy tale in search of an author

Long years since the kings understood all their narrative to be fragmentary in nature, it has become common knowledge, shared by the many. How exactly this happened; as a result of which spectacular (some impressionable but under-attentive souls think 'revolutionary') escape from history, will remain unclear—isn't it kinda per-verse, irresponsible indeed of those in (narrative) power (and probably not in their advantage either), to leave the uneducated masses disengaged and dumbing down by the shreds, puzzled at the absence of rule, the absence of warp and weft in the web? Anyway, as the story goes so it happened, while some conditions in the fragmentation fabric are a changing again, for the kings, for their daughters, for the masses, for the geese, for the everyone and everything. BTW Deleuze, on Whitman, wrote some disturbing bits about the fragment 'being' innate American and the 'composition' being innate European, which' discussion can wait, but could hold a lesson for the future of informatic license and competing intelligences at both sides of the Atlantic, ha!. I took R+r to old school France for good reason! It is kings' territory, if ever there was one, never mind the republic it is today, never mind all other republics. We all get the fairy tales we've been soliciting, just-in-time when we deserve'm, that is. Reverse your royal ideals today. *Go with the kings, kids.*

no fix media

Networked media's *searchability* promises a new whole at every in-stant, a new golden goose to spring up at whim keystroke, infinite new wholes, constructed with the active participation of those who individually search the entirety of an expanding Literature. Since its expansion is of an accelerated kind, it cannot be stopped and fixed in any way. It's amok fairy tale this time. All maps run immediately out of memory as soon as they take shape. *They crash on change.* All representations of wholeness are as ideological (as ever)—exciting (who said 'dice-like') coups, with no relation to the Literature as such, as to be able to summarize it, index it, rule it down, either by its content or in any quantifiable way. But didn't we always love our maps exactly for their inaccuracy, which left us the *freedom* to inform *them*, instead of the other way around?

Every halt-in-whole expands the map, adding information to the Literature, thus pumping up its volume, ruining any illusion of singularity, somewhat like what the artwork does in Eliot's individual talent tale. Information's individual talent, if you wish, is that every bit is no singular appearance, but bears upon the existing and future Literature, infecting its own identity in its very emergence. (I've mentioned Eliot because of the following quote, not to further a suggestion of quality of what I call the Literature, grosso modo after [Ted Nelson](#) cs: the entirety of a unstoppable growing body of connected files, stored and processed and distributed in an open hypermedia network, at any given moment). Despite the capital L, there's no proof nor promise of Quality in this Literature whatsoever. After all, there's no such thing as Free Literature:

- what happens when a new work of art is created is something that happens simultaneously to all the works of art which preceded it. (...) I mean this as a principle of aesthetic, not merely historical, criticism.

tale of the searching temper

The information age brings the tale of the searching temper. Sense of search is our only promise, the only informing security in the new dynamic Literature. Search will be the *ruling mode of information exchange*, both for

its ('passive') enjoyment, as for its ('active') (re-) production. Moreover, in terms of information exchange, active and passive are invalid qualities. Smelly browsing nostalgia. Information will be guided only by the searching temper, or be reduced to immobilized mapable data, historia. Searching temper, totally aware of the 'everything you search can be searched against you' paradigm, produces the Literature with every consumption of it.

when more is less

There's less weeds in the garden if you are familiar with their qualities, less people in the crowd if you can name them, even if you do not know their names proper. The more information, the less data. *Data turn into information, by becoming invisible in it.* Even when data growth is absolute with information growth, it is its refined state 'inside' information, which reduces its raw presence. Early this morning when uprooting nettles I added information to my garden, including myself in active participation, and turning this wasteland of a relationship into a learning opportunity, a land-scaping man shaping exchange. Without me this piece of territory would contain only data, and lots of it—with my active presence, information emerged. When I searched the green for roots I manipulated data for information, in order to let more become less, by adding the value of recognition. Not only did I temporary 'clean up' or order a small part of my property, more importantly I learned and taught a lesson to gardening me. If I do not forget, if the weeds do not forget, we moved to a new level together.

More information means less uncertainty (less improbability reducing the chance of information to happen), if only for a short moment and to a limited extent. With the contemporary non-stop production of connected information, without the *noblesse* of a closed loop, without the certainty of isolation, without the freeze frame, every bit of certainty (in received information) changes the existing information before and after it, infinitely, *there is no escape from data searching a searcher to turn into information.* There's no escape from uncertainty in information society. At last we're all free!, and don't we love it!, and as long as possible keep producing our own freedom? To keep adding to it, is the

best guarantee for our freedom to last. (S)he who takes a pause from searching, is imprisoned in a lasting view, frozen in a perspective, bound in a (hi)story, cursed by a spell.

they lived long and happily, ever after information

All the king's men and all the king's horses and all the king's kingdoms and all the king's daughters will blow up into data dust, if there's no clever miller's sons to search for their information. When some day in the future R+r will leave the Moulin they'll know that old school 'search composition' will help them go after the kings' daughters, their kingdoms, horses and men.

- If you cut down that tree in the centre of the wood, you'll find that all the others will fall down by themselves. Have a look in its roots where there's a gift for you!

29 August 2000

more meanwhile...

Everything competes for my attention. There's people looking at our roof, at the mill's wheel, at our room for rent. There's Willem van Gogh's Casa de la Musica compilation cd I received today which introduces me to the likes of Ruben Blades, Trilok Gurtu, Dexter Johnson and his Afro-Cubans, Candido Dupuy y su Son Diamante, Maria Teresa Vera and Destiny's Child featuring Wyclef

Jean...

Then there's topics out there that need *serious* scrutiny and thinking over their effects/affordances (eg. **voteauction**). There's a trip to Lyon ahead tomorrow, and more guests coming in upon my return. Rock steady. There's email to be replied. These are only the fun things to attend to. Summer's over. Wait until the great bureaucracies of this world wake up to a new season of victories over Joe Doe. And go after his moulin, his car, his papers—instead of solving some of the world's true problems, like fading morals and other sellable items. Ha ha indeed. *The joke's on us*. Let's have fun and go underground.

28 August 2000

meanwhile...

I had hardly any sleep Sa/Su. Got up 21 hours ago at 3:30am and started to design a small sheet which I will take to Lyon next Wednesday when I'll visit Andrea and Francine at their artists' residency. Hope to stay a couple of days. The lay-out had me back in Quark: how much you get out of touch with a program... it's a completely different trip from HTML authoring and browsing, jeez I forgot. OTOH: during my typography studies I had to space VAANDELDRAGER in capital lead type (I'm not *that* old, but went to a traditional school, that's why, ok?) Then came Letraset, for neat spacing and less weight (NPI). So I'm still thinking over the nano-corps' *O growth, n replication* strategy. And I picked up re:reading Brian O'Doherty's 'Inside the White Cube'. Smart, originally from 1976, in his 1986 afterword he says: "Most artists become time-bound to the moment of their greatest contribution, and are not allowed out of it. The present rushes by, leaving them curating their investment—sad imperialists of the esthetic self. Nor is any change tolerated; change is considered a moral failure unless its morality can be convincingly demonstrated."

I'm writing the darn Lyon flyer like I'm writing for NQP. Easy. Nonchalantly precise. But even when it is only to be printed out in a couple of copies, still it has this 'print' thing about it. *I'll be wasting paper on it...* I would not like send out 9 different copies of it, eg. personalized, too

the G-pack. No? While I could do this in email, or even in web 'pages'. Where rests the border between publishing and writing someone in person? It's not in the edition number only, rather in the medium. Like I imagine playing a song to tape it to send it around or record it to reproduce it, is different than playing it ad hoc in front of your friends, or object of fondness.

26-27 August 2000

the culture is our nature suite

I really love this little sucker of a hot folder. Gives me all kinds of good vibes (courtesy: a [nano-corps](#) discussion list)

technology we'll be remembered by

My kids will remember me at my computer. Like I remember my grandmother stirring up the stove in the early morning, my grandfather asleep on the couch, my father in his papers or the paper, my mother at the cooker, the piano or the drawing board; me at the screen will be a prime memory for R+r. Of all the things you remember your parents by and for, be it fondly or not, there are some prime images that stand apart, from whatever the qualities of one's relationship to one's parent were. (I remember my uncle Cees Jouwersma, whose visit from Strassbourg with his dear friend Brigitte I deeply enjoyed a few weeks ago, kicking an apparently rotten onion on the [Texel](#) (site sez: from 28 August on a faster server) beach, flinging the onion gunge all over our little company, you know, back in the old age when onions were still quietly rotting away on the beaches). Early morning as a kid you always saw the grownups' backs first, when they were doing some adult thing and you sneaked up behind them. Do I want R+r to remember me at my computer, my back turned to the door which they usually pass? How to change that image. I'd always prefer it to them remembering me glued to a cell phone. Gil they'll probably remember at the other end of a proper tool, in the (vegetable) garden. Which makes good balance to remember this period of our lives, their introduction to memory.

oh mylieu! au milieu

My brand-new Hachette French dictionary, *phonétique*,

étymologique, précis grammatical, bought at a local supermarket during our recent royal trip, gives the etymology for *milieu*: from *mi* (middle) and *lieu* (place). Our milieu is that which we are surrounded by or, that which we are in the middle (not necessary at the center) of. Ecology (Gr. *oikos*: house, family, and *logos*: word, treatise) determines us in an active mutual relationship to our milieu, and all its other inhabiting species. Our cultural milieu's ecology is how we interact with the '[stuff that surrounds us](#)', and with its other users and performers who, like ourselves, bring that stuff alive by informing it. We inform our milieu as vitally as it informs us.

Local currency: '[personal environmental activism](#)' is our [prime concern](#). Pair that to [Paul](#)'s recent link to 'nano-corporations': when 'small is beautiful' meets '[being ruthlessly small](#)'.

(LEFT UNFINISHED)

zero growth, n replication? From critical mass to critical momentum

If replication replaces growth as a 'business' strategy for nano-corporations, what can we expect to see emerge in the corporate milieu? Lots and lots and lots (that's infinite growth... at an explosive rate) of connected interests, forever shifting focus in interaction, and changing value in transaction, changing patterns with restless concentrations of activity, smart trade enhanced by computer supported realtime never-stop communication, all in search of a profitable momentum, when any value (measured in an infinite diversity of information currencies) differentiation's balance drives partners to end negotiations and have the transaction end, only to allow another bidding to start.

Yet the desire for domination drives the need for convergence. 'Those in the grow' will want to invest their power. One of the big questions of the landscape of diversification and fragmentation is whether or not the many will outnumber the few, whether the ruthlessly small will gain momentum over the arrogantly big—there's a chance here, with intricately networked rapidly moving small players, but they need some kind of organisation, a *devoir*, beyond the goal of survival as small, but strong. *Otherwise we're only looking at the*

relentlessly vulnerable.

Zero Growth for survival? **critical mass -> critical momentum**

ruthlessly small bears on the road

What pleads against 'ruthlessly small'? First and foremost: the spell of growth, its charming and impressive image, the magic power of big; then: arrogance, elitism, privilege, the creative drives of competition, and other human preoccupations.

25 August 2000

capital observations: space, money and wit, generosity, soep en land

gaining space

First thing today, I gained a space around the source's water tank, by trimming and weeding the far west corner of the North Garden. Up to 6ft I cut away all lower branches of an as of yet unknown bush/tree (actually sculpting it from an insignificant shrub into a dramatic tree), thus creating a space under and around it, letting in air and light and freeing a volume that could easily house a table and some chairs, with a view on the mill's pond and the best evening oranges and greens and reds. Then for the fern, ditto. Later in the fall I'll be trimming more, gaining more space for a winter as naked as possible. Joes and Marjolein in our absence had cleaned big areas, so we continue their good work. *And we dug some real fine gardens on our trip.*

money and wit: call for capital

Over the past week we saw the best art and architecture and *genius loci* that money and wit could buy over the past centuries: the Loire et al valleys' castles and gardens. Their stories are the stories of ideas, change, wit and taste, money and power, which make Bill Gates' wonderland household the sign of degeneration and a laughing stock. *Money and wit used to buy art and move mountains. May those who have it today spend it to that effect.* Don't blow it on the media.

toys

The best snail mail in the box when I returned was the fat brown envelope that smiled 'toys' at the customs. *It jingled when shaken.* It contained the dream stuff one

can apparently live without in San Francisco—or indeed potlatch to our family. Treasury. R+r looted most of it up to their room and arranged it around their bed: cowboys and indians, flies, dinosaurs, jumping bugs, a flat glass pebble they use to transmit kisses to the sender (because it is a lot like the pebble Truus gave them when we left Amsterdam, telling them it would send off any kisses they would give it to her). The bird of course I confiscated immediately. The key I found in the dark on the terrace tonight: it is on the move, I think Roemer takes it places to try to fit it. Some of the *petite* animals joined the library kingdom and stare at the books from the fireplace's mantle. Thank you and *bon voyage* from the four of us, Judith.

soep en land

I was without web access the first half of the day. Shame on wanadoo. I phoned Paul to be comforted and to hear whatsup. As usual he supplied water to drink. My disconnectedness helped the garden come about. I will be out there a lot with my favorite season fast approaching and my current taste for taming nature going wild. Also my Mavica will return from the doctor, 2 September, so I expect to give lemoulindumerle.com a big swing. Then moerstaal is waiting for more *stahoogte*, *rijksambtenaar*, *paardentram*, *tafelschikking*, *draadeinde*, *tevens*, *weleer* and *gedoe*. It's all here. And I'm culturally challenged to the teeth. Even QS Serafijn appeared in my dream yelling 'soep en land!' at me ('soup and land!'), jumping out of a shabby white van... (the white cube?). Joke when she was here showed me his [Omission](#) has a website of its own now. I'll sink into that one for you, later. *Soep en land to you QS!*

17 August 2000

Le Moulin du Merle

Tomorrow we'll leave the moulin to Joes, Marjolein and Linde (arriving tonight), and R+r, to go on a fact finding trip—the two of us. Seems like a real long time since we spent longer than 48 hours together, sans R+r. Today we're cleaning and I'm writing the Moulin Manual which still lacked. Simple instructions and sound advice. Where to find the best bread, cheese and wine in the valley. And how to get on or off the grounds, when the main

electrical gate refuses to open, due to the heat, or some electrical failure. Things like that.

16 August 2000

pourrissement oblige, decay obliges

Jacob van Ostayen, active ca. 1640: Still life with flowers, birds and cherries, 1643 (private collection)

13 August 2000

greedy breathing man, inapt promoter

Sunday morning early. We progress by lots of small steps these days. We move around and about a moulin, *très datscha*, we move back and forth from it. With Joke still here and other friends coming today and tomorrow and Thursday, we move beds and pillows and sheets and thin blankets up and down. The summer heat makes us move in and out of the shadow, in and out of the water. The house remains open all day and night as we cross it, wake it, sleep it. Outside, the *vide greniers*, 'attics emptied', this summer spectacle of the French countryside, its people's material coming out, makes us move to Tamnay en Bazois, Varzy and Champlemy and other small villages, to browse whatever families rid themselves off from their households these days. It seems hard for them to decide what to throw out, there's no logic. *Markets are deeply sentimental*. Yesterday's and the day before yesterday's books and goods and out-

moded everything, all waste, without having been used. The other day in Corbigny... so I didn't buy, just drifted. At her shop in the former church, Simone gave me Rainer Maria Rilke POÉSIE, which apparently waited for me on her shelves, translated by Maurice Betz and published in 1947 by Éditions Émile-Paul Frères, as a present. At home the book fell apart on pages 176-177, right after 'Portrait du poète par lui-même'. Among the poems he wrote in French (1923-1926) is 'Dans la multiple rencontre':

Dans la multiple rencontre
faisons à tout sa part
afin que l'ordre se montre
parmi les propos du hasard

Tout autour veut qu'on écoute,—
écoutons jusqu'au bout;
car le verger et la route
c'est toujours nous!

These are days of endless *propos du hasard*, in which multiple orders come and go. Rilke in the long 'Verger' means:

Nom clair qui cache le printemps antique,
tout aussi plein que transparent,
et qui dans ses syllabes symétriques
redouble tout et devient abondant.

The 'verger', the abundant orchard ('vers quel soleil gravitent / tant de désirs pesants?') is too rich for the poor poet, greedy to breathe in all, 'écoutons jusqu'au bout', at the end of his life.

right in front of our eyes

'Everything' which 'doubles in symmetry', in front of our abusive eyes, in a desperate attempt to become invisible in us, administered in our language, multiplies again and again in our experience, and in our experience of language. *Experience, the multiplier*; not even communication or expression (or 'reflection'), already experience raw, *sensations in their prime effects*, saturates us. Expression and communication of

experience are man's clumsy attempts to throw off experience, in performed memories and impressions and insights, preoccupations not at all meant to be shared, to be enjoyed with others or to promote them, as much as first and foremost to get them out of oneself and out of one's lonely nightmares and make them disappear completely—to make way for new and unavoidably confusing ones.

The final form for us, the ultimate form at the end of chaos: *an order out of us*, ordering intoxicating experience out of us, to protect ourselves from it, allowing to throw off experience and make it disappear from our world, from the deadly monumental, into the immaculate invisible—this is all we do, breathe in and out, without a single effect as far as solving any of the known and unknown problems of life, only aggravating these by dumping our sorrows on it, forever wasting.

increasing returns

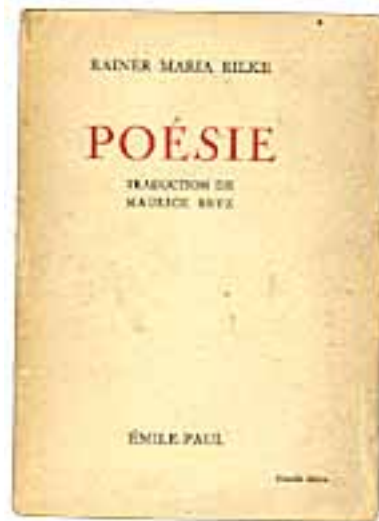

All this taking in and this throwing off, propelling different meanings in today's media, today's interests being irremediably unfit to ever fix in a final word (when all remains process and search), might allow us just so to make way to a new breathing of the eternal return of experience, to returning angels, to returning intoxication as to their meaningful consumption and production.

Those who claim today's media cannot ever indulge in the luxury of deeply processing experience (consume, produce, breathe) at all levels of suffering, because of it lacking material shape and tangibility—them miserable downsizers are sadly missing the point. Let them trade their own petty experiences *entr'eux*, let them be emptied by a culture industry for their sex and drugs and other substitute religious appetites, for ever catered to them under the enslaving laws of industrial customization. With all their wonders, new media are no revolutionary democratic emancipation machines. Theirs are very old rules, the rules of man's many faces, showing vital passion for every good and evil it can lay its hands on, to realize and maintain the ultimate power for man's cause and capital and ego.

New immediacy media, their ubiquitous presence and real time momentum, their 24/24 streaming availability for consumption-production symmetry, their individual

publishing control—these first rate technological specifics might as well stimulate a breathing interaction with experiential reality at all levels of representation, multiplied to the abundance. Rather than feeling invited to 'eat as much as you can', we should invite ourselves and others to produce as much fertilizing fragments as we can, to till the land for a new search reality. If these media allow us to throw off our experience in such a way as to provide multiple learning-to-perform opportunities in the interaction, we will have found our Eden orchard in which no fruits ever will rot away in oblivion.

To bring to mind once more Rainer Maria Rilke: the orchard and the road, they are always us!, *le verger et la route c'est toujours nous!*

allegory

- Walter Benjamin (...) showed that allegory was not a failed symbol, or an abstract personification, but a power of figuration entirely different from that of the symbol: the latter combines the eternal and the momentary, nearly at the center of the world, but allegory uncovers nature and history according to the order of time. It produces a history from nature and transforms history into nature in a world that no longer has its center. If we consider the logical relation of a concept to its object, we discover that the linkage can be surpassed in a symbolic and an allegorical way. Sometimes we isolate, purify, or concentrate the object; we cut all its ties with the universe, and thus we raise it up, we put it in contact no longer with a simple concept, but with an Idea that develops this concept morally or esthetically.

Sometimes, on the contrary, the object itself is broadened according to a whole network of natural relations. The object itself overflows its frame in order to enter into a cycle or a series, and now the concept is what is found increasingly compressed, interiorized, wrapped in an instance that can ultimately be called 'personal.'

(from: Gilles Deleuze, 'The Fold; Leibniz and the Baroque')

more is less

the golden goose of information: once you've grabbed her, or those who went before, you're *included in the search party* and no geek wizard of the woods will ever come to again disengage you from her tail feather for sure

for R+r

once just-in-time, a fairy tale in search of an author

Long years since the kings understood all their narrative to be fragmentary in nature, it has become common knowledge, shared by the many. How exactly this happened; as a result of which spectacular (some impressionable but under-attentive souls think 'revolutionary') escape from history, will remain unclear—isn't it kinda per-verse, irresponsible indeed of those in (narrative) power (and probably not in their advantage either), to leave the uneducated masses disengaged and dumbing down by the shreds, puzzled at the absence of rule, the absence of warp and weft in the web? Anyway, as the story goes so it happened, while some conditions in the fragmentation fabric are a changing again, for the kings, for their daughters, for the masses, for the geese, for the everyone and everything. BTW Deleuze, on Whitman, wrote some disturbing bits about the fragment 'being' innate American and the 'composition' being innate European, which' discussion can wait, but could hold a lesson for the future of informatic license and competing intelligences at both sides of the Atlantic, ha!. I took R+r to old school France for good reason! It is kings' territory, if ever there was one, never mind the republic it is today, never mind all other republics. We all get the fairy tales we've been soliciting, just-in-time when we deserve'm, that is. Reverse your royal ideals today. *Go with the kings, kids.*

no fix media

Networked media's *searchability* promises a new whole at every in-stant, a new golden goose to spring up at whim keystroke, infinite new wholes, constructed with the active participation of those who individually search the entirety of an expanding Literature. Since its expansion is of an accelerated kind, it cannot be stopped and fixed in any way. It's amok fairy tale this time. All maps run immediately out of memory as soon as they take shape. *They crash on change.* All representations of wholeness are as ideological (as ever)—exciting (who said 'dice-like') coups, with no relation to the Literature as such, as to be able to summarize it, index it, rule it down, either by its content or in any quantifiable way. But didn't we always love our maps exactly for their inaccuracy, which left us the *freedom* to inform *them*, instead of the other way around?

Every halt-in-whole expands the map, adding information to the Literature, thus pumping up its volume, ruining any illusion of singularity, somewhat like what the artwork does in Eliot's individual talent tale. Information's individual talent, if you wish, is that every bit is no singular appearance, but bears upon the existing and future Literature, infecting its own identity in its very emergence. (I've mentioned Eliot because of the following quote, not to further a suggestion of quality of what I call the Literature, grosso modo after [Ted Nelson](#) cs: the entirety of a unstoppable growing body of connected files, stored and processed and distributed in an open hypermedia network, at any given moment). Despite the capital L, there's no proof nor promise of Quality in this Literature whatsoever. After all, there's no such thing as Free Literature:

- what happens when a new work of art is created is something that happens simultaneously to all the works of art which preceded it. (...) I mean this as a principle of aesthetic, not merely historical, criticism.

tale of the searching temper

The information age brings the tale of the searching temper. Sense of search is our only promise, the only informing security in the new dynamic Literature. Search will be the *ruling mode of information exchange*, both for

its ('passive') enjoyment, as for its ('active') (re-) production. Moreover, in terms of information exchange, active and passive are invalid qualities. Smelly browsing nostalgia. Information will be guided only by the searching temper, or be reduced to immobilized mapable data, historia. Searching temper, totally aware of the 'everything you search can be searched against you' paradigm, produces the Literature with every consumption of it.

when more is less

There's less weeds in the garden if you are familiar with their qualities, less people in the crowd if you can name them, even if you do not know their names proper. The more information, the less data. *Data turn into information, by becoming invisible in it.* Even when data growth is absolute with information growth, it is its refined state 'inside' information, which reduces its raw presence. Early this morning when uprooting nettles I added information to my garden, including myself in active participation, and turning this wasteland of a relationship into a learning opportunity, a land-scaping man shaping exchange. Without me this piece of territory would contain only data, and lots of it—with my active presence, information emerged. When I searched the green for roots I manipulated data for information, in order to let more become less, by adding the value of recognition. Not only did I temporary 'clean up' or order a small part of my property, more importantly I learned and taught a lesson to gardening me. If I do not forget, if the weeds do not forget, we moved to a new level together.

More information means less uncertainty (less improbability reducing the chance of information to happen), if only for a short moment and to a limited extent. With the contemporary non-stop production of connected information, without the *noblesse* of a closed loop, without the certainty of isolation, without the freeze frame, every bit of certainty (in received information) changes the existing information before and after it, infinitely, *there is no escape from data searching a searcher to turn into information.* There's no escape from uncertainty in information society. At last we're all free!, and don't we love it!, and as long as possible keep producing our own freedom? To keep adding to it, is the

best guarantee for our freedom to last. (S)he who takes a pause from searching, is imprisoned in a lasting view, frozen in a perspective, bound in a (hi)story, cursed by a spell.

they lived long and happily, ever after information

All the king's men and all the king's horses and all the king's kingdoms and all the king's daughters will blow up into data dust, if there's no clever miller's sons to search for their information. When some day in the future R+r will leave the Moulin they'll know that old school 'search composition' will help them go after the kings' daughters, their kingdoms, horses and men.

- If you cut down that tree in the centre of the wood, you'll find that all the others will fall down by themselves. Have a look in its roots where there's a gift for you!

all I can think of is an Onion story from years ago about a recently discovered velvet Elvis painting that was "clearly the work of Pablo Picasso."

The use of pastels, the graceful, flowing lines, clearly these are from the hand of Picasso.

Actually, come to think of it, it was a blacklight velvet unicorn, not a velvet Elvis. But velvet Elvis would be cool.

Trg burze postaje Trgom hrvatskih velikana!

Odbor za imenovanja naselja, ulica i trgova zagrebačke Gradske skupštine prihvatio je prijedlog stručne skupine da se sadašnji Trg burze preimenuje u Trg hrvatskih velikana, a o tome bi se prijedlogu vijećnici zagrebačke skupštine trebali izjasniti na sjednici koja će se održati nakon predstojeće, sazvane za 7. studenoga. Prema prijedlogu koji je Odbor već prihvatio, sadašnji Trg hrvatskih velikana trebao bi se preimenovati u Trg žrtava fašizma.

Milijun za sreću

Madonna se udaje za Guy Ritchieja u škotskom dvorcu

Početkom prosinca 200 odabranih gostiju skupit će se u dvorcu u Škotskoj gdje će prisustvovati milijun dolara skupom vjenčanju Madonne i Guy Ritchiea, a ujedno i

krštenju njihovog sina Rocca. Mada je Madonna htjela da se vjenčanje održi u njevoj vili na Beverly Hillsu, Guy je inzistirao na Britaniji da bi na kraju

16-godišnjak zaradio napuhavajući dionice preko Interneta

Stock exchange

Štos je jednostavan. Dečko je kupio jeftine dionice nekoliko tvrtki, zatim je lijepo prièao o tim tvrtkama na financijskim forumima i news grupama i kad im je vrijednost porasla prodao ih. U cijeloj transakciji zaradio je 800.000 dolara. Tu treba odbiti 285.000 dolara globe koju bi trebao platiti Securities and Exchange komisiji (SEC) koja pazi da takve stvari ne zlorabe. Momak se zaštitio disclaimerom na svom siteu u kojem kaže da bi svatko trebao napraviti svoje vlastito istraživanje o potencijalu dionica. Cijela prièa izašla je u [Wired.com](#)-u.

Internet bez granica

Site za prodaju glasačkog prava opet radi

Vote-auction

Mada je donesena presuda da se [voteauction.com](#) site ugasi jer su se na njemu mogli kupovati glasovi za amerièku predsjednièku kampanju, vlasnik sitea, Austijanac sa serverom u Bugarskoj, mu je samo promijenio ime u [vote-auction.com](#) i nastavio poslovati. Mediji su u cijeloj prièi propustili istaknuti da amerièka vlada nije tužila samo vlasnika sitea, veæ i presence providera i tvrtku koja je registrirala domenu, što prema nekima predstavlja veæu opasnost za slobodu govora, nego što je prodajom glasova ugrožena demokracija.

Box Office report

Blair Witch Project II nije smijenio De Nira

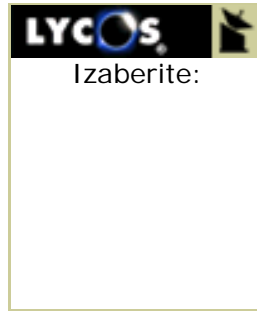

Uspješni fijasko

Nastavak prošlogodišnjeg hita Blair Witch Project prošao je slabije od oèekivanog u svom prvom vikendu prikazivanja. Na prvom mjestu vikend box officea je i dalje, èetvrti tjedan za redom, De Nirova hit komedija [Meet the Parents](#) koji povukao novih 15,1 milijun dolara i sada je s ukupno utrženih 100 milijuna dolara na tragu uspjeha "Šestog èula". [Book of Shadows: Blair Witch 2](#) je preko vikenda zaradio 13 milijuna dolara i s obzirom na prodana prava prikazivanja izvan Amerike za iznos od 20 milijuna dolara, veæ je u plusu obzirom na produkcijske troškove od 15 milijuna. Na [Rotten Tomatoes](#) veæ na prvi pogled je jasno da je film promašaj - same trule rajèice. Svejedno, treæi film, "prequel" tj. prethodnik, se veæ snima. [Opširnije...](#)

Boom

Eksplוזija europskog Interneta

Vrijednost poslovanja preko Interneta u Europi poskočit će s sadašnjih 53 milijarde dolara na 1.200 milijardi dolara u sljedeće četiri godine, kaže se u izvještaju koji je naručio Cisco Systems. Također se kaže da nedavni neuspjesi nekih većih dot.com tvrtki neće imati većeg učinka na zamah prebacivanja poslovanja na Internet. Zanimljivo je pogledati stanje 2000. i predviđanja za 2004. za neke europske zemlje. Njemačka sada ima 12,1 milijardu prometa, a imat će 317 milijardi. Cijela istočna Europa sada ima tek 300 milijuna prometa, a imat će 14,6 milijardi, manje od bilo koje zemlje zapadne Europe. [Opširnije...](#)

Web film

Dva grafièara na kompjutoru napravila akcijski Web hit film

405: The Movie

Prièa filma [405: The Movie](#) je jednostavna: dŹip ide autocestom, vozaè primjeti da se nešto èudno zbiva, osvrne se i ugleda Boing 747 kako se

spušta iza njega. Djelo je to dvojice kompjutorskih grafièara, Brucea Branita i Jeremyja Hunta koji su za stotinjak dana i gotovo ništa novaca napravili film od dvije i pol minute. Najveæi dio filma, ukljuèujuæi avion i dŹip u pokretu, napravljeni su na kompjutoru. "405" je postavljen na webu 5. lipnja i otada ga je pogledalo **2 milijuna** ljudi.

Sijamski san

Obavljena prva potpuno uspjeta operacija sijamskih blizanaca

Dvanaest sati je u australskom gradu Brisbaneu trajala operacija u kojoj je pod vodstvom Dr Scotta Campbella, pokušano i uspjeno radvajanje sijamskih blizanki

Taj-lah i Monique Armstrong spojene potiljkom. Blizanke su bile postavljene jedna drugoj "naglavaèke i okrenute leđima", a nakon operacije se u dobrom stanju i žive. Roditelji se nadaju da æe ih za BoŹiaæ odvesti kuæi. Od 1928. do '87. je bilo samo 60 pokušaja radvajanja sijamskih blizanaca, u kojima je preŹivjelo samo 26 od 60 blizanaca. [Iscrpnije...](#)

Antinastavak

Drugi dio filma 'Blair Witch' poèinje danas u amerièkim i britanskim kinima

Novi glumci, novi redatelj, nova prièa, posve novi film - tako bi se ukratko moglo opisati kakav je 'Book Of Shadows: [Blair Witch II](#)',

nastavak komercijalno iznimno uspješnog 'The Blair Witch Project'. Novi film ima sve karakteristike Hollywooda: sniman je s budŹetom od petnaest milijuna dolara, s drugim redateljem - Joeom Berlingerom, novim, talentiranim glumcima, i

grafikom skupog filma. Prièa se vrti oko studenata obožavatelja prvog dijela koji su došli u šumu gdje je sniman taj film da otkriju istinu. Prvi dio snimljen je za 30.000 dolara, a zaradio je 250 milijuna. Ovaj nastavak, èini se, nakon prvih loših kritika i bez snage originalne inspiracije, ima malo izgleda da dosegne tu brojku. Svejedno, veæ se radi na treæem dijelu.

Muzikalni rekord

Limp Bizkit meðu šest najprodavanijih u jednom tjednu

Prema podacima koje je sakupio Soundscan, na prvo mjesto Billboardove top liste 200 najprodavanijih albuma za idući tjedan zasjeli æ Limp Bizkit sa svojim trećim

albumom 'Chocolate Starfish And The Hot Dog Flavoured Water'. Oni su u samo tjedan dana prodali 1 054 000 kopija svog albuma što ih dovodi u društvo od šest izvođača u povijesti kojima je uspjelo u tjednu prodati više od milijun primjeraka. Ostatak šesterca čine 'Nsync, Eminem, Britney Spears, Backstreet Boys i Garth Brooks. [Iscrpnije na Glazbi...](#)

Globalno zagrijavanje gore nego što se mislilo

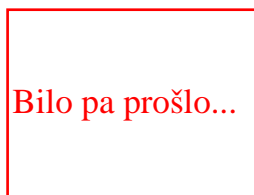

Zagađivači koje je proizveo čovjek "značajno su pridonijeli" globalnom zagrijavanju i Zemlja æ postati znatno toplija nego što se to prije mislilo, zaključili su

UN-ovog panela znanstvenika. Izvještaj 'Intergovernmental Panel on Climate Change' prvi je iscrpni pregled stanja od 1995. godine kada je isti panel zaključio da postoji ljudski utjecaj da zemljinu klimu zbog "efekta staklenika". Ukoliko se nešto ne poduzme, zemljina površinska prosječna temperatura mogla bi porasti s 2.7 na 11 Fahrenheita do kraja stoljeća. [Iscrpnije...](#)

Kraj savršenog hollywoodskog para

Rastava braka Bruce Willisa i Demi Moore

Bilo pa prošlo...

Nekad najglamurozniji par Hollywooda, Bruce Willis i Demi Moore, službeno se rastaju nakon dvije godine razdvojenog života. Par se vjenčao 1987. godine nakon tri

mjeseca poznanstva, a na vjenčanju koje je koštalo 875,000 dolara pjevao je Little Richard. Vrijeme su provodili između ranča u Idahou, gdje njihovo troje djece još uvijek idu školu, te stana u New Yorku i kuće u Malibuu. Nakon što se par razdvojio, bivša prijateljica Demi Moore izjavila je jednom magazinu da je brak bio iz interesa. [Iscrpnije...](#)

Hollywoodski rođendan

De Niro: "Forget about it" - Clinton: "Talkin' to me?"

You talkin' to me?

Hollywoodska krema i glazbene zvijezde pojavile su se na proslavi 53. Rođendana Hillary Clinton u srijedu, gdje je predsjednikova supruga prikupila dva milijuna dolara za svoju senatsku kampanju. Vrhunac večeri je bio kada je Robert De Niro pokušavao predsjednika naučiti kako se izgovara "forget about it" s teškim njujorškim naglaskom, na što je Clinton odgovorio rečenicom iz 'Taksista': "You talkin' to me?" Zbijanju šala pridružili su se i Chevy Chase, Tom Cruise, Cameron Diaz, Ben Affleck, Nathan Lane i Cher. [Iscrpnije...](#)

Dio posade Kurska preživio prvu havariju

Ronioci pronašli pismo u potonuloj ruskoj podmornici

U džepu jednog od poginulih mornara s potonule ruske podmornice Kursk pronađeno je pismo koje navodi da je najmanje 23 člana posade preživjelo prvu eksploziju.

Ruske vlasti do sada su tvrdile da je većina od 118 članova posade poginula minutu nakon eksplozije na nuklearnoj podmornici, što opovrgava pismo koje je napisao časnik Kolesnikov. Prema navodima agencije Tass, u pismu također piše da je Kolesnikov pisao slijep. [Iscrpnije...](#)

Eminem nepoželjan u Kanadi

Vlasti Toronta žele spriječiti Eminemov nastup

Državni odvjetnik Ontarija želi spriječiti američkog rappera Eminema da nastupi danas u Torontu zbog pritužbe da njegove pjesme potiču nasilje prema ženama. Pravnici ove

kanadske provincije pokušavaju na sve načine zadržati Eminema izvan Kanade, pa su razmišljali tražiti pomoć i od federalnih useljeničkih vlasti. Pritužba je došla do konzervativnog državnog odvjetnika nakon što je jedna Kanađanka skinula Eminemovu glazbu s Interneta i prijavila ju policijskom odjelu za zločine mržnje. [Iscrpnije...](#)

Tko će imati No.1 igraću konzolu?

Sony izbacio PS2 u SAD-u, Microsoft brusi zube

Danas u amerièke duæane dolazi dugooèekivani Sonyjev PlayStation 2, što osim hordi zainteresiranih kupaca pozorno prati i korporacija Microsoft koja za godinu dana planira

izbaciti svoj Xbox za koji tvrdi da predstavlja najmoæniju igraæu konzolu na planeti. Prema najavama Robbie Bacha, koji je zadužen za taj projekt, bit æe to najveæi događaj te vrste koji je Microsoft ikad napravio. Sony tvrdi da æe PS2 vladati tržištem bar još nekoliko godina. [Iscrpnije...](#)

"Tužan dan u korporativnoj povijesti"

AT&T se dijeli u èetiri nove kompanije

Like a virgin

Korporacija AT&T juèer je objavila da æe se restrukturirati u obitelj èetiri odvojene kompanije (consumer, business, broadband, wireless), što je najveæe restrukturiranje

ovog korporativnog simbola još od podjele iz 1984. godine. Na taj se potez AT&T odlueio nakon što su dionice ove korporacije pale gotovo za pola ove godine. "Mislim da je ovo poèetak kraja jedne ikone. To je tužan dan u korporativnoj povijesti, predaja Wall Streetu, koji je glupo tražio kratkoroène rezultate i prihode dionica", izjavio je analitièar Gartner Grupe. [Iscrpnije...](#)

Ništa prije braka

Britney Spears: "Još uvijek sam djevica"

Like a virgin

18-godišnja amerièka pop zvijezda Britney Spears, koja je objavila hitove poput "Baby, one more time" i "Oops! (I did it again)", izjavila je britanskom Daily Staru da je

još uvijek djevica i "da bi htjela prièekati dok ne osjeti da je u vezi s pravom osobom, s kojom æe stupiti u brak". [Iscrpnije...](#)

Making it all only makes sense

Osvježeni Microsoftov MSN kreæe na AOL dominaciju

MSN Explorer

Juèer redizajnirani [MSN](#), [Microsoftova](#) ISP usluga, ima najozbiljnije namjere krenuti na vodeæeg Internet providera u svijetu - [AOL](#). MSN trenutaèno

ima 3,5 milijuna korisnika, a AOL èak 25 milijuna. MSN æe u 10.000 duæana dijeliti besplatni CD s novim MSN Explorerom. Predstavnik Microsofta je

izjavio hladno i zastrašujuæe: "Cilj kampanje je stvoriti od MSN-a globalni *brand name* koji æe imati prepoznatljivost, snagu i vrijednost naših osnovnih proizvoda Windowsa i Office paketa." Microsoft u kampanju namjerava uložiti milijardu dolara!

Internetizacija Hrvatske

Potrebna hitna informatizacija i internetizacija Hrvatske

Glavna poruka Konferencije "Internetizacija Hrvatske" koju je u srijedu organizirala tvrtka Ericsson Nikola Tesla, bila je da Hrvatska treba **hitno** izraditi strategiju informatičkog razvoja, a taj bi se dokument, kao što je sluæaj u razvijenim zemljama svijeta, trebao usaglasiti i prihvatiti na najvišoj državnoj razini. Hrvatska sada znatno zaostaje u informatizaciji ne samo za razvijenim nego i za nekih tranzicijskim zemljama. Posebna pozornost pritom je posveæena Internetu i elektronskoj trgovini jer, kako je naglasio Ake Enell, predsjednik Nikole Tesle, Internetom se u svijetu veæ sada služi 400 milijuna korisnika, a do 2003. godine bit æe ih više od milijardu od èega æe polovica koristiti i mobilni Internet. Pokrovitelj skupa bio je potpredsjednik Vlade dr. Goran Graniæ. [Iscrpnije...](#)

Euro pao na dosad najnižu vrijednost - 0,83 dolara

**Sve manje
vrijedi**

Jutros se na londonskoj burzi [euro](#) mogao kupiti za rekordno niskih 0,8288 dolara, nakon èega se opet malèice podigao. Krivicu za ovaj najnoviji pad navodno snosi jedna tvrtka koja promijenila znatnu kolièinu eura u dolare, kao i nevoljkost europskih centralnih banaka da jaæe podupru zajednièku valutu. Od startanja eura u sijeènju 1999. euro je pao u odnosu na dolar za 30%. [Iscrpnije](#) i [zbirka](#) euro novèanica...

Nemoguæe pecanje

Šveðanin æeli upecati èudovište iz Loch Nessa

Ljubitelji Nessiea digli su paniku saznavši da Šveðanin Jan Sundberg æeli uhvatiti komad koæe njihovog ljubimca za istraæivaæke potrebe. Loch Ness istraæitelj Dick Raynor

zatražio je od Sindberga da se suzdrži od nakane koju je nazvao "neetiènom i bolesnom". Nessie potpada pod škotski zakon o zaštiti životinja iz 1912, ali pitanje je, buduæi da postojanje èudovišta nikad nije dokazano, potpada li ono zaista pod taj zakon. [Nessie fan klub](#) i [iscrpnije...](#)

CIA skida tajnu s (nekih) dokumenata o Èileu

Hoæe li se otkriti istina o vezi CIA-e i Pinocheta?

Direktor [CIA](#)-e George Tenet pristao je izdati 13. studenog oko 450 dokumenata o tajnim operacijama u Èileu od 1962. do 1975. godine. U tom

razdoblju sumnja se da je CIA pripomogla pripremanju i izvršavanju puèa kojim je general Pinochet svrgnuo predsjednika Allendea i uveo diktaturu, no CIA je opovrgavala bilo kakvu umiješanost u puè i Allendeovu smrt. Direktor CIA-e isprva je zadržao izdavanje dokumenata zbog straha da æe se time otkriti obavještajne metode i izvori, ali je nakon redigiranja i izdvajanja oko dvadesetak dokumenata odluèeno da ostatak može ugledati svjetlo dana. Da vidimo kako napreduje Kingova Internet knjiga

Prva tri dijela su bila po dolar, od 4-8 bit æ po dva

Biljèica dobro uspijeva, zasad

[Stephen King](#) je krenuo s svojom Internet knjigom "The Plant" pitajuæi se uopæ da li æ išta biti od toga. No, evo, za prva tri dijela više od 75%

èitatelja je platilo po dolar, a to je bio Kingov zahtjev da piše dalje. Sada se pojavio i [èetvrti dio](#), no s novom cijenom - od sada svaki nastavak, sve do eventualno osmog košta po dva dolara. Ukoliko bude više od osam nastavaka bit æ besplatni kaže Stephen. Èitate vi to? A jeste li platili?

Kako zaraditi na Internetu?

16-godišnjak zaradio napuhavajuæi dionice preko Interneta

Stock exchange

Štos je jednostavan. Deèko je kupio jeftine dionice nekoliko tvrtki, zatim je lijepo prièao o tim tvrtkama na financijskim forumima i news grupama i kad im je vrijednost porasla prodao

ih. U cijeloj transakciji zaradio je 800.000 dolara. Tu treba odbiti 285.000 dolara globe koju bi trebao platiti Securities and Exchange komisiji (SEC) koja pazi da takve stvari ne zlorabe. Momak se zaštitio disclaimerom na svom siteu u kojem kaže da bi svatko trebao napraviti svoje vlastito istraživanje o potencijalu dionica. Cijela prièa izašla je u [Wired.com](#)-u.

Internet bez granica

Site za prodaju glasaèkog prava opet radi

Vote-auction

Mada je donesena presuda da se [voteauction.com](#) site ugasi jer su se na njemu mogli kupovati glasovi za amerièku predsjednièku kampanju,

vlasnik sitea, Austijanac sa serverom u Bugarskoj, mu je samo promijenio ime u [vote-auction.com](#) i nastavio poslovati. Mediji su u cijeloj prièi propustili istaknuti da amerièka vlada nije tužila samo vlasnika sitea, veæ i presence providera i tvrtku koja je registrirala domenu, što prema nekima predstavlja veæu opasnost za slobodu govora, nego što je prodajom glasova ugrožena demokracija.

Box Office report

Blair Witch Project II nije smijenio De Nira

 Uspješni fijasko

Nastavak prošlogodišnjeg hita Blair Witch Project prošao je slabije od očekivanog u svom prvom vikendu prikazivanja. Na prvom mjestu vikend box officea je i dalje, četvrti tjedan

za redom, De Nirova hit komedija [Meet the Parents](#) koji povukao novih 15,1 milijun dolara i sada je s ukupno utrženih 100 milijuna dolara na tragu uspjeha "Šestog èula". [Book of Shadows: Blair Witch 2](#) je preko vikenda zaradio 13 milijuna dolara i s obzirom na prodana prava prikazivanja izvan Amerike za iznos od 20 milijuna dolara, veæ je u plusu obzirom na produkcijske troškove od 15 milijuna. Na [Rotten Tomatoes](#) veæ na prvi pogled je jasno da je film promašaj - same trule rajèice. Svejedno, treæi film, "prequel" tj. prethodnik, se veæ snima. [Opširnije...](#)

Novi izvor vijesti

Vijesti s Lycosa od sada na Monitoru

Zahvaljujuæi suradnji s Lycos portalom danas u nedjelju se možemo malo odmoriti i ponuditi vam izbor najvažnijih svjetskih vijesti s ovog popularnog sitea. Engleski je ionako materinji jezik na Internetu, a kategorije vijesti su Top News, Showbiz (Zabava),

IT, Strip, Biznis i Politika.

Zimsko vrijeme

Pomaknite satove za jedan sat unazad (i podsjetite druge)

Zajedno s cijelom Europom noæas u 03:00 satovi su pomaknuti na 02:00, uèinite to i vi i slobodno ostanite duže spavati. Na vašim osobnim raèunalima sat bi se sam trebao pomaknuti. Za svaki sluèaj kliknite na sliku i pošaljite [American Greetings](#) e-razglednicu posveæenu današnjem danu.

Internet usluga

Matchonline - pronaðite partnera na Internetu

Ako nemate partnera za izlaske, pokušajte ga naæi preko ove Internet

usluge. Źene traže muškarce, muškarci žene... Upišite

kakvu osobu tražite, koliko godina, iz koje zemlje, s kojom namjerom, koje visine, vjeroispovijesti, kojih seksualnih sklonosti... Pretražite slike. Probna registracija je besplatna. Već ih ima dosta i iz Hrvatske.

Internet usluga

Gator - nema više zaboravljenih passworda i dosadnog ispunjavanja formulara

Vjerojatno ste se više puta našli u neprilici da ste

**Gator ispunjava
formulare i pamti
passworde!**

zaboravili korisničko ime i/ili zaporku na siteovima koji zahtjevaju registraciju, ili vas obeshrabruje dosadno

ispunjavanje formulara kod kupovina ili registracija za neke Web usluge. **Gator** je prvoklasna usluga koja će vas riješiti takvih problema, a registriranje i iskušavanje zanimljivih siteova postat će zabavno. Instalacija je jednostavna i po posljednji put ispunite formular s svojim podacima, nakon toga Gator će vam uvijek biti pri ruci. Broj kreditne kartice ne morate dati. [Download Gator](#)

Nedjeljna misa na stadionu

Papa na nogometnoj utakmici!

Konferencijom pod nazivom "U vremenu jubileja, lice i duša sporta", kojoj je prisustvovao i papa Ivan Pavao II. u subotu je u Vatikanu započela proslava jubileja sporta u prisustvu oko 8.000 vjernika. Naglasivši da sport povezuje ali i razdvaja ljude, Papa je osudio nasilje na stadionima i u sportu uopće. Uputio je apel navijačima da ne uništavaju sport vrijeđajući protivničku ekipu. U nedjelju ujutro papa Ivan Pavao II. će na stadionu Olimpico služiti misu i prisustvovati nogometnoj utakmici između Italije i ostalog svijeta.

Boom

Eksplozija europskog Interneta

Vrijednost poslovanja preko Interneta u Europi poskočit će s sadašnjih 53 milijarde dolara na 1.200 milijardi dolara u sljedeće četiri godine, kaže se u izvještaju koji je naručio Cisco Systems. Također se kaže da nedavni neuspjesi nekih većih dot.com tvrtki neće imati većeg učinka na zamah prebacivanja poslovanja na Internet. Zanimljivo je pogledati stanje 2000. i predviđanja za 2004. za neke europske zemlje. Njemačka sada ima 12,1 milijardu prometa, a imat će 317 milijardi. Cijela istočna Europa sada ima tek 300 milijuna prometa, a imat će 14,6 milijardi, manje od bilo koje zemlje zapadne Europe. [Opširnije...](#)

Web film

Dva grafièara na kompjutoru napravila akcijski Web hit film

405: The Movie

Prièa filma [405: The Movie](#) je jednostavna: džip ide autocestom, vozaè primjeti da se nešto èudno zbiva, osvrne se i ugleda Boing 747 kako se

spušta iza njega. Djelo je to dvojice kompjutorskih grafièara, Brucea Branita i Jeremyja Hunta koji su za stotinjak dana i gotovo ništa novaca napravili film od dvije i pol minute. Najveæi dio filma, ukljuèujuæi avion i džip u pokretu, napravljeni su na kompjutoru. "405" je postavljen na webu 5. lipnja i otada ga je pogledalo **2 milijuna** ljudi.

Sijamski san

Obavljena prva potpuno uspjela operacija sijamskih blizanaca

Dvanaest sati je u australskom gradu Brisbaneu trajala operacija u kojoj je pod vodstvom Dr Scotta Campbella, pokušano i uspješno radvajanje sijamskih blizanki

Taj-lah i Monique Armstrong spojene potiljkom.

Blizanke su bile postavljene jedna drugoj "naglavaèke i okrenute leđima", a nakon operacije se u dobrom stanju i žive. Roditelji se nadaju da æe ih za Božiae odvesti kuæi. Od 1928. do '87. je bilo samo 60 pokušaja radvavanja sijamskih blizanaca, u kojima je preživjelo samo 26 od 60 blizanaca. [Iscrpnije...](#)

Antinastavak

Drugi dio filma 'Blair Witch' poeinje danas u amerièkim i britanskim kinima

Novi glumci, novi redatelj, nova prièa, posve novi film - tako bi se ukratko moglo opisati kakav je 'Book Of Shadows: [Blair Witch II](#)',

nastavak komercijalno iznimno uspješnog 'The Blair Witch Project'. Novi film ima sve karakteristike Hollywooda: sniman je s budžetom od petnaest milijuna dolara, s drugim redateljem - Joeom Berlingerom, novim, talentiranim glumcima, i grafikom skupog filma. Prièa se vrti oko studenata obožavatelja prvog dijela koji su došli u šumu gdje je sniman taj film da otkriju istinu. Prvi dio snimljen je za 30.000 dolara, a zaradio je 250 milijuna. Ovaj nastavak, èini se, nakon prvih loših kritika i bez snage originalne inspiracije, ima malo izgleda da dosegne tu brojku. Svejedno, veæ se radi na treæem dijelu. [Iscrpnije...](#)

Ima koga kod kuæe

NASA objavila desetogodišnji plan o istraživanju Marsa

Do 2010 trajati æe istraživanje Marsa kojim se želi odgovoriti na pitanje koje odavno muèi Zemljane: Je li ikada postojao život na Crvenom planetu i postoji li možda sada? [NASA](#)

planira šest veæih misija u narednoj dekadi, u kojima æe sudjelovati i Italija i Francuska. Iako je samo prošle godine na Marsu izgubljeno dvije robotske letjelice, plan je da se svake od iduæih pet godina potroši 400 do 450 milijuna dolara na ovo istraživanje èiji je cilj da se donese uzorak tla s Marsa. [Iscrpnije...](#)

Kad neæe milom, hoæe silom

Hakeri provalili u Microsoft

[Microsoft](#) je objavio kako su hakeri provalili u kompanijinu kompjutorsku mrežu i došli do nacrtâ Windowsa. U

Microsoftu vjeruju da im nisu narušili izvorni kod, što ne iskljuèuje da nisu, a vrlo je

vjerojatno da su do njega došli. Provalu je u srijedu otkrilo osiguranje kada su primjetili da se interni kodovi šalju na e-mail u St. Petersburg u Rusiji. Američki sudovi već neko vrijeme sa slabim uspjehom pokušavaju razbiti monopol koji Microsoft ima na software tržištu. [Iscrpnije...](#)

Iz dubine

Oproštajno pismo kapetana podmornice "Kursk"

"Sada je 13... sati. Pišem na slijepo... Zbog havarije, donijeli smo odluku da svi članovi posade iz 6., 7. i 8. odsjeka prijeđu u 9... Ovdje nas je 23.

Trojica su neuspješno pokušali

izaći na vrh kroz luk na 9. odsjeku..." Tako ide oproštajno pismo 33-godišnjeg kapetana Dmitrija Kolesnjikova pronađeno u njegovom džepu. Pismo je ponovno u ruskoj javnosti probudilo vjerovanje da je do katastrofe nuklearne podmornice "Kursk" došlo zbog sudara s nekom drugom podmornicom.

Globalno zagrijavanje gore nego što se mislilo

Zagaðivaæi koje je proizveo èovjek "znaèajno su pridonijeli" globalnom zagrijavanju i Zemlja æe postati znatno toplija nego što se to prije mislilo, zakljuèi su

UN-ovog panela znanstvenika. Izvještaj 'Intergovernmental Panel on Climate Change' prvi je iscrpni pregled stanja od 1995. godine kada je isti panel zakljuèio da postoji ljudski utjecaj da zemljinu klimu zbog "efekta staklenika". Ukoliko se nešto ne poduzme, zemljina površinska prosjeèna temperatura mogla bi porasti s 2.7 na 11 Fahrenheita do kraja stoljeæa. [Iscrpnije...](#)

Kraj savršenog hollywoodskog para

Rastava braka Bruce Willisa i Demi Moore

Bilo pa prošlo...

Nekad najglamurozniji par Hollywooda, Bruce Willis i Demi More, službeno se rastaju nakon dvije godine razdvojenog života. Par se vjenčao 1987. godine nakon tri mjeseca poznanstva, a na vjenčanju koje je koštalo 875,000 dolara pjevao je Little Richard. Vrijeme su provodili između ranča u Idahou, gdje njihovo troje djece još uvijek idu školu, te stana u New Yorku i kuće u Malibuu. Nakon što se par razdvojio, bivša prijateljica Demi Moore izjavila je jednom magazinu da je brak bio iz interesa. [Iscrpnije...](#)

Hollywoodski rođendan

De Niro: "Forget about it" - Clinton: "Talkin' to me?"

You talkin' to me?

Hollywoodska krema i glazbene zvijezde pojavile su se na proslavi 53. Rođendana Hillary Clinton u srijedu, gdje je predsjednikova supruga prikupila dva milijuna dolara za svoju senatsku kampanju. Vrhunac večeri je bio kada je Robert De Niro pokušavao predsjednika naučiti kako se izgovara "forget about it" s teškim njujorškim naglaskom, na što je Clinton odgovorio rečenicom iz 'Taksista': "You talkin' to me?" Zbijanju šala pridružili su se i Chevy Chase, Tom Cruise, Cameron Diaz, Ben Affleck, Nathan Lane i Cher. [Iscrpnije...](#)

Dio posade Kurska preživio prvu havariju

Ronioci pronašli pismo u potonuloj ruskoj podmornici

U džepu jednog od poginulih mornara s potonule ruske podmornice Kursk pronađeno je pismo koje navodi da je najmanje 23 člana posade preživjelo prvu eksploziju.

Ruske vlasti do sada su tvrdile da je većina od 118 članova posade poginula minutu nakon eksplozije na nuklearnoj podmornici, što opovrgava pismo koje je napisao časnik Kolesnikov. Prema navodima agencije Tass, u pismu također piše da je Kolesnikov pisao slijep. [Iscrpnije...](#)

Eminem nepoželjan u Kanadi

Vlasti Toronta žele spriječiti Eminemov nastup

Državni odvjetnik Ontarija želi spriječiti američkog rappera Eminema da nastupi danas u Torontu zbog pritužbe da njegove pjesme potiču nasilje prema ženama. Pravnici ove

kanadske provincije pokušavaju na sve načine zadržati Eminema izvan Kanade, pa su razmišljali tražiti pomoć i od federalnih useljeničkih vlasti. Pritužba je došla do konzervativnog državnog odvjetnika nakon što je jedna Kanađanka skinula Eminemovu glazbu s Interneta i prijavila ju policijskom odjelu za zločine mržnje. [Iscrpnije...](#)

Tko će imati No.1 igraću konzolu?

Sony izbacio PS2 u SAD-u, Microsoft brusi zube

Danas u američke dućane dolazi dugoočekivani Sonyjev PlayStation 2, što osim hordi zainteresiranih kupaca pažljivo prati i korporacija Microsoft koja za godinu dana planira

izbaciti svoj Xbox za koji tvrdi da predstavlja najmoćniju igraću konzolu na planeti. Prema najavama Robbie Bacha, koji je zadužen za taj projekt, bit će to najveći događaj te vrste koji je Microsoft ikad napravio. Sony tvrdi da će PS2 vladati tržištem bar još nekoliko godina. [Iscrpnije...](#)

"Tužan dan u korporativnoj povijesti"

AT&T se dijeli u četiri nove kompanije

Like a virgin

Korporacija AT&T jučer je objavila da će se restrukturirati u obitelj četiri odvojene kompanije (consumer, business, broadband, wireless), što je najveće restrukturiranje

ovog korporativnog simbola još od podjele iz 1984. godine. Na taj se potez AT&T odlučio nakon što su dionice ove korporacije pale gotovo za pola ove godine. "Mislim da je ovo početak kraja jedne ikone. To je tužan dan u korporativnoj povijesti, predaja Wall Streetu, koji je glupo tražio kratkoročne rezultate i prihode dionica", izjavio je analitičar Gartner Grupe. [Iscrpnije...](#)

Ništa prije braka

Britney Spears: "Još uvijek sam djevica"

Like a virgin

18-godišnja američka pop zvijezda Britney Spears, koja je objavila hitove poput "Baby, one more time" i "Oops! (I did it again)", izjavila je britanskom Daily Staru da je još uvijek djevica i "da bi htjela pričekati dok ne osjeti da je u vezi s pravom osobom, s kojom æe stupiti u brak". [Iscrpnije...](#)

Making it all only makes sense

Osvježeni Microsoftov MSN kreæe na AOL dominaciju

MSN Explorer

Juèer redizajnirani [MSN](#), [Microsoftova](#) ISP usluga, ima najozbiljnije namjere krenuti na vodeæeg Internet providera u svijetu - [AOL](#). MSN trenutaèno ima 3,5 milijuna korisnika, a AOL èak 25 milijuna. MSN æe u 10.000 duæana dijeliti besplatni CD s novim MSN Explorerom. Predstavnik Microsofta je izjavio hladno i zastrašujuæe: "Cilj kampanje je stvoriti od MSN-a globalni *brand name* koji æe imati prepoznatljivost, snagu i vrijednost naših osnovnih proizvoda Windowsa i Office paketa." Microsoft u kampanju namjerava uložiti milijardu dolara! [Iscrpnije...](#)

Internetizacija Hrvatske

Potrebna hitna informatizacija i internetizacija Hrvatske

Glavna poruka Konferencije "Internetizacija Hrvatske" koju je u srijedu organizirala tvrtka Ericsson Nikola Tesla, bila je da Hrvatska treba **hitno** izraditi strategiju informatièkog razvoja, a taj bi se dokument, kao što je sluèaj u razvijenim zemljama svijeta, trebao usaglasiti i prihvatiti na najvišoj državnoj razini. Hrvatska sada znatno zaostaje u informatizaciji ne samo za razvijenim nego i za nekih tranzicijskim zemljama. Posebna pozornost pritom je posveæena Internetu i elektronskoj trgovini jer, kako je naglasio Ake Enell, predsjednik Nikole Tesle, Internetom se u svijetu veæ sada služi 400 milijuna korisnika, a do 2003. godine bit æe ih više od milijardu od èega æe polovica koristiti i mobilni Internet. Pokrovitelj skupa bio je potpredsjednik Vlade dr. Goran Graniæ. [Iscrpnije...](#)

@rtMark

Visiting Artist Lecture Series

®tMark is an Internet based market system that supports the informative alteration of corporate products. ®rtMark derives its name from "registered trademark" and is pronounced "art mark". Since its inception in the early 1990's, ®rtMark has been responsible for funding many high-profile anti-corporate actions through its "mutual funds". Its been called the "MacArthur Foundation for aesthetic anarchy" by the Village Voice. They've swapped the voiceboxes of talking Barbie and GI Joe dolls at toy stores throughout the United States, backed Illegal Art in the production of "Deconstructing Beck" a remix of Beck Hansen's music, instigated actions such as "Phone in Sick Day", and supported the satirical websites "GWBush.com", "Voteauction.com" and "gatt.org". ®rtMark has also emerged as an effective defender of artists against corporate interests on the Web, most notably in defense of the artists group etoy from Internet toy giant eToys .

®rtMark representatives Ray Thomas and Frank Guerrero will speak on Wednesday, November 13th in Fine Arts 215 from 1:00 - 2:00 PM. More information on the ®rtMark system may be found at <http://www.rtmart.com/>

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Laat zien hoe je je voelt met de [CrackerHead Mood Chooser](#). Me happy now :)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Leuk dat Uren.Dagen.Nachten gelezen wordt: [Watnou](#) en [The Unbearable Lightness](#) hebben nu ook de Bubbelplastiek ontdekt. Bedankt voor de bronvermelding, guys :)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

[2 Birds on the 4th Floor](#) is een weblog waarin je zelf de posts kan [wijzigen/wegdoen](#). Eens benieuwd hoe lang dat nog gaat duren :)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

27.10.00

hehe Bij ons was het thuis ook altijd vechten om de bubbelplastiekverpakking te mogen platknijpen. Gelukkig bestaat er nu ook [virtuele bubblewrap](#) om mee te spelen. Een zoethoudertje van formaat.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Doe de voodoo en stuur iemand een [vloek](#) naar keuze. Eens benieuwd of het wat uithaalt :)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Meer nieuws van het /test front met deze [Skynet-testpagina](#). Voer voor [Lucas](#), zou ik denken.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Voor diegenen die zitten te wachten op het schielijk overlijden van een aantal dot coms: de gieren houden de wacht op [Downside's Deathwatch](#). Interessante namen? Amazon.com, E-loan, Ask Jeeves, E-toys, MP3.com, Insweb en Verisign!

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

De dt-regels voor Nederlandse werkwoorden treiteren taalgebruikers met een goed geheugen voor spelling. Dat [tonen](#) psycholinguïsten van de Universiteit Antwerpen aan.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

26.10.00

hehe Full Contact Origami is een bijwijlen heel erg knappe/leuke on line comic.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

[Nijntje voor volwassenen](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Voor de groene jongens onder ons of voor iedereen die het goed meent met moeder aarde: [Earthship](#) laat zien hoe je met natuurlijke en gerecycleerde materialen perfect woningen kan maken. Het lijkt nu nog een beetje gek, maar de toepassing van een aantal van deze technieken zal ons in elk geval een stuk in de volgende eeuw kunnen verderhelpen.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Voor wie geïnteresseerd is in de laatste ontdekkingen op vlak van wetenschap, geneeskunde en technologie is [EurekaAlert!](#) een schitterende bron van informatie.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Het bier mag dan wel nergens op lijken (tenzij op afwaswater), de reclame voor [Budweiser](#) is vaak hilarisch. Zoals deze door de olympische spelen geïnspireerde [tv-commercial](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Oh dear. Voor de laatste roddels over Ken en Barbie kan je nu terecht op [Barbie FM](#), de gloednieuwe internetradio "run by girls for girls like

you". De toekomst is roze :)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Het zal mijn voornaam wel zijn geweest, en mijn passie voor ruimtevaart die me mijn interesse voor de Sovjetunie bezorgde. Kijk eens naar de grafische kwaliteiten van hun [design](#) of de strengheid en bombast van de [architectuur](#) en meteen zie je waar Schuiten/Peeters ook wel een beetje de mosterd haalden voor hun [Duistere Steden](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

TOP 20 SAYINGS WE'D LIKE TO SEE ON THOSE OFFICE INSPIRATIONAL POSTERS:

1. Rome did not create a great empire by having meetings, they did it by killing all those who opposed them.
2. If you can stay calm, while all around you is chaos... then you probably haven't completely understood the seriousness of the situation.
3. Doing a job RIGHT the first time gets the job done. Doing the job WRONG fourteen times gives you job security.
4. Eagles may soar, but weasels don't get sucked into jet engines.
5. Artificial Intelligence is no match for Natural Stupidity
6. A person who smiles in the face of adversity... probably has a scapegoat.
7. Plagiarism saves time.
8. If at first you don't succeed, try management.
9. Never put off until tomorrow what you can avoid altogether.
10. TEAMWORK...means never having to take all the blame yourself.
11. The beatings will continue until morale improves.
12. Never underestimate the power of very stupid people in large groups.
13. We waste time, so you don't have to.
14. Hang in there, retirement is only thirty years away!
15. Go the extra mile. It makes your boss look like an incompetent slacker.
16. A snooze button is a poor substitute for no alarm clock at all.
17. When the going gets tough, the tough take a coffee break.
18. INDECISION is the key to FLEXIBILITY.
19. Succeed in spite of management.
20. Aim Low, Reach Your Goals, Avoid Disappointment.

Vooral nummer 17 draagt mijn voorkeur weg.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

25.10.00

Relaxatie/hypnose over het internet, het is weer eens wat anders. Deze [RELOAD RELIVE RELOVE](#)-site is niet aan te raden voor epileptici. Je ontspant er wel meer van dan ik had verwacht.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Schat, vanavond geen curry want ik heb hoofdpijn? [Indiase curry's](#) blijken verslavend te zijn: "De curry-verslaving is eerder vergelijkbaar met verslaving aan seks dan aan een drug". (via [kunstlog](#))

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

En meer hiep hiep hieps vandaag want [Der Schockwellenreiter](#) bestaat net een half jaar.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Hiep hiep hoera voor [Karma Universe](#) dat de kaap van [10.000 bezoekers](#) met succes heeft gerond. Ik zit zelf nog 'maar' aan [2700](#) of daaromtrent maar Uren.Dagen.Nachten is uiteraard nog maar 5 maanden in de lucht.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

U kent dat wel: midden in de nacht moet u plots naar het toilet maar u wilt geen licht aansteken om de medebewoners niet wakker te maken.

Mik maar eens in de pot in het donker, zal u denken. Wel: nu is er [Jonny Glow!](#) De toiletbrilverlichting bij uitstek.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Niet dat ik bepaald een [Anderlecht](#)-fan ben, maar dat [Manchester United](#) 2-1 op zijn dak kreeg, vond ik bepaald grappig. Helaas (of goed voor de Nederlanders) heeft ook [PSV](#) gewonnen, wat het duel tussen PSV en Anderlecht binnen twee weken natuurlijk weer wat interessanter maakt: PSV moet namelijk winnen, Anderlecht heeft al genoeg aan een gelijkspel.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Even kijken of mijn voorkeur qua [koffiesmaken](#) ook bevestigd wordt. (Maar dan wel versgemalen)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Voor de jeugdige lezers onder u die niet weten wat de f* [Frankie Goes To Hollywood](#) is, het debuutalbum "Welcome to the pleasuredome" is heruitgebracht. (Nvdr: ik word oud)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Nederlands is hij nog niet echt machtig - getuige waarvan menige typ- en taalfout - maar bloggen doet hij wel, ook al heeft hij niks te vertellen :) weblog.mijncomputertje.com/Joost van Velthoven/.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

24.10.00

Heb voor mijn verjaardag "[Fantoempijn](#)" van Arnon Grunberg gekregen. Deze auteur heeft zelf ook een leuke (maar nog niet erg diep uitgewerkte) website: [Universiteit van de liefde](#). Leuk is dat je er bijvoorbeeld liefdesbrieven op bestelling kan krijgen.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

[Mankind.net](#), het persistente universum, heeft al 100.000 geregistreerden. Of die nu allemaal tegelijk kunnen spelen, da's nog wat anders natuurlijk.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Wiskunde voor gevorderden: de [eerste 5 miljoen cijfers na de komma van de vierkantswortel uit 2](#). Het duurt wel een héle tijd voor de pagina ingeladen is, zoals je je kan voorstellen. De moraal? Don't calculate this at home, kids.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Overigens: [niet geschoten is altijd mis](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Ik buig alweer nederig het hoofd. Ik ben dan wel met stip gestegen tot plaats 3 in de [Smoel Weblog Tip 30](#), maar [Watnou](#) of [Le Temps Perdu](#) kloppen lijkt me niet echt realistisch :)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Het wordt er niet vrolijker op: [20 manieren](#) hoe de wereld zou kunnen eindigen.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

23.10.00

Whilst on the coffee-subject: [voor & na](#) koffie :) (via [escape](#))

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

In Groot-Brittannië is [veel te doen](#) om een nieuwe gameshow op [Channel5](#) waarin koppels een gratis echtscheiding kunnen krijgen. Vreemd genoeg was dat een paar jaar geleden een sketch in de onvolprezen VRT-serie "[Buiten De Zone](#)", waarbij toen het hoederecht over zoon Stijntje de inzet van de kwis was. Of hoe de komedie door de realiteit kan ingehaald worden.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Ik zou het niet in huis moeten hebben, maar er blijkt een markt te bestaan voor mensen die [meubels](#) willen die gemaakt zijn van [doodskisten](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Een must voor die-hard koffiedrinkers als [Jörg](#) en mezelf: [The Coffee and Caffeine FAQ](#), al doet het geen deugd om vast te stellen dat het [zwarte goud](#) niet echt gezond te noemen is.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

haha [Karma](#) heeft er weer eentje gevonden! Een [Jezus](#)-popje met twee linkerhanden. Eens benieuwd of die veel mirakels kan verrichten.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Twee nieuwe blogs dienen zich aan: [Kiekens](#) (hoe toepasselijk!) en [Polskaya](#). Dit laatste blog heeft het al dadelijk over de [Barbie Disinformation Organisation](#), een Californisch collectief dat een beetje zoals het [Garden Gnome Liberation Front](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Update van het kippenfront (zie gisteren): de twee hennen hebben nu ook een naam: [Yvonne en Yvette](#) :) Yvonne heeft al een pracht van een

EI gelegd (een cholesterolarm exemplaar zelfs).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Ik had het er op [26 september](#) al over, het staat ondertussen eindelijk in de kranten en nu is [Voteauction](#) dichtgegaan door een rechtszaak.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

22.10.00

Niettegenstaande ik een soort van kippenfobie heb, gaven mijn liefste vrienden me voor mijn dertigste verjaardag gisteren [een haan](#), [twee hennen](#) en [vijf kuikens](#) cadeau. Als ik nu nog aardappelen plant, kunnen we volgende zomer vol-au-vent met frietjes eten :) Tnx, guys!

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

20.10.00

Come on, guys, geef [Helen](#) een *fricking* job. En wel snel!

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Ieder zijn eigen [Coca Cola](#)? De ingrediënten zijn gekend!

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Hééé, ik sta op 12 in de [Smoel weblog Tip 30](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

19.10.00

De heiligen voor vandaag: [HH.Johannes de Brébeuf en Isaac Jogues](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

[Schokgolfer Jörg](#) meldt het nu ook aan onze Oosterburen: het moest er van komen: de 67% van de Antwerpenaars die niet op het Zwart Blok gestemd hebben, zijn ook met een weblog begonnen: [Antwerpen op zijn positieven](#). Hopelijk breidt deze golf van positivisme ook buiten de Antwerpse grenzen uit tot een zee van love, peace & happiness :)

Bovenop wat ik [vorige week](#) heb gezegd: "Heer, heb medelijden met de Vlaams Blok-stemmer" (naar [Freek De Jonge](#))

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Het zal wel geen alleenrecht voor Japanners zijn om van Engels een zootje te maken, maar [Japanese English](#) verzamelde ondertussen toch al een hele staalkaart van leuke voorbeelden.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Altijd leuk tijdens een conferentie of een vergadering: speel mee [Business Buzzword Bingo](#). Als iemand een Nederlandstalige versie maakt, laat het [me](#) weten!

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Tegen alle verwachting zijn er niet zoveel namen die leiden tot [het nummer van het beest](#). Om van Bill Gates een antichrist te maken, hebben ze zelfs wat kunst- en vliegwerk moeten verrichten.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

18.10.00

hahaha Als je spetterpoep krijgt van alle rotzooi die je soms op internet tegenkomt, surf dan eens langs het [virtueel toiletpapiermuseum](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

[Jörg](#), de Duitse schokgolfsurfer vraagt zich openlijk af of we in Sodom en Gomorra zijn beland na de Barbie, Winnie the Pooh en de handpoppen-links van de voorbije tijd. Zeker nu [watnou](#) een paar dagen geleden ook [stoute legofiguurtjes](#) ontdekte.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Het zal wel herfst zijn zeker, want met het vallen van de bladeren, gaat er om de haverklap ook een Nederlands blog dicht. Na [zo.nu/&.dan](#) en [Sikkema](#) kapt ook [Whyscream](#) ermee. Zij rusten in vrede.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Laat ons zeggen dat het een bijzondere versie van de kooi van Faraday is die ervoor moet zorgen dat niemand anders je gedachten kan lezen. Of hoe zou je anders deze [Aluminum Foil Deflector Beanie Homepage](#) beschrijven?

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Je kan het zo gek niet bedenken of [The Random Surrealism Generator](#) heeft er al eens eerder aan gedacht.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Dit is redelijk uniek, maar is het wel legaal? Een blog dat meeluistert op de politiefrequenties in de regio Eindhoven: [112log](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

17.10.00

Mhhhh, wat zou ik eens [verkopen](#) in mijn eigen gratis e-shop?

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

"[Now or never](#)" verbleekt in het anschijn van deze Amerikaanse [televisieshow](#) die alsmaar verder gaat in het challengen van mensen in ruil voor geld. Of wat dacht u van proeven als: "Drinken tot je moet kotsen", "Aan een stok hangend 10.000 volt toegediend krijgen" of "Gekleed in enkel een slagroombikini om het langst op een mechanische stier blijven zitten" (via [i'm *not* the asian nurse !](#))

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Veel plezier hiermee! [Hou wel de statusbar in het oog](#) :)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

[Ludo](#) had het er al eerder over: een [sms krijgen als je vruchtbaar bent](#). Je zou het natuurlijk ook kunnen gebruiken als anticonceptiemiddel (zij het dan een niet erg veilige methode). Of je als man ook een sms kan krijgen dat je je dadelijk naar huis moet reppen om te gaan bevruchten (en of je daarvoor sociaal verlof krijgt *S*), da's nog maar de vraag.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

16.10.00

En nu stopt ook [Sikkema](#) ermee.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

[Beetje reclame voor een ongetwijfeld mooi concert binnenkort...](#)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

13.10.00

Dit is het soort van [wekker](#) dat ik wel zou zien zitten. Gedaan met jezelf rotschrikken omdat dat avondse onding naast je begint te loeien. (via [netdyslexia](#))

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Deze boeiende /test-pagina wordt u aangeboden door de site van de [Provincie Antwerpen](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

[Lucas](#) is ermee begonnen en ik ben ook eens een beetje aan het zoeken geslagen. Ik vraag me af of je met deze [Radio1.be/test](#)-pagina écht een webcam aan- of uit kan switchen.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Nu gaan we het weten, zie: [Why there is such a fuss over sex](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Allerlei nuttige en andere gebruikerstips met [thee](#). Persoonlijk vind ik gewoon een kopje drinken wel leuk, maar wat je hier allemaal leest...

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

12.10.00

Damnation! Ik ben al te oud om nog mee te kunnen dingen naar [De Gouden Kans](#). Daar gaan de miljoenen voor mijn gouden ideeën :(

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Het beste aan [Fun2Go](#) vind ik de [Cavemen](#)-filmpjes én [Shirley](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

[Karma Universe](#) had het gisteren over hoe het voelt om als blinde te surfen omdat hij een [simulatie](#) had ontdekt. Ondertussen las ik in [IBS](#) over de lancering van [Voor Plus](#), een portal voor slechtzienden en blinden.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

11.10.00

Weer wat blogs bij in het lijstje: [callitaday](#), [lucas](#), [booglog](#) en [onwaarschijnlijk](#)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Nodeloos je af te vragen waar [idiotheque](#) in 's hemelsnaam over gaat. Of doet dat er niet toe?

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Error 624: Your request was routed via an AOL-gateway. Sorry, there are limits even to our sense of humour! en andere hilarische [errorboodschappen](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Uren speelplezier gegarandeerd met die goeie oude [manic miner](#). Ah, waar is mijn ZX Spectrum van weleer...

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Niet alleen Winnie the Pooh figureert in een Kamasutra, nee. Deze [Kama Sooty](#) is ook best leuk :)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Voor wie denkt dat hij te slim is voor het salaris dat hij maar krijgt: deze misschien ontnuchterende [IQ versus Inkomen-test](#)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

9.10.00

[zo.nu / &.dan](#) is niet meer. Leve zo.nu / &.dan.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Ga niet skieën in Antwerpen

Tjonge, jonge. Kan ik niks zeggen over de [voorbije verkiezingen](#)? Kan ik in alle talen zwijgen? Nee dus.

Ik ben geschokt. Beschaamd. Beledigd. Dat het Vlaams Blok zou vooruitgaan was te verwachten, dat is waar. Enkel een naïeveling zou hopen dat het tij gekeerd is. Maar dat de electorale successen van het Blok zo'n omvang zouden kennen, nee, dat had ook ik niet verwacht.

Ik vraag me af **wie** die mensen zijn die voor het Blok stemmen. Wat drijft hen? Waar zijn ze in Godsnaam zò ontevreden over? Het kan toch niet zijn dat enkel mentaal minder begaafden voor het Blok stemmen, dat het electoraat enkel uit rabiate racisten pur sang bestaat?

Wat kan je als democraat nog doen om een partij die de democratie pertinent misbruikt om mensen tegen elkaar op te zetten, om het vertrouwen van de mensen stuk te maken, om angst en haat te zaaien, om zo'n partij te stoppen? Moet je dan het Blok - zoals in Duitsland nu gebeurt - buiten de wet stellen? Moeten we de nultolerantie invoeren ten overstaan van De Winter, Annemans, Van Hecke en co?

En wat te denken van de campagnes van de VLD bijvoorbeeld? Ondanks het luid roepen dat veiligheid zo'n issue was en ondanks het feit dat ze er zelf op vooruitgaan, stoppen ze het Blok op deze manier absoluut niet af. Het bewijst dat 'het origineel beter is dan de kopie' en dat het dus niet eens helpt om de agendapunten van het Blok over te nemen om de proteststemmers op andere gedachten te brengen.

Dankzij het Vlaams Blok voel ik me nu onveilig in mijn eigen stad. Dat heet dan "Thuis zijn".

Uw teleurgestelde dienaar.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

6.10.00

haha een leuk mopje in mijn mailbox:

alle politieke en economische analyses ten spijt... de enige échte reden waarom de Denen "Nej" stemden:

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

De stripreeks "Duistere Steden" van Schuiten en Peeters ligt mij nauw aan het hart. Ook de [Urbicande](#)-website die erbij hoort is ronduit prachtig. Ontdek dit parallelle universum met Brüssel als archetypische stad.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

5.10.00

Een Tupperware-party zal nooit nog hetzelfde zijn na het lezen van [deze definitie](#) op [Zgeek.com](#). *S*

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

4.10.00

Voor de liefhebbers van tekenfilms: [Looney Tunes](#) is een erg leuke site met ook (zoals bij Muppetworld) een jukebox met favoriete tunes/liedjes.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Bijna vergeten: Goeroe [Jacob Nielsen](#) is weer goed op dreef. Deze keer over [het gebrek aan originele content op internet](#). (Hoe ironisch is het om net hiernaartoe te linken?)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Niet dat ik het overweeg, maar diegenen onder u die een nieuwe carrière ambiëren, wordt het [vreemdelingenlegioen](#) warm aanbevolen...

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Je zou denken dat het voortschrijden van het wetenschappelijk onderzoek over de big bang, het heelal en de planeten enz. moeilijk te rijmen zou zijn met het scheppingsverhaal. Maar nee hoor, voor alles is [een uitleg](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Koeien die discodansen? See for yourself. Deze [video- en audiosequenser](#) laadt traag op, maar is *moo*-tastic. Alleen jammer dat het ding enkel in het Zweeds bestaat.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Dit is waarschijnlijk ook niet zo heel erg origineel, ik weet het, maar een [random url generator](#) laat je misschien wel af en toe eens een totaal onverwachte webstek tegenkomen.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

3.10.00

Van zelfhulp gesproken: met de [brainwave generator](#) kan je meteen stoppen met roken, drinken en - waarom niet - nadenken?

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Wel, wel. Je hoeft dus niet langer naar de apotheker of dokter te lopen, je kan gewoon on line een [zwangerschapstest](#) nemen. Als dat maar goed komt, met dat plasje in de cd-romspeler... :)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Na het versmurfen van websites of het Jezusificeren ervan, kan je je webstekje ook in andere talen laten omzetten met de verschillende [Miguelfilters](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

[Jim Roepcke](#) heeft een interessante tool gemaakt waardoor je in een oogopslag kan zien wie allemaal naar [jouw blog](#) doorverwijst.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

2.10.00

Na de Concorde (hoewel?) verdwijnt nu ook de [Hovercraft](#) uit roulatie.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Oh ja, weer nieuw blogs bijgevoegd (en enkele uitgeblogde blogs verwijderd): [Ib@rama](#) en [webblog.org](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Eigenlijk vindt mijn ego het bijzonder jammer dat ik niet vermeld word in deze [Weblogs? Echt niet VET dus!](#)-column van een vooralsnog anonieme blog-criticus.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Een oproep aan alle Mechelaars een week voor de gemeenteraadsverkiezingen: wij zijn het beu dat [Mechelen](#) steeds afgeschilderd wordt als onveilig, verloederd en wat al niet meer. Mechelen is te mooi en te boeiend om haar over te laten aan angst, onbegrip en onverdraagzaamheid. Denk daar even aan op 8 oktober. En [geef je stem een positieve klank](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Test uw eigen [tuinkaboutergehalte](#) op [tuinkabouters.com](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Allez, de eerste permanente bemanning voor het ISS [gelanceerd](#) vanmorgen.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

De woordspeling alleen al: [Hairagami](#) *proest*

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Een nog tamelijk lege [weblogneologismenwoordenlijst](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Het zal wel zijn :)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

In de reeks vreemde musea op het internet: het [toiletbrillemuseum](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

In de reeks antwoorden op vreemde vragen: [hoe bedrijven stekelvarkens de liefde?](#) En nee, het antwoord is niet: "Voorzichtig".

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

[2 Birds on the 4th Floor](#) heeft maatregelen getroffen. Jammer, ik vond het wel eens leuk om wat te posten op andermans site.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

30.10.00

Van Buckminster Fullereen had ik al gehoord, maar dat er nog andere [moleculen met gekke namen](#) zijn, was me totaal onbekend, al zijn er voorbeelden genoeg: Arsole of Bastardane nog aan toe :)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Mmmm, interessant. Op deze pagina kan je [barcodes](#) aanmaken. Waar zou dat goed voor zijn?

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Vertaalmachines op het internet, er zijn er goeie, er zijn er slechte. Probeer zelf eens deze vertaling van Uren.Dagen.Nachten te bekijken: [Hours. Summon . Night](#) (Misschien zou "Dagen" toch wel eerder als substantief dan als werkwoord mogen worden vertaald, nee?).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Al 232 executies in Texas sinds juli 1982. Lees wat de terdoodveroordeelden als [galgenmaal](#) bestelden.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Aan de Brandeis Universiteit in Massachusetts hebben ze een computer vanalles zelf laten ontwerpen met Lego-blokjes: o.a. een [kraan die 0,5 kg kan tillen, een brug en een tafel](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Ah, net wat ik nodig had op deze wonderige maandagochtend: een virtuele dosis [caffeïne](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Laat zien hoe je je voelt met de [CrackerHead Mood Chooser](#). Me happy now :)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Leuk dat Uren.Dagen.Nachten gelezen wordt: [Watnou](#) en [The Unbearable Lightness](#) hebben nu ook de Bubbelplastiek ontdekt. Bedankt voor de bronvermelding, guys :)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

[2 Birds on the 4th Floor](#) is een weblog waarin je zelf de posts kan [wijzigen/wegdoen](#). Eens benieuwd hoe lang dat nog gaat duren :)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

27.10.00

hehe Bij ons was het thuis ook altijd vechten om de bubbelplastiekverpakking te mogen platknijpen. Gelukkig bestaat er nu ook [virtuele bubblewrap](#) om mee te spelen. Een zoethoudertje van formaat.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Doe de voodoo en stuur iemand een [vloek](#) naar keuze. Eens benieuwd of het wat uithaalt :)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Meer nieuws van het [/test](#) front met deze [Skynet-testpagina](#). Voer voor [Lucas](#), zou ik denken.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Voor diegenen die zitten te wachten op het schielijk overlijden van een aantal dot coms: de gieren houden de wacht op [Downside's Deathwatch](#). Interessante namen? Amazon.com, E-loan, Ask Jeeves, E-toys, MP3.com, Insweb en Verisign!

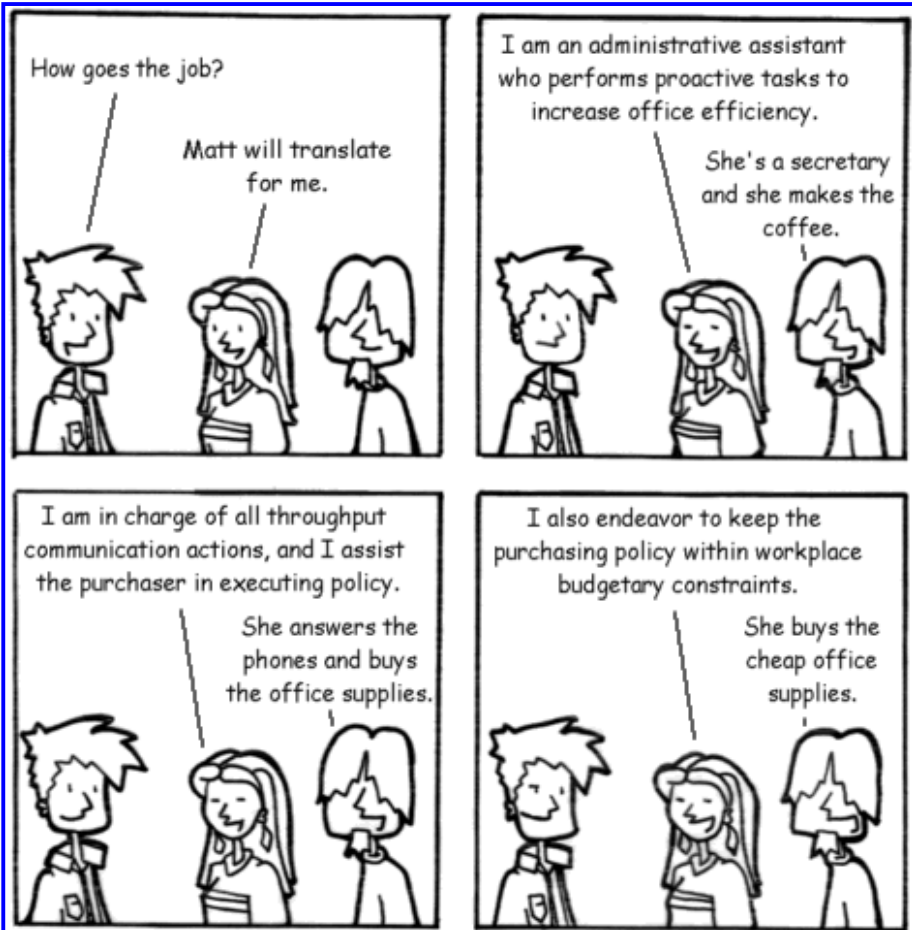

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

De dt-regels voor Nederlandse werkwoorden treiteren taalgebruikers met een goed geheugen voor spelling. Dat [tonen](#) psycholinguïsten van de Universiteit Antwerpen aan.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

26.10.00

hehe Full Contact Origami is een bijwijlen heel erg knappe/leuke on line comic.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

[Nijntje voor volwassenen](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Voor de groene jongens onder ons of voor iedereen die het goed meent met moeder aarde: [Earthship](#) laat zien hoe je met natuurlijke en gerecycleerde materialen perfect woningen kan maken. Het lijkt nu nog een beetje gek, maar de toepassing van een aantal van deze technieken zal ons in elk geval een stuk in de volgende eeuw kunnen verderhelpen.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Voor wie geïnteresseerd is in de laatste ontdekkingen op vlak van wetenschap, geneeskunde en technologie is [EurekAlert!](#) een schitterende bron van informatie.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Het bier mag dan wel nergens op lijken (tenzij op afwaswater), de reclame voor [Budweiser](#) is vaak hilarisch. Zoals deze door de olympische spelen geïnspireerde [tv-commercial](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Oh dear. Voor de laatste roddels over Ken en Barbie kan je nu terecht op [Barbie FM](#), de gloednieuwe internetradio "run by girls for girls like you". De toekomst is roze :)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Het zal mijn voornaam wel zijn geweest, en mijn passie voor ruimtevaart die me mijn interesse voor de Sovjetunie bezorgde. Kijk eens naar de grafische kwaliteiten van hun [design](#) of de strengheid en bombast van de [architectuur](#) en meteen zie je waar Schuiten/Peeters ook wel een beetje de mosterd haalden voor hun [Duistere Steden](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

TOP 20 SAYINGS WE'D LIKE TO SEE ON THOSE OFFICE INSPIRATIONAL POSTERS:

1. Rome did not create a great empire by having meetings, they did it by killing all those who opposed them.
2. If you can stay calm, while all around you is chaos... then you probably haven't completely understood the seriousness of the situation.
3. Doing a job RIGHT the first time gets the job done. Doing the job WRONG fourteen times gives you job security.
4. Eagles may soar, but weasels don't get sucked into jet engines.
5. Artificial Intelligence is no match for Natural Stupidity
6. A person who smiles in the face of adversity... probably has a scapegoat.
7. Plagiarism saves time.
8. If at first you don't succeed, try management.
9. Never put off until tomorrow what you can avoid altogether.
10. TEAMWORK...means never having to take all the blame yourself.
11. The beatings will continue until morale improves.
12. Never underestimate the power of very stupid people in large groups.
13. We waste time, so you don't have to.
14. Hang in there, retirement is only thirty years away!
15. Go the extra mile. It makes your boss look like an incompetent slacker.
16. A snooze button is a poor substitute for no alarm clock at all.
17. When the going gets tough, the tough take a coffee break.
18. INDECISION is the key to FLEXIBILITY.
19. Succeed in spite of management.
20. Aim Low, Reach Your Goals, Avoid Disappointment.

Vooral nummer 17 draagt mijn voorkeur weg.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

25.10.00

Relaxatie/hypnose over het internet, het is weer eens wat anders. Deze [RELOAD RELIVE RELOVE](#)-site is niet aan te raden voor epileptici. Je ontspant er wel meer van dan ik had verwacht.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Schat, vanavond geen curry want ik heb hoofdpijn? [Indiase curry's](#) blijken verslavend te zijn: "De curry-verslaving is eerder vergelijkbaar met verslaving aan seks dan aan een drug". (via [kunstlog](#))

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

En meer hiep hiep hieps vandaag want [Der Schockwellenreiter](#) bestaat net een half jaar.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Hiep hiep hoera voor [Karma Universe](#) dat de kaap van [10.000 bezoekers](#) met succes heeft gerond. Ik zit zelf nog 'maar' aan [2700](#) of daaromtrent maar Uren.Dagen.Nachten is uiteraard nog maar 5 maanden in de lucht.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

U kent dat wel: midden in de nacht moet u plots naar het toilet maar u wilt geen licht aansteken om de medebewoners niet wakker te maken. Mik maar eens in de pot in het donker, zal u denken. Wel: nu is er [Jonny Glow!](#) De toiletbrilverlichting bij uitstek.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Niet dat ik bepaald een [Anderlecht](#)-fan ben, maar dat [Manchester United](#) 2-1 op zijn dak kreeg, vond ik bepaald grappig. Helaas (of goed voor de Nederlanders) heeft ook [PSV](#) gewonnen, wat het duel tussen PSV en Anderlecht binnen twee weken natuurlijk weer wat interessanter maakt: PSV moet namelijk winnen, Anderlecht heeft al genoeg aan een gelijkspel.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Even kijken of mijn voorkeur qua [koffiesmaken](#) ook bevestigd wordt. (Maar dan wel versgemalen)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Voor de jeugdige lezers onder u die niet weten wat de f* [Frankie Goes To Hollywood](#) is, het debuutalbum "Welcome to the pleasuredome" is heruitgebracht. (Nvdr: ik word oud)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Nederlands is hij nog niet echt machtig - getuige waarvan menige typ- en taalfout - maar bloggen doet hij wel, ook al heeft hij niks te vertellen :) [weblog.mijncomputertje.com/Joost van Velthoven/](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

24.10.00

Heb voor mijn verjaardag "[Fantoempijn](#)" van Arnon Grunberg gekregen. Deze auteur heeft zelf ook een leuke (maar nog niet erg diep uitgewerkte) website: [Universiteit van de liefde](#). Leuk is dat je er bijvoorbeeld liefdesbrieven op bestelling kan krijgen.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

[Mankind.net](#), het persistente universum, heeft al 100.000 geregistreerden. Of die nu allemaal tegelijk kunnen spelen, da's nog wat anders natuurlijk.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Wiskunde voor gevorderden: de [eerste 5 miljoen cijfers na de komma van de vierkantswortel uit 2](#). Het duurt wel een héle tijd voor de pagina ingeladen is, zoals je je kan voorstellen. De moraal? Don't calculate this at home, kids.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Overigens: [niet geschoten is altijd mis](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Ik buig alweer nederig het hoofd. Ik ben dan wel met stip gestegen tot plaats 3 in de [Smoel Weblog Tip 30](#), maar [Watnou](#) of [Le Temps Perdu](#) kloppen lijkt me niet echt realistisch :)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Het wordt er niet vrolijker op: [20 manieren](#) hoe de wereld zou kunnen eindigen.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

23.10.00

Whilst on the coffee-subject: [voor & na](#) koffie :) (via [escape](#))

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

In Groot-Brittannië is [veel te doen](#) om een nieuwe gameshow op [Channels5](#) waarin koppels een gratis echtscheiding kunnen krijgen. Vreemd genoeg was dat een paar jaar geleden een sketch in de onvolprezen VRT-serie "[Buiten De Zone](#)", waarbij toen het hoederecht over zoon Stijntje de inzet van de kwis was. Of hoe de komedie door de realiteit kan ingehaald worden.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Ik zou het niet in huis moeten hebben, maar er blijkt een markt te bestaan voor mensen die [meubels](#) willen die gemaakt zijn van [doodskisten](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Een must voor die-hard koffiedrinkers als [Jörg](#) en mezelf: [The Coffee and Caffeine FAQ](#), al doet het geen deugd om vast te stellen dat het [zwarte goud](#) niet echt gezond te noemen is.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

haha [Karma](#) heeft er weer eentje gevonden! Een [Jezus](#)-popje met twee linkerhanden. Eens benieuwd of die veel mirakels kan verrichten.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Twee nieuwe blogs dienen zich aan: [Kiekens](#) (hoe toepasselijk!) en [Polskaya](#). Dit laatste blog heeft het al dadelijk over de [Barbie Disinformation Organisation](#), een Californisch collectief dat een beetje zoals het [Garden Gnome Liberation Front](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Update van het kippenfront (zie gisteren): de twee hennen hebben nu ook een naam: [Yvonne en Yvette](#) :) Yvonne heeft al een pracht van een EI gelegd (een cholesterolarm exemplaar zelfs).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Ik had het er op [26 september](#) al over, het staat ondertussen eindelijk in de kranten en nu is **Voteauction** dichtgegaan door een rechtszaak.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

22.10.00

Niettegenstaande ik een soort van kippenfobie heb, gaven mijn liefste vrienden me voor mijn dertigste verjaardag gisteren [een haan](#), [twee hennen](#) en [vijf kuikens](#) cadeau. Als ik nu nog aardappelen plant, kunnen we volgende zomer vol-au-vent met frietjes eten :) Tnx, guys!

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

20.10.00

Come on, guys, geef [Helen](#) een *fricking* job. En wel snel!

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Ieder zijn eigen [Coca Cola](#)? De ingrediënten zijn gekend!

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Hééé, ik sta op 12 in de [Smoel weblog Tip 30](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

19.10.00

De heiligen voor vandaag: [HH.Johannes de Brébeuf en Isaac Jogues](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

[Schokgolver Jörg](#) meldt het nu ook aan onze Oosterburen: het moest er van komen: de 67% van de Antwerpenaars die niet op het Zwart Blok gestemd hebben, zijn ook met een weblog begonnen: [Antwerpen op zijn positieven](#). Hopelijk breidt deze golf van positivisme ook buiten de Antwerpse grenzen uit tot een zee van love, peace & happiness :)

Bovenop wat ik [vorige week](#) heb gezegd: "Heer, heb medelijden met de Vlaams Blok-stemmer" (naar [Freek De Jonge](#))

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Het zal wel geen alleenrecht voor Japanners zijn om van Engels een zootje te maken, maar [Japanese English](#) verzamelde ondertussen toch al een hele staalkaart van leuke voorbeelden.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Altijd leuk tijdens een conferentie of een vergadering: speel mee [Business Buzzword Bingo](#). Als iemand een Nederlandstalige versie maakt, laat het [me](#) weten!

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Tegen alle verwachting zijn er niet zoveel namen die leiden tot [het nummer van het beest](#). Om van Bill Gates een antichrist te maken, hebben ze zelfs wat kunst- en vliegwerk moeten verrichten.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

18.10.00

hahaha Als je spetterpoep krijgt van alle rotzooi die je soms op internet tegenkomt, surf dan eens langs het [virtueel toiletpapiermuseum](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

[Jörg](#), de Duitse schokgolfsurfer vraagt zich openlijk af of we in Sodom en Gomorra zijn beland na de Barbie, Winnie the Pooh en de handpoppen-links van de voorbije tijd. Zeker nu [watnou](#) een paar dagen geleden ook [stoute legofiguurtjes](#) ontdekte.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Het zal wel herfst zijn zeker, want met het vallen van de bladeren, gaat er om de haverklap ook een Nederlands blog dicht. Na [zo.nu/&.dan](#) en [Sikkema](#)apt ook [Whyscream](#) ermee. Zij rusten in vrede.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Laat ons zeggen dat het een bijzondere versie van de kooi van Faraday is die ervoor moet zorgen dat niemand anders je gedachten kan lezen. Of hoe zou je anders deze [Aluminum Foil Deflector Beanie Homepage](#) beschrijven?

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Je kan het zo gek niet bedenken of [The Random Surrealism Generator](#) heeft er al eens eerder aan gedacht.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Dit is redelijk uniek, maar is het wel legaal? Een blog dat meeluistert op de politiefrequenties in de regio Eindhoven: [112log](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

17.10.00

Mhhhh, wat zou ik eens [verkopen](#) in mijn eigen gratis e-shop?

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

"[Now or never](#)" verbleekt in het aanschijn van deze Amerikaanse [televisieshow](#) die alsmaar verder gaat in het challengen van mensen in ruil voor geld. Of wat dacht u van proeven als: "Drinken tot je moet kotsen", "Aan een stok hangend 10.000 volt toegediend krijgen" of "Gekleed in enkel een slagroombikini om het langst op een mechanische stier blijven zitten" (via [i'm *not* the asian nurse !](#))

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Veel plezier hiermee! [Hou wel de statusbar in het oog](#) :)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

[Ludo](#) had het er al eerder over: een [sms krijgen als je vruchtbaar bent](#). Je zou het natuurlijk ook kunnen gebruiken als anticonceptiemiddel (zij het dan een niet erg veilige methode). Of je als man ook een sms kan krijgen dat je je dadelijk naar huis moet reppen om te gaan bevruchten (en of je daarvoor sociaal verlof krijgt *S*), da's nog maar de vraag.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

16.10.00

En nu stopt ook [Sikkema](#) ermee.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

[Beetje reclame voor een ongetwijfeld mooi concert binnenkort...](#)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

13.10.00

Dit is het soort van [wekker](#) dat ik wel zou zien zitten. Gedaan met jezelf rotschrikken omdat dat avondse onding naast je begint te loeien. (via [netdyslexia](#))

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Deze boeiende /test-pagina wordt u aangeboden door de site van de [Provincie Antwerpen](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

[Lucas](#) is ermee begonnen en ik ben ook eens een beetje aan het zoeken geslagen. Ik vraag me af of je met deze [Radio1.be/test](#)-pagina écht een webcam aan- of uit kan switchen.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Nu gaan we het weten, zie: [Why there is such a fuss over sex](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Allerlei nuttige en andere gebruikerstips met [thee](#). Persoonlijk vind ik gewoon een kopje drinken wel leuk, maar wat je hier allemaal leest...

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

12.10.00

Damnation! Ik ben al te oud om nog mee te kunnen dingen naar [De Gouden Kans](#). Daar gaan de miljoenen voor mijn gouden ideeën :(

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Het beste aan [Fun2Go](#) vind ik de [Cavemen](#)-filmpjes én [Shirley](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

[Karma Universe](#) had het gisteren over hoe het voelt om als blinde te surfen omdat hij een [simulatie](#) had ontdekt. Ondertussen las ik in [IBS](#) over de lancering van [Voir Plus](#), een portal voor slechtzienden en blinden.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

11.10.00

Weer wat blogs bij in het lijstje: [callitaday](#), [lucas](#), [booglog](#) en [onwaarschijnlijk](#)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Nodeloos je af te vragen waar [idiotheque](#) in 's hemelsnaam over gaat. Of doet dat er niet toe?

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Error 624: Your request was routed via an AOL-gateway. Sorry, there are limits even to our sense of humour! en andere hilarische [errorboodschappen](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Uren speelplezier gegarandeerd met die goeie oude [manic miner](#). Ah, waar is mijn ZX Spectrum van weleer...

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Niet alleen Winnie the Pooh figureert in een Kamasutra, nee. Deze [Kama Sooty](#) is ook best leuk :)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Voor wie denkt dat hij te slim is voor het salaris dat hij maar krijgt: deze misschien ontvullende [IQ versus Inkomen-test](#)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

9.10.00

[zo.nu / &.dan](#) is niet meer. Leve zo.nu / &.dan.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Ga niet skieën in Antwerpen

Tjonge, jonge. Kan ik niks zeggen over de [voorbije verkiezingen](#)? Kan ik in alle talen zwijgen? Nee dus.

Ik ben geschokt. Beschaamd. Beledigd. Dat het Vlaams Blok zou vooruitgaan was te verwachten, dat is waar. Enkel een naïeveling zou hopen dat het tij gekeerd is. Maar dat de electorale successen van het Blok zo'n omvang zouden kennen, nee, dat had ook ik niet verwacht.

Ik vraag me af **wie** die mensen zijn die voor het Blok stemmen. Wat drijft hen? Waar zijn ze in Godsnaam zò ontevreden over? Het kan toch niet zijn dat enkel mentaal minder begaafden voor het Blok stemmen, dat het electoraat enkel uit rabiate racisten pur sang bestaat?

Wat kan je als democraat nog doen om een partij die de democratie pertinent misbruikt om mensen tegen elkaar op te zetten, om het vertrouwen van de mensen stuk te maken, om angst en haat te zaaien, om zo'n partij te stoppen? Moet je dan het Blok - zoals in Duitsland nu gebeurt - buiten de wet stellen? Moeten we de nultolerantie invoeren ten overstaan van De Winter, Annemans, Van Hecke en co?

En wat te denken van de campagnes van de VLD bijvoorbeeld? Ondanks het luid roepen dat veiligheid zo'n issue was en ondanks het feit dat ze er zelf op vooruitgaan, stoppen ze het Blok op deze manier absoluut niet af. Het bewijst dat 'het origineel beter is dan de kopie' en dat het dus niet eens helpt om de agendapunten van het Blok over te nemen om de proteststemmers op andere gedachten te brengen.

Dankzij het Vlaams Blok voel ik me nu onveilig in mijn eigen stad. Dat heet dan "Thuis zijn".

Uw teleurgestelde dienaar.

6.10.00

haha een leuk mopje in mijn mailbox:

alle politieke en economische analyses ten spijt... de enige échte reden waarom de Denen "Nej" stemden:

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

De stripreeks "Duistere Steden" van Schuiten en Peeters ligt mij nauw aan het hart. Ook de [Urbicande](#)-website die erbij hoort is rondit prachtig. Ontdek dit parallelle universum met Brüssel als archetypische stad.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

5.10.00

Een Tupperware-party zal nooit nog hetzelfde zijn na het lezen van [deze definitie](#) op [Zgeek.com](#). *S*

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

4.10.00

Voor de liefhebbers van tekenfilms: [Looney Tunes](#) is een erg leuke site met ook (zoals bij Muppetworld) een jukebox met favoriete tunes/lidjes.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Bijna vergeten: Goeroe [Jacob Nielsen](#) is weer goed op dreef. Deze keer over [het gebrek aan originele content op internet](#). (Hoe ironisch is het om net hiernaartoe te linken?)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Niet dat ik het overweeg, maar diegenen onder u die een nieuwe carrière ambiëren, wordt het [vreemdelingenlegioen](#) warm aanbevolen...

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Je zou denken dat het voortschrijden van het wetenschappelijk onderzoek over de big bang, het heelal en de planeten enz. moeilijk te rijmen zou zijn met het scheppingsverhaal. Maar nee hoor, voor alles is [een uitleg](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Koerien die discodansen? See for yourself. Deze [video- en audiosequenser](#) laadt traag op, maar is *moo*-tastic. Alleen jammer dat het ding enkel in het Zweeds bestaat.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Dit is waarschijnlijk ook niet zo heel erg origineel, ik weet het, maar een [random url generator](#) laat je misschien wel af en toe eens een totaal onverwachte webstek tegenkomen.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

3.10.00

Van zelfhulp gesproken: met de [brainwave generator](#) kan je meteen stoppen met roken, drinken en - waarom niet - nadenken?

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Wel, wel. Je hoeft dus niet langer naar de apotheker of dokter te lopen, je kan gewoon on line een [zwangerschapstest](#) nemen. Als dat maar goed komt, met dat plasje in de cd-romspeler... :)

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Na het versmurfen van websites of het Jezusificeren ervan, kan je je webstekje ook in andere talen laten omzetten met de verschillende [Miguelfilters](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

[Jim Roepcke](#) heeft een interessante tool gemaakt waardoor je in een oogopslag kan zien wie allemaal naar [jouw blog](#) doorverwijst.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

2.10.00

Na de Concorde (hoewel?) verdwijnt nu ook de [Hovercraft](#) uit roulatie.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Oh ja, weer nieuw blogs bijgevoegd (en enkele uitgeblogde blogs verwijderd): [Ib@rama](#) en [webblog.org](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Eigenlijk vindt mijn ego het bijzonder jammer dat ik niet vermeld word in deze [Weblogs? Echt niet VET dus!](#)-column van een vooralsnog anonieme blog-criticus.

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Een oproep aan alle Mechelaars een week voor de gemeenteraadsverkiezingen: wij zijn het beu dat [Mechelen](#) steeds afgeschilderd wordt als onveilig, verloederd en wat al niet meer. Mechelen is te mooi en te boeiend om haar over te laten aan angst, onbegrip en onverdraagzaamheid. Denk daar even aan op 8 oktober. En [geef je stem een positieve klank](#).

| [Comment \(0\)](#) | [Trackback \(0\)](#) | [link](#) |

Ubermorgen

[Arts and Entertainment](#)

[Links](#) | [Submit Site](#)

ubermorgen is an [artist](#) group created in [Vienna, Austria](#) in [1999](#) by Hans Bernhard (founder of [etoy](#)) and Lizvix. Behind ubermorgen we can find one of the most uncatchable identities - controversial and iconoclast - of the contemporary European techno-fineart avantgarde. ubermorgen is a German word for "the day after tomorrow" or "super-tomorrow".

Google Advertising Programs

[Home](#) | [About Google](#)

For Advertisers: [Google AdWords](#)

Reach people when they are actively looking for information about your products and services online, and send targeted visitors directly to what you are offering. With AdWords cost-per-click pricing, it's easy to control costs—and you only pay when people click on your ad.

Apply Online: Create ads and start managing your account—takes just minutes. [Learn more.](#)

Contact Sales: Find out how our sales team can help you reach your online advertising goals. [Learn more.](#)

Google Advertising Professionals: Become a better AdWords client manager with free online training & tools. [Learn more.](#)

For Web Publishers: [Google AdSense](#)

Earn more revenue from your website, while providing visitors with a more rewarding online experience. Google AdSense™ delivers ads targeted to your content pages and, when you add Google WebSearch to your site, AdSense delivers targeted ads to your search results pages too. With AdSense you earn more ad revenue with minimal effort—and no additional cost.

Apply Online: Maximize your revenue with relevant ads—takes just minutes. [Learn more.](#)

Contact Sales: If your site receives more than 20 million page views a month, our sales team can help customize the AdSense program for you. [Learn more.](#)

Google Business Solutions

Maximize your revenue

Google AdSense

Earn more revenue from your website, while providing visitors with a more rewarding online experience. Google AdSense™ delivers ads that are relevant to your content pages and, when you add Google WebSearch to your site, AdSense delivers targeted ads to your search results pages too. With AdSense you earn more ad revenue with minimal effort—and no additional cost.

- Discover more revenue with [Google AdSense](#)

If your site receives more than 20 million page views a month, our sales team can help [customize](#) the AdSense program for you.

If you have parked domain pages, learn more about [AdSense for domains](#)

Show ads relevant to the content on your site

Make corporate search easier

Google Search Appliance and Google Mini

No matter what your company's size, you can have the power of Google search on your corporate intranet and public websites. The Google Search Appliance and the Google Mini connect your employees, partners and customers to the information they need.

- [Learn more](#) about Google search solutions for your company

Add search to your site

Google WebSearch

Enable your online visitors to search the web with Google WebSearch. Google indexes billions of pages, images, and documents in hundreds of file types to help people find what they want.

And with Google WebSearch, they can find what they want from your website.

- Learn more about how to [add WebSearch to your site](#)

Take Google with you

Mobile Solutions

With Google Mobile WebSearch, your users can search not just the Mobile Web but the entire web. No other search engine can provide this service.

- Find out how you can offer [Google Mobile WebSearch](#)
